Dear Honorable City Council:

I am writing to ask you to vote against all vaccine mandates. Vaccine mandates violate fundamental human rights, notably the right to prior, free and informed consent for medical interventions. In a free society, everyone should have complete power and control over their own bodies. I urge you to do all in your power to ensure a return to the democratic principles upon which this country was founded.

Should employers/schools be able to mandate a medical procedure to their employees and then not pay for an injury should it happen? Though vaccines injure and fail in real-world conditions, legislation passed in 1986 left U.S. children and adults with a striking absence of legal protections from vaccine injury. Therefore, if any school or employer mandates vaccinations, citizens have no recourse to recoup lost wages or pay for medical bills. Why expect people to

take on all of the risk of injury and lost wages when vaccine manufacturers don't back their products? And especially when the chances of survival from COVID is 98.23% for adults and even higher for children at 99.985%.

President Biden's announcement a few weeks ago of coercive measures to vaccinate government workers and others including children was a red flag to all who value freedom. Not only is his plan a violation of our Constitution, it also violates the Nuremberg Code, designed to ensure informed consent for any medical procedure upon humans.

It's time to end the use of COVID-19 as a pretext for governmental coercion and mandates. The public is waking up to the cascading negative impacts upon society from elected officials wielding unprecedented power over the citizens of this country. As your constituent, I urge that you:

--Do not support any legislation or directive coercing people or mandating medical interventions--including vaccines

--Do not support any legislation or directive requiring people to wear masks

--Do not support any legislation or directive that deprives people of the right to congregate

--Do not support any legislation or directive establishing lockdowns

--Do not support any legislation where employers can enact coercive tactics to overrule a person's rights to body autonomy

Also, would you please answer the following questions:

1. Would you please advise me of the approved legal status of the Covid-19 vaccine you consider to be acceptable and whether the vaccine is "experimental"?
2. Would you please provide the details and assurances that the vaccine has been fully, independently, and rigorously tested against control groups and the subsequent outcomes of those tests?
3. Would you please advise of the full list of contents/ingredients of the vaccine that you are requiring me to receive and if any of the contents are toxic to the body?
4. Would you please fully advise me of all of the adverse reactions associated with this vaccine since its introduction?
5. Would you please confirm that the vaccine you are requiring me to take is NOT "experimental mRNA gene altering therapy"?
6. Would you please inform me when the Covid-19/SARS-CoV-2 virus has been isolated and by whom?
7. Would you please confirm that I will not be under any duress from you, in compliance with the Nuremberg Code?
8. Would you please advise me of the likely risk of fatality, should I be unfortunate enough to get Covid-19 after being vaccinated with the vaccine that you are requiring me to take? Also, would you please inform me what would be the likelihood of recovery from a severe adverse reaction from the vaccine that you are requiring me to take?
9. In the event I take the Covid-19 vaccine because you are requiring me to take it, will you be liable in the event I have a severe adverse reaction? Would the vaccine manufacturer be liable in the event I have a severe adverse reaction? Who would cover my medical expenses in the event I have a severe adverse reaction?
10. It is my understanding that you intend for the public, including children, to take the Pfizer, Moderna, AstraZeneca, or Johnson & Johnson Covid-19 vaccines. Are there other Covid-19 vaccines that you intend to include on the list of your mandated Covid-19 vaccines?

Lastly, I ask that you defend our Constitution as you swore under oath to do when you took office.

President Biden said that 164 million American adults have received the COVID vaccine. With

approximately 333 million adults in the U.S., that means over 50% of people in America have not gotten the vaccine.

No adult or child should be injured or die from a vaccine imposed upon them by their government.

Sincerely,

Maria Mejia
