**Comments for Public Posting:** I would like to add my support to the motion, to require the AES license in order to perform Reg 4 tests. I am the organizer for Sprinkler Fitters local 709 and my job is to recruit new members. We interview and test their knowledge. We compare the test results with how our apprentices of different levels scored and place them accordingly. Most of the time their knowledge of systems is about 1/3 of our trained members compared to their years working in the field

**Comments for Public Posting:** I would like to add my support of the motion to require the AES license be added as a requirement to become a reg4 tester. one of the many skills that a tester must have is keeping updated on current codes, devices and techniques. A major part of the AES license is the continuing education requirement that the licensee complete 30 hours of journeyman training every 3 years.
