Comments for Public Posting: Another concern should be the coordination of the LAFD which inspects fire hydrants and the DWP which repairs defective fire hydrants. Many hydrants have been broken into and disabled by homeless encampments. It's rumored from people on the scene, Venice Boardwalk fire, that the LAFD had to call in water trucks because the nearest fire hydrant was disabled losing valuable time causing the building to be completely destroyed. Maybe the safety committee could address the fire hydrant situation. Stick building use to be only 3 stories above the podium. Then 4. Now 5. Will we continue to raise the height to keep costs down?
