Subject: Stop Automation
To: john.white@lacity.org <john.white@lacity.org>

My name is Michele Grigsby #133161. I currently work for the I.L.W.U and we are pleading that the counsel hears our cries of what automation will do to our economy if permitted to continue moving forward. The people who work create money to purchase homes, cars and a way of living.

Automation: Robots don't contribute to buying homes, cars and a way of life.

People on counsel such as yourself, what if you were to be replaced by robot's automation? This act would not perform the duties of your job in the best way.

Please hear our request to stop automation before it completely crumbles our way of life.

Sincerely,

Michele Grigsby

Mr. John White

I have noticed APM Terminals president and spokesmen are continually making it a point to bring up the Los Angeles Port Clean Air Act. There are other options then robots to achieve this goal. It's by humans using electric machines, yes men and women to continue to move cargo on American land. Humans pay local, city and federal taxes not robots. I believe you to be an honest and forthcoming man, so please do not be clouded by this billion dollar foreign company. Their bottom line is to save money not jobs. I am also sure after the installation of the electrical charging station they will be requesting subsidies for their high electric usage just as the Middle Harbor Terminal is given by the City of Long Beach. Thank you for your time, it honestly feels amazing to Wray letter to a human and not a ROBOT.
