Comments for Public Posting: Please stop letting politics ruin our pension system. While I'm writing to you, please stop confirming underqualified commissioners appointed by any Mayor.

Comments for Public Posting: I SUPPORT Council File 19-1577. City employees need to know their pension funds are safe, and aren't making climate change worse. Residents shouldn't have to worry about having to rescue a pension fund because of failing investments in a declining industry.

Comments for Public Posting: I fully understand the awesome responsibility of the LACERS board to maintain solvency for the pension fund. However, we are fast approaching the tipping point where renewables are less expensive than fossil fuels. Investment companies like Blackrock, large corporations like Amazon and cities like San Francisco have recognized their responsibilities in reducing greenhouse gases AND making wise financial decisions. The City of Los Angeles has an opportunity to be a national leader and should step up to the plate.
