Comments for Public Posting: Suggestions: A housing unit (like a Tuff Shed) of about 300 sq. ft. for 1 or 2 person household could be placed on County property. It would have full plumbing and electrical. Some areas where there have been fires could be developed. Rather than tear down existing County property, repurpose for housing. Utilize our students studying architecture at the various colleges and universities to develop plans for "communities". The developers who were given funding for housing construction with the proviso 10% of the apartments had to be low income for 12-15 years, be required to extend for 25 years or more.
