Comments for Public Posting: commenting for item #30 the re-enforcement of parking restrictions and ticketing without proper notice and while the underlying issues of working from home are still in place is unacceptable. This places an unfair target on unhoused individuals whose only option has been to live in their vehicles and the city has continued to fail during this pandemic. And this proposition proposes to penalize those individuals. The already scarce parking is now non-existent as most people who can are working from home leaving no place to move cars during street sweeping hours. Do not place more economic burden on your cities working class population. If the city cannot balance the budget look at defunding the police or taking from over-bloated budgets elsewhere.
