Comments for Public Posting: The past 3 years have been a nightmare. We have been held hostage by our tenants who have not suffered financial distress from Covid, yet have exploited the eviction moratorium. They've purchased two vehicles, new furniture and new appliances We have not seen any rent. I am doing my best to repair my units in spite of limited rent receipts. Despite my efforts, the tenants have threatened to sue us various times. Given the current system, this would be financially devastating, to lose what we've worked so hard for all of our lives. Please do not extend the eviction moratorium any longer. Housing providers have done enough. We have sacrificed financially, emotionally and psychologically. With your help, I hope to survive so that I may continue to provide affordable housing to the community. We were renters ourselves. We understand how difficult it is the survive. Sincerely, Enrique
