Comments for Public Posting: How is DCR & PLUM Committee going to protect social equity applicants that have been holding onto properties since Sept 3rd 2019 waiting on the PCN process to start when EMMD's have relocated into a community plan area after the start of Phase 3 license process and now are within 700ft from multiple applications? If an EMMD has an abandoned location and not in operation how is the DCR going to protect the Social Equity application from being disqualified because of the sensitive use of 700ft from that location?
