**Comments for Public Posting:** The Climate Crisis needs to be confronted on the world scale, national scale, state scale and local scale. Companies have been urged to make policy and do business with the Climate Crisis in mind. But we all know that is not what corporations do. They only act in a way that affects the bottom line in a positive manner. That is why it is imperative that the council votes in favor the of motion 20-0492. We need to steer our insurance business away from the companies that invest and underwrite the fossil fuel industries. This is a real way to confront the Climate Crises on the local level. But before we can act in an informed way we need to have the information that motion 20-0492 will provide. Again, I strongly urge you to support this motion for all of our futures. Thank you to Council-member Bob Blumenfield for championing this measure from its outset.

**Comments for Public Posting:** I support the motion to review climate averse insurance companies used by the city of Los Angeles. Evidence of climate change can be be seen all over the country and the state. The need to act is now. We need to stop supporting insurance companies that insure fossil fuel companies.
