Comments for Public Posting: My name is Ronni Solman. I am a retired LAUSD elementary school teacher and a member of Socal 350 climate action. I want to support the proposal to create a rating system for the city's potential insurers that will reflect their investments in fossil fuel operations. This proposal is a win-win for Angelenos. Not only will we as taxpayers not be footing the bill for the stranded assets that we believe fossil fuel investments will become, but we will proudly stand with our city as it invests in a renewable energy future. Finally, we have leadership in the White House that will support a radical and quick approach to addressing the climate crisis which is what our people and planet need! California and especially Los Angeles have been leaders in the past; let us lead now!! Please, vote to accept this proposal. Thank you.

Comments for Public Posting: I support 20-0492 Motion (Blumenfield - Bonin) relative to instructing the CAO, Risk Management, with the cooperation of Department Chief Sustainability Officers, to report with a scoring system to rate insurers based on the extent to which they invest in companies engaged in fossil fuel operations, and request the CAO and the Airport, Water and Power, and Harbor departments to report with options for how to take the above rating into account when choosing companies from which to purchase or renew insurance.
