Comments for Public Posting: I support continuing to encourage people to work from home in Los Angeles wherever possible. It will make our air cleaner, improve traffic, and help with climate change. I know so many people considering leaving LA because of the traffic and the air pollution. Encouraging companies to encourage their employees to work from home would do wonders for our city and hopefully persuade people not to pack up and leave when possible. Thanks.

Comments for Public Posting: I love the idea of more people working from home to help relieve traffic congestion and, most of all, pollution in our city. Let's do research and let's open up dialogue within all industries about the opportunity we have right now to make some positive changes in light of this horrible pandemic. Thank you, Councilman Ryu!
