

## Communication from Public

**Name:** I want Paul to know it was me (who reported him to ethics)

**Date Submitted:** 11/03/2022 01:26 AM

**Council File No:** 20-0608

**Comments for Public Posting:** Why did the amending motion make this even worse? Why are you creating something outside the auspices of ethics? Is it because you don't respect them (we've seen the video) or is it because you're under multiple investigations and this is a way to weaken the agency? You want to create a whole new agency rather than empower what we already have. Give me a gosh darn break. Everyone sees through your last minute stunts. You flatly lied in council when discussing this motion. It was not bottled up by council. I know scapegoating Nury is all the rage but you were never in her dog house Paul. This got heard by both committee and council. Then the file like so many things you do Paul was abandoned. Sort of like those poor animals at the shelter. Your lack of follow through and ability to follow the rules is really coming back to bite you big time. Animals. Ethics. Land use. It's the same character arc over and over again. Skirting the rules. No real interest beyond your own self interest. LA deserves better than this. Let's hope we get better than this n
