Honorable Councilmember De Leon and PLUM Committee Members,

I am concerned about the insufficient study of Greenhouse Gas (GHG) emissions in the Olympic Tower Project.

The Greenhouse Gas analysis contained in the Project's Environmental Impact Report (EIR) fails to comply with CEQA Guidelines. Specifically, the GHG plans relied upon in the EIR are entirely aspirational and lacking any binding, project-specific requirements. Despite the Project's GHG emissions exceeding thresholds routinely used by the City for other City Projects, the City erroneously refuses to apply the same thresholds now to this project.

Given the insufficient Greenhouse Gas emissions analysis for this project, I urge the PLUM Committee not to approve the Olympic Tower Project.

The Greenhouse Gas analysis contained in the Project's Environmental Impact Report (EIR) fails to comply with CEQA Guidelines. Specifically, the GHG plans relied upon in the EIR are entirely aspirational and lacking any binding, project-specific requirements. Despite the Project's GHG emissions exceeding thresholds routinely used by the City for other City Projects, the City erroneously refuses to apply the same thresholds now to this project.

Given the insufficient Greenhouse Gas emissions analysis for this project, I urge the PLUM Committee not to approve the Olympic Tower Project.

On top of that, Downtown Los Angeles does not need another high-rise hotel and condo set that only serves the most affluent members of our city. To erect another monument to the rich and powerful mere blocks from the epicenter of LA's ever growing homeless crisis would be nothing short of abysmal, and quite frankly, malevolent.

We need to stop building these sparkling sadistic spires that end up sitting vacant because their target audience—fickle financiers and trust fund trashbags—gets bored with them, and none of the city's immense, struggling, lower and middle class citizens can even afford to hope to occupy such spaces.

So again, I beseech you, do not support the Olympic Tower Project. It isn't even remotely what Los Angeles needs right now.

Honorable Councilmember De Leon and PLUM Committee Members,

I am concerned about the insufficient study of Greenhouse Gas (GHG) emissions in the Olympic Tower Project.

The Greenhouse Gas analysis contained in the Project's Environmental Impact Report (EIR) fails to comply with CEQA Guidelines. Specifically, the GHG plans relied upon in the EIR are entirely aspirational and lacking any binding, project-specific requirements. Despite the Project's GHG emissions exceeding thresholds routinely used by the City for other City Projects, the City erroneously refuses to apply the same thresholds now to this project.

Given the insufficient Greenhouse Gas emissions analysis for this project, I urge the PLUM Committee not to approve the Olympic Tower Project.
