Comments for Public Posting: My name is Luis Calderon and I am a Jordan High School parent. I have grown concerned on the health risks my daughter will face attending the school if Atlas Recycling Site isnt removed. It's not right to have a site like this next to a school. This may have a negative affect on the school. This is definitely a health issue for our children, but it will eventually affect them academically if students decide to no longer stay in Jordan because of this dangerous site. Please remove this site. Its causing a health risk to our community. Thank you for your time.
