**Comments for Public Posting:** Slow streets are a great addition to our city and vital for our residents to be safe on the streets. Please continue to support this initiative.

**Comments for Public Posting:** I was in favor of slow streets for Palms, even though it pushes traffic onto my neighborhood street. In light of the ongoing and pervasive roadwork happening for the construction of half a dozen new mixed use buildings here, I have to withdraw that support. Until traffic is no longer stalled and diverted for the construction to the point that traffic has to go through the slow streets or add to the small open streets, slow streets in Palms need to be put on hiatus.

**Comments for Public Posting:** I see few people actually using the slow streets. I do however see traffic jams and cars that accelerate from a red light that turns green to one that invariably turns red. Many of the traffic snarls can be improved if traffic signals were timed so they would not immediately change when accelerating. When is this city going to time signals, post signs saying slower traffic keep right except to pass.. trucks must travel in the right lane, except to pass. This is pressing not slow streets. Motorists need support and help. The objective has to be the traffic flow and this city has abandoned its motorists in favor of road diets and bike lanes. The time to focus on traffic and improving the flow is long overdue. HELP!!!
