Hello,

I live in Toluca Woods. This is a very family oriented community with lots of kids who need a place to play, yet we are extremely park poor. I love the idea of permanent slow streets, as it would give our kids a safe place to enjoy their community, play outdoors, ride their bikes, and generally gain freedom. And in my neighborhood, we have almost no sidewalks. Having a safe place to walk my dog without acute fear of practically flying cars would make a huge improvement on quality of life. Please pass this motion.

Thank you,

Hannah Globus

Hello,

I currently live in West Hollywood but commute all throughout Los Angeles. I love the idea of permanent slow streets in the city because they can act as bike/walk "freeways". They give me a safer option for commuting which reduces congestion on the busier streets for cars because A) I'm not driving now, and B) nobody has to slow down to go around me on the main streets.

Additionally I love it in my neighborhood as I'm tired of my street being a cut through for cars trying to avoid the main streets. The number of cars running stop signs and speeding making it dangerous for my wife and I when walking our dog. The slow street by our house is like having a park or the Highline in new york just down the street from us.

These are incredible additions to our city, I'd love for them to be expanded and made permanent so that more and more people can feel safe taking other forms of transportation - like bikes, scooter, skateboards, whatever they like - making our city greener, quieter, safer, and more accessible.

I welcome anyone from the city reaching out to me personally to help with this initiative.

Thank you,

Chase Spenst
