Comments for Public Posting: I am in support of the Senior Meal Emergency Response Program / Great Plates / Food and Delivery Assistance / COVID-19 Pandemic. Often nutrition is one of the first necessities to be cut when funds are tight, swapping healthy meals for unhealthy meals and sometimes leading to skipping entire meals. With the economy injured and the pandemic worsening, it is vital that LA residents remain healthy to provide for their families and be healthy in the face of possible COVID-19 infection. When it comes to seniors, it is especially important that they are being provided nutritious food without the need to leave their homes and risk infection.
