Comments for Public Posting: Jamison Properties are horrible neighbors! Why should Ktown allow them to build more in our neighborhood when they don't take care of their existing properties?? They don't upkeep Liberty Park on Serrano and Wilshire and it's a City Historic Monument! Renters in their buildings live with broken elevators in constant disrepair. The Central Parking Lot between Irolo and Mariposa, 7th and Wilshire (3440 Wilshire - site of this project) only gets cleaned (with a leaf blower) approximately every 2 months (8/28/20, 10/16/20). Human feces, urine, dog feces, dog urine, rotting food are left inside and outside the 7th Avenue entryway and inside the lot. They are not ADA compliant so disabled tenants cannot rent monthly spots. (curbs, no railings, no handicapped spots on the basement and 1st floor, only access to handicap on upper floors is the elevator which is closed weekdays at 7pm and weekends)

1. Brown Act Violations Translations. Nov 5 and May 14 (Meaning this meeting is predicated on a meeting which should have been invalidated in the first place.) i.e. Requested translation for May 14th which was not provided.
2. Ktown is hosting over 90 development sites within their boundaries in various stages of construction. 37 are Jamison projects. This does not include 23 of their existing properties which are in varying degrees of neglect and disrepair. We are tired of being accused of being NIMBYs when we no longer have a backyard to build in and very little to show for all the park fees and other monies that these construction projects generate. We are the second most dense neighborhood in America after Manhattan, so where is our Central Park?!! See *Ktown Construction Map*:
https://www.google.com/maps/d/u/0/viewer?fbclid=IwAR1gaby350Z9bbT3Actoycd4lQG81Mv0gJ4BLYJu0Z4V68y-sl_x89uOcVw&mid=1qJJlt0AfB9G8Ep437MOCmwkDemwiveU&ll=34.06639222857346%2C-118.29603725&z=14
3. Ktown is hosting over 90 development sites within their boundaries in various stages of construction. If the pandemic has shown us anything it's that we, the 130,000 stakeholders in Ktown are in desperate need of public green space!! Not to be confused with open space on rooftops which only high end renters can access. Liberty Park, located on Wilshire and Serrano which you designated as a city historical monument in March 2018 is one of the few green spaces we have. We would like you to note that Jamison Properties, the owners, has not been maintaining and watering it despite it being a protected city historical monument. During a global pandemic, open green space is essential for mental and physical well being. We cannot forget that in our rush to solve the affordable housing shortage.
4. When asked, we've been told that the CPC does not use an LA Construction Map to track the incredible number of projects that are in progress simultaneously, compounding noise, air pollution, dumping and sidewalk closures. Yet here is this map....so why can't they use this?)
<https://www.google.com/maps/d/u/0/viewer?mid=1AFWUU1vthpys6VWG9PhlJPz3vY0&ll=34.06118783591463%2C-118.29803796568149&z=16>
5. During the last several months, the WCKNC PLUM committee members have voiced their concerns about developers taking advantage of TOC (Transit Oriented Communities) credits giving the bare minimum required within the law but not giving back to the community that hosts them! Ktown suffers from a lack of affordable housing, public green spaces, street parking and poorly maintained streets and sidewalks. TOC projects have done little to alleviate these shortcomings despite the spike in construction over the past few years. But it has increased the number of vacant rental units in our neighborhood.
6. Jamison has not responded to WCKNC and stakeholders' many requests over the last several months for a town hall regarding security, safety, illegal dumping, maintenance, tree removals, and general upkeep.
7. In the CPC meetings we've heard several public commenters using the same script repeating that they want to make a "middle class living" and working on these developments will allow them to do that. Sure they will have employment for the 1-2 years they are required on the job site but we find it incredibly hard to believe that they

will be able to afford to house their family in a building where the initial rent will be at least \$5-\$6 a sq foot. (As Alan Park, a representative of Jamison has stated in past PLUM meetings.) A 500sf studio would cost at least \$2500. That's \$1000 -\$1200 more than a comparable sized studio in this neighborhood today. Most renters who can afford these units won't be riding public transportation, the very thing the TOC projects were built to promote.

8. Looking ahead to climate change → 3440 was first proposed in 2016 and its overall design and 'green' features are now out of date and are unsuitable for the LA we must build to resist climate change and bolster community resilience. To that end, the project also endangers local wildlife due to its height and massing, doing far more harm to the neighborhood than good.
9. This project was originally presented in 2016, Why is it still in proposal stages? During the May 14th CPC meeting members expressed their concern for the length of time this project has been under consideration and yet have granted Jamison at least 4 continuances since then including the most recent one on Nov 5, 2020.
10. Affordable housing: Income brackets ('low,' 'moderate,' etc.) are misnomers in our community as the brackets (derived from LA County data) are vastly out of scale with the local economy and therefore are deceiving. ('Moderate' bracket is nearly 2X the median income in our neighborhood.) What is affordable for LA County is not affordable for Koreatown.
11. What protocol is in place to verify if the 10% affordable housing is being promoted and utilized for that purpose? How do folks in the community know it's available to them?
12. The average income of WCKNC (Wilshire Center Koreatown Neighborhood Council) neighborhood is 35K per year. There is no need for more luxury units. We need affordable housing and everyone on the city council knows this. Why on earth would anyone with a luxury budget want to live in a Jamison Building? They have allowed the A+ Equitable Bldg, once a jewel on Wilshire to fall into disrepair according to tenants that I have spoken with. My personal experience confirms this. My mother had a business in the building for many years and today it is shabby and dirty
13. Jamison likes to pick and choose which 'urban scale' they wish to honor based on which project they're pushing through. They will conveniently ignore whichever prominent structures do not serve their agenda for that particular project, yet expect to dupe the Neighborhood Council and community as a whole, marketing two VERY different projects on the same intersection (one 7 storeys and the other 28+). Even then, the arguments are lazy (demonstrated by misleading and low-effort renderings) and any amount of scrutiny shows that these arguments are blatant attempts to ignore key architectural masses which define the local urban environment.
14. No EIR (Environmental Impact Report) was required even though the project has a subterranean parking lot less than 100 feet from The Barclay (1927) and the Robert F.

Kennedy Community Schools (the single most expensive public school project in the nation serving thousands of local youth from Kindergarten through High School).

- a. Studies have shown that increased levels of air pollution are clearly associated with a reduction in test scores.
 - b. Noise pollution has also been observed to have a measurable impact on the educational outcomes of students, contributing to poorer mental and physical health, as well as lower measurable educational outcomes.
 - c. Lower educational success rates have been shown to be connected with higher rates of violent and property-related crime. It is the community into which Jamison seeks to forcibly insert this project that will suffer from this.
15. Jamison and their top managers contributed over \$11K to just one of Herb Wesson's runs for CD10. They use their power and money to the detriment of the surrounding humans. Jamison is not a good citizen and they do not want you to do anything but cash their checks and approve their plans. I challenge this board to stand up and do the right thing for the City and Koreatown.
16. Several of the Former PLUM Committee Chairman's recent reports have been discovered to be misrepresenting committee votes, changing "conditions" to "recommendations". seemingly favoring developer approval. It has happened enough to note as a possible pattern and questions the validity of past WCKNC PLUM and consequently the EXEC BOARD votes.

Comments for Public Posting: Construction on these buildings is a bad idea. Before the pandemic, it would devalue the surrounding neighborhood, both ruining the vintage aesthetic of the surrounding streets (which is a major incentive for film productions that, in turn, provides resources for maintaining the residential area), and putting luxury housing in a traditionally low-income area. This is gentrification, plain and simple. The majority of the residents in this area make well below the median income in LA (pre-pandemic) and these apartments will be priced well above the median income, with a laughable amount dedicated to "affordable housing." It is also exacerbated by the pandemic. In a time when people are forced to work from home, and when we have a highly infectious disease that attacks the respiratory system, we're going to have noisy construction kicking up all kinds of debris into air that is already at a dangerous EQ, in a highly-concentrated residential area. I understand they didn't bother with an EIR? That seems wildly irresponsible. All of this aside, Jamison has a history of negligence and not properly maintaining their existing properties. Why should they be allowed to build even more that they won't properly maintain? They skirt building codes (see the lack of ADA accessibility in their parking structures), and allow their properties to become disgusting/fall into disrepair. Please vote no on negligent building companies.

Comments for Public Posting: Regarding File # 20-0894 I am asking that you reject 3440 Wilshire Project. It is your responsibility to know just what you have before the board. The CPC should understand that we are already the highest density area with little green space in violation of the spirit of the Community Plan. We are already hosting 90 development sites. Please come spend an hour in the area and you will feel the how the aggressive TOC and other projects are stressing the residents . The applicant is not a good neighborhood citizen. Jamison Services twenty three existing sites in the WCKNC area are poorly maintained and efforts to address issues falls of deaf ears. The corruption concerns about City Hall and this committee extend to this particular project. This project is not needed or wanted. Jamison Services are the bullies of the area and I am sick of their neglect of the heritage buildings they control. Several of the Former WCKNC PLUM Committee Chairman's recent reports have been discovered to be misrepresenting committee votes, changing "conditions" to "recommendations". seemingly favoring developer approval. It has happened enough to note as a possible pattern and questions the validity of past WCKNC PLUM and consequently the EXEC BOARD votes. Ktown are in desperate need of public green space!! We are owed a Park and not matter what we do we are ignored. During a global pandemic, open green space is essential for mental and physical well being. We cannot forget that in our rush to solve the affordable housing shortage. The applicant has terrible labor relations . In the CPC meetings we've heard commenters using the same script repeating that they want to make a "middle class living" and working on these developments will allow them to do that. Sure they will have employment for the 1-2 years they are required on the job site but we find it incredibly hard to believe that they will be able to afford to house their family in a building where the initial rent will be at least \$5-\$6 a sq foot. This board has violated the Brown Act . There was no translation available for Nov 5 and May 14 meetings as requested by stakeholders Finally the design fails on every scale. It is old tech and will be obsolete by the time it is finished. We do not need anymore luxury husing. The glut that is about to be on the market will further create ghost buildings no one can afford surrounded by the tents of homeless families. The design is out of scale and

misrepresented on their renderings. There was no EIR (Environmental Impact Report) required even though the project has a subterranean parking lot less than 100 feet from The Barclay (1927) and the Robert F. Kennedy Community Schools (the single most expensive public school project in the nation serving thousands of local youth from Kindergarten through High School). Why is this allowed? I beg you to take a holistic view of what your decisions are doing to our hard working immigrant community. Approval of this project will be a stain on the City, CPC and negatively impact too many stakeholders . I cannot see any positive impact this project will bring. I ask you say no and put stakeholders first. Sincerely Natalie C

Comments for Public Posting: Historic buildings are the heart and soul of Koreatown and are the living history of LA and our evolving communities. While striving city can and should include modern and historic buildings co-existing side by side, the developments by Jamison threaten historic neighborhood buildings and the stability of their residents on Irolo, Normandie, and Mariposa. This building will replace the parking structure that residents of these Art Deco buildings rely upon for parking. These older buildings have no parking structures, and street parking is not adequate enough to serve residents of this neighborhood or Koreatown at large. Residents will be forced to compete for parking spots at farther away garages. This change will almost certainly mean an increase in cost of parking since most of the neighborhood garages are owned by the same company, as well as pose a safety concern for people who have to come home late at night from their jobs and will be forced to park farther away from their residence. Lack of access to parking will also force many people out of these rent-controlled buildings, and out of Koreatown, leaving behind empty and undesirable apartments. I worry that this will mean the demolition of some of Koreatown's most iconic apartment buildings and historic landmarks. This will truly affect the nature of this city if Jamison is allowed to set this precedent. There is currently not enough affordable housing in La, and even less with adequate parking solutions in this commuter town. Koreatown relies on local residents to pack restaurants and coffee shops and the growing number of boutiques. These businesses stay afloat because people can afford financially and practically to live here. These plans for high-rises that replace parking structures threatens that if they provide no realistic alternative.

Comments for Public Posting: As a stakeholder, I am vehemently opposed to any future Jamison Properties projects being approved for further construction. This corporation is a blight to our community. Jamison Services does not maintain its Central Plaza parking structure. It is covered in garbage and human excrement. Additionally, the lot is not ADA accessible in spite of what Jamison representatives may say. As far as contributing to climate change, 3440 was first proposed in 2016 and its overall design and 'green' features are now out of date and are unsuitable for the LA we must build to resist climate change and bolster community resilience. To that end, the project also endangers local wildlife due to its height and massing, doing far more harm to the neighborhood than good. Please watch:

Comments for Public Posting: We absolutely do not need another monstrosity in Ktown built by mega-developers and that has no long-term affordable housing! Jamison has built enough properties and they all are insults and affronts to Koreatown as they do not serve the community and they do not create housing that can be used by most of the residents. This project has a very small amount of Moderate-income housing, but we all know what that means- it EXPIRES! And it is not affordable in the first place. It is starting to seem as if the City Council is nothing more than an enabler of BIG DEVELOPMENT and that the Council Members do not serve their constituents. In fact, it seems like you hate us. You are literally being raked over the coals about your ineptitude in finding solutions for the housing crisis, but you can't put 2 and 2 together. Stop greenlighting massive corporate development projects that do not provide low income housing! STOP IT UNTIL YOU FIX THE PROBLEMS AT HAND.

Comments for Public Posting: I am writing in strong OPPOSITION to the proposed Jamison project here in Koreatown, my home for the past 8 years. I live in the Langham apartments and will be directly affected. I also believe it's relevant to note that I am currently in Graduate School working towards a Master's in Urban Sustainability and a substantial part of the program studies the connection between over-built cities and climate change. The Mayor of Los Angeles recently put forth a Green Deal for LA. The 2016 standards of this proposed Jamison project no longer meet the new standards that this City of LA is striving to achieve. The City claimed to want to be a leader on this critical issue- exceeding national standards and timelines. Approving this project with lax climate change standards and NO EIR is truly unconscionable. Either the City shows leadership, values and integrity with consistency, or the public message of sustainability simply rings hollow. I implore the Commission to recognize the harm that will be done to residents, wildlife and the environment with an approval of this project. The air pollution, noise pollution, disruption of wildlife habitats, increased heat index, increased water usage in this area, increased trash production, increased CO2 output and decreased green space will devastate this area for generations to come. No amount of money will undo the harm. This will set the City back and show the leaders to be hypocrites and not trailblazers in the influential realm of climate justice. Please vote NO.

Comments for Public Posting: As of 11.17.20 we have collected 580 signatures on Change.org with a majority identifying themselves as Koreatown residents (see zip codes). Plus 86 Hard Copy signatures collected within the blocks of Mariposa, Wilshire Blvd, Irolo & Normandie surrounding the project site. We feel we would have been able to collect more had we been able to congregate fully. This also excludes our Spanish speaking neighbors towards 8th Ave who may not be readily reached through social media channels. Change.org Petition: <https://www.change.org/p/jamison-properties-stop-two-tower-luxury-developments-in-koreatown-la> We are opposed to this project which is grossly out of scale with the neighborhood! Jamison is manipulating the scale when they show you renderings with a NW view that shows the Equitable Building towards Wilshire Blvd and omit the 1920's hotels turned apartments that line the streets directly across on 7th Ave, Normandie and Mariposa. The highest building in the Mariposa Normandie Historic District is the Langham which stands at 7 stories. These towers are 23 and 28 stories high and directly across the street on 7th St. It is interesting to not that Jamison is also proposing an 8 story building across the street, 2 doors down from the 3440 Wilshire Blvd project at 715 S Mariposa that they are also claiming "is in scale with the surrounding neighborhood". So which is it?
