Dear Clerk PLUM Committee,

I am an Angeleno writing to express concern about our region's affordable housing shortage and its impact on the future of our city. I am frustrated by increasing homelessness, by the burden that displacement and gentrification place on our neighbors, and by community members and elected officials continuing to promote exclusion in our neighborhoods.

Exclusionary zoning and land use practices have led to an undersupply of affordable medium- and high-density housing near jobs and transit, and have perpetuated segregated living patterns and the exclusion of historically disadvantaged communities. The housing and homelessness crisis, together with this year's COVID-19 pandemic, severe wildfires, and civil unrest, illustrate the need for a totally new approach to solving our city and region's housing crisis.

Los Angeles has a valuable opportunity to address the need for more housing in a way that furthers equity, environmental sustainability, and housing justice. California's RHNA requires Los Angeles to plan for 456,000 new homes by 2029 through its housing element update, including 184,000 that are affordable to lower-income households. I believe every neighborhood must do its part to meet this goal.

Los Angeles needs a housing element update based on fair neighborhood-level housing growth targets. This will reduce traffic and GHG emissions, increase access to jobs and transit, advance income and racial integration, roll back exclusionary zoning, and strengthen the region's economy. Therefore, I respectfully urge you to pass the City Zoning Code Update Ordinance in order to ensure that we move away from land-use and zoning decisions that have result in 66,000 unhoused folks, that have 1 million people living in overcrowded homes, that continues to displace and push-out BIPOC communities, and contributes to urban sprawl which worsens both our climate and traffic conditions.

Thank you for your consideration.

Personally sent by Carol Gordon using Abundant Housing LA's Advocacy Tool. Abundant Housing LA is a grassroots pro-housing organization.

Sincerely,
Carol Gordon

Dear Clerk PLUM Committee,

As an LA resident of 10 years who worked hard for 9 of them and was finally able to buy a house of the westside there's nothing more that I want than to make housing more affordable for all in LA. LA is in crisis due to 40 years of neglect towards our housing stock and to get out required drastic action. We must build to the RHNA numbers and we must concentrate it in areas that have plentiful jobs and transit. Save our city from itself.

-Brian

Therefore, I respectfully urge you to pass the City Zoning Code Update Ordinance in order to ensure that we move away from land-use and zoning decisions that have result in 66,000 unhoused folks, that have 1 million people living in overcrowded homes, that continues to displace and push-out BIPOC communities, and contributes to urban sprawl which worsens both our climate and traffic conditions.

Thank you for your consideration.

Dear Clerk PLUM Committee,

I am an Angeleno writing to express concern about our region's affordable housing shortage and its impact on the future of our city. I am frustrated by increasing homelessness, by the burden that displacement and gentrification place on our neighbors, and by community members and elected officials continuing to promote exclusion in our neighborhoods.

Exclusionary zoning and land use practices have led to an undersupply of affordable medium- and high-density housing near jobs and transit, and have perpetuated segregated living patterns and the exclusion of historically disadvantaged communities. The housing and homelessness crisis, together with this year's COVID-19 pandemic, severe wildfires, and civil unrest, illustrate the need for a totally new approach to solving our city and region's housing crisis.

Los Angeles has a valuable opportunity to address the need for more housing in a way that furthers equity, environmental sustainability, and housing justice. California's RHNA requires Los Angeles to plan for 456,000 new homes by 2029 through its housing element update, including 184,000 that are affordable to lower-income households. I believe every neighborhood must do its part to meet this goal.

Los Angeles needs a housing element update based on fair neighborhood-level housing growth targets. This will reduce traffic and GHG emissions, increase access to jobs and transit, advance income and racial integration, roll back exclusionary zoning, and strengthen the region's economy. Therefore, I respectfully urge you to pass the City Zoning Code Update Ordinance in order to ensure that we move away from land-use and zoning decisions that have result in 66,000 unhoused folks, that have 1 million people living in overcrowded homes, that continues to displace and push-out BIPOC communities, and contributes to urban sprawl which worsens both our climate and traffic conditions.

Thank you for your consideration.

Dear Clerk PLUM Committee,

I am an Angeleno writing to express concern about our region's affordable housing shortage and its impact on the future of our city. I am frustrated by increasing homelessness and by community members and elected officials continuing to promote exclusion in our neighborhoods.

The housing shortage affects all of us--not just low-income communities but anyone who wants to have their kids settle in the area, hire a plumber, have nurses in a nearby hospital, or attract talent to a university or professional firm. When I moved here as a newly married 26-year-old in 1986, housing was plentiful and affordable. It was one of the things that I loved about L.A., and I hated seeing the "anti-growth" movement grow to block opportunities for the next generation of 26 year olds.

Exclusionary zoning and land use practices have led to an undersupply of affordable medium- and high-density housing near jobs and transit, and have perpetuated segregated living patterns and the exclusion of historically disadvantaged communities. The housing and homelessness crisis, together with this year's COVID-19 pandemic, severe wildfires, and civil unrest, illustrate the need for a totally new approach to solving our city and region's housing crisis.

Los Angeles has a valuable opportunity to address the need for more housing in a way that furthers equity, environmental sustainability, and housing justice. Los Angeles needs a housing element update based on fair neighborhood-level housing growth targets. This will reduce traffic and GHG emissions, increase access to jobs and transit, advance income and racial integration, roll back exclusionary zoning, and strengthen the region's economy. Therefore, I respectfully urge you to pass the City Zoning Code Update Ordinance in order to ensure that we move away from land-use and zoning decisions that have result in 66,000 unhoused folks, that have 1 million people living in overcrowded homes, that continues to displace and push-out BIPOC communities, and contributes to urban sprawl which worsens both our climate and traffic conditions.

Thank you for your consideration.

Dear Clerk PLUM Committee,

I am an Angeleno writing to express concern about our region's housing shortage and its impact on the future of our city. I am frustrated by increasing homelessness, rising rent, and by community members and elected officials continuing to promote exclusion in our neighborhoods.

Exclusionary zoning and land use practices have led to an undersupply of affordable medium- and high-density housing near jobs and transit, and have perpetuated the exclusion of historically disadvantaged communities. The housing and homelessness crisis, together with this year's COVID-19 pandemic, severe wildfires, and civil unrest, illustrate the need for a totally new approach to solving our city and region's housing crisis.

Los Angeles has a valuable opportunity to address the need for more housing in a way that furthers equity, environmental sustainability, and housing justice. California's RHNA requires Los Angeles to plan for 456,000 new homes by 2029 through its housing element update, including 184,000 that are affordable to lower-income households. I believe every neighborhood must do its part to meet this goal.

Los Angeles needs a housing element update based on fair neighborhood-level housing growth targets. This will reduce traffic and GHG emissions, increase access to jobs and transit, roll back exclusionary zoning, and strengthen the region's economy. Therefore, I respectfully urge you to pass the City Zoning Code Update Ordinance in order to ensure that we move away from land-use and zoning decisions that have resulted in 66,000 unhoused folks, and that .have 1 million people living in overcrowded homes

Thank you for your consideration.

Therefore, I respectfully urge you to pass the City Zoning Code Update Ordinance in order to ensure that we move away from land-use and zoning decisions that have result in 66,000 unhoused folks, that have 1 million people living in overcrowded homes, that continues to displace and push-out BIPOC communities, and contributes to urban sprawl which worsens both our climate and traffic conditions.

Thank you for your consideration.

Dear Clerk PLUM Committee,

I am an Angeleno writing to express concern about our region's affordable housing shortage and its impact on the future of our city. I am frustrated by increasing homelessness, by the burden that displacement and gentrification place on our neighbors, and by community members and elected officials continuing to promote exclusion in our neighborhoods.

Exclusionary zoning and land use practices have led to an undersupply of affordable medium- and high-density housing near jobs and transit, and have perpetuated segregated living patterns and the exclusion of historically disadvantaged communities. The housing and homelessness crisis, together with this year's COVID-19 pandemic, severe wildfires, and civil unrest, illustrate the need for a totally new approach to solving our city and region's housing crisis.

Los Angeles has a valuable opportunity to address the need for more housing in a way that furthers equity, environmental sustainability, and housing justice. California's RHNA requires Los Angeles to plan for 456,000 new homes by 2029 through its housing element update, including 184,000 that are affordable to lower-income households. I believe every neighborhood must do its part to meet this goal.

Los Angeles needs a housing element update based on fair neighborhood-level housing growth targets. This will reduce traffic and GHG emissions, increase access to jobs and transit, advance income and racial integration, roll back exclusionary zoning, and strengthen the region's economy. Therefore, I respectfully urge you to pass the City Zoning Code Update Ordinance in order to ensure that we move away from land-use and zoning decisions that have result in 66,000 unhoused folks, that have 1 million people living in overcrowded homes, that continues to displace and push-out BIPOC communities, and contributes to urban sprawl which worsens both our climate and traffic conditions.

Thank you for your consideration.

Dear Clerk PLUM Committee,

I am an Angeleno writing to express concern about our region's affordable housing shortage and its impact on the future of our city. I am frustrated by increasing homelessness, by the burden that displacement and gentrification place on our neighbors, and by community members and elected officials continuing to promote exclusion in our neighborhoods.

Exclusionary zoning and land use practices have led to an undersupply of affordable medium- and high-density housing near jobs and transit, and have perpetuated segregated living patterns and the exclusion of historically disadvantaged communities. The housing and homelessness crisis, together with this year's COVID-19 pandemic, severe wildfires, and civil unrest, illustrate the need for a totally new approach to solving our city and region's housing crisis.

Los Angeles has a valuable opportunity to address the need for more housing in a way that furthers equity, environmental sustainability, and housing justice. California's RHNA requires Los Angeles to plan for 456,000 new homes by 2029 through its housing element update, including 184,000 that are affordable to lower-income households. I believe every neighborhood must do its part to meet this goal.

Los Angeles needs a housing element update based on fair neighborhood-level housing growth targets. This will reduce traffic and GHG emissions, increase access to jobs and transit, advance income and racial integration, roll back exclusionary zoning, and strengthen the region's economy. Therefore, I respectfully urge you to pass the City Zoning Code Update Ordinance in order to ensure that we move away from land-use and zoning decisions that have result in 66,000 unhoused folks, that have 1 million people living in overcrowded homes, that continues to displace and push-out BIPOC communities, and contributes to urban sprawl which worsens both our climate and traffic conditions.

Thank you for your consideration.

Personally sent by Marlene Rapkin using Abundant Housing LA's Advocacy Tool. Abundant Housing LA is a grassroots pro-housing organization.

Sincerely,

Marlene Rapkin

Dear Clerk PLUM Committee,

I am an Angeleno writing to express concern about our region's affordable housing shortage and its impact on the future of our city. I am frustrated by increasing homelessness, by the burden that displacement and gentrification place on our neighbors, and by community members and elected officials continuing to promote exclusion in our neighborhoods.

Exclusionary zoning and land use practices have led to an undersupply of affordable medium- and high-density housing near jobs and transit, and have perpetuated segregated living patterns and the exclusion of historically disadvantaged communities. The housing and homelessness crisis, together with this year's COVID-19 pandemic, severe wildfires, and civil unrest, illustrate the need for a totally new approach to solving our city and region's housing crisis.

Los Angeles has a valuable opportunity to address the need for more housing in a way that furthers equity, environmental sustainability, and housing justice. California's RHNA requires Los Angeles to plan for 456,000 new homes by 2029 through its housing element update, including 184,000 that are affordable to lower-income households. I believe every neighborhood must do its part to meet this goal.

Los Angeles needs a housing element update based on fair neighborhood-level housing growth targets. This will reduce traffic and GHG emissions, increase access to jobs and transit, advance income and racial integration, roll back exclusionary zoning, and strengthen the region's economy. Therefore, I respectfully urge you to pass the City Zoning Code Update Ordinance in order to ensure that we move away from land-use and zoning decisions that have result in 66,000 unhoused folks, that have 1 million people living in overcrowded homes, that continues to displace and push-out BIPOC communities, and contributes to urban sprawl which worsens both our climate and traffic conditions.

Thank you for your consideration.

Personally sent by Brenda Wiewel using Abundant Housing LA's Advocacy Tool. Abundant Housing LA is a grassroots pro-housing organization.

Sincerely,
Brenda Wiewel

Exclusionary zoning and land use practices have led to an undersupply of affordable medium- and high-density housing near jobs and transit, and have perpetuated segregated living patterns and the exclusion of historically disadvantaged communities. The housing and homelessness crisis, together with this year's COVID-19 pandemic, severe wildfires, and civil unrest, illustrate the need for a totally new approach to solving our city and region's housing crisis.

Los Angeles has a valuable opportunity to address the need for more housing in a way that furthers equity, environmental sustainability, and housing justice. California's RHNA requires Los Angeles to plan for 456,000 new homes by 2029 through its housing element update, including 184,000 that are affordable to lower-income households. I believe every neighborhood must do its part to meet this goal.

Los Angeles needs a housing element update based on fair neighborhood-level housing growth targets. This will reduce traffic and GHG emissions, increase access to jobs and transit, advance income and racial integration, roll back exclusionary zoning, and strengthen the region's economy. Therefore, I respectfully urge you to pass the City Zoning Code Update Ordinance in order to ensure that we move away from land-use and zoning decisions that have result in 66,000 unhoused folks, that have 1 million people living in overcrowded homes, that continues to displace and push-out BIPOC communities, and contributes to urban sprawl which worsens both our climate and traffic conditions.

Thank you for your consideration.

Personally sent by Josh Albrektson using Abundant Housing LA's Advocacy Tool. Abundant Housing LA is a grassroots pro-housing organization.

Sincerely,
Josh Albrektson

Dear Clerk PLUM Committee,

I am an Angeleno writing to express concern about our region's affordable housing shortage and its impact on the future of our city. I am frustrated by increasing homelessness, by the burden that displacement and gentrification place on our neighbors, and by community members and elected officials continuing to promote exclusion in our neighborhoods.

I believe every neighborhood must do its part to meet this goal.

Los Angeles needs a housing element update based on fair neighborhood-level housing growth targets. This will reduce traffic and GHG emissions, increase access to jobs and transit, advance income and racial integration, roll back exclusionary zoning, and strengthen the region's economy. Therefore, I respectfully urge you to pass the City Zoning Code Update Ordinance in order to ensure that we move away from land-use and zoning decisions that have result in 66,000 unhoused folks, that have 1 million people living in overcrowded homes, that continues to displace and push-out BIPOC communities, and contributes to urban sprawl which worsens both our climate and traffic conditions.

Thank you for your consideration.

Personally sent by David Foster using Abundant Housing LA's Advocacy Tool. Abundant Housing LA is a grassroots pro-housing organization.

Sincerely,
David Foster

Dear Clerk PLUM Committee,

I am an Angeleno writing to express concern about our region's affordable housing shortage and its impact on the future of our city. I am frustrated by increasing homelessness, by the burden that displacement and gentrification place on our neighbors, and by community members and elected officials continuing to promote exclusion in our neighborhoods.

Exclusionary zoning and land use practices have led to an undersupply of affordable medium- and high-density housing near jobs and transit, and have perpetuated segregated living patterns and the exclusion of historically disadvantaged communities. The housing and homelessness crisis, together with this year's COVID-19 pandemic, severe wildfires, and civil unrest, illustrate the need for a totally new approach to solving our city and region's housing crisis.

Los Angeles has a valuable opportunity to address the need for more housing in a way that furthers equity, environmental sustainability, and housing justice. California's RHNA requires Los Angeles to plan for 456,000 new homes by 2029 through its housing element update, including 184,000 that are affordable to lower-income households. I believe every neighborhood must do its part to meet this goal.
