**Comments for Public Posting:** I wish to express my support for an updated Masterplan for the Sepulveda Basin. It is well overdue. In view of the recent devastating fire this is a great time to rebuild the Wildlife Reserve with native vegetation, new signage etc. This small area of the park is one of the most beloved, it is visited constantly by mostly respectful people coming for a quiet walks meditation and wildlife (both observing and photography.) Also many educational field trips are run in the area which bring city children to a quiet oasis that they did not know existed. Incidentally, many of those children bring their families back! So I am hoping, even assuming, that the new pastor plan will include enhancement and maybe even growth of the Wildlife Reserve.
