Structural Engineer/Construction Manager. Leading Minneapolis, Minnesota firm specializing in medical related buildings such as hospitals, medical office buildings, geriatric care centers and retirement facilities. Work included the design and engineering of reinforced and post-tensioned concrete structures; masonry and precast buildings; steel and composite systems; and wood structure buildings. Onsite Construction Manager in charge of multiple prime contractors for major hospital remodeling and expansion project. Onsite Construction Engineer in charge of mid-rise senior retirement facility.

ENVIRONMENTAL QUESTIONNAIRE

ASTM E-1527-13 USER ENVIRONMENTAL QUESTIONNAIRE

(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law? (Yes/No)
Comments: NO

(2.) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).

Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? (Yes/No)
Comments: NO

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

As the *user* of this *ESA* do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business? (Yes/No)
Comments: The property was used as a multifamily development previously, and we will operate it as a multifamily development. We are unaware of any RECs onsite.

(4.) Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? **YES** If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*? (Yes/No)
Comments:

(5.) Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*, (Yes/No)
(a.) Do you know the past uses of the *property*? **NO**
(b.) Do you know of specific chemicals that are present or once were present at the *property*? **NO**
(c.) Do you know of spills or other chemical releases that have taken place at the *property*? **NO**
(d.) Do you know of any environmental cleanups that have taken place at the *property*? **NO**
Comments: We believe the property has been used solely as a multifamily development and are not aware of any RECs

(6.) The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the *user* of this *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*? (Yes/No)
Comments: NO

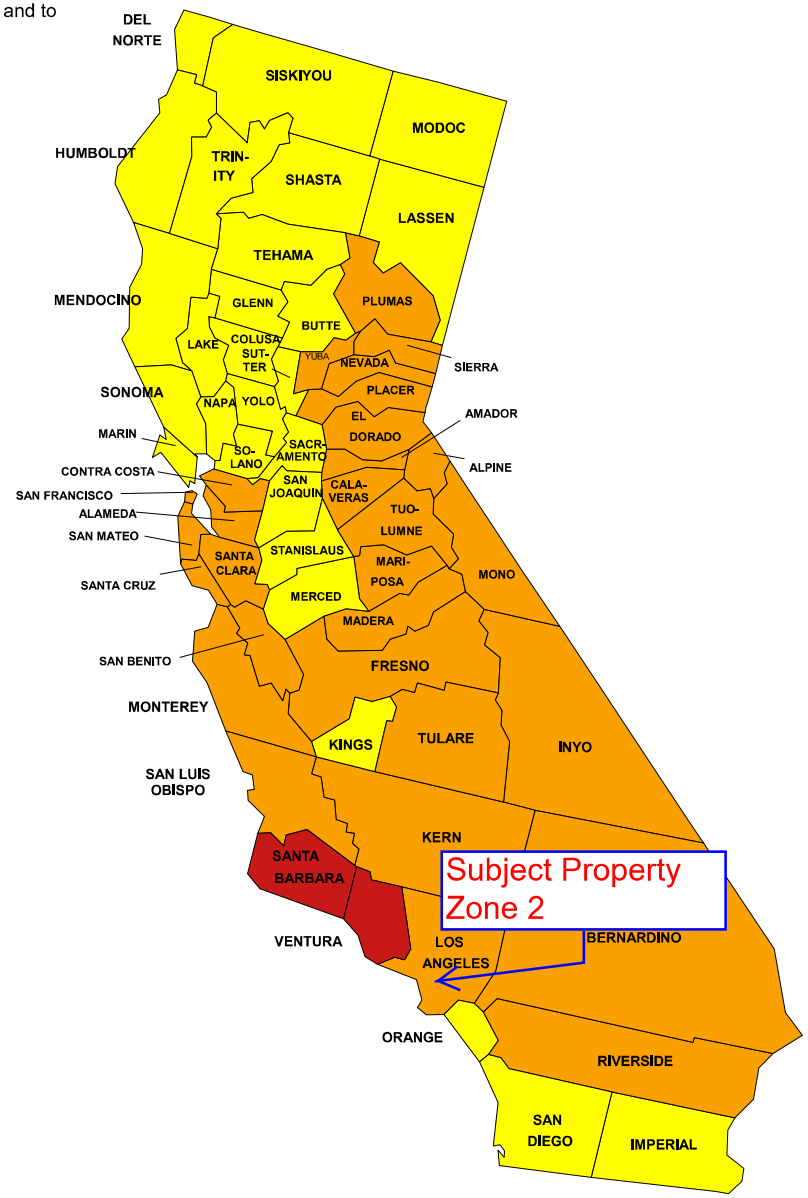
RADON DISTRIBUTION MAP

CALIFORNIA - EPA Map of Radon Zones



http://www.epa.gov/radon/zonemap.html

The purpose of this map is to assist National, State and local organizations to target their resources and to implement radon-resistant building codes.

This map is not intended to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones.

All homes should be tested, regardless of zone designation.

IMPORTANT: Consult the publication entitled "Preliminary Geologic Radon Potential Assessment of California" (USGS Open-file Report 93-292-I) before using this map. See http://energy.cr.usgs.gov/radon/grpinfo.html This document contains information on radon potential variations within counties. EPA also recommends that this map be supplemented with any available local data in order to further understand and predict the radon potential of a specific area.

Limited Asbestos Survey

Customer: Path Construction Company
Attention: Jason McClurg
125 East Algonquin Road
Arlington Heights, IL 60005

PO #: 30.018.18
Job Location: 2000 Miramar Street
Los Angeles, CA 90057

1.0 Introduction/ Laboratory Summary:

This report presents the analytical results of the Limited Asbestos Survey performed on the subject property listed above by Envirocheck, Inc.
Please read entire report prior to initiating any action.

The sampled materials that exceeded the EPA level of 1% and/or the Cal-OSHA level of 0.1% and/or found as Trace for asbestos content were:

- Vinyl Composition Tile
- Vinyl Floor Mastic

Positive Results:

#	Location	Material	Notes	Total % Asbestos	Types of Asbestos Present	Friable	Condition	Sq. Ft.*
69	Unit 609 Kitchen	Vinyl Composition Tile	Bottom Layer	3%	3% Chrysotile	No	Good	~150
86.1	Maintenance Room	Vinyl Floor Mastic	N/A	2%	2% Chrysotile	No	Good	~450
88	Maintenance Room	Vinyl Floor Mastic	N/A	4%	4% Chrysotile	No	Good	~450
90	Maintenance Room	Vinyl Floor Mastic	N/A	4%	4% Chrysotile	No	Good	~450

*Square footage is the estimated quantity of the homogeneous material. **Various sample locations combined for composite purposes.
***Not covered by NVLAP accreditation.

†Via Point Count.

Negative Results:

2.0 Background, Sampling Protocol, and Test Methods

Testing by:	Jacob W. O'Brien, CSST# 15-5577	Engaged by Representative:	Path Construction Company
Survey by:	Michael Powers, CAC# 11-4750		

Purpose of inspection:
Purpose of inspection was to test certain building materials that will be impacted due to planned renovation.

Structure:	Apartment Bldg.				
Exterior:	Stucco	Roof:	Flat	Occupied?:	Yes
Exterior Condition:	Good	Roof Condition:	Good	Year Built:	1979
Exterior Debris Pile(s):	No			No. of Stories:	8
Debris Pile Location(s):	N/A			Approx. SQ FT:	185,000
Debris Pile Size:	N/A			Foundation:	Slab
Debris Pile Contents:	N/A			Air Handling:	HVAC

- Envirocheck personnel identified all accessible and recognizable types of suspect ACM and PACM that were anticipated to be impacted by the renovation or demolition. Suspect materials which were not anticipated to be impacted were not sampled.
- The samples were submitted to Envirocheck's in-house laboratory, located at 2211 W. Orangewood Avenue, Orange, CA 92868
- The inspector performed an inspection for suspect asbestos containing materials listed above following the provisions of 40 CFR Part 763.86.
- The inspector is Cal/OSHA certified and conformed to procedures outlined in the EPA Building Inspector Course.
- Modified AHERA (Asbestos Hazard Emergency Response Act) sampling methods and protocols were used.
- Each asbestos sample collected was analyzed utilizing the method specified in Appendix A, Subpart F, 40 CFR Part 763, Section 1, Polarized Light Microscopy (PLM) Method by a NVLAP-certified Laboratory.

3.0 General Recommendations:

- Periodic surveillance for materials found in Good Condition
- As applicable, materials found to be in Good Condition can be left and managed in place under a proper Operations and Maintenance (O & M) Plan
- Repair or removal for materials found in Damaged Condition
- Removal for materials found in Significant Damage
- Removal prior to renovation or demolition activities that may cause disturbance
- Prior to any renovation or planned disturbance of any ACM, the contractor should be furnished with a copy of this survey report

Notice 1: According to AHERA, 40 CFR, 763.87 (c)(1),(2) - A homogeneous area is considered not to be Asbestos Containing Material (ACM) only when all required samples collected from a homogeneous area indicate levels below regulated limits and a homogeneous area is considered ACM when at least one of the required samples collected indicates levels above regulated limits.

Notice 2: Cal-OSHA (DOSH) defines asbestos containing construction materials (ACCM) as manufactured materials containing asbestos in amounts greater than 0.1% by weight. Cal-OSHA requires that contractors be registered with DOSH when disturbing ACCM. Note that if "any level" of asbestos is detected, Cal-OSHA still requires applicable worker protections, training, communication, notification and engineering controls in accordance with CCR Title 8 Section 1529, even if it is determined to be less than or equal to 0.1% asbestos by weight, however the contractor would not be required to be "registered" with DOSH if the level is at or below 0.1% asbestos by weight. The EPA defines asbestos containing materials (ACM) as materials containing asbestos in amounts greater than 1% . Polarized Light Microscopy (PLM) analysis has a limit of quantification of <1%. PLM samples determined to contain levels of less than 1% can be presumed to contain levels greater than 1% or can be submitted for 400 point count for a more accurate result (Limited to a qualified <1%). In order to determine if materials are less than 0.1%, the 1000 point count method and/or Transmission Electron Microscopy (TEM) method will be needed to determine levels with quantification limits of a minimum of 0.1% in accordance with EPA/600/R-93/116. The 400 point counting method assists in determining proper waste handling and appropriate jurisdiction of regulatory agencies (such as: EPA, NESHAP, APCD, AQMD) and cannot be used to determine DOSH registration requirements (where a combination of 1000 point counting and/or TEM analysis will be required as per EPA 600/93-R/116 Method). Request for additional types of analysis must be made by the client and additional analytical costs will apply.

Notice 3: Asbestos NESHAP Requirement to Perform Point Counting (May 8, 1991) – This applies to all regulated asbestos containing materials as defined in 40 CFR Section 61.141.

- "First, a sample in which no asbestos is detected by polarized light microscopy (PLM) does not have to be pointed counted. However, a minimum of three slide mounts should be prepared and examined in their entirety by PLM to determine if asbestos is present. This process should be carefully documented by the laboratory."
- "Second, if the analyst detects asbestos in the sample and estimates the amount by visual estimation to be less than 10%, the owner or operator of the building may (1) elect to assume the amount be greater than 1% and treat the material as asbestos-containing material or (2) require verification of the amount by point counting."
- "Third, if a result obtained by point count is different from a result obtained by visual estimation, the point count result will be used."
- It is the responsibility of the building owner, operator, and/or owner representative to determine the desired course of action and communicate the information to the relevant parties and request the laboratory to perform additional point count analysis as applicable. Point count laboratory analysis is not part of the standard procedure of PLM analysis and is considered an additional service.

Note: Interpretations of the regulatory language regarding wall system (i.e., drywall, gypsum board, wallboard, plaster and stucco) multi-layer composite sampling vary; therefore, it is important to be familiar with the local NESHAP (South Coast AQMD) enforcement and local OSHA enforcement agencies' individual interpretations of the standards to avoid citation and fines.

3.1 Removal Procedure

Applies when asbestos material is greater than 1%

In the United States, building materials containing more than one percent (1%) asbestos by weight are considered by the Environmental Protection Agency (EPA) to be asbestos containing materials (ACM). All asbestos containing materials (ACM) and Class II asbestos-containing materials shall be removed from a facility prior to any demolition activity, or materials to be impacted by renovation activities as promulgated by National Emissions Standards for Hazardous Air Pollutants (NESHAP). A State Licensed Asbestos Abatement Contractor must perform all work relating to the disturbance of the asbestos containing materials and must follow Cal-OSHA and local NESHAP (South Coast AQMD) regulations as well as other applicable local regulations. Furthermore, ACM greater than 1% asbestos by weight that is removed shall be disposed of as asbestos containing hazardous waste.

The following South Coast AQMD procedure(s) shall be used when removing or stripping ACM that is greater than 1%:

Procedure 1 - HEPA Filtration

Refer to the most current version of Rule 1403 for procedure descriptions. (http://www.aqmd.gov/docs/default-source/rule-book/reg-xiv/rule-1403.pdf, as of 10/5/

4.0 Asbestos-Related Terms

AHERA – Asbestos Hazard Emergency Response Act (Regulates school facilities)

ASHARA – Asbestos School Hazard Reauthorization Act (Includes public and commercial buildings under AHERA regulation)

ACM – Asbestos Containing Materials (Materials containing greater than one (1) percent by weight)

ACCM – Asbestos Containing Construction Materials (CAL-OSHA's term for materials containing greater than one tenth of one (0.1) percent by weight)

PACM – Presumed Asbestos Containing Materials (Materials considered asbestos containing without laboratory analysis)

CAC – Certified Asbestos Consultant (State of California certified individual allowed to perform all aspects of asbestos related inspection, management, planning, and design work and to direct CSST(s) and review and execute asbestos reports under state law)

CSST – Certified Site Surveillance Technician (Allowed to perform all aspects of asbestos related inspection, management, and work under the direction of a CAC)

CAL-OSHA a.k.a. (**DOSH**) Division of Occupational Safety and Health (California governing body regulating worker protection)

OSHA – Occupational Health and Safety Administration

NIOSH – National Institute of Occupational Safety and Health

EPA – Environmental Protection Agency (Regulates environment and waste stream)

DOT – Department of Transportation

NESHAP – National Emissions Standards for Hazardous Air Pollutants

AQMD – Air Quality Management District (Local division of NESHAP)

NVLAP – National Voluntary Laboratory Accreditation Program

AIHA – American Industrial Hygiene Association

CFR – Code of Federal Regulations

CCR –California Code of Regulations

PLM – Polarized Light Microscopy (also known as "Bulk" sample)

PCM – Phase Contrast Microscopy

TEM – Transmission Electron Microscopy

APCD – Air Pollution Control District (Local division of NESHAP)

4.1 Laboratory Report Terms

ND – None Detected

A – Area Sample (Air monitoring)

AA – Area After (Clearance type sample)

P – Personal Sample (Employee monitoring type sample)

EX – Excursion (Employee monitoring type of sample during peak activities)

BK – Blank (Used for quality assurance)

Trace – Asbestos was detected in the PLM analysis, but not in the point count.
Negative – No asbestos detected, however it doesn't mean that there isn't any asbestos.

4.2 Laboratory Accreditation

NIST/NVLAP
National Institute of Standards and Technology
National Voluntary Laboratory Accreditation Program
NVLAP Lab Code: 200548-0

California Water Boards ELAP Certificate 2723

For a detailed explanation of our accreditations and quality assurance program, contact Envirocheck.

5.0 Limitations

The findings set forth in this report are strictly limited to the time, date and scope of the investigation. The results presented in this report are based on the analytical testing performed by the certified laboratory. The results from the sampled locations are representative of the entire homogeneous material/areas and not just the locations sampled. According to AHERA, 40 CFR, 763.87 (c)(1),(2) - A homogeneous area is considered not to be Asbestos Containing Material (ACM) only when all required samples collected from a homogeneous area indicate levels below regulated limits and a homogeneous area is considered ACM when at least one of the required samples collected indicates levels above regulated limits. This report does not guarantee that all inaccessible, hidden, or indistinguishable materials will be identified or sampled. Samples were limited to the materials and locations listed on the chain of custody. Materials/areas that were not sampled shall be presumed to be asbestos containing until proven otherwise by appropriate sampling procedures. Square footages are estimates only and should not be used for bidding purposes.

6.0 Certified Asbestos Consultant Signature

Any individual performing services as an asbestos consultant or site surveillance technician as referenced and defined in section 1529(b) of Title 8 of the California Code of Regulations must be certified by the State of California, Division of Occupational Safety and Health (DOSH). Asbestos consultant shall maintain copies of AHERA training certificates for management planner, abatement project designer, abatement contractor and supervisor, and all subsequent annual refresher courses. The complete abatement project designer course certificate is only required for certifications provided after July 1, 1994. Site surveillance technician applicants shall maintain copies of AHERA training completion certificates for inspector, and abatement contractor and supervisor, and all subsequent annual refresher courses. Certificates for abatement worker and abatement project designer may be utilized in lieu of the abatement contractor and supervisor certificate. Specific qualifications are required pursuant to section 1529(o) of Title 8 of the California Code of Regulations for certification. The educational qualifications, (diploma, official transcript, or other proof), and qualifying work experience as specified in Business and Professions Code sections 7184 and 7185 have been met by the individual(s) performing asbestos related consulting activities or activities. Qualifying work experience includes technical work associated with asbestos consulting activities. Written site surveillance technician references attesting to the applicant's qualifying work experience which are certified under the penalty of perjury as required.

Analysis: 09/14/2018

Analysts: Jeffrey Scherer, Elaine Espique, Heather Kilgore, Javier Osorio

Admin QC by: KK
Lab QC by: JS

Samples were analyzed by the "Interim Method for the Determination of Asbestos in Bulk Insulation Samples", EPA-600/M4-82-020, and EPA/600/R-93/116. The limit of detection for asbestos is <1% by weight, and the limit of quantification is 1.0% or greater by weight. The State of California defines an asbestos-containing construction material as having more than 0.1% asbestos by weight. All samples are disposed of within 30 days unless the customer requests otherwise. This report shall not be reproduced except in full, without the written approval of the laboratory. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST, or any agency of the federal government. Test results relate only to the items tested. Asbestos percentage obtained through calibrated visual estimate. Components of inhomogeneous samples not analyzed separately unless listed as a sub-sample. **Various sample locations combined for composite purposes. ***Not covered by NVLAP accreditation.

Samples were analyzed by the "Interim Method for the Determination of Asbestos in Bulk Insulation Samples", EPA-600/M4-82-020, and EPA/600/R-93/116. The limit of detection for asbestos is <1% by weight, and the limit of quantification is 1.0% or greater by weight. The State of California defines an asbestos-containing construction material as having more than 0.1% asbestos by weight. All samples are disposed of within 30 days unless the customer requests otherwise. This report shall not be reproduced except in full, without the written approval of the laboratory. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST, or any agency of the federal government. Test results relate only to the items tested. Asbestos percentage obtained through calibrated visual estimate. Components of inhomogeneous samples not analyzed separately unless listed as a sub-sample. **Various sample locations combined for composite purposes. ***Not covered by NVLAP accreditation.

Mr. Michael Daly
Jonathan Rose Companies
551 Fifth Avenue, 23rd floor
New York, NY 10176

Subject: Phase I Environmental Site Assessment
Miramar Towers
2000 Miramar Street, Los Angeles, California
EBI Project No. 1716000093

Dear Mr. Daly:

Attached please find our *Phase I Environmental Site Assessment* (the report) for the above-mentioned asset (the Subject Property). During the survey and research, our surveyor met with agents representing the Subject Property, or agents of the owner, and reviewed the Subject Property and its history. The report was completed according to the terms and conditions authorized by you. This report has been completed in general conformance with the ASTM Standard E 1527-13, as well as the requirements of the United States Department of Housing and Urban Development (HUD) Multifamily Accelerated Processing (MAP) Guide, Chapter 9.

The purpose of this report is to acquire environmental information, observe the general condition and maintenance status of the Subject Property, to suggest remediation and/or maintenance practices considered customary for the Subject Property to continue in its current operation, compared to properties of similar age and condition, and to identify recognized environmental conditions in connection with the Subject Property described in this report.

Reliance on the report and the information contained herein shall mean (i) the report may be relied upon by a lender to be selected by *Jonathan Rose Companies*, in determining whether to make a loan evidenced by a note secured by the Subject Property ("the Mortgage Loan"); (ii) the report may be relied upon by any purchaser in determining whether to purchase the Mortgage Loan (but not the Subject Property) from that lender, or an interest in the Mortgage Loan or securities backed or secured by the Mortgage Loan, and any rating agency rating securities representing an interest in the Mortgage Loan or backed or secured by the Mortgage Loan; (iii) the report may be referred to in and included, in whole or in part, with materials offering for sale the Mortgage Loan or an interest in the Mortgage Loan or securities backed or secured by the Mortgage Loan; (iv) the report speaks only as of its date in the absence of a specific written update of the report signed and delivered by EBI Consulting.

There are no intended or unintended third party beneficiaries to this report, except as expressly stated herein.

EBI is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the report or on the closing of any business transaction.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Thank you very much for the opportunity to provide environmental consulting services to *Jonathan Rose Companies*. Should you have any questions or require additional information, please do contact the undersigned.

Respectfully submitted,
EBI CONSULTING

HUD CERTIFICATION

I understand that my environmental review will be used by *Jonathan Rose Companies* ("MAP Lender") to document to the U.S. Department of Housing and Urban Development that the MAP Lender's application for FHA multifamily mortgage insurance was prepared and reviewed in accordance with HUD requirements. I certify that my review was in accordance with the HUD requirements applicable on the date of my review and that I have no financial interest or family relationship with the officers, directors, stockholders, or partners of the Borrower, the general contractor, any subcontractors, the buyer or seller of the proposed property or engage in any business that might present a conflict of interest.

I am under contract for this specific assignment and I have no other side deals, agreements, or financial considerations with the MAP Lender or others in connection with this transaction. This report is written to meet the Multifamily Accelerated Processing (MAP) guidelines pursuant to the HUD mortgage insurance program 223(f) as well as ASTM E 1527-13.

Signed: _____ **Date:** March 15, 2016

Renato Nalupa, PE

EXECUTIVE SUMMARY

At the request of *Jonathan Rose Companies*, EBI has performed a Phase I Environmental Site Assessment (ESA) of the property located at 2000 Miramar Street in Los Angeles, California, herein referred to as the Subject Property. The main objective of this ESA was to identify *recognized environmental conditions* in connection with the Subject Property, defined in ASTM E 1527-13, as the presence or likely presence of any hazardous substances or petroleum products that indicate an existing release, a past release, or a material threat of a release. This ESA also includes a preliminary evaluation of certain potential environmental conditions that are outside the scope of ASTM E 1527-13. In addition to ASTM E 1527-13, the report was completed in accordance with portions of the U.S. Department of Housing and Urban Development (HUD) Multifamily Accelerated Processing (MAP) Guide, Chapter 9.

The Subject Property includes one irregular-shaped parcel, totaling approximately 2.77 acres. The Subject Property is currently improved with a 157-unit multifamily residential complex, including one eight-story, concrete slab-on-grade apartment building. Additional structures and amenities include the following: a one-story administrative leasing office and community recreation center, attached on the north exterior of the tower building. There are no basements present beneath the existing structures. The existing improvements were reportedly constructed in 1980.

At the time of inspection, the Subject Property was occupied by a 157-unit multifamily senior residential complex, including one eight-story, concrete slab-on-grade apartment building, attached to one-story leasing office/clubhouse building. With the exception of the administrative leasing office, there are currently no commercial or industrial operations conducted at the Subject Property.

Below is the Assessment Summary Table presenting our recommended actions for the Subject Property. EBI's Findings and Opinions are presented in Section 8.0, and recommendations for further action or investigation are presented in Section 9.0.

ASSESSMENT SUMMARY TABLE

Assessment Component	Section(s)	Recommended Actions	Estimated Cost
Historical Review	4.3	No Further Action	
Current Occupants / Operations	2.3, 5.0	No Further Action	
Hazardous Substances / Petroleum Products	5.2	No Further Action	
Waste Generation	5.3	No Further Action	
Storage Tanks	5.4	No Further Action	
PCBs	5.5	No Further Action	
Potential Off-site Sources	2.5, 4.1	No Further Action	
Regulatory Agency / Database Review	4.1	No Further Action	
Asbestos Containing Materials	7.1	Continue the implementation of the existing Asbestos Operations and Maintenance (O&M) Plan.	Action item

DRAFT

1.0 INTRODUCTION

This report documents the findings, opinions, and conclusions of a Phase I Environmental Site Assessment (ESA) of the property located at 2000 Miramar Street in Los Angeles, California.

1.1 PURPOSE

The purpose of this ESA was to identify *recognized environmental conditions* and certain environmental conditions outside the scope of ASTM Practice E 1527-13 in connection with the property at the time of the property reconnaissance.

1.2 SCOPE-OF-SERVICES

This ESA was conducted utilizing a standard of good commercial and customary practice that was consistent with the ASTM Practice E 1527-13. Any significant scope-of-work additions, deletions or deviations to ASTM Practice E 1527-13 are noted below or in the corresponding sections of this report. The scope-of-work for this assessment included an evaluation of the following:

- Physical characteristics of the Subject Property through a review of referenced sources for topographic, geologic, soils and hydrologic data.
- Subject Property history through a review of referenced sources such as land deeds, fire insurance maps, city directories, aerial photographs, prior reports, and interviews.
- Current Subject Property conditions, including observations and interviews regarding the following: the presence or absence of hazardous substances or petroleum products; generation, treatment, storage, or disposal of hazardous, regulated, or biomedical waste; equipment that utilizes oils which potentially contain PCBs; and storage tanks (aboveground and underground).
- Usage of surrounding area properties and the likelihood for releases of hazardous substances and petroleum products (if known and/or suspected) to migrate onto the Subject Property.
- Information in referenced environmental agency databases and local environmental records, within specified minimum search distances.
- Past ownership through a review of available prior reports and local municipal file review.

The scope-of-work also included consideration of the following potential environmental conditions that are outside the scope of ASTM Practice E 1527-13: asbestos-containing materials (ACM), radon, lead-based paint (LBP), lead in drinking water, mold, additional HUD factors, and vapor encroachment.

1.3 ASSUMPTIONS, LIMITATIONS AND EXCEPTIONS

This *Phase I Environmental Site Assessment* (the report) has been prepared for the use of *Jonathan Rose Companies* and the United States Department of Housing and Urban Development (HUD), in accordance with our Standard Conditions for Engagement and Authorization Letter and Agreement for Environmental Services approved and signed by *Jonathan Rose Companies*, and with the limitations described below, all of which are integral parts of this report. A copy of the signed Standard Conditions For Engagement and Authorization Letter and Agreement for Environmental Services is maintained at the EBI Consulting office in Burlington, Massachusetts.

DRAFT

EBI has performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of *ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* as well as the requirements of the United States Department of Housing and Urban Development (HUD) Multifamily Accelerated Processing (MAP) Guide, Revised August 18, 2011, pursuant to 223(f). This report was prepared with no exceptions or deletions from ASTM Standard E 1527-13.

This *Phase I Environmental Site Assessment* has been prepared to assess a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products. As such, this practice is intended to permit *Jonathan Rose Companies* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the Subject Property consistent with good commercial or customary practice" as defined in 42 U.S.C. § 9601(35)(B).

In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify *recognized environmental conditions*. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis conditions* that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions.

The information reported was obtained through sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property. Municipal information was obtained through review of reasonably ascertainable standard government record sources and interviews with the authorities having jurisdiction over the Subject Property. Findings, conclusions, and recommendations included in the report are based on our visual observations in the field, the municipal information reasonably obtained, information provided by the Client, and/or a review of readily available and supplied documents and drawings. EBI relies completely on the information, whether written, graphic, or verbal, provided by the Subject Property contact or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or municipal source, and assumes that information to be true and correct. Although there may have been some degree of overlap in the information provided by these various sources, EBI did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of these environmental services.

The observations in this report are valid on the date of the investigation. Where access to portions of the Subject Property or to structures on the Subject Property was unavailable or limited, EBI renders no opinion as to the presence of hazardous substances or petroleum products in that portion of the Subject Property or structure. Inaccessible portions of the Subject Property are described below. In addition, EBI renders no opinion as to the presence of, or indirect evidence relating to, hazardous

DRAFT

substances or petroleum products where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

It is acknowledged that EBI judgments shall not be based on scientific or technical tests or procedures beyond the scope of the Services or beyond the time and budgetary constraints imposed by the Client. It is acknowledged further that EBI conclusions shall not rest on pure science but on such considerations as economic feasibility and available alternatives. Client also acknowledges that, because geologic and soil formations are inherently random, variable, and indeterminate in nature, the Services and opinions provided under this Agreement with respect to such Services are not guaranteed to be a representation of actual conditions on the Subject Property, which are also subject to change with time as a result of natural or man-made processes, including water permeation. In performing the Services, EBI shall use that degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality. The standard of care shall be determined solely at the time the Services are rendered and not according to standards utilized at a later date. The Services shall be rendered without any other warranty, expressed or implied, including, without limitation, the warranty of merchantability and the warranty of fitness for a particular purpose.

Client and EBI agree that to the fullest extent permitted by law, EBI shall not be liable to Client for any special, indirect or consequential damages whatsoever, whether caused by EBI's negligence, errors, omissions, strict liability, breach of contract, breach of warranty or other cause or causes whatsoever.

The ASTM Standard E 1527-13 do not encompass analytical testing to evaluate asbestos containing materials, radon, lead-based paint, drinking water quality, indoor air quality, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA. Any analytical testing performed at the Subject Property has been conducted in accordance with the Standard Conditions for Engagement and Authorization Letter and Agreement for Environmental Services and the client-specific Scope of Work. Unless otherwise specified herein, such testing involves screening methods intended to provide a broad and approximate evaluation of conditions at readily accessible portions of the Subject Property, limited by project constraints, and should not be construed as a comprehensive program designed to comply with a specific regulatory program. If a thorough and regulatory-compliant study is warranted based on the findings of the Phase I ESA, EBI will recommend the appropriate further investigation. In certain cases, quantitative laboratory testing is performed as part of the assessment and analyses have been conducted by an outside laboratory. EBI relies upon the data provided by the outside laboratory, and has not conducted an independent evaluation of the reliability of this data.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The report speaks only as of its date, in the absence of a specific written update of the report, signed and delivered by EBI.

Additional information that becomes available after our survey and draft submission concerning the Subject Property should be provided to EBI so that our conclusions may be revised and modified if necessary, at additional cost. This report has been prepared in accordance with our Standard Conditions for Engagement, which is an integral part of this report.

DRAFT

1.4 SPECIAL TERMS AND CONDITIONS

This Phase I Environmental Site Assessment (the report) has been prepared to assist a lender to be selected by Jonathan Rose Companies in determining whether to make a loan evidenced by a note secured by the Subject Property. Reliance upon this report does not extend to entities or individuals interested in purchasing the Subject Property. Amendments to EBI's limitations as stated herein that may occur after issuance of the report are considered to be included in this report. EBI's liability to a purchaser wishing to use this report is limited to the cost of the report. Payment for the report is made by, and EBI's contract and report extends to Jonathan Rose Companies only, in accordance with our Standard Conditions For Engagement and, Authorization Letter and Agreement for Environmental Services.

1.5 DATA GAPS

Any data gaps identified herein, as defined by ASTM E 1527-13, are not considered to have significantly affected the ability to identify recognized environmental conditions in connection with the Subject Property and do not alter the conclusions of this report.

DRAFT

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 OWNERSHIP AND LOCATION

According to the Los Angeles County Assessor's Office, the Subject Property is currently owned by Towers Miramar Real Tech.

The Subject Property is located at 2000 Miramar Street in the City and County of Los Angeles, California. The Subject Property includes one irregular-shaped parcel, identified by the Los Angeles, California Assessor's Office as 5154-020-030, totaling approximately 2.77 acres. The Subject Property is located approximately 300 feet east of the intersection of Miramar Street and Alvarado Street. Figure 1 - Location Map depicts the location of the Subject Property on a street map of Los Angeles, California. Figure 2 - Locus Map depicts the location of the Subject Property on the Hollywood, California United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle. Figure 3 - Site Plan depicts the configuration of the Subject Property and adjoining properties.

2.2 SUBJECT PROPERTY IMPROVEMENTS

The Subject Property is currently improved with a 157-unit multifamily residential complex, including one eight-story, concrete slab-on-grade apartment building. Additional structures and amenities include the following: a one-story administrative leasing office and community recreation center, attached on the north exterior of the tower building. There are no basements present beneath the existing structures. The existing improvements were reportedly constructed in 1980.

The existing buildings are located on the central portion of the property. Areas of the Subject Property surrounding the existing building include the following: asphalt-paved surface parking, located along the northeast side and south side of the tower building; concrete driveway, located at the southeast side of the property, concrete walkways, located throughout the Subject Property; and landscaping surrounding the building. Land and building areas are as follows:

SUBJECT PROPERTY IMPROVEMENTS					
Address	**Floors**	**Basement**	**Area (SF)**	**DOC**	**Lot Size (Acres)**
Miramar Towers	8	No	132,600	1980	2.77
Leasing office/clubhouse building attached to the north exterior of the tower building	1	No	4,028	1980	Inclusive

SF: Gross Square Feet
DOC: Date of Construction

2.3 CURRENT USE OF THE SUBJECT PROPERTY

At the time of inspection, the Subject Property was occupied by 157-unit multifamily senior residential complex, including one eight-story, concrete slab-on-grade apartment building, attached to one-story leasing office/clubhouse building. With the exception of the administrative leasing office, there are currently no commercial or industrial operations conducted at the Subject Property.

Please refer to Section 5.2 for further discussion regarding hazardous substances and petroleum products at the Subject Property.

DRAFT

2.4 MUNICIPAL SERVICES & UTILITIES

The Subject Property is serviced by the following municipal services and utilities:

MUNICIPAL SERVICES AND UTILITIES	
Utility	**Provider/Source**
Potable Water Supply	Los Angeles Department of Water and Power
Sewage Disposal System	City of Los Angeles
Electrical Service	Los Angeles Department of Water and Power
Natural Gas Service	The Gas Company
Oil Service	Not applicable
Heating/Cooling Systems	Electric split system HVAC units for the leasing office/clubhouse. The tower building cooling system is comprised of a two-pipe chilled water system. Chilled water is produced by one 100-ton air-cooled chiller unit that is located on the roof.
Emergency Power	One 30 KW diesel fired emergency generator with a self-contained, 60-gallon fuel tank.

2.5 ADJOINING PROPERTIES

Property use in the vicinity of the Subject Property is primarily characterized by residential and retail/commercial development.

ADJOINING PROPERTIES	
North	The Subject Property is bound to the north by Miramar Street, beyond which is residential development.
South	The Subject Property is bound to the south by 3rd Street, beyond which are JJ Park Motel (1906 W. 3rd Street), office building (1920 W. 3rd Street), Westlake Plaza retail strip (1926 W. 3rd Street), and an undeveloped land to the south-southwest.
East	The Subject Property is bound to the east by residential development.
West	The Subject Property is bound to the west by eTown Inn (2020 Miramar Street) and apartment building (2007 W. 3rd Street).

No visual evidence of adverse environmental conditions was observed during the survey of the adjoining properties.

DRAFT

3.0 USER PROVIDED INFORMATION

The following section summarizes information provided by *Jonathan Rose Companies* with regard to this Phase I Environmental Site Assessment. Additionally, a User Questionnaire was forwarded to the designated Client contact. The User Questionnaire has been completed and returned to our offices. The information requested in the User Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. The User Questionnaire and any additional documentation referenced below is presented in Appendix C.

3.1 TITLE RECORDS

Title record information associated with the Subject Property has not been provided to EBI by *Jonathan Rose Companies*. A detailed discussion regarding review of information obtained from other sources is presented in Section 4.3.5 of this report.

3.2 ENVIRONMENTAL LIENS AND ACTIVITY AND USE LIMITATIONS

Jonathan Rose Companies provided no information regarding environmental liens or activity and use limitations in connection with the Subject Property. A detailed discussion regarding environmental liens is presented in Section 4.3.7 of this report. A detailed discussion regarding activity and use limitations is presented in Sections 4.1.1 and 4.1.2 of this report.

3.3 SPECIALIZED KNOWLEDGE

Jonathan Rose Companies provided no specialized knowledge that is material to recognized environmental conditions in connection with the Subject Property. EBI was not provided with or made aware of previous environmental assessments or other documentation that is material to recognized environmental conditions in connection with the Subject Property, except as presented in Section 4.3.8 of this report.

3.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Jonathan Rose Companies provided no commonly known or reasonably ascertainable information within the local community about the Subject Property that is material to recognized environmental conditions in connection with the Subject Property.

3.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

Jonathan Rose Companies provided no information regarding valuation reduction for environmental issues in connection with the Subject Property.

3.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

Jonathan Rose Companies provided contact information for the Subject Property owner, manager and/or occupants.

3.7 REASON FOR PERFORMING PHASE I ESA

Jonathan Rose Companies retained EBI to complete this Phase I Environmental Site Assessment in connection with a real estate transaction.

DRAFT

4.0 RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORDS

A review of standard environmental databases maintained by Federal, state, and tribal offices was completed through Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut The databases were searched for properties with reported environmental conditions located within approximate minimum search distances as specified by ASTM E 1527-13, by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded "orphan" properties within the same zip code. The database report is presented in Appendix F.

The database report identified eight "orphan sites." Orphan sites are those sites that could not be accurately mapped or geocoded due to inadequate location information. EBI attempted to locate these sites via vehicular reconnaissance and interviews with personnel familiar with the area. Based on this research, EBI did not identify listed orphan sites within the approximate minimum search distances that may be considered likely to have impacted conditions at the Subject Property.

It should be noted that plotted locations of listed sites are not always accurate. With regard to listings that are determined or suspected to be inaccurate, based on information from other sources such as direct observation or consultation with individuals familiar with the property, EBI uses the best available data when evaluating the location of listed sites discussed below.

The following table provides a summary of the findings of the environmental database report. Specific properties identified within the database report are further discussed below.

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS			
Regulatory Database	**Approximate Minimum Search Distance**	**Subject Property Listed**	**Off-site Listings Within Search Distance**
Federal NPL Sites	1.0 mile	No	0
Federal Delisted NPL Sites	0.5 mile	No	0
Federal CERCLIS Sites	0.5 mile	No	0
Federal CERCLIS NFRAP Sites	0.5 mile	No	0

4.1.1 Federal Agency Database Records

National Priority List (NPL)
The NPL database, also known as the Superfund List, is a subset of CERCLIS and identifies sites that are ranked as high priority for remedial action under the Federal Superfund Act. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the NPL.

Delisted National Priority List (NPL)
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the Delisted NPL database.

Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)
CERCLIS contains data regarding potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability ACT (CERCLA). CERCLIS contains sites that are included on the National Priority List (NPL), as well as sites which are in the screening and assessment phase for possible inclusion on the NPL. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the CERCLIS database.

DRAFT

CERCLIS – No Further Remedial Action Planned (CERCLIS-NFRAP)
As of February 1995, CERCLIS sites designated as No Further Remedial Action Planned (NFRAP) have been removed from the CERCLIS list. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed without the need for the site to be placed on the NPL, or the contamination was not considered sufficient to warrant Federal Superfund action or NPL consideration. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the CERCLIS-NFRAP database.

Resource Conservation and Recovery Act (RCRA) – Corrective Action Tracking System (CORRACTS)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information regarding sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. The RCRA-CORRACTS database identifies TSD facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the RCRA CORRACTS database.

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) Facilities
RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) facilities are required to register hazardous waste activity under the Resource Conservation and Recovery Act (RCRA). Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the RCRA non-CORRACTS TSD database.

RCRA Hazardous Waste Generators
Hazardous waste generators tracked under the Resource Conservation and Recovery Act (RCRA) are classified as either Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQG). A RCRA-LQG is defined as a facility that generates over 1,000 kilograms (Kg) of hazardous waste, or over 1 Kg of acutely hazardous waste per month. A RCRA-SQG is defined as a facility that generates between 100 Kg and 1,000 Kg of hazardous waste per month. A RCRA-CESQG is defined as a facility that generates less than 100 Kg of hazardous waste, or less than 1 Kg of acutely hazardous waste per month. Neither the Subject Property nor any adjoining properties were identified on the RCRA Generator database.

Federal Engineering Control / Institutional Control Registries
The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on Federal Engineering Control or Institutional Control Registries.

Emergency Response Notification System (ERNS)
ERNS is a national database used to collect information regarding reported releases of petroleum products and/or hazardous substances. The database contains information from spill reports submitted to Federal agencies, including the EPA, the U.S. Coast Guard, the National Response Center, and the

DRAFT

U.S. Department of Transportation. A review of this database was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property. The Subject Property was not identified on the ERNS database.

4.1.2 State and Tribal Agency Database Records

Annual Workplan Sites (AWP)
The California Department of Toxic Substance Control (DTSC) Annual Workplan Sites (AWP) identifies known hazardous substance release sites targeted for cleanup. The data source is the California Environmental Protection Agency. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the AWP database.

California High-Priority Confirmed Release Sites (RESPONSE)
The California High-Priority Confirmed Release Sites (RESPONSE) database contains confirmed release sites where the California Department of Toxic Substance Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the RESPONSE database.

California Hazardous Waste Sites (ENVIROSTOR)
The California Hazardous Waste Sites (ENVIROSTOR) database contains potential or confirmed hazardous substance release sites, or sites for which there may be reasons to investigate further, identified by the California DTSC. The database includes the following site types: Federal NPL; State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. The Subject Property was not identified on the ENVIROSTOR database. However, 22 sites located within 1.0 mile of the Subject Property were identified on the ENVIROSTOR database. Of these site, 19 are located more than 0.50 miles from the Subject Property. Based on distance from the Subject Property, these 19 sites are not anticipated to impact the environmental integrity of the Subject Property. Information regarding the remaining three listed sites is presented in the following table:

ENVIROSTOR			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
Central Los Angeles High School No.9 450 South Grand View Street Los Angeles, California	0.334 miles / West-northwest / Crossgradient	19730194	Notification Date: 02/10/2000 Contaminants: Total chromium, nickel, arsenic, others Media Impacted: Soil Status: No further action Date of Closure: 11/19/2004
Iglesia Ni Cristo 141 North Union Avenue Los Angeles, California	0.347 miles / East-northeast / Upgradient	60001080	Notification Date: 07/29/2009 Contaminants: Lead Media Impacted: Soil Status: No further action Date of Closure: 10/08/2009
West Fourth Street Site 2424 West 4th Street Los Angeles, California	0.359 miles / West / Downgradient	19490210	Notification Date: 09/20/1990 Contaminants: Not reported Media Impacted: Not reported Status: Refer to other agency Date of Closure: NA

* Presumed hydrogeologic gradient based upon regional topography

DRAFT

Based upon the current regulatory status and/or distance/presumed hydrogeologic gradient relative to the Subject Property, and/or reported nature/extent of contamination, it is considered unlikely that conditions associated with the identified ENVIROSTOR sites represent an environmental concern to the Subject Property.

Proposition 65 Notification Records

Proposition 65 Notification Records contain facility notifications regarding any release that could potentially impact drinking water and thereby expose the public to a potential health risk. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the Proposition 65 Notification database.

Toxic Pits Cleanup Act Sites (Toxic Pits)

The Toxic Pits Cleanup Act Sites (Toxic Pits) database contains sites identified by the California Water Resources Control Board that are suspected to contain hazardous substances where cleanup has not yet been completed. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the Toxic Pits database.

California Bond Expenditure Plan

The California Bond Expenditure Plan was developed by the California Department of Health Services as a site-specific expenditure plan for the appropriation of Hazardous Substance Cleanup Bond Act funds. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the California Bond Expenditure Plan database.

Hazardous Waste and Substances Sites List (Cortese)

The Hazardous Waste and Substance Site List (also known as the Cortese List) is a planning document used by the State, local agencies, and developers to comply with California Environmental Quality Act requirements in providing information regarding the location of hazardous materials releases. Government Code Section 65962.5 requires the California Environmental Protection Agency to develop at least annually an updated Cortese List. The California Department of Toxic Substance Control (DTSC) is responsible for preparing a portion of the information that comprises the Cortese List, and other state and local government agencies are required to provide additional hazardous material release information for the Cortese List. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the Cortese List.

Spill, Leaks, Investigations, and Cleanup (SLIC)

The Spills, Leaks, Investigations, and Cleanups (SLIC) database, maintained by the California Water Resources Control Board, includes unauthorized discharges from spills and leaks, other than from underground storage tanks or other regulated sites. The Subject Property was not identified on the SLIC database. However, one site located within 0.5 mile of the Subject Property was identified on the SLIC database. Information regarding the listed site is presented in the following table:

SLIC			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
Furbert Property 2016 Temple Los Angeles, California	0.493 miles / North-northeast Crossgradient	SL204FM2481	Notification Date: Not reported Contaminants: TPH Media Impacted: Not reported Status: Case closed Date of Closure: 06/10/2002

* Presumed hydrogeologic gradient based upon regional topography

DRAFT

Based upon the current regulatory status and distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified SLIC site represent an environmental concern to the Subject Property.

Voluntary Cleanup Program (VCP) Properties

The Voluntary Cleanup Program (VCP) Properties database identifies low threat level properties with either confirmed or unconfirmed releases, for which the project proponents have requested that Department of Toxic Substances Control (DTSC) oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs. The Subject Property was not identified on the VCP database. However, one site located within 0.5 mile of the Subject Property was identified on the VCP database. Information regarding the listed site is presented in the following table:

VCP			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
Ignesia Ni Cristo 401 North Union Avenue Los Angeles, California	0.52 miles / South / Upgradient	60001080	Responsible Party: Iglesia Ni Crsito Notification Date: 07/29/2009 Contaminants: Lead Media Impacted: Soil Status: No further action Date of Closure: 10/08/2009

* Presumed hydrogeologic gradient based upon regional topography

Based upon the current regulatory status, distance/presumed hydrogeologic gradient relative to the Subject Property, and/or reported nature/extent of contamination, it is considered unlikely that conditions associated with the identified VCP site represent an environmental concern to the Subject Property.

Regional Water Quality Control Board (RWQCB) – Leaking Underground Storage Tanks (LUST)

The Regional Water Quality Control Board (RWQCB) maintains a database of reported Leaking Underground Storage Tank (LUST) Sites. The Subject Property was not identified on the RWQCB – LUST database. However, 18 sites located within 0.5 mile of the Subject Property were identified on the RWQCB – LUST database. Of these sites, 13 are located more than 0.25 miles from the Subject Property. Three of the remaining five sites have case closed status and the nearest site is located approximately 0.218 miles from the Subject Property. Based on the current regulatory status and distance from the Subject Property, these 16 LUST sites are not anticipated to impact the environmental integrity of the Subject Property. Information regarding the remaining two listed sites is presented in the following table:

RWQCB – LUST			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**

DRAFT

RWQCB – LUST			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
Shell #204-4532-4609 230 S. Alvarado Street Los Angeles, California	0.121 miles / West-southwest Downgradient	T060301130	Notification Date: 11/10/1986 Contaminants: Gasoline Media Impacted: GW Status: Case closed Date of Closure: 10/09/1996

* Presumed hydrogeologic gradient based upon regional topography

According to the 2015 closure report (obtained from the Geotracker) for the H & S facility, the groundwater flow direction is to the southwest. There are no monitoring wells installed along 3rd Street, south of the Subject Property. Based on the current regulatory status and actual groundwater flow direction, the H & S facility is not anticipated to impact the environmental integrity of the Subject Property.

Based upon the current regulatory status and distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified remaining LUST site represent an environmental concern to the Subject Property.

Facility Inventory Database (FID UST)

The California Environmental Protection Agency maintains a Facility Inventory Database (FID), which contains a historical registry of active and inactive underground storage tank (UST) locations reported by the California Water Resource Control Board. The Subject Property was not identified on the FID UST database. However, two adjoining properties were identified on the FID UST database. Information regarding the listed sites is presented in the following table:

FID UST				
Location	**Distance / Direction / Gradient***	**Capacity / Contents**	**Year Installed**	**Status**
St. Vincent Medical Center 2021 Miramar Street Los Angeles, California	Adjacent / North-northwest Crossgradient	Not reported	Not reported	Inactive
Alvarado II Incorporated 2000 W. 3rd Street Los Angeles, California	Adjacent / South-southwest / Downgradient	Not reported	Not reported	Inactive

* Presumed hydrogeologic gradient based upon regional topography

The 2000 W. 3rd Street facility is listed in the LUST database under H & S Food & Gas with same site address and further discussed in the LUST section above.

Based upon the absence of reported releases and/or distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified the remaining FID UST site represent an environmental concern to the Subject Property.

Hazardous Substance Storage Container Database (HIST UST)

The Hazardous Substance Storage Container Database is a historical listing of UST sites maintained by the California Water Resources Control Board. Neither the Subject Property nor any adjoining properties were identified on the HIST UST database.

DRAFT

Statewide Environmental Evaluation and Planning System (SWEEPS)
The Statewide Environmental Evaluation and Planning System (SWEEPS) is an underground storage tank database that was updated and maintained by a company contacted by the State Water Resource Control Board in the early 1980s. The listing no longer updated or maintained. The Subject Property was not identified on the SWEEPS database. However, two adjoining properties were identified on the SWEEPS database. Information regarding the listed sites is presented in the following table:

SWEEPS				
Location	**Distance / Direction / Gradient***	**Capacity / Contents**	**Year Installed**	**Status**
St. Vincent Medical Center 2021 Miramar Street Los Angeles, California	Adjacent / North-northwest Crossgradient	Not reported	Not reported	Not reported
Alvarado II Incorporated 2000 W. 3rd Street Los Angeles, California	Adjacent / South-southwest / Downgradient	Not reported	Not reported	Not reported

* Presumed hydrogeologic gradient based upon regional topography

The 2000 W. 3rd Street facility is listed in the LUST database under H & S Food & Gas with same site address and further discussed in the LUST section above.

Based upon the absence of reported releases and/or distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified the remaining SWEEPS site represent an environmental concern to the Subject Property.

Solid Waste Information System (SWIS)
Solid Waste Information System (SWIS) records typically contain an inventory of solid waste facilities or landfills identified by the Integrated Waste Management Board. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the SWIS database.

Waste Management Unit Database / Solid Waste Assessment Test (WMUDS/SWAT)
The Waste Management Unit Database (WMUDS) is used by the California Water Resources Control Board and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the WMUDS/SWAT database.

California Hazardous Material Incident Report System (CHMIRS)
The California Hazardous Material Incident Report System (CHMIRS) contains information regarding reported hazardous material incidents (i.e. accidental releases or spills). The data source is the California Office of Emergency Services. The Subject Property was not identified on the CHMIRS database.

DRAFT

Hazardous Waste Information system (HAZNET)
The California Environmental Protection Agency maintains a list of facilities that issue hazardous waste manifests. The source of the manifest records is the California Department of Toxic Substance Control (DTSC). Inclusion on the HAZNET database does not necessarily indicate the existence of an environmental concern, such as a release or spill incident. The Subject Property was not identified on the HAZNET database.

Site Mitigation and Brownfields Reuse Program (SMBRP) Facility Sites with Deed Restrictions & Hazardous Waste Management Program (HWMP) Facility Sites with Deed / Land Use Restriction
The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under SMBRP's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. This list represents deed restrictions that are currently active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future property owners. The Subject Property was not identified on SMBRP or HWMP Deed Restriction or Land Use Restriction Registries. However, two sites located within 0.5 mile of the Subject Property were identified on SMBRP or HWMP Deed Restriction or Land Use Restriction Registries. Information regarding the listed sites is presented in the following table:

SMBRP / HWMP DEED RESTRICTION OR LAND USE RESTRICTION REGISTRIES			
Site	**Distance / Direction / Gradient**	**ID No.**	**Regulatory Status**
Burlington Gardens 409, 411, 415 S. Burlington Los Angeles, California	0.222 miles / South / Downgradient	11446	Notification Date: Not reported Contaminants: Not reported Media Impacted: Not reported Status: Not reported Date of Closure: Not reported
Burlington Park 456, 408 S. Burlington Los Angeles, California	0.284 miles / South / Downgradient	11447	Notification Date: Not reported Contaminants: Not reported Media Impacted: Not reported Status: Not reported Date of Closure: Not reported

* Presumed hydrogeologic gradient based upon regional topography

Based upon the distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified sites represent an environmental concern to the Subject Property.

Tribal Environmental Databases
The United States Bureau of Indian Affairs (BIA) is responsible for the administration and management of 55.7 million acres of land held in trust by the United States for American Indians, Indian tribes, and Alaska Natives. There are 562 federally recognized tribal governments in the United States. The environmental database report identifies tribal administered lands of the United States that have any area equal to or greater than 640 acres. No tribal administered lands were identified within 1.0 mile of the Subject Property.

DRAFT

4.1.3 Local Regulatory Agency Records

Local municipal offices consulted during the completion of this assessment included the following: City of Los Angeles Building and Safety Department and Fire Department - Fire Prevention Division. EBI did not identify documented adverse environmental conditions, violations, or complaints associated with the Subject Property. EBI did not identify records of spills or releases of hazardous substances or petroleum products having occurred at the Subject Property.

City of Los Angeles Building and Safety Department
EBI reviewed available files regarding the Subject Property at the City of Los Angeles Building and Safety Department Records Division for information regarding past uses of the Subject Property. The original building permits and certificates of occupancy for the existing building indicates that the building was constructed in 1980. Building permits for general tenant improvments were additionally on file for the Subject Property. Building Department records indicate that the previous hotel buildings were demolished in 1974, prior to construction of the existing senior residential building. The review of Building Department records did not identify past uses of the Subject Property that would constitute a recognized environmental condition.

City of Los Angeles Fire Department - UST Section
EBI contacted Ms. Katie Rosas of the City of Los Angeles Fire Department, UST Section to request available information regarding the existing or historic USTs or ASTs associated with the Subject Property. Ms. Rosas reported that no records regarding USTs were on file for the Subject Property.

City of Los Angeles Fire Department Hazardous Materials Management Division
EBI contacted Ms. Angenee Reygadas of the City of Los Angeles Fire Department Hazardous Materials Management Division to request available information regarding the hazardous materials associated with the Subject Property. Ms. Reygadas reported that no records regarding hazardous substances or petroleum products, spills or releases, or violations were on file for the Subject Property.

4.2 PHYSICAL SETTING

4.2.1 Topography

The Subject Property is located at an elevation of approximately 395 feet above mean sea level (msl). The topography of the Subject Property slopes moderately to the south. The Subject Property is located in a moderately sloping area, and the general slope of the surrounding region is to the south-southwest (see Figure 2 - Locus Map, which depicts the location of the Subject Property on the Hollywood, California USGS 7.5 Minute Topographic Quadrangle).

4.2.2 Geology and Soils

No bedrock outcroppings were observed at the Subject Property. Information concerning the geology of the Subject Property was obtained from the USGS Ground Water Atlas of the United States, California region (1995). The Subject Property is located within the Lower Californian physiographic province, which consists of coastal mountain ranges underlain by severely folded, faulted, commonly metamorphosed marine and continental sediments.

According to the Soil Survey of Los Angeles County, the dominant soil composition in the vicinity of the Subject Property is classified as Diablo-Altamont Association, 2 to 9 percent slopes (map 34). This soil consists of deep, well-drained soils consisting of dark gray clay and dark grayish-brown clay. The Diablo soil extends to a depth of 52 inches below ground surface (bgs) and 36 inches bgs for Altamont. Diablo-

DRAFT

Altamont soils are neutral. Permeability is slow, and the available water capacity is low to moderate. The depth to bedrock is not provided.

4.2.3 Hydrogeology and Hydrology

No natural surface water bodies were identified on or adjacent to the Subject Property. The nearest downgradient surface water body is the Ballona Creek, located approximately five miles southwest of the Subject Property.

Local groundwater gradient is expected to follow surface topography; therefore, groundwater flow near the Subject Property is expected to flow to the southwest. Groundwater depths and flow gradients are best evaluated by a subsurface investigation involving the installation of at least three groundwater monitoring wells and precise measurements of hydrostatic pressure. Monitoring wells were not observed on the Subject Property.

4.3 HISTORICAL USE OF THE SUBJECT PROPERTY AND ADJOINING PROPERTIES

EBI attempted to determine the history of the Subject Property dating back to 1940 or first developed use. The following table summarizes the historical use of the Subject Property and surrounding area.

HISTORICAL USE SUMMARY			
Period	**Historical Uses**		**Source(s)**
	Subject Property	**Surrounding Area**	
At least 1894-1906	Undeveloped and single-family dwellings.	Primarily Undeveloped; limited single-family residential development.	Fire Insurance Maps Topographic Maps
1907-1974	Hotel and single-family dwellings.	Single and multi-family residential and commercial development.	Aerial Photographs Fire Insurance Maps Topographic Maps City Directories Municipal Records
1975-1979	Undeveloped land and single-family dwellings	Single and multi-family residential and commercial development.	Aerial Photographs City Directories Municipal Records
1980 to Present	Existing senior housing development.	Single and multi-family residential and commercial development.	Aerial Photographs City Directories Municipal Records

No environmentally significant conditions were identified on the Subject Property. However, two former gas stations were located to the south-southwest of the Subject Property. One of the gas stations was replaced by a retail strip center and the other former gas station was observed as undeveloped land. The H & S gas station is discussed in the LUST section. The other gas station is not listed in the UST or LUST databases. These gas stations are located across 3rd Street and topographically downgradient from the Subject Property.

4.3.1 Aerial Photographs

Historical aerial photographs may be used to evaluate changes in land use and to identify visible areas of potential environmental concern. A search for historical aerial photographs depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). Aerial photographs depicting the Subject Property were reviewed and are summarized in the following table. Copies of the aerial photographs are presented in Appendix G.

AERIAL PHOTOGRAPH SUMMARY		
Year	**Issues Noted**	**Observations**
1923 1928	No	**Subject Property:** The Subject Property appears to consist of three large commercial structures located on the northern portion of the site. Five small residential structures are depicted on the southern portion of the Subject Property.
		Surrounding Area: Surrounding properties to the east, and west are residential structures. A public roadway, trending southeast to northwest, is visible to the north and south of the Subject Property, beyond which are residential buildings. An undeveloped land is depicted to the north-northeast of the Subject Property.
1938	No	**Subject Property:** Conditions on the Subject Property appear to be similar to those depicted on the 1923 and 1928 photographs.
		Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1923 and 1928 photographs. Additionally, a gas station type structure is depicted to the south-southwest and undeveloped land to the south of the Subject Property.
1948	No	**Subject Property:** Conditions on the Subject Property appear to be similar to those depicted on the 1938 photograph.
		Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1938 photograph. Additionally, a gas station type structure is depicted to the south of the Subject Property.
1952 1964	No	**Subject Property:** Conditions on the Subject Property appear to be similar to those depicted on the 1948 photograph.
		Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1948 photograph. Additionally, apartment buildings are depicted to the north-northeast of the Subject Property.
1970	No	**Subject Property:** The southern portion of the Subject Property is depicted as undeveloped land. Three large commercial structures are depicted on the northern portion of the Subject Property.
		Surrounding Properties: Conditions on the surrounding properties appear to be similar to those depicted on the 1952 and 1964 photographs. An L-shaped commercial building is depicted to the south of the Subject Property, from a former site of a gas station.
1977	No	**Subject Property:** The majority of the site is depicted as undeveloped land. Two small residential buildings are depicted on the southeastern portion of the Subject Property.
		Surrounding Properties: Conditions on the surrounding properties appear to be similar to those depicted on the 1977 photograph.
1983 1989 1994 2002 2005 2009 2010 2012	No	**Subject Property:** Conditions on the Subject Property are depicted as they exist at the present day. The high-rise building is located on the central portion and the one-story leasing office/clubhouse building is depicted on the northern portion of the site.
		Surrounding Properties: Conditions on the surrounding properties appear to be similar to those depicted on the 1977 photograph.

4.3.2 Fire Insurance Maps

A search for historical fire insurance maps depicting the Subject Property and vicinity was conducted by EDR Sanborn Maps, Inc. Historical fire insurance maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of the fire insurance maps are presented in Appendix G.

FIRE INSURANCE MAP SUMMARY

DRAFT

Year	Issues Noted	Observations
1906	No	**Subject Property:** The Subject Property is occupied by five single-family dwellings, three detached garages, and undeveloped lots on the northwestern and northeastern portions of the Subject Property.
		Surrounding Properties: Features depicted on surrounding properties included Miramar Street and undeveloped land located on the northern adjacent property, two single-family dwellings with detached garages and undeveloped land located on the eastern adjacent property, Ocean View Avenue and a single-family dwelling located on the southern adjacent property, a single-family dwelling and a detached garage located on the western adjacent property.
1950 1953 1955 1958	**Yes**	**Subject Property:** The Subject Property is occupied by Barker Hotel and three single-family dwellings located on the eastern portion of the site.
		Surrounding Properties: Features depicted on surrounding properties included Miramar Street and single and multi-family residential dwellings located on the northern adjacent property; single and multi-family dwellings on the eastern adjacent property; single and multi-family dwellings, stores, and gas stations located on the southern adjacent property; Barker Hotel and a multi-family dwelling located on the western adjacent property.
1960 1962 1963	**Yes**	**Subject Property:** Conditions on the Subject Property are similar to those as depicted on the 1950 to 1958 maps, with missing two structures on the southern portion of the Subject Property. Barker Hotel occupies the eastern portion of the Hotel and New Miramar Hotel occupies the majority of the northern portion of the site.
		Surrounding Properties: Conditions on the surrounding properties are similar to those as depicted on the 1950 to 1958 maps.
1967	**Yes**	**Subject Property:** Conditions on the Subject Property are similar to those as depicted on the 1960 to 1963 maps.
		Surrounding Properties: Conditions on the surrounding properties are similar to those as depicted on the 1960 to 1963 maps. The gas station on the southern adjacent property was replaced by an L-shaped commercial building. One gas station still exist to the south-southwest of the Subject Property.
1968 1970	**Yes**	**Subject Property:** Conditions on the Subject Property are similar to those as depicted on the 1967 map. However, the Barker Hotel located on the southeastern of the site is no longer depicted.
		Surrounding Properties: Conditions on the surrounding properties are similar to those as depicted on the 1967 map.

4.3.3 Topographic Maps

Historical topographic maps provide information related to physical land configuration such as elevation, ground slope, surface water and other features. While most buildings in densely developed urban centers are not depicted, topographic maps typically show structures equal to or larger than the size of a single-family residence in rural areas. Other notable features such as woods, pipelines, municipal boundaries, and areas of filled land are often marked on topographic maps.

A search for historical topographic maps depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). Historical topographic maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of the topographic maps are presented in Appendix G.

TOPOGRAPHIC MAP SUMMARY		
Year	**Issues Noted**	**Observations**
1898	No	**Subject Property:** No structures or other notable features are depicted on the Subject

TOPOGRAPHIC MAP SUMMARY		
Year	**Issues Noted**	**Observations**
1900		Property. A portion of the existing 3rd Street is depicted to the south of the Subject Property.
		Surrounding Properties: Surrounding properties to the north, east, south, and west are primarily small residential structures.
1921 1928	No	**Subject Property:** Eight small residential-type structures located on the northern and southern portion of the site.
		Surrounding Properties: Surrounding properties are primarily depicted as small residential structures. The existing Miramar Street, trending southeast to northwest, is depicted to the north. The existing 3rd Street, trending southeast to northwest, is depicted to the south of the Subject Property.
1953 1966 1972 1981 1991	No	**Subject Property:** The Subject Property is shaded to represent urban development; no distinct structures or other notable features are depicted.
		Surrounding Properties: The surrounding properties are shaded to represent urban development; no distinct structures or other notable features are depicted.

4.3.4 Street Directories

Street directories are commercial publications containing names and addresses, and in many cases, occupations of the occupants of a particular community. The directories may also contain information pertaining to business processes conducted within a community. A search for historical street directories was conducted by Environmental Data Resources, Inc. (EDR). Historical street directories were reviewed and are summarized in the following table. Copies of the street directories are presented in Appendix G.

STREET DIRECTORY SUMMARY		
Year	**Issues Noted**	**Occupants**
1924	No	Subject Property is listed as Miramar Terrace Apartments and names of individuals. Surrounding properties are listed with names of individuals.
1929	No	Subject Property is listed as Miramar Terrace Hotel and names of individuals. Surrounding properties are listed with names of individuals.
1933	No	Subject Property is listed as Barker Hotel and names of individuals. Surrounding properties are listed with names of individuals.
1937	No	Subject Property is listed as Barker Hotel and names of individuals. Surrounding properties are listed with names of individuals.
1942	No	Subject Property is listed as Barker Hotel and names of individuals. Surrounding properties are listed with names of individuals.
1951	No	Subject Property is listed as Miramar Barker Hotel and names of individuals. Surrounding properties are listed with names of individuals.
1958	No	Subject Property is listed as Barker Hotel and names of individuals. Surrounding properties are listed with names of individuals.
1962	No	Subject Property is listed as New Miramar Hotel and names of individuals. Surrounding properties are listed with names of individuals.
1967	No	Subject Property is listed as New Miramar Hotel, New Miramar Hotel & Apartments, and names of individuals. Surrounding properties are listed with names of individuals.
1971	No	Subject Property is listed as New Miramar Hotel, New Miramar Hotel & Apartments, and names of individuals. Surrounding properties are listed with names of individuals.
1981	No	Subject Property is listed with names of individuals. Surrounding properties are listed with names of individuals.

DRAFT

STREET DIRECTORY SUMMARY		
Year	**Issues Noted**	**Occupants**
1986	No	Subject Property is listed as Forest City Management and names of individuals. Surrounding properties are listed with names of individuals.
1990	No	Subject Property is listed as Forest City Management and names of individuals. Surrounding properties are listed with names of individuals.
2000	No	Subject Property is listed as Miramar Towers and names of individuals. Surrounding properties are listed with names of individuals.
2006	No	Subject Property is listed as Miramar Towers and names of individuals. Surrounding properties are listed with names of individuals.
2013	No	Subject Property is listed as Miramar Towers. Surrounding properties are listed with names of individuals.

4.3.5 Recorded Land Title Records

Land title records provide information on previous ownership of a property. Typically, deeds signifying transfer of a land parcel are recorded in county files and can be researched to determine the identity of past owners. A "chain of title" is a continuous record of ownership for a specific parcel. A 50-year chain of title search was not included in the scope of work for this assessment.

4.3.6 Property Tax Records

The property information for the Subject Property was obtained at the Los Angeles County Assessor's Office. The property information identifies the current owner as Towers Miramar Real Tech, which acquired the Subject Property in 1984. Assessor's Office records indicate that the existing building was constructed in 1979. A listing of the former Subject Property owners was not available for review.

4.3.7 Environmental Liens and Activity and Use Limitations

A search for Environmental Liens and Activity and Use Limitations was not included in the scope of this assessment.

4.3.8 Previous Environmental Reports

EBI was not provided with or made aware of previous environmental assessments or other documentation regarding environmental investigations performed for the Subject Property. EBI did not identify previous environmental reports for the Subject Property at local agencies or other sources contacted during this assessment.

DRAFT

5.0 SUBJECT PROPERTY RECONNAISSANCE

The Subject Property reconnaissance was conducted by Mr. Renato Nalupa, EBI Field Assessor, on February 19, 2016. Mr. Nalupa was accompanied by Mr. Alfredo Torres, Maintenance Custodian and Mr. Jordan Moreno, Maintenance Supervisor and interviewed Ms. Pamela Roberson, the Subject Property Manager.

5.1 METHODOLOGY AND LIMITING CONDITIONS

The Subject Property reconnaissance consisted of visual and/or physical observations of the Subject Property and improvements, adjoining properties as viewed from the Subject Property boundaries, and the surrounding area based on visual observations made from adjacent public thoroughfares. Building exteriors were observed along the perimeter from the ground, unless described otherwise. Building interiors were observed as they were made safely accessible, unless described otherwise.

At the time of the survey, the weather was sunny and approximately 75° Fahrenheit. During the survey, representative common areas, apartments units, mechanical spaces, and/or equipment and building components were observed, and approximately 26% of the units were surveyed. There were no significant portions of the Subject Property that were inaccessible or excluded from this survey.

5.2 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

5.2.1 Hazardous Substances and Petroleum Products (Identified Uses)

Notable hazardous substances or petroleum products in connection with identified uses observed at the Subject Property are described below.

HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS			
General Type of Material	**Approximate Quantity / Container / Material**	**Location**	**Storage Condition**
Cleaning Compounds and Janitorial Supplies	Various sized containers, ranging from aerosol cans to five-gallon pails	Storage room and apartment kitchens	Good: No leaks or spills

EBI did not identify evidence of significant leaks, spills, or the improper handling of petroleum or hazardous substances that might impact the environmental condition of the Subject Property.

5.2.2 Hazardous Substances and Petroleum Products (Unidentified Uses)

EBI did not observe evidence of hazardous substance or petroleum products containers at the Subject Property that were not in connection with identified uses.

5.2.3 Unidentified Substances Containers

EBI did not observe evidence of unidentified substances containers at the Subject Property.

5.3 WASTE GENERATION, STORAGE, AND DISPOSAL

EBI identified the following waste streams generated at the Subject Property:

WASTE GENERATION, STORAGE, AND DISPOSAL

DRAFT

Classification	Type of Waste / Generation Process	Type of Storage / Location	Disposal Method / Contractor
Non-regulated Solid Waste	Municipal Solid Waste / Routine Site Operations	1 Solid Waste Dumpster (Placed at curb-side)	Republic
Non-regulated Liquid Waste	Sanitary Sewage / Routine Site Operations	NA (Municipal Sanitary Sewer)	City of Los Angeles
Regulated Solid or Liquid Waste	None identified	NA	NA
Biomedical Waste	None identified	NA	NA

No evidence of improper solid waste management or the improper disposal of hazardous substances or petroleum products was observed at the time of reconnaissance.

5.4 UNDERGROUND STORAGE TANKS (USTS) & ABOVEGROUND STORAGE TANKS (ASTS)

5.4.1 Existing Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI did not identify the presence of USTs and ASTs at the Subject Property. However, one 2,500-gallon and two 200-gallon hot water tanks are located on the roof adjacent to the hot water boilers.

5.4.2 Former Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of USTs or ASTs formerly having been located at the Subject Property.

5.5 OIL-CONTAINING EQUIPMENT AND POLYCHLORINATED BIPHENYLS (PCBS)

Polychlorinated biphenyls (PCBs) are a chemical component of many dielectric fluids, heat transfer fluids, hydraulic fluids, lubricating oils, paints, or coatings manufactured prior to July 2, 1979. Equipment that may potentially contain PCBs includes electrical equipment such as transformers or capacitors or hydraulically operated equipment, such as elevators, compaction equipment, or manufacturing equipment. The manufacture and distribution in commerce of PCBs was banned for use in 1979 by the United States Congress, which enacted the Toxic Substance and Control Act (TSCA). In accordance with *US Code of Federal Regulations Title 40 - Protection of Environment, Chapter I - Environmental Protection Agency, Subchapter R - Toxic Substance Control Act (TSCA), Part 761 - Polychlorinated Biphenyls (PCBs) Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions*, the owner of a transformer or other PCB-containing equipment is responsible for equipment maintenance and remediation in the event of a leak or release.

Based upon the date of construction and upgrades, no potential PCB-containing equipment was identified at the Subject Property. However, the following oil-containing equipment was identified at the Subject Property:

OIL-CONTAINING EQUIPMENT			
Classification	**Type of Equipment**	**Year Installed / Location**	**Staining / Releases Identified**
Transformers and Fluid-Containing Electrical Equipment	(1) Pad-mounted Electrical Transformer [Los Angeles Department of Water and Power]	In an enclosure at south parking lot	No

DRAFT

OIL-CONTAINING EQUIPMENT			
Classification	**Type of Equipment**	**Year Installed / Location**	**Staining / Releases Identified**
Hydraulic Equipment	(2) 3,500-pound passenger elevators	2008 (modernization) / Main lobby	No
	(1) 3,500-pound freight elevator	2008 (modernization)/ Main lobby	No
Other Oil-containing Equipment	None identified	NA	NA

5.6 ADDITIONAL SITE CONDITIONS

The following is a summary of visual and/or physical observations of the Subject Property on the day of the site visit. Photographs of pertinent Subject Property features are presented in Appendix A.

ADDITIONAL SITE CONDITIONS	
Condition	**Identified**
Interior Drains, Trenches, or Sumps	**Yes**
Interior Stains or Corrosion	No
Unusual Odors	No
Interior Pools of Liquid	No
Stained Soil or Pavement	**Yes**
Stressed Vegetation	No
Indications of Solid Waste Disposal	No
Exterior Pits, Ponds, or Lagoons	No
Wastewater or Stormwater Discharge/Disposal	**Yes**
Oil-Water Separators or Clarifiers	No
Septic Systems or Cesspools	No
Wells (Drinking Water Wells, Monitoring Wells, Agricultural/Irrigation Wells, or Process Water Wells)	No
Petroleum or Natural Gas Pipelines/Easements	No
Sink Holes	No

Floor drains were observed in the laundry room and public restroom. The floor drains reportedly discharge to the municipal sewer system. No staining or other evidence of a release of hazardous substances or petroleum products was observed in the vicinity of the floor drains.

Minor staining was observed on the concrete floor of the emergency generator. The staining encompass an area of approximately one square foor. No floor drains, cracks, penetrations, or other potential pathways to the subsurface were observed at this location.

The ground surface outside the building is relatively flat and the north side and moderately sloping on the south side. Stormwater runoff from the asphalt-paved parking areas adjacent to the north and south sides of the existing building discharges to catch basins located throughout. The catch basins are associated with the municipal stormwater sewerage system, operated by the City of Los Angeles.

DRAFT

6.0 INTERVIEWS

The following persons were interviewed to obtain information regarding recognized environmental conditions in connection with the property. Additionally, a Pre-Survey Questionnaire was forwarded to the designated Subject Property contact. The Pre-Survey Questionnaire has been completed and returned to our offices. The information requested in the Pre-Survey Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. The Pre-Survey Questionnaire and any accompanying documentation are presented in Appendix C.

Pertinent information from the interviews is presented in applicable sections of this report.

DRAFT

7.0 CONDITIONS OUTSIDE THE SCOPE OF ASTM E 1527-13

The following sections address environmental issues or conditions at the Subject Property that parties may wish to assess in connection with commercial real estate that are outside the scope of ASTM Practice E 1527-13 (non-scope considerations).

7.1 ASBESTOS-CONTAINING MATERIAL (ACM)

Asbestos is a term used to describe a group of six naturally occurring crystalline fiber minerals. Asbestos has excellent thermal stability, a high degree of tensile strength, and has been used extensively in the textile, insulation, and building industries, particularly as a component in fireproofing, decorative coatings, insulation materials, and as reinforcement for plaster binders in building products. Asbestos-containing building materials are generally classified as friable or non-friable. Friable materials are those which can be crumbled, pulverized, or reduced to powder by hand pressure, or by normal use or maintenance can be expected to emit asbestos fibers into the air. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition, or other activities, at which time it may be considered friable.

Based upon the date of construction and in accordance with the scope of work for this assessment, EBI did not conduct a survey for the presence of ACM.

According to the property owner, an Asbestos Operations and Maintenance (O&M) Plan is currently in place at the Subject Property. EBI reviewed an Asbestos O&M Plan, prepared by Forest City Residential Management, dated September 2009. The O&M Plan identified the following presumed ACM at the Subject Property: vinyl floor tiles, acoustical ceiling material, and thermal system insulation.

7.2 RADON

Radon is a naturally-occurring, colorless and odorless radioactive gas that is generated primarily in granitic rocks. The United States Surgeon General has published information that radon is a cause of lung cancer. Radon usually enters a building where the building structures contact underlying and surrounding soil. Radon is generally considered to pose the greatest potential health risk to residents of the lowest level of a building. But, radon can also migrate vertically within building structures to areas above the ground contact floors.

EBI conducted a radon screening at the Subject Property as part of this assessment including sampling and analysis in accordance with the Mortgagee Letter 2013-07 and conformance with HUD Office of Multifamily Development Radon Policy and ANSI/AARST MAMF-2012 (Protocol for Conducting Radon Decay Product Measurement in Multifamily Buildings). Per the referenced protocols, tests were placed in a minimum of 25% of the ground contact and 10% of upper floor apartments were tested in each building. The sampling was conducted and supervised by Radon Professionals.

The EPA Map of Radon Zones indicates that Los Angeles County is located within a Zone 2 radon area. Zone 2 is defined as an area that has a moderate potential for radon gas, with a predicted average indoor radon screening level between 2.0 picoCuries per liter (pCi/L) and 4.0 pCi/L. The EPA recommended Action Level for radon is 4.0 pCi/L.

Between February 23 and February 25, 2016, EBI conducted a limited short-term radon screening of the Subject Property by testing 19 residential units and 2 non-residential areas. The radon test canisters were exposed for a minimum of 48 hours and were sent to Air Chek, Inc in Mills River, North Carolina for analysis. The sampling locations and laboratory analytical results are presented in the following table:

DRAFT

Canister No.	Location	Floor	Radon Concentration (p/Ci/L)
7733280	Leasing Office	1	0.9
7733283			0.6 (D)
7733279	Community Room		0.6
7733278			<0.3 (D)
7733277	101		2.5
7733276	101		2.1 (D)
7733275	102		<0.3
7733274	107		0.8
7733272	112		0.6
7733271	118		0.8
7733270	204	2	<0.3
7733269	215		<0.3
7733232	307	3	<0.3
7733273	316		<0.3
7733284	402	4	<0.3
7733285	413		<0.3
7733282	501	5	<0.3
7733371	516		<0.3
7733365	604	6	<0.3
7733364	617		<0.3
7733366	707	7	<0.3
7733240	718		<0.3
7733236	805	8	<0.3
7733361	820		<0.3
Quality Control Blank Samples			
7733287	102	1	<0.3
7733228	107		<0.3

Laboratory analytical results identified radon concentrations less than the EPA Action Level of ≥4.0 pCi/L in all sample locations. The radon laboratory report is appended.

7.3 LEAD-BASED PAINT (LBP)

Use of lead in household paint was banned by the U.S. Environmental Protection Agency (EPA) effective January 1, 1978. The EPA and the U.S. Department of Housing and Urban Development (HUD) consider lead-based paint as containing a lead concentration equal to or greater than 1.0 milligram per square centimeter (mg/cm²) or 0.5% lead by weight, as defined by Title X of the 1992 Housing and Community Development Act.

Based on the date of construction of the existing building and in accordance with the scope of work of this assessment, a LBP survey was not conducted at the Subject Property.

DRAFT

7.4 LEAD IN DRINKING WATER

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and building plumbing systems. In 1986, EPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing materials. Lead in drinking water results primarily from corrosion of lead containing materials in service lines or from corrosion of lead containing materials in building plumbing systems such as lead solder, brass, bronze, and other lead containing alloys. The EPA Action Level for lead in public drinking water supplies is 0.015 parts per million (ppm) or 0.015 milligrams per liter (mg /L).

Municipal water service is provided to the Subject Property by Los Angeles Department of Water and Power. Potable water is reportedly obtained from Northern California State Water Project, Colorado River, and groundwater wells. Based upon review of the utility's 2014 Drinking Water Supply and Water Quality Report, the municipal water supply meets all current criteria established by the Safe Drinking Water Act (SDWA) and local municipal drinking water standards, including those for lead. Based upon the existing municipal water service and in accordance with the scope of work for this assessment, EBI did not conduct lead-in-drinking water sampling at the Subject Property.

7.5 LIMITED MICROBIAL SURVEY

Microbial growth (e.g., mold or fungus) on building materials may occur when excess moisture is present. Porous building materials such as gypsum board, insulation in walls and ceilings, and carpeting retain moisture and become microbial growth sites if moisture sources are not controlled or mitigated. Potential sources of moisture include rainwater intrusion, groundwater intrusion, condensation on cold surfaces, and water leaks from building systems (e.g., plumbing leaks, HVAC system leaks, overflowing drains, etc.). Inadequate ventilation of clothes dryers and shower stalls may also result in excess moisture conditions. Microbial growth may be clearly visible (e.g., ceramic tile mortar in shower stalls) or may be concealed with no visible evidence of its existence (e.g., inside wall cavities).

Interior areas of the Subject Property building to which access was provided and in which building elements were readily observable were inspected for the presence of moisture and visible or olfactory evidence of microbial development. No disassembly of systems or building components or physical or invasive testing was performed. No observations were conducted within concealed locations (construction elements behind wall and ceiling finishes, and other building components, etc.). The scope of this inspection was limited to visual observations of accessible areas for microbial growth and water damaged materials and did not include the collection and laboratory analysis of bulk samples or air samples to confirm the presence of microbial elements.

Representative observations revealed no obvious visual or olfactory indications of the presence of active moisture or mold activity at the Subject Property. In addition to our observation efforts, a questionnaire provided to Subject Property personnel did not indicate the presence of mold, and Subject Property personnel were not aware of the presence of moisture or mold activity. Based on the interviews and conditions as observed at the time of inspection, mold does not appear to be a concern at the Subject Property.

7.6 HUD FACTORS

The following additional HUD Environmental Factors were reviewed at the Subject Property.

DRAFT

HUD ENVIRONMENTAL FACTOR	FINDINGS
Coastal Zone and Coastal Barrier Resources	The Subject Property is not located within a State Coastal Management Zone, or a coastal barrier designated on a current FEMA flood map or Department of Interior coastal barrier resource map. No further action or investigation is recommended regarding this factor.
Floodplain Management	EBI reviewed the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map, Community Map #060137, Panel #1610F, dated September 26, 2008. The Subject Property Flood Zone Determination appears to be Zone X, defined as an area outside the 100-year and 500-year floodplains. The Subject Property is not located within a Special Flood Hazard Area identified on the current FEMA Flood Insurance Rate Map (FIRM). No further action appears warranted regarding this factor.
Historic Preservation	This assessment is being completed for an existing HUD loan going through a Transfer of Physical Assets (TPA) loan assumption rather than a new HUD MAP 223f loan. As such, SHPO correspondence is not necessary. If it is subsequently determined that any substantial renovation work is required, then SHPO correspondence may need to be completed at a later date.
Noise Abatement	The Subject Property is not located within 1,000 feet of a freeway, major highway, or busy road, 5 miles of a civil airport, 15 miles of a military airport or 3,000 feet of a railroad. No further action appears warranted regarding this factor.
Explosive or Flammable Hazards	No industrial facilities handling explosive or fire-prone materials such as liquid propane, gasoline or other storage tanks are adjacent to or visible from the Subject Property. No further action or investigation is recommended regarding this factor.
Airport Hazards	The Subject Property is not located within 3,000 feet from the end of a runway at a civil airport or 2 ½ miles from the end of a runway at a military airport. No further action or investigation appears warranted regarding this factor.
Protection of Wetlands	There are no surface water bodies, marshy areas or other visible indications of potential wetlands areas on or adjacent to the Subject Property. According to the NWI Wetlands Map, there are no wetland areas in the vicinity of the Subject Property.
High Voltage Power Transmission or Other Towers	No High Voltage Power Transmission or Other Towers are located on-site or on adjacent properties. There are no structures that could fall on a subject building. No further action or investigation is recommended regarding this factor.
Landfills	No landfills are located within 3,000 feet of the Subject Property. As such, no further action or investigation is recommended regarding this factor.
Endangered or Threatened Species or Habitat	Based on the refinancing of an existing property or an existing development, impacts to endangered/threatened species or habitats are not anticipated and no further action is recommended regarding this factor.
Sole Source Aquifer Recharge Area	The Subject Property is connected to the public sewer system. As such, no further action or investigation is recommended regarding this factor.
Farmlands Protection	The Subject Property is not farmland. As such, no further action or investigation is recommended regarding this factor.
Rail Lines	The Subject Property is not located within 100 feet of the right of way of a railroad. As such, no further action or investigation is recommended regarding this factor.
Natural Gas or Petroleum Pipelines	None of the on-site structures are located within 10 feet of a natural gas or petroleum pipeline easement. As such, no further action or investigation is recommended regarding this factor.

DRAFT

7.7 TIER 1 VAPOR ENCROACHMENT SCREENING

EBI has conducted a Tier 1 Vapor Encroachment Screen (VES) in general conformance with the American Society for Testing Materials (ASTM) Standard E 2600-10, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions, dated June 1, 2010.

7.7.1 Purpose and Scope-of-Services

The purpose of this Tier 1 VES is to conduct an initial screening to identify a vapor encroachment condition (VEC). A VEC is defined as the presence or likely presence of chemical(s) of concern (COC) vapors in the subsurface of the Subject Property, caused by the release of vapors from contaminated soil or groundwater either on or near the Subject Property, as identified by Tier I or Tier II procedures.

The VES process is a two-tiered screening process. The Tier 1 VES is based upon information typically collected during an ASTM Standard E 1527 Phase I ESA and is typically focused on known or suspect contaminated properties that may exist in the area of concern (AOC). The Tier 1 VES includes, but is not limited to, the following: review of Federal, state, local, and tribal government records, as reported in the regulatory database report; chemical use and historical records of prior uses on the Subject Property and within proximity of the Subject Property; soil characteristics; geological characteristics; contaminant characteristics and plume migration data (if this data is readily available); significant conduits that that might provide preferential pathways for vapor migration; and groundwater depth and groundwater flow data.

Search Distance Test and Chemicals of Concern Test

The Tier 1 screening includes the following: (1) a Search Distance Test to determine whether there are any known or suspect contaminated properties within the AOC; and (2) a Chemicals of Concern Test to determine for those known or suspect contaminated properties within the AOC whether COC are likely to be present.

Standard environmental record sources were reviewed pertaining to the Subject Property and to properties within the AOC (i.e., within the Approximate Minimum Search Distances, as defined by ASTM Standard E 2600-10 Guide). The Approximate Minimum Search Distance is based upon the type of COC known or suspected to exist in any release from a property, that is, non-petroleum hydrocarbon COC (such as chlorinated solvents) versus petroleum hydrocarbon chemicals of concern (PHCOC), and the location of the known or suspect source of contamination with respect to the Subject Property. The AOC is generally one-third of a mile (1,760 feet) around the Subject Property for COC and one-tenth of a mile (520 feet) around the Subject Property for PHCOC. Approximate minimum search distances surrounding the Subject Property to identify the AOC are specified below:

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE
Approximate Minimum Search Distances

Regulatory Database	COC	PHCOC
Federal NPL Sites	1/3 mile	1/10 mile
Federal CERCLIS Sites	1/3 mile	1/10 mile
Federal RCRA CORRACTS Sites	1/3 mile	1/10 mile
Federal RCRA non-CORRACTS TSD Sites	1/3 mile	1/10 mile
Federal RCRA Generators Sites	Subject Property Only	Subject Property Only
Federal Engineering / Institutional Control Sites	Subject Property Only	Subject Property Only
Federal ERNS Sites	Subject Property Only	Subject Property Only
State and Tribal equivalent NPL / CERCLIS Sites	1/3 mile	1/10 mile

DRAFT

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE Approximate Minimum Search Distances		
Regulatory Database	**COC**	**PHCOC**
State and Tribal Spills Sites	Subject Property Only	Subject Property Only
State and Tribal Landfill or Solid Waste Disposal Sites	1/3 mile	1/10 mile
State and Tribal Leaking Storage Tank Sites	1/3 mile	1/10 mile
State and Tribal Registered Storage Tank Sites	Subject Property Only	Subject Property Only
State and Tribal Engineering & Institutional Control Sites	Subject Property Only	Subject Property Only
State and Tribal Voluntary Cleanup Sites	1/3 mile	1/10 mile
State and Tribal Brownfield Sites	1/3 mile	1/10 mile

COC: Chemicals of Concern
PHCOC: Petroleum Hydrocarbon Chemicals of Concern

If there are known or suspect sources of contamination identified within the AOC, the data contained in the standard environmental record sources is further reviewed in order to evaluate the likelihood that a VEC exists at the Subject Property.

Critical Distance Determination

If information related to the boundaries of a contaminant plume from a known contaminated property is available, a Critical Distance test may be conducted. The Critical Distance is defined as the lineal distance between the nearest edge of the contaminant plume and the nearest Subject Property boundary. The Critical Distance is equal to 100 feet for COC or 30 feet for dissolved PHCOC. The Critical Distance for PHCOC as light non-aqueous phase liquid (LNAPL), such as gasoline product, is 100 feet.

If groundwater flow direction can be estimated, the AOC in the downgradient direction may be reduced to the area within the Critical Distance during the Tier 1 screening. Additionally, the crossgradient direction may be reduced 365 feet. It is not necessary to obtain information regarding the contaminant plume dimensions for downgradient and cross-gradient contaminated properties, as the Critical Distance is measured from the nearest Subject Property boundary directly to the source on the off-site downgradient property that is the origin of the contamination (with the contamination migrating away from the Subject Property).

For a contaminated property located upgradient of the Subject Property, the Critical Distance determination requires knowledge of the length and depth of the groundwater contaminant plume. Such information is required to determine the lineal distance from the groundwater contaminant plume edge to the nearest existing or planned structure on the Subject Property, or the nearest Subject Property boundary if there are no existing or planned structures on the Subject Property. Data related to contaminant plume characteristics and dimensions associated with off-site contaminated properties is not typically available during the Tier 1 screening process and is typically obtained during the Tier 2 screening process. If it is not possible to conservatively estimate contaminant plume dimensions, then the AOC cannot be reduced in upgradient directions during the Tier 1 screening process.

Data regarding site-specific soil characteristics may also be used to adjust the AOC. Low permeability in soil, such as soil high in clay and/or silt content, generally tends to restrict soil gas movement, as may soil with high moisture content. Conversely, high porosity in soil tends to enhance soil gas movement. If known, this data may be used as a basis to either expand or reduce the AOC.

Possible Conclusions of Tier 1 VES

DRAFT

The four possible conclusions of the Tier 1 screening are as follows: (1) a VEC exists; (2) a VEC likely exists; (3) a VEC cannot be ruled out; or (4) a VEC can be ruled out because a VEC does not or is not likely to exist. If a VEC does not exist or is unlikely to exist, then the VES process is considered complete in accordance with ASTM Standard E 2600-10 Guide. Vapor encroachment would unlikely be an issue of concern in connection with the subsurface of the Subject Property, vapor intrusion would unlikely be an issue of concern in connection with existing or planned structures on the Subject Property, and no further action or investigation would be recommended. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the Subject Property (a VEC exists, likely exists, or cannot be ruled out), then further action or investigation may be recommended, including a Tier 2 Screening and/or mitigation. Note that both Tier 2 Screening and mitigation are beyond the scope of the Tier 1 Screening process.

Tier 2 Vapor Encroachment Screening

If a VEC cannot be ruled out during the Tier 1 screening process, then a more refined Tier 2 VES may be completed in order to further evaluate the VEC. Tier 2 focuses on characteristics of the contaminant plume resulting from contaminated properties and the proximity of the contaminant plume to the Subject Property. This data is not typically available during the Tier 1 screening process and is typically obtained from state regulatory files and may also be obtained from other available documents and/or may be collected via sampling. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. A Tier 2 VES has two data collection components: one non-invasive and one invasive.

Non-Invasive Data Collection: If data regarding the source of contamination and its migration in the subsurface is available and accessible in regulatory files and/or from other available documents, then the Tier 2 investigation can be non-invasive. The non-invasive investigation includes review at the appropriate regulatory agency of available subsurface investigation reports and/or other available documents regarding known or suspect contaminated properties within the AOC. The objective of the non-invasive component of the Tier 2 screening process is to identify from existing subsurface investigation reports and/or other available information in regulatory agency files the extent of the contaminated plume and its behavior, the specific COC and their respective concentrations, and the status of remediation. Using this information, a Critical Distance Determination may be performed.

Invasive Data Collection: If data regarding the source of contamination and its migration in the subsurface is not available or accessible or if there are preferential pathways, then the Tier 2 screening process can be invasive. An invasive investigation may include sampling of soil, soil gas, and/or groundwater on the Subject Property, at the Subject Property boundary, or off-site.

Mitigation

If the vapor encroachment and/or vapor intrusion pathway is determined to be complete at the Subject Property, there are a variety of mitigation alternatives, including intrinsically safe building design, engineering controls (e.g., a vapor mitigation system such as a chemical vapor barrier, a sub-slab depressurization system, a methane control system, or a radon control system), institutional controls, and/or removal or remediation of the contaminated media causing the VEC. Selection, design, and implementation of appropriate mitigation alternatives is beyond the scope of this assessment.

DRAFT

7.7.2 Government Records Review

A Vapor Encroachment Screen Worksheet was completed through Environmental Data Resources, Inc. (EDR) of Milford, Connecticut. Standard environmental record sources were reviewed in order to identify whether there are known or suspected sources of contamination located within the AOC. The Approximate Minimum Search Distance is based upon the type of COC known or suspected to exist in any release from a property and the location of the known or suspect source of contamination with respect to the Subject Property.

The Subject Property was not identified as a listed site in the standard environmental record sources. However, the findings of the Vapor Encroachment Screen Worksheet identified one off-site property in the standard environmental record sources that cannot be ruled out as a VEC in connection with the Subject Property. H&S Food & Gas at 2000 West 3rd Street is adjacent to the south of the Subject Property across 3rd Street. This former facility is approximately 75 feet south and slightly down-gradient from the Subject Property. According to the database a release of gasoline occurred that impacted groundwater. The case was closed on October 14, 2015. No additional information was provided in the regulatory database report regarding the extent of the groundwater contaminant plume. This site is located within the AOC for PHCOC (1/10 mile / 520 feet). As such, without data related to contaminant plume characteristics and dimensions, this site cannot be ruled out as a VEC in connection with the Subject Property. However, EBI was able to review a 2015 closure report (obtained from the Geotracker) for the H & S facility. According to the report the groundwater flow direction is to the southwest and away from the Subject Property. There are no monitoring wells installed along 3rd Street, south of the Subject Property. Based on the current regulatory status and actual groundwater flow direction, the H & S facility does not appear to be a VEC to the Subject Property.

The remaining off-site properties listed in the standard environmental record sources were determined to not likely represent a VEC to the Subject Property based on one or more of the following factors: COC are not likely to be present at the site; the site is located outside of the AOC and/or Critical Distance; hydrologic characteristics and/or soil characteristics suggests that contaminant vapors would not migrate from the site to the Subject Property; and/or reported sampling data indicates that the site does not represent a VEC. A copy of the Vapor Encroachment Screen Worksheet is presented in Appendix F.

7.7.3 Current and Historical Use of the Subject Property and Adjoining Properties

EBI did not identify current or historical conditions on the Subject Property or adjoining properties that may be considered likely to represent a VEC to the Subject Property. Refer to Sections 2.0, 4.3, and 5.0 for information regarding current and historical use of the Subject Property and adjoining properties.

7.7.4 Tier I Vapor Encroachment Screening Conclusions

The findings of the Vapor Encroachment Screen Worksheet did not identify VECs in connection with the Subject Property. EBI did not identify current or historical conditions on the Subject Property or adjoining properties that may be considered likely to represent a VEC to the Subject Property. Based upon the findings of this Tier I Vapor Encroachment Screen, the VES process is considered complete in accordance with ASTM Standard E 2600-10 Guide, vapor intrusion is unlikely to be an issue of concern in connection with existing or planned structures on the Subject Property, and no further action or investigation is recommended.

DRAFT

It should be noted that this Tier 1 Vapor Encroachment Screen is not a formal assessment of indoor air quality and did not include review of regulatory agency files, calculations, testing or sampling, or evaluation of mitigation alternatives.

DRAFT

8.0 FINDINGS AND OPINIONS

EBI has performed this Phase I Environmental Site Assessment of the Subject Property in conformance with the scope and limitations of ASTM E 1527-13. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. This assessment has identified no evidence of *recognized environmental conditions (RECs)* in connection with the Subject Property. However, the following *de minimis condition and conditions outside the scope of ASTM E 1527-13* were identified:

- EBI identified surficial oil staining on the concrete floor beneath emergency generator. No cracks, penetrations, or other potential pathways to the subsurface were observed in proximity to the identified staining. This condition is not generally subject to enforcement action if known by a governing agency and is considered a *de minimis condition*.

- Based upon the date of construction and in accordance with the scope of work for this assessment, EBI did not conduct a survey for the presence of ACM. Pressumed asbestos-containing vinyl floor tiles, acoustical ceiling material, and thermal system insulation were included in the existing Asbestos Operations and Maintenance (O & M) program at the Subject Property. Asbestos is a condition outside the scope of ASTM E 1527-13 and is not considered a recognized environmental condition (REC).

- EBI conducted a limited short-term radon screening of the Subject Property testing 19 residential units and 2 non-residential areas. Laboratory analysis indicated that none of the test locations exhibited radon concentrations equal to or greater than the EPA recommended Action Level of 4.0 pCi/L. The overall quality assurance plan for the project was determined to be within normal tolerances. No further action is recommended at this time regarding this Radon assessment. Radon is a condition outside the scope of ASTM Practice E 1527-05 and is not considered a recognized environmental condition (REC).

DRAFT

9.0 RECOMMENDATIONS

Based upon the findings of this investigation, EBI offers the following recommendations:

- EBI recommends the continued implementation of the existing Asbestos Operations and Maintenance (O&M) Plan for the Subject Property. This O&M Plan provides the procedures and guidelines that, when used during facility cleaning, maintenance, and general operations, will minimize human exposure to lead and minimize release of lead to the environment. This O&M Plan is a long term management approach.

CHAIN OF TITLE

Commonwealth Land Title Insurance Company

GUARANTEE NO.: CA-SFXFC-IMP-81G17-1-18-09172282

CLTA GUARANTEE FACE PAGE

SUBJECT TO THE EXCLUSIONS FROM COVERAGE, AND THE GUARANTEE CONDITIONS ATTACHED HERETO AND MADE A PART OF THIS GUARANTEE,

COMMONWEALTH LAND TITLE INSURANCE COMPANY

a corporation, herein called the Company

GUARANTEES

the Assured named in Schedule A of this Guarantee

against loss or damage not exceeding the Amount of Liability stated in Schedule A sustained by the Assured by reason of any incorrectness in the Assurances set forth in Schedule A.

Commonwealth Land Title Insurance Company

Countersigned:

By: Natalie Bombardieri
Authorized Officer or Agent

GUARANTEE EXCLUSIONS AND CONDITIONS (06-05-14)

EXCLUSIONS FROM COVERAGE

Except as expressly provided by the assurances in Schedule A, the Company assumes no liability for loss or damage by reason of the following:

(a) Defects, liens, encumbrances, adverse claims or other matters affecting the title to any property beyond the lines of the Land.

(b) Defects, liens, encumbrances, adverse claims or other matters, whether or not shown by the Public Records (1) that are created, suffered, assumed or agreed to by one or more of the Assureds; or (2) that result in no loss to the Assured.

(c) Defects, liens, encumbrances, adverse claims or other matters not shown by the Public Records.

(d) The identity of any party shown or referred to in any of the schedules of this Guarantee.

(e) The validity, legal effect or priority of any matter shown or referred to in any of the schedules of this Guarantee.

(f) (1) Taxes or assessments of any taxing authority that levies taxes or assessments on real property; or, (2) proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not the matters excluded under (1) or (2) are shown by the records of the taxing authority or by the Public Records.

(g) (1) Unpatented mining claims; (2) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (3) water rights, claims or title to water, whether or not the matters excluded under (1), (2) or (3) are shown by the Public Records.

GUARANTEE CONDITIONS

1. Definition of Terms.

The following terms when used in the Guarantee mean:

(a) the "Assured": the party or parties named as the Assured in Schedule A, or on a supplemental writing executed by the Company.

(b) "Land": the Land described or referred to in Schedule A, and improvements affixed thereto which by law constitute real property. The term "Land" does not include any property beyond the lines of the area described or referred to in Schedule A, nor any right, title, interest, estate or easement in abutting streets, roads, avenues, alleys, lanes, ways or waterways.

(c) "Mortgage": mortgage, deed of trust, trust deed, or other security instrument.

(d) "Public Records": those records established under California statutes at Date of Guarantee for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without knowledge.

(e) "Date of Guarantee": the Date of Guarantee set forth in Schedule A.

(f) “Amount of Liability”: the Amount of Liability as stated in Schedule A.

2. Notice of Claim to be Given by Assured.

The Assured shall notify the Company promptly in writing in case knowledge shall come to the Assured of any assertion of facts, or claim of title or interest that is contrary to the assurances set forth in Schedule A and that might cause loss or damage for which the Company may be liable under this Guarantee. If prompt notice shall not be given to the Company, then all liability of the Company shall terminate with regard to the matter or matters for which prompt notice is required; provided, however, that failure to notify the Company shall in no case prejudice the rights of the Assured under this Guarantee unless the Company shall be prejudiced by the failure and then only to the extent of the prejudice.

3. No Duty to Defend or Prosecute.

The Company shall have no duty to defend or prosecute any action or proceeding to which the Assured is a party, notwithstanding the nature of any allegation in such action or proceeding.

4. Company's Option to Defend or Prosecute Actions; Duty of Assured to Cooperate.

Even though the Company has no duty to defend or prosecute as set forth in Paragraph 3 above:

(a) The Company shall have the right, at its sole option and cost, to institute and prosecute any action or proceeding, interpose a defense, as limited in Paragraph 4 (b), or to do any other act which in its opinion may be necessary or desirable to establish the correctness of the assurances set forth in Schedule A or to prevent or reduce loss or damage to the Assured. The Company may take any appropriate action under the terms of this Guarantee, whether or not it shall be liable hereunder, and shall not thereby concede liability or waive any provision of this Guarantee. If the Company shall exercise its rights under this paragraph, it shall do so diligently.

(b) If the Company elects to exercise its options as stated in Paragraph 4(a) the Company shall have the right to select counsel of its choice (subject to the right of the Assured to object for reasonable cause) to represent the Assured and shall not be liable for and will not pay the fees of any other counsel, nor will the Company pay any fees, costs or expenses incurred by an Assured in the defense of those causes of action which allege matters not covered by this Guarantee.

(c) Whenever the Company shall have brought an action or interposed a defense as permitted by the provisions of this Guarantee, the Company may pursue any litigation to final determination by a court of competent jurisdiction and expressly reserves the right, in its sole discretion, to appeal from an adverse judgment or order.

(d) In all cases where this Guarantee permits the Company to prosecute or provide for the defense of any action or proceeding, the Assured shall secure to the Company the right to so prosecute or provide for the defense of any action or proceeding, and all appeals therein, and permit the Company to use, at its option, the name of the Assured for this purpose. Whenever requested by the Company, the Assured, at the Company's expense, shall give the Company all reasonable aid in any action or proceeding, securing evidence, obtaining witnesses, prosecuting or defending the action or lawful act which in the opinion of the Company may be necessary or desirable to establish the correctness of the assurances set forth in Schedule A or to prevent or reduce loss or damage to the Assured. If the Company is prejudiced by the failure of the Assured to furnish the required cooperation, the Company's obligations to the Assured under the Guarantee shall terminate.

5. Proof of Loss or Damage.

(a) In the event the Company is unable to determine the amount of loss or damage, the Company may, at its option, require as a condition of payment that the Assured furnish a signed proof of loss. The proof of loss must describe the defect, lien, encumbrance, or other matter that constitutes the basis of loss or damage and shall state, to the extent possible, the basis of calculating the amount of the loss or damage.

(b) In addition, the Assured may reasonably be required to submit to examination under oath by any authorized representative of the Company and shall produce for examination, inspection and copying, at such reasonable times and places as may be designated by any authorized representative of the Company, all records, books, ledgers, checks, correspondence and memoranda, whether bearing a date before or after Date of Guarantee, which reasonably pertain to the loss or damage. Further, if requested by any authorized representative of the Company, the Assured shall grant its permission, in writing, for any authorized representative of the Company to examine, inspect and copy all records, books, ledgers, checks, correspondence and memoranda in the custody or control of a third party, which reasonably pertain to the loss or damage. All information designated as confidential by the Assured provided to the Company pursuant to this paragraph shall not be disclosed to others unless, in the reasonable judgment of the Company, it is necessary in the administration of the claim. Failure of the Assured to submit for examination under oath, produce other reasonably requested information or grant permission to secure reasonably necessary information from third parties as required in the above paragraph, unless prohibited by law or governmental regulation, shall terminate any liability of the Company under this Guarantee to the Assured for that claim.

6. Options to Pay or Otherwise Settle Claims: Termination of Liability.

In case of a claim under this Guarantee, the Company shall have the following additional options:

© California Land Title Association. All rights reserved.
The use of this Form is restricted to CLTA subscribers in good standing as of the date of use. All other uses are prohibited. Reprinted under license or express permission from the California Land Title Association.

(a) To pay or tender payment of the Amount of Liability together with any costs, attorneys' fees, and expenses incurred by the Assured that were authorized by the Company up to the time of payment or tender of payment and that the Company is obligated to pay.

(b) To pay or otherwise settle with the Assured any claim assured against under this Guarantee. In addition, the Company will pay any costs, attorneys' fees, and expenses incurred by the Assured that were authorized by the Company up to the time of payment or tender of payment and that that the Company is obligated to pay; or

(c) To pay or otherwise settle with other parties for the loss or damage provided for under this Guarantee, together with any costs, attorneys' fees, and expenses incurred by the Assured that were authorized by the Company up to the time of payment and that the Company is obligated to pay.

Upon the exercise by the Company of either of the options provided for in 6 (a), (b) or (c) of this paragraph the Company's obligations to the Assured under this Guarantee for the claimed loss or damage, other than the payments required to be made, shall terminate, including any duty to continue any and all litigation initiated by the Company pursuant to Paragraph 4.

7. Limitation of Liability.

(a) This Guarantee is a contract of Indemnity against actual monetary loss or damage sustained or incurred by the Assured claimant who has suffered loss or damage by reason of reliance upon the assurances set forth in Schedule A and only to the extent herein described, and subject to the Exclusions From Coverage of this Guarantee.

(b) If the Company, or the Assured under the direction of the Company at the Company's expense, removes the alleged defect, lien or, encumbrance or cures any other matter assured against by this Guarantee in a reasonably diligent manner by any method, including litigation and the completion of any appeals therefrom, it shall have fully performed its obligations with respect to that matter and shall not be liable for any loss or damage caused thereby.

(c) In the event of any litigation by the Company or with the Company's consent, the Company shall have no liability for loss or damage until there has been a final determination by a court of competent jurisdiction, and disposition of all appeals therefrom.

(d) The Company shall not be liable for loss or damage to the Assured for liability voluntarily assumed by the Assured in settling any claim or suit without the prior written consent of the Company.

8. Reduction of Liability or Termination of Liability.

All payments under this Guarantee, except payments made for costs, attorneys' fees and expenses pursuant to Paragraph 4 shall reduce the Amount of Liability under this Guarantee pro tanto.

9. Payment of Loss.

(a) No payment shall be made without producing this Guarantee for endorsement of the payment unless the Guarantee has been lost or destroyed, in which case proof of loss or destruction shall be furnished to the satisfaction of the Company.

(b) When liability and the extent of loss or damage has been definitely fixed in accordance with these Conditions, the loss or damage shall be payable within thirty (30) days thereafter.

10. Subrogation Upon Payment or Settlement.

Whenever the Company shall have settled and paid a claim under this Guarantee, all right of subrogation shall vest in the Company unaffected by any act of the Assured.

The Company shall be subrogated to and be entitled to all rights and remedies which the Assured would have had against any person or property in respect to the claim had this Guarantee not been issued. If requested by the Company, the Assured shall transfer to the Company all rights and remedies against any person or property necessary in order to perfect this right of subrogation. The Assured shall permit the Company to sue, compromise or settle in the name of the Assured and to use the name of the Assured in any transaction or litigation involving these rights or remedies.

If a payment on account of a claim does not fully cover the loss of the Assured the Company shall be subrogated to all rights and remedies of the Assured after the Assured shall have recovered its principal, interest, and costs of collection.

11. Arbitration.

Either the Company or the Assured may demand that the claim or controversy shall be submitted to arbitration pursuant to the Title Insurance Arbitration Rules of the American Land Title Association ("Rules"). Except as provided in the Rules, there shall be no joinder or consolidation with claims or controversies of other persons. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the Assured arising out of or relating to this Guarantee, any service of the Company in connection with its issuance or the breach of a Guarantee provision, or to any other controversy or claim arising out of the transaction giving rise to this Guarantee. All arbitrable matters when the amount of liability is $2,000,000 or less shall be arbitrated at the option of either the Company or the Assured. All arbitrable matters when the amount of liability is in excess of $2,000,000 shall be arbitrated only when agreed to by both the Company and the Assured. Arbitration pursuant to this Guarantee and under the Rules shall be binding upon the parties. Judgment upon the award rendered by the Arbitrator(s) may be entered in any court of competent jurisdiction.

12. Liability Limited to This Guarantee; Guarantee Entire Contract.

(a) This Guarantee together with all endorsements, if any, attached hereto by the Company is the entire Guarantee and contract between the Assured and the Company. In interpreting any provision of this Guarantee, this Guarantee shall be construed as a whole.

(b) Any claim of loss or damage, whether or not based on negligence, or any action asserting such claim, shall be restricted to this Guarantee.

(c) No amendment of or endorsement to this Guarantee can be made except by a writing endorsed hereon or attached hereto signed by either the President, a Vice President, the Secretary, an Assistant Secretary, or validating officer or authorized signatory of the Company.

13. Severability

In the event any provision of this Guarantee, in whole or in part, is held invalid or unenforceable under applicable law, the Guarantee shall be deemed not to include that provision or such part held to be invalid, but all other provisions shall remain in full force and effect.

14. Choice of Law; Forum

(a) Choice of Law: The Assured acknowledges the Company has underwritten the risks covered by this Guarantee and determined the premium charged therefor in reliance upon the law affecting interests in real property and applicable to the interpretation, rights, remedies, or enforcement of Guaranties of the jurisdiction where the Land is located.

Therefore, the court or an arbitrator shall apply the law of the jurisdiction where the Land is located to determine the validity of claims that are adverse to the Assured and to interpret and enforce the terms of this Guarantee. In neither case shall the court or arbitrator apply its conflicts of law principles to determine the applicable law.

(b) Choice of Forum: Any litigation or other proceeding brought by the Assured against the Company must be filed only in a state or federal court within the United States of America or its territories having appropriate jurisdiction.

15. Notices, Where Sent.

All notices required to be given the Company and any statement in writing required to be furnished the Company shall include the number of this Guarantee and shall be addressed to the Company at Commonwealth Land Title Insurance Company, Attn: Claims Department, P.O. Box 45023, Jacksonville, FL 32232-5023.

EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). SURVEYS INC. used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by SURVEYS INC.. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

An online review and analysis by SURVEYS INC. of the RCRA-LQG list, as provided by EDR, has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
UNION AVENUE ELEMENT EPA ID:: CAR000197939:	***150 S BURLINGTON AVE***	***E 1/8 - 1/4 (0.181 mi.)***	***K72***	***159***

BONNIE BRAE VILLAGE EPA ID:: CAR000197236:	208 S BONNIE BRAE ST	ENE 0 - 1/8 (0.107 mi.)	49	83

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

An online review and analysis by SURVEYS INC. of the RCRA-SQG list, as provided by EDR, has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

An online review and analysis by SURVEYS INC. of the ENVIROSTOR list, as provided by EDR, has revealed that there are 27 ENVIROSTOR sites within approximately 1 mile of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

An online review and analysis by SURVEYS INC. of the RCRA NonGen / NLR list, as provided by EDR, has revealed that there are 17 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

City,State,Zip: LOS ANGELES, CA 90057
Site ID: 427453
CERS ID: 10262425
CERS Description: Chemical Storage Facilities

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-13-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by (SPRINT CELL SITE). Observed the facility and inspected hazardous materials storage. Annual employee safety training records were maintained. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change

inspection. Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically)within 30 days of the change.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-12-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by TODD BURNETT - CHIEF TECHNICIAN. CONTACT INFORMATION: TODDBURNETT@JERITY.ORG Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically)within 30 days of the change.

Registry ID: 110002713975

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-12-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by SANTOS MENDOZA - MAINTENANCE SUPERVISOR. CONTACT INFORMATION: BARRY.GANS@LOSANGELESREHABWC.COM Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically)within 30 days of the change.

Site Name: ST VINCENT MEDICAL CENTER
Violation Date: 10-17-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 11/14/2018. OBSERVATION: Three 1 gallon containers of Formulin waste located in the Formaldehyde Storage Room for specimens were observed without a hazardous waste label. One 20 gallon container of diesel waste was observed in the 90 day hazardous waste storage area without a hazardous waste label. Five 5 gallon containers of used oil located in the 90 day hazardous waste storage area were observed without a hazardous waste storage label. CORRECTIVE ACTION: Submit a photo to the CUPA demonstrating that the container listed above has been properly labeled.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by (ALEXANDER - ASST MGR). EMAIL: AGERONIMO90@LIVE.COM Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-20-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by (ARACELI ENCISO - ASST ADMIN). EMAIL: ARACELI@CARALANOPERATIONS.COM Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change.

not properly program/operate leak detection equipment. No alarm history found on VR printout provided by MC tester Ricardo Martinez of Del Real Testing. Veeder Root system deleted alarm history for 07/16/15 monitor certification testing during "fail safe" test of system. MC tester Ricardo Martinez unable to identify source of Veeder Root issues. Upon investigation of repair records, Inspector Morel found 07/05/15 invoice from Joe Rhodes maintanence which stated "Came out found Veeder Root frozen. Coldstart Veeder Root. Veeder Root came back still Veeder Root showing L-6 liquid alarm on 87 fill grade. Open up lid clean all liquid alarm clear. All normal." CORRECTIVE ACTION: Properly program/operate leak detection equipment. Identify source of VR issues, obtain permit for any repairs and conduct follow-up monitoring system certification.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-21-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspector Kurt Corral LAFD, onsite this date to conduct routine inspection of underground storage tank. Consent to enter, inspect and take photographs was given on this date by Yanet Lopez, Manager . Monitoring system certification was conducted at this time. Monitoring certification was performed by Ricardo Martinez, Del Real Testing. Tester provided the following certifications: ICC Tech #00020736 EXP: 10/8/2017 VR: A27343 EXP: 1/1/2018 VMI: 1593 EXP: 11/13/2016 The UST monitoring panel showed all functions normal. The monitoring set up and alarm history were provided for review. The sumps and UDCs were opened for inspection and the sensors were observed positioned to detect a leak at the earliest opportunity. The spill buckets were also visually inspected. The Monitoring Plan was compared to the equipment onsite. The operation of the UST system was compared to the conditions of the operating permit. **********VIOLATIONS NOTED, UNABLE TO ADD TO [Truncated]

Property Description: During the early 20th century this half-acre site was part of a large oil field. Redevelopment of the site was complicated because of the need to negotiate purchase prices with three separate owners. They City must pay fair market value, so this process was lengthy. Also, challenge was the steeo topography and odd shape making excavations and grading a bit of a challenge.

Property Description: During the early 20th century this half-acre site was part of a large oil field. Redevelopment of the site was complicated because of the need to negotiate purchase prices with three separate owners. They City must pay fair market value, so this process was lengthy. Also, challenge was the steeo topography and odd shape making excavations and grading a bit of a challenge.

Potential Contaminants of Concern: Diesel
Site History: There is a State Water Board closure Order for this case issued 1/28/2015. The State Water Board needs confirmation that the corrective action wells and wastes have been removed from the site in order to close the case. Once confirmation has been received State Water Board can issue a Uniform Closure Letter and close the case. Attempts to reach the RP have failed. gwl 4/14/2016.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/11/2019
Date Data Arrived at EDR: 04/18/2019
Date Made Active in Reports: 05/14/2019
Number of Days to Update: 26

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/11/2019
Date Data Arrived at EDR: 04/18/2019
Date Made Active in Reports: 05/14/2019

Next Scheduled EDR Contact: 10/14/2019
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/11/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

PHASE I ENVIRONMENTAL SITE ASSESSMENT
MIRAMAR TOWERS SOUTH LOT

EXECUTIVE SUMMARY

Surveys Inc. performed a Phase I Environmental Site Assessment of the Miramar Towers South Lot project located at 2005 W 3rd Street, Los Angeles, Los Angeles County, California. The subject project consists of an existing improved parcel that is developed with irrigated landscaping, a concrete paved drive aisle and parking lot, concrete curbing, concrete sidewalks, concrete stairs, concrete storm drainage channels, a CMU enclosure for electrical transformer and electrical vault and related site improvements. The subject project currently comprises the southern portion of a largely 2.737 acre parcel that is improved with the Miramar Towers Apartments. Current improvements on the subject property are associated with the Miramar Towers Apartments, however, no buildings are currently located onsite. The subject property consists of a 0.699 acre parcel within long dimensions extending east to west. The site is 1.5 miles northwest of the downtown Los Angeles, CBD.

The site inspection was conducted on May 20, 2020. The site inspection consisted of a visual evaluation of the project site and adjacent properties. No buildings were present onsite at the time of the inspection. A review of the pertinent readily available records of local, state and federal agencies, historical information, interviews with people knowledgeable and prior environmental reports was conducted.

Based upon the absence of buildings on the project site, there is a low potential for asbestos containing materials or lead-based paints at this project. The project is located in EPA Radon Zone 2, a moderate risk radon region. No potential vapor encroachment conditions were identified in connection with the subject property.

Interviews with people knowledgeable, aerial photograph studies, historical map reviews, prior environmental reports and regulatory database reviews did not indicate any evidence of hazardous materials being improperly used or disposed of at the site. There was no evidence of any chemical misuse, unlawful dumping or other sources of contamination to the site. There are no underground storage tanks at this site registered with the California Regional Water Quality Control Board. No underground storage tanks were observed during the site reconnaissance.

The site inspection indicated there was no evidence of any soil staining or distressed vegetation. No unusual odors, pools of liquids, drums, leaking containers, leaking equipment, unidentified hazardous materials or other unidentified substances were observed during the site reconnaissance. The stormwater catch basins appeared to be free of contaminants.

ENVIRONMENTAL SUMMARY CONTINUED:

The historical review indicated that the site was originally vacant undeveloped land dating back to the late 1800s prior to being developed with approximately 5 residential dwellings by the early 1900s. The project appears to have then been associated with the Barker Motel by the 1920s, which included the adjacent site to the north, however, the site still appeared to be occupied by 5 residential dwellings. All of the residential dwellings appear to have been removed from the site starting in the late 1950s through the early 1970s. From the mid to late 1970s, the project appears to have been vacant. The site was then developed with the existing improvements in 1979-1980 when the adjacent Miramar Towers apartments were developed. Site usage has remained little changed since that time. Based upon our investigation, we do not see a potential human health risk resulting from past uses.

The subject property was not listed in any of the Regulatory Databases reviewed. Based upon our review of all pertinent Regulatory Databases, it is our opinion there is only a low potential for any toxic or hazardous contamination to the property from any off-site "listed" sources.

Based on our review of the development and site use history, along with an examination of existing conditions at the site, we found no hazardous or toxic substances were identified as being improperly generated, used, stored or disposed of on the property. This includes materials defined under the Resource Conservation and Recovery Act (RCRA), and the information and data we have reviewed and documented in this report. No recognized environmental conditions were identified in connection with the property.

It is our opinion the potential for significant hazardous contamination at the site is low. No additional investigation appears to be warranted at this time.

ENVIRONMENTAL SUMMARY GRID

ENVIRONMENTAL STATUS	RESEARCH RESULTS	RECOMMENDS	ESTIMATES
Onsite Underground Storage Tanks	None Detected	None	$0.00
Stained or Discolored Surfaces	None Detected	None	$0.00
Stressed Vegetation	None Detected	None	$0.00
Leaking Transformers - PCBs	None Detected	None	$0.00
Asbestos - ACM	Low Potential	None	$0.00
Lead-Based Paints	Low Potential	None	$0.00
Radon Gas	Moderate Risk Region	None	$0.00
Onsite Hazardous Materials	Low Potential for Impact	None	$0.00
Improper Waste Disposal	None Detected	None	$0.00
EPA - Federal Sites List	Low Potential for Impact	None	$0.00
STATE - Sites List	Low Potential for Impact	None	$0.00
Underground Storage Tank (USTs)	Low Potential for Impact	None	$0.00
Leaking Tanks (LUSTs)	Low Potential for Impact	None	$0.00
Adjacent Properties	Low Potential for Impact	None	$0.00
Drinking Water Standards	Meet EPA Standards	None	$0.00
Fire Department Concerns	None	None	$0.00
Historical Review Concerns	None	None	$0.00
		TOTAL COSTS	**$0.00**
PHASE II REQUIREMENTS	**NONE**	**NONE**	**$0.00**

Based upon the absence of buildings on the project site, there is a low potential for asbestos containing materials or lead-based paints at this project. The project is located in EPA Radon Zone 2, a moderate risk radon region. No potential vapor encroachment conditions were identified in connection with the subject property.

1.0 INTRODUCTION

PURPOSE

This Phase I Environmental Site Assessment of the Miramar Towers South Lot project is intended to determine whether there is a potential for significant environmental contamination based on readily available information about the site and a walk-through inspection. If this potential does exist, the Phase I Environmental Site Assessment indicates additional activity necessary to confirm evidence of significant environmental contamination.

This report presents the results of a Phase I Environmental Site Assessment of the Miramar Towers South Lot project at 2005 W 3rd Street, Los Angeles, Los Angeles County, California. Miramar Towers Preservation, LP., retained Surveys Inc. to perform the Phase I Environmental Site Assessment in order to determine if a potential for significant contamination exists at the subject property.

The assessment consisted of a visual and olfactory inspection of the site, interviews with people knowledgeable about the site, an historical review and a review of all pertinent records from local, state and federal agencies. The results of our Phase I Investigation are described in the following sections of this report.

LIMITATIONS, EXCEPTIONS, AND SIGNIFICANT ASSUMPTIONS

It should be noted when an assessment is completed without subsurface exploration or chemical screening of soils and groundwater beneath the site, as in this study, no statement of scientific certainty can be made regarding the latent subsurface conditions which may be the result of onsite or off-site sources. Thus, this report is not a definitive study of contamination at the site. An evaluation of the subsurface soils and groundwater was not included in this report.

The scope of the onsite assessment consisted of a visual evaluation of the project site and adjacent properties. No buildings were present onsite at the time of the inspection.

This report has been prepared following the requirements outlined in ASTM E-1527-13 Standard Practice for Environmental Site Assessments. This report does not offer to be a legal opinion, representation, or interpretation of environmental laws, regulations or policies of the state, federal or local governmental agencies.

The environmental study conclusions, contained in this report, are professional opinions largely based upon third party data received and reviewed. While efforts have been made to substantiate the third party data, Surveys Inc. cannot guarantee its completeness or accuracy.

USER RELIANCE

This report has been prepared for, and can be relied upon by the Client, Miramar Towers Preservation, LP.

2.0 SITE DESCRIPTION

LOCATION AND DESCRIPTION OF STRUCTURE AND IMPROVEMENTS

The Miramar Towers South Lot project is located at 2005 W 3rd Street, Los Angeles, Los Angeles County, California. The subject project consists of an existing improved parcel that is developed with irrigated landscaping, a concrete paved drive aisle and parking lot, concrete curbing, concrete sidewalks, concrete stairs, concrete storm drainage channels, a CMU enclosure for electrical transformer and electrical vault and related site improvements. The subject project currently comprises the southern portion of a largely 2.737 acre parcel that is improved with the Miramar Towers Apartments. Current improvements on the subject property are associated with the Miramar Towers Apartments, however, no buildings are currently located onsite. The subject property consists of a 0.699 acre parcel within long dimensions extending east to west. The site is 1.5 miles northwest of the downtown Los Angeles, CBD.

The property is located within the general southwest quadrant formed by of the intersection of State Route 101 and Interstate 110 in the central portion of the City of Los Angeles California. The subject site lies at a slight angle to the north south lines of longitude therefore for the purposes of this report we consider W 3rd Street to lie along the south side of the site. The site consists of an irregular rectangular shaped parcel. The site topography generally slopes down toward 3rd Street to the south. The site topography varies from +/- El. 400' in the north-central portions of site down to +/- El. 385' at the south side of the site.

The site is bounded by Miramar Towers Apartments to the north, a single family residence or small apartment building to the east, W 3rd Street to the south and an apartment building to the west. Vehicular and pedestrian access to the site is provided off of W 3rd Street to the south. A concrete driveway enters the site off of W 3rd St at the southeast corner of the site and leads to a small concrete paved parking lot near the north-central portion of the site. A CMU and chain-linked fencing enclosure is located in the southern portion of the parking lot area and encloses a pad-mounted electrical transformer and electrical vault. Concrete sidewalks and concrete stairs are provided along the south and central portions of the site. Irrigated landscaping occupies a majority of the remainder of the site including area of grass lawn, trees, low lying shrubs and flowering plants.

Utilities and services provided to the property include water, sewer, electrical, natural gas trash and telephone. Electrical Power is provided City of Los Angeles Department of Water and Power, natural gas is provided by The Gas Company, Water is supplied by the City of Los Angeles. The City of Los Angeles provides the sanitary sewer services and storm water services. Electrical service is provided underground from a pad-mounted electrical transformer. A storm water drainage system has been provided for the site which includes concrete valley drains within landscaped areas and storm water catch basins located within the parking lot areas. The underground storm water piping and runoff discharge to a City of Los Angeles storm water main off the south side of the site.

2.0 SITE DESCRIPTION

LOCATION AND DESCRIPTION OF STRUCTURE AND IMPROVEMENTS

LEGAL DESCRIPTION:

EXHIBIT "A"

ALL THAT CERTAIN REAL PROPERTY SITUATED IN THE COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, DESCRIBED AS FOLLOWS:

PARCEL A:

PARCEL 2 OF CERTIFICATE OF COMPLIANCE FOR LOT LINE ADJUSTMENT NO. AA-2018-7418-PMEX, RECORDED NOVEMBER 15, 2019 AS INSTRUMENT NO. 20191244207 OF OFFICIAL RECORDS, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

PORTIONS OF LOTS 1, 2, AND 3 OF THE EXTENSION OF THE NOB HILL TRACT, IN THE CITY OF LOS ANGELES, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 42, PAGE 56 OF MISCELLANEOUS RECORDS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY, DESCRIBED AS A WHOLE AS FOLLOWS:

BEGINNING AT A POINT ON THE SOUTHEASTERLY LINE OF SAID LOT 1, DISTANT THEREON NORTH 28°00'04" EAST 94.19 FEET FROM THE SOUTHEASTERLY CORNER OF SAID LOT; THENCE NORTH 61°57'12" WEST, PARALLEL WITH THE SOUTHWESTERLY LINES OF SAID LOTS 1, 2, AND 3, A DISTANCE OF 175.26 FEET TO THE NORTHWESTERLY LINE OF SAID LOT 3; THENCE SOUTH 27°43'11" WEST, ALONG SAID NORTHWESTERLY LINE, 94.19 FEET OT THE SOUTHWESTERLY CORNER OF SAID LOT; THENCE SOUTH 61°57'12" EAST, ALONG THE SOUTHWESTERLY LINES OF SAID LOTS 1, 2, AND 3, A DISTANCE OF 174.80 FEET TO THE SOUTHEASTERLY CORNER OF SAID LOT 1; THENCE NORTH 28°00'04" EAST, ALONG THE SOUTHEASTERLY LINE OF SAID LOT, 94.19 FEET TO THE POINT OF BEGINNING.

PARCEL B:

PARCEL 2 OF CERTIFICATE OF COMPLIANCE FOR LOT LINE ADJUSTMENT NO. AA-2018-7423-PMEX, RECORDED NOVEMBER 15, 2019 AS INSTRUMENT NO. 20191244209 OF OFFICIAL RECORDS, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

PORTIONS OF LOTS 4, 5, AND 6 OF THE EXTENSION OF THE NOB HILL TRACT, IN THE CITY OF LOS ANGELES, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 42, PAGE 56 OF MISCELLANEOUS RECORDS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY, DESCRIBED AS A WHOLE AS FOLLOWS:

COMMENCING AT A POINT ON THE SOUTHEASTERLY LINE OF LOT 1 OF SAID TRACT, DISTANT THEREON NORTH 28°00'04" EAST 94.19 FEET FROM THE SOUTHEASTERLY CORNER OF SAID LOT; THENCE NORTH 61°57'12" WEST, PARALLEL WITH THE SOUTHWESTERLY LINES OF LOTS 1, 2, AND 3 OF SAID TRACT, A DISTANCE OF 175.26 FEET TO THE SOUTHEASTERLY LINE OF SAID LOT 4 AND THE TRUE POINT OF BEGINNING OF THIS DESCRIPTION; THENCE SOUTH 27°43'11" WEST, ALONG SAID SOUTHEASTERLY LINE, 94.19 FEET TO THE SOUTHEASTERLY CORNER OF SAID LOT 4; THENCE NORTH 61°57'12" WEST, ALONG THE SOUTHWESTERLY LINES OF SAID LOTS 4, 5, AND 6, A DISTANCE OF 149.93 FEET TO THE SOUTHWESTERLY CORNER OF SAID LOT 6; THENCE NORTH 27°48'45" EAST 94.19 FEET TO A LINE THAT IS PARALLEL WITH SAID SOUTHWESTERLY LINES; THENCE SOUTH 61°57'12" EAST, ALONG SAID PARALLEL LINE, 76.53 FEET; THENCE SOUTH 28°02'48" WEST 4.71 FEET TO A LINE THAT IS PARALLEL WITH SAID SOUTHWESTERLY LINES; THENCE SOUTH 61°57'12" EAST, ALONG SAID PARALLEL LINE, 35.91 FEET; THENCE NORTH 28°02'48" EAST 4.71 FEET TO A LINE THAT IS PARALLEL WITH SAID SOUTHWESTERLY LINES; THENCE SOUTH 61°57'12" EAST, ALONG SAID PARALLEL LINE, 37.34 FEET TO THE POINT OF BEGINNING.

PARCEL C:

NON-EXCLUSIVE EASEMENTS AS SET FORTH IN THE RECIPROCAL EASEMENT AGREEMENT RECORDED DECEMBER 16, 2019 AS INSTRUMENT NO. 20191402989 OF OFFICIAL RECORDS.

2.0 SITE DESCRIPTION

ADJACENT PROPERTIES

North: Miramar Towers Apartments.

East: Older single family dwelling and apartments.

South: W 3rd Street followed by apartments, Center Lake Hotel and West Lake Plaza retail center.

West: Apartments.

The adjacent properties, as viewed from a distance, showed no visible evidence of environmental contamination.

PHYSICAL SETTING

According to the USGS Topographical Map of the area (Hollywood, CA Quadrangle), the subject site is located at elevations ranging from approximately 385 to 400 feet above sea level. The regional topography is relatively hilly and undulating. The local topography near the site slopes down moderately to the south to southwest. Local surficial and shallow groundwater, if present, would generally be expected to mimic the local topography and flow in a general west to southwesterly direction. Deeper, regional groundwater flow may vary significantly from the local topography. MacArthur Park Lake is located approximately ½ miles to the southwest.

According to the USDA Soil Conservation Service, Web Soil Survey, the dominant soil type in the vicinity of the subject site consists of Urban Land-Dapplegray complex, 5 to 20% slopes. Urban Land consists of areas that have been so greatly modified by urban works and structures that identification of the native soils is impractical. The Dapplegray series consists of very deep, well drained soils that formed in human-transported materials (HTM) on engineered hillslopes terraces in areas weathered from calcareous shale bedrock and other calcareous sedimentary rocks. The mean annual precipitation is about 383 mm and the mean annual temperature is about 17 degrees C.

According to the FEMA Flood Insurance Rate Map, Map #06037C1610F, with an effective date of September 26, 2008, the site is located within flood Zone X, outside the 100 and 500 year flood zone. A review of the National Wetlands Inventory Map did not reveal any designated wetlands on or directly adjacent to the subject property.

3.0 USER PROVIDED INFORMATION

The following section summarizes information provided by the user, Miramar Towers Preservation, LP., with regard to this report.

TITLE RECORDS

We reviewed a Preliminary Title Report for the subject project prepared by Commonwealth Land Title Company dated March 13, 2020. According to the provided title documents, the property owner was identified as Miramar Tower, a California limited Partnership.

ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATION

No information regarding environmental liens or land use limitations was provided. Interviews with the property contacts indicated they were unaware of environmental liens or usage limitations related to environmental issues. A review of the available regulatory databases did not reveal any information related to environmental liens, land use or activity use limitations for the property related to environmental issues.

SPECIALIZED KNOWLEDGE

No specialized knowledge of environmental conditions associated with the property was provided. Interviews with the property contacts indicated they had no specialized knowledge of any existing or past environmental conditions associated with the subject property.

COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

No specialized knowledge of environmental conditions or similar relevant information was provided. Interviews with the property contacts indicated they had no specialized knowledge of any existing environmental conditions associated with the subject property. Interviews with local government officials also did not reveal any relevant information.

OWNER, PROPERTY MANAGER

According to the provided title documents, the property owner was identified as Miramar Tower, a California limited Partnership. Property contacts included Nicole Zaccack with Jonathan Rose Companies, the property ownership representative, and the onsite manager, Pam Roberson.

OTHER USER PROVIDED INFORMATION

A Phase I ESA Draft prepared by EBI Consulting dated March 2016; User Environmental Questionnaire completed by Nicole Zaccack and dated May 21, 2020; a Market Evaluation Report prepare by Novogradac dated May 15, 2020, an ALTA Survey prepared by Surveying & Drafting Services, Inc. dated May 14, 2020 and some of the original construction drawings were provided for review.

4.0 RECORDS REVIEW

STANDARD AND ADDITIONAL ENVIRONMENTAL RECORD SOURCES

As a part of our due-diligence, we retained Environmental Data Resources, Inc. (EDR) to provide a review of all major governmental databases for listings of potentially hazardous sites within the ASTM required search distances from the property. See the attached EDR Radius Map Report.

NPL

The National Priority List (NPL) includes sites reviewed (e.g., under CERCLIS) and considered as potential Superfund sites for the Environmental Protection Agency (EPA). These sites have necessarily failed some aspect of EPA's CERCLA criteria regarding hazardous materials. Only sites with high enough health and environmental risk are proposed as NPL sites. There are **no** listed NPL sites located within a one-mile distance from the subject property.

Based upon the information reviewed, we conclude the potential for significant impact to the site from any NPL site is low.

DELISTED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria the EPA uses to delete sites from the NPL.

There are no Delisted NPL sites within a one-mile radius of the site. Based on the information reviewed, we conclude the potential for significant impact to the site from any Delisted NPL site is low.

CERCLIS

The Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) List is a management database which lists all current and past sites that qualify, or are being considered, for further investigation under the EPA Superfund Assessment Program. According to the EPA, the fact a site is on the CERCLIS list does not necessarily mean it is contaminated and because a site is not on the list does not necessarily mean it is contaminant free. There are **no** listed CERCLIS sites located within a 1/2 miles distance from the subject property.

Based on the information reviewed, we conclude the potential for significant impact to the site from any CERCLIS site is low.

4.0 RECORDS REVIEW

SEMS-ARCHIVE/CERC-NFRAP

The Superfund Enterprise Management System -Archive (SEMS-ARCHIVE) database, formerly known as CERCLIS No Further Remedial Action Planned (CERC-NFRAP) sites database was reviewed. There are **no** listed SEMS-ARCHIVE/CERC-NFRAP sites within a 1/2-mile radius of the site.

Based on the information reviewed, we conclude the potential for significant impact to the site from any listed SEMS-ARCHIVE/CERC-NFRAP site is low.

RCRIS

The EPA Resource Conservation and Recovery Information System (RCRIS) includes all current and past sites storing, transporting, treating, generating or disposing of hazardous materials or waste. This list will include anything from chemical industry to small businesses like dry cleaners and gasoline stations. See EDR Report LQG (Large Quantity Generator), SQG (Small Quantity Generator), TSD (Transport, Storage, Disposal), and CORRACTS (Corrective Action Sites). There are **no** listed RCRIS TSD sites within a 1/2-mile radius of the site. There are **no** listed CORRACTS sites within a one-mile radius of the subject site. There is **one** listed RCRIS LQG site and **seven** SQG sites within a 1/4-mile radius of the subject site. Four of the listed SQG sites are located greater than 1/8 miles distance from the subject property. There are only four listed site located within a 1/8 miles distance from the subject property.

CHLA Center for Personalized Medicine, 2100 W 3rd St, Map ID# G48
Location: 1/8 miles west
Status: Small quantity generator, no listed violations

CT Partners, 329 201 S Alvarado ST, Map ID# F35
Location: 1/8 miles northwest
Status: Small quantity generator, no listed violations

LMS Medical Service, 311 201 S Alvarado, Map ID# F32
Location: 1/8 miles northwest
Status: Small quantity generator, no listed violations

Mid-Wilshire Medical, 201 S Alvarado St, Map ID# F34
Location: 1/8 miles northwest
Status: Small quantity generator, no listed violations

Based upon the information reviewed, and considering the separation distance and intervening construction, we conclude the potential for significant impact to the site from any listed RCRIS site is low.

4.0 RECORDS REVIEW

ERNS

The Emergency Response Notification System (ERNS) records and stores information on reported releases of oil and hazardous substances.

The subject property was not identified as an ERNS site. Based on the information reviewed, we conclude the potential for significant impact to the site from any listed ERNS site is low.

CAL-SITES

The Cal-Sites AWP (Annual Work Plan, State Environmental Protection Agency), known hazardous waste sites, and Cal-Sites ASPIS (Department of Substance Control) Data Bases, contains potential or confirmed hazardous substance release properties. There are **no** listed CAL-SITES within a one-mile radius of the site.

Based on the information reviewed, it is our opinion there is a low potential for significant impact to the site from any listed CAL-SITES.

CHMIRS/CORTESE/NOTIFY 65/TOXIC PITS

The California Hazardous Materials Incident Report System contains information on reported hazardous materials incidents (accidental release or spills). There are **no** listed CHMIRS sites within a 1/8-mile radius of the site.

CORTESE identifies public drinking wells with detectable levels of contamination, hazardous substance sites selected for remedial action, sites with known toxic material identified through the abandoned site assessment program, sites with USTs having a reportable release and all solid waste disposal facilities from which there is known migration. There are **nine** listed CORTESE sites within a 1/2-mile radius of the site. Eight of the listed sites are located greater than 1/8 miles distance from the subject property. There is only one listed site located within a 1/8 miles distance from the subject property.

Shell Station, 230 Alvarado St, Map ID# B10
Location: Less than 1/8 miles west/northwest
Status: LUST site with case closure granted

Proposition 65 (NOTIFY 65) contains facility notifications about any release which could impact drinking water and thereby expose the public to a potential health risk. There are **no** listed NOTIFY 65 sites within a one-mile radius of the site.

TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. There are **no** listed TOXIC PITS sites within a one-mile radius of the site.

Based on the information reviewed, and considering the separation distances, intervening construction, and topographical differences, we conclude the potential for significant impact to the site from any of these listed sites is low.

4.0 RECORDS REVIEW

SWF/LF

The State of California Integrated Waste Management Board's Solid Waste Information System (SWIS) database list. The list indicates there are **no** Landfill/Solid Waste Facility (SWF/LF) sites within a 1/2-mile radius of the site.

Based on the information reviewed, we conclude the potential for significant impact to the site from any listed SWF/LF site to be low.

WMUDS/SWAT

The Waste Management Unit Database System (WMUDS) is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. There are **no** listed WMUDS/SWAT sites within a 1/2-mile radius of the site.

Based on the information reviewed, we conclude the potential for significant impact to the site from any listed WMUDS/SWAT site is low.

LUST

The California Water Quality Control Board, Leaking Underground Storage Tank (LUST) Registration list was reviewed. The list indicates there are **19** LUST sites within a 1/2-mile radius of the site, several of which are duplicate listings. There are only two listed sites located within a 1/8 miles distance from the subject property.

H&S Food & Gas, 2000 W 3rd Street, Map ID# A1
Location: Less than 1/8 miles southwest
Status: Case closure granted

Shell Station, 230 S Alvarado St, Map ID# B11
Location: Less than 1/8 miles west
Status: Case closure granted

Based upon the information reviewed, and considering the separation distances, intervening construction, topographical differences and current status of the nearest listed sites, we conclude the potential for significant impact to the site from any listed LUST site to be low.

4.0 RECORDS REVIEW

UST

The California Water Quality Control Board, Underground Storage Tank (UST) Registration list was reviewed. There are **23** listed UST sites within a 1/4-mile radius of the site. Many of the listings are duplicates for the same site. There are only eight listed sites located within a 1/8 miles distance from the subject property. Four of the listed sites are located greater than 1/8 miles distance from the subject property. There are eight listed sites located within a 1/8 miles distance from the subject property.

2004 W 3rd St, Map ID# A3
Location: Less than 1/8 miles west/southwest
Status: Historical UST site

Shell, 230 S Alvarado St, Map ID# B9
Location: Less than 1/8 miles west/northwest
Status: Inactive site

301 S Alvarado Street, Map ID# B13
Location: Less than 1/8 miles west/northwest
Status: Historical UST site

1841 W 3rd Street, Map ID# D14
Location: Less than 1/8 miles east/southeast
Status: Historical UST site

192 S Alvarado St, Map ID# C20
Location: Less than 1/8 miles north/northwest
Status: Historical UST site

Country Villa Nursing, 340 S Alvarado St, Map ID# E23
Location: Less than 1/8 miles west/southwest
Status: Inactive site

St Vincent Dialysis/Mid-Wilshire Medical/Norman N Nakata etc.), 201 S Alvarado St, Map ID# F24, F28, F30, F31, F40, F41, F42, F43, F44, F45, F46
Location: 1/8 miles northwest
Status: Inactive site

174 S Alvarado St, Map ID# F53
Location: 1/8 miles north
Status: Inactive site

Based upon the information reviewed, and considering the separation distances, intervening construction and topographical differences, it is our opinion the potential for significant impact to the site from any listed UST site to be low.

HISTORICAL UST

The California Water Quality Control Board, Hazardous Substance Storage Container Database is a historical listing of UST sites. There are **five** listed HISTORICAL UST sites within a 1/4-mile radius of the site. Four of the listed sites are located greater than 1/8 miles distance from the subject property. There is only one listed site located within a 1/8 miles distance from the subject property.

Otto CRVanes/Shell Station, 230 S Alvarado St, Map ID# B12
Location: Less than 1/8 miles west
Status: Previously identified as a LUST site with case closure granted

Based on the information reviewed, and considering the separation distances, intervening construction and topographical differences, it is our opinion there is a low potential for significant impact to the site from any listed HISTORICAL UST site.

SWEEPS

The Statewide Environmental Evaluation and Planning System (SWEEPS) listed underground storage tanks and was updated and maintained in the early 1980s. This listing is no longer updated or maintained. There are **seven** listed SWEEPS sites within a 1/4-mile radius of the site. Three of the listed sites are located greater than 1/8 miles distance from the subject property. There are only four listed sites located within a 1 /8 miles distance from the subject site.

Alvarado II Incorporated, 2000 W 3rd St, Map ID# A2
Location: Less than 1/8 miles southwest

St Vincent Medical, 2021 Miramar St, Map ID# C7
Location: Less than 1/8 miles north/northwest

Juan Cornejo/Arshag, 230 S Alvarado St, Map ID# B8
Location: Less than 1/8 miles west

Serm-Darin Saelak, 174 S Alvarado St, Map ID# C9
Location: 1/8 miles north/northwest

Based on the information reviewed, and considering the separation distances, intervening construction and topographical differences, it is our opinion there is a low potential for significant impact to the site from any listed SWEEPS site.

4.0 RECORDS REVIEW

CERS TANKS/AST

The California Environmental Protection Agency and California Water Quality Control Board, Aboveground Storage Tank (AST) Registration lists were reviewed. There are **two** listed CERS TANKS/AST sites within a 1/4-mile radius of the site. Both listed sites are located greater than 1/8 miles distance from the subject property.

Based upon the information reviewed, and considering the separation distances, intervening construction and topographical differences, it is our opinion the potential for significant impact to the site from any listed AST site to be low.

BEP/FID

Bond Expenditure Plan (BEP). California Department of Health Services developed a site specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act Funds. There are **no** listed BEP sites within a one-mile radius of the site.

The California Environmental Protection Agency Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control board. There are **seven** listed FID UST sites within a 1/4-mile radius of the site. All seven listed sites were previously identified as SWEEPS or HISTORIC UST sites.

Based on the information reviewed, and considering the separation distances, intervening construction and topographical differences, we conclude the potential for significant impact to the site from any listed BEP/FID site is low.

ENVIROSTOR

The DTSC's Site Mitigation and Brownfields Reuse Program's Envirostor database identifies sites that have known contamination or sites where there may be reasons to investigate further. The database includes Federal Superfund sites, State Response, including Military Facilities and State Superfund, Voluntary Cleanup, and School sites. There are **26** listed ENVIROSTOR sites within a one-mile radius of the site. All 26 listed sites are located greater than 1/4 miles distance from the subject property.

Based on the information reviewed, and considering the separation distances, intervening construction and topographical differences, it is our opinion there is low potential for significant impact to the site from any listed ENVIROSTOR sites.

4.0 RECORDS REVIEW

CA SLIC

The California Regional Water Quality Control Board (RWQCB) Spills, Leaks, Investigation and Cleanup Cost Recovery Listing (SLIC) was reviewed. There are **no** listed CA SLIC sites within a 1/2-mile radius of the site.

Based on the information reviewed, it is our opinion there is a low potential for significant impact to the site from any listed CA SLIC site.

VCP

The California Department of Toxic Substance Control Volunteer Cleanup Program (VCP) Properties database contains low threat level properties with either confirmed or unconfirmed releases, and the project proponents have requested that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs. There is **one** listed VCP site within a 1/2-mile radius of the site. The listed site is located greater than ¼ miles distance from the subject property.

Based on the information reviewed, and considering the separation distances, intervening construction, and topographical differences, it is our opinion there is a low potential for significant impact to the site from any listed VCP site.

ENG/INST CONTROLS & DEEDS

The Engineering/Institutional Controls & Deed Restriction Database (ENG/INST CONTROLS & DEEDS) contains a listed of sites where engineering, institutional controls or deed restrictions have been implemented. Engineering controls are physical measures selected for the purpose of preventing or minimizing exposure to hazardous substances. These may include, but are not limited to, fencing, capping, horizontal or vertical barriers, hydraulic controls, or alternative water supplies. Institutional Controls are non-engineered instruments such as administrative or legal controls that help minimize the potential for human exposure. The review indicates there are **no** listed ENG/INST CONTROLS & DEEDS site within a 1/2-mile radius of the site.

Based upon the information reviewed, we conclude there is a low potential for significant impact to the site from any listed ENG/INST CONTROLS & DEEDS site.

4.0 RECORDS REVIEW

HAZNET

The HAZNET data is extracted from the copies of hazardous waste manifests received each year by the DTSC (Department of Toxic Substance Control). The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. The subject property was not identified as a HAZNET site.

Based on the information reviewed, it is our opinion there is a low potential for significant impact to the site from any listed HAZNET site.

CERS HAZ WASTE

The California Environmental Protection Agency CERS HAZ WASTE databases contains a list of sites that fall under hazardous chemical management, hazardous waste onsite treatment, household hazardous waste collection and hazardous waste generator programs. The subject property was not identified as a CERS HAZ WASTE site.

Based on the information reviewed, it is our opinion there is a low potential for significant impact to the site from any listed HAZNET site.

BROWNFIELDS

Brownfields are abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination. There are **two** listed BROWNFIELDS sites within a 1/2-mile of the subject property. Both listed sites are located greater than 1/8 miles distance from the subject property.

Based upon the information reviewed, and considering the separation distances, intervening construction, and topographical differences, we conclude the potential for significant impact to the subject site from any listed BROWNFIELDS site is low.

ORPHAN SUMMARY

A review of the unmapped or "orphan" sites did not reveal any additional sites of potential environmental concern to the subject property.

ENVIRONMENTAL RECORDS SOURCES SUMMARY

The subject property was not identified in any of the regulatory databases reviewed. Based upon our review of all pertinent Regulatory Documents, it is our opinion there is only a low potential for any toxic or hazardous contamination to the property from any of these off-site "listed" sources.

4.0 RECORDS REVIEW

HISTORICAL USE INFORMATION ON AND ADJOINING THE PROPERTY

PRIOR ENVIRONMENTAL REPORTS

We reviewed a prior Phase I Environmental Site Assessment for the property at Miramar Towers at 2000 Miramar Street, Los Angeles, California, property prepared by EBI Consulting, dated March 15, 2016. The target property for the report included the subject property (Miramar Towers South Lot), which comprised the southern portion of the overall target property. At the time of the report, the site was fully developed with the existing Miramar Towers apartment project. No recognized environmental conditions were identified in connection with the subject property. The historical review indicated that the site was undeveloped or developed with a few single family residences dating back to the late 1800s and was later developed with a hotel and single family residences from the early 1900s to the 1970s. The site was then developed with the existing apartment project in approximately 1980. The report indicated that, based upon the dates of construction, an asbestos survey was not conducted. The report did indicate that an Asbestos O&M Plan was in place at the subject property and recommended maintaining the O&M program.

Surveys Inc. Conducted a Phase I Environmental Site Assessment for the Miramar Towers project located at 2000 Miramar Street, Los Angeles, California dated August 6, 2018, with an update completed November 23, 2018. The target property for the report included the subject property (Miramar Towers South Lot), which comprised the southern portion of the overall target property. At the time of the report, the site was fully developed with the existing Miramar Towers apartment project. No recognized environmental conditions were identified in connection with the report. Asbestos containing materials were identified within the Miramar Towers Apartments with an O&M plan in place. Short term radon testing was conducted which indicated that onsite results were well below EPA recommended action levels. The historical review indicated that the site had originally been vacant dated back to the late 1800s prior to being developed with several residential dwellings in the early 1900s and later occupied by a hotel or motel and residential dwellings prior to being developed with the existing apartments in 1979-1980.

Surveys Inc. Conducted a Phase I Environmental Site Assessment for the Miramar Towers project located at 2000 Miramar Street, Los Angeles, California dated July 18, 2019. The target property for the report included the subject property (Miramar Towers South Lot), which comprised the southern portion of the overall target property. At the time of the report, the site was fully developed with the existing Miramar Towers apartment project. No recognized environmental conditions were identified in connection with the report. The historical review indicated that the site was originally vacant undeveloped land dating back to the late 1800s prior to being developed with several single family residential dwellings by the early 1900s. The project then appears to have been developed with multiple apartment and hotel buildings as well as several single family residences by the 1920s. Site usage remained little changed until the mid to late 1970s at which time the project was vacant. The existing apartment project was then developed on the site in 1979-1980.

4.0 RECORDS REVIEW

HISTORICAL USE INFORMATION ON AND ADJOINING THE PROPERTY

AERIAL PHOTOGRAPHY

As a part of our due-diligence we reviewed aerial photographs included as part of a prior report by EBI Consulting (2016) and aerial photographs obtained from the USGS Earth Explorer, Historic Aerials, and Google Earth internet sites. Our review of the available photographs indicates the following activity on the site:

1923 The subject property appears to be occupied by approximately 5 residential dwellings and several associated out buildings. Several residential and small commercial buildings appear to be present to the north followed by Miramar Street. Dwellings and small commercial or apartment buildings appear to be present to the east. W 3rd Street borders to the south followed by single family dwellings. Several dwellings and small commercial buildings appear to be present to the west.

1938 The subject site and adjacent sites appear little changed except additional small commercial buildings are present to the south and southeast across W 3rd Street.

1948 The subject site and adjacent sites appear little changed.

1952 The subject site and adjacent sites appear little changed.

1960 The subject site and adjacent sites appear little changed.

1964 The subject site appears little changed except several of the residential dwellings have been removed from the western portion of the site. The adjacent sites appear little changed.

1970 The western portion of the subject property now appears to be vacant. Two dwellings appear to remain on the eastern portion of the site. The adjacent sites appear little changed except a new small commercial buildings appear to be present across W 3rd Street to the south.

1972 The subject site and adjacent sites remain little changed.

1976 Low resolution photograph. The subject site and adjacent site to the north appear to have been cleared of most buildings and structures. The adjacent sites to the east, south and west appear little changed.

1979 Low resolution photograph. The subject property appears to be under development in associated with the adjacent property to the north. The shell for the Miramar Towers Apartment building appears to be largely complete to the north. The remaining adjacent sites appear little changed.

1980 The subject property now appears to be fully developed with the existing improvements. The existing Miramar Towers Apartments are present to the north. The remaining adjacent sites remain little changed.

4.0 RECORDS REVIEW

HISTORICAL USE INFORMATION ON AND ADJOINING THE PROPERTY

AERIAL PHOTOGRAPHY CONTINUED:

1983 The subject site and adjacent sites appear little changed.

1985 Low resolution photograph. The subject site and adjacent sites appear little changed.

HISTORICAL USE INFORMATION ON AND ADJOINING THE PROPERTY

USGS TOPOGRAPHIC MAPS

1894 Santa Monica 15' Quadrangle. The subject site appears to be vacant. The adjacent sites also appear to be mostly vacant with a few nearby scattered dwellings.

1896 Santa Monica 15' Quadrangle. The subject site adjacent sites appears little changed.

1898 Santa Monica 15' Quadrangle. The subject site adjacent sites appears little changed.

1900 Santa Monica 15' Quadrangle. The subject site adjacent sites appears little changed.

1902 Santa Monica 15' Quadrangle. The subject site adjacent sites appears little changed.

1921 Santa Monica 15' Quadrangle. The subject site now appears to be occupied by several single family dwellings. Residential or small commercial buildings also appear to be present on the adjacent sites. W 3rd Street borders to the south.

1928 Los Angeles 7.5' Quadrangle. The subject site and adjacent sites appear little changed.

1953 Hollywood 7.5' Quadrangle. The subject site and adjacent sites are located within a shaded region where only landmark structures are identified. No landmark structures are depicted on the subject property or immediate adjacent sites.

1966 Hollywood 7.5' Quadrangle. The subject site and adjacent sites appear little changed.

1972 Hollywood 7.5' Quadrangle. The subject site and adjacent sites appear little changed.

1981 Hollywood 7.5' Quadrangle. The subject site and adjacent sites appear little changed.

1991 Hollywood 7.5' Quadrangle. The subject site and adjacent sites appear little changed.

1994 Hollywood 7.5' Quadrangle. The subject site and adjacent sites appear little changed.

4.0 RECORDS REVIEW

HISTORICAL USE INFORMATION ON AND ADJOINING THE PROPERTY

SANBORN MAP

1906 The subject property appears to be occupied by 5 single family dwellings and associated out buildings. Single family dwellings and several out buildings border to the north followed by Miramar Street. Single family dwellings border to the east. Ocean View Ave (W 3rd St) borders to the south followed by single family dwellings. Single family dwellings are present to the west.

1950 The subject property still appears to be occupied by approximately 5 residential dwellings, however, they are now labeled as part of the Barker Motel. Several buildings labeled as part of the Barker Motel border to the north followed by Miramar Street. Apartments and residential dwellings are present to the east. W 3rd Street borders to the south followed by several residential dwellings and small commercial buildings including two gas and oil stations to the south and southwest. Apartments appear to be present to the east.

1958 The subject site and adjacent sites appear basically similar to 1950 except one of the residential dwellings has been removed from the western portion of the subject site.

1963 The subject site appears little changed except an additional dwelling has been removed from the western portion of the site. The adjacent sites appear little changed.

1970 The western portion of the site now appears to be vacant. Two residential dwellings appear to remain on the eastern portion of the site. The adjacent sites appear little changed except a new small commercial building is present to the south across W 3rd Street.

CITY DIRECTORY REVIEW

City directories were reviewed as part of a prior environmental assessment that included the subject property by EBI Consulting (2016). City directories were reviewed between the years 1924 and 2013 at approximately 5 year intervals. In 1924 and 1929 listings included Miramar Terrace Apartments and Hotel and multiple residences. From 1933 through 1958 listings included Barker Hotel and multiple residences. From 1962 through 1971 listings included New Miramar Hotel & Apartments and multiple residences. From 1981 through 2013 listings included multiple residences, Miramar Towers and Forest City Management.

CHAIN OF TITLE REVIEW

We reviewed a Preliminary Title Report for the subject project prepared by Commonwealth Land Title Company dated March 13, 2020. According to the provided title documents, the property owner was identified as Miramar Tower, a California limited Partnership.

4.0 RECORDS REVIEW

HISTORICAL USE INFORMATION ON AND ADJOINING THE PROPERTY

INTERVIEWS

Fire Department

We contacted Los Angeles Fire Department regarding potential records for the property. We are currently awaiting a response to our request. NOTE: Previous interviews and requests for information to the Los Angeles Fire Department conducted as part of several prior environmental reports conducted for the subject project, did not reveal any records related to underground storage tanks or hazardous material incidents for the project.

Water Department

The domestic water supply for the property is provided by the City of Los Angeles Department of Water and Power. We obtained a copy of the latest annual water quality report from the City of Los Angeles Department of Water and Power internet site. According to the water quality report, the water supply for the site meets state and federal safe drinking water standards.

Property Owner/Management

Interviews with property ownership representative and the onsite property management indicated they were unaware of any environmental liens, activity or land use restrictions related to environmental issues. They were also unaware of any underground storage tanks or other environmental concerns associated with the property.

HISTORICAL REVIEW SUMMARY

Based upon the aerial photograph reviews, historic map reviews, city directory reviews, prior environmental reports and personal interviews, it appears the property was originally vacant undeveloped land dating back to the late 1800s prior to being developed with approximately 5 residential dwellings by the early 1900s. The project appears to have then been associated with the Barker Motel by the 1920s, which included the adjacent site to the north, however, the site still appeared to be occupied by 5 residential dwellings. All of the residential dwellings appear to have been removed from the site starting in the late 1950s through the early 1970s. From the mid to late 1970s, the project appears to have been vacant. The site was then developed with the existing improvements in 1979-1980 when the adjacent Miramar Towers apartments were developed. Site usage has remained little changed since that time. Based upon our investigation, we do not see a potential human health risk resulting from past uses. There is no historical evidence of any chemical misuse, unlawful dumping or landfilling, or other sources of contamination to the property.

5.0 SITE RECONNAISSANCE

METHODOLOGY AND LIMITING CONDITIONS

The site reconnaissance was conducted on May 20, 2020. The scope of the onsite assessment consisted of a visual evaluation of the project site and adjacent properties. No buildings were present onsite at the time of the inspection. Items of potential or recognized environmental significance to the property, if any, were noted.

GENERAL SITE SETTING

The Miramar Towers South Lot project is located at 2005 W 3rd Street, Los Angeles, Los Angeles County, California. The subject project consists of an existing improved parcel that is developed with irrigated landscaping, a concrete paved drive aisle and parking lot, concrete curbing, concrete sidewalks, concrete stairs, concrete storm drainage channels, a CMU enclosure for electrical transformer and electrical vault and related site improvements. The subject project currently comprises the southern portion of a largely 2.737 acre parcel that is improved with the Miramar Towers Apartments. Current improvements on the subject property are associated with the Miramar Towers Apartments, however, no buildings are currently located onsite. The subject property consists of a 0.699 acre parcel within long dimensions extending east to west. The site is 1.5 miles northwest of the downtown Los Angeles, CBD. The property is located within the general southwest quadrant formed by of the intersection of State Route 101 and Interstate 110 in the central portion of the City of Los Angeles California. The site is located in an area containing primarily multifamily residential and commercial development.

INTERIOR AND EXTERIOR OBSERVATIONS

Our exterior inspection and area reconnaissance revealed no evidence of any significant soil staining or distressed vegetation. No unusual odors, pools of liquids, drums, leaking containers, hazardous materials or other unidentified substances were observed during the site reconnaissance. The onsite stormwater catch basins appeared to be free of any contaminants. No buildings were present onsite at the time of the assessment. Site usage consisted primarily of a parking lot and drive aisle and landscaped areas.

USTs/ASTs

There are no underground storage tanks at this site registered with the California Regional Water Quality Control Board. No underground or aboveground storage tanks were observed during the site reconnaissance. The adjacent Miramar Towers Apartments building is served by an emergency electrical generator. The generator is fueled from an integrated aboveground diesel storage tank, approximately 50 gallons in size. The generator and associated tank are located directly adjacent to the north of the site and appeared to be newer and remain in good condition.

5.0 SITE RECONNAISSANCE

ADJACENT PROPERTIES

North: Miramar Towers Apartments.

East: Older single family dwelling and apartments.

South: W 3rd Street followed by apartments, Center Lake Hotel and West Lake Plaza retail center.

West: Apartments.

The adjacent properties, as viewed from a distance, showed no visible evidence of environmental contamination.

ADDITIONAL HAZARDS/SERVICES

PCBs

PCBs have commonly been used as dielectric (insulating) fluids in transformers and capacitors and in fluorescent light ballasts. PCB-containing fluids were used mainly in indoor locations to minimize the possibility of fire if electrical equipment overheated. The potential hazard occurs when PCBs vaporize and convert chemically to dioxins and furans (two toxic substances). A secondary potential hazard is from spills and leaks that could contaminate the groundwater, soil or buildings with PCB fluids.

PCB-containing fluorescent light ballasts and air conditioning unit capacitors are considered a minor hazard as long as they are not leaking. However, it should be noted certain states regulate disposal of PCB-containing ballasts and capacitors, regardless of unit quantity or size.

Electrical service is provided underground from a pad-mounted electrical transformer. The transformers are owned by the local electric utility. We did not observe any leaking, staining, soil discoloration or stressed vegetation around the transformer vaults. Any future leakage would be the responsibility of the utility.

Based upon our visual observations of the onsite transformers, it is our opinion the potential for PCB contamination at the site is low.

5.0 SITE RECONNAISSANCE

ASBESTOS

Asbestos can be found in almost any building material and is routinely found in insulation, spray applied acoustic ceiling finishes, flooring and roofing materials. Asbestos-containing material (ACM), defined by the Environmental Protection Agency as any material that contains more than 1% asbestos by weight, is most hazardous when friable - i.e., material which, when dry, may be crumbled, pulverized, or reduced to powder by hand pressure. Friable asbestos is considered more hazardous than non-friable asbestos because it can become more easily airborne, and thus is more likely to enter the respiratory system where it can lead to serious health problems. Inhalation of airborne fibers is believed potentially to lead to lung diseases and cancer. Chrysotile is the most common form of asbestos accounting for 95% of asbestos used in the United States. Less common is amphiboles asbestos group, which includes such forms of asbestos as amosite and crocidolite.

Based upon the absence of buildings on the project site, there is a low potential for asbestos containing materials at this project.

LEAD IN PAINT

In 1977, the Consumer Products Safety Commission banned for consumer use paint products that contain lead in excess of 0.06%. If ingested, lead in substances such as water, paint chips or dust can lead to colic, weakened muscle response and a variety of other adverse health effects. Ingestion of lead in paint is particularly a concern in young children, pregnant women and fetuses. Excessive blood-lead levels can seriously impair a child's brain and central nervous system, causing impaired reading and learning disabilities, delayed cognitive development, mental retardation, seizures, convulsions, coma, and death.

A lead-based paint hazard is defined - by the Department of Housing and Urban Development (HUD), and by many state regulatory agencies - as paint containing 0.5% lead by weight/or 1.0 milligram per square centimeter (mg/cm^2). In 1978, the Consumer Product Safety Commission (CPCS) prohibited the sale of paint containing more than 0.06% lead by weight. Since that time, many state, county, or city agencies have adopted lead regulations/ordinances designed to protect children from a lead-based paint hazard: evaluating the health hazard for children may involve medical confirmation of blood-lead levels in children exposed to the surface. It should be noted the area of lead-based paint control and maintenance is evolving rapidly, particularly with respect to legal and medical aspects. As a result, local, state and federal lead prevention programs or health departments should be periodically consulted as to standard and accepted practices and procedures for handling lead-based paint hazards.

Based upon the absence of buildings on the project site, there is a low potential for lead-based paints.

5.0 SITE RECONNAISSANCE

ADDITIONAL HAZARDS/SERVICES

DOMESTIC WATER

Drinking water may be contaminated with lead, petroleum products, solvents and other chemical substance allowed to enter groundwater. Public water departments are required to analyze and treat water prior to public consumption to assure it meets current government standards.

The domestic water supply for the property is provided by the City of Los Angeles Department of Water and Power. We obtained a copy of the latest annual water quality report from the City of Los Angeles Department of Water and Power internet site. According to the water quality report, the water supply for the site meets state and federal safe drinking water standards.

It is our opinion the human health risks associated with the water supply at the project is very low.

RADON

Radon is a naturally occurring, highly mobile, chemically inert radioactive gas created through radioactive decay of uranium and thorium. The potential for occurrence of radon varies widely and is dependent upon (1) the concentration of radioactive materials in the underlying bedrock; (2) the relative permeability of soils with respect to gases; and (3) the amount of fracturing or faulting in surficial materials (EPA, 1987). The concern regarding radon and its potential effects upon humans arises from the results of studies (EPA 1987) which suggest approximately 15% of all lung cancer mortalities in the United States may be attributable to exposure to radon.

The EPA has established a concentration of radon of 4 picocuries per liter as a maximum permissible concentration “action level”. Concentrations above this value would signal a potential health threat. According to studies, an average concentration in homes across the United States is on the order of 1.4 picocuries per liter. Our conversations with the Regional office of the EPA indicate radon has not been a problem in areas underlain by thick sequences of glacial and alluvial soils. The site is underlain with alluvial type soil deposits. The primary concern with radon is over accumulation in poorly ventilated basement areas.

The EPA Radon Zone for Los Angeles County is Zone 2. Zone 2 households have an average indoor level of greater than 2 but less than 4 pCi/L.

The subject project is located in EPA Radon Zone 2, a moderate risk radon region.

5.0 SITE RECONNAISSANCE

ADDITIONAL HAZARDS/SERVICES

VAPOR ENCROACHMENT

Vapor Encroachment Condition (VEC) is the presence or likely presence of Chemicals of Concern (COC) vapors in the subsurface of the target property caused by the release of vapors from contaminated soils and/or groundwater either on or near the target property. A Vapor Encroachment Screen is a screening process designed to determine the potential for chemicals of concern vapors released from contaminated soil or groundwater to impact a property.

A limited Vapor Encroachment Screen for the subject was conducted utilizing ASTM E 2600-10 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. The standard uses a two tiered methodology designed to quickly and cost effectively screen out properties with a low risk of Vapor Encroachment. Per HUD Map Chapter 9 Requirement, Tier 1 Screening has been conducted as part of this assessment.

Tier 1 – Initial Screening for potential Vapor Encroachment Conditions (VEC) was designed as a screening step to supplement a Phase I Environmental Assessment and relies on information already collected in a Phase I Investigation. Tier 1 methodology utilizes two primary tools for screening, search distance and chemicals of concern. Search distance includes the primary area of concern surrounding the target property and secondary area of concern for sites potentially upgradient of the target property. Chemicals of concern review addresses whether or not potential chemicals of concern, those chemicals that have the potential to volatize and become vapor, are likely to be present.

Based upon the information reviewed and documented during this assessment, which included a review of all major governmental environmental regulatory databases (see attached EDR Radius Map Report) and an historical review of the site and surrounding properties, and taking into consideration the separation distances, topographical differences, presumed groundwater flow, and local soils conditions, no potential vapor encroachment conditions were identified in connection with the subject property.

6.0 FINDINGS, OPINIONS, CONCLUSIONS AND DEVIATIONS

Based upon the absence of buildings on the project site, there is a low potential for asbestos containing materials or lead-based paints at this project. The project is located in EPA Radon Zone 2, a moderate risk radon region. No potential vapor encroachment conditions were identified in connection with the subject property.

No significant data gaps were encountered during preparation of this report. Full site access was provided during our site inspection. Sanborn Fire Insurance Map coverage was available for the property area and sufficient other historical sources were available to develop the site history for the property.

The historical review indicated that the site was originally vacant undeveloped land dating back to the late 1800s prior to being developed with approximately 5 residential dwellings by the early 1900s. The project appears to have then been associated with the Barker Motel by the 1920s, which included the adjacent site to the north, however, the site still appeared to be occupied by 5 residential dwellings. All of the residential dwellings appear to have been removed from the site starting in the late 1950s through the early 1970s. From the mid to late 1970s, the project appears to have been vacant. The site was then developed with the existing improvements in 1979-1980 when the adjacent Miramar Towers apartments were developed. Site usage has remained little changed since that time. Based upon our investigation, we do not see a potential human health risk resulting from past uses.

The subject property was not listed in any of the Regulatory Databases reviewed. Based upon our review of all pertinent Regulatory Databases, it is our opinion there is only a low potential for any toxic or hazardous contamination to the property from any off-site "listed" sources.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 of Miramar Towers South Lot project located at 2005 W 3rd Street, Los Angeles, Los Angeles County, California. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property.

It is our opinion the potential for significant hazardous contamination at the site is low. No additional investigation appears to be warranted at this time.

DEVIATIONS

Surveys Inc. has performed this Phase I Environmental Site Assessment in accordance with ASTM E1527-13 Standard Practice for Environmental Site Assessments with no conscious exceptions to or deletions from the standard.

6.0 ENVIRONMENTAL PROFESSIONALS' CERTIFICATION AND SIGNATURE

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in section 312.10 of 40 CFR 312 and we have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXPERIENCE

SURVEYS INC. **1998 – Present**

Consultant Engineer/Environmental Coordinator: Responsibilities include conducting engineering and environmental assessments for Lender's, Owners, Developers and/or government agencies on a variety of commercial and multi-family residential projects across the U.S. Experience includes conducting over 1000 various Engineering Assessments and Phase I and Phase II Environmental Site Assessments.

The Engineering Assessment Reports involve an onsite assessment and review of an existing building's Site, Architectural, Structural, Mechanical and Electrical Systems. The assessments are conducted for the purpose of evaluating the construction of the overall development and identifying any possible deficiencies that could affect its current market value or resale potential. The assessment reports are prepared to meet or exceed the requirements of the Lender or Government Agency. These reviews normally include an existing facilities compliance with ADA Title III and can include a Seismic PML study.

The Phase I Environmental Assessment Reports involve an onsite building and site assessment to determine if hazardous or toxic materials are present that can adversely impact the property. The Phase I Assessments also involve an historical review; interviews with people knowledgeable and a review of government environmental regulatory databases. Environmental Assessments typically include a review for potential Lead-Based Paints, suspect Asbestos Containing Materials and Radon Gas. Responsible for preparing site specific Asbestos, Lead-Based Paint and Mold and Moisture Operations and Maintenance Plans.

PAUL H. DALTAS, P.E.
PRINCIPAL – SURVEYS INC.

EDUCATION:

BCE, Civil/Structural Engineering
University of Minnesota, Institute of Technology

EXPERIENCE:

SURVEYS INC. **1990 - Present**

Principal Consultant Engineer. Responsible for providing independent, third party, engineering, environmental and seismic assessment services to Lenders, Owners, Developers and/or government agencies on a variety of commercial and multi-family residential projects throughout the United States. The Engineering Assessment Reports involve an onsite assessment and review of an existing building's Site, Architectural, Structural, Mechanical and Electrical Systems. Our Engineering Assessment Reports are prepared to meet or exceed the requirements of the Mortgage Lender, Fannie Mae, Freddie Mac, ASTM, or other agencies. These reviews normally include a review for compliance with ADA Title III provisions and may, if required, include a Seismic PML study for projects in UBC Seismic Zones 3 or 4. The Phase I Environmental Assessment Reports involve an onsite building and site assessment to determine if hazardous or toxic materials are present that can adversely impact the property. The Phase I Assessments also involve an historical review and interviews with people knowledgeable about the property. Phase II Environmental work is provided only as required by the Phase I Assessment to determine if suspected hazardous contamination exists. Over 2,000 Engineering/Environmental Assessments completed.

INDUSTRY - FANNIE MAE/HUD **2002-2003**

Fannie Mae, Property Condition Standards, Technical Advisory Panel 2002/2003. Western Regional MAP Lenders Conference PCNA Committee Member 2003.

WEYERHAEUSER BUILDING SYSTEMS **1988 - 1990**

Design Engineer/Project Manager/Regional Sales Manager. Designed, engineered and marketed to the construction industry a wide variety of commercial, industrial and residential structural systems for projects throughout the western United States. Weyerhaeuser industry representative and team member for the Weyerhaeuser PBDM (Probabilistic Beam Design Methodology) advanced reliability based product manufacturing and lumber grading system. Construction Project Manager for Weyerhaeuser structural systems installed in the Northwest.

WEYERHAEUSER-TIMBERLAND INDUSTRIES **1984 - 1988**

Project Manager/Engineer. Overseas construction materials packages specializing in interior and exterior finished wood products such as architectural doors, fire doors, sound doors, builders' hardware, plastic laminate casework, wood cabinetry, commercial and residential millwork, specialty hardware, custom manufactured windows, panel products and lumber. Involved in designing, engineering, estimating, manufacturing and shipping these multi-million dollar material packages from various mills around the world to the Middle East.

HEA-ARCHITECTS, ENGINEERS & CONSTRUCTION MANAGER **1972 - 1984**

Structural Engineer/Construction Manager. Leading Minneapolis, Minnesota firm specializing in medical related buildings such as hospitals, medical office buildings, geriatric care centers and retirement facilities. Work included the design and engineering of reinforced and post-tensioned concrete structures; masonry and precast buildings; steel and composite systems; and wood structure buildings. Onsite Construction Manager in charge of multiple prime contractors for major hospital remodeling and expansion project. Onsite Construction Engineer in charge of mid-rise senior retirement facility.

PRELIMINARY REPORT

Dated as of March 13, 2020 at 7:30 a.m.

In response to the application for a policy of title insurance referenced herein, Commonwealth Land Title Company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a policy or policies of title insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an exception herein or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations or Conditions of said policy forms.
The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Attachment One. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitation on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Attachment One. Copies of the policy forms should be read. They are available from the office which issued this report.

The policy(s) of title insurance to be issued hereunder will be policy(s) of **Commonwealth Land Title Insurance Company.**

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Attachment One of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered. It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Order No: 09197264-919-KRC-KRE

SCHEDULE A

The form of policy of title insurance contemplated by this report is:

ALTA Extended Owner's Policy of Title Insurance (6-17-06)

ALTA Extended Loan Policy of Title Insurance (6-17-06)

The estate or interest in the land hereinafter described or referred to covered by this report is:

Order No: 09197264-919-KRC-KRE

APN: 5154-020-030

SCHEDULE B – Section A

The following exceptions will appear in policies when providing standard coverage as outlined below:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.

2. Any facts, rights, interests or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.

3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.

4. Any encroachment, encumbrance, violation, variation or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.

5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the Public Records.

6. Any lien or right to a lien for services, labor or material not shown by the Public Records.

SCHEDULE B – Section B

At the date hereof Exceptions to coverage in addition to the printed exceptions and exclusions in said policy form would be as follows:

A. Property taxes, which are a lien not yet due and payable, including any assessments collected with taxes to be levied for the fiscal year 2020-2021.

B. The lien of supplemental or escaped assessments of property taxes, if any, made pursuant to the provisions of Chapter 3.5 (commencing with Section 75) or Part 2, Chapter 3, Articles 3 and 4, respectively, of the Revenue and Taxation Code of the State of California as a result of the transfer of title to the vestee named in Schedule A or as a result of changes in ownership or new construction occurring prior to Date of Policy.

1. Water rights, claims or title to water, whether or not disclosed by the public records.

2. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

Granted to:	The Pacific Telephone and Telegraph Company
Purpose:	Utilities
Recording Date:	February 13, 1979
Recording No:	79-175414 of Official Records
Affects:	A portion of said land as more particularly described in said document

3. Matters contained in that certain document

Entitled:	Covenant and Agreement Regarding Maintenance of Building and Uses
Recording Date:	March 01, 1979
Recording No:	79-234301 of Official Records

Reference is hereby made to said document for full particulars.

4. An irrevocable offer to dedicate an easement over a portion of said Land for

Purpose(s):	Public street or highway
Recording Date:	March 06, 1979
Recording No:	79-254595 of Official Records
Affects:	A portion of said land as more particularly described in said document

5. Matters contained in that certain document

Entitled:	Covenant and Agreement Regarding Maintenance of Building
Recording Date:	April 10, 1979
Recording No:	79-383663 of Official Records

Reference is hereby made to said document for full particulars.

6. Any rights, interests, or claims which may exist or arise by reason of the following matters disclosed by survey,

Job No.:	Not Shown
Dated:	September 13, 2016
Last revised:	April 20, 2017
Prepared by:	Delta Surveying & Mapping
Matters shown:	As follows:

A) A 0.2' encroachment of a retaining wall into the street right of way of Miramar Street
B) A 1' to 1.2' encroachment of a sidewalk onto the property from the street right of way of Miramar Street
C) An unrecorded easement or other right for a transformer located on the property
D) A generator located on the property
E) A 2.3' to 3.3' encroachment of a sidewalk onto the property from the street right of way of 3rd Street
F) The measured distance (324.71') for the southerly boundary of the property differs from record (324.87') by 0.16'
G) The original survey certification does not extend, nor is it transferable, to the current transaction

7. Matters contained in that certain document

Entitled:	Master Covenant and Agreement Regarding On-Site Stormwater Mitigation Measures and Maintenance
Recording Date:	August 08, 2019
Recording No:	20190791536 of Official Records

Reference is hereby made to said document for full particulars.

8. Matters contained in that certain document

Entitled:	Reciprocal Easement Agreement
Recording Date:	December 16, 2019
Recording No:	20191402989 of Official Records

Reference is hereby made to said document for full particulars.

9. Please be advised that our search did not disclose any open Deeds of Trust of record. If you should have knowledge of any outstanding obligation, please contact the Title Department immediately for further review prior to closing.

10. Matters which may be disclosed by an inspection and/or by a correct ALTA/NSPS Land Title Survey of said Land that is satisfactory to the Company, and/or by inquiry of the parties in possession thereof.

11. Any easements not disclosed by the public records as to matters affecting title to real property, whether or not said easements are visible and apparent.

12. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other matters which a correct survey would disclose and which are not shown by the public records.

13. Any rights of the parties in possession of a portion of, or all of, said Land, which rights are not disclosed by the public records.

The Company will require, for review, a full and complete copy of any unrecorded agreement, contract, license and/or lease, together with all supplements, assignments and amendments thereto, before issuing any policy of title insurance without excepting this item from coverage.

The Company reserves the right to except additional items and/or make additional requirements after reviewing said documents.

END OF SCHEDULE B EXCEPTIONS

PLEASE REFER TO THE "NOTES AND REQUIREMENTS SECTION" WHICH FOLLOWS FOR INFORMATION NECESSARY TO COMPLETE THIS TRANSACTION

Order No: 09197264-919-KRC-KRE

REQUIREMENTS SECTION:

1. Prior to the close of escrow, the Company requires a Statement of Information to be completed by the following party(s),

   Party(s): All Parties

   The Company reserves the right to add additional items or make further requirements after review of the requested Statement of Information.

2. The Company will require the following documents for review prior to the issuance of any title insurance predicated upon a conveyance or encumbrance from the limited partnership named below:

   Name: Miramar Tower, a California limited partnership

   a) A complete copy of the limited partnership agreement and all amendments thereto.

   b) Satisfactory evidence that the partnership was validly formed and is in good standing.

   The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

3. The Company will require the following documents for review prior to the issuance of any title insurance predicated upon a conveyance or encumbrance from the entity named below:

   Limited Liability Company: JRC Miramar MM, LLC (General Partner)

   a) A copy of its operating agreement, if any, and all amendments, supplements and/or modifications thereto, certified by the appropriate manager or member.

   b) If a domestic Limited Liability Company, a copy of its Articles of Organization and all amendments thereto with the appropriate filing stamps.

   c) If the Limited Liability Company is member-managed, a full and complete current list of members certified by the appropriate manager or member.

   d) A current dated certificate of good standing from the proper governmental authority of the state in which the entity is currently domiciled.

   e) If less than all members, or managers, as appropriate, will be executing the closing documents, furnish evidence of the authority of those signing.

   f) If Limited Liability Company is a Single Member Entity, a Statement of Information for the Single Member will be required.

   g) Each member and manager of the LLC without an Operating Agreement must execute in the presence of a notary public the Certificate of California LLC (Without an Operating Agreement) Status and Authority form.

4. The Company will require the following documents for review prior to the issuance of any title insurance predicated upon a conveyance or encumbrance from the entity named below:

   Limited Liability Company: Wakeland Miramar, LLC (General Partner)

   a) A copy of its operating agreement, if any, and all amendments, supplements and/or modifications thereto, certified by the appropriate manager or member.

   b) If a domestic Limited Liability Company, a copy of its Articles of Organization and all amendments thereto with the appropriate filing stamps.

   c) If the Limited Liability Company is member-managed, a full and complete current list of members certified by the appropriate manager or member.

   d) A current dated certificate of good standing from the proper governmental authority of the state in which the entity is currently domiciled.

   e) If less than all members, or managers, as appropriate, will be executing the closing documents, furnish evidence of the authority of those signing.

   f) If Limited Liability Company is a Single Member Entity, a Statement of Information for the Single Member will be required.

   g) Each member and manager of the LLC without an Operating Agreement must execute in the presence of a notary public the Certificate of California LLC (Without an Operating Agreement) Status and Authority form.

5. The Company will require the following documents for review prior to the issuance of any title insurance predicated upon a conveyance or encumbrance by the corporation named below:

   Name of Corporation: Wakeland Housing and Development Corp (General Partner)

   a) A Copy of the corporation By-laws and Articles of Incorporation

   b) An original or certified copy of a resolution authorizing the transaction contemplated herein

   c) If the Articles and/or By-laws require approval by a ‘parent’ organization, a copy of the Articles and By-laws of the parent

   The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

6. Unrecorded matters which may be disclosed by an Owner’s Affidavit or Declaration. A form of the Owner’s Affidavit/Declaration is attached to this Preliminary Report/Commitment. This Affidavit/Declaration is to be completed by the record owner of the land and submitted for review prior to the closing of this transaction. Your prompt attention to this requirement will help avoid delays in the closing of this transaction. Thank you.

   The Company reserves the right to add additional items or make further requirements after review of the requested Affidavit/Declaration.

Order No: 09197264-919-KRC-KRE

INFORMATIONAL NOTES SECTION

1. The information on the attached plat is provided for your convenience as a guide to the general location of the subject property. The accuracy of this plat is not guaranteed, nor is it a part of any policy, report or guarantee to which it may be attached.

2. For wiring Instructions please contact your Title Officer or Title Company Escrow officer.

3. Notice: Please be aware that due to the conflict between federal and state laws concerning the cultivation, distribution, manufacture or sale of marijuana, the Company is not able to close or insure any transaction involving Land that is associated with these activities.

4. Pursuant to Government Code Section 27388.1, as amended and effective as of 1-1-2018, a Documentary Transfer Tax (DTT) Affidavit may be required to be completed and submitted with each document when DTT is being paid or when an exemption is being claimed from paying the tax. If a governmental agency is a party to the document, the form will not be required. DTT Affidavits may be available at a Tax Assessor-County Clerk-Recorder.

5. The policy of title insurance will include an arbitration provision. The Company or the insured may demand arbitration. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the insured arising out of or relating to this policy, any service of the Company in connection with its issuance or the breach of a policy provision or other obligation. Please ask your escrow or title officer for a sample copy of the policy to be issued if you wish to review the arbitration provisions and any other provisions pertaining to your Title Insurance coverage.

6. Property taxes, including any personal property taxes and any assessments collected with taxes, are paid. For proration purposes the amounts were:

Tax Identification No.:	5154-020-030
Fiscal Year:	2019-2020
1st Installment:	$7,492.72
2nd Installment:	$7,492.70
Exemption:	$0.00
Code Area:	00067

   Affects: The herein described Land and other land.

7. None of the items shown in this report will cause the Company to decline to attach ALTA Endorsement Form 9 to an Extended Coverage Loan Policy, when issued.

8. The Company is not aware of any matters which would cause it to decline to attach CLTA Endorsement Form 116 indicating that there is located on said Land a multiple family residence, known as 2000 Miramar Street, Los Angeles, CA, to an Extended Coverage Loan Policy.

9. There are NO conveyances affecting said Land recorded within 24 months of the date of this report.

Wire Fraud Alert

This Notice is not intended to provide legal or professional advice. If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. DO NOT use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the phone number of relevant parties to the transaction as soon as an escrow account is opened**. DO NOT send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do NOT reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

For more information on wire-fraud scams or to report an incident, please refer to the following links:

Notice of Available Discounts

Pursuant to Section 2355.3 in Title 10 of the California Code of Regulations Fidelity National Financial, Inc. and its subsidiaries ("FNF") must deliver a notice of each discount available under our current rate filing along with the delivery of escrow instructions, a preliminary report or commitment. Please be aware that the provision of this notice does not constitute a waiver of the consumer's right to be charged the filed rate. As such, your transaction may not qualify for the below discounts.

You are encouraged to discuss the applicability of one or more of the below discounts with a Company representative. These discounts are generally described below; consult the rate manual for a full description of the terms, conditions and requirements for such discount. These discounts only apply to transactions involving services rendered by the FNF Family of Companies. This notice only applies to transactions involving property improved with a one-to-four family residential dwelling.

Not all discounts are offered by every FNF Company. The discount will only be applicable to the FNF Company as indicated by the named discount.

FIDELITY NATIONAL FINANCIAL, INC.
PRIVACY NOTICE

Effective January 1, 2020

Fidelity National Financial, Inc. and its majority-owned subsidiary companies (collectively, "FNF," "our," or "we") respect and are committed to protecting your privacy. This Privacy Notice explains how we collect, use, and protect personal information, when and to whom we disclose such information, and the choices you have about the use and disclosure of that information.

A limited number of FNF subsidiaries have their own privacy notices. If a subsidiary has its own privacy notice, the privacy notice will be available on the subsidiary's website and this Privacy Notice does not apply.

Collection of Personal Information

FNF may collect the following categories of Personal Information:

- contact information (*e.g.*, name, address, phone number, email address);
- demographic information (*e.g.*, date of birth, gender, marital status);
- identity information (*e.g.* Social Security Number, driver's license, passport, or other government ID number);
- financial account information (*e.g.* loan or bank account information); and
- other personal information necessary to provide products or services to you.

We may collect Personal Information about you from:

- information we receive from you or your agent;
- information about your transactions with FNF, our affiliates, or others; and
- information we receive from consumer reporting agencies and/or governmental entities, either directly from these entities or through others.

Collection of Browsing Information

FNF automatically collects the following types of Browsing Information when you access an FNF website, online service, or application (each an "FNF Website") from your Internet browser, computer, and/or device:

- Internet Protocol (IP) address and operating system;
- browser version, language, and type;
- domain name system requests; and
- browsing history on the FNF Website, such as date and time of your visit to the FNF Website and visits to the pages within the FNF Website.

Like most websites, our servers automatically log each visitor to the FNF Website and may collect the Browsing Information described above. We use Browsing Information for system administration, troubleshooting, fraud investigation, and to improve our websites. Browsing Information generally does not reveal anything personal about you, though if you have created a user account for an FNF Website and are logged into that account, the FNF Website may be able to link certain browsing activity to your user account.

Other Online Specifics

Cookies. When you visit an FNF Website, a "cookie" may be sent to your computer. A cookie is a small piece of data that is sent to your Internet browser from a web server and stored on your computer's hard drive. Information gathered using cookies helps us improve your user experience. For example, a cookie can help the website load properly or can customize the display page based on your browser type and user preferences. You can choose whether or not to accept cookies by changing your Internet browser settings. Be aware that doing so may impair or limit some functionality of the FNF Website.

Web Beacons. We use web beacons to determine when and how many times a page has been viewed. This information is used to improve our websites.

Do Not Track. Currently our FNF Websites do not respond to "Do Not Track" features enabled through your browser.

Links to Other Sites. FNF Websites may contain links to unaffiliated third-party websites. FNF is not responsible for the privacy practices or content of those websites. We recommend that you read the privacy policy of every website you visit.

Use of Personal Information

FNF uses Personal Information for three main purposes:

- To provide products and services to you or in connection with a transaction involving you.
- To improve our products and services.
- To communicate with you about our, our affiliates', and others' products and services, jointly or independently.

When Information Is Disclosed

We may disclose your Personal Information and Browsing Information in the following circumstances:

- to enable us to detect or prevent criminal activity, fraud, material misrepresentation, or nondisclosure;
- to nonaffiliated service providers who provide or perform services or functions on our behalf and who agree to use the information only to provide such services or functions;

Copyright © 2020. Fidelity National Financial, Inc. All Rights Reserved

- to nonaffiliated third party service providers with whom we perform joint marketing, pursuant to an agreement with them to jointly market financial products or services to you;
- to law enforcement or authorities in connection with an investigation, or in response to a subpoena or court order; or
- in the good-faith belief that such disclosure is necessary to comply with legal process or applicable laws, or to protect the rights, property, or safety of FNF, its customers, or the public.

The law does not require your prior authorization and does not allow you to restrict the disclosures described above. Additionally, we may disclose your information to third parties for whom you have given us authorization or consent to make such disclosure. We do not otherwise share your Personal Information or Browsing Information with nonaffiliated third parties, except as required or permitted by law. We do share Personal Information among affiliates (other companies owned by FNF) to directly market to you. Please see "Choices with Your Information" to learn how to restrict that sharing.

We reserve the right to transfer your Personal Information, Browsing Information, and any other information, in connection with the sale or other disposition of all or part of the FNF business and/or assets, or in the event of bankruptcy, reorganization, insolvency, receivership, or an assignment for the benefit of creditors. By submitting Personal Information and/or Browsing Information to FNF, you expressly agree and consent to the use and/or transfer of the foregoing information in connection with any of the above described proceedings.

Security of Your Information
We maintain physical, electronic, and procedural safeguards to protect your Personal Information.

Choices With Your Information
If you do not want FNF to share your information among our affiliates to directly market to you, you may send an "opt out" request by email, phone, or physical mail as directed at the end of this Privacy Notice. We do not share your Personal Information with nonaffiliates for their use to direct market to you.

Whether you submit Personal Information or Browsing Information to FNF is entirely up to you. If you decide not to submit Personal Information or Browsing Information, FNF may not be able to provide certain services or products to you.

For California Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties, except as permitted by California law. For additional information about your California privacy rights, please visit the "California Privacy" link on our website (https://fnf.com/pages/californiaprivacy.aspx) or call (888) 413-1748.

For Nevada Residents: You may be placed on our internal Do Not Call List by calling (888) 934-3354 or by contacting us via the information set forth at the end of this Privacy Notice. Nevada law requires that we also provide you with the following contact information: Bureau of Consumer Protection, Office of the Nevada Attorney General, 555 E. Washington St., Suite 3900, Las Vegas, NV 89101; Phone number: (702) 486-3132; email: BCPINFO@ag.state.nv.us.
For Oregon Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties for marketing purposes, except after you have been informed by us of such sharing and had an opportunity to indicate that you do not want a disclosure made for marketing purposes.

For Vermont Residents: We will not disclose information about your creditworthiness to our affiliates and will not disclose your personal information, financial information, credit report, or health information to nonaffiliated third parties to market to you, other than as permitted by Vermont law, unless you authorize us to make those disclosures.

Information From Children
The FNF Websites are not intended or designed to attract persons under the age of eighteen (18).We do not collect Personal Information from any person that we know to be under the age of thirteen (13) without permission from a parent or guardian.

International Users
FNF's headquarters is located within the United States. If you reside outside the United States and choose to provide Personal Information or Browsing Information to us, please note that we may transfer that information outside of your country of residence. By providing FNF with your Personal Information and/or Browsing Information, you consent to our collection, transfer, and use of such information in accordance with this Privacy Notice.

FNF Website Services for Mortgage Loans
Certain FNF companies provide services to mortgage loan servicers, including hosting websites that collect customer information on behalf of mortgage loan servicers (the "Service Websites"). The Service Websites may contain links to both this Privacy Notice and the mortgage loan servicer or lender's privacy notice. The sections of this Privacy Notice titled When Information is Disclosed, Choices with Your Information, and Accessing and Correcting Information do not apply to the Service Websites. The mortgage loan servicer or lender's privacy notice governs use, disclosure, and access to your Personal Information. FNF does not share Personal Information collected through the Service Websites, except as required or authorized by contract with the mortgage loan servicer or lender, or as required by law or in the good-faith belief that such disclosure is necessary: to comply with a legal process or applicable law, to enforce this Privacy Notice, or to protect the rights, property, or safety of FNF or the public.

ATTACHMENT ONE (Revised 05-06-16)

CALIFORNIA LAND TITLE ASSOCIATION
STANDARD COVERAGE POLICY – 1990

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)
ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE

EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;
   d. improvements on the Land;
   e. land division; and
   f. environmental protection.
   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;

© California Land Title Association. All rights reserved.
The use of this Form is restricted to CLTA subscribers in good standing as of the date of use. All other uses are prohibited. Reprinted under license or express permission from the California Land Title Association.

c. that result in no loss to You; or
d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.

5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.
   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$ 10,000.00
Covered Risk 18:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 19:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 21:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$ 5,000.00

2006 ALTA LOAN POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13 or 14); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

{Except as provided in Schedule B - Part II,{ t{or T}his policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

© California Land Title Association. All rights reserved.
The use of this Form is restricted to CLTA subscribers in good standing as of the date of use. All other uses are prohibited. Reprinted under license or express permission from the California Land Title Association.

{PART I

{The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.}

PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:}

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer; or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

{The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY – ASSESSMENTS PRIORITY (04-02-15)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury, or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.
10. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

OWNER'S DECLARATION

The undersigned hereby declares as follows:

1. (Fill in the applicable paragraph and strike the other)

   a. Declarant ("Owner") is the owner or lessee, as the case may be, of certain premises located at _____, further described as follows: See Preliminary Report/Commitment No. 09197264-919-KRC-KRE for full legal description (the "Land").

   b. Declarant is the _____ of _____ ("Owner"), which is the owner or lessee, as the case may be, of certain premises located at _____, further described as follows: See Preliminary Report/Commitment No. 09197264-919-KRC-KRE for full legal description (the "Land").

2. (Fill in the applicable paragraph and strike the other)

   a. During the period of six months immediately preceding the date of this declaration no work has been done, no surveys or architectural or engineering plans have been prepared, and no materials have been furnished in connection with the erection, equipment, repair, protection or removal of any building or other structure on the Land or in connection with the improvement of the Land in any manner whatsoever.

   b. During the period of six months immediately preceding the date of this declaration certain work has been done and materials furnished in connection with _____ upon the Land in the approximate total sum of $_____, but no work whatever remains to be done and no materials remain to be furnished to complete the construction in full compliance with the plans and specifications, nor are there any unpaid bills incurred for labor and materials used in making such improvements or repairs upon the Land, or for the services of architects, surveyors or engineers, except as follows: _____. Owner, by the undersigned Declarant, agrees to and does hereby indemnify and hold harmless Commonwealth Land Title Company against any and all claims arising therefrom.

3. Owner has not previously conveyed the Land; is not a debtor in bankruptcy (and if a partnership, the general partner thereof is not a debtor in bankruptcy); and has not received notice of any pending court action affecting the title to the Land.

4. Except as shown in the above-referenced Preliminary Report/Commitment, there are no unpaid or unsatisfied mortgages, deeds of trust, Uniform Commercial Code financing statements, regular assessments, or taxes that constitute a lien against the Land or that affect the Land but have not been recorded in the public records.

5. The Land is currently in use as _____ ; _____occupy/occupies the Land; and the following are all of the leases or other occupancy rights affecting the Land:

   _____

6. There are no other persons or entities that assert an ownership interest in the Land, nor are there unrecorded easements, claims of easement, or boundary disputes that affect the Land.

7. There are no outstanding options to purchase or rights of first refusal affecting the Land.

8. There are no material violations of any current, enforceable covenant affecting the Property and the Undersigned has received no written notice from any third party claiming that there is a present violation of any current, enforceable covenant affecting the Property.

This declaration is made with the intention that Commonwealth Land Title Company and Commonwealth Land Title Insurance Company (the "Company") and its policy issuing agents will rely upon it in issuing their title insurance policies and endorsements. Owner, by the undersigned Declarant, agrees to indemnify the Company against loss or damage (including attorneys fees, expenses, and costs) incurred by the Company as a result of any untrue statement made herein.

I declare under penalty of perjury that the foregoing is true and correct and that this declaration was executed on ___ at _____.

ENVIRONMENTAL QUESTIONNAIRE

ASTM E-1527-13 USER ENVIRONMENTAL QUESTIONNAIRE

(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law? (Yes/No)
Comments:

(2.) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).

Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? (Yes/No)
Comments:

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

As the *user* of this *ESA* do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business? (Yes/No)
Comments:

(4.) Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*? (Yes/No)
Comments: There are no known contaminates on the site, and no fair market value appraisal done for the site

(5.) Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*, (Yes/No)
(a.) Do you know the past uses of the *property*? No use since 1989 beyond walking path, and fire lane
(b.) Do you know of specific chemicals that are present or once were present at the *property*? No, Not aware of any
(c.) Do you know of spills or other chemical releases that have taken place at the *property*? No, Not aware of any
(d.) Do you know of any environmental cleanups that have taken place at the *property*? No, Not aware of any
Comments:

(6.) The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the *user* of this *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*? (Yes/No)

Subject: Phase I Environmental Site Assessment
Miramar Towers
2000 Miramar Street, Los Angeles, California
EBI Project No. 1716000093

Dear Mr. Daly:

Attached please find our *Phase I Environmental Site Assessment* (the report) for the above-mentioned asset (the Subject Property). During the survey and research, our surveyor met with agents representing the Subject Property, or agents of the owner, and reviewed the Subject Property and its history. The report was completed according to the terms and conditions authorized by you. This report has been completed in general conformance with the ASTM Standard E 1527-13, as well as the requirements of the United States Department of Housing and Urban Development (HUD) Multifamily Accelerated Processing (MAP) Guide, Chapter 9.

The purpose of this report is to acquire environmental information, observe the general condition and maintenance status of the Subject Property, to suggest remediation and/or maintenance practices considered customary for the Subject Property to continue in its current operation, compared to properties of similar age and condition, and to identify recognized environmental conditions in connection with the Subject Property described in this report.

Reliance on the report and the information contained herein shall mean (i) the report may be relied upon by a lender to be selected by *Jonathan Rose Companies*, in determining whether to make a loan evidenced by a note secured by the Subject Property ("the Mortgage Loan"); (ii) the report may be relied upon by any purchaser in determining whether to purchase the Mortgage Loan (but not the Subject Property) from that lender, or an interest in the Mortgage Loan or securities backed or secured by the Mortgage Loan, and any rating agency rating securities representing an interest in the Mortgage Loan or backed or secured by the Mortgage Loan; (iii) the report may be referred to in and included, in whole or in part, with materials offering for sale the Mortgage Loan or an interest in the Mortgage Loan or securities backed or secured by the Mortgage Loan; (iv) the report speaks only as of its date in the absence of a specific written update of the report signed and delivered by EBI Consulting.

There are no intended or unintended third party beneficiaries to this report, except as expressly stated herein.

EBI is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the report or on the closing of any business transaction.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Thank you very much for the opportunity to provide environmental consulting services to *Jonathan Rose Companies*. Should you have any questions or require additional information, please do contact the undersigned.

Respectfully submitted,
EBI CONSULTING

HUD CERTIFICATION

I understand that my environmental review will be used by *Jonathan Rose Companies* ("MAP Lender") to document to the U.S. Department of Housing and Urban Development that the MAP Lender's application for FHA multifamily mortgage insurance was prepared and reviewed in accordance with HUD requirements. I certify that my review was in accordance with the HUD requirements applicable on the date of my review and that I have no financial interest or family relationship with the officers, directors, stockholders, or partners of the Borrower, the general contractor, any subcontractors, the buyer or seller of the proposed property or engage in any business that might present a conflict of interest.

I am under contract for this specific assignment and I have no other side deals, agreements, or financial considerations with the MAP Lender or others in connection with this transaction. This report is written to meet the Multifamily Accelerated Processing (MAP) guidelines pursuant to the HUD mortgage insurance program 223(f) as well as ASTM E 1527-13.

Signed: _____ **Date:** March 15, 2016

EXECUTIVE SUMMARY

At the request of *Jonathan Rose Companies*, EBI has performed a Phase I Environmental Site Assessment (ESA) of the property located at 2000 Miramar Street in Los Angeles, California, herein referred to as the Subject Property. The main objective of this ESA was to identify *recognized environmental conditions* in connection with the Subject Property, defined in ASTM E 1527-13, as the presence or likely presence of any hazardous substances or petroleum products that indicate an existing release, a past release, or a material threat of a release. This ESA also includes a preliminary evaluation of certain potential environmental conditions that are outside the scope of ASTM E 1527-13. In addition to ASTM E 1527-13, the report was completed in accordance with portions of the U.S. Department of Housing and Urban Development (HUD) Multifamily Accelerated Processing (MAP) Guide, Chapter 9.

The Subject Property includes one irregular-shaped parcel, totaling approximately 2.77 acres. The Subject Property is currently improved with a 157-unit multifamily residential complex, including one eight-story, concrete slab-on-grade apartment building. Additional structures and amenities include the following: a one-story administrative leasing office and community recreation center, attached on the north exterior of the tower building. There are no basements present beneath the existing structures. The existing improvements were reportedly constructed in 1980.

At the time of inspection, the Subject Property was occupied by a 157-unit multifamily senior residential complex, including one eight-story, concrete slab-on-grade apartment building, attached to one-story leasing office/clubhouse building. With the exception of the administrative leasing office, there are currently no commercial or industrial operations conducted at the Subject Property.

Below is the Assessment Summary Table presenting our recommended actions for the Subject Property. EBI's Findings and Opinions are presented in Section 8.0, and recommendations for further action or investigation are presented in Section 9.0.

ASSESSMENT SUMMARY TABLE

Assessment Component	Section(s)	Recommended Actions	Estimated Cost
Historical Review	4.3	No Further Action	
Current Occupants / Operations	2.3, 5.0	No Further Action	
Hazardous Substances / Petroleum Products	5.2	No Further Action	
Waste Generation	5.3	No Further Action	
Storage Tanks	5.4	No Further Action	
PCBs	5.5	No Further Action	
Potential Off-site Sources	2.5, 4.1	No Further Action	
Regulatory Agency / Database Review	4.1	No Further Action	
Asbestos Containing Materials	7.1	Continue the implementation of the existing Asbestos Operations and Maintenance (O&M) Plan.	Action item

1.0 INTRODUCTION

This report documents the findings, opinions, and conclusions of a Phase I Environmental Site Assessment (ESA) of the property located at 2000 Miramar Street in Los Angeles, California.

1.1 PURPOSE

The purpose of this ESA was to identify *recognized environmental conditions* and certain environmental conditions outside the scope of ASTM Practice E 1527-13 in connection with the property at the time of the property reconnaissance.

1.2 SCOPE-OF-SERVICES

This ESA was conducted utilizing a standard of good commercial and customary practice that was consistent with the ASTM Practice E 1527-13. Any significant scope-of-work additions, deletions or deviations to ASTM Practice E 1527-13 are noted below or in the corresponding sections of this report. The scope-of-work for this assessment included an evaluation of the following:

- Physical characteristics of the Subject Property through a review of referenced sources for topographic, geologic, soils and hydrologic data.
- Subject Property history through a review of referenced sources such as land deeds, fire insurance maps, city directories, aerial photographs, prior reports, and interviews.
- Current Subject Property conditions, including observations and interviews regarding the following: the presence or absence of hazardous substances or petroleum products; generation, treatment, storage, or disposal of hazardous, regulated, or biomedical waste; equipment that utilizes oils which potentially contain PCBs; and storage tanks (aboveground and underground).
- Usage of surrounding area properties and the likelihood for releases of hazardous substances and petroleum products (if known and/or suspected) to migrate onto the Subject Property.
- Information in referenced environmental agency databases and local environmental records, within specified minimum search distances.
- Past ownership through a review of available prior reports and local municipal file review.

The scope-of-work also included consideration of the following potential environmental conditions that are outside the scope of ASTM Practice E 1527-13: asbestos-containing materials (ACM), radon, lead-based paint (LBP), lead in drinking water, mold, additional HUD factors, and vapor encroachment.

1.3 ASSUMPTIONS, LIMITATIONS AND EXCEPTIONS

This *Phase I Environmental Site Assessment* (the report) has been prepared for the use of *Jonathan Rose Companies* and the United States Department of Housing and Urban Development (HUD), in accordance with our Standard Conditions for Engagement and Authorization Letter and Agreement for Environmental Services approved and signed by *Jonathan Rose Companies*, and with the limitations described below, all of which are integral parts of this report. A copy of the signed Standard Conditions For Engagement and Authorization Letter and Agreement for Environmental Services is maintained at the EBI Consulting office in Burlington, Massachusetts.

DRAFT

EBI has performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of *ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* as well as the requirements of the United States Department of Housing and Urban Development (HUD) Multifamily Accelerated Processing (MAP) Guide, Revised August 18, 2011, pursuant to 223(f). This report was prepared with no exceptions or deletions from ASTM Standard E 1527-13.

This *Phase I Environmental Site Assessment* has been prepared to assess a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products. As such, this practice is intended to permit *Jonathan Rose Companies* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the Subject Property consistent with good commercial or customary practice" as defined in 42 U.S.C. § 9601(35)(B).

In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify *recognized environmental conditions*. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis conditions* that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions.

The information reported was obtained through sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property. Municipal information was obtained through review of reasonably ascertainable standard government record sources and interviews with the authorities having jurisdiction over the Subject Property. Findings, conclusions, and recommendations included in the report are based on our visual observations in the field, the municipal information reasonably obtained, information provided by the Client, and/or a review of readily available and supplied documents and drawings. EBI relies completely on the information, whether written, graphic, or verbal, provided by the Subject Property contact or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or municipal source, and assumes that information to be true and correct. Although there may have been some degree of overlap in the information provided by these various sources, EBI did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of these environmental services.

The observations in this report are valid on the date of the investigation. Where access to portions of the Subject Property or to structures on the Subject Property was unavailable or limited, EBI renders no opinion as to the presence of hazardous substances or petroleum products in that portion of the Subject Property or structure. Inaccessible portions of the Subject Property are described below. In addition, EBI renders no opinion as to the presence of, or indirect evidence relating to, hazardous

DRAFT

substances or petroleum products where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

It is acknowledged that EBI judgments shall not be based on scientific or technical tests or procedures beyond the scope of the Services or beyond the time and budgetary constraints imposed by the Client. It is acknowledged further that EBI conclusions shall not rest on pure science but on such considerations as economic feasibility and available alternatives. Client also acknowledges that, because geologic and soil formations are inherently random, variable, and indeterminate in nature, the Services and opinions provided under this Agreement with respect to such Services are not guaranteed to be a representation of actual conditions on the Subject Property, which are also subject to change with time as a result of natural or man-made processes, including water permeation. In performing the Services, EBI shall use that degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality. The standard of care shall be determined solely at the time the Services are rendered and not according to standards utilized at a later date. The Services shall be rendered without any other warranty, expressed or implied, including, without limitation, the warranty of merchantability and the warranty of fitness for a particular purpose.

Client and EBI agree that to the fullest extent permitted by law, EBI shall not be liable to Client for any special, indirect or consequential damages whatsoever, whether caused by EBI's negligence, errors, omissions, strict liability, breach of contract, breach of warranty or other cause or causes whatsoever.

The ASTM Standard E 1527-13 do not encompass analytical testing to evaluate asbestos containing materials, radon, lead-based paint, drinking water quality, indoor air quality, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA. Any analytical testing performed at the Subject Property has been conducted in accordance with the Standard Conditions for Engagement and Authorization Letter and Agreement for Environmental Services and the client-specific Scope of Work. Unless otherwise specified herein, such testing involves screening methods intended to provide a broad and approximate evaluation of conditions at readily accessible portions of the Subject Property, limited by project constraints, and should not be construed as a comprehensive program designed to comply with a specific regulatory program. If a thorough and regulatory-compliant study is warranted based on the findings of the Phase I ESA, EBI will recommend the appropriate further investigation. In certain cases, quantitative laboratory testing is performed as part of the assessment and analyses have been conducted by an outside laboratory. EBI relies upon the data provided by the outside laboratory, and has not conducted an independent evaluation of the reliability of this data.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The report speaks only as of its date, in the absence of a specific written update of the report, signed and delivered by EBI.

Additional information that becomes available after our survey and draft submission concerning the Subject Property should be provided to EBI so that our conclusions may be revised and modified if necessary, at additional cost. This report has been prepared in accordance with our Standard Conditions for Engagement, which is an integral part of this report.

DRAFT

1.4 SPECIAL TERMS AND CONDITIONS

This Phase I Environmental Site Assessment (the report) has been prepared to assist a lender to be selected by Jonathan Rose Companies in determining whether to make a loan evidenced by a note secured by the Subject Property. Reliance upon this report does not extend to entities or individuals interested in purchasing the Subject Property. Amendments to EBI's limitations as stated herein that may occur after issuance of the report are considered to be included in this report. EBI's liability to a purchaser wishing to use this report is limited to the cost of the report. Payment for the report is made by, and EBI's contract and report extends to Jonathan Rose Companies only, in accordance with our Standard Conditions For Engagement and, Authorization Letter and Agreement for Environmental Services.

1.5 DATA GAPS

Any data gaps identified herein, as defined by ASTM E 1527-13, are not considered to have significantly affected the ability to identify recognized environmental conditions in connection with the Subject Property and do not alter the conclusions of this report.

DRAFT

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 OWNERSHIP AND LOCATION

According to the Los Angeles County Assessor's Office, the Subject Property is currently owned by Towers Miramar Real Tech.

The Subject Property is located at 2000 Miramar Street in the City and County of Los Angeles, California. The Subject Property includes one irregular-shaped parcel, identified by the Los Angeles, California Assessor's Office as 5154-020-030, totaling approximately 2.77 acres. The Subject Property is located approximately 300 feet east of the intersection of Miramar Street and Alvarado Street. Figure 1 - Location Map depicts the location of the Subject Property on a street map of Los Angeles, California. Figure 2 - Locus Map depicts the location of the Subject Property on the Hollywood, California United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle. Figure 3 - Site Plan depicts the configuration of the Subject Property and adjoining properties.

2.2 SUBJECT PROPERTY IMPROVEMENTS

The Subject Property is currently improved with a 157-unit multifamily residential complex, including one eight-story, concrete slab-on-grade apartment building. Additional structures and amenities include the following: a one-story administrative leasing office and community recreation center, attached on the north exterior of the tower building. There are no basements present beneath the existing structures. The existing improvements were reportedly constructed in 1980.

The existing buildings are located on the central portion of the property. Areas of the Subject Property surrounding the existing building include the following: asphalt-paved surface parking, located along the northeast side and south side of the tower building; concrete driveway, located at the southeast side of the property, concrete walkways, located throughout the Subject Property; and landscaping surrounding the building. Land and building areas are as follows:

SUBJECT PROPERTY IMPROVEMENTS					
Address	**Floors**	**Basement**	**Area (SF)**	**DOC**	**Lot Size (Acres)**
Miramar Towers	8	No	132,600	1980	2.77
Leasing office/clubhouse building attached to the north exterior of the tower building	1	No	4,028	1980	Inclusive

SF: Gross Square Feet
DOC: Date of Construction

2.3 CURRENT USE OF THE SUBJECT PROPERTY

At the time of inspection, the Subject Property was occupied by 157-unit multifamily senior residential complex, including one eight-story, concrete slab-on-grade apartment building, attached to one-story leasing office/clubhouse building. With the exception of the administrative leasing office, there are currently no commercial or industrial operations conducted at the Subject Property.

Please refer to Section 5.2 for further discussion regarding hazardous substances and petroleum products at the Subject Property.

DRAFT

2.4 MUNICIPAL SERVICES & UTILITIES

The Subject Property is serviced by the following municipal services and utilities:

MUNICIPAL SERVICES AND UTILITIES	
Utility	**Provider/Source**
Potable Water Supply	Los Angeles Department of Water and Power
Sewage Disposal System	City of Los Angeles
Electrical Service	Los Angeles Department of Water and Power
Natural Gas Service	The Gas Company
Oil Service	Not applicable
Heating/Cooling Systems	Electric split system HVAC units for the leasing office/clubhouse. The tower building cooling system is comprised of a two-pipe chilled water system. Chilled water is produced by one 100-ton air-cooled chiller unit that is located on the roof.
Emergency Power	One 30 KW diesel fired emergency generator with a self-contained, 60-gallon fuel tank.

2.5 ADJOINING PROPERTIES

Property use in the vicinity of the Subject Property is primarily characterized by residential and retail/commercial development.

ADJOINING PROPERTIES	
North	The Subject Property is bound to the north by Miramar Street, beyond which is residential development.
South	The Subject Property is bound to the south by 3rd Street, beyond which are JJ Park Motel (1906 W. 3rd Street), office building (1920 W. 3rd Street), Westlake Plaza retail strip (1926 W. 3rd Street), and an undeveloped land to the south-southwest.
East	The Subject Property is bound to the east by residential development.
West	The Subject Property is bound to the west by eTown Inn (2020 Miramar Street) and apartment building (2007 W. 3rd Street).

No visual evidence of adverse environmental conditions was observed during the survey of the adjoining properties.

DRAFT

3.0 USER PROVIDED INFORMATION

The following section summarizes information provided by *Jonathan Rose Companies* with regard to this Phase I Environmental Site Assessment. Additionally, a User Questionnaire was forwarded to the designated Client contact. The User Questionnaire has been completed and returned to our offices. The information requested in the User Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. The User Questionnaire and any additional documentation referenced below is presented in Appendix C.

3.1 TITLE RECORDS

Title record information associated with the Subject Property has not been provided to EBI by *Jonathan Rose Companies*. A detailed discussion regarding review of information obtained from other sources is presented in Section 4.3.5 of this report.

3.2 ENVIRONMENTAL LIENS AND ACTIVITY AND USE LIMITATIONS

Jonathan Rose Companies provided no information regarding environmental liens or activity and use limitations in connection with the Subject Property. A detailed discussion regarding environmental liens is presented in Section 4.3.7 of this report. A detailed discussion regarding activity and use limitations is presented in Sections 4.1.1 and 4.1.2 of this report.

3.3 SPECIALIZED KNOWLEDGE

Jonathan Rose Companies provided no specialized knowledge that is material to recognized environmental conditions in connection with the Subject Property. EBI was not provided with or made aware of previous environmental assessments or other documentation that is material to recognized environmental conditions in connection with the Subject Property, except as presented in Section 4.3.8 of this report.

3.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Jonathan Rose Companies provided no commonly known or reasonably ascertainable information within the local community about the Subject Property that is material to recognized environmental conditions in connection with the Subject Property.

3.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

Jonathan Rose Companies provided no information regarding valuation reduction for environmental issues in connection with the Subject Property.

3.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

Jonathan Rose Companies provided contact information for the Subject Property owner, manager and/or occupants.

3.7 REASON FOR PERFORMING PHASE I ESA

Jonathan Rose Companies retained EBI to complete this Phase I Environmental Site Assessment in connection with a real estate transaction.

DRAFT

4.0 RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORDS

A review of standard environmental databases maintained by Federal, state, and tribal offices was completed through Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut The databases were searched for properties with reported environmental conditions located within approximate minimum search distances as specified by ASTM E 1527-13, by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded "orphan" properties within the same zip code. The database report is presented in Appendix F.

The database report identified eight "orphan sites." Orphan sites are those sites that could not be accurately mapped or geocoded due to inadequate location information. EBI attempted to locate these sites via vehicular reconnaissance and interviews with personnel familiar with the area. Based on this research, EBI did not identify listed orphan sites within the approximate minimum search distances that may be considered likely to have impacted conditions at the Subject Property.

It should be noted that plotted locations of listed sites are not always accurate. With regard to listings that are determined or suspected to be inaccurate, based on information from other sources such as direct observation or consultation with individuals familiar with the property, EBI uses the best available data when evaluating the location of listed sites discussed below.

The following table provides a summary of the findings of the environmental database report. Specific properties identified within the database report are further discussed below.

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS			
Regulatory Database	**Approximate Minimum Search Distance**	**Subject Property Listed**	**Off-site Listings Within Search Distance**

4.1.1 Federal Agency Database Records

National Priority List (NPL)
The NPL database, also known as the Superfund List, is a subset of CERCLIS and identifies sites that are ranked as high priority for remedial action under the Federal Superfund Act. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the NPL.

Delisted National Priority List (NPL)
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the Delisted NPL database.

Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)
CERCLIS contains data regarding potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability ACT (CERCLA). CERCLIS contains sites that are included on the National Priority List (NPL), as well as sites which are in the screening and assessment phase for possible inclusion on the NPL. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the CERCLIS database.

DRAFT

CERCLIS – No Further Remedial Action Planned (CERCLIS-NFRAP)
As of February 1995, CERCLIS sites designated as No Further Remedial Action Planned (NFRAP) have been removed from the CERCLIS list. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed without the need for the site to be placed on the NPL, or the contamination was not considered sufficient to warrant Federal Superfund action or NPL consideration. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the CERCLIS-NFRAP database.

Resource Conservation and Recovery Act (RCRA) – Corrective Action Tracking System (CORRACTS)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information regarding sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. The RCRA-CORRACTS database identifies TSD facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the RCRA CORRACTS database.

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) Facilities
RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) facilities are required to register hazardous waste activity under the Resource Conservation and Recovery Act (RCRA). Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the RCRA non-CORRACTS TSD database.

RCRA Hazardous Waste Generators
Hazardous waste generators tracked under the Resource Conservation and Recovery Act (RCRA) are classified as either Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQG). A RCRA-LQG is defined as a facility that generates over 1,000 kilograms (Kg) of hazardous waste, or over 1 Kg of acutely hazardous waste per month. A RCRA-SQG is defined as a facility that generates between 100 Kg and 1,000 Kg of hazardous waste per month. A RCRA-CESQG is defined as a facility that generates less than 100 Kg of hazardous waste, or less than 1 Kg of acutely hazardous waste per month. Neither the Subject Property nor any adjoining properties were identified on the RCRA Generator database.

Federal Engineering Control / Institutional Control Registries
The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on Federal Engineering Control or Institutional Control Registries.

Emergency Response Notification System (ERNS)
ERNS is a national database used to collect information regarding reported releases of petroleum products and/or hazardous substances. The database contains information from spill reports submitted to Federal agencies, including the EPA, the U.S. Coast Guard, the National Response Center, and the

DRAFT

U.S. Department of Transportation. A review of this database was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property. The Subject Property was not identified on the ERNS database.

4.1.2 State and Tribal Agency Database Records

Annual Workplan Sites (AWP)
The California Department of Toxic Substance Control (DTSC) Annual Workplan Sites (AWP) identifies known hazardous substance release sites targeted for cleanup. The data source is the California Environmental Protection Agency. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the AWP database.

California High-Priority Confirmed Release Sites (RESPONSE)
The California High-Priority Confirmed Release Sites (RESPONSE) database contains confirmed release sites where the California Department of Toxic Substance Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the RESPONSE database.

California Hazardous Waste Sites (ENVIROSTOR)
The California Hazardous Waste Sites (ENVIROSTOR) database contains potential or confirmed hazardous substance release sites, or sites for which there may be reasons to investigate further, identified by the California DTSC. The database includes the following site types: Federal NPL; State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. The Subject Property was not identified on the ENVIROSTOR database. However, 22 sites located within 1.0 mile of the Subject Property were identified on the ENVIROSTOR database. Of these site, 19 are located more than 0.50 miles from the Subject Property. Based on distance from the Subject Property, these 19 sites are not anticipated to impact the environmental integrity of the Subject Property. Information regarding the remaining three listed sites is presented in the following table:

ENVIROSTOR			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
Central Los Angeles High School No.9 450 South Grand View Street Los Angeles, California	0.334 miles / West-northwest / Crossgradient	19730194	Notification Date: 02/10/2000 Contaminants: Total chromium, nickel, arsenic, others Media Impacted: Soil Status: No further action Date of Closure: 11/19/2004
Iglesia Ni Cristo 141 North Union Avenue Los Angeles, California	0.347 miles / East-northeast / Upgradient	60001080	Notification Date: 07/29/2009 Contaminants: Lead Media Impacted: Soil Status: No further action Date of Closure: 10/08/2009
West Fourth Street Site 2424 West 4th Street Los Angeles, California	0.359 miles / West / Downgradient	19490210	Notification Date: 09/20/1990 Contaminants: Not reported Media Impacted: Not reported Status: Refer to other agency Date of Closure: NA

* Presumed hydrogeologic gradient based upon regional topography

DRAFT

Based upon the current regulatory status and/or distance/presumed hydrogeologic gradient relative to the Subject Property, and/or reported nature/extent of contamination, it is considered unlikely that conditions associated with the identified ENVIROSTOR sites represent an environmental concern to the Subject Property.

Proposition 65 Notification Records
Proposition 65 Notification Records contain facility notifications regarding any release that could potentially impact drinking water and thereby expose the public to a potential health risk. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the Proposition 65 Notification database.

Toxic Pits Cleanup Act Sites (Toxic Pits)
The Toxic Pits Cleanup Act Sites (Toxic Pits) database contains sites identified by the California Water Resources Control Board that are suspected to contain hazardous substances where cleanup has not yet been completed. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the Toxic Pits database.

California Bond Expenditure Plan
The California Bond Expenditure Plan was developed by the California Department of Health Services as a site-specific expenditure plan for the appropriation of Hazardous Substance Cleanup Bond Act funds. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the California Bond Expenditure Plan database.

Hazardous Waste and Substances Sites List (Cortese)
The Hazardous Waste and Substance Site List (also known as the Cortese List) is a planning document used by the State, local agencies, and developers to comply with California Environmental Quality Act requirements in providing information regarding the location of hazardous materials releases. Government Code Section 65962.5 requires the California Environmental Protection Agency to develop at least annually an updated Cortese List. The California Department of Toxic Substance Control (DTSC) is responsible for preparing a portion of the information that comprises the Cortese List, and other state and local government agencies are required to provide additional hazardous material release information for the Cortese List. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the Cortese List.

Spill, Leaks, Investigations, and Cleanup (SLIC)
The Spills, Leaks, Investigations, and Cleanups (SLIC) database, maintained by the California Water Resources Control Board, includes unauthorized discharges from spills and leaks, other than from underground storage tanks or other regulated sites. The Subject Property was not identified on the SLIC database. However, one site located within 0.5 mile of the Subject Property was identified on the SLIC database. Information regarding the listed site is presented in the following table:

SLIC			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
Furbert Property 2016 Temple Los Angeles, California	0.493 miles / North-northeast Crossgradient	SL204FM2481	Notification Date: Not reported Contaminants: TPH Media Impacted: Not reported Status: Case closed Date of Closure: 06/10/2002

* Presumed hydrogeologic gradient based upon regional topography

DRAFT

Based upon the current regulatory status and distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified SLIC site represent an environmental concern to the Subject Property.

Voluntary Cleanup Program (VCP) Properties

The Voluntary Cleanup Program (VCP) Properties database identifies low threat level properties with either confirmed or unconfirmed releases, for which the project proponents have requested that Department of Toxic Substances Control (DTSC) oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs. The Subject Property was not identified on the VCP database. However, one site located within 0.5 mile of the Subject Property was identified on the VCP database. Information regarding the listed site is presented in the following table:

VCP			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
Ignesia Ni Cristo 401 North Union Avenue Los Angeles, California	0.52 miles / South / Upgradient	60001080	Responsible Party: Iglesia Ni Crsito Notification Date: 07/29/2009 Contaminants: Lead Media Impacted: Soil Status: No further action Date of Closure: 10/08/2009

* Presumed hydrogeologic gradient based upon regional topography

Based upon the current regulatory status, distance/presumed hydrogeologic gradient relative to the Subject Property, and/or reported nature/extent of contamination, it is considered unlikely that conditions associated with the identified VCP site represent an environmental concern to the Subject Property.

Regional Water Quality Control Board (RWQCB) – Leaking Underground Storage Tanks (LUST)

The Regional Water Quality Control Board (RWQCB) maintains a database of reported Leaking Underground Storage Tank (LUST) Sites. The Subject Property was not identified on the RWQCB – LUST database. However, 18 sites located within 0.5 mile of the Subject Property were identified on the RWQCB – LUST database. Of these sites, 13 are located more than 0.25 miles from the Subject Property. Three of the remaining five sites have case closed status and the nearest site is located approximately 0.218 miles from the Subject Property. Based on the current regulatory status and distance from the Subject Property, these 16 LUST sites are not anticipated to impact the environmental integrity of the Subject Property. Information regarding the remaining two listed sites is presented in the following table:

RWQCB – LUST			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
H & S Food & Gas 2000 West 3rd Street Los Angeles, California	Adjacent/ South- southwest Downgradient	T0603701135	Notification Date: 04/18/1990 Contaminants: Gasoline Media Impacted: GW Status: Case closed Date of Closure: 10/15/2015

DRAFT

RWQCB – LUST			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
Shell #204-4532-4609 230 S. Alvarado Street Los Angeles, California	0.121 miles / West-southwest Downgradient	T060301130	Notification Date: 11/10/1986 Contaminants: Gasoline Media Impacted: GW Status: Case closed Date of Closure: 10/09/1996

* Presumed hydrogeologic gradient based upon regional topography

According to the 2015 closure report (obtained from the Geotracker) for the H & S facility, the groundwater flow direction is to the southwest. There are no monitoring wells installed along 3rd Street, south of the Subject Property. Based on the current regulatory status and actual groundwater flow direction, the H & S facility is not anticipated to impact the environmental integrity of the Subject Property.

Based upon the current regulatory status and distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified remaining LUST site represent an environmental concern to the Subject Property.

Facility Inventory Database (FID UST)

The California Environmental Protection Agency maintains a Facility Inventory Database (FID), which contains a historical registry of active and inactive underground storage tank (UST) locations reported by the California Water Resource Control Board. The Subject Property was not identified on the FID UST database. However, two adjoining properties were identified on the FID UST database. Information regarding the listed sites is presented in the following table:

FID UST				
Location	**Distance / Direction / Gradient***	**Capacity / Contents**	**Year Installed**	**Status**
St. Vincent Medical Center 2021 Miramar Street Los Angeles, California	Adjacent / North-northwest Crossgradient	Not reported	Not reported	Inactive
Alvarado II Incorporated 2000 W. 3rd Street Los Angeles, California	Adjacent / South-southwest / Downgradient	Not reported	Not reported	Inactive

* Presumed hydrogeologic gradient based upon regional topography

The 2000 W. 3rd Street facility is listed in the LUST database under H & S Food & Gas with same site address and further discussed in the LUST section above.

Based upon the absence of reported releases and/or distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified the remaining FID UST site represent an environmental concern to the Subject Property.

Hazardous Substance Storage Container Database (HIST UST)

The Hazardous Substance Storage Container Database is a historical listing of UST sites maintained by the California Water Resources Control Board. Neither the Subject Property nor any adjoining properties were identified on the HIST UST database.

DRAFT

Statewide Environmental Evaluation and Planning System (SWEEPS)
The Statewide Environmental Evaluation and Planning System (SWEEPS) is an underground storage tank database that was updated and maintained by a company contacted by the State Water Resource Control Board in the early 1980s. The listing no longer updated or maintained. The Subject Property was not identified on the SWEEPS database. However, two adjoining properties were identified on the SWEEPS database. Information regarding the listed sites is presented in the following table:

SWEEPS				
Location	**Distance / Direction / Gradient***	**Capacity / Contents**	**Year Installed**	**Status**
St. Vincent Medical Center 2021 Miramar Street Los Angeles, California	Adjacent / North-northwest Crossgradient	Not reported	Not reported	Not reported
Alvarado II Incorporated 2000 W. 3rd Street Los Angeles, California	Adjacent / South-southwest / Downgradient	Not reported	Not reported	Not reported

* Presumed hydrogeologic gradient based upon regional topography

The 2000 W. 3rd Street facility is listed in the LUST database under H & S Food & Gas with same site address and further discussed in the LUST section above.

Based upon the absence of reported releases and/or distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified the remaining SWEEPS site represent an environmental concern to the Subject Property.

Solid Waste Information System (SWIS)
Solid Waste Information System (SWIS) records typically contain an inventory of solid waste facilities or landfills identified by the Integrated Waste Management Board. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the SWIS database.

Waste Management Unit Database / Solid Waste Assessment Test (WMUDS/SWAT)
The Waste Management Unit Database (WMUDS) is used by the California Water Resources Control Board and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the WMUDS/SWAT database.

California Hazardous Material Incident Report System (CHMIRS)
The California Hazardous Material Incident Report System (CHMIRS) contains information regarding reported hazardous material incidents (i.e. accidental releases or spills). The data source is the California Office of Emergency Services. The Subject Property was not identified on the CHMIRS database.

DRAFT

Hazardous Waste Information system (HAZNET)

The California Environmental Protection Agency maintains a list of facilities that issue hazardous waste manifests. The source of the manifest records is the California Department of Toxic Substance Control (DTSC). Inclusion on the HAZNET database does not necessarily indicate the existence of an environmental concern, such as a release or spill incident. The Subject Property was not identified on the HAZNET database.

Site Mitigation and Brownfields Reuse Program (SMBRP) Facility Sites with Deed Restrictions & Hazardous Waste Management Program (HWMP) Facility Sites with Deed / Land Use Restriction

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under SMBRP's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. This list represents deed restrictions that are currently active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future property owners. The Subject Property was not identified on SMBRP or HWMP Deed Restriction or Land Use Restriction Registries. However, two sites located within 0.5 mile of the Subject Property were identified on SMBRP or HWMP Deed Restriction or Land Use Restriction Registries. Information regarding the listed sites is presented in the following table:

SMBRP / HWMP DEED RESTRICTION OR LAND USE RESTRICTION REGISTRIES			
Site	**Distance / Direction / Gradient**	**ID No.**	**Regulatory Status**
Burlington Gardens 409, 411, 415 S. Burlington Los Angeles, California	0.222 miles / South / Downgradient	11446	Notification Date: Not reported Contaminants: Not reported Media Impacted: Not reported Status: Not reported Date of Closure: Not reported
Burlington Park 456, 408 S. Burlington Los Angeles, California	0.284 miles / South / Downgradient	11447	Notification Date: Not reported Contaminants: Not reported Media Impacted: Not reported Status: Not reported Date of Closure: Not reported

* Presumed hydrogeologic gradient based upon regional topography

Based upon the distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified sites represent an environmental concern to the Subject Property.

Tribal Environmental Databases

The United States Bureau of Indian Affairs (BIA) is responsible for the administration and management of 55.7 million acres of land held in trust by the United States for American Indians, Indian tribes, and Alaska Natives. There are 562 federally recognized tribal governments in the United States. The environmental database report identifies tribal administered lands of the United States that have any area equal to or greater than 640 acres. No tribal administered lands were identified within 1.0 mile of the Subject Property.

DRAFT

4.1.3 Local Regulatory Agency Records

Local municipal offices consulted during the completion of this assessment included the following: City of Los Angeles Building and Safety Department and Fire Department - Fire Prevention Division. EBI did not identify documented adverse environmental conditions, violations, or complaints associated with the Subject Property. EBI did not identify records of spills or releases of hazardous substances or petroleum products having occurred at the Subject Property.

City of Los Angeles Building and Safety Department
EBI reviewed available files regarding the Subject Property at the City of Los Angeles Building and Safety Department Records Division for information regarding past uses of the Subject Property. The original building permits and certificates of occupancy for the existing building indicates that the building was constructed in 1980. Building permits for general tenant improvments were additionally on file for the Subject Property. Building Department records indicate that the previous hotel buildings were demolished in 1974, prior to construction of the existing senior residential building. The review of Building Department records did not identify past uses of the Subject Property that would constitute a recognized environmental condition.

City of Los Angeles Fire Department - UST Section
EBI contacted Ms. Katie Rosas of the City of Los Angeles Fire Department, UST Section to request available information regarding the existing or historic USTs or ASTs associated with the Subject Property. Ms. Rosas reported that no records regarding USTs were on file for the Subject Property.

City of Los Angeles Fire Department Hazardous Materials Management Division
EBI contacted Ms. Angenee Reygadas of the City of Los Angeles Fire Department Hazardous Materials Management Division to request available information regarding the hazardous materials associated with the Subject Property. Ms. Reygadas reported that no records regarding hazardous substances or petroleum products, spills or releases, or violations were on file for the Subject Property.

4.2 PHYSICAL SETTING

4.2.1 Topography

The Subject Property is located at an elevation of approximately 395 feet above mean sea level (msl). The topography of the Subject Property slopes moderately to the south. The Subject Property is located in a moderately sloping area, and the general slope of the surrounding region is to the south-southwest (see Figure 2 - Locus Map, which depicts the location of the Subject Property on the Hollywood, California USGS 7.5 Minute Topographic Quadrangle).

4.2.2 Geology and Soils

No bedrock outcroppings were observed at the Subject Property. Information concerning the geology of the Subject Property was obtained from the USGS Ground Water Atlas of the United States, California region (1995). The Subject Property is located within the Lower Californian physiographic province, which consists of coastal mountain ranges underlain by severely folded, faulted, commonly metamorphosed marine and continental sediments.

According to the Soil Survey of Los Angeles County, the dominant soil composition in the vicinity of the Subject Property is classified as Diablo-Altamont Association, 2 to 9 percent slopes (map 34). This soil consists of deep, well-drained soils consisting of dark gray clay and dark grayish-brown clay. The Diablo soil extends to a depth of 52 inches below ground surface (bgs) and 36 inches bgs for Altamont. Diablo-

DRAFT

Altamont soils are neutral. Permeability is slow, and the available water capacity is low to moderate. The depth to bedrock is not provided.

4.2.3 Hydrogeology and Hydrology

No natural surface water bodies were identified on or adjacent to the Subject Property. The nearest downgradient surface water body is the Ballona Creek, located approximately five miles southwest of the Subject Property.

Local groundwater gradient is expected to follow surface topography; therefore, groundwater flow near the Subject Property is expected to flow to the southwest. Groundwater depths and flow gradients are best evaluated by a subsurface investigation involving the installation of at least three groundwater monitoring wells and precise measurements of hydrostatic pressure. Monitoring wells were not observed on the Subject Property.

4.3 HISTORICAL USE OF THE SUBJECT PROPERTY AND ADJOINING PROPERTIES

EBI attempted to determine the history of the Subject Property dating back to 1940 or first developed use. The following table summarizes the historical use of the Subject Property and surrounding area.

HISTORICAL USE SUMMARY			
Period	**Historical Uses**		**Source(s)**
	Subject Property	**Surrounding Area**	
At least 1894-1906	Undeveloped and single-family dwellings.	Primarily Undeveloped; limited single-family residential development.	Fire Insurance Maps Topographic Maps
1907-1974	Hotel and single-family dwellings.	Single and multi-family residential and commercial development.	Aerial Photographs Fire Insurance Maps Topographic Maps City Directories Municipal Records
1975-1979	Undeveloped land and single-family dwellings	Single and multi-family residential and commercial development.	Aerial Photographs City Directories Municipal Records
1980 to Present	Existing senior housing development.	Single and multi-family residential and commercial development.	Aerial Photographs City Directories Municipal Records

No environmentally significant conditions were identified on the Subject Property. However, two former gas stations were located to the south-southwest of the Subject Property. One of the gas stations was replaced by a retail strip center and the other former gas station was observed as undeveloped land. The H & S gas station is discussed in the LUST section. The other gas station is not listed in the UST or LUST databases. These gas stations are located across 3rd Street and topographically downgradient from the Subject Property.

4.3.1 Aerial Photographs

Historical aerial photographs may be used to evaluate changes in land use and to identify visible areas of potential environmental concern. A search for historical aerial photographs depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). Aerial photographs depicting the Subject Property were reviewed and are summarized in the following table. Copies of the aerial photographs are presented in Appendix G.

AERIAL PHOTOGRAPH SUMMARY		
Year	**Issues Noted**	**Observations**
1923 1928	No	**Subject Property:** The Subject Property appears to consist of three large commercial structures located on the northern portion of the site. Five small residential structures are depicted on the southern portion of the Subject Property.
		Surrounding Area: Surrounding properties to the east, and west are residential structures. A public roadway, trending southeast to northwest, is visible to the north and south of the Subject Property, beyond which are residential buildings. An undeveloped land is depicted to the north-northeast of the Subject Property.
1938	No	**Subject Property:** Conditions on the Subject Property appear to be similar to those depicted on the 1923 and 1928 photographs.
		Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1923 and 1928 photographs. Additionally, a gas station type structure is depicted to the south-southwest and undeveloped land to the south of the Subject Property.
1948	No	**Subject Property:** Conditions on the Subject Property appear to be similar to those depicted on the 1938 photograph.
		Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1938 photograph. Additionally, a gas station type structure is depicted to the south of the Subject Property.
1952 1964	No	**Subject Property:** Conditions on the Subject Property appear to be similar to those depicted on the 1948 photograph.
		Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1948 photograph. Additionally, apartment buildings are depicted to the north-northeast of the Subject Property.
1970	No	**Subject Property:** The southern portion of the Subject Property is depicted as undeveloped land. Three large commercial structures are depicted on the northern portion of the Subject Property.
		Surrounding Properties: Conditions on the surrounding properties appear to be similar to those depicted on the 1952 and 1964 photographs. An L-shaped commercial building is depicted to the south of the Subject Property, from a former site of a gas station.
1977	No	**Subject Property:** The majority of the site is depicted as undeveloped land. Two small residential buildings are depicted on the southeastern portion of the Subject Property.
		Surrounding Properties: Conditions on the surrounding properties appear to be similar to those depicted on the 1977 photograph.
1983 1989 1994 2002 2005 2009 2010 2012	No	**Subject Property:** Conditions on the Subject Property are depicted as they exist at the present day. The high-rise building is located on the central portion and the one-story leasing office/clubhouse building is depicted on the northern portion of the site.
		Surrounding Properties: Conditions on the surrounding properties appear to be similar to those depicted on the 1977 photograph.

4.3.2 Fire Insurance Maps

A search for historical fire insurance maps depicting the Subject Property and vicinity was conducted by EDR Sanborn Maps, Inc. Historical fire insurance maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of the fire insurance maps are presented in Appendix G.

FIRE INSURANCE MAP SUMMARY

DRAFT

Year	Issues Noted	Observations
1906	No	**Subject Property:** The Subject Property is occupied by five single-family dwellings, three detached garages, and undeveloped lots on the northwestern and northeastern portions of the Subject Property.
		Surrounding Properties: Features depicted on surrounding properties included Miramar Street and undeveloped land located on the northern adjacent property, two single-family dwellings with detached garages and undeveloped land located on the eastern adjacent property, Ocean View Avenue and a single-family dwelling located on the southern adjacent property, a single-family dwelling and a detached garage located on the western adjacent property.
1950 1953 1955 1958	**Yes**	**Subject Property:** The Subject Property is occupied by Barker Hotel and three single-family dwellings located on the eastern portion of the site.
		Surrounding Properties: Features depicted on surrounding properties included Miramar Street and single and multi-family residential dwellings located on the northern adjacent property; single and multi-family dwellings on the eastern adjacent property; single and multi-family dwellings, stores, and gas stations located on the southern adjacent property; Barker Hotel and a multi-family dwelling located on the western adjacent property.
1960 1962 1963	**Yes**	**Subject Property:** Conditions on the Subject Property are similar to those as depicted on the 1950 to 1958 maps, with missing two structures on the southern portion of the Subject Property. Barker Hotel occupies the eastern portion of the Hotel and New Miramar Hotel occupies the majority of the northern portion of the site.
		Surrounding Properties: Conditions on the surrounding properties are similar to those as depicted on the 1950 to 1958 maps.
1967	**Yes**	**Subject Property:** Conditions on the Subject Property are similar to those as depicted on the 1960 to 1963 maps.
		Surrounding Properties: Conditions on the surrounding properties are similar to those as depicted on the 1960 to 1963 maps. The gas station on the southern adjacent property was replaced by an L-shaped commercial building. One gas station still exist to the south-southwest of the Subject Property.
1968 1970	**Yes**	**Subject Property:** Conditions on the Subject Property are similar to those as depicted on the 1967 map. However, the Barker Hotel located on the southeastern of the site is no longer depicted.
		Surrounding Properties: Conditions on the surrounding properties are similar to those as depicted on the 1967 map.

4.3.3 Topographic Maps

Historical topographic maps provide information related to physical land configuration such as elevation, ground slope, surface water and other features. While most buildings in densely developed urban centers are not depicted, topographic maps typically show structures equal to or larger than the size of a single-family residence in rural areas. Other notable features such as woods, pipelines, municipal boundaries, and areas of filled land are often marked on topographic maps.

A search for historical topographic maps depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). Historical topographic maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of the topographic maps are presented in Appendix G.

TOPOGRAPHIC MAP SUMMARY		
Year	**Issues Noted**	**Observations**
1898	No	**Subject Property:** No structures or other notable features are depicted on the Subject

TOPOGRAPHIC MAP SUMMARY		
Year	**Issues Noted**	**Observations**
1900		Property. A portion of the existing 3rd Street is depicted to the south of the Subject Property.
		Surrounding Properties: Surrounding properties to the north, east, south, and west are primarily small residential structures.
1921 1928	No	**Subject Property:** Eight small residential-type structures located on the northern and southern portion of the site.
		Surrounding Properties: Surrounding properties are primarily depicted as small residential structures. The existing Miramar Street, trending southeast to northwest, is depicted to the north. The existing 3rd Street, trending southeast to northwest, is depicted to the south of the Subject Property.
1953 1966 1972 1981 1991	No	**Subject Property:** The Subject Property is shaded to represent urban development; no distinct structures or other notable features are depicted.
		Surrounding Properties: The surrounding properties are shaded to represent urban development; no distinct structures or other notable features are depicted.

4.3.4 Street Directories

Street directories are commercial publications containing names and addresses, and in many cases, occupations of the occupants of a particular community. The directories may also contain information pertaining to business processes conducted within a community. A search for historical street directories was conducted by Environmental Data Resources, Inc. (EDR). Historical street directories were reviewed and are summarized in the following table. Copies of the street directories are presented in Appendix G.

STREET DIRECTORY SUMMARY		
Year	**Issues Noted**	**Occupants**
1924	No	Subject Property is listed as Miramar Terrace Apartments and names of individuals. Surrounding properties are listed with names of individuals.
1929	No	Subject Property is listed as Miramar Terrace Hotel and names of individuals. Surrounding properties are listed with names of individuals.
1933	No	Subject Property is listed as Barker Hotel and names of individuals. Surrounding properties are listed with names of individuals.
1937	No	Subject Property is listed as Barker Hotel and names of individuals. Surrounding properties are listed with names of individuals.
1942	No	Subject Property is listed as Barker Hotel and names of individuals. Surrounding properties are listed with names of individuals.
1951	No	Subject Property is listed as Miramar Barker Hotel and names of individuals. Surrounding properties are listed with names of individuals.
1958	No	Subject Property is listed as Barker Hotel and names of individuals. Surrounding properties are listed with names of individuals.
1962	No	Subject Property is listed as New Miramar Hotel and names of individuals. Surrounding properties are listed with names of individuals.
1967	No	Subject Property is listed as New Miramar Hotel, New Miramar Hotel & Apartments, and names of individuals. Surrounding properties are listed with names of individuals.
1971	No	Subject Property is listed as New Miramar Hotel, New Miramar Hotel & Apartments, and names of individuals. Surrounding properties are listed with names of individuals.
1981	No	Subject Property is listed with names of individuals. Surrounding properties are listed with names of individuals.

DRAFT

STREET DIRECTORY SUMMARY		
Year	**Issues Noted**	**Occupants**
1986	No	Subject Property is listed as Forest City Management and names of individuals. Surrounding properties are listed with names of individuals.
1990	No	Subject Property is listed as Forest City Management and names of individuals. Surrounding properties are listed with names of individuals.
2000	No	Subject Property is listed as Miramar Towers and names of individuals. Surrounding properties are listed with names of individuals.
2006	No	Subject Property is listed as Miramar Towers and names of individuals. Surrounding properties are listed with names of individuals.
2013	No	Subject Property is listed as Miramar Towers. Surrounding properties are listed with names of individuals.

4.3.5 Recorded Land Title Records

Land title records provide information on previous ownership of a property. Typically, deeds signifying transfer of a land parcel are recorded in county files and can be researched to determine the identity of past owners. A "chain of title" is a continuous record of ownership for a specific parcel. A 50-year chain of title search was not included in the scope of work for this assessment.

4.3.6 Property Tax Records

The property information for the Subject Property was obtained at the Los Angeles County Assessor's Office. The property information identifies the current owner as Towers Miramar Real Tech, which acquired the Subject Property in 1984. Assessor's Office records indicate that the existing building was constructed in 1979. A listing of the former Subject Property owners was not available for review.

4.3.7 Environmental Liens and Activity and Use Limitations

A search for Environmental Liens and Activity and Use Limitations was not included in the scope of this assessment.

4.3.8 Previous Environmental Reports

EBI was not provided with or made aware of previous environmental assessments or other documentation regarding environmental investigations performed for the Subject Property. EBI did not identify previous environmental reports for the Subject Property at local agencies or other sources contacted during this assessment.

DRAFT

5.0 SUBJECT PROPERTY RECONNAISSANCE

The Subject Property reconnaissance was conducted by Mr. Renato Nalupa, EBI Field Assessor, on February 19, 2016. Mr. Nalupa was accompanied by Mr. Alfredo Torres, Maintenance Custodian and Mr. Jordan Moreno, Maintenance Supervisor and interviewed Ms. Pamela Roberson, the Subject Property Manager.

5.1 METHODOLOGY AND LIMITING CONDITIONS

The Subject Property reconnaissance consisted of visual and/or physical observations of the Subject Property and improvements, adjoining properties as viewed from the Subject Property boundaries, and the surrounding area based on visual observations made from adjacent public thoroughfares. Building exteriors were observed along the perimeter from the ground, unless described otherwise. Building interiors were observed as they were made safely accessible, unless described otherwise.

At the time of the survey, the weather was sunny and approximately 75° Fahrenheit. During the survey, representative common areas, apartments units, mechanical spaces, and/or equipment and building components were observed, and approximately 26% of the units were surveyed. There were no significant portions of the Subject Property that were inaccessible or excluded from this survey.

5.2 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

5.2.1 Hazardous Substances and Petroleum Products (Identified Uses)

Notable hazardous substances or petroleum products in connection with identified uses observed at the Subject Property are described below.

HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS			
General Type of Material	**Approximate Quantity / Container / Material**	**Location**	**Storage Condition**
Cleaning Compounds and Janitorial Supplies	Various sized containers, ranging from aerosol cans to five-gallon pails	Storage room and apartment kitchens	Good: No leaks or spills

EBI did not identify evidence of significant leaks, spills, or the improper handling of petroleum or hazardous substances that might impact the environmental condition of the Subject Property.

5.2.2 Hazardous Substances and Petroleum Products (Unidentified Uses)

EBI did not observe evidence of hazardous substance or petroleum products containers at the Subject Property that were not in connection with identified uses.

5.2.3 Unidentified Substances Containers

EBI did not observe evidence of unidentified substances containers at the Subject Property.

5.3 WASTE GENERATION, STORAGE, AND DISPOSAL

EBI identified the following waste streams generated at the Subject Property:

WASTE GENERATION, STORAGE, AND DISPOSAL

DRAFT

Classification	Type of Waste / Generation Process	Type of Storage / Location	Disposal Method / Contractor
Non-regulated Solid Waste	Municipal Solid Waste / Routine Site Operations	1 Solid Waste Dumpster (Placed at curb-side)	Republic
Non-regulated Liquid Waste	Sanitary Sewage / Routine Site Operations	NA (Municipal Sanitary Sewer)	City of Los Angeles
Regulated Solid or Liquid Waste	None identified	NA	NA
Biomedical Waste	None identified	NA	NA

No evidence of improper solid waste management or the improper disposal of hazardous substances or petroleum products was observed at the time of reconnaissance.

5.4 UNDERGROUND STORAGE TANKS (USTS) & ABOVEGROUND STORAGE TANKS (ASTS)

5.4.1 Existing Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI did not identify the presence of USTs and ASTs at the Subject Property. However, one 2,500-gallon and two 200-gallon hot water tanks are located on the roof adjacent to the hot water boilers.

5.4.2 Former Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of USTs or ASTs formerly having been located at the Subject Property.

5.5 OIL-CONTAINING EQUIPMENT AND POLYCHLORINATED BIPHENYLS (PCBS)

Polychlorinated biphenyls (PCBs) are a chemical component of many dielectric fluids, heat transfer fluids, hydraulic fluids, lubricating oils, paints, or coatings manufactured prior to July 2, 1979. Equipment that may potentially contain PCBs includes electrical equipment such as transformers or capacitors or hydraulically operated equipment, such as elevators, compaction equipment, or manufacturing equipment. The manufacture and distribution in commerce of PCBs was banned for use in 1979 by the United States Congress, which enacted the Toxic Substance and Control Act (TSCA). In accordance with *US Code of Federal Regulations Title 40 - Protection of Environment, Chapter I - Environmental Protection Agency, Subchapter R - Toxic Substance Control Act (TSCA), Part 761 - Polychlorinated Biphenyls (PCBs) Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions*, the owner of a transformer or other PCB-containing equipment is responsible for equipment maintenance and remediation in the event of a leak or release.

Based upon the date of construction and upgrades, no potential PCB-containing equipment was identified at the Subject Property. However, the following oil-containing equipment was identified at the Subject Property:

OIL-CONTAINING EQUIPMENT			
Classification	**Type of Equipment**	**Year Installed / Location**	**Staining / Releases Identified**
Transformers and Fluid-Containing Electrical Equipment	(1) Pad-mounted Electrical Transformer [Los Angeles Department of Water and Power]	In an enclosure at south parking lot	No

DRAFT

OIL-CONTAINING EQUIPMENT			
Classification	**Type of Equipment**	**Year Installed / Location**	**Staining / Releases Identified**
Hydraulic Equipment	(2) 3,500-pound passenger elevators	2008 (modernization) / Main lobby	No
	(1) 3,500-pound freight elevator	2008 (modernization)/ Main lobby	No
Other Oil-containing Equipment	None identified	NA	NA

5.6 ADDITIONAL SITE CONDITIONS

The following is a summary of visual and/or physical observations of the Subject Property on the day of the site visit. Photographs of pertinent Subject Property features are presented in Appendix A.

ADDITIONAL SITE CONDITIONS	
Condition	**Identified**
Interior Drains, Trenches, or Sumps	**Yes**
Interior Stains or Corrosion	No
Unusual Odors	No
Interior Pools of Liquid	No
Stained Soil or Pavement	**Yes**
Stressed Vegetation	No
Indications of Solid Waste Disposal	No
Exterior Pits, Ponds, or Lagoons	No
Wastewater or Stormwater Discharge/Disposal	**Yes**
Oil-Water Separators or Clarifiers	No
Septic Systems or Cesspools	No
Wells (Drinking Water Wells, Monitoring Wells, Agricultural/Irrigation Wells, or Process Water Wells)	No
Petroleum or Natural Gas Pipelines/Easements	No
Sink Holes	No

Floor drains were observed in the laundry room and public restroom. The floor drains reportedly discharge to the municipal sewer system. No staining or other evidence of a release of hazardous substances or petroleum products was observed in the vicinity of the floor drains.

Minor staining was observed on the concrete floor of the emergency generator. The staining encompass an area of approximately one square foor. No floor drains, cracks, penetrations, or other potential pathways to the subsurface were observed at this location.

The ground surface outside the building is relatively flat and the north side and moderately sloping on the south side. Stormwater runoff from the asphalt-paved parking areas adjacent to the north and south sides of the existing building discharges to catch basins located throughout. The catch basins are associated with the municipal stormwater sewerage system, operated by the City of Los Angeles.

DRAFT

6.0 INTERVIEWS

The following persons were interviewed to obtain information regarding recognized environmental conditions in connection with the property. Additionally, a Pre-Survey Questionnaire was forwarded to the designated Subject Property contact. The Pre-Survey Questionnaire has been completed and returned to our offices. The information requested in the Pre-Survey Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. The Pre-Survey Questionnaire and any accompanying documentation are presented in Appendix C.

INTERVIEWS			
Contact / Affiliation	**Date of Communication**	**Years Associated with Subject Property**	**Telephone No.**
Ms. Pamela Roberson Property Manager Miramar Towers	02/19/2016	3 months	(213) 483-1069

Mr. Alfredo Torres Maintenance Custodian Miramar Towers	02/19/2016	9	(323) 804-3532
Ms. Janine Interiano Records Clerk City of Los Angeles Department of Building and Safety Records Division	02/19/2016	NA	(213) 482-6899
Ms. Katie Rosas Clerk City of Los Angeles Fire Department – UST Section	03/01/2016	NA	katie.rosas@lacity.org
Ms. Angenee Reygadas Clerk City of Los Angeles Fire Department Hazardous Materials Management Division	03/02/2016	NA	Angenee.reygadas@lacity.org
Ms. Susan Lu Clerk Los Angeles County Assessor's Office	03/01/2016	NA	(562) 256-1701

Pertinent information from the interviews is presented in applicable sections of this report.

DRAFT

7.0 CONDITIONS OUTSIDE THE SCOPE OF ASTM E 1527-13

The following sections address environmental issues or conditions at the Subject Property that parties may wish to assess in connection with commercial real estate that are outside the scope of ASTM Practice E 1527-13 (non-scope considerations).

7.1 ASBESTOS-CONTAINING MATERIAL (ACM)

Asbestos is a term used to describe a group of six naturally occurring crystalline fiber minerals. Asbestos has excellent thermal stability, a high degree of tensile strength, and has been used extensively in the textile, insulation, and building industries, particularly as a component in fireproofing, decorative coatings, insulation materials, and as reinforcement for plaster binders in building products. Asbestos-containing building materials are generally classified as friable or non-friable. Friable materials are those which can be crumbled, pulverized, or reduced to powder by hand pressure, or by normal use or maintenance can be expected to emit asbestos fibers into the air. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition, or other activities, at which time it may be considered friable.

Based upon the date of construction and in accordance with the scope of work for this assessment, EBI did not conduct a survey for the presence of ACM.

According to the property owner, an Asbestos Operations and Maintenance (O&M) Plan is currently in place at the Subject Property. EBI reviewed an Asbestos O&M Plan, prepared by Forest City Residential Management, dated September 2009. The O&M Plan identified the following presumed ACM at the Subject Property: vinyl floor tiles, acoustical ceiling material, and thermal system insulation.

7.2 RADON

Radon is a naturally-occurring, colorless and odorless radioactive gas that is generated primarily in granitic rocks. The United States Surgeon General has published information that radon is a cause of lung cancer. Radon usually enters a building where the building structures contact underlying and surrounding soil. Radon is generally considered to pose the greatest potential health risk to residents of the lowest level of a building. But, radon can also migrate vertically within building structures to areas above the ground contact floors.

EBI conducted a radon screening at the Subject Property as part of this assessment including sampling and analysis in accordance with the Mortgagee Letter 2013-07 and conformance with HUD Office of Multifamily Development Radon Policy and ANSI/AARST MAMF-2012 (Protocol for Conducting Radon Decay Product Measurement in Multifamily Buildings). Per the referenced protocols, tests were placed in a minimum of 25% of the ground contact and 10% of upper floor apartments were tested in each building. The sampling was conducted and supervised by Radon Professionals.

The EPA Map of Radon Zones indicates that Los Angeles County is located within a Zone 2 radon area. Zone 2 is defined as an area that has a moderate potential for radon gas, with a predicted average indoor radon screening level between 2.0 picoCuries per liter (pCi/L) and 4.0 pCi/L. The EPA recommended Action Level for radon is 4.0 pCi/L.

Between February 23 and February 25, 2016, EBI conducted a limited short-term radon screening of the Subject Property by testing 19 residential units and 2 non-residential areas. The radon test canisters were exposed for a minimum of 48 hours and were sent to Air Chek, Inc in Mills River, North Carolina for analysis. The sampling locations and laboratory analytical results are presented in the following table:

DRAFT

Canister No.	Location	Floor	Radon Concentration (p/Ci/L)
7733280	Leasing Office	1	0.9
7733283			0.6 (D)
7733279	Community Room		0.6
7733278			<0.3 (D)
7733277	101		2.5
7733276	101		2.1 (D)
7733275	102		<0.3
7733274	107		0.8
7733272	112		0.6
7733271	118		0.8
7733270	204	2	<0.3
7733269	215		<0.3
7733232	307	3	<0.3
7733273	316		<0.3
7733284	402	4	<0.3
7733285	413		<0.3
7733282	501	5	<0.3
7733371	516		<0.3
7733365	604	6	<0.3
7733364	617		<0.3
7733366	707	7	<0.3
7733240	718		<0.3
7733236	805	8	<0.3
7733361	820		<0.3
Quality Control Blank Samples			
7733287	102	1	<0.3
7733228	107		<0.3

Laboratory analytical results identified radon concentrations less than the EPA Action Level of ≥4.0 pCi/L in all sample locations. The radon laboratory report is appended.

7.3 LEAD-BASED PAINT (LBP)

Use of lead in household paint was banned by the U.S. Environmental Protection Agency (EPA) effective January 1, 1978. The EPA and the U.S. Department of Housing and Urban Development (HUD) consider lead-based paint as containing a lead concentration equal to or greater than 1.0 milligram per square centimeter (mg/cm²) or 0.5% lead by weight, as defined by Title X of the 1992 Housing and Community Development Act.

Based on the date of construction of the existing building and in accordance with the scope of work of this assessment, a LBP survey was not conducted at the Subject Property.

DRAFT

7.4 LEAD IN DRINKING WATER

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and building plumbing systems. In 1986, EPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing materials. Lead in drinking water results primarily from corrosion of lead containing materials in service lines or from corrosion of lead containing materials in building plumbing systems such as lead solder, brass, bronze, and other lead containing alloys. The EPA Action Level for lead in public drinking water supplies is 0.015 parts per million (ppm) or 0.015 milligrams per liter (mg /L).

Municipal water service is provided to the Subject Property by Los Angeles Department of Water and Power. Potable water is reportedly obtained from Northern California State Water Project, Colorado River, and groundwater wells. Based upon review of the utility's 2014 Drinking Water Supply and Water Quality Report, the municipal water supply meets all current criteria established by the Safe Drinking Water Act (SDWA) and local municipal drinking water standards, including those for lead. Based upon the existing municipal water service and in accordance with the scope of work for this assessment, EBI did not conduct lead-in-drinking water sampling at the Subject Property.

7.5 LIMITED MICROBIAL SURVEY

Microbial growth (e.g., mold or fungus) on building materials may occur when excess moisture is present. Porous building materials such as gypsum board, insulation in walls and ceilings, and carpeting retain moisture and become microbial growth sites if moisture sources are not controlled or mitigated. Potential sources of moisture include rainwater intrusion, groundwater intrusion, condensation on cold surfaces, and water leaks from building systems (e.g., plumbing leaks, HVAC system leaks, overflowing drains, etc.). Inadequate ventilation of clothes dryers and shower stalls may also result in excess moisture conditions. Microbial growth may be clearly visible (e.g., ceramic tile mortar in shower stalls) or may be concealed with no visible evidence of its existence (e.g., inside wall cavities).

Interior areas of the Subject Property building to which access was provided and in which building elements were readily observable were inspected for the presence of moisture and visible or olfactory evidence of microbial development. No disassembly of systems or building components or physical or invasive testing was performed. No observations were conducted within concealed locations (construction elements behind wall and ceiling finishes, and other building components, etc.). The scope of this inspection was limited to visual observations of accessible areas for microbial growth and water damaged materials and did not include the collection and laboratory analysis of bulk samples or air samples to confirm the presence of microbial elements.

Representative observations revealed no obvious visual or olfactory indications of the presence of active moisture or mold activity at the Subject Property. In addition to our observation efforts, a questionnaire provided to Subject Property personnel did not indicate the presence of mold, and Subject Property personnel were not aware of the presence of moisture or mold activity. Based on the interviews and conditions as observed at the time of inspection, mold does not appear to be a concern at the Subject Property.

7.6 HUD FACTORS

The following additional HUD Environmental Factors were reviewed at the Subject Property.

DRAFT

HUD ENVIRONMENTAL FACTOR	FINDINGS
Coastal Zone and Coastal Barrier Resources	The Subject Property is not located within a State Coastal Management Zone, or a coastal barrier designated on a current FEMA flood map or Department of Interior coastal barrier resource map. No further action or investigation is recommended regarding this factor.
Floodplain Management	EBI reviewed the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map, Community Map #060137, Panel #1610F, dated September 26, 2008. The Subject Property Flood Zone Determination appears to be Zone X, defined as an area outside the 100-year and 500-year floodplains. The Subject Property is not located within a Special Flood Hazard Area identified on the current FEMA Flood Insurance Rate Map (FIRM). No further action appears warranted regarding this factor.
Historic Preservation	This assessment is being completed for an existing HUD loan going through a Transfer of Physical Assets (TPA) loan assumption rather than a new HUD MAP 223f loan. As such, SHPO correspondence is not necessary. If it is subsequently determined that any substantial renovation work is required, then SHPO correspondence may need to be completed at a later date.
Noise Abatement	The Subject Property is not located within 1,000 feet of a freeway, major highway, or busy road, 5 miles of a civil airport, 15 miles of a military airport or 3,000 feet of a railroad. No further action appears warranted regarding this factor.
Explosive or Flammable Hazards	No industrial facilities handling explosive or fire-prone materials such as liquid propane, gasoline or other storage tanks are adjacent to or visible from the Subject Property. No further action or investigation is recommended regarding this factor.
Airport Hazards	The Subject Property is not located within 3,000 feet from the end of a runway at a civil airport or 2 ½ miles from the end of a runway at a military airport. No further action or investigation appears warranted regarding this factor.
Protection of Wetlands	There are no surface water bodies, marshy areas or other visible indications of potential wetlands areas on or adjacent to the Subject Property. According to the NWI Wetlands Map, there are no wetland areas in the vicinity of the Subject Property.
High Voltage Power Transmission or Other Towers	No High Voltage Power Transmission or Other Towers are located on-site or on adjacent properties. There are no structures that could fall on a subject building. No further action or investigation is recommended regarding this factor.
Landfills	No landfills are located within 3,000 feet of the Subject Property. As such, no further action or investigation is recommended regarding this factor.
Endangered or Threatened Species or Habitat	Based on the refinancing of an existing property or an existing development, impacts to endangered/threatened species or habitats are not anticipated and no further action is recommended regarding this factor.
Sole Source Aquifer Recharge Area	The Subject Property is connected to the public sewer system. As such, no further action or investigation is recommended regarding this factor.
Farmlands Protection	The Subject Property is not farmland. As such, no further action or investigation is recommended regarding this factor.
Rail Lines	The Subject Property is not located within 100 feet of the right of way of a railroad. As such, no further action or investigation is recommended regarding this factor.
Natural Gas or Petroleum Pipelines	None of the on-site structures are located within 10 feet of a natural gas or petroleum pipeline easement. As such, no further action or investigation is recommended regarding this factor.

DRAFT

7.7 TIER 1 VAPOR ENCROACHMENT SCREENING

EBI has conducted a Tier 1 Vapor Encroachment Screen (VES) in general conformance with the American Society for Testing Materials (ASTM) Standard E 2600-10, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions, dated June 1, 2010.

7.7.1 Purpose and Scope-of-Services

The purpose of this Tier 1 VES is to conduct an initial screening to identify a vapor encroachment condition (VEC). A VEC is defined as the presence or likely presence of chemical(s) of concern (COC) vapors in the subsurface of the Subject Property, caused by the release of vapors from contaminated soil or groundwater either on or near the Subject Property, as identified by Tier I or Tier II procedures.

The VES process is a two-tiered screening process. The Tier 1 VES is based upon information typically collected during an ASTM Standard E 1527 Phase I ESA and is typically focused on known or suspect contaminated properties that may exist in the area of concern (AOC). The Tier 1 VES includes, but is not limited to, the following: review of Federal, state, local, and tribal government records, as reported in the regulatory database report; chemical use and historical records of prior uses on the Subject Property and within proximity of the Subject Property; soil characteristics; geological characteristics; contaminant characteristics and plume migration data (if this data is readily available); significant conduits that that might provide preferential pathways for vapor migration; and groundwater depth and groundwater flow data.

Search Distance Test and Chemicals of Concern Test

The Tier 1 screening includes the following: (1) a Search Distance Test to determine whether there are any known or suspect contaminated properties within the AOC; and (2) a Chemicals of Concern Test to determine for those known or suspect contaminated properties within the AOC whether COC are likely to be present.

Standard environmental record sources were reviewed pertaining to the Subject Property and to properties within the AOC (i.e., within the Approximate Minimum Search Distances, as defined by ASTM Standard E 2600-10 Guide). The Approximate Minimum Search Distance is based upon the type of COC known or suspected to exist in any release from a property, that is, non-petroleum hydrocarbon COC (such as chlorinated solvents) versus petroleum hydrocarbon chemicals of concern (PHCOC), and the location of the known or suspect source of contamination with respect to the Subject Property. The AOC is generally one-third of a mile (1,760 feet) around the Subject Property for COC and one-tenth of a mile (520 feet) around the Subject Property for PHCOC. Approximate minimum search distances surrounding the Subject Property to identify the AOC are specified below:

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE
Approximate Minimum Search Distances

Regulatory Database	COC	PHCOC
Federal NPL Sites	1/3 mile	1/10 mile
Federal CERCLIS Sites	1/3 mile	1/10 mile
Federal RCRA CORRACTS Sites	1/3 mile	1/10 mile
Federal RCRA non-CORRACTS TSD Sites	1/3 mile	1/10 mile
Federal RCRA Generators Sites	Subject Property Only	Subject Property Only
Federal Engineering / Institutional Control Sites	Subject Property Only	Subject Property Only
Federal ERNS Sites	Subject Property Only	Subject Property Only
State and Tribal equivalent NPL / CERCLIS Sites	1/3 mile	1/10 mile

DRAFT

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE Approximate Minimum Search Distances		
Regulatory Database	**COC**	**PHCOC**
State and Tribal Spills Sites	Subject Property Only	Subject Property Only
State and Tribal Landfill or Solid Waste Disposal Sites	1/3 mile	1/10 mile
State and Tribal Leaking Storage Tank Sites	1/3 mile	1/10 mile
State and Tribal Registered Storage Tank Sites	Subject Property Only	Subject Property Only
State and Tribal Engineering & Institutional Control Sites	Subject Property Only	Subject Property Only
State and Tribal Voluntary Cleanup Sites	1/3 mile	1/10 mile
State and Tribal Brownfield Sites	1/3 mile	1/10 mile

COC: Chemicals of Concern
PHCOC: Petroleum Hydrocarbon Chemicals of Concern

If there are known or suspect sources of contamination identified within the AOC, the data contained in the standard environmental record sources is further reviewed in order to evaluate the likelihood that a VEC exists at the Subject Property.

Critical Distance Determination

If information related to the boundaries of a contaminant plume from a known contaminated property is available, a Critical Distance test may be conducted. The Critical Distance is defined as the lineal distance between the nearest edge of the contaminant plume and the nearest Subject Property boundary. The Critical Distance is equal to 100 feet for COC or 30 feet for dissolved PHCOC. The Critical Distance for PHCOC as light non-aqueous phase liquid (LNAPL), such as gasoline product, is 100 feet.

If groundwater flow direction can be estimated, the AOC in the downgradient direction may be reduced to the area within the Critical Distance during the Tier 1 screening. Additionally, the crossgradient direction may be reduced 365 feet. It is not necessary to obtain information regarding the contaminant plume dimensions for downgradient and cross-gradient contaminated properties, as the Critical Distance is measured from the nearest Subject Property boundary directly to the source on the off-site downgradient property that is the origin of the contamination (with the contamination migrating away from the Subject Property).

For a contaminated property located upgradient of the Subject Property, the Critical Distance determination requires knowledge of the length and depth of the groundwater contaminant plume. Such information is required to determine the lineal distance from the groundwater contaminant plume edge to the nearest existing or planned structure on the Subject Property, or the nearest Subject Property boundary if there are no existing or planned structures on the Subject Property. Data related to contaminant plume characteristics and dimensions associated with off-site contaminated properties is not typically available during the Tier 1 screening process and is typically obtained during the Tier 2 screening process. If it is not possible to conservatively estimate contaminant plume dimensions, then the AOC cannot be reduced in upgradient directions during the Tier 1 screening process.

Data regarding site-specific soil characteristics may also be used to adjust the AOC. Low permeability in soil, such as soil high in clay and/or silt content, generally tends to restrict soil gas movement, as may soil with high moisture content. Conversely, high porosity in soil tends to enhance soil gas movement. If known, this data may be used as a basis to either expand or reduce the AOC.

Possible Conclusions of Tier 1 VES

DRAFT

The four possible conclusions of the Tier 1 screening are as follows: (1) a VEC exists; (2) a VEC likely exists; (3) a VEC cannot be ruled out; or (4) a VEC can be ruled out because a VEC does not or is not likely to exist. If a VEC does not exist or is unlikely to exist, then the VES process is considered complete in accordance with ASTM Standard E 2600-10 Guide. Vapor encroachment would unlikely be an issue of concern in connection with the subsurface of the Subject Property, vapor intrusion would unlikely be an issue of concern in connection with existing or planned structures on the Subject Property, and no further action or investigation would be recommended. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the Subject Property (a VEC exists, likely exists, or cannot be ruled out), then further action or investigation may be recommended, including a Tier 2 Screening and/or mitigation. Note that both Tier 2 Screening and mitigation are beyond the scope of the Tier 1 Screening process.

Tier 2 Vapor Encroachment Screening

If a VEC cannot be ruled out during the Tier 1 screening process, then a more refined Tier 2 VES may be completed in order to further evaluate the VEC. Tier 2 focuses on characteristics of the contaminant plume resulting from contaminated properties and the proximity of the contaminant plume to the Subject Property. This data is not typically available during the Tier 1 screening process and is typically obtained from state regulatory files and may also be obtained from other available documents and/or may be collected via sampling. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. A Tier 2 VES has two data collection components: one non-invasive and one invasive.

Non-Invasive Data Collection: If data regarding the source of contamination and its migration in the subsurface is available and accessible in regulatory files and/or from other available documents, then the Tier 2 investigation can be non-invasive. The non-invasive investigation includes review at the appropriate regulatory agency of available subsurface investigation reports and/or other available documents regarding known or suspect contaminated properties within the AOC. The objective of the non-invasive component of the Tier 2 screening process is to identify from existing subsurface investigation reports and/or other available information in regulatory agency files the extent of the contaminated plume and its behavior, the specific COC and their respective concentrations, and the status of remediation. Using this information, a Critical Distance Determination may be performed.

Invasive Data Collection: If data regarding the source of contamination and its migration in the subsurface is not available or accessible or if there are preferential pathways, then the Tier 2 screening process can be invasive. An invasive investigation may include sampling of soil, soil gas, and/or groundwater on the Subject Property, at the Subject Property boundary, or off-site.

Mitigation

If the vapor encroachment and/or vapor intrusion pathway is determined to be complete at the Subject Property, there are a variety of mitigation alternatives, including intrinsically safe building design, engineering controls (e.g., a vapor mitigation system such as a chemical vapor barrier, a sub-slab depressurization system, a methane control system, or a radon control system), institutional controls, and/or removal or remediation of the contaminated media causing the VEC. Selection, design, and implementation of appropriate mitigation alternatives is beyond the scope of this assessment.

DRAFT

7.7.2 Government Records Review

A Vapor Encroachment Screen Worksheet was completed through Environmental Data Resources, Inc. (EDR) of Milford, Connecticut. Standard environmental record sources were reviewed in order to identify whether there are known or suspected sources of contamination located within the AOC. The Approximate Minimum Search Distance is based upon the type of COC known or suspected to exist in any release from a property and the location of the known or suspect source of contamination with respect to the Subject Property.

The Subject Property was not identified as a listed site in the standard environmental record sources. However, the findings of the Vapor Encroachment Screen Worksheet identified one off-site property in the standard environmental record sources that cannot be ruled out as a VEC in connection with the Subject Property. H&S Food & Gas at 2000 West 3rd Street is adjacent to the south of the Subject Property across 3rd Street. This former facility is approximately 75 feet south and slightly down-gradient from the Subject Property. According to the database a release of gasoline occurred that impacted groundwater. The case was closed on October 14, 2015. No additional information was provided in the regulatory database report regarding the extent of the groundwater contaminant plume. This site is located within the AOC for PHCOC (1/10 mile / 520 feet). As such, without data related to contaminant plume characteristics and dimensions, this site cannot be ruled out as a VEC in connection with the Subject Property. However, EBI was able to review a 2015 closure report (obtained from the Geotracker) for the H & S facility. According to the report the groundwater flow direction is to the southwest and away from the Subject Property. There are no monitoring wells installed along 3rd Street, south of the Subject Property. Based on the current regulatory status and actual groundwater flow direction, the H & S facility does not appear to be a VEC to the Subject Property.

The remaining off-site properties listed in the standard environmental record sources were determined to not likely represent a VEC to the Subject Property based on one or more of the following factors: COC are not likely to be present at the site; the site is located outside of the AOC and/or Critical Distance; hydrologic characteristics and/or soil characteristics suggests that contaminant vapors would not migrate from the site to the Subject Property; and/or reported sampling data indicates that the site does not represent a VEC. A copy of the Vapor Encroachment Screen Worksheet is presented in Appendix F.

7.7.3 Current and Historical Use of the Subject Property and Adjoining Properties

EBI did not identify current or historical conditions on the Subject Property or adjoining properties that may be considered likely to represent a VEC to the Subject Property. Refer to Sections 2.0, 4.3, and 5.0 for information regarding current and historical use of the Subject Property and adjoining properties.

7.7.4 Tier I Vapor Encroachment Screening Conclusions

The findings of the Vapor Encroachment Screen Worksheet did not identify VECs in connection with the Subject Property. EBI did not identify current or historical conditions on the Subject Property or adjoining properties that may be considered likely to represent a VEC to the Subject Property. Based upon the findings of this Tier I Vapor Encroachment Screen, the VES process is considered complete in accordance with ASTM Standard E 2600-10 Guide, vapor intrusion is unlikely to be an issue of concern in connection with existing or planned structures on the Subject Property, and no further action or investigation is recommended.

DRAFT

It should be noted that this Tier 1 Vapor Encroachment Screen is not a formal assessment of indoor air quality and did not include review of regulatory agency files, calculations, testing or sampling, or evaluation of mitigation alternatives.

DRAFT

8.0 FINDINGS AND OPINIONS

EBI has performed this Phase I Environmental Site Assessment of the Subject Property in conformance with the scope and limitations of ASTM E 1527-13. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. This assessment has identified no evidence of *recognized environmental conditions (RECs)* in connection with the Subject Property. However, the following *de minimis condition and conditions outside the scope of ASTM E 1527-13* were identified:

- EBI identified surficial oil staining on the concrete floor beneath emergency generator. No cracks, penetrations, or other potential pathways to the subsurface were observed in proximity to the identified staining. This condition is not generally subject to enforcement action if known by a governing agency and is considered a *de minimis condition*.

- Based upon the date of construction and in accordance with the scope of work for this assessment, EBI did not conduct a survey for the presence of ACM. Pressumed asbestos-containing vinyl floor tiles, acoustical ceiling material, and thermal system insulation were included in the existing Asbestos Operations and Maintenance (O & M) program at the Subject Property. Asbestos is a condition outside the scope of ASTM E 1527-13 and is not considered a recognized environmental condition (REC).

- EBI conducted a limited short-term radon screening of the Subject Property testing 19 residential units and 2 non-residential areas. Laboratory analysis indicated that none of the test locations exhibited radon concentrations equal to or greater than the EPA recommended Action Level of 4.0 pCi/L. The overall quality assurance plan for the project was determined to be within normal tolerances. No further action is recommended at this time regarding this Radon assessment. Radon is a condition outside the scope of ASTM Practice E 1527-05 and is not considered a recognized environmental condition (REC).

DRAFT

9.0 RECOMMENDATIONS

Based upon the findings of this investigation, EBI offers the following recommendations:

- EBI recommends the continued implementation of the existing Asbestos Operations and Maintenance (O&M) Plan for the Subject Property. This O&M Plan provides the procedures and guidelines that, when used during facility cleaning, maintenance, and general operations, will minimize human exposure to lead and minimize release of lead to the environment. This O&M Plan is a long term management approach.

PHASE I ENVIRONMENTAL SITE ASSESSMENT
MIRAMAR TOWERS

EXECUTIVE SUMMARY

Surveys Inc. performed a Phase I Environmental Site Assessment of the Miramar Towers project located at 2000 Miramar Street, Los Angeles, Los Angeles County, California. Miramar Towers is a low income HUD subsidized 62+ elderly project that consists of an existing eight story reinforced concrete apartment building structure that contains a total of 157 apartment units. The project was constructed in 1979-1980 and is currently +/- 39 years old. In addition to the 157 apartment units, the project includes an onsite rental office, an attached single story Community Building wing, two (2) 8-stop hydraulic elevators, two (2) interior/exterior stair wells, 45 open parking stalls (8 HC), onsite concrete sidewalks, perimeter public concrete sidewalks, asphalt paved driveways and parking areas, perimeter steel fencing, a concrete patio, landscaping, irrigation, a trash chute, a trash room, storm water catch basins and valley gutters, site lighting, project signage, underground utility services and related site improvements. The +/- 2.737 acre site is 1.5 miles northwest of the downtown Los Angeles, CBD.

The site inspections were conducted on April 27 & 30, 2018; November 1, 2018 and July 9, 2019. The site inspection consisted of a visual evaluation of the project site, building exteriors, interior common areas and typical resident units in the building. Not all resident units were inspected. We have assumed areas not inspected were originally constructed with similar materials as those observed. A review of the pertinent readily available records of local, state and federal agencies, historical information, interviews with people knowledgeable and prior environmental reports was conducted.

Prior asbestos surveys/sampling found that the acoustical ceiling textures, wallboard/joint compounds, ceramic tile, grout, thinset and pipe insulation were non-detect for asbestos. Asbestos containing materials were confirmed to be present in some vinyl tile flooring and sheet vinyl mastics. Materials observed generally remained in good condition. An Asbestos Operations and Maintenance Plan has been put in place at the subject property. Any necessary abatement actions should be completed prior to any renovation or demolition work is started. Lead-based paint testing was not required for this project. The project is located in EPA Radon Zone 2, a moderate risk radon region. Onsite short-term radon test results were all well below the EPA Recommended Action Level, therefore, no additional actions are recommended with respect to radon. No potential vapor encroachment conditions were identified in connection with the subject property.

Interviews with people knowledgeable, aerial photograph studies, historical map reviews, prior environmental reports and regulatory database reviews did not indicate any evidence of hazardous materials being improperly used or disposed of at the site. There was no evidence of any chemical misuse, unlawful dumping or other sources of contamination to the site. There are no underground storage tanks at this site registered with the California Regional Water Quality Control Board. No underground storage tanks were observed during the site reconnaissance.

The site inspection indicated there was no evidence of any soil staining or distressed vegetation. No unusual odors, pools of liquids, drums, leaking containers, leaking equipment, unidentified hazardous materials or other unidentified substances were observed during the site reconnaissance. The stormwater catch basins appeared to be free of contaminants.

ENVIRONMENTAL SUMMARY CONTINUED:

The historical review indicated that the site was originally vacant undeveloped land dating back to the late 1800s prior to being developed with several single family residential dwellings by the early 1900s. The project then appears to have been developed with multiple apartment and hotel buildings as well as several single family residences by the 1920s. Site usage remained little changed until the mid to late 1970s at which time the project was vacant. The existing apartment project was then developed on the site in 1979-1980. Site usage has remained little changed since that time. Based upon our investigation, we do not see a potential human health risk resulting from past uses.

The subject property was listed in the HAZNET database. According to the database, in 2000, an unspecified sludge waste was disposed of at a transfer station. Based upon the information reviewed, and considering the identified waste was reported to be properly disposed of at a transfer station, it is our opinion that there is a low potential for significant impact to the subject property from this listing. Based upon our review of all pertinent Regulatory Documents, it is our opinion there is only a low potential for any toxic or hazardous contamination to the property from any off-site "listed" sources.

Based on our review of the development and site use history, along with an examination of existing conditions at the site, we found no hazardous or toxic substances were identified as being improperly generated, used, stored or disposed of on the property. This includes materials defined under the Resource Conservation and Recovery Act (RCRA), and the information and data we have reviewed and documented in this report. No recognized environmental conditions were identified in connection with the property.

It is our opinion the potential for significant hazardous contamination at the site is low. No additional investigation appears to be warranted at this time.

ENVIRONMENTAL SUMMARY GRID

ENVIRONMENTAL STATUS	RESEARCH RESULTS	RECOMMENDS	ESTIMATES
Onsite Underground Storage Tanks	None Detected	None	$0.00
Stained or Discolored Surfaces	None Detected	None	$0.00
Stressed Vegetation	None Detected	None	$0.00
Leaking Transformers - PCBs	None Detected	None	$0.00
Asbestos - ACM	Confirmed to be Present O&M Plan Issued	Maintain O&M Plan	$0.00
Lead-Based Paints	Testing Not Required	None	$0.00
Radon Gas	Low Risk Region Onsite Short Term Results below EPA Action Level	None	$0.00
Onsite Hazardous Materials	Low Potential for Impact	None	$0.00
Improper Waste Disposal	None Detected	None	$0.00
EPA - Federal Sites List	Low Potential for Impact	None	$0.00
STATE - Sites List	Low Potential for Impact	None	$0.00
Underground Storage Tank (USTs)	Low Potential for Impact	None	$0.00
Leaking Tanks (LUSTs)	Low Potential for Impact	None	$0.00
Adjacent Properties	Low Potential for Impact	None	$0.00
Drinking Water Standards	Meet EPA Standards	None	$0.00
Health Department Concerns	None	None	$0.00
Fire Department Concerns	None	None	$0.00
Historical Review Concerns	None	None	$0.00
		TOTAL COSTS	**$0.00**
PHASE II REQUIREMENTS	**NONE**	**NONE**	**$0.00**

Prior asbestos surveys/sampling found that the acoustical ceiling textures, wallboard/joint compounds, ceramic tile, grout, thinset and pipe insulation were non-detect for asbestos. Asbestos containing materials were confirmed to be present in some vinyl tile flooring and sheet vinyl mastics. Materials observed generally remained in good condition. An Asbestos Operations and Maintenance Plan has been put in place at the subject property. Any necessary abatement actions should be completed prior to any renovation or demolition work is started. Lead-based paint testing was not required for this project. The project is located in EPA Radon Zone 2, a moderate risk radon region. Onsite short-term radon test results were all well below the EPA Recommended Action Level, therefore, no additional actions are recommended with respect to radon.

1.0 INTRODUCTION

PURPOSE

This Phase I Environmental Site Assessment of the Miramar Towers project is intended to determine whether there is a potential for significant environmental contamination based on readily available information about the site and a walk-through inspection. If this potential does exist, the Phase I Environmental Site Assessment indicates additional activity necessary to confirm evidence of significant environmental contamination.

This report presents the results of a Phase I Environmental Site Assessment of the Miramar Towers project at 2000 Miramar Street, Los Angeles, Los Angeles County, California. Miramar Tower Preservation, LP., retained Surveys Inc. to perform the Phase I Environmental Site Assessment in order to determine if a potential for significant contamination exists at the subject property.

The assessment consisted of a visual and olfactory inspection of the site, interviews with people knowledgeable about the site, an historical review and a review of all pertinent records from local, state and federal agencies. The results of our Phase I Investigation are described in the following sections of this report.

LIMITATIONS, EXCEPTIONS, AND SIGNIFICANT ASSUMPTIONS

It should be noted when an assessment is completed without subsurface exploration or chemical screening of soils and groundwater beneath the site, as in this study, no statement of scientific certainty can be made regarding the latent subsurface conditions which may be the result of onsite or off-site sources. Thus, this report is not a definitive study of contamination at the site. An evaluation of the subsurface soils and groundwater was not included in this report.

The scope of the onsite assessment consisted of a visual evaluation of the project site, building exteriors, interior common areas and typical resident units in the buildings. Not all resident units were inspected. We have assumed areas not inspected were originally constructed with similar materials as those observed.

This report has been prepared following the requirements outlined in ASTM E-1527-13 Standard Practice for Environmental Site Assessments. This report does not offer to be a legal opinion, representation, or interpretation of environmental laws, regulations or policies of the state, federal or local governmental agencies.

The environmental study conclusions, contained in this report, are professional opinions largely based upon third party data received and reviewed. While efforts have been made to substantiate the third party data, Surveys Inc. cannot guarantee its completeness or accuracy.

USER RELIANCE

This report has been prepared for, and can be relied upon by the Client, Miramar Tower Preservation, LP.

2.0 SITE DESCRIPTION

LOCATION AND DESCRIPTION OF STRUCTURE AND IMPROVEMENTS

The Miramar Towers project is located at 2000 Miramar Street, Los Angeles, Los Angeles County, California. Miramar Towers is a low income HUD subsidized 62+ elderly project that consists of an existing eight story reinforced concrete apartment building structure that contains a total of 157 apartment units. The project was constructed in 1979-1980 and is currently +/- 39 years old. In addition to the 157 apartment units, the project includes an onsite rental office, an attached single story Community Building wing, two (2) 8-stop hydraulic elevators, two (2) interior/exterior stair wells, 45 open parking stalls (8 HC), onsite concrete sidewalks, perimeter public concrete sidewalks, asphalt paved driveways and parking areas, perimeter steel fencing, a concrete patio, landscaping, irrigation, a trash chute, a trash room, storm water catch basins and valley gutters, site lighting, project signage, underground utility services and related site improvements. The +/- 2.737 acre site is 1.5 miles northwest of the downtown Los Angeles, CBD.

The property is located within the general southwest quadrant formed by of the intersection of State Route 101 and Interstate 110 in the central portion of the City of Los Angeles California. The subject site lies at a slight angle to the north south lines of longitude therefore for the purposes of this report we consider Miramar Street to lie along the north side of the site. The site consists of an irregular rectangular shaped parcel. The building occupies the central portions of the site. The site topography is mostly level in the central portion of the site with down slopes toward 3rd Street to the south and Miramar Street towards the northwest. The site topography varies from +/- El. 100' in the central portions of site down to +/- El. 85' at the south side and northwest corner of the site.

The single-story Community Room is located on the north side of the building. There is an outside concrete patio and courtyard located along the west side of the Community Room. The Community Room includes a social room, kitchen, a game room area, rental offices, main entrance lobby, and the maintenance office and storage rooms.

The main vehicle entrance is from Miramar Street at the north central portion of the site where a controlled access gate is provided for the tenant parking lot area. Another main visitor vehicle entrance extends into the site from 3rd Street at the southeast portion of the site. The main tenant parking lot contains 38 parking stalls including seven (7) handicap stalls. The visitor parking lot contains seven parking stalls including one (1) handicap stall. All together there are 45 parking stalls including eight (8) handicap parking stalls provided. The main electrical transformer and emergency generator are located along the south side of the building. The building includes a trash chute and a trash room where steel dumpsters are provided. The dumpsters are rolled out to an area off of the south side of the building where the local refuse service empties the dumpsters at least weekly.

2.0 SITE DESCRIPTION

LOCATION AND DESCRIPTION OF STRUCTURE AND IMPROVEMENTS

The main building structure consists of precast and poured in place reinforced concrete platform frame construction. The building is located over a series of order cast pilings and reinforced concrete grade beams that extend in both directions beneath the first floor level reinforced concrete slab on grade. There are no basement areas. The 2nd to 8th floor structures consist of 4 inch reinforced precast concrete slabs with 4 inch reinforced concrete topping slabs creating 8" thick reinforced concrete flat plate structural slabs. Above the grade beams, the apartment building exterior walls and all bearing walls consist of 8" prestressed reinforced concrete construction. The typical wall panels consist of cellular core construction. The precast cells have field installed vertical reinforcing steel bars with poured in place concrete. The flat plate roof structure is of similar concrete construction as the flat plate concrete floor structures. The roofing systems consist of a modern TPO (thermal polyolefin) white reflective membrane provided. The flat roof deck slopes to a series of interior roof drains and there are also perimeter overflow scuppers provided. The original single pane, aluminum framed windows and sliding glass doors are still in service.

The typical building exterior walls consist of painted smooth surfaced and vertically grooved formed and poured precast concrete. The remaining exterior walls include steel studs and stucco exterior finish. All interior walls utilize metal studs. The landscaping on site includes large open grass lawn areas, medium to large shrubbery, large deciduous and evergreen trees, and with ground covers provided. The grass lawn areas are provided in the north and south courtyards. An automated irrigation system serves the landscape areas.

Hydronic hot water for the heating system is provided from a pair of rooftop mounted Raypak gas fired hot water boilers. The hot water recirculates via pumps provided to air handling units located in the unit ceilings. During the warmer summer season, chilled water to the units is from a pair of Carrier chillers that include two (2) high-efficiency screw compressors and an integral set of four air-coolers. Recirculating pumps are provided for the hydronic system. The hydronic system can either be heating or cooling. The common laundry room, rental office, community room and elevator equipment room utilize include split system A/C with interior evaporators and exterior condensing units. The split A/C systems remain in above average to good condition. The typical corridors are served by a rooftop gas fired forced air heating unit. Vertical transportation within the building has been provided by two (2) 8-stop 3,500-pound hydraulic elevators. The elevators were renovated in 2009.

Utilities and services provided to the property include water, sewer, electrical, natural gas trash and telephone. Electrical Power is provided City of Los Angeles Department of Water and Power, natural gas is provided by The Gas Company, Water is supplied by the City of Los Angeles. The City of Los Angeles provides the sanitary sewer services and storm water services. Electrical service is provided underground from a pad-mounted electrical transformer. Common dumpsters are provided for garbage and recycling service. A storm water drainage system has been provided for the site which includes concrete valley drains within landscaped areas and storm water catch basins located within the asphalt paved driveway and parking lot areas. The underground storm water piping and runoff discharge to a City of Los Angeles storm water main off the south side of the site.

2.0 SITE DESCRIPTION

ADJACENT PROPERTIES

North: Miramar Street followed by apartments and single family dwellings.

East: Apartments.

South: W 3rd Street followed by apartments, a motel and a retail strip center.

West: Apartments followed by eTown Inn.

The adjacent properties, as viewed from a distance, showed no visible evidence of environmental contamination.

PHYSICAL SETTING

According to the USGS Topographical Map of the area (Hollywood, CA Quadrangle), the subject site is located at an average elevation of approximately 85 to 100 feet above sea level. The regional topography is relatively hilly and undulating. The local topography near the site slopes down moderately to the west and well as to the northwest and southwest. Local surficial and shallow groundwater, if present, would generally be expected to mimic the local topography and flow in a general westerly direction. Deeper, regional groundwater flow may vary significantly from the local topography. MacArthur Park Lake is located approximately ½ miles to the southwest.

According to the USDA Soil Conservation Service, Web Soil Survey, the dominant soil type in the vicinity of the subject site consists of Urban Land-Dapplegray complex, 5 to 20% slopes. Urban Land consists of areas that have been so greatly modified by urban works and structures that identification of the native soils is impractical. The Dapplegray series consists of very deep, well drained soils that formed in human-transported materials (HTM) on engineered hillslopes terraces in areas weathered from calcareous shale bedrock and other calcareous sedimentary rocks. The mean annual precipitation is about 383 mm and the mean annual temperature is about 17 degrees C.

According to the FEMA Flood Insurance Rate Map, Map #06037C1610F, with an effective date of September 26, 2008, the site is located within flood Zone X, outside the 100 and 500 year flood zone. A review of the National Wetlands Inventory Map did not reveal any designated wetlands on or directly adjacent to the subject property.

3.0 USER PROVIDED INFORMATION

The following section summarizes information provided by the user, Miramar Tower Preservation, LP., with regard to this report.

TITLE RECORDS

We reviewed a Chain of Title Guarantee issued by Commonwealth Land Title Insurance Company, dated September 28, 2018, which identified the insured as Miramar Tower.

ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATION

No information regarding environmental liens or land use limitations was provided. Interviews with the property contacts indicated they were unaware of environmental liens or usage limitations related to environmental issues. A review of the available regulatory databases did not reveal any information related to environmental liens, land use or activity use limitations for the property related to environmental issues.

SPECIALIZED KNOWLEDGE

No specialized knowledge of environmental conditions associated with the property was provided. Interviews with the property contacts indicated they had no specialized knowledge of any existing or past environmental conditions associated with the subject property.

COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

No specialized knowledge of environmental conditions or similar relevant information was provided. Interviews with the property contacts indicated they had no specialized knowledge of any existing environmental conditions associated with the subject property. Interviews with local government officials also did not reveal any relevant information.

OWNER, PROPERTY MANAGER

Property contacts included Scott Frye with Jonathan Rose Company, the property ownership representative and the onsite property manager, Pam Roberson and the assistant property manager, Beverly Oh.

OTHER USER PROVIDED INFORMATION

A Phase I ESA Draft prepared by EBI Consulting dated March 2016, Asbestos Operations & Maintenance Plan dated October 2016, Asbestos Operations & Maintenance Program Manual dated April 2017, Rent Roll dated February 2018, and some of the original construction drawings were provided for review.

4.0 RECORDS REVIEW

STANDARD AND ADDITIONAL ENVIRONMENTAL RECORD SOURCES

As a part of our due-diligence, we retained Environmental Data Resources, Inc. (EDR) to provide a review of all major governmental databases for listings of potentially hazardous sites within the ASTM required search distances from the property. See the attached EDR Radius Map Report.

NPL

The National Priority List (NPL) includes sites reviewed (e.g., under CERCLIS) and considered as potential Superfund sites for the Environmental Protection Agency (EPA) Region 10. These sites have necessarily failed some aspect of EPA's CERCLA criteria regarding hazardous materials. Only sites with high enough health and environmental risk are proposed as NPL sites. There are **no** listed NPL sites located within a one-mile distance from the subject property.

Based upon the information reviewed, we conclude the potential for significant impact to the site from any NPL site is low.

DELISTED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria the EPA uses to delete sites from the NPL.

There are no Delisted NPL sites within a one-mile radius of the site. Based on the information reviewed, we conclude the potential for significant impact to the site from any Delisted NPL site is low.

CERCLIS

The Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) List is a management database which lists all current and past sites that qualify, or are being considered, for further investigation under the EPA Superfund Assessment Program. According to the EPA, the fact a site is on the CERCLIS list does not necessarily mean it is contaminated and because a site is not on the list does not necessarily mean it is contaminant free. There are **no** listed CERCLIS sites located within a 1/2 miles distance from the subject property.

Based on the information reviewed, we conclude the potential for significant impact to the site from any CERCLIS site is low.

4.0 RECORDS REVIEW

SEMS-ARCHIVE/CERC-NFRAP

The SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was former known as CERCLIS No Further Remedial Action Planned (CERC-NFRAP) renamed SEMS-ARCHIVE by the EPA in 2015. There are **no** listed SEMS-ARCHIVE/CERC-NFRAP sites within a 1/2-mile radius of the site.

Based on the information reviewed, we conclude the potential for significant impact to the site from any listed SEMS-ARCHIVE/CERC-NFRAP site is low.

RCRIS

The EPA Resource Conservation and Recovery Information System (RCRIS) includes all current and past sites storing, transporting, treating, generating or disposing of hazardous materials or waste. This list will include anything from chemical industry to small businesses like dry cleaners and gasoline stations. See EDR Report LQG (Large Quantity Generator), SQG (Small Quantity Generator), TSD (Transport, Storage, Disposal), and CORRACTS (Corrective Action Sites). There are **no** listed RCRIS TSD sites within a 1/2-mile radius of the site. There are **no** listed CORRACTS sites within a one-mile radius of the subject site. There are **two** listed RCRIS LQG sites and **seven** SQG sites within a 1/4-mile radius of the subject site. Four of the listed SQG sites are located greater than 1/8 miles distance from the subject property. There are only five listed site located within a 1/8 miles distance from the subject property.

Bonnie Brae Village, 208 S Bonnie Brae St, Map ID# 49
Location: 1/8 miles east/northeast
Status: Large quantity generator, no listed violations

CHLA Center for Personalized Medicine, 2100 W 3rd St, Map ID# G51
Location: Less than 1/8 miles west
Status: Small quantity generator, no listed violations

CT Partners, 329 201 S Alvarado ST, Map ID# D40
Location: Less than 1/8 miles northwest
Status: Small quantity generator, no listed violations

LMS Medical Service, 311 201 S Alvarado, Map ID# C11
Location: Less than 1/8 miles northwest
Status: Small quantity generator, no listed violations

Mid-Wilshire Medical, 201 S Alvarado St, Map ID# C12
Location: Less than 1/8 miles northwest
Status: Small quantity generator, no listed violations

Based upon the information reviewed, and considering the separation distance and intervening construction, we conclude the potential for significant impact to the site from any listed RCRIS site is low.

4.0 RECORDS REVIEW

ERNS

The Emergency Response Notification System (ERNS) records and stores information on reported releases of oil and hazardous substances.

The subject property was not identified as an ERNS site. Based on the information reviewed, we conclude the potential for significant impact to the site from any listed ERNS site is low.

CAL-SITES

The Cal-Sites AWP (Annual Work Plan, State Environmental Protection Agency), known hazardous waste sites, and Cal-Sites ASPIS (Department of Substance Control) Data Bases, contains potential or confirmed hazardous substance release properties. There are **no** listed CAL-SITES within a one-mile radius of the site.

Based on the information reviewed, it is our opinion there is a low potential for significant impact to the site from any listed CAL-SITES.

CHMIRS/CORTESE/NOTIFY 65/TOXIC PITS

The California Hazardous Materials Incident Report System contains information on reported hazardous materials incidents (accidental release or spills). There are **no** listed CHMIRS sites within a 1/8-mile radius of the site.

CORTESE identifies public drinking wells with detectable levels of contamination, hazardous substance sites selected for remedial action, sites with known toxic material identified through the abandoned site assessment program, sites with USTs having a reportable release and all solid waste disposal facilities from which there is known migration. There are **11** listed CORTESE sites within a 1/2-mile radius of the site. Ten of the listed sites are located greater than 1/8 miles distance from the subject property. There is only one listed site located within a 1/8 miles distance from the subject property.

Shell Station, 230 Alvarado St, Map ID# C13
Location: Less than 1/8 miles west, topographically cross gradient
Status: LUST site with case closure granted

Proposition 65 (NOTIFY 65) contains facility notifications about any release which could impact drinking water and thereby expose the public to a potential health risk. There are **no** listed NOTIFY 65 sites within a one-mile radius of the site.

TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. There are **no** listed TOXIC PITS sites within a one-mile radius of the site.

Based on the information reviewed, and considering the separation distances, intervening construction, and topographical differences, we conclude the potential for significant impact to the site from any of these listed sites is low.

4.0 RECORDS REVIEW

SWF/LF

The State of California Integrated Waste Management Board's Solid Waste Information System (SWIS) database list. The list indicates there are **no** Landfill/Solid Waste Facility (SWF/LF) sites within a 1/2-mile radius of the site.

Based on the information reviewed, we conclude the potential for significant impact to the site from any listed SWF/LF site to be low.

WMUDS/SWAT

The Waste Management Unit Database System (WMUDS) is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. There are **no** listed WMUDS/SWAT sites within a 1/2-mile radius of the site.

Based on the information reviewed, we conclude the potential for significant impact to the site from any listed WMUDS/SWAT site is low.

LUST

The California Water Quality Control Board, Leaking Underground Storage Tank (LUST) Registration list was reviewed. The list indicates there are **22** LUST sites within a 1/2-mile radius of the site, several of which are duplicate listings. There are only two listed sites located within a 1/8 miles distance from the subject property.

H&S Food & Gas, 2000 W 3rd Street, Map ID# A4
Location: Less than 1/8 miles southwest, topographically cross gradient
Status: Case closure granted

Shell Station, 230 S Alvarado St, Map ID# B7
Location: Less than 1/8 miles west, topographically cross gradient
Status: Case closure granted

Based upon the information reviewed, and considering the separation distances, intervening construction, topographical differences and current status of the nearest listed sites, we conclude the potential for significant impact to the site from any listed LUST site to be low.

4.0 RECORDS REVIEW

UST

The California Water Quality Control Board, Underground Storage Tank (UST) Registration list was reviewed. There are **31** listed UST sites within a 1/4-mile radius of the site. Many of these sites are duplicate listings for the same site. There are only eight listed site located within a 1/8 miles distance from the subject property.

St Vincent Dialysis (multiple listings), 201 S Alvarado St, Map ID# D20,D22-26, D28, D30, D36-38 & D44
Location: Less than 1/8 miles northwest
Status: Inactive site

2004 W 3rd Street, Map ID #A3
Location: Less than 1/8 miles southwest
Status: Historic UST site

Shell Station, 230 S Alvarado Street, Map ID# C16
Location: Less than 1/8 miles west
Status: Inactive UST Site

192 S Alvarado St, Map ID# B18
Location: Less than 1/8 miles north/northwest
Status: Active UST site

301 S Alvarado Street, Map ID# C19
Location: Less than 1/8 miles west
Status: Historical UST site

1841 W 3rd Street, Map ID# E45
Location: Less than 1/8 miles southeast
Status: Historical UST site

Country Villa Nursing Center, 340 S Alvarado St, Map ID# F45
Location: Less than 1/8 miles west/southwest
Status: Inactive UST site

341 S Alvarado St, Map ID# F56
Location: Less than 1/8 miles west/southwest
Status: Historic UST site

Based upon the information reviewed, and considering the separation distances, intervening construction and topographical differences, it is our opinion the potential for significant impact to the site from any listed UST site to be low.

4.0 RECORDS REVIEW

HISTORICAL UST

The California Water Quality Control Board, Hazardous Substance Storage Container Database is a historical listing of UST sites. There are **nine** listed HISTORICAL UST sites within a 1/4-mile radius of the site. Eight of the listed sites are located greater than 1/8 miles distance from the subject property. There is only one listed site located within a 1/8 miles distance from the subject property.

Otto CRVanes/Shell Station, 230 S Alvarado St, Map ID# C15
Location: Less than 1/8 miles west
Status: Previously identified as an UST and LUST site with case closure granted

Based on the information reviewed, and considering the separation distances, intervening construction and topographical differences, it is our opinion there is a low potential for significant impact to the site from any listed HISTORICAL UST site.

SWEEPS

The Statewide Environmental Evaluation and Planning System (SWEEPS) listed underground storage tanks and was updated and maintained in the early 1980s. This listing is no longer updated or maintained. There are **ten** listed SWEEPS sites within a 1/4-mile radius of the site. Six of the listed sites are located greater than 1/8 miles distance from the subject property. There are only four listed sites located within a 1 /8 miles distance from the subject site.

Alvarado II Incorporated, 2000 W 3rd St, Map ID# A5
Location: Less than 1/8 miles southwest
Status: Inactive site

St Vincent Medical, 2021 Miramar St, Map ID# B6
Location: Less than 1/8 miles north/northwest
Status: Inactive site

Juan Cornejo/Arshag, 230 S Alvarado St, Map ID# C14
Location: Less than 1/8 miles west
Status: Previously identified as an UST and LUST site with case closure granted

Serm-Darin Saelak, 174 S Alvarado St, Map ID# D21
Location: Less than 1/8 miles north/northwest
Status: Inactive site

Based on the information reviewed, and considering the separation distances, intervening construction and topographical differences, it is our opinion there is a low potential for significant impact to the site from any listed SWEEPS site.

4.0 RECORDS REVIEW

AST

The California Water Quality Control Board, Aboveground Storage Tank (AST) Registration list was reviewed. There are **no** listed AST sites within a 1/4-mile radius of the site.

Based upon the information reviewed, it is our opinion the potential for significant impact to the site from any listed AST site to be low.

BEP/FID

Bond Expenditure Plan (BEP). California Department of Health Services developed a site specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act Funds. There are **no** listed BEP sites within a one-mile radius of the site.

The California Environmental Protection Agency Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control board. There are **ten** listed FID UST sites within a 1/4-mile radius of the site. All ten listed sites were previously identified as UST, SWEEPS or HISTORIC UST sites.

Based on the information reviewed, and considering the separation distances, intervening construction and topographical differences, we conclude the potential for significant impact to the site from any listed BEP/FID site is low.

ENVIROSTOR

The DTSC's Site Mitigation and Brownfields Reuse Program's Envirostor database identifies sites that have known contamination or sites where there may be reasons to investigate further. The database includes Federal Superfund sites, State Response, including Military Facilities and State Superfund, Voluntary Cleanup, and School sites. There are **27** listed ENVIROSTOR sites within a one-mile radius of the site. All 27 listed sites are located greater than 1/4 miles distance from the subject property.

Based on the information reviewed, and considering the separation distances, intervening construction and topographical differences, it is our opinion there is low potential for significant impact to the site from any listed ENVIROSTOR sites.

CA CPS-SLIC

The California Regional Water Quality Control Board (RWQCB) Cleanup Program Sites (CPS) formerly known as Spills, Leaks, Investigation and Cleanup Cost Recovery (SLIC) Listing was reviewed. There is **one** listed CA CPS-SLIC site within a 1/2-mile radius of the site. The listed site is located greater than ¼ miles distance from the subject property

Based on the information reviewed, and considering the separation distances, intervening construction, and topographical differences, it is our opinion there is a low potential for significant impact to the site from any listed CA CPS-SLIC site.

4.0 RECORDS REVIEW

VCP

The California Department of Toxic Substance Control Volunteer Cleanup Program (VCP) Properties database contains low threat level properties with either confirmed or unconfirmed releases, and the project proponents have requested that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs. There are **two** listed VCP sites within a 1/2-mile radius of the site. Both listed sites are located greater than ¼ miles distance from the subject property.

Based on the information reviewed, and considering the separation distances, intervening construction, and topographical differences, it is our opinion there is a low potential for significant impact to the site from any listed VCP site.

ENG/INST CONTROLS & DEEDS

The Engineering/Institutional Controls & Deed Restriction Database (ENG/INST CONTROLS & DEEDS) contains a listed of sites where engineering, institutional controls or deed restrictions have been implemented. Engineering controls are physical measures selected for the purpose of preventing or minimizing exposure to hazardous substances. These may include, but are not limited to, fencing, capping, horizontal or vertical barriers, hydraulic controls, or alternative water supplies. Institutional Controls are non-engineered instruments such as administrative or legal controls that help minimize the potential for human exposure. The review indicates there is **one** listed ENG/INST CONTROLS & DEEDS site within a 1/2-mile radius of the site. The listed site is located greater than ¼ miles distance from the subject property.

Based upon the information reviewed, and considering the separation distances, intervening construction, and topographical differences, we conclude there is a low potential for significant impact to the site from any listed ENG CONTROLS site.

HAZNET

The HAZNET data is extracted from the copies of hazardous waste manifests received each year by the DTSC (Department of Toxic Substance Control). The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. The subject property was identified as a HAZNET site.

4 City Residential Management, 2000 Miramar St, Map ID# A1
Location: Subject property
Status: In 2000, unspecified sludge waste was disposed of at a transfer station.
Comments: Based upon the information reviewed, and considering the identified waste was reported to be properly disposed of at a transfer station, it is our opinion that there is a low potential for significant impact to the subject property from this listing.

Based on the information reviewed, it is our opinion there is a low potential for significant impact to the site from any listed HAZNET site.

4.0 RECORDS REVIEW

BROWNFIELDS

Brownfields are abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination. There are **four** listed BROWNFIELDS sites within a 1/2-mile of the subject property. All four listed sites are located greater than 1/8 miles distance from the subject property.

Based upon the information reviewed, and considering the separation distances, intervening construction, and topographical differences, we conclude the potential for significant impact to the subject site from any listed BROWNFIELDS site is low.

ORPHAN SUMMARY

A review of the unmapped or "orphan" sites did not reveal any additional sites of potential environmental concern to the subject property.

ENVIRONMENTAL RECORDS SOURCES SUMMARY

Based upon our review of all pertinent Regulatory Documents, it is our opinion there is only a low potential for any toxic or hazardous contamination to the property from any of these off-site "listed" sources.

The subject property was listed in the HAZNET database. According to the database, in 2000, an unspecified sludge waste was disposed of at a transfer station. Based upon the information reviewed, and considering the identified waste was reported to be properly disposed of at a transfer station, it is our opinion that there is a low potential for significant impact to the subject property from this listing.

4.0 RECORDS REVIEW

HISTORICAL USE INFORMATION ON AND ADJOINING THE PROPERTY

PRIOR ENVIRONMENTAL REPORTS

We reviewed a prior Phase I Environmental Site Assessment for the subject property prepared by EBI Consulting dated March 15, 2016. At the time of the report, the subject property was fully developed with the existing Miramar Towers apartment project. No recognized environmental conditions were identified in connection with the subject property. The historical review indicated that the site was undeveloped or developed with a few single family residences dating back to the late 1800s and was later developed with a hotel and single family residences from the early 1900s to the 1970s. The site was then developed with the existing apartment project in approximately 1980. The report indicated that, based upon the dates of construction, an asbestos survey was not conducted. The report did indicate that an Asbestos O&M Plan was in place at the subject property and recommended maintaining the O&M program.

We reviewed a limited asbestos bulk sampling report for the subject property prepared LA Testing, dated May 13, 2005. A sample of pipe insulation was submitted for laboratory analysis and was found not to contain asbestos.

We reviewed a Limited Asbestos Survey for the subject property prepared by Envirocheck Inc., dated May 9, 2011. A total of 20 bulk asbestos samples were collected and submitted for laboratory analysis including 8 samples of acoustical ceiling spray, 8 samples of dry wall mud and 4 samples of drywall & mud composition. All 20 samples were found not to contain asbestos.

We reviewed an Asbestos O&M Plan prepared for the subject property by EBI dated October 28, 2016. No sampling was conducted, however, suspect asbestos containing materials identified included textured ceiling and wall texture, sheet rock & joint compound, ceiling tiles, pipe insulation, vinyl flooring materials and construction mastics and caulking.

We reviewed an ACM Program Manual prepared for the subject property dated April 2017. Materials confirmed as non-asbestos included pipe insulation, ceiling texture and dry wall and mud composition. Presumed asbestos containing materials included vinyl flooring materials.

We reviewed a Limited Asbestos Survey prepared by Envirocheck dated September 13, 2018. A total of 108 bulk samples were collected and submitted for laboratory analysis. Materials sampled included acoustical ceiling spray, drywall mud & composition, various vinyl sheet flooring & vinyl composition title, vinyl flooring adhesive, vinyl cove base & adhesive, ceiling tile, thin set, grout, and ceramic title. Asbestos containing materials were confirmed to be present in four of the vinyl tile flooring and vinyl floor mastic samples.

HISTORICAL USE INFORMATION ON AND ADJOINING THE PROPERTY

AERIAL PHOTOGRAPHY

As a part of our due-diligence we reviewed aerial photographs included as part of a prior report by EBI Consulting (2016) and aerial photographs obtained from the USGS Earth Explorer, Historic Aerials, and Google Earth internet sites. Our review of the available photographs indicates the following activity on the site:

1923 The subject property appears to be occupied by several single family dwellings and small commercial buildings. Miramar St borders to the north followed by several dwellings. Dwellings and small commercial or apartment buildings appear to be present to the east. W 3rd Street borders to the south followed by single family dwellings. Several dwellings and small commercial buildings appear to be present to the west.

1938 The subject site and adjacent sites appear little changed except additional small commercial buildings are present to the south and southeast across W 3rd Street.

1948 The subject site and adjacent sites appear little changed.

1952 The subject site and adjacent sites appear little changed except apartments or similar commercial buildings are present to the north.

1960 The subject site and adjacent sites appear little changed.

1964 The subject site appear little changed except several of the residential dwellings have been removed from the southern portion of the site. The adjacent sites appear little changed.

1970 The subject site and adjacent sites appear little changed except additional dwellings appear to have been cleared from the subject property and new small commercial buildings appear to be present across W 3rd Street to the south.

1972 The subject site and adjacent sites remain little changed.

1976 Low resolution photograph. Most of the site appears to have been cleared of buildings and structures and the site appears to be vacant. The adjacent sites appear little changed.

1979 Low resolution photograph. The subject property appears to be under developed with the existing apartment project. The shell of the main building appears to be largely complete. The adjacent sites appear little changed.

1980 The subject property now appears to be fully developed with the existing apartment project. The adjacent sites remain little changed.

4.0 RECORDS REVIEW

HISTORICAL USE INFORMATION ON AND ADJOINING THE PROPERTY

AERIAL PHOTOGRAPHY CONTINUED:

1983 The subject site and adjacent sites appear little changed.

1985 Low resolution photograph. The subject site and adjacent sites appear little changed.

1989 The subject site and adjacent sites appear little changed.

1994 The subject site and adjacent sites appear little changed except the adjacent site to the southwest now appear to be vacant.

1995 The subject site and adjacent sites appear little changed.

2002 The subject site and adjacent sites appear little changed.

2003 The subject site and adjacent sites appear little changed.

2004 The subject site and adjacent sites appear little changed.

2005 The subject site and adjacent sites appear little changed.

2007 The subject site and adjacent sites appear little changed.

2009 The subject site and adjacent sites appear little changed except a new commercial building project is under construction to the northeast.

2010 The subject site and adjacent sites appear little changed except the new commercial building has been completed to the northeast.

2011 The subject site and adjacent sites appear little changed.

2012 The subject site and adjacent sites appear little changed.

2014 The subject site and adjacent sites remain little changed.

2017 The subject site and adjacent sites appear little changed except a new commercial building is present to the southwest.

2018 The subject site and adjacent sites remain little changed.

4.0 RECORDS REVIEW

HISTORICAL USE INFORMATION ON AND ADJOINING THE PROPERTY

USGS TOPOGRAPHIC MAPS

1894 Santa Monica 15' Quadrangle. The subject site appears to be vacant. The adjacent sites also appear to be mostly vacant with a few nearby scattered dwellings.

1896 Santa Monica 15' Quadrangle. The subject site adjacent sites appears little changed.

1898 Santa Monica 15' Quadrangle. The subject site adjacent sites appears little changed.

1900 Santa Monica 15' Quadrangle. The subject site adjacent sites appears little changed.

1902 Santa Monica 15' Quadrangle. The subject site adjacent sites appears little changed.

1921 Santa Monica 15' Quadrangle. The subject site now appears to be occupied by several single family dwellings. Residential or small commercial buildings also appear to be present on the adjacent sites.

1928 Los Angeles 7.5' Quadrangle. The subject site and adjacent sites appear little changed. Miramar Street is present to the north and W 3rd Street is present to the south.

1953 Hollywood 7.5' Quadrangle. The subject site and adjacent sites are located within a shaded region where only landmark structures are identified. No landmark structures are depicted on the subject property or immediate adjacent sites.

1966 Hollywood 7.5' Quadrangle. The subject site and adjacent sites appear little changed.

1972 Hollywood 7.5' Quadrangle. The subject site and adjacent sites appear little changed.

1981 Hollywood 7.5' Quadrangle. The subject site and adjacent sites appear little changed.

1991 Hollywood 7.5' Quadrangle. The subject site and adjacent sites appear little changed.

1994 Hollywood 7.5' Quadrangle. The subject site and adjacent sites appear little changed.

4.0 RECORDS REVIEW

HISTORICAL USE INFORMATION ON AND ADJOINING THE PROPERTY

SANBORN MAP

1906 The subject property appears to be occupied by approximately 7 or 8 single family dwellings and associated out buildings. Miramar Street borders to the north followed by vacant land and single family dwellings. Single family dwellings are present to the east. Ocean View Ave (W 3rd St) borders to the south followed by single family dwellings. Single family dwellings are present to the west.

1950 The majority of the site now appears to be occupied by multiple buildings comprising the Barker Motel. Several single family dwellings are also present on the eastern portion of the site. Miramar St borders to the north followed by apartments and single family dwellings. Apartments and residential dwellings are present to the east. W 3rd Street borders to the south followed by several residential dwellings and small commercial buildings including two gas and oil stations to the south and southwest. Apartments appear to be present to the east.

1958 The subject site and adjacent sites appear basically similar to 1958.

1963 The subject site appears little changed except several of the small hotel buildings have been removed from the southern portion of the site. The adjacent sites appear little changed.

1970 The site remains little changed except additional small structures have been cleared from the southern portion of the site. The adjacent sites appear little changed except a new small commercial building is present to the south across W 3rd Street.

CITY DIRECTORY REVIEW

City directories were reviewed as part of a prior environmental assessment for the subject property by EBI Consulting (2016). City directories were reviewed between the years 1924 and 2013 at approximately 5 year intervals. In 1924 and 1929 listings included Miramar Terrace Apartments and Hotel and multiple residences. From 1933 through 1958 listings included Barker Hotel and multiple residences. From 1962 through 1971 listings included New Miramar Hotel & Apartments and multiple residences. From 1981 through 2013 listings included multiple residences, Miramar Towers and Forest City Management.

CHAIN OF TITLE REVIEW

We reviewed a Chain of Title Guarantee issued by Commonwealth Land Title Insurance Company dated September 28, 2018. The name of the assured was Miramar Tower. The report indicated that on February 13, 1979, the property was transferred from Realtech to Miramar Tower, a Limited Partnership.

4.0 RECORDS REVIEW

HISTORICAL USE INFORMATION ON AND ADJOINING THE PROPERTY

INTERVIEWS

Fire Department

We contacted Los Angeles Fire Department regarding potential records for the property. They indicated that they had no records of underground storage tanks or hazardous materials incidents for the subject property.

Water Department

The domestic water supply for the property is provided by the City of Los Angeles Department of Water and Power. We obtained a copy of the latest annual water quality report from the City of Los Angeles Department of Water and Power internet site. According to the water quality report, the water supply for the site meets state and federal safe drinking water standards.

Property Owner/Management

Interviews with property ownership representative and the onsite property management indicated they were unaware of any environmental liens, activity or land use restrictions related to environmental issues. They were also unaware of any underground storage tanks or other environmental concerns associated with the property.

HISTORICAL REVIEW SUMMARY

Based upon the aerial photograph reviews, historic map reviews, city directory reviews, prior environmental reports and personal interviews, it appears the property was originally vacant undeveloped land dating back to the late 1800s prior to being developed with several single family residential dwellings by the early 1900s. The project then appears to have been developed with multiple apartment and hotel buildings as well as several single family residences by the 1920s. Site usage remained little changed until the mid to late 1970s at which time the project was vacant. The existing apartment project was then developed on the site in 1979-1980. Site usage has remained little changed since that time. Based upon our investigation, we do not see a potential human health risk resulting from past uses. There is no historical evidence of any chemical misuse, unlawful dumping or landfilling, or other sources of contamination to the property.

5.0 SITE RECONNAISSANCE

METHODOLOGY AND LIMITING CONDITIONS

The site reconnaissance was conducted on April 27 & 30, 2018; November 1, 2018 and July 9, 2019. The scope of the onsite assessment consisted of a visual evaluation of the project site, building exteriors, interior common areas, and typical resident units in the buildings. Not all resident units were inspected. We have assumed areas not inspected were originally constructed with similar materials as those observed. Items of potential or recognized environmental significance to the property, if any, were noted.

GENERAL SITE SETTING

The Miramar Towers project is located at 2000 Miramar Street, Los Angeles, Los Angeles County, California. Miramar Towers is a low income HUD subsidized 62+ elderly project that consists of an existing eight story reinforced concrete apartment building structure that contains a total of 157 apartment units. The project was constructed in 1979-1980 and is currently +/- 39 years old. In addition to the 157 apartment units, the project includes an onsite rental office, an attached single story Community Building wing, two (2) 8-stop hydraulic elevators, two (2) interior/exterior stair wells, 45 open parking stalls (8 HC), onsite concrete sidewalks, perimeter public concrete sidewalks, asphalt paved driveways and parking areas, perimeter steel fencing, a concrete patio, landscaping, irrigation, a trash chute, a trash room, storm water catch basins and valley gutters, site lighting, project signage, underground utility services and related site improvements. The +/- 2.737 acre site is 1.5 miles northwest of the downtown Los Angeles, CBD. The property is located within the general southwest quadrant formed by of the intersection of State Route 101 and Interstate 110 in the central portion of the City of Los Angeles California. The site is located in an area containing primarily multifamily residential and commercial development.

INTERIOR AND EXTERIOR OBSERVATIONS

Our exterior inspection and area reconnaissance revealed no evidence of any significant soil staining or distressed vegetation. No unusual odors, pools of liquids, drums, leaking containers, hazardous materials or other unidentified substances were observed during the site reconnaissance. The onsite stormwater catch basins appeared to be free of any contaminants. Typical paint, maintenance supplies, and cleaning chemicals appeared to be properly stored and handled. A flame-safe metal cabinet is provided for small containers of paints and flammable liquids.

USTs/ASTs

There are no underground storage tanks at this site registered with the California Regional Water Quality Control Board. No underground storage tanks were observed during the site reconnaissance. The building is served by an emergency electrical generator. The generator is fueled from an integrated aboveground diesel storage tank. The tank appeared to be approximately 50 gallon capacity. The generator and associated tank were newer and appeared to remain in good condition.

5.0 SITE RECONNAISSANCE

ADJACENT PROPERTIES

North: Miramar Street followed by apartments and single family dwellings.

East: Apartments.

South: W 3rd Street followed by apartments, a motel and a retail strip center.

West: Apartments followed by eTown Inn.

The adjacent properties, as viewed from a distance, showed no visible evidence of environmental contamination.

ADDITIONAL HAZARDS/SERVICES

PCBs

PCBs have commonly been used as dielectric (insulating) fluids in transformers and capacitors and in fluorescent light ballasts. PCB-containing fluids were used mainly in indoor locations to minimize the possibility of fire if electrical equipment overheated. The potential hazard occurs when PCBs vaporize and convert chemically to dioxins and furans (two toxic substances). A secondary potential hazard is from spills and leaks that could contaminate the groundwater, soil or buildings with PCB fluids.

PCB-containing fluorescent light ballasts and air conditioning unit capacitors are considered a minor hazard as long as they are not leaking. However, it should be noted certain states regulate disposal of PCB-containing ballasts and capacitors, regardless of unit quantity or size.

Electrical service is provided underground from a pad-mounted electrical transformer. The transformers are owned by the local electric utility. We did not observe any leaking, staining, soil discoloration or stressed vegetation around the transformer vaults. Any future leakage would be the responsibility of the utility. The building is served by two hydraulic elevators. We did not observe evidence of leaking or significant staining around the elevator equipment.

Based upon our visual observations of the onsite transformers, it is our opinion the potential for PCB contamination at the site is low.

5.0 SITE RECONNAISSANCE

ASBESTOS

Asbestos can be found in almost any building material and is routinely found in insulation, spray applied acoustic ceiling finishes, flooring and roofing materials. Asbestos-containing material (ACM), defined by the Environmental Protection Agency as any material that contains more than 1% asbestos by weight, is most hazardous when friable - i.e., material which, when dry, may be crumbled, pulverized, or reduced to powder by hand pressure. Friable asbestos is considered more hazardous than non-friable asbestos because it can become more easily airborne, and thus is more likely to enter the respiratory system where it can lead to serious health problems. Inhalation of airborne fibers is believed potentially to lead to lung diseases and cancer. Chrysotile is the most common form of asbestos accounting for 95% of asbestos used in the United States. Less common is amphiboles asbestos group, which includes such forms of asbestos as amosite and crocidolite.

An assessment for potential asbestos containing materials was conducted as part of our inspection. The scope of the assessment was conducted based upon the general requirements outlined in ASTM E2356-10 for baseline surveys. The assessment was limited to a visual evaluation of the accessible structural areas within the buildings. Suspect asbestos containing materials were identified included acoustical ceiling texture, wallboard/joint compounds, acoustical ceiling tiles, various vinyl flooring and associated mastics, cove base and mastics, pipe insulation, and building penetration mastics and caulking compounds. We reviewed a limited asbestos bulk sampling report for the subject property prepared LA Testing, dated May 13, 2005. A sample of pipe insulation was submitted for laboratory analysis and was found not to contain asbestos. We reviewed a Limited Asbestos Survey for the subject property prepared by Envirocheck Inc., dated May 9, 2011. A total of 20 bulk asbestos samples were collected and submitted for laboratory analysis including 8 samples of acoustical ceiling spray, 8 samples of dry wall mud and 4 samples of drywall & mud composition. All 20 samples were found not to contain asbestos. We reviewed a Limited Asbestos Survey prepared by Envirocheck dated September 13, 2018. A total of 108 bulk samples were collected and submitted for laboratory analysis. Materials sampled included acoustical ceiling spray, drywall mud & composition, various vinyl sheet flooring & vinyl composition title, vinyl flooring adhesive, vinyl cove base & adhesive, ceiling tile, thin set, grout, and ceramic title. Asbestos containing materials were confirmed to be present in four of the vinyl tile flooring and vinyl floor mastic samples.

Prior asbestos surveys/sampling found that the acoustical ceiling textures, wallboard/joint compounds, ceramic tile, grout, thinset and pipe insulation were non-detect for asbestos. Asbestos containing materials were confirmed to be present in some vinyl tile flooring and sheet vinyl mastics. **Materials observed generally remained in good condition.** ***An Asbestos Operations and Maintenance Plan has been put in place at the subject property. Any necessary abatement actions should be completed prior to any renovation or demolition work is started.***

5.0 SITE RECONNAISSANCE

ADDITIONAL HAZARDS/SERVICES

LEAD IN PAINT

In 1977, the Consumer Products Safety Commission banned for consumer use paint products that contain lead in excess of 0.06%. If ingested, lead in substances such as water, paint chips or dust can lead to colic, weakened muscle response and a variety of other adverse health effects. Ingestion of lead in paint is particularly a concern in young children, pregnant women and fetuses. Excessive blood-lead levels can seriously impair a child's brain and central nervous system, causing impaired reading and learning disabilities, delayed cognitive development, mental retardation, seizures, convulsions, coma, and death.

A lead-based paint hazard is defined - by the Department of Housing and Urban Development (HUD), and by many state regulatory agencies - as paint containing 0.5% lead by weight/or 1.0 milligram per square centimeter (mg/cm^2). In 1978, the Consumer Product Safety Commission (CPCS) prohibited the sale of paint containing more than 0.06% lead by weight. Since that time, many state, county, or city agencies have adopted lead regulations/ordinances designed to protect children from a lead-based paint hazard: evaluating the health hazard for children may involve medical confirmation of blood-lead levels in children exposed to the surface. It should be noted the area of lead-based paint control and maintenance is evolving rapidly, particularly with respect to legal and medical aspects. As a result, local, state and federal lead prevention programs or health departments should be periodically consulted as to standard and accepted practices and procedures for handling lead-based paint hazards.

The subject project was constructed in 1979-1980, therefore, there is a low potential for lead-based paints. Since the project is designated as housing exclusively for the elderly or persons with disabilities, and no children are present as residents, Lead-Based Paint requirements are not applicable.

DOMESTIC WATER

Drinking water may be contaminated with lead, petroleum products, solvents and other chemical substance allowed to enter groundwater. Public water departments are required to analyze and treat water prior to public consumption to assure it meets current government standards.

The domestic water supply for the property is provided by the City of Los Angeles Department of Water and Power. We obtained a copy of the latest annual water quality report from the City of Los Angeles Department of Water and Power internet site. According to the water quality report, the water supply for the site meets state and federal safe drinking water standards.

It is our opinion the human health risks associated with the water supply at the project is very low.

5.0 SITE RECONNAISSANCE

ADDITIONAL HAZARDS/SERVICES

RADON

Radon is a naturally occurring, highly mobile, chemically inert radioactive gas created through radioactive decay of uranium and thorium. The potential for occurrence of radon varies widely and is dependent upon (1) the concentration of radioactive materials in the underlying bedrock; (2) the relative permeability of soils with respect to gases; and (3) the amount of fracturing or faulting in surficial materials (EPA, 1987). The concern regarding radon and its potential effects upon humans arises from the results of studies (EPA 1987) which suggest approximately 15% of all lung cancer mortalities in the United States may be attributable to exposure to radon.

The EPA has established a concentration of radon of 4 picocuries per liter as a maximum permissible concentration "action level". Concentrations above this value would signal a potential health threat. According to studies, an average concentration in homes across the United States is on the order of 1.4 picocuries per liter. Our conversations with the Regional office of the EPA indicate radon has not been a problem in areas underlain by thick sequences of glacial and alluvial soils. The site is underlain with alluvial type soil deposits. The primary concern with radon is over accumulation in poorly ventilated basement areas.

The EPA Radon Zone for Los Angeles County is Zone 2. Zone 2 households have an average indoor level of greater than 2 but less than 4 pCi/L. Short-term radon testing was conducted in general accordance with the protocols outlined in AARST MAMF-2010 Protocol for Conducting Radon and Radon Decay Product Measurements in Multifamily Buildings, Section III. An exception to this protocol was the number of units to be tested. The minimum number of units to be tested shall be at least twenty-five percent of randomly selected ground level units in the building. A total of twenty (20) resident rooms and two (2) non-resident rooms were selected for testing. The testing was conducted using an activated charcoal device manufactured by Aircheck Inc.

606	6	9003645	0.3
607	6	9003641	0.3
707	7	9003635	0.3
708	7	9003648	0.3
817	8	9003634	0.3
818	8	9003638	0.3
Community & Game Room	1	9003632 9003627	0.3 0.3 (Duplicate)
Manager Office	1	9003612 9003649	0.3 0.3 (Duplicate)
Blank	N/A	9003629	0.3

Onsite short term radon test results were all well below the EPA recommended action level of 4.0 pCi/L. Based upon the results of the onsite short-term radon testing, no additional actions are recommended.

5.0 SITE RECONNAISSANCE

ADDITIONAL HAZARDS/SERVICES

VAPOR ENCROACHMENT

Vapor Encroachment Condition (VEC) is the presence or likely presence of Chemicals of Concern (COC) vapors in the subsurface of the target property caused by the release of vapors from contaminated soils and/or groundwater either on or near the target property. A Vapor Encroachment Screen is a screening process designed to determine the potential for chemicals of concern vapors released from contaminated soil or groundwater to impact a property.

A limited Vapor Encroachment Screen for the subject was conducted utilizing ASTM E 2600-10 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. The standard uses a two tiered methodology designed to quickly and cost effectively screen out properties with a low risk of Vapor Encroachment. Per HUD Map Chapter 9 Requirement, Tier 1 Screening has been conducted as part of this assessment.

Tier 1 – Initial Screening for potential Vapor Encroachment Conditions (VEC) was designed as a screening step to supplement a Phase I Environmental Assessment and relies on information already collected in a Phase I Investigation. Tier 1 methodology utilizes two primary tools for screening, search distance and chemicals of concern. Search distance includes the primary area of concern surrounding the target property and secondary area of concern for sites potentially upgradient of the target property. Chemicals of concern review addresses whether or not potential chemicals of concern, those chemicals that have the potential to volatize and become vapor, are likely to be present.

Based upon the information reviewed and documented during this assessment, which included a review of all major governmental environmental regulatory databases (see attached EDR Radius Map Report) and an historical review of the site and surrounding properties, and taking into consideration the separation distances, topographical differences, presumed groundwater flow, and local soils conditions, no potential vapor encroachment conditions were identified in connection with the subject property.

6.0 FINDINGS, OPINIONS, CONCLUSIONS AND DEVIATIONS

Prior asbestos surveys/sampling found that the acoustical ceiling textures, wallboard/joint compounds, ceramic tile, grout, thinset and pipe insulation were non-detect for asbestos. Asbestos containing materials were confirmed to be present in some vinyl tile flooring and sheet vinyl mastics. Materials observed generally remained in good condition. An Asbestos Operations and Maintenance Plan has been put in place at the subject property. Any necessary abatement actions should be completed prior to any renovation or demolition work is started. Lead-based paint testing was not required for this project. The project is located in EPA Radon Zone 2, a moderate risk radon region. Onsite short-term radon test results were all well below the EPA Recommended Action Level, therefore, no additional actions are recommended with respect to radon. No potential vapor encroachment conditions were identified in connection with the subject property.

No significant data gaps were encountered during preparation of this report. Full site access was provided during our site inspection. Sanborn Fire Insurance Map coverage was available for the property area and sufficient other historical sources were available to develop the site history for the property.

The historical review indicated that the site was originally vacant undeveloped land dating back to the late 1800s prior to being developed with several single family residential dwellings by the early 1900s. The project then appears to have been developed with multiple apartment and hotel buildings as well as several single family residences by the 1920s. Site usage remained little changed until the mid to late 1970s at which time the project was vacant. The existing apartment project was then developed on the site in 1979-1980. Site usage has remained little changed since that time. Based upon our investigation, we do not see a potential human health risk resulting from past uses.

The subject property was listed in the HAZNET database. According to the database, in 2000, an unspecified sludge waste was disposed of at a transfer station. Based upon the information reviewed, and considering the identified waste was reported to be properly disposed of at a transfer station, it is our opinion that there is a low potential for significant impact to the subject property from this listing. Based upon our review of all pertinent Regulatory Documents, it is our opinion there is only a low potential for any toxic or hazardous contamination to the property from any off-site "listed" sources.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 of Miramar Towers project located at 2000 Miramar Street, Los Angeles, Los Angeles County, California. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property.

It is our opinion the potential for significant hazardous contamination at the site is low. No additional investigation appears to be warranted at this time.

DEVIATIONS

Surveys Inc. has performed this Phase I Environmental Site Assessment in accordance with ASTM E1527-13 Standard Practice for Environmental Site Assessments with no conscious exceptions to or deletions from the standard.

ENVIRONMENTAL PROFESSIONALS' CERTIFICATION AND SIGNATURE

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in section 312.10 of 40 CFR 312 and we have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Respectfully submitted by:

EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). SURVEYS INC. used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by SURVEYS INC.. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

An online review and analysis by SURVEYS INC. of the RCRA-LQG list, as provided by EDR, has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

BONNIE BRAE VILLAGE EPA ID:: CAR000197236:	208 S BONNIE BRAE ST	NE 1/8 - 1/4 (0.159 mi.)	67	194

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

An online review and analysis by SURVEYS INC. of the RCRA-SQG list, as provided by EDR, has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

An online review and analysis by SURVEYS INC. of the ENVIROSTOR list, as provided by EDR, has revealed that there are 26 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

An online review and analysis by SURVEYS INC. of the LUST list, as provided by EDR, has revealed that there are 19 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

An online review and analysis by SURVEYS INC. of the UST list, as provided by EDR, has revealed that there are 23 UST sites within approximately 0.25 miles of the target property.

State and tribal voluntary cleanup sites

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

An online review and analysis by SURVEYS INC. of the VCP list, as provided by EDR, has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

An online review and analysis by SURVEYS INC. of the SWEEPS UST list, as provided by EDR, has revealed that there are 7 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

An online review and analysis by SURVEYS INC. of the RCRA NonGen / NLR list, as provided by EDR, has revealed that there are 21 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-20-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically)within 30 days of the change.
Eval Division: Los Angeles City Fire Department

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-12-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by SANTOS MENDOZA - MAINTENANCE SUPERVISOR. CONTACT INFORMATION: BARRY.GANS@LOSANGELESREHABWC.COM Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically)within 30 days of the change.

Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by TODD BURNETT - CHIEF TECHNICIAN. CONTACT INFORMATION: TODDBURNETT@JERITY.ORG Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically)within 30 days of the change.

Registry ID: 110066953407
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110066953407

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-14-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by MARCOS ARGEUATA (SUPERVISOR). Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change.
