Council File No: 20-1312

Comments for Public Posting: 20-1312 Brush Clearance is NOT conducted in accordance with standards of <3 in ground cover and tree canopies above 6ft and 1/3 clearance of shrubs of 3-18ft in Eagle Rock (Onteora), many sites in Highland Park/Mt. Washington, and Barrett Road/Elephant Hill/Rose Hills in El Sereno. Provide more brush clearance enforcement and perhaps drone surveillance. The City could be considered as not enforcing our ordinances and grossly negligent in case of brush fires.

Council File No: 20-1312
Comments for Public Posting: 20-1312 As no council file numbers are provided for General Public Comment this is the most closely related Council File Number. Provide comments and coordination of the LAFD and the LAPD with the current development of the HOUSING and SAFETY ELEMENTS UPDATES currently underway within the Dept.City Planning. Current drafts of the Safety Element are to be reviewed by the California safety authorities but no reference is made to the City and/or County of Los Angeles coordination, acceptances, and/or approvals of the Updated Element. THIS IS WRONG.
