Comments for Public Posting: I strongly oppose this motion. I go out every saturday to meet with the unhoused neighbors we know and provide whatever temporary supplies we can and everyone i talk to always speaks about how much the shelter choices put them in a very difficult position, even more so than just staying out of them. how can the regular citizens be doing more on the ground work and taking in these stories than the city? i cannot believe that the city is doing any of that if this is the proposal, or if its, then this is cruelty beyond imagination. trashing the belongings of the encampments will not provide a solution besides further cruelly displacing our most vulnerable citizens, these people are our neighbors and are homeless as CITY FAILURES.
