Comments for Public Posting: I feel that the City of Los Angeles should not place a ban on any "rodeo" activities, such as but not limited to bareback riding, saddle bronco riding, bull riding, calf roping and steer wrestling. I feel these events played an important role in our country's past and will continue to play one in our future, as they give an option for youths to belong to something they can enjoy and be proud of, it also gives an outlet for families and individuals alike to spend quality time enjoying these activities. Thank you

Comments for Public Posting: As a resident of South El Monte in Los Angeles County, I am outraged by the potential ban on horse riding and rodeo activities. This represents a significant government overreach. I fully support the horse community and humbly ask for a vote against banning rodeo activities and riding a horse. It is alarming that we have to fight for these rights. What is seriously wrong with you all to even discuss this?
