Comments for Public Posting: As a current City employee looking to retire in the next few years, please reject this motion. It would adversely impact thousands of current LACERS retirees who served the City well earning their retirement benefits. Our health care plans are very well managed and I would expect that they be maintained for those of us looking forward to our retirement benefits at such time as we are eligible.

Comments for Public Posting: I am a retired member of LACERS, having served 32 years with the City of Los Angeles. Please reject this Motion as it would adversely impact thousands of retired LACERS members who served the City well. Our health care plans are already very well managed by LACERS, and are especially needed during the current pandemic.

Comments for Public Posting: As a 56 year old who has served the City for 33 years, I object to this change. I have personally witnessed an 80 year old woman (my mom) panic about a change made to her deceased husband's health access. My mom has been battling cancer since 2013 and the change to send her to the exchange was not only frightening but costly. There is a benefit to having LACERS negotiate the contracts so seniors don't have to wander through a very complicated system. I find this proposal unconscionable and insulting. Most City employees and retirees do not have the income that you and I do and I do not feel this proposal serves those that have faithfully served the City.

Comments for Public Posting: To ensure that City employees would continue to have decent and affordable health care once we retired, the City took an additional 4 percent from our pay. Even though many employees were against it at time, the result is one of the best funded retirement health care funds in the nation. The motion to reduce our retiree health care coverage at any time, much less during a PANDEMIC, must NOT be supported. Please vote NO.
