Comments for Public Posting: We need Medicare for All single payer now. We needed it during the Spanish flu a century ago, and we need it like most of the countries that have created universal health care single payer health care systems across the planet. The Covid 19 pandemic reminded us that we are all interconnected and not immune from each other. We deserve compassionate public scientific health care just like we deserve , healthy compassionate public schools and public green energy , or non- contaminated food and water. Healthcare is a human right and vital resource that everyone deserves. Please stop allowing corporate interests to run “healthcare”. Time for everybody in & no body out.
