Comments for Public Posting: Please do the responsible thing with this second request for information. Just because various city departments have future plans for a property doesn't mean that property shouldn't be saved for those future planned purposes. Isn't that what city planning is all about? The park and rec dept should not have to give up any land until all areas of the city have an equitable amount of green space. Additionally, the use of unused or underutilized parcels for building should be prioritized in the following manner:
1-In-house facilities for the seriously mentally ill with 24/7 care,
2-In-house facilities for drug rehab with 24/7 care, 3-assisted living facilities for the elderly and disabled and 4-transitional housing/shelters as needed. WAKE UP...HOUSING FIRST ISN'T WORKING!!!
