**Comments for Public Posting:** I oppose the use of our public beaches and their parking lots for homeless encampments, both for “temporary” and long-term use.

**Comments for Public Posting:** I strongly OPPOSE the homeless beach housing at Will Rogers. Bonin is a vindictive and careless politician with too much power and not enough sense.

**Comments for Public Posting:** I oppose the measure to allow small houses and tents along the beach. Our beaches are the most precious of southern cal resources, used by families and people across the entire city. The situation in Venice has made it impossible for tourists or so cal residents to safely enjoy. It will be devastating to the tourism industry already suffering from the last year. The homeless needs resources and mental health help. That's where the resources and energy should go to. It's amazing to me that this idea has gotten this far!

**Comments for Public Posting:** I strongly oppose any plan resulting in the homeless being set up at Will Rogers State Beach parking lot. There should not be homeless deliberately placed near where children play, ever. The area is also highly prone to fire, and the latest devastation has been both caused by transients. The palisades has many danger spots in terms of evacuating when there is an emergency. The parking lot housing would impede that and possibly cost lives. Theft has skyrocketed. Kids are being followed by transients in town. We are all baffled as to why anyone would suggest such a horrible, anti-family and anti-safety idea. and this will only get worse. Please reconsider!
