**Comments for Public Posting:** Our public parks are a rare and valuable treasure for the community, especially for kids and parents. Homeless encampments bring fires, filth, drugs, illegal activity, and unpredictable mental health behaviors. Bonin's idea to give our precious parks over to the homeless disregards what the community wants and needs desperately, which is a safe place to enjoy sports, outdoor activities, and indoor classes, with or without kids. There is no halfway measure here: if there are homeless encampments, they take over the entire park so families can no longer enjoy what the parks offer because they will no longer be safe for other community members. Bonin recklessly disregards his constituents' wishes in favor of what he must see as ways to fulfill his political ambitions. This is NOT a viable solution to the homeless problem. Bonin and his ideas must go.
