

MOTION

The Goodyear Industrial Tract comprises over 280 parcels across 205 acres, and is home to more than 200 companies with approximately 4,000 employees. The area is one of the oldest and largest tracts of industrial land in Los Angeles, and features a diverse mix of small, light manufacturing firms, recycling companies, import/export firms, and wholesalers. The tract is located in the South Los Angeles Promise Zone, Comprehensive Economic Development Strategy Focus Area, and Opportunity Zone.

Additional business activity in the area has generated an increase in traffic on the streets in and around the tract. It is critical that a comprehensive transportation study be undertaken to examine the situation and present innovative proposals to increase traffic flow. The study should include quantifying vehicular and truck traffic volumes, an analysis of ingress and egress patterns, and an examination of pedestrian activity, including the number of school children who traverse the area.

I THEREFORE MOVE that the City Council instruct the City Administrative Officer to release a Request for Bids (RFB) to its list of prequalified firms to procure a comprehensive transportation study of the Goodyear Tract to determine innovative options that will address the increased traffic and pedestrian activity and present the findings and recommendations to the Council.
