RM

Honorable Members of the PLUM Committee:

Our community is deeply concerned and determined to protect the Santa Monica Mountains — and the zoning regulations that have been essential to the Los Angeles region for generations.

Your colleague Councilmember Paul Koretz has heard the pleas of his constituents and he has made a motion to recommend that the Director of Planning brings an end to a proposed General Plan Amendment that would have a severe impact on the environment and set a dangerous precedent for our city. We ask that you support motion CF 21-0777, and that you stand with thousands of Los Angelenos who actively oppose this unnecessary commercial project in a residential community that sits in a high fire severity zone. Our property, canyons and lives are literally at stake.

This project will create an environmental disaster, set a dangerous precedent for future uncontrolled commercial development in the precious natural resource of the Santa Monica Mountains, and create real life-safety hazards. This is no time to destroy decades of careful zoning and planning.

Every major environmental group in the region stands with our community in opposing this project — among them are the Hillside Federation, Tree People, The Santa Monica Mountains Conservancy, the Bel Air Beverly Crest Neighborhood Council, and the Benedict Canyon Association.

We urge you to stand with Councilmember Koretz (who has been attacked by the developer for standing up for his constituents). Please join the thousands of members of our community who need your support in ending this project. We urge you to approve the Motion.

I have lived in Benedict Canyon for 36 years. The traffic has increased to the point that I cannot even consider heading down to the San Fernando Valley between 3:30 pm and 6:30 pm. Our canyon roads cannot handle any additional traffic. There is no place for commercial development in our canyon

Honorable Members of the PLUM Committee:

Our community is deeply concerned and determined to protect the Santa Monica Mountains — and the zoning regulations that have been essential to the Los Angeles region for generations.

Your colleague Councilmember Paul Koretz has heard the pleas of his constituents and he has made a motion to recommend that the Director of Planning brings an end to a proposed General Plan Amendment that would have a severe impact on the environment and set a dangerous precedent for our city. We ask that you support motion CF 21-0777, and that you stand with thousands of Los Angelenos who actively oppose this unnecessary commercial project in a residential community that sits in a high fire severity zone.

This project is going to set a dangerous precedent for future uncontrolled commercial development in the Santa Monica Mountains, which are one of the only natural resources we have left, not to mention the real life-safety hazards that will come with this sort of development. This is no time to destroy decades of careful zoning and planning.

Every major environmental group in the region stands with our community in opposing this project — among them are the Hillside Federation, Tree People, The Santa Monica Mountains Conservancy, the Bel Air Beverly Crest Neighborhood Council, and the Benedict Canyon Association. Why are you not standing with Councilmember Koretz (who has been attacked by the developer for standing up for his constituents). Please join the thousands of members of our community who need your support in ending this project. We don't believe you've been bought off. Please prove it to us.

We urge you to approve the Motion.

Thank you,
Nick Ullett

We ask that you support motion CF 21-0777, and that you stand with thousands of Los Angelenos who actively oppose this unnecessary commercial project in a residential community that sits in a high fire severity zone.

This project will create an environmental disaster, set a dangerous precedent for future uncontrolled commercial development in the precious natural resource of the Santa Monica Mountains, and create real life-safety hazards. This is no time to destroy decades of careful zoning and planning. Traffic in the area is already at capacity. It's incredibly difficult for me to make a left turn out of my street onto Benedict Canyon due to the number of thoughtless commuters who don't live here and think it's a speedway and a garbage dump. We have already had a bicyclist killed this past year in a hit and run. And I fear daily the idiot who tosses a cigarette out their car window. An increase in this activity is unthinkable. Changing our residential zoning creates enormous safety hazards.

Every major environmental group in the region stands with our community in opposing this project — among them are the Hillside Federation, Tree People, The Santa Monica Mountains Conservancy, the Bel Air Beverly Crest Neighborhood Council, and the Benedict Canyon Association. We urge you to stand with Councilmember Koretz (who has been attacked by the developer for standing up for his constituents). Please join the thousands of members of our community who need your support in ending this project.

We urge you to approve the Motion. Please protect and support the residents of the Canyons.

AS

Honorable Members of the PLUM Committee:

I stand with the vast majority of my community that a hotel does not belong in Benedict Canyon, and that any changes to the current zoning regulations would cause irreparable harm to this canyon as well as the other hillside canyons and communities of Los Angeles.

Our community is deeply concerned and determined to protect the Santa Monica Mountains — and the zoning regulations that have been essential to the Los Angeles region for generations.

Your colleague Councilmember Paul Koretz has heard the pleas of his constituents and he has made a motion to recommend that the Director of Planning brings an end to a proposed General Plan Amendment that would have a severe impact on the environment and set a dangerous precedent for our city. We ask that you support motion CF 21-0777, and that you stand with thousands of Los Angelenos who actively oppose this unnecessary commercial project in a residential community that sits in a high fire severity zone.

This project will create an environmental disaster, set a dangerous precedent for future uncontrolled commercial development in the precious natural resource of the Santa Monica Mountains, and create real life-safety hazards. This is no time to destroy decades of careful zoning and planning.

Every major environmental group in the region stands with our community in opposing this project — among them are the Hillside Federation, Tree People, The Santa Monica Mountains Conservancy, the Bel Air Beverly Crest Neighborhood Council, and the Benedict Canyon Association. We urge you to stand with Councilmember Koretz (who has been attacked by the developer for standing up for his constituents). Please join the thousands of members of our community who need your support in ending this project.

We urge you to approve the Motion.

Thank you,
Andrea Silver

Honorable Members of the PLUM Committee:

Our community is deeply concerned and determined to protect the Santa Monica Mountains — and the zoning regulations that have been essential to the Los Angeles region for generations.

Your colleague, Councilmember Paul Koretz, has heard the pleas of his constituents and he has made a motion to recommend that the Director of Planning bring an end to a proposed General Plan Amendment that would have a severe impact on the environment and set a dangerous precedent for our city. We ask that you support motion CF 21-0777, and that you stand with thousands of Los Angelenos who actively oppose this unnecessary commercial project in a residential community that sits in a high fire severity zone.

This project will create an environmental disaster, set a dangerous precedent for future uncontrolled commercial development in the precious natural resource of the Santa Monica Mountains, and create real life-safety hazards. This is no time to destroy decades of careful zoning and planning.

Aside from the many negatives of this proposed project, the road system is woefully overloaded and there is no way possible to widen and improve them. This project even has the audacity to suggest that a private easement known as Oak Pass will be used for secondary access to the hotel. This 17ft-20ft substandard driveway will be required to handle the northbound emergency exiting of the Oak Pass Road residents while the LAFD is attempting to enter in the opposite direction during an area-wide emergency. And the developer is asking the City allow the hotel and all its guests also to use this PRIVATE street at the same time. Besides being illegal, it will be an impossible situation leading to the potential massive loss of life.

Every major environmental group in the region stands with our community in opposing this project — among them are the Hillside Federation, Tree People, The Santa Monica Mountains Conservancy, the Bel Air Beverly Crest Neighborhood Council, and the Benedict Canyon Association. We urge you to stand with Councilmember Koretz (who has been attacked by the developer for standing up for his constituents). Please join the thousands of members of our community who need your support in ending this project.

We urge you to approve the Motion.

Thank you,
Bill and Susan Ehrlich

BG

Dear Councilmember,

On November 30 you will be asked to vote on a motion submitted by our Councilmember Paul Koretz, with respect to a proposed commercial hotel development in our residential Benedict Canyon neighborhood. I live at 9722 Oak Pass Road, three houses away from the proposed second entry to the hotel project--and am one of the most hugely affected residents.

I am writing to you to urge you to support Councilman Koretz's motion.

Benedict Canyon is the only canyon in the Santa Monica Mountains that is and always has been entirely free of commercial development. One single developer is now proposing to build a huge commercial hotel that would operate 24 hours a day, bring in hundreds of guests, employees, automobiles day and night and disrupt the ecology and environment of our hillside community forever. Think of the noise, visualize driving on the already wildly overburdened Benedict Canyon corridor road which connects the West Side to the Valley. Imagine the enormous increase in traffic and pollution--which would spill over into all the other canyons and displace commuting onto Beverly Glen Canyon, Coldwater Canyon, Laurel Canyon, Sepulveda Boulevard, and the 405 Freeway. The burden of the hotel on the traffic patterns alone would be a nightmare that would haunt the city until the end of time.

Councilmember Koretz, who has been intimately involved for over two years in the debate over this project, recognizes that the project creates substantial fire danger, destruction of wildlife, would set a precedent for commercial development in all the hillside/canyon areas and spur massive future uncontrollable construction of the Santa Monica Mountains. For these reasons, Councilman Koretz publicly opposes the project with such passion that he has filed the motion that will end consideration of the commercial hotel portion of the project.

Save Our Canyon, the non-profit formed by members of our community, (of which I am on the Board) has obtained nearly 11,000 signatures from concerned residents who strenuously oppose this project. For these residents this matter is of extreme importance—they are greatly energized and are intensely involved in the political process to bring this commercial project to an end.

We ask that you hear the voice of our community, recognize the overwhelming opposition of our community, and that you stand by our community. Help us save the Santa Monica Mountains. Help us turn back this audacious effort to destroy decades of careful planning and zoning. Vote to approve the motion.

Thank you,

Bruce Goldsmith

Honorable Members of the PLUM Committee:

The entire mountain community is distressed concerning the prospect of their being a lack of protection for the Santa Monica mountains and the communities who live in these mountains. Our community is not only concerned but also determined to protect the Santa Monica Mountains - and the zoning regulations that have been essential to wildlife and our mountain communities in the Los Angeles region for generations.

This project will create an environmental disaster, set a dangerous precedent for future uncontrolled commercial development in the precious natural resource of the Santa Monica Mountains, and create real life-safety hazards. This is no time to destroy decades of careful zoning and planning.

Councilmember Paul Koretz has responded to the appeals of his constituents and other Los Angelenos to save the Santa Monica Mountains as planning without commercial development.

Please support motion CF 21-0777, and stand with thousands of Los Angelenos who actively oppose this unnecessary commercial project in a residential community that sits in a high fire severity zone.

Our community and most in the Los Angeles area are very supportive of Councilmember Koretz's motion that the Director of Planning bring an end to this proposed General Plan Amendment that would have a severe impact on the environment and set a dangerous precedent for our city.

Every major environmental group in the region stands with our community in opposing this project - among them are the Hillside Federation, Tree People, The Santa Monica Mountains Conservancy, the Bel Air Beverly Crest Neighborhood Council, and Bel Air Hills community along with others.

Sincerely, Valerie Henderson
Charles Henderson

DS

Honorable Members of the PLUM Committee:

Our community is deeply concerned and determined to protect the Santa Monica Mountains — and the zoning regulations that have been essential to the Los Angeles region for generations.

Your colleague Councilmember Paul Koretz has heard the pleas of his constituents and he has made a motion to recommend that the Director of Planning brings an end to a proposed General Plan Amendment that would have a severe impact on the environment and set a dangerous precedent for our city. We ask that you support motion CF 21-0777, and that you stand with thousands of Los Angelenos who actively oppose this unnecessary commercial project in a residential community that sits in a high fire severity zone.

This project will create an environmental disaster, set a dangerous precedent for future uncontrolled commercial development in the precious natural resource of the Santa Monica Mountains, and create real life-safety hazards. This is no time to destroy decades of careful zoning and planning.

Every major environmental group in the region stands with our community in opposing this project — among them are the Hillside Federation, Tree People, The Santa Monica Mountains Conservancy, the Bel Air Beverly Crest Neighborhood Council, and the Benedict Canyon Association. We urge you to stand with Councilmember Koretz (who has been attacked by the developer for standing up for his constituents). Please join the thousands of members of our community who need your support in ending this project.

We urge you to approve the Motion.

Thank you,

Honorable Members of the PLUM Committee:

I have been living on Hutton Drive in the Benedict Canyon area for the past 22 year. In the past two years, I have been consumed with the audacity of a man who is attempting to change the environment that attracted me to this area. It is not only the noise and pollution that is of concern, but the danger of fire, the removal or established and mature oaks and other trees, the increase of traffic in the two lane and some single lane streets, and tremendous danger to the environment.

Our community is deeply concerned and determined to protect the Santa Monica Mountains — and the zoning regulations that have been essential to the Los Angeles region for generations.

Your colleague Councilmember Paul Koretz has heard the pleas of his constituents and he has made a motion to recommend that the Director of Planning brings an end to a proposed General Plan Amendment that would have a severe impact on the environment and set a dangerous precedent for our city. We ask that you support motion CF 21-0777, and that you stand with thousands of Los Angelenos who actively oppose this unnecessary commercial project in a residential community that sits in a high fire severity zone.

This project will create an environmental disaster, set a dangerous precedent for future uncontrolled commercial development in the precious natural resource of the Santa Monica Mountains, and create real life-safety hazards. This is no time to destroy decades of careful zoning and planning.

Every major environmental group in the region stands with our community in opposing this project — among them are the Hillside Federation, Tree People, The Santa Monica Mountains Conservancy, the Bel Air Beverly Crest Neighborhood Council, and the Benedict Canyon Association.

I hope that the PLUM Committee will also stand by Councilmember Koretz and this community in supporting motion CF21-0777.

EA

Honorable Members of the PLUM Committee:

I write to ask for your vote on November 30, 2021 approving the motion filed by our Councilmember Paul Koretz to stop the commercial hotel project proposed for our entirely residential Benedict Canyon neighborhood. I ask that you stand with our Councilmember and the thousands of members of our community who recognize that this project will create an environmental disaster, set a horrible precedent for future uncontrolled commercial development in the precious natural resource of the Santa Monica Mountains, create a significant life-safety hazard in our severe fire zone, and destroy decades of careful zoning and planning.

Our Councilmember has heard the voice of our community and he has brought this motion to protect our rights from this completely outrageous and inappropriate development proposal. Our neighborhood organization, Save Our Canyon, has obtained signatures of more than 10,000 people who oppose this project. I urge you to reject the developer's scare tactics, his attack on Councilmember Koretz, and his baseless assertions that you should not consider this motion. Stand with us. Approve the motion.

Best regards,
Elise Archer

Honorable Members of the PLUM Committee:

Our community is deeply concerned and determined to protect the Santa Monica Mountains — and the zoning regulations that have been essential to the Los Angeles region for generations.

Your colleague Councilmember Paul Koretz has heard the pleas of his constituents and he has made a motion to recommend that the Director of Planning brings an end to a proposed General Plan Amendment that would have a severe impact on the environment and set a dangerous precedent for our city. We ask that you support motion CF 21-0777, and that you stand with thousands of Los Angelenos who actively oppose this unnecessary commercial project in a residential community that sits in a high fire severity zone.

This project will create an environmental disaster, set a dangerous precedent for future uncontrolled commercial development in the precious natural resource of the Santa Monica Mountains, and create real life-safety hazards. This is no time to destroy decades of careful zoning and planning.

Every major environmental group in the region stands with our community in opposing this project — among them are the Hillside Federation, Tree People, The Santa Monica Mountains Conservancy, the Bel Air Beverly Crest Neighborhood Council, and the Benedict Canyon Association. We urge you to stand with Councilmember Koretz (who has been attacked by the developer for standing up for his constituents). Please join the thousands of members of our community who need your support in ending this project.

We urge you to approve the Motion.

Thank you,
Paula F. Trattner
