Comments for Public Posting: Remove SAFEpass LA Vaccine checks. The science is clear and evolving. The vaccine efficacy wanes quickly. There is no reason to continue with the Pass as we are in the endemic end-phase of CoVid and it's variants.

Comments for Public Posting: Remove the vaccine requirements please. Being healthy should include allowing us to go to places such as the gym without a required prescription injected into us. Being healthy the right way should be our right!

Comments for Public Posting: LA City Council needs to align with the county and state and remove the SAFEPassLA vaccine checks immediately. Per the most recent statement from the CDC, those who have who have been vaccinated: 1. Can still get infected. 2. Have the same amount of virus as those who are unvaccinated, and 3. Can likely transmit the virus as easily as those who are unvaccinated. At what point when does this end? The bottom line is that LA City Council must stop treating vaccinated people differently than unvaccinated people. There should be no space for DISCRIMINATION in Los Angeles!

Comments for Public Posting: Hello. I entirely support this motion to remove the vaccine pass requirements from indoor and outdoor. At minimum, we should align with county and state direction. I would prefer entirely removing any and all vaccine mandates or associate measures forever. The covid vaccine does not offer one protection from infection or transmission which is what they were designed to do. All of these discriminatory practices must be abolished forever from our rules, regulations, laws, etc.
