Comments for Public Posting: Vaccine does not stop the spread of Covid and should not be mandated over natural immunity. People should not be forced to take an experimental vaccine without knowing how it is going to affect their health in few years.

Comments for Public Posting: I urge you to vote no on an indoor vaccine mandate. Please follow the science as we NOW know it. The vaccine does not prevent transmission. The vaccine does not prevent virus mutation. The vaccine does not lower the viral load if you become infected. The vaccine ONLY protects the recipient. This is factual science. Protect our medical freedom and freedom to choose.

Comments for Public Posting: It would be an unspeakably grave mistake to make a covid injection a requirement for entrance into any public place. People who are "vaccinated" transmit just as much or more disease as those who are not. None of the generally available covid injections in the U.S. have been fully approved. People who have recovered from Covid have much grater immunity than those who are "vaccinated" (and could be seriously harmed by a Covid injection). The 16,000 deaths that have resulted from the Covid injections and reported to VAERS likely only represent a small fraction of the actual number. Any mandate requiring people to be injected by any product (and especially one that is only available under Emergency Use Authorization) is unlawful, unconstitutional, un-American and in violation of the Nuremberg Code. May God guide us.
