Comments for Public Posting: My explicit desire is to see the end of mandatory positive vaccination status(having received however many are currently or in future recommended) as terms of continued employment or new employment as city employees or any employee. Regardless of my belief of the efficacy of the vaccine or any vaccine I believe that ALL medications, injections or alterations to my physique be it internal or external should be from the direct recommendation and supervision of medical personnel who have been monitoring my health history and current health status. And after all of this, it should still be my personal choice as to what actually happens medical to me. Having conditions of employment thrust upon the workforce is coercing them to comply, be it against their will or not, to continue providing for themselves and loved ones. Many of the people upset with the mandates have been faithful servants to the community and would be a tremendous loss to force them to leave in a time where they are needed the most
