PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

Office Building
7334 Topanga Canyon Boulevard
Canoga Park, California 91303

Report Date: August 5, 2019
Partner Project No. 19-253600.1

Prepared for:

Strategic Realty Holdings LLC
23901 Calabasas Road, Suite 2010
Calabasas, California 91302

PARTNER
Engineering and Science, Inc.

August 5, 2019

Mr. Eddie Lorin
Strategic Realty Holdings LLC
23901 Calabasas Road, Suite 2010
Calabasas, California 91302

Subject: Phase I Environmental Site Assessment
Office Building
7334 Topanga Canyon Boulevard
Canoga Park, California 91303
Partner Project No. 19-253600.1

Dear Mr. Lorin:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (714) 397-3103.

Sincerely,

Gavin S. Jones, EP
Principal

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Strategic Realty Holdings LLC for the property located at 7334 Topanga Canyon Boulevard in Canoga Park, Los Angeles County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Strategic Realty Holdings LLC with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the east side of Topanga Canyon Boulevard, approximately 200-feet south of the intersection of Valerio Street and Topanga Canyon Boulevard, within a mixed commercial and residential area of Los Angeles County. Please refer to the table below for further description of the subject property:

Subject Property Data	
Address:	7334 Topanga Canyon Boulevard, Canoga Park, California
Additional Addresses:	7322 and 7340 Topanga Canyon Boulevard
Property Use:	Commercial Office
Land Acreage (Ac):	0.86 Ac
Number of Buildings:	One
Number of Floors:	Two and Basement-Level Parking Garage
Gross Building Area (SF):	34,884 SF (Total)
Date of Construction:	1981
Assessor's Parcel Number (APN):	2111-011-030
Type of Construction:	Wood-Framed
Current Tenants:	Various Commercial Office Tenants
Site Assessment Performed By:	Brooke Hasty of Partner
Site Assessment Conducted On:	July 25, 2019

The subject property is currently occupied by various office tenants for commercial use. On-site operations consist of typical office activities and routine property maintenance. The subject property consists of a two-story commercial office building and basement-level parking garage located on the west side of the property. In addition to the current structure and parking garage, the subject property is also improved with paved drive areas and associated landscaping.

According to available historical sources, the subject property was formerly undeveloped as early as 1903; developed with a residence and garage by at least 1925; and developed with the current structure in 1981. The subject property has been occupied by various residential tenants from at least 1940 through 1970. Following the construction of the current structure, the subject property has been occupied by various commercial office tenants since at least 1985.

The immediately surrounding properties consist of an apartment complex to the north; a medical office building to the south; an educational center and apartment complex to the east across a paved alleyway; and various commercial offices and businesses to the west across Topanga Canyon Boulevard.

According to information obtained from the Regional Water Quality Control Board (RWQCB) Geotracker website and topographic map interpretation, the depth to groundwater in the vicinity of the subject property is inferred to be approximately between 25 and 35 feet below ground surface (bgs) and groundwater flow is inferred to be toward the south-southeast.

Findings

A *REC* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *CREC* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *HREC* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion.

- During the site reconnaissance, Partner observed a water-damaged wall within Unit 113 that appeared to have suspect mold growth near the base. Additionally, Partner observed a water-damaged ceiling tile with suspect mold growth in Unit 219. The water damage and suspect mold growth appeared minimal and can be repaired and/or replaced via routine property maintenance.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 7334 Topanga Canyon Boulevard in Canoga Park, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property; however, environmental issues were noted. Based on the conclusions of this assessment, Partner recommends the following:

- The observed water damaged materials and suspect mold growth should be repaired and/or replaced as part of routine property maintenance.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 7334 Topanga Canyon Boulevard in Canoga Park, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential

exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Strategic Realty Holdings LLC engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Strategic Realty

Holdings LLC. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past or current owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner requested information relative to deed restrictions and environmental liens, a title search, and completion of a pre-survey questionnaire from the Report User. This information was not provided at the time of the assessment.
- Partner submitted a Freedom of Information Act (FOIA) request to the City of Los Angeles Bureau of Sanitation (LA SAN) for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property and/or adjacent properties. As of this writing, this agency has not responded to Partner's request. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.
- Partner observed approximately 10% of all interior units and all common areas. Based on the size and nature of use of the unobserved units (office), this limited method of survey is not expected to alter the overall findings of this assessment.

Due to time constraints associated with this report, the Client has requested the report despite the above-listed limitations.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 7334 Topanga Canyon Boulevard in Canoga Park, California is located on the east side of Topanga Canyon Boulevard, approximately 200 feet south of the intersection of Valerio Street and Topanga Canyon Boulevard. According to the Los Angeles County Assessor, the subject property is legally described as "*TR=OWENSMOUTH*(EX OF ST) LOTS 3 THRU LOT 5 BLK 50", and ownership is currently vested in David Posner since 2014.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently occupied by various office tenants for commercial use. On-site operations consist of typical office activities and routine property maintenance. The subject property consists of a two-story commercial office building and basement-level parking garage located on the west side of the property. In addition to the current structure and parking garage, the subject property is also improved with paved drive areas and associated landscaping.

The subject property is designated for commercial/industrial development by the Los Angeles County.

The subject property was identified as an EDR Exclusive Historical Auto Stations (EDR Historic Auto) site in the regulatory database report, as further discussed in Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial and residential area of Los Angeles County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

North: Multi-family residential complex (21930 Valerio Street)
South: Various medical offices (7318 Topanga Canyon Boulevard)
East: A paved alleyway followed by multi-family residential townhomes and Canoga Park Early Education Center (7348 Topanga Canyon Boulevard)
West: Various commercial offices beyond Topanga Canyon Boulevard (7301 and 7335-7349 Topanga Canyon Boulevard [odds])

An adjacent property to the west was identified as a Hazardous Materials Facility (HAZMAT) site in the regulatory database report, as further discussed in Section 4.2.3.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Canoga Park, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 804 feet above mean sea level (MSL). The contour lines in the

area of the subject property indicate the area is sloping gently toward the south-southeast. The subject property is depicted as undeveloped on the 2012 map; however, only landmark features and roadways are shown on this topographic map issuance.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater flow in the vicinity of the subject property is inferred to be toward south-southeast. The nearest surface water in the vicinity of the subject property is the Bell Creek located approximately 0.41-mile to the southwest of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the Los Angeles Department of Water and Power (LADWP) serves the subject property vicinity. According to a representative of the LADWP, the sources of public water for the City of Los Angeles are surface water from the Los Angeles Aqueduct, local groundwater, and the Metropolitan Water District State Water Project.

According to information obtained from the Regional Water Quality Control Board (RWQCB) Geotracker website, depth to the high-water table is anticipated between 25 and 35 feet below ground surface (bgs).

2.4.3 Geology/Soils

The subject property is situated within the Transverse Ranges Physiographic Province of the State of California. The Transverse Ranges are an east-west trending series of steep mountain ranges and valleys. The east-west structure of the Transverse Ranges is oblique to the normal northwest trend of coastal California, hence the name "Transverse." The province extends offshore to include San Miguel, Santa Rosa, and Santa Cruz islands. Its eastern extension, the San Bernardino Mountains, has been displaced to the south along the San Andreas Fault. Intense north-south compression is squeezing the Transverse Ranges. As a result, this is one of the most rapidly rising regions on earth. Great thicknesses of Cenozoic petroleum-rich sedimentary rocks have been folded and faulted, making this one of the important oil producing areas in the United States.

Based on information obtained from the USDA Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as San Emigdio-Urban Land Complex. The San Emigdio series consists of deep, well drained, moderately high to highly permeable soils that formed in young and mixed alluvium derived from sandstone and shale. These soils are on valley floors and flood plains. Slopes range from 0 to 2 percent.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06037C1280F, dated September 26, 2008, the subject property appears to be located in Zone X, an area located outside of the 100-year and 500-year flood plains.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	**Source**	**Description/Use**
1903-1919	Topographic Maps, Sanborn Maps	Undeveloped/Native land
1925-1977	Aerial Photographs, Topographic Maps, Building Records, City Directories, Interviews, Sanborn Maps	Residential
1981-Present	Aerial Photographs, Topographic Maps, Building Records, City Directories, Interviews, On-site Observations, Sanborn Maps	Commercial; Occupied by various commercial office tenants

According to available historical sources, the subject property was formerly undeveloped as early as 1903; developed with a residence and garage by at least 1925; and developed with the current structure in 1981. The subject property has been occupied by various residential tenants from at least 1940 through 1970. Following the construction of the current structure, the subject property has been occupied by various commercial office tenants since at least 1985.

No potential environmental concerns were identified in association with the current or former use of the subject property.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) on July 18, 2019. The following was observed on the subject property and adjacent properties during the aerial photograph review:

Date:	***1928, 1938, 1947***	***Scale:***	***1"=500'***
Subject Property:	Appears to be developed with two residential structures		
North:	Appears to be developed with a barn; vacant land		
South:	Appears to be developed with various residences		
East:	Appears to be developed with various residences across an unpaved alleyway		
West:	Appears to be agricultural land across a paved roadway (Topanga Canyon Boulevard)		

Date:	***1952, 1959, 1967, 1972, 1977***	***Scale:***	***1"=500'***
Subject Property:	Appears to have been developed with an additional structure; no other significant changes visible		
North:	No significant changes visible		
South:	Appears to have been developed with an additional structure; no other significant changes visible		
East:	No significant changes visible		
West:	Agricultural land appears to have been removed; developed with various residences; vacant land across paved roadway (Topanga Canyon Boulevard)		

Date: 1983	*Scale: 1"=500'*
Subject Property:	Original structures appear to have been removed; appears developed in the current configuration with a commercial office building
North:	Original structure appears to have been removed; developed in the current configuration with a multi-family residential complex
South:	Original structures appear to have been removed; vacant land
East:	No significant changes visible
West:	Original structures appear to have been removed; developed in the current configuration with various commercial offices across a paved roadway (Topanga Canyon Boulevard)

Date: 1989	*Scale: 1"=500'*
Subject Property:	No significant changes visible
North:	No significant changes visible
South:	No significant changes visible
East:	Original structures appear to have been removed across a paved alleyway; vacant land
West:	No significant changes visible

Date: 1994, 2002, 2005, 2009, 2012, 2016	*Scale: 1"=500'*
Subject Property:	No significant changes visible
North:	No significant changes visible
South:	Appears to have been developed in the current configuration with a medical office building
East:	Appears to have been developed in the current configuration with various multi-family residential structures across a paved alleyway
West:	No significant changes visible

Copies of select aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from EDR on July 19, 2019. The following was observed on the subject property and adjacent properties during the fire insurance map review:

Date: 1919	
Subject Property:	Undeveloped land
North:	Undeveloped land
South:	Undeveloped land
East:	Undeveloped land
West:	Undeveloped land

Date: 1927, 1932	
Subject Property:	Appears to have been developed with a residence and a garage (7334 Topanga Canyon Avenue)
North:	Appears to have been developed with two residences (7344 and 7350 Topanga Canyon Avenue)
South:	Appears to have been developed with various residences (7304, 7310, and 7320

Date: 1927, 1932	
	Topanga Canyon Boulevard)
East:	Appears to have been developed with various residences and associated garages (7327-7343 Vassar Avenue)
West:	Appears to be vacant land across Topanga Canyon Boulevard

Copies of reviewed Sanborn Maps are included in Appendix B of this report.

3.3 City Directories

Partner reviewed historical city directories obtained from EDR on July 19, 2019 for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for 7334 Topanga Canyon Boulevard (Subject Property)	
Year(s)	**Occupant Listed**
1940	Paul McKaughan (7334 Topanga Canyon Boulevard)
1950	Paul McKaughan (7334 Topanga Canyon Boulevard)
1956	Paul McKaughan (7322 Topanga Canyon Boulevard)
1962	Paul McKaughan (7322 Topanga Canyon Boulevard)
1965	Paul McKaughan (7322 Topanga Canyon Boulevard)
1970	Paul McKaughan (7322 Topanga Canyon Boulevard); Various Commercial Office Tenants (7334 Topanga Canyon Boulevard)
1985	Various Commercial Office Tenants (7334 Topanga Canyon Boulevard)
1986	Allstate Insurance Companies Sales Offices, Richard Masters Insurance Services Canoga Park (7334 Topanga Canyon Boulevard)
1990	Allstate Insurance Companies Sales Offices, Richard Masters Insurance Services Canoga Park (7334 Topanga Canyon Boulevard)
1991	Canoga Park, Various Commercial Office Tenants (7334 Topanga Canyon Boulevard)
1995	Agoura, Canoga Park, Various Commercial Office Tenants (7334 Topanga Canyon Boulevard)
2004	No Info (7322 Topanga Canyon Boulevard)
2010	Various Commercial Office Tenants (7334 Topanga Canyon Boulevard)
2014	Various Commercial Office Tenants (7334 Topanga Canyon Boulevard)

According to the city directory review, the subject property has been occupied by various commercial office tenants since at least 1985. Prior to the construction of the current building in 1981, the subject property was occupied by Paul McKaughan as a single-family residence. Based on the city directory review, no environmentally sensitive listings were identified for the subject property addresses.

City Directory Search for Adjacent Properties	
Year(s)	**Occupant Listed**
1940	Jas Lowman (7337 Vassar Avenue)
1965	J Lowman (7333 Vassar Avenue)
1980	Various Commercial Office Tenants (7335 Topanga Canyon Boulevard)
1981	Nationwide Lost and Stolen Credit Card Reporting Agency, Credit Card Sentinel Inc, Ross Insurance Agency (7335 Topanga Canyon Boulevard)
1985	Rick Park (21930 Valerio Street); Various Commercial Office Tenants (7301 Topanga Canyon Boulevard); Various Commercial Office Tenants (7335 Topanga Canyon Boulevard); Jas

City Directory Search for Adjacent Properties	
Year(s)	**Occupant Listed**
	Lowman (7333 Vassar Avenue)
1986	Decorative Products World, Paint and Coatings Industry, Western Trade Publishing Co (7335 Topanga Canyon Boulevard)
1991	Various Multi-Family Residential Tenants (21930 Valerio Street); The Pioneer Chicken Company (7301 Topanga Canyon Boulevard); Various Commercial Office Tenants (7335 Topanga Canyon Boulevard)
1995	Norman and Connie McGinnis (21930 Valerio Street); Various Commercial Office Tenants (7301 Topanga Canyon Boulevard); Farmers Insurance Group, TAD Technical Services (7335 Topanga Canyon Boulevard)
2004	Various Multi-Family Residential Tenants (21930 Valerio Street); Various Commercial Office Tenants (7301 Topanga Canyon Boulevard); Sign of The Dove, Billing OFC, University, Diamond (7335 Topanga Canyon Boulevard); Lee Combs (7329 Vassar Avenue); Vichai Olimsakul (7333 Vassar Avenue); Richard Tran (7337 Vassar Avenue)
2010	Various Commercial Office Tenants (7301 Topanga Canyon Boulevard); Various Commercial Office Tenants (7335 Topanga Canyon Boulevard)
2014	Various Commercial Office Tenants (7301 Topanga Canyon Boulevard); Confluence Inc, Cimplebox Inc (7335 Topanga Canyon Boulevard)

According to the city directory review, the adjacent properties have been occupied by various multi-family residential and various commercial office tenants since at least 1980. Prior to that the adjoining properties were occupied by various residential tenants. Based on the city directory review, no environmentally sensitive listings were identified for the adjacent property addresses.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from EDR on July 18, 2019. The following was observed on the subject property and adjacent properties during the topographic map review:

Date: 1903	
Subject Property:	Undeveloped land
North:	Undeveloped land
South:	Undeveloped land
East:	Undeveloped land
West:	Undeveloped land

Date: 1925, 1927, 1928, 1932, 1933, 1944, 1947	
Subject Property:	Appears to be developed with a single structure
North:	Appears to be vacant land
South:	Appears to be developed with various structures
East:	Appears to be vacant land beyond which are various structures
West:	Appears to be vacant land

Date: 1952, 1967	
Subject Property:	Depicted as developed, no surface distinctions depicted
North:	Depicted as developed, no surface distinctions depicted
South:	Depicted as developed, no surface distinctions depicted
East:	Depicted as developed, no surface distinctions depicted
West:	Depicted as developed, no surface distinctions depicted

Date: 2012	
Subject Property:	No surface distinctions depicted
North:	No surface distinctions depicted
South:	No surface distinctions depicted
East:	No surface distinctions depicted
West:	No surface distinctions depicted

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 Health Department

Regulatory Agency Data	
Name of Agency:	City of Los Angeles Bureau Sanitation (LA SAN)
Point of Contact:	Ms. Rosemary Cubero
Agency Address:	2714 Media Center Drive, Los Angeles, California
Agency Phone Number:	(323) 342-6064
Date of Contact:	July 19 and July 26, 2019
Method of Communication:	Email
Summary of Communication:	As of the date of this report, Partner has not received a response from the LA SAN for inclusion in this report.

Copies of pertinent documents are included in Appendix B of this report.

4.1.2 Fire Department

Regulatory Agency Data	
Name of Agency:	Los Angeles Fire Department (LAFD)
Point of Contact:	N/A
Agency Address:	6811 De Soto Avenue, Canoga Park, California
Agency Phone Number:	(818) 756-8672
Date of Contact:	July 19, 2019
Method of Communication:	Online Review
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the LAFD.

Copies of pertinent documents are included in Appendix B of this report.

4.1.3 Air Pollution Control Agency

Regulatory Agency Data	
Name of Agency:	South Coast Air Quality Management District (SCAQMD)
Point of Contact:	N/A
Agency Address:	21865 Copley Drive, Diamond Bar, California
Agency Phone Number:	(909) 396-2000
Date of Contact:	July 19, 2019
Method of Communication:	Online
Summary of Communication:	No Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) or the presence of AULs, dry cleaning machines, or USTs were on file for the subject property with the SCAQMD.

Copies of pertinent documents are included in Appendix B of this report.

4.1.4 Regional Water Quality Agency

Regulatory Agency Data	
Name of Agency:	Los Angeles Regional Water Quality Control Board (LARWQCB)
Point of Contact:	N/A
Agency Address:	320 West 4th Street, #200, Los Angeles, California
Agency Phone Number:	(213) 576-6600
Date of Contact:	July 19, 2019
Method of Communication:	Online Review of GEOTRACKER
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the LARWQCB.

Copies of pertinent documents are included in Appendix B of this report.

4.1.5 Department of Toxic Substances Control

Regulatory Agency Data	
Name of Agency:	California Department of Toxic Substances Control (DTSC)
Point of Contact:	N/A
Agency Address:	1001 I Street, Sacramento, California
Agency Phone Number:	(916) 255-3545
Date of Contact:	July 19, 2019
Method of Communication:	Online Review of Hazardous Waste Tracking System (HWTS) and ENVIROSTOR
Summary of Communication:	The following records were on file for the subject property: • A-Line Messenger Service – Inactive as of September 2005 – No hazardous materials listings on file.

Copies of pertinent documents are included in Appendix B of this report.

4.1.6 Building Department

Regulatory Agency Data	
Name of Agency:	City of Los Angeles Division of Building and Safety (LADBS)
Point of Contact:	N/A
Agency Address:	201 North Figueroa Street, Los Angeles, California
Agency Phone Number:	(213) 473-3231
Date of Contact:	July 19, 2019
Method of Communication:	Online Review
Summary of Communication:	Records were available for review, as further discussed in the following table.

Building Records Reviewed for 7334 Topanga Canyon Boulevard (Subject Property)

Year(s)	Owner/Applicant	Description
1952	Paul McKaughan	Building Permit for Residence (7322)
1952	Paul McKaughan	Building Permit for Garage (7322)
1979	R.A.H. Construction, Inc.	Demolition Permit (7322)
1979	R.A.H. Construction, Inc.	Demolition Permit (7334)

Building Records Reviewed for 7334 Topanga Canyon Boulevard (Subject Property)		
Year(s)	**Owner/Applicant**	**Description**
1980	Ronald Hirschman and Ted Stein Jr.	Alteration Permit (7334)
1980	Ronald Hirschman and Ted Stein Jr.	Building Permit Application and Certificate of Occupancy x2 (7334)
1980	Ronald Hirschman and Ted Stein Jr.	Alteration Permit (7334)
1980	Ronald Hirschman and Ted Stein Jr.	Application for Grading (7334)
1981	Ronald Hirschman and Ted Stein Jr.	Certificate of Occupancy (7334)
1985	Ronald Hirschman and Ted Stein Jr.	Building Inspection Application (7334)
1985	Ronald Hirschman and Ted Stein Jr.	Alteration Permit (7334)
1986	Hirschman and Stein	Alteration Permit x3 (7334)
1994	Michael Veksler	Building Inspection Application (7334)
1999	Michael and Susan Toth	Building Permit Application and Certificate of Occupancy (7334)

Copies of pertinent documents are included in Appendix B of this report.

4.1.7 Oil & Gas Exploration

Regulatory Agency Data	
Name of Agency:	California Division of Oil, Gas and Geothermal Resources (DOGGR)
Point of Contact:	N/A
Agency Address:	4800 Stockdale Highway, #100, Bakersfield, California
Agency Phone Number:	(661) 322-4031
Date of Contact:	July 19, 2019
Method of Communication:	Online Review
Summary of Communication:	According to DOGGR, no oil or gas wells are located on or adjacent to the subject property.

4.1.8 Assessor's Office

Regulatory Agency Data	
Name of Agency:	Los Angeles County Assessor
Point of Contact:	N/A
Agency Address:	500 West Temple Street, Room 225, Los Angeles, California
Agency Phone Number:	(213) 974-2111
Date of Contact:	July 19, 2019
Method of Communication:	Online Review
Summary of Communication:	According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 2111-011-030 and is currently owned by David Posner since 2014. The current building was constructed in 1981 and totals approximately 34,884 square feet on a 0.86-acre lot.

Copies of pertinent documents are included in Appendix B of this report.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and

integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	N	N	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG)	0.25	N	N	**Y**
Federal IC/EC Registries	0.50	N	N	N
Federal ERNS Site	Subject Property	N	--	--
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site	0.50	N	N	N
State/Tribal Registered Storage Tank Sites (UST/AST)	0.25	N	N	N
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.50	N	N	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N
EDR MGP	1.00	N	N	N
EDR US Hist Auto Station	0.125	**Y**	N	N
EDR US Hist Cleaners	0.125	N	N	**Y**
Miscellaneous Databases	Variable	N	**Y**	**Y**

4.2.2 Subject Property Listings

The subject property is identified as an EDR Historic Auto site in the regulatory database report, as discussed below:

- The subject property, identified as RAM Enterprises Inc at 7334 Topanga Canyon Boulevard, was identified as a Historic Auto station site in the proprietary EDR database, based solely on city directory listings. According to available information, a tenant space at the facility was occupied by an office for RAM Enterprise between at least 2007 and 2009. The database triggered this

tenant identification as a gasoline service station. Based on Partner's review, the subject property was utilized for residential purposes prior to the construction of the existing commercial office building in 1981. Based on the nature of the listing, inclusion on the EDR Historic Auto database is not expected to represent a significant environmental concern.

4.2.3 Adjacent Property Listings

The adjacent property to the west is identified as a HAZMAT site in the regulatory database report, as discussed below:

- The property, identified as Sprint Nextel Cell Site LA37XC542 at 7301 Topanga Canyon Boulevard, is located adjacent to the west of the subject property. The facility was identified as a HAZMAT site by the EDR Radius Map Report. According to available information, the site is currently occupied by an active cell tower as of January of 2019. No violations were noted for the site. Based on the nature of the listing, cross-gradient positioning, and proximity beyond Topanga Canyon Boulevard, this listing is not expected to represent a significant environmental concern for the subject property and it is unlikely that a regulatory agency file review would alter the overall findings of this assessment.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.4 Sites of Concern Listings

No sites of concern were identified in the regulatory database report.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.5 Orphan Listings

No orphan listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from Strategic Realty Holdings LLC (User of this report).

User Responsibilities

Item	Provided By User	Not Provided By User	Discussed Below	Does Not Apply
Environmental Pre-Survey Questionnaire			**X**	
Title Records, Environmental Liens, and AULs			**X**	
Specialized Knowledge			**X**	
Actual Knowledge			**X**	
Valuation Reduction for Environmental Issues			**X**	
Identification of Key Site Manager	**Section 5.1.3**			
Reason for Performing Phase I ESA	**Section 1.1**			
Prior Environmental Reports		**X**		
Other				**X**

5.1 Interviews

5.1.1 Interview with Owner

Mr. David Posner, subject property owner, was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Mr. Posner, the subject property was developed in 1981 for commercial office use. Prior to that, the subject property was undeveloped. Mr. Posner further stated that there are no USTs, ASTs, clarifiers, oil/water separators, groundwater monitoring wells, or hazardous substance use/storage/generation on the subject property to the best of his knowledge.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User. The information requested was not received prior to the issuance of this report. Because the Report User (Client) is a potential purchaser, it is understood that the Report User would not have knowledge of the property that would significantly impact our ability to satisfy the objectives of this assessment. The lack of this information is not considered to represent a significant data gap.

5.1.3 Interview with Key Site Manager

A key site manager was not provided to be interviewed at the time of this assessment.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

No previous reports or other pertinent documentation was provided to Partner for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data	
Site Assessment Performed By:	Brooke Hasty
Site Assessment Conducted On:	July 25, 2019

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 7334 Topanga Canyon Boulevard (Subject Property)			
Name	**Title/Role**	**Contact Number**	**Site Walk* Yes/No**
Joe Kim	Broker	(310) 869-3913	Yes
David Posner	Property Owner	(818) 458-1810	Yes

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

Environmental concerns were identified during the on-site reconnaissance related to mold and damaged suspect asbestos-containing material (ACM), as further discussed in Section 6.3.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters located east on the subject property. An independent solid waste disposal contractor, Waste Management, removes solid waste from the subject property. According to property personnel, only household trash is collected in the on-site solid waste dumpsters. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City of Los Angeles services the subject property vicinity. No wastewater treatment facilities or septic systems were observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces towards storm water drains located throughout the subject property and in the public right of way. The subject property is connected to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required to formally determine actual wetlands on the subject property. No surface impoundments,

wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity and natural gas provided by Los Angeles Department of Water and Power (LADWP) and Southern California Gas Company (SoCalGas), respectively.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

Partner identified hazardous substances used, stored, and/or generated on the subject property as noted in the following table:

Hazardous Substances and/or Petroleum Products Noted On-site				
Substance	**Container Size**	**Location**	**Nature of Use**	**Disposal Method**
Hydraulic Oil	2x 5-gallon cans	Elevator Equipment Room	Elevator Motor	Transported off-site by Safety-Kleen monthly

Two 5-gallon hydraulic oil cans were observed in the elevator equipment room located on the subgrade parking level. The materials were found to be properly labeled and stored at the time of the assessment. Secondary containment is not provided. Based on the nature of use and overall small quantities observed, the observed hydraulic oil is not expected to represent a significant environmental concern. Refer to Section 6.2.4 for further discussion.

In addition, according to the subject property owner, Mr. David Posner, Units 206 through 210 have been recently vacated by a marijuana grow business. Two approximately 60-gallon Chem-Tainer buckets partially filled with plant food sludge was observed in the vacated area. The material is not considered hazardous but should be removed from the subject property for proper off-site disposal.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

Two 5-gallon hydraulic oil cans were observed in the elevator equipment room located on the subgrade parking level. Please reference Section 6.2.4 for additional information.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – "*Non-PCB;*" 2) 50 ppm-500 ppm – "*PCB-Contaminated;*" and, 3) Greater than 500 ppm – "*PCB-Containing.*" The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after July 2, 1979.

The on-site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. One pad-mounted transformer was observed on the subject property. The transformer was not labeled indicating PCB content and appeared to be utility-owned. No staining or leakage was observed in the vicinity of the transformer. Based on the good condition of the equipment, the transformer is not expected to represent a significant environmental concern.

The on-site reconnaissance additionally addressed one hydraulic elevator, serviced by Vertical Elevator Solution. The hydraulic fluid contained within elevator system can potentially contain PCBs. The elevator motor and associated hydraulic oil is located in the elevator equipment room situated on the subgrade parking level. Minor surficial staining was observed at the base of the elevator motor and near the two 5-gallon hydraulic oil cans. Partner did not observe cracks near the staining and no floor drains or other subsurface conduits were observed near the vicinity of the motor. Based on the initial development of the subject property in 1981, the elevator equipment is not suspected to contain PCBs. Based on the age and the low mobility of hydraulic fluid as a contaminant, the elevator and associated surficial staining is not expected to represent a significant environmental concern. However, the observed staining should be serviced as part of routine property maintenance.

No other potential PCB-containing equipment (interior transformers, oil-filled switches, hoists, lifts, dock levelers, balers, etc.) was observed on the subject property during Partner's reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. Construction materials including, but not limited to, thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building and that have not been appropriately tested may be considered "presumed asbestos-containing material" (PACM).

The subject property building was constructed in 1981 and may have asbestos containing materials (ACMs: materials containing >1% asbestiform components determined by the EPA 600/R-93/116 Method using Polarized Light Microscopy) present. The table below outlines suspect ACM that is generally found in buildings of this age:

Suspect ACM
Drywall Systems
Floor Tiles
Floor Tile Mastic
Carpet Mastic
Ceiling Tiles
Insulation
Roofing Material

Based on this building's date of construction, prior to disturbance, Partner recommends a comprehensive asbestos survey of the property be completed to determine the presence, condition, friability and likely future condition of suspect or confirmed ACM. All suspect materials must be handled as ACM according to local, state and federal regulations until the results of sampling and analysis indicate the material is a non-ACM. According to the US EPA, ACM that is intact and in good condition can, in general, be managed

safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm^2 (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

It is unlikely that LBP is present in buildings constructed after 1977. Therefore, due to the age of the subject property building, it is unlikely that LBP is present.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	**Average Predicted Radon Levels**	**Potential**
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the Los Angeles Department of Water and Power (LADWP) serves the subject property vicinity. According to a representative of the LADWP, the sources of public water for the City of Los Angeles are surface water from the Los Angeles Aqueduct, local groundwater, and the Metropolitan Water District State Water Project. According to the Los Angeles and the 2018 Annual Water Quality Report, water supplied to the subject property is in

compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property building for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

The following indications of water damage or mold growth were observed during Partner's visual assessment:

Mold Observations	
Location of area affected	**Condition**
Unit 113	Partner observed a water-damaged wall within the unit which appeared to have mold growth near the base.
Unit 219	Partner observed a water-damaged and crumbled ceiling tile on the floor that appeared to be impacted with suspect mold.

During the site reconnaissance, Partner observed a water-damaged wall within Unit 113 that appeared to have suspect mold growth near the base. Additionally, Partner observed a water-damaged ceiling tile with suspect mold growth in Unit 219. The water damage and suspect mold growth appeared minimal and can be repaired and/or replaced via routine property maintenance.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises.

6.4.1 PCBs

Various pole-mounted on the adjacent properties. No staining or leakage was observed in the vicinity of the transformers. Based on these observations, the presence of adjacent transformers is not expected to represent a significant environmental concern.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *REC* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *CREC* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *HREC* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion.

- During the site reconnaissance, Partner observed a water-damaged wall within Unit 113 that appeared to have suspect mold growth near the base. Additionally, Partner observed a water-damaged ceiling tile with suspect mold growth in Unit 219. The water damage and suspect mold growth appeared minimal and can be repaired and/or replaced via routine property maintenance.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 7334 Topanga Canyon Boulevard in Canoga Park, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property; however, environmental issues were noted. Based on the conclusions of this assessment, Partner recommends the following:

- The observed water damaged materials and suspect mold growth should be repaired and/or replaced as part of routine property maintenance.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 7334 Topanga Canyon Boulevard in Canoga Park, Los Angeles County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date 10-16-80 Lic. Class B-1 Lic. No 364909 Contractor RAIDER CONST, INC By Ronald A. Hirschman Pres

Contractor's Mailing Address 7335 TOPANGA CYN BLVD #201 C.P. 91303

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

15. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. Raider Const Co

Date 8/13/80 Lic. Class B-1 Lic. No. 364909 Contractor [signature]

Contractor's Mailing Address 7335 Topanga Cyn Canoga Park 91303

OWNER-BUILDER DECLARATION

16. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C for this reason _____

Date _____ Owner N/A

WORKERS' COMPENSATION DECLARATION

17. I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.).

Policy No. Not Avail. Company State Fund

☐ Certified copy is hereby furnished.

☒ Certified copy is filed with the Los Angeles City Dept. of Bldg. & Safety

Date 8/13/80 Applicant Raider Const. Co. [signature] Vice-Pres.

Applicant's Mailing Address 7335 Topanga Canyon Canoga Park 91303

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

18. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Date _____ Applicant N/A

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

19. I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name Independence Bank-Main Branch

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date _____ Lic. Class _____ Lic. Number _____ Contractor _____ (Signature)

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date 5/17/85 Lic. Class B Lic. Number 364909 Contractor Ronald Hirschman (Signature)

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

Date _____ Owner's Signature _____

WORKERS' COMPENSATION DECLARATION

18. I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.).

Policy No. 5/17/85 Insurance Company STATE FUND

☐ Certified copy is hereby furnished.

☐ Certified copy is filed with the Los Angeles City Dept. of Bldg. & Safety.

Date _____ Applicant's Signature Ronald Hirschman

Applicant's Mailing Address _____

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

19. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Date _____ Applicant's Signature _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

20. I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____ Lender's Address _____

21. I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

I realize that this permit is an application for inspection, that it does not approve or authorize the work specified herein, that it does not authorize or permit any violation or failure to comply with any applicable law, that neither the city of Los Angeles nor any board, department, officer or employee thereof make any warranty or shall be responsible for the performance or results of any work described herein or the condition of the property or soil upon which such work is performed. (See Sec. 91.0202 LAMC)

Signed Ronald Hirschman (Owner or agent having property owner's consent) Position Owner Date 5/17/85

PARTNER
Engineering and Science, Inc.

July 19, 2019

Los Angeles City Bureau of Sanitation
Industrial Waste Division
2714 Media Center Drive
Los Angeles, CA 90065
Attn: Ms. Rosemary Cubero
Phone: (323)-342-6064
Fax: (323)-342-6111

Subject: Records Review Request

To Whom It May Concern:

I am conducting an environmental site assessment on the following property addresses:

- **7334 Topanga Canyon Boulevard, Canoga Park, CA 91303**

As part of the investigation, I would like to review any and all records you have for the above-referenced property addresses pertaining to the following:

- Industrial wastewater discharge
- Current or historical clarifiers, oil/water separators, grease traps, interceptors
- Storm water/waste water
- Inspections

If possible, I would like to conduct the file review as soon as possible. Please contact me via phone (310-956-3701) or via email bhasty@partneresi.com to schedule an appointment if needed. Your immediate assistance is greatly appreciated. Thank you.

Sincerely,

Brooke Hasty

This Message is for Non-English Speaking LADWP Customers 17

QUALITY IN EVERY DROP

Director Message, Razmik Manoukian

For over a century, LADWP has been the steward of our City's water system and supply. It is a responsibility we take very seriously. Every day, we import raw water, purify it and deliver it to your tap 24-hours a day – all for less than half a penny per gallon. It is our duty to maintain the value of this precious resource, and to comply with increasing state and federal water quality mandates to protect every drop of water we deliver. In 2018, LADWP tested for over 200 constituents in the water and performed more than 120,000 tests on samples taken throughout the City - not just for regulatory compliance, but also for research and operational improvements.

We are proud of our success in water quality, especially with our continued progress on several large water quality initiatives. Over the last 20 years, LADWP has actively improved the water quality for our customers by removing large uncovered reservoirs such as Encino, Lower Stone, Silverlake and Hollywood out of service; covering distribution reservoirs such as Santa Ynez, Elysian and Upper Stone; building the new Headworks Reservoir, installing a state-of-the-art Dr. Pankaj Parekh Ultraviolet Disinfection Facility and deployed 96 million shade balls on the Los Angeles Reservoir. The latest water quality Improvement project is the Los Angeles Reservoir Ultraviolet Disinfection Plant project which is currently under construction. These projects were a massive undertaking which resulted in excellence in water quality.

This report summarizes the results of the water quality tests conducted in 2018 and provides specific information about the quality of water served in our neighborhoods. You will see that most constituents have not been detected in our water sources and those that are (see tables I-IV on pages 11-15), are safely within the regulatory limits for drinking water. We are proud to bring pure, clean, refreshing tap water to all our customers across the city – at home, at work and in our neighborhood parks every day.

At LADWP, we are committed to customer service. If you have any questions about your water quality or seek advice on how to improve water quality at your home or workplace, please do not hesitate to call our Water Quality Customer Care Line at (213) 367-3182.

MANAGING OUR WATER RESOURCES

A Message from Richard F. Harasick, LADWP Senior Assistant General Manager, Water System

Compared to previous years, the last two have been good for Los Angeles in terms of water resources. The Eastern Sierra snowpack, the main water source for the Los Angeles Aqueduct, is in very good shape for a change. The above average snowfall and the rains have made for a spectacular spring, and will help sustain our water needs well into the rest of the year.

We have gone from one extreme to the next; from parched dry conditions to more water than we can handle just like in 2017. It is important to remember that one good rainy season does not necessarily mean we will always enjoy an overabundance of water in the future.

That is why LADWP continues to focus on L.A.'s water future, employing long-term resource planning and management no matter the situation. Our goal in 2019 will be to get the water windfall to the right storage or treatment facility, thus ensuring a sustainable and resilient water supply for the years to come.

With our abundant rainfall, stormwater capture in L.A. County, which includes the LADWP service territory, stood at 113 percent of normal for the water year October 1, 2018 to May 1, 2019. That's approximately 23.5 billion gallons of water, enough to supply over 24,000 L.A. households annually. Through our stormwater capture infrastructure, rain barrels and cisterns, Los Angeles has been carefully harnessing this precious resource to recharge our local aquifers and help reduce our reliance on imported purchased water.

LADWP is also rising to meet the challenges of future water supplies with the ultimate sustainability endeavor. The city of Los Angeles' recent announcement to recycle 100 percent of all wastewater by 2035 will require major infrastructure investment to move advanced treated pure water from the Hyperion Water Treatment Plant to additionally replenish our groundwater aquifers. This large capital improvement project represents another Mulholland moment, a game-changer at par with building another aqueduct. Its completion will be a leap for Los Angeles towards water independence.

To kick start that effort a wastewater ozone demonstration project at the Donald C. Tillman Plant in the San Fernando Valley is in progress to begin advanced wastewater treatment operations. This is the initial phase of an effort to replenish L.A.'s groundwater in the San Fernando Valley. This pure water will be conveyed to the Hansen Spreading Grounds where it will percolate through the soil. Once ready it will be pumped through existing groundwater wells, treated again and placed back into the distribution system.

There is no better and smarter way to manage our water resources than through water conservation. L.A. residents have truly made this a way of life and our city's per capita water use as of fiscal year 2017-18 is 112 gallons. Ours is one of the lowest of any major U.S. city and lower than it was in 1970, despite a population increase of more than one million people. LADWP has been working closely with our elected officials, other city departments, and customers to reduce water use across all sectors. The city's goal is to reduce water use by 25 percent by 2025, and 30 percent by 2035. We continue to encourage conservation through rebates and incentives for water-saving measures and devices. Furthermore, we are finding ways to conserve within our own system and operations. As an example, LADWP's Water Loss Task Force has been deploying strategies to reduce water losses in our distribution system.

Our professional forefathers undertook the complex and monumental task of constructing the Los Angeles Aqueduct to bring reliable, fresh, quality water to Los Angeles. LADWP staff today are just as committed to fulfill that goal, innovating and adopting modern solutions to operational and resource challenges. We remain steadfast in our resolve to ensure the reliability and sustainability of water for our customers and the entire city of Los Angeles.

WHERE DOES L.A. GET THE WATER IT NEEDS?

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

- Microbial contaminants, such as viruses and bacteria that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants, such as salts and metals, that can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides that may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals that are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, agricultural application, and septic systems.
- Radioactive contaminants that can be naturally-occurring or the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, the U.S. Environmental Protection Agency (U.S. EPA) and the State Water Resources Control Board (SWRCB) prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. SWRCB regulations also establish limits for contaminants in bottled water that provide the same protection for public health.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. 2019¸ The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the U.S. EPA's Safe Drinking Water Hotline (800) 426-4791.

IMPORTANT NOTICE

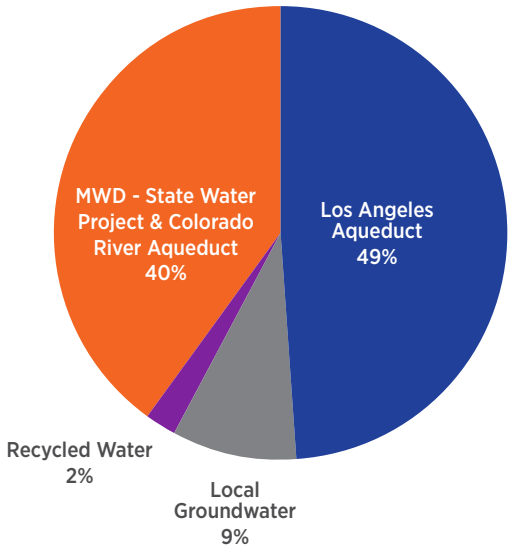
Precautions for the Special Needs Population

There are certain health conditions for which additional precautions on environmental exposures, including drinking water, would be advisable. Elderly customers and infants can be particularly at risk from infection as well as those with weakened immune systems including individuals living with HIV/AIDS or other immune system disorders, those who may have undergone chemotherapy or those who have received organ transplants.

Customers concerned with these types of health challenges should seek advice from their health care providers about drinking tap water. Contact U.S. EPA's Safe Drinking Water Hotline at (800) 426-4791, or visit www.epa.gov for free guidelines on how to reduce the risk of infection by Cryptosporidium and other microbial contaminants.

L.A.'S WATER SOURCES IN 2018

2018 Water Sources



REGULATORY COMPLIANCE

Regulatory Compliance How do we measure up?

LADWP works around the clock to ensure that the drinking water we deliver to our customers is of the highest quality and meets all safety requirements. Highly trained, certified treatment operators monitor our water treatment operations continuously, thereby helping meet federal and state standards for drinking water. In 2018, we tested for more than 200 constituents in the water and performed more than 120,000 tests on samples taken throughout our water system.

Notice of Violations of Drinking Water Regulations

Water quality is LADWP's highest priority. Staff works to ensure treatment protocols are followed year round at each of the city's water treatment facilities. Unfortunately, LADWP was issued one citation in 2018 for violating the surface water treatment rule. This violation was reported in the 2017 annual drinking water report. LADWP addressed the citation and put measures in place to prevent this type of occurrence in the future. LADWP received no additional violations in 2018.

Notification Levels Established for Two Fluorinated Compounds

On July 13, 2018, the California State Water Resources Control Board, Division of Drinking Water (SWRCB-DDW) issued health-based drinking water Notification Levels (NLs) for Perfluorooctanoic acid (PFOA) and Perfluorooctane sulfonic acid (PFOS). PFOA and PFOS are compounds that have been used in consumer products to make materials stain-resistant, water-proof, and non-stick. They are also used on surface coatings for paper, cardboard packaging, carpets, furniture, leather, fire-retardant foams, cookware, and equipment lubricants.

The NL issued is a health-based advisory level, not a regulatory level, established by SWRCB-DDW for chemicals that may present health risks but have yet to go through a Health Hazard Assessment. A Health Hazard Assessment is part of the process required to formally adopt a Maximum Contaminant Level (MCL) and includes rigorous research and data analysis by the State Office of Environmental Health.

The NLs for PFOA and PFOS have been set at 14 parts per trillion (ppt) and 13 ppt, respectively. A ppt is equivalent to one ounce in 7.5 billion gallons of water. An NL requires a public water supplier to notify SWRCB-DDW and its governing bodies if drinking water tests exceed the level and recommends customer notification.

Health consequences for exposure to significant levels of PFOA and PFOS may include liver toxicity, cancer risks, and immunotoxicity. Human exposure to PFOA and PFOS are primarily through consumer products, food, indoor and outdoor air, and dust. There is potential for exposure via ingestion of drinking water, particularly in former PFC manufacturing areas. Major U.S. manufacturers voluntarily phased out production of PFOS between 2000 and 2002, and subsequently for PFOA in 2006 due to toxicological concerns.

LADWP tested for PFOA, PFOS, and other PFC's in its source water and distribution system in 2013-2014, well after phased out production of these compounds as part of U.S. EPA's Unregulated Contaminant Monitoring Rule 3 (UCMR3).

During UCMR3 over 38 samples were collected from 11 different monitoring locations. Results for all samples were below laboratory detection levels utilizing advanced U.S. EPA certified test methods for these compounds and well below the NLs for PFOA and PFOS. LADWP continues monitoring for PFOA, PFOS, and other PFC's, including testing of local groundwater sources.

LADWP has a comprehensive water quality monitoring program to help ensure the safety of our water supply. Our water meets or exceeds all State and Federal drinking water standards established by the SWRCB-DDW and the U.S. EPA.

SWRCB-DDW has results of statewide testing for PFOA and PFOS on its website: https://www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/PFOA_PFOS.html

LEAD AND DRINKING WATER IN L.A.

Lead is commonly found throughout our environment – in the air, soil, and in homes with old lead-based paints. Fortunately, lead is not found in any of the city's water sources. LADWP has participated in the federal Lead and Copper Rule (LCR) sampling program since 1991 and has taken steps to eliminate lead containing materials in our distribution system. Los Angeles has and continues to be in compliance with the lead and copper regulation, based on residential sampling. In addition, LADWP is improving its corrosion control plan to further minimize lead exposure at the tap.

LADWP most recently conducted LCR residential sampling in 2018. To find the LCR results, see Table I (cont'd) on page 12.

The LCR sampling program focuses on single family residences which were built from 1982 to 1987 that have copper pipes plumbed with lead solder. Customers with qualifying homes that participate in the sampling program will get their tap water tested for lead and copper at no cost. Customers who think their home may qualify can participate in LADWP's next round of LCR sampling are asked to contact us at (213) 367-3182.

In Los Angeles, the main source of lead in drinking water is household plumbing, primarily in homes built before 1986 where lead solder was used to join copper pipes. In 1986, federal law restricted the use of lead in lead-based solder to 0.2% and in pipes and pipe fittings used to serve drinking water to 8%. This helped reduce the amount of lead at the tap inside homes. In 2010, California law further restricted the amount of lead in pipes and pipe fittings to 0.25%, which again reduced the amount of lead at the tap inside homes. The amount of time water remains stagnant in home plumbing will affect how much lead could potentially leach into the tap water. The longer water remains motionless in the pipes, the more likely higher levels of lead will leach into drinking water. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is also available from the Safe Drinking Water Hotline or at www.epa.gov/lead.

Voluntary Lead Testing of Drinking Water at California Public and Private K-12 Schools

In January 2017, the SWRCB-DDW amended LADWP's domestic water supply permit to include a new voluntary program to test for lead in drinking water at California public and private K-12 schools within its service area. Schools interested in participating in this program can find out more information on www.ladwp.com/waterquality under Water Quality in The News, Lead Testing for Los Angeles Schools. Written requests will be accepted until November 1, 2019.

As of December 2018, LADWP has received and processed 24 requests from schools. No school had lead levels above the action level of 15 parts per billion. The breakdown of the samples results are as follows:

Total Samples Tested: 57

Non-Detect Results: 48

Above Action level: 0

Maximum Result: 3.5 µg/L

Average Result: 0.22 µg/L

If you have any questions regarding this program, please contact us at (213) 367-3182.

AB 746 Requires Lead Testing in California Public K-12 Schools

Effective January 1, 2018, California Assembly Bill 746 requires community water systems to test for lead in drinking water at California public K-12 schools within their service area by July 1, 2019. This law compliments the existing optional lead testing in schools program that began early last year. Under the new lead testing program, all public K-12 schools must participate in lead testing unless they can show that their school was constructed or their plumbing was replaced after December 31, 2009, and that they have conducted equivalent lead testing after January 1, 2009 and posted the results on their website.

Since the effective date, LADWP has established a schedule for four rounds of testing to complete sampling for 103 schools within our service area. LADWP has contacted and sent out testing kits to public K-12 schools within its service area. In 2018, three schools were tested. The results are included below. No school had lead levels above the action level of 15 parts per billion. All remaining schools should be tested by July 2019. If you have any questions regarding this new program, please contact us at (213) 367-3182.

Total Samples Tested: 11

Non-Detect Results: 5

Above Action level: 0

Maximum Result: 3.6 µg/L

Average Result: 1.24 µg/L

Assessment Programs for Surface and Groundwater Sources

Purchased Supplies:

The Metropolitan Water District (MWD) receives and treats water from the State Water Project and the Colorado River that is then delivered to Los Angeles customers. Three of the five MWD treatment plants: F.E. Weymouth, Robert B. Diemer and Joseph Jensen, supply water to the Los Angeles area. MWD tests its water for nearly 400 constituents and performs about 250,000 water quality tests per year on samples gathered from its vast distribution system. Analysis of these samples is undertaken at MWD's state-of-the art water quality laboratory. Results from MWD are provided to LADWP and are included in the report on Tables I, II and III.

Safeguarding Our Surface Water

Administered by the State Water Resources Control Board, Division of Drinking Water (SWRCB-DDW), the Surface Water Treatment Rule (SWTR) is a set of drinking water regulations that establish specific treatment requirements for surface water to reduce the risk of waterborne diseases.

The last update to the SWTR is the Long Term 2 Enhanced Surface Water Treatment Rule (LT2). This rule protects treated water reservoirs from microbiological contamination by requiring one of three actions: 1) covering, 2) removing from service, or 3) providing additional treatment. In March of 2009, LADWP executed a Compliance Agreement for LT2 with SWRCB-DDW for six uncovered reservoirs: Los Angeles, Upper Stone Canyon, Santa Ynez, Ivanhoe, Silver Lake, and Elysian. Based on the agreement LADWP has met the requirements for five of the six reservoirs. The Los Angeles Reservoir is the only remaining reservoir awaiting regulatory compliance.

The Los Angeles Reservoir will be brought into compliance with the LT2 through a combination of shade balls and construction of a new ultraviolet (UV) disinfection plant. The "shading" of the reservoir was completed in 2015 with nearly 96 million shade balls deployed. The new UV treatment facility will disinfect water leaving the Los Angeles Reservoir to satisfy the LT2 water quality regulation. Construction began in June 2017 and will be completed by the December 2020 compliance date set by the SWRCB-DDW.

Go to www.ladwp.com/waterquality to learn more about water quality projects and issues.

WATER QUALITY SERVICE AREAS IN LOS ANGELES

San Fernando Valley Communities

Sources: Los Angeles Aqueduct, local groundwater, and MWD State Water Project

Arleta	Northridge	Sylmar
Canoga Park	Olive View	Tarzana
Chatsworth	Pacoima	Toluca Lake
Encino	Panorama City	Tujunga
Granada Hills	Porter Ranch	Valley Village
Hollywood Hills	Reseda	Van Nuys
Lake View Terrace	Sherman Oaks	Warner Center

Sources of drinking water fluctuate throughout the area due to operational needs and source water availability

2018 DRINKING WATER QUALITY MONITORING RESULTS

Tables I, II, and III list the results of water tests performed by the LADWP and MWD from January to December 2018. LADWP tests for over 200 substances. These tables include only substances with values that are detected.

How to Read the Tables

The substances found in the water served in your area are listed as follows:

- For San Fernando Valley Area – water test results are under the Los Angeles Aqueduct Filtration Plant, the Northern Combined Wells and the MWD Jensen Plant columns.
- For Central Los Angeles Area – water test results are under the Los Angeles Aqueduct Filtration Plant and the Southern Combined Wells columns.
- For Western Los Angeles Area – water test results are under the Los Angeles Aqueduct Filtration Plant columns.
- For Harbor/Eastern Los Angeles Area – water test results are under MWD, Weymouth, Diemer, and Jensen Plants columns.

Some substances are reported on a citywide basis as required by the SWRCB-DDW.

Abbreviations and Footnotes

ACU = apparent color unit

CFU/mL = colony-forming unit per milliliter

< = less than the detection limit for reporting purposes

µg/L = micrograms per liter (equivalent to ppb)

µS/cm = microSiemens per centimeter

mg/L = milligrams per liter (equivalent to ppm)

NTU = nephelometric turbidity units

NA = not applicable

NR = not reported

NT = not tested

NUM/100 mL = number per 100 milliliter

% = percentage

pCi/L = picoCuries per liter

TON = threshold odor number

Unregulated Contaminants Monitoring Rule

The Unregulated Contaminant Monitoring Rule (UCMR) is a special program developed by the U.S. EPA that requires public water systems to survey up to 30 selected contaminants of emerging concerns (CECs) once every five years. Results indicate that most of the contaminants were not detected at the very low minimum reporting levels required by the U.S. EPA for UCMR3 analyses. Of the contaminants that were detected (see Table IV on page 15) chlorate and strontium were in insignificant but expected concentrations.

LADWP routinely tests for and detects chlorate in the distribution system. Chlorate is a disinfection byproduct of chlorination. Although it is unregulated, the SWRCB-DDW has set a notification level of 800 mg/l. UCMR3 test results for chlorate were much lower, ranging from not detected to 296 mg/l.

TABLE I

Calendar Year 2018 Water Quality Monitoring Results

Health-based Primary Drinking Water Standards (MCLs)
Substances Detected in Treated Water

Substances	Major Sources in Drinking Water	Units	Meets Primary Standard (YES / NO)	State Primary Standard MCL	State PHG	Los Angeles Aqueduct Filtration Plant		Northern Combined Wells		Southern Combined Wells		MWD Weymouth Plant		MWD Diemer Plant		MWD Jensen Plant

Uranium (c)	Erosion of natural deposits	pCi/L	YES	20	0.43	3	2 – 4	3	1 – 4	3	2– 4	<1	<1	<1	<1	<1	<1 - 1

(a) Values reflect Highest Running Annual Average (HRAA). HRAA is the highest of all Running Annual Averages (RAAs) in the reported calendar year. RAA is a calculated average of all samples collected within the previous 12-month period, which may include test data from the previous calendar year. HRAA may be higher than the range, which is based on the test data in the reported calendar year.

(b) Bromate is formed in water treated with ozone in the presence of bromide. Bromate has also been found in water treated with chlorine in some uncovered reservoirs in LADWP that have elevated bromide levels and are exposed to sunlight. MWD tests for bromate at its Diemer and Jensen Filtration Plants, which use ozone. Weymouth Plant has tested for bromate for less than 12-month period and so RAA is not calculated. All LADWP distribution reservoirs are now shielded with flexible covers or shade balls to minimize bromate formation.

(c) Radiological monitoring is performed in cycles of various frequencies in LADWP for treated sources water and at the blend points. Monitoring for Gross Alpha Particle Activity is performed in six year cycle and was conducted in 2016. Monitoring of Combined Radium-226 and Radium-228 is performed in three year cycle and was conducted in 2016. Monitoring of Gross Beta Particle Activity, Strontium-90, Tritium and Uranium is performed annually. MWD conducted all radiological monitoring in 2017.

(d) Turbidity is a measure of the cloudiness of water and is a good indicator of water quality and filtration performance. High turbidity can hinder the effectiveness of disinfectants. The Primary Drinking Water Standard for turbidity (included in this table) at water filtration plants is less than or equal to 0.3 NTU in at least 95 percent of the measurements taken in any month and shall not exceed 1.0 NTU at any time. The reporting requirement for treatment plant turbidity is to report the highest single measurement in the calendar year as well as the lowest monthly percentage of measurements that are less than or equal to 0.3 NTU.

TABLE I (CONT'D)

Calendar Year 2018 Water Quality Monitoring Results

Health-based Primary Drinking Water Standards (MCLs)
Substances Detected in Treated Water and Reported on City-Wide Basis

Substances	Major Sources in Drinking Water	Units	Meets Primary Standard (YES/NO)	State Primary Standard MCL or (MRDL)	State PHG / (MRDLG)	Average	Range
Bromate (uncovered reservoirs)	By-product of ozone disinfection; formed under sunlight for chlorinated water	µg/L	YES	10	0.1	HRAA = 2 (a)	Range = <1 – 3
Chlorine Residual, Total	Drinking water disinfectant added for treatment	mg/L	YES	(4)	(4)	HRAA = 2.0 (a)	Range = 1.8 – 2.1
Copper (at-the-tap) AL = 1300 (e)	Internal corrosion of household water plumbing systems	µg/L	YES	TT	300	90th Percentile value = 329	Number of samples exceeding AL = 0 out of 103
Fluoride	Erosion of natural deposits; water additive that promotes strong teeth	mg/L	YES	2	1	Average = 0.7	Range = 0.2 - 0.9
Haloacetic Acids (Five) (HAA5)	By-product of drinking water disinfection	µg/L	YES	60	none	HLRAA = 15 (f)	Range = 3 – 22
Lead (at-the-tap) AL = 15 (e)	Internal corrosion of household water plumbing systems	µg/L	YES	TT	0.2	90th Percentile value = 5.2	Number of samples exceeding AL = 1 out of 103
Total Coliform Bacteria	Naturally present in the environment	% Positives	YES	≤5% of monthly samples are coliform positive	0	Highest monthly % positive samples = 1.5%	Range = % positive samples 0% – 1.3%
Total Trihalomethanes (TTHM)	By-product of drinking water chlorination	µg/L	YES	80	none	HLRAA = 38 (f)	Range = 9 – 46

(a) Values reflect Highest Running Annual Average (HRAA). HRAA is the highest of all Running Annual Averages (RAAs) in the reported calendar year. RAA is a calculated average of all samples collected within the previous 12-month period, which may include test data from the previous calendar year. HRAA may be higher than the range, which is based on the test data in the reported calendar year.

(e) At-the-tap monitoring of lead and copper is conducted as required by the federal Lead and Copper Rule. A system is out of compliance if the federal Action Level is exceeded in more than 10 percent of all samples collected at the customers' tap. The most recent monitoring was conducted in 2018. Although the City's treated water has little or no detectable lead, studies were conducted and corrosion control implementation started. A small corrosion control facility utilizing zinc orthophosphate (temporarily out of service for upgrades) has been in operation in the Watts area since the 1990's. Corrosion control was introduced to the Western Los Angeles area in 2010 and to the Hollywood area in 2015. The results of the corrosion control study will be available in 2019.

(f) The federal Stage 2 Disinfectants/Disinfection Byproducts Rule (Stage 2 D/DBPR) requires compliance monitoring and reporting for total trihalomethanes (TTHM) and five haloacetic acids (HAA5) based on Locational Running Annual Averages (LRAAs) of established monitoring locations. The Highest Locational Running Annual Averages (HLRAAs) of all LRAAs in the current calendar year for TTHM and HAA5 are reported.

TABLE II

Calendar Year 2018 Water Quality Monitoring Results

Aesthetic-based Secondary Drinking Water Standards (SMCLs)
Substances Detected in Treated Water

Substances	Major Sources in Drinking Water	Units	Meets Secondary Standard (YES/NO)	State SMCL or Federal (SMCL)	Los Angeles Aqueduct Filtration Plant		Northern Combined Wells		Southern Combined Wells		MWD Weymouth Plant		MWD Diemer Plant		MWD Jensen Plant	
					Average	Range	Average	Range	Average	Range	Average	Range	Average	Range	Average	Range

General Information

This annual Drinking Water Quality Report (also known as a Consumer Confidence Report) is required by the California State Water Resources Control Board, Division of Drinking Water (SWRCB-DDW) and is prepared in accordance with their guidelines. The report is available online at www.ladwp.com/waterqualityreport. Copies may be requested by calling (213) 367-3182.

LADWP, the largest municipal utility in the nation, was established more than 100 years ago. The utility now provides reliable and safe water and electric service to the city's more than 4 million residents and businesses. LADWP is governed by Board of Water and Power Commissioners, appointed by the Mayor and confirmed by the City Council. The Board meets regularly on the second and fourth Tuesdays of each month at 10:00 a.m.

Meetings are held at:

Los Angeles Department of Water and Power
111 North Hope Street, Room 1555H
Los Angeles, CA 90012-2694

The meeting agenda is available to the public on the Thursday prior to the week of the meeting. You can access the Board agenda at www.ladwp.com/board or by calling (213) 367-1351.

For general information about LADWP, call (800) DIAL-DWP or visit www.ladwp.com.

For questions regarding this report, call the Water Quality hotline at (213) 367-3182.

THIS MESSAGE IS FOR NON-ENGLISH SPEAKING LADWP CUSTOMERS

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1

CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 04/29/2019 has revealed that there are 5 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

CA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the CA SWF/LF list, as provided by EDR, has revealed that there are 2 CA SWF/LF sites within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 3 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that

there are 8 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS HAZ WASTE:
Site ID: 110637
CERS ID: 10239790
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 110637
Site Name: DE YOUNG AUTOMOTIVE INC
Violation Date: 09-24-2018
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 10/15/2018. OBSERVATION: Observed excessive accumulation of waste oil and oily debris on the exteriors of hazardous waste storage drums. CORRECTIVE ACTION: Clean and maintain the hazardous waste (waste oil, used antifreeze etc.) storage containers and submit photos/documentation to the inspector by 10/10/2018 demonstrating the facility and equipment are clean and properly managed.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 110637
Site Name: DE YOUNG AUTOMOTIVE INC
Violation Date: 11-19-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 11/28/2018. OBSERVATION: The business failed to complete and electronically submit chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. CORRECTIVE ACTION: Complete and electronically submit the chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. ** Mr. De Young, can you please modify your hazardous materials inventory and submit/resubmit for 2018: 1) Add 55 Gallons of Brake Clean 2) Increase amount of used lubricating oils to 385 Gallons (7-55 gallons drums on site) Please also complete the new federal hazard classification system for each hazardous material stored. Please see the attached document titled, ?New Federal Hazard Categories Instructions.? At least one yes must be selected among the 24 categories. **

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 110637
Site Name: DE YOUNG AUTOMOTIVE INC
Violation Date: 09-24-2018
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 10/15/2018. OBSERVATION: Observed excessive accumulation of waste oil and oily debris on the exteriors of hazardous waste storage drums. CORRECTIVE ACTION: Clean and maintain the hazardous waste (waste oil, used antifreeze etc.) storage containers and submit photos/documentation to the inspector by 10/10/2018 demonstrating the facility and equipment are clean and properly managed.

FINDS:

Registry ID: 110002808800

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110006475652

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

LA CANOGA PARK LIBRARY (Continued) **1000167873**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 311
. Waste name: Pharmaceutical waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D024
. Waste name: M-CRESOL

. Waste code: P001
. Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

. Waste code: P075
. Waste name: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

. Waste code: U034
. Waste name: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

WALGREENS #5743 (Continued) **1016954218**

. Waste code: U165
. Waste name: NAPHTHALENE

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 179

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 87

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 47

Waste code: D009
Waste name: MERCURY
Amount (Lbs): 1

Waste code: D010
Waste name: SELENIUM
Amount (Lbs): 47

Waste code: D024
Waste name: M-CRESOL
Amount (Lbs): 1

Waste code: P001
Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%
Amount (Lbs): 5

Waste code: P075
Waste name: NICOTINE, & SALTS
Amount (Lbs): 7

FINDS:

Registry ID: 110002747396

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

BOB SMITH BMW (Continued) **1000131966**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

CREST CLEANERS (Continued) **1000597017**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 211
. Waste name: Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 214

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 211
. Waste name: Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 222
. Waste name: Oil/water separation sludge

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 341
. Waste name: Organic liquids (nonsolvents) with halogens

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

UNITED TECHNOLOGIES CO (Continued) **1000273223**

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 512
. Waste name: Other empty containers 30 gallons or more

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 521
. Waste name: Drilling mud

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: 611
. Waste name: Contaminated soil from site clean-ups

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

. Waste code: 728
. Waste name: Liquids with thallium > 130 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D000
. Waste name: Not Defined

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

UNITED TECHNOLOGIES CO (Continued) **1000273223**

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D011
. Waste name: SILVER

. Waste code: D018
. Waste name: BENZENE

. Waste code: D019
. Waste name: CARBON TETRACHLORIDE

. Waste code: D021
. Waste name: CHLOROBENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: D040
. Waste name: TRICHLORETHYLENE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS

UNITED TECHNOLOGIES CO (Continued) **1000273223**

CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F009
. Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: LABP
. Waste name: LAB PACK

. Waste code: P015
. Waste name: BERYLLIUM

. Waste code: P029
. Waste name: COPPER CYANIDE (OR) COPPER CYANIDE CU(CN)

. Waste code: P098

FINDS:

Registry ID: 110002425199

Environmental Interest/Information System
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

UNITED TECHNOLOGIES CO (Continued) **1000273223**

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CPS-SLIC:
Name: ROCKWELL INTERNATIONAL CORP.
Address: 6633 CANOGA AVE.
City,State,Zip: CANOGA PARK, CA
Region: STATE
Facility Status: **Open - Remediation**
Status Date: 09/01/2017
Global Id: SL204281528
Lead Agency: LOS ANGELES RWQCB (REGION 4)
Lead Agency Case Number: Not reported
Latitude: 34.1907897679698
Longitude: -118.599128723145
Case Type: Cleanup Program Site
Case Worker: AMT
Local Agency: Not reported
RB Case Number: 0237A
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE), Total Petroleum Hydrocarbons (TPH)
Site History: The site is approximately 47-acres and was developed in the mid-1950s for the manufacture of rocket engines and related systems. Operations at the site concluded in 2014. The currently idle site contains numerous vacant industrial buildings and structures in various states of disrepair, surrounded by surface parking lots along Canoga Avenue and Victory Boulevard. Numerous environmental investigations and cleanup activities have been conducted across the Site since 1984 that have identified elevated levels of chemicals of potential concern (COPCs), including chlorinated solvents from historic

UNITED TECHNOLOGIES CO (Continued) **S101540004**

manufacturing activities at the site. Soil and groundwater cleanup activities are currently ongoing at the subject site.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/11/2019

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/11/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 02/11/2019

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

West Map:	5630735 CALABASAS, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

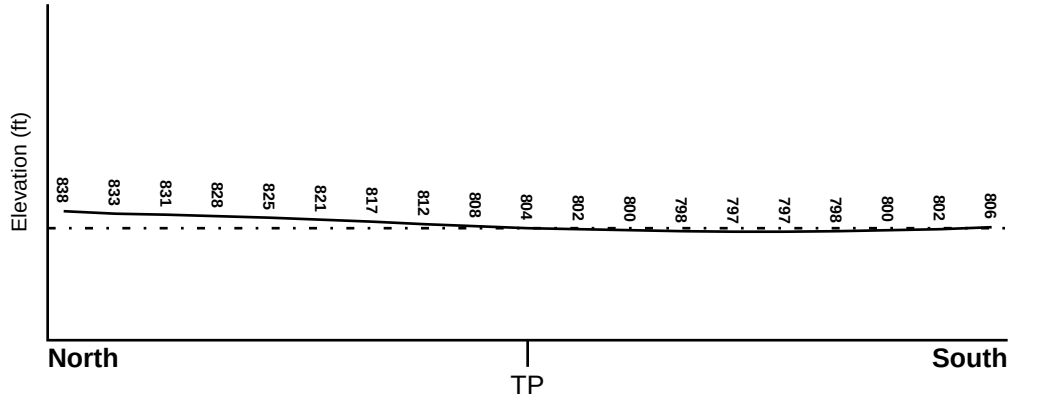
TOPOGRAPHIC INFORMATION

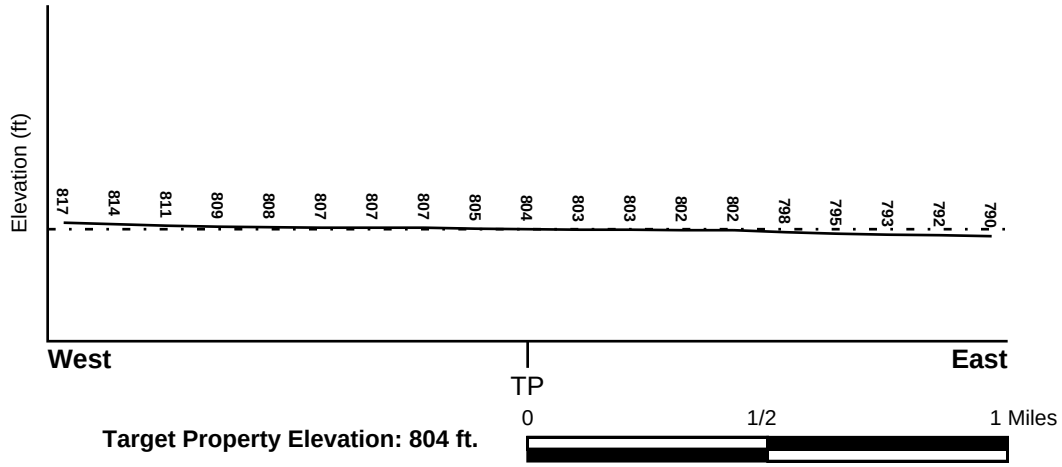
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





0 1/2 1 Miles

Target Property Elevation: 804 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: San Emigdio

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	18 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	18 inches	77 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: Mocho

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX D: QUALIFICATIONS/

PARTNER

Brooke Hasty
Staff Scientist

Education

B.S., in Environmental Science with a minor in Biology, California State University, Long Beach

Highlights

Phase I Environmental Site Assessments
Transaction Screen Assessments
Environmental Desktop Reports

Experience Summary

Ms. Hasty currently holds the role of a Staff Scientist and her responsibilities include thorough site assessment and technical report writing in line with the American Society of Testing and Materials (ASTM) standard and US Environmental Protection Agency's All Appropriate Inquiry (AAI) as well as customized client formats. Ms. Hasty prepares Phase I Environmental Site Assessment on various property types, including multifamily and commercial properties.

Ms. Hasty has a background in Environmental Science, with course work that focused on biological and geological sciences. She also has further coursework in environmental field and laboratory work, biology, and environmental law. Ms. Hasty has over one year of experience in conducting scientific data collection and report writing. In her role as Staff Scientist, she uses her knowledge and skills to create accurate and detailed reports.

Project Experience

Ms. Hasty has one year of experience performing due diligence assessments for a variety of property types, as detailed above. For each assessment she reviews the condition of the building structure and systems and develops a thorough report.

Multi-Family Housing Complex, Los Angeles, California. Ms. Hasty performed a Transaction Screen for a 25-unit multi-family housing complex on a 0.232-acre lot.

Adams Town Homes, Glendale, California. Ms. Hasty performed a Phase I Environmental Assessment for a 58-unit multi-family housing complex on a single-acre lot.

Former Coco's Restaurant, Camarillo, California. Ms. Hasty performed a Phase I Environmental Assessment for a 5,643 square-foot former restaurant building on a 0.90-acre lot.

Commercial Retail Center, Los Angeles, California. Ms. Hasty performed a Phase I Environmental Assessment for a 17,131 square-foot commercial retail center with multiple retail stores and a former dry cleaner.

Commercial Retail, Beverly Hills, California. Ms. Hasty performed a Phase I Environmental Assessment for a two-story, 23,509 square-foot commercial retail building on a 0.35-acre lot.

Hazardous Waste Operations and Emergency Response (HAZWOPER) 40-hour (with First Aid, CPR)
Asbestos Hazard and Emergency Response Act (AHERA) Asbestos Building Inspector
EPA Method 9 Visible Emissions
AGC/ADOT Erosion Control Coordinator

Highlights

Over 10 years of experience performing due diligence assessments and subsurface investigations
Over 10 years of experience in soil and groundwater remediation
Over 10 years conducting industrial hygiene assessments such as asbestos, lead, radon, and mold surveys

Experience Summary

Mr. Bailey serves as a Senior Project Manager, overseeing and managing all aspects of multi-scope projects including Phase I ESAs in accordance with EPA's All Appropriate Inquiry (AAI), Property Condition Assessments (PCAs), Sub-specialist Reports, Zoning Reports, Seismic Assessments, and Industrial Hygiene-related projects.

Mr. Bailey has significant experience in due diligence assessments for a variety of property types and the needs and requirements of a variety of reporting standards, including ASTM standards, EPA's AAI, Freddie Mac, Fannie Mae, and customized client formats. Specifically, Mr. Bailey has performed Phase I Environmental Site Assessments (ESAs), Environmental Transaction Screens, Database Reviews, Phase II Subsurface Investigations, Stormwater Pollution Prevention Plans (SWPPs), Spill Prevention, Control, and Countermeasure (SPCC) Plans, Geotechnical Evaluations, Soil and Groundwater Remediation, Regulatory Compliance Assessments, Asbestos Surveys, Lead-based Paint Surveys, Radon Surveys, and Mold Assessments.

Environmental Assessments

Duties included performing site visits; gathering zoning, ownership, building permits, fire records, and groundwater well information; geology research; UST and leaking underground storage tank (LUST) file review; aerial photograph interpretation; Resource Conservation Recovery Act (RCRA), Water Quality Assurance Revolving Fund (WQARF), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) database and city directory review; personal interviews; and preparation of technical reports.

Subsurface Investigations

Mr. Bailey has extensive experience in conducting Phase II Subsurface Investigations on industrial manufacturing facilities, plating facilities, DOT yards, gas stations, auto repair facilities, multi-family residential properties, shopping centers, and undeveloped land. Mr. Bailey has conducted soil and soil gas sampling, groundwater sampling, oversight of underground storage tank (UST) removal activities, drywell investigations, and extensive soil and groundwater remediation activities at former plating facilities, former military airport, and aggregate mines.

Industrial Hygiene Surveys

Mr. Bailey has served as a Project Scientist and Project Manager on numerous industrial hygiene related projects. Projects included asbestos, microbial remediation, lead-based paint, and industrial hygiene (plating and paint mixing facilities) related projects, including sampling, report preparation, and senior review for a variety of clients throughout the United States. In addition, Mr. Bailey has provided asbestos and microbial abatement oversight activities at private, commercial, and school facilities.

Geotechnical Evaluations

Mr. Bailey's field experience includes logging and sampling geotechnical borings for civil engineering and future construction projects. Duties included placing boring locations via GPS coordinates, logging borings, collection of soil samples, classification of soils in accordance with Unified Soil Classification System (USCS), and supervision and coordination of drilling and utility locating companies.

Project Experience

Former Semi-Conductor Plating Facility, Phoenix, Arizona. Mr. Bailey served as the field team leader for the decommissioning of a former semi-conductor plating facility. He conducted numerous subsurface investigations and provided technical oversight during remedial activities and post-remedial clearance sampling.

Various High Profile Acquisition Properties, Various locations throughout the United States. Mr. Bailey has managed numerous multi-scope equity projects on high profile and historic hotel/resort properties, with scopes of work including Phase I ESAs, PCAs, Sub-specialist Reports, Zoning Reports, Seismic Assessments, and Industrial Hygiene-related sampling.

Various Freddie Mac and Fannie Mae Multifamily Properties, Various locations throughout the United States. Mr. Bailey has managed and staffed numerous Freddie Mac and Fannie Mae scope projects throughout the United States. Scopes include Phase I ESAs, PCAs, and Seismic Assessments.

Former Aggregate Mine, Salt River Pima-Maricopa Indian Community, Arizona. Mr. Bailey served as the field team leader for the decommissioning of a former aggregate mine on Tribal Lands. He conducted numerous subsurface investigations and provided technical oversight during remedial activities, UST removal operations, septic system removals, well abandonment, and post-remedial clearance sampling.

Department of Defense Cleanup, Mesa, Arizona. Mr. Bailey was subcontracted to provide general technical operation assistance and routine compliance sampling at a Thermally-Enhanced Soil Vapor Extraction pilot test for a former Air Force jet fueling compound and active Superfund Site.

Experience Summary

Mr. Jones currently serves as a National Client Manager for Partner Engineering & Science, Inc. providing solutions to clients' physical condition and environmental due diligence and engineering needs. He is responsible for ensuring consistency and quality and on-time report delivery of due diligence and engineering services provided by Partner. Current day to day responsibilities include project oversight, staff supervision, problem solving, report review, and client management.

Mr. Jones has served as an environmental scientist, project manager, or senior author for projects associated with over 7,000 real estate transactions. Mr. Jones is familiar with the due diligence requirements of a varied number of reporting standards, including ASTM, EPA's All Appropriate Inquiry (AAI), Fannie Mae DUS, HUD, and Freddie Mac. He also has experience with fulfilling numerous customized client scopes of work. Mr. Jones' due diligence resume includes experience at all levels including advising traditional and agency lenders, real estate investors, and other client types through the following product types: Phase I Environmental Site Assessments, Environmental Transaction Screens, Phase II Subsurface Investigations, Remedial Cost Estimates, Remediation Design, Property Condition Assessments, Probable Maximum Loss Assessments, asbestos, lead-based paint, lead-in water, radon, mold surveys, geophysical surveys, regulatory compliance projects, Engineering Evaluation/Cost Analysis projects, and Preliminary Endangerment Assessments. His specialty is performing engineering and environmental due diligence for lenders, real estate investors, attorneys, and government entities.

Additionally, over the course of his career, as a staff scientist, project manager, senior project manager and client manager, Mr. Jones has significant relevant project experience relating to investigation and cleanup of soil, soil vapor, and groundwater contamination. The investigations and cleanup projects have occurred at current and former gas stations and dry cleaning facilities, agricultural properties, industrial and

manufacturing facilities, and military installations. Investigation and cleanup projects have been as the result of releases from underground storage tanks, dry cleaning equipment, and from spills and/or dumping activities. Media that has been investigated and remediated has included dry cleaning chemicals and wastes, gasoline, diesel, and other fuel types, and PCA and TCE plumes. In addition, Mr. Jones was often the point of contact for regulatory agencies, and produced work plans, bid documents, contracts, specifications, and the documents that detailed the investigation, long-term groundwater monitoring, and/or soil and groundwater cleanup activities.

Project Experience

Acquisition Assessments, LAX Marriott. Mr. Jones led a team of specialty consultants who evaluated the physical condition of the LAX Marriott hotel. A generalist specializing in management of equity PCAs worked with a team of specialists under Mr. Jones' direction, including the following scopes and disciplines: Mechanical, Engineering, and Plumbing / Fire Life Safety (MEP/FLS) assessments, elevator assessment, roof assessment, accessibility survey, and curtain wall evaluation. Additionally, the team performed a Phase I Environmental Site Assessment (ESA), Phase II ESA, site characterization due to contaminants identified from historic manufacturing uses, a seismic risk assessment, and an ALTA survey. Mr. Jones' team worked with several attorneys and the client's acquisitions team to provide a detailed account of problematic issues and associated costs for their consideration in order to help determine whether the acquisition should occur.

Acquisition Property Condition Assessments, Tustin Center I & II, Santa Ana, CA; 235 Pine Street, San Francisco, CA; Park 80 West, Saddle Brook, NJ; United Plaza, Philadelphia, PA; California Plaza, Walnut Creek, CA; Stadium Gateway. Mr. Jones led a team of specialty consultants who evaluated the physical condition of the above mid to high-rise office building properties. A generalist specializing in management of equity PCAs worked with a team of specialists under Mr. Jones' direction, including but not limited to the following scopes and disciplines: Mechanical, Engineering, and Plumbing / Fire Life Safety (MEP/FLS) assessments, elevator assessments, roof assessments, curtain wall evaluations, structural engineering evaluations, microbiological influenced corrosion (MIC) testing, and water intrusion assessment and testing. Mr. Jones' team worked with the client's acquisitions team to provide a detailed account of problematic issues and associated costs for their consideration in order to help determine whether the acquisitions should occur.

Acquisition Property Condition Assessments (PCAs) and Phase I Environmental Assessments (ESAs) for Medical Office Buildings. Mr. Jones led a team of specialty consultants who evaluated the physical and environmental condition of hundreds of medical office building properties across the United States. The due diligence work was associated with both portfolios of medical office buildings as well as individual properties. A generalist specializing in management of equity PCAs worked with a team of specialists under Mr. Jones' direction, including but not limited to the following scopes and disciplines: Mechanical, Engineering, and Plumbing / Fire Life Safety (MEP/FLS) assessments, elevator assessments, roof assessments, curtain wall evaluations, and structural engineering evaluations. Phase I ESAs and in many cases Seismic Risk Assessments were also performed. Mr. Jones' team worked with the client's acquisitions team and their attorneys to provide a detailed account of problematic issues and associated costs for their consideration in order to help determine whether the acquisitions should occur.

Fannie Mae and Freddie Mac ESAs and PCAs. Mr. Jones' team has performed hundreds of Phase I Environmental Site Assessments and Property Condition Assessments for Fannie Mae and Freddie Mac

agency lenders. The multi-family developments evaluated by Mr. Jones and his team have been located all across the United States.

PEAs, Beaumont and Coachella, CA School Districts. Mr. Jones' team has performed several Preliminary Endangerment Assessments on agricultural properties to determine whether the sites were impacted with agricultural chemicals and to determine if the properties were suitable locations for public schools to be developed. The analysis included developing a protocol for pesticide and herbicide testing, performing the sampling in accordance with said protocol, and an evaluation of the sampling results.

EBS' at U.S. Air Force Bases. Mr. Jones has been part of a team that performed numerous Environmental Baseline Surveys (EBS') at United States Air Force Bases across the country. The EBS document was a comprehensive survey or assessment that was essentially a very detailed account of the environmental issues and status at the Air Force Base and on properties that adjoined the Air Force Base. The document contained information including but not limited to: aboveground and underground storage tanks, oil water separators, hazardous materials use and hazardous waste storage locations, chemical inventories, buildings with known or suspected PCBs, asbestos, and/or lead based paint, contamination sites, and sites with radioactive materials or wastes.

EE/CA, Fort Ord, Monterey Bay, CA. Mr. Jones was the Deputy Task Order Manager for an Engineering Evaluation/Cost Analysis study at the former Fort Ord, California. The study identified and documented both newly discovered and known ordnance sites at the former Fort Ord. The types of ordnance at each site were determined as well as the expected depths of penetration upon impact. The costs associated with removing the ordnance was also determined and recommendations were made as to what depths below ground surface the ordnance removals should occur at each site.

Subsurface Investigation, Ogden, UT. Mr. Jones performed a large scale investigation to determine if any soil or groundwater contamination was present at numerous locations where fuel was stored in underground and aboveground storage tanks at the U.S. Army Defense Depot Ogden. When contaminants were identified, the sites were then characterized to determine extent of impact to soil and groundwater.

Environmental Compliance Audit, Atchison, KS. Mr. Jones performed an Environmental Compliance Audit (ECA) of numerous environmental resource management protocols at the Atchison Facility for the Federal Defense Logistics Agency in Atchison, Kansas.
