Delivered 01:38 PM 12/21/2011
FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

Delivered 01:38 PM 12/21/2011
FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

Pacific Coast Energy Company LP

By: BEH (GP) LLC, its general partner

By: /s/ Gregory C. Brown
Gregory C. Brown
Executive Vice President and General Counsel

FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

RE: Pacific Coast Energy Company LP
Change of Billing Address

To whom it may concern:

We need to change the mailing & billing address for the enclosed list of wells.

Currently, the mailing/billing address is:

Pacific Coast Energy Company LP
515 S Flower St Ste 4800
Los Angeles, CA 90071-2241

The new mailing and billing address is:

Pacific Coast Energy Company LP
Attn: John Fox
1555 Orcutt Hill Road
Orcutt, CA 93455

Should you have any questions or need more information, please feel free to contact me by email or phone number shown below.

Sincerely,

John Fox
Environmental, Health & Safety Manager

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

Delivered 01:38 PM 12/21/2011
FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

Pacific Coast Energy Company LP

By: BEH (GP) LLC, its general partner

FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "*Partnership*") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

submission on ZA-1989-17683-PA2 - West Pico Drill Site

Michael Salman <salman@history.ucla.edu> Thu, Apr 22, 2021 at 8:16 AM
To: Theodore Irving <theodore.irving@lacity.org>
Cc: Dylan Sittig <dylan.sittig@lacity.org>, Estineh Mailian <estineh.mailian@lacity.org>, Edber Macedo <edber.macedo@lacity.org>, Terry Kaufmann-Macias <terry.kaufmann-macias@lacity.org>, Jennifer Tobkin <jennifer.tobkin@lacity.org>, Erica Blyther <erica.blyther@lacity.org>

Dear Mr. Irving

Please find attached the following documents submitted for case ZA-1989-17683-PA2 concerning the West Pico Drill Site:

- A letter presenting new evidence of safety violations and numerous illegal City permits (Salman - Letter to ZA 4-22-21)
- Copies of 3 DOGGR Notices of Violation from 2016 for working on wells without a required blowout preventer test
- Copies of LAFD Project Permits that were illegal and are void under City law (2 files)
- A permit list from LADBS showing critical work at 9151 W Pico for the project the 2000 ZA approval authorized only for 9101 W Pico

The attached letter walks you through the documents and their significance in relation to City law and CEQA.

The letter also notes that a large set of LAFD Annual Oil Well Operating Permits will be sent by separate email (or 2 emails if necessary due to data size) after this email. If these documents do not arrive at your office, please let me know. The cumulative data size might exceed the City's email server's allowances.

Thank you

Michael Salman

Re: ZA-1989-17683-PA2

Dear Mr. Irving

Substantial new evidence of serious safety violations and a large number of illegal and invalid City permits for oil operations at the West Pico Drill Site have come to light after additional research and Public Records Act requests to CalGEM and City agencies.

The safety violations were serious and careless, reflecting a workplace that is not adequately monitored. Careless work practices that flourish when regulatory oversight takes a holiday or, as in the case of the City, basically does not exist because there are no inspections. In 2016, DOGGR issued three Notices of Violation for failure to have blowout preventers inspected before commencing downhole work on wells (including redrilling and/or well conversion work that did not have the City approvals required by City law). Yes, DOGGR issued the NOVs for violating State regulations, but the City's decades of negligence was a contributing factor, creating a culture of projects without required approvals. Negligence breeds carelessness that can start to flirt with disaster. We all got lucky that time. Documents are attached.

The problem of illegal and invalid City permits – which we have been documenting for you since the start of this case - spurred additional review of the City of Los Angeles's Municipal Code to ascertain all City law on permitting requirements for oil wells and Controlled Drill Sites, and also to ascertain City law (LAMC 11.02, among other sections) and case law on the legal status of permits issued in contravention of City law.

The case file now contains the March 23, 2021 letter from NASEs attorney, Amy Minteer. Her letter reports that the West Pico Drill Site has illegal and invalid Annual Oil Well Operating Permits from the LAFD. In particular, there are 22 wells that have had a total of 24 illegal and unapproved projects executed on them since 2000. There were 2 new wells drilled, 12 wells redrilled, and 10 wells converted. Two wells had two projects executed on them, so the 24 total projects were executed on 22 wells.

In an email immediately following transmission of this letter, I will send you copies of all the LAFD Annual Operating Permits for all of the wells at the West Pico Drill Site, from 2005 to 2020. Those documents will be transmitted by separate email because of the cumulative size of the files. The file names list the common well names (e.g., WP 58, WP 59) so you can match them to the record of well projects that PCEC stipulated to in its June and July communications with your office.

As Ms. Minteer's letter explains, LAMC 13.01.I requires ZA approval before any City permits are issued, so the operating permits for 22 wells since the dates of the illegal projects on the wells are illegal and void permits, as per the Zoning Code.

The LAFD Annual Oil Well Operating Permits (all of them since 2000) are also illegal permits in relation to the City's Fire Code, which requires that wells be in compliance with all laws, ordinances, and regulation in order to received operating permits. The entire drill is out of compliance and egregiously so, as the rest of this letter will show. **But I want to highlight that I am focusing on non-compliance with the Zoning Code (13.01 and 11.02) because that clearly makes this non-compliance the responsibility of the Zoning Administrator and Department of City Planning.**

Ms. Minteer's letter explains that LAMC 11.02 comes into play.

LAMC 11.02, in the Zoning Code, says that "inconsistent permits," which means permits that conflict with City Code, "shall be void." Lest there be any confusion, LAMC 11.01 defines shall as meaning "mandatory," while "may" means permissive. **Thus the Zoning Code declares that these permits are void, and that is the responsibility of the Zoning Administrator and Department of City Planning as well as other City agencies. DCP cannot say it is not their responsibility because these are provisions of the Zoning Code.**

LAMC 11.02 has been tested and sustained in the Supreme Court of the State of California, in *Weiner v. City of Los Angeles***,** (1968) 68 Cal.2d 697. It has been applied in multiple unpublished Superior Court and Appellate Court cases in the years since. It has, to the best of my knowledge, never been challenged. It is, without doubt, still in the Municipal Code and it is the law of the City. The City is in violation of its own law.

The number of illegal and void permits at the West Pico Drill Site is vastly larger and more extensive than *just* the annually renewed Oil Well Operating Permits for 22 wells since their respective illegal projects, and vastly larger than the Operating Permits for all the wells.

Here are some examples:

- The two new wells drilled without ZA approval received LAFD **Project Permits**, copies attached, despite express prohibition against issuing permits for drilling new wells without ZA approval in LAMC 13.01.I
- The 12 redrilling projects received LAFD **Project Permits,** copies attached, despite express prohibition against issuing permits for drilling new wells without ZA approval in LAMC 13.01.I
- The 2000 ZA approval is a permit in the eyes of the California courts and it is a part of all subsequent City permits issued for the drill site because it sets the conditions of those permits and the operating conditions for the drill site, **and the 2000 ZA approval conflicts with the LAMC in at least two major ways:**

    - **First, the 2000 approval conflicts with LAMC 13.01 overall and LAMC 13.01.E.2.b by illegally establishing two drill sites through an improper process in an oil drilling district where the Code allows only one drill site**
        - If anyone argues it does not establish two drill sites, then it removed all land use entitlement necessary for all oil production activities that take place at 9151 W Pico, which become as illegal under this circumstance as they become if the 2000 ZA approval is understood to to create two drill sites.
        - The two halves of the drill site are an integrated whole, inextricably linked to each other. For just two of many examples: SCAQMD and DOGGR/CalGEM permits for the wells physically located at 9101 W Pico bear the address 9151 W Pico; and the oil/gas/water slurry pumped up from wells located at 9101 W Pico is separated at 9151 W Pico and then the water is pumped back to the injection wells at 9101 W Pico.
        - If 9151 W Pico is illegal, then all operation at the entire drill site are illegal.
        - As a permit inconsistent with City Code, the 2000 ZA approval is void and all projects undertaken under its authorization lack land use entitlement.
    - **Second, Condition 72 of the 2000 ZA approval set procedures for redrilling wells that directly clash with LAMC 13.01.H and 13.01.I.**
- After the 2000 ZA approval was made effective to entitle and authorize a modernization project that was supposed to be entirely located at the 9101 W. Pico half of the drill site, the operating company took out a permit from LADBS to install a 34.5 KV Electrical Service Panel at 9151 W Pico to power "drilling" (i.e, the new electric derrick) at 9101 W. Pico. – copy of permit record attached.
- Over the next two decades, all City Permits obtained for projects and operations at 9151 W Pico are illegal and void because that location has no valid land use entitlement due to the 2000 ZA approval
    - The LAFD CUPA Hazardous Materials Permit for 9151 W Pico are void.
    - All LADBS permits for oil processing equipment at 9151 W Pico are void (there are multiple such permits for compressors, microturbines, and additional equipment and related projects).
- All City Permits obtained for 9101 W. Pico are similarly void because they have no land use entitlement due to the 2000 ZA approval being void.
    - There are additional, smaller errors rendering some of these permits void for lesser reasons, but why beat a horse that is dead, mummified, buried, etc.

These are extremely serious matters. The central gist of the problem has been communicated to the ZA's office since Spring 2020. These are just additional details to help you see the depth of the problem.

All of these illegalities are the responsibility of the Zoning Administrator and the Department of City Planning to address because they are all covered by LAMC 11.02 and LAMC 13.01 of the Zoning Code, and also because the 2000 ZA approval itself is void according to LAMC 11.02.

Moreover, all of the illegalities and additional violations which have been documented for you already are also entangled in the Department of City Planning's mishandling of its CEQA duties from the 2000 ZA case to the present.

In the 2000 case, Planning wrongly subjected only half the drill site to review in the EIR. The error was pointed out at the time. And the wrongness of the error was proven when the recipient of the new entitlement promptly began work at 9151 W Pico on a crucial component of the project approved for 9101 W Pico (namely the electric service panel to supply power for operations at 9101 W. Pico). Planning also wrongly and illegally created two drill sites or, if it prefers the alternative reading, Planning canceled all land use entitlement for the oil operations at 9151 W Pico.

When the City entered a Settlement Agreement in 2001, the City agreed to change multiple mitigation measures and mitigation monitoring measures (MMRP). Planning never modified the ZA approval by issuing a new determination or a supplemental determination. That led to more non-compliance by the City and the operating company.

The dismal events just recounted merge into the recent history of Planning violating Condition 78 of the 2000 approval by refusing to "evaluate the efficacy of mitigation measures" and correct them, as needed, in the current review. At the July and August public hearings, the presiding Associate ZA said he would not even consider changing mitigation measures in this current review. That violates Condition 78 of the 2000 approval and the Settlement Agreement, and it violates CEQA. Planning has refused to subject the current case to environmental review, when State law requires that analysis of mitigation measures must be done through the CEQA process. Moreover, the very existence of this current case and all of the mountains of evidence already provided conclusively demonstrates that the mitigation and Mitigation Monitoring provisions of the 2000 ZA approval and EIR have failed in epic fashion.

Illegally taking the current review out of the CEQA process only compounds and perpetuates the cycle of illegality set in motion by the illegal and void ZA approval of 2000. Punting the ZA's responsibility into a future review is wrong for numerous reasons, including that it would constitute illegal piece-mealing to evade proper environmental review under CEQA.

It is time for this to stop. It is time for the problems to be corrected.

Proper Environmental Review. The first and necessary step is to send the case back for proper environmental review under CEQA, and then carefully sort out the void and illegal permits, carefully take stock of the damage that has been done, and then through the CEQA process and proper public hearings develop a just resolution that is legal and serves the ends of good public policy.

Review all the unapproved projects now, which can lead to approving them, denying approval, and/or reparative new conditions. Given that 22 wells have had 24 illegal major projects (drilling, redrilling, conversion) that required ZA approval, public hearings, and CEQA clearance that never happened, those projects must be reviewed now.

Review and approval are different things. Due consideration should be given to the possibility of ordering that those 22 wells must be plugged within a reasonably prompt one or two year time period. Due consideration means weighing all the facts, considering all the options, and then taking proper quasi-judicial action to achieve the most equitable resolution possible.

Idle wells listed by CalGEM should be ordered plugged (definition = 2 or more years with no production/injection), According to CalGEM's records, 10 wells at the drill site have been idle for two or more years. Those 10 wells should certainly be ordered to be plugged in a reasonable period of one year.

Wells that go idle in the future (using CalGEM's definition) should be automatically ordered plugged by a new condition. Given the damage inflicted by illegal operations (environmental damage, damage to the City's law and reputation, damage to the City's regulatory oversight of the oil industry, denial of the public's right to hearings and reviews, breach of the 2001 Settlement Agreement, etc) and given the fact that long term idle wells are contrary to City law and good public policy, a new condition should be written that will automatically require the plugging of any well that in the future goes idle for two years, with the plugging required to happen in the third year.

Were it not for all the violations by the operator and the City, perhaps a more moderate step would be appropriate concerning the currently idle wells and any wells that become idle for two years in the future. But due to the harms inflicted by the violations, the step proposed here is necessary to come close to achieving equity.

All prior requests from myself and from NASE for new and modified conditions should be included and effectuated, including requiring annual inspection by the City Petroleum Administrator, 24/7 emissions monitoring with data reported quarterly to the City, and writing the Settlement Agreement into the Conditions.

Cleaning up the City's own illegal actions is essential to giving the City a stronger hand to enforce compliance in the future and take stronger actions if needed.

All of these major changes must be done through the CEQA process in order to be rock-solid legal. Acting outside the CEQA process is illegal. Not resolving known illegalities is illegal. Piece-mealing is illegal.

Yours,

Michael Salman

NOTICE OF VIOLATION

October 21, 2016

Report # **V116-0543**

Mr. Thomas McCollum, Agent
Pacific Coast Energy Company LP (B6127)
1555 Orcutt Hill Road
Orcutt, CA 93455

Dear Mr. McCollum:

FAILURE TO NOTIFY DIVISION FOR BLOWOUT PREVENTION EQUIPMENT INSPECTION, WELL "WEST PICO" 30 (037-21035), BEVERLY HILLS FIELD

PRC 3236 states, in part: "Any owner or operator, or employee thereof, who refuses to permit the supervisor or the district deputy, or his inspector, to inspect a well, or who willfully hinders or delays the enforcement of the provisions of this chapter, and every person, whether as principal, agent, servant, employee, or otherwise, who violates, fails, neglects, or refuses to comply with any provisions of this chapter, or who fails or neglects, or refuses to furnish and report or record which may be required pursuant to the provisions of this chapter, or who willfully renders a false or fraudulent report, is guilty of a misdemeanor, punishable by a fine of not less than one hundred dollars ($100), nor more than one thousand dollars ($1000), or by imprisonment for not exceeding six months, or by both such fine and imprisonment, for each offense."

On September 6, 2016 permit P116-0230 was issued by the Division to rework (reperforate) well "West Pico" 30. Item 12a on the permit states that the Division is to be notified to: *Inspect the installed blowout prevention equipment prior to commencing downhole operations.*

On October 20, 2016 the Division received a History of Oil or Gas Well, dated 9/21/2016. The document indicates that the rework was completed on the well. However, the Division was not notified to inspect the blowout prevention equipment prior to conducting the downhole operations in violation of permit P116-0230.

Pacific Coast Energy Company LP is in violation of PRC 3236 for failure to notify the Division for inspection of blowout prevention equipment. Pacific Coast Energy Company LP is to immediately instruct its personnel and sub-contractors as to the importance of notifying the Division of all required inspections or re-inspections.

Failure to comply with the laws of California and this Division may result in enforcement action including, but not limited to, issuance of a civil penalty and/or order pursuant to Public Resources Code Sections 3106, 3224, 3235 and 3236.5.

If you have any questions, please contact Barry Irick at (714) 816-6847 or barry.irick@conservation.ca.gov.

Sincerely,

Scott Walker

October 21, 2016

Report # **V116-0544**

Mr. Thomas McCollum, Agent
Pacific Coast Energy Company LP (B6127)
1555 Orcutt Hill Road
Orcutt, CA 93455

Dear Mr. McCollum:

FAILURE TO NOTIFY DIVISION FOR BLOWOUT PREVENTION EQUIPMENT INSPECTION, WELL "WEST PICO" 29 (037-21019), BEVERLY HILLS FIELD

PRC 3236 states, in part: "Any owner or operator, or employee thereof, who refuses to permit the supervisor or the district deputy, or his inspector, to inspect a well, or who willfully hinders or delays the enforcement of the provisions of this chapter, and every person, whether as principal, agent, servant, employee, or otherwise, who violates, fails, neglects, or refuses to comply with any provisions of this chapter, or who fails or neglects, or refuses to furnish and report or record which may be required pursuant to the provisions of this chapter, or who willfully renders a false or fraudulent report, is guilty of a misdemeanor, punishable by a fine of not less than one hundred dollars ($100), nor more than one thousand dollars ($1000), or by imprisonment for not exceeding six months, or by both such fine and imprisonment, for each offense."

On May 3, 2016 permit P116-0116 was issued by the Division to rework (replace upper 450' of casing) well "West Pico" 29. Item 10a on permit states that the Division is to be notified to: *Inspect the installed blowout prevention equipment prior to commencing downhole operations.*

On September 28, 2016 the Division received a History of Oil or Gas Well, dated 8/9/2016. The document indicates that the rework was done on the well, but not completed. However, the Division was not notified to inspect blowout prevention equipment prior to conducting downhole operations in violation of permit P116-0116.

Pacific Coast Energy Company LP is in violation of PRC 3236 for failure to notify the Division for inspection of blowout prevention equipment. Pacific Coast Energy Company LP is to immediately instruct its personnel and sub-contractors as to the importance of notifying the Division of all required inspections or re-inspections.

Failure to comply with the laws of California and this Division may result in enforcement action including, but not limited to, issuance of a civil penalty and/or order pursuant to Public Resources Code Sections 3106, 3224, 3235 and 3236.5.

If you have any questions, please contact Barry Irick at (714) 816-6847 or barry.irick@conservation.ca.gov.

Re: PRA Request R006330-120320 for West Pico Drill Site; Retention of Oil Permitting Records; and Permit Inspection Fees

Dear Mr. Uyemura, Mr. Terrazas and Ms. Crowley,

On behalf of Neighbors for A Safe Environment (NASE), a California nonprofit corporation seeking to protect neighborhoods from the impacts of oil drilling, we seek to address a partially outstanding Public Records Act (PRA) request from Professor Michael Salman regarding documents relating to permits for oil wells within the City of Los Angeles. We also seek to address the City's record retention policies for these and other related documents, as well as a lack of monitoring of oil drilling activities demonstrated by documents and other information that Professor Salman has received.

Outstanding Public Records Act Request

Professor Salman submitted PRA Request R006330 on December 3, 2020, requesting records pertaining to Los Angeles Fire Departments (LAFD) oil well operating permits for the wells at the West Pico Drill Site that are processed by the Office of Finance for the years spanning 2000 to 2020. This request was submitted to the Office of Finance after Professor Salman spent approximately two months trying to obtain these records from the LAFD. After several requests to LAFD, each supported by additional identifying information to help staff locate the records, LAFD personnel told Professor Salman that the Office of Finance was "the custodian for operational permits" and "the Custodian of Records" for those permits.

The Office of Finance has provided Professor Salman with pdf copies of operating permits for the years 2005-2020. We understand that the Office of Finance digitized records from the start date of 2005, and that paper records for earlier permits may not exist in the Office of Finance. We do not know whether copies of these earlier permits exist in the files of the LAFD, but to the extent they do, we request that any such records held by the LAFD please be produced in response to the several PRA requests that have been filed by Professor Salman.

While the Office of Finance has provided copies of operating permits identified above, it has not yet provided Professor Salman with copies of any communications with LAFD or LADBS or City Planning. It is our understanding that Finance is working with other City information technology agencies to determine if there are electronic records it can recover. If the Office of Finance cannot provide copies of these requested documents from its own files, then we request that the Office of Finance, as the Custodian of Records, please obtain copies from the LAFD Harbor Industrial Unit and from the LADBS and/or City Planning, where these communications originated.

Record Retention for Oil Well Permitting Documents

Professor Salman has received conflicting information from the Office of Finance and LAFD regarding the record retention policies of these departments for documents relating to oil well permits. PRA Request R006330 included a request for all applications, authorizations/rejections communicated by the LAFD and/or LADBS and/or Department of City Planning, communications with the LAFD and/or LADBS and/or City Planning,

communications with the operating oil company, and the permits themselves. There have been inconsistencies in responses to Professor Salman regarding how long the Office of Finance and LAFD retain these documents.

Given that it is unclear how long these documents will be retained under existing department procedures, this letter serves to put the Office of Finance on notice that these records must be retained due to the potential for litigation by NASE addressing oil well operating permits at the West Pico Drill Site. All records (paper, electronic, and on other media) pertaining to LAFD oil well operating permits for the wells at the West Pico Drill Site that are processed by the Office of Finance – including applications, authorizations/rejections communicated by the LAFD and/or LADBS and/or Department of City Planning, communications with the LAFD and/or LADBS and/or City Planning, communications with the operating oil company, and the permits themselves should be retained.

The Zoning Administrator, City Attorney, Petroleum Administrator and other City officials and staff have been advised of the potential for litigation concerning the City's actions and negligence at the West Pico Drill Site (9101 & 9151 W Pico Blvd, Los Angeles, CA 90035) and other similar sites where there has been a pattern and practice of violating City law and CEQA. Please see the attached letter to those City officials and staff, sent on August 24, 2020, in connection with a still open Planning Department case, number ZA-1989-17683-PA2. (Attachment 1.)

Below we set forth additional issues of concern by NASE regarding the City of Los Angeles's failure to monitor, implement, and enforce its own laws governing the operation of oil wells and oil drill sites, as well as the City's violation of the California Environmental Quality Act (CEQA), that are the subjects of potential litigation concerning the West Pico Drill Site and other drill sites within the City.

Renewal of Annual Operating Permits Despite Legal Violations.

LAFD Annual Operating Permits are required for oil wells. (Los Angeles Municipal Code (LAMC) 57.106.6.1, LAMC 57.106.6.3.2.) These Annual Operating Permits are conditioned upon an agreement "to comply with all regulations, laws, or ordinances pertaining thereto." (LAMC 57.105.3.9.1.2.) One such regulation is that: "No person shall drill, deepen or maintain an oil well or convert an oil well from one class to

the other and no permits shall be issued for that use, *until a determination has been made by the Zoning Administrator or Area Planning Commission* pursuant to the procedure prescribed in Subsection H of this section." (LAMC 13.01.I, emphasis added.)

There are currently 57 oil wells at the West Pico Drill Site. As the attached letter to the Zoning Administrator explains, since 2000 there have been 2 new wells drilled, 12 existing wells re-drilled, and 10 wells converted at the West Pico Drill Site, all without application to the Zoning Administrator and therefore without Zoning Administrator approval required by the LAMC and without environmental clearance required by CEQA. All of these wells have been granted LAFD operating permits and annual renewals, despite this failure to comply with City regulations and State law.

Non-compliance with City regulations at oil drill sites is a Citywide problem. For example, the Banning Semi-Controlled Drill Site in Wilmington, established in 2006, has approximately 220 wells and is one of the most troubled sites in the City. There are lengthy records of violations logged by DOGGR/CalGEM and SCAQMD, many of which also violate City law and Zoning Administrator assigned conditions restricting odors, fumes, noise and other nuisances. There have been projects executed without required Zoning Administrator approval, in violation of City regulations. The operator of this site applied for a slew of DOGGR permits to drill new wells in 2019, telling DOGGR that its 2006 Zoning Administrator approval and MND provided local approval and CEQA clearance, failing to disclose that the 2006 approval for drilling new wells was limited to a term of 12 years and expired in August 2018. Despite this, we believe that LAFD Annual Operating Permits for the Banning site in Wilmington are renewed year after year, in violation of the requirement for operator compliance "with all regulations, laws, or ordinances."

In addition to requiring operator compliance "with all regulations, laws, or ordinances," the LAMC also declares that: "Notwithstanding any other provisions of this Code or any other ordinance of the City of Los Angeles, no permit or license shall be issued in violation of any provisions of this Code or any other ordinance of the City of Los Angeles; if any permit or license is issued in violation of any provision of this Code or any other ordinance of the City of Los Angeles the same shall be void. Any permit or license issued, which purports to authorize the doing of any act prohibited by any other provision of this Code or any other ordinance of the City of Los Angeles, *shall be void*." (LAMC 11.02, emphasis added; LAMC 11.01 ["'Shall' is mandatory"].) To the extent

Annual Operating Permits were issued for unapproved or unlawfully approved projects or were issued or renewed despite violations of City regulations, they must be considered void.

Failure to Expend Permitting Renewal Fees for Intended Purpose

The violations of City and State law referenced above and the long history of non-compliance by the operators of the West Pico Drill Site and Banning Semi-Controlled Drill Site in Wilmington is traceable to the City's failure and refusal to do general compliance inspections and enforce its own laws.

The LAFD Annual Operating Permits are issued after a fee is paid, and a fee is required each year for the renewal of the LAFD Annual Operating Permits. These fees were established and are imposed by the City to cover the cost of annual compliance inspections for each drill site in the City. In fiscal year 2020-21, the permit fee was $1,290. For next year, the LAFD has requested and the City Council has agreed to increase the fee to $1,670. This is a cost per permit, and each oil well requires its own permit. The permit cost is calculated to pay for five "inspector hours" per oil well. (See Report from Board of Fire Commissioners," November 18, 2020 https://clkrep.lacity.org/onlinedocs/2020/20-1501_rpt_FC_11-18-2020.pdf, incorporated by reference.) The permit fee is expressly earmarked to pay for oil well inspections, and the permit is conditioned on compliance "with all regulations, laws, or ordinances."

These permitting fees result in significant revenue for the LAFD. There are approximately 1,100 oil wells in the City, so in 2020-21 more than $1.4 million was collected in operating permit fees. With the recently approved fee increase, next year the City will collect $1.8 million to pay for inspections. The West Pico Drill Site has 57 oil wells. In fiscal year 2020-21, $73,530 was collected in permit fees at this one drill site to cover the cost of compliance inspections. The Banning Semi-Controlled Drill Site in Wilmington has approximately 220 wells. In 2020-21, $283,000 of fees earmarked for LAFD compliance inspections of the wells was collected for the operating permits at this site.

Despite collecting significant annual renewal fees to cover the cost of compliance inspections for each oil well in the City, Professor Salman has been informed by LAFD that compliance inspections of each site have no connection to permit renewal. These renewals are approved automatically upon payment of the fee without any reference to

what might be found during inspections, as a matter of standard operating procedure. Indeed, LAFD operating permits have been renewed when there were open and unresolved Notices of Violation from the LAFD itself. Additionally, it is our understanding that the LAFD inspections that are performed look only for Fire Code violations and do not crosscheck approvals from the Zoning Administrator nor permitting and Notices of Violation from any other agency. Thus, when renewing the permits, LAFD has not verified operator compliance "with all regulations, laws, or ordinances."

Failing to expend permitting fees in the manner they were intended, to fund annual compliance inspections, appears to be a major contributing factor to the numerous drill site violations noted above and in the attached letter. Allowing non-compliance with City law by failing to inspect for non-compliance appears to be a continuing pattern and practice. This failure to perform fully-funded annual compliance inspections is particularly alarming given the potential dangers presented by poorly run and poorly regulated oil well operations that have been a subject of major concern in the City for years.

Conclusion

We look forward to your prompt response regarding the outstanding Public Records Act request by Professor Salman. NASE also urges you to carefully consider the legal issues and community concerns we have outlined above. Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer

Re: ZA-1989-17683-PA2; Need for Comprehensive Review of Conditions at the West Pico Drill Site (9101 & 9151 W Pico Blvd, Los Angeles, CA 90035) to Address Numerous Legal Violations and Community Impacts

Dear Mr. Irving,

On behalf of Neighbors for A Safe Environment (NASE), a California nonprofit corporation, we seek to address ongoing and emerging legal violations at the West Pico Drill Site (9101 & 9151 West Pico Blvd, Council District 5) that have led to a failure to provide necessary protections to the community surrounding this drill site. NASE has extensively communicated with the Zoning Administrator (ZA) and documented the bases of its concerns. NASE has also cooperated with the operator of the West Pico Drill Site, the Pacific Coast Energy Company (PCEC), and together with PCEC presented a set of practical solutions to the ZA. We urge the City to implement the reasonable and viable remedies we have previously presented and which are outlined below.

Unfortunately, thus far, the City has failed to act on the remedies NASE has proposed, including NASE's request for a Review of Conditions as per the procedures required by the 2001 Settlement Agreement between NASE, the City and the West Pico Drill Site operator and Condition 78 of the 2000 approval in ZA-1989-17683-PAD. Additionally, despite clear requirements in the City's Municipal Code and ZA Memo 133 for discretionary approval supported by environmental review for any oil well drilling, redrilling or conversion project, the City persists in relying on inapplicable categorical exemptions from the California Environmental Quality Act (CEQA) for approvals. Thus far, the City has also refused to impose

necessary modification of conditions to correct a great many ongoing violations of CEQA and City law by the City, as well as by the current and prior site operators.

NASE has retained our firm to make another effort to convince the City to bring its own practices of land use regulation and petroleum administration into compliance with the 2001 Settlement Agreement, CEQA, and City law. This letter outlines the remedies that would achieve those simple goals and provide necessary protection for the surrounding community. It also gives the City notice that if persistent violations are not rectified, NASE is prepared to seek legal remedies to require compliance with the Settlement Agreement and enforce CEQA and City law. We hope that the City will prefer to open discussion about a reasonable set of remedies.

A. NASE Urges the City to Adopt Remedies to Address Legal Violations and Impacts to the Community.

From its initial communication with the Chief ZA in November 2019 up until now, NASE has asked for only modest and eminently viable remedies to alleviate impacts to the community and ensure compliance with the law. NASE has requested that ZA-1989-17683-PA2 be a Review of Conditions, as mandated by the 2001 Settlement Agreement and Condition 78 of the 2000 approval in ZA-1989-17683-PAD. Pursuant to the 2001 Settlement Agreement and Condition 78, the review must:

- examine the West Pico Drill Site's compliance with conditions of approval;
- assess "neighborhood impacts;" and
- evaluate the "efficacy of mitigation measures," with modification of the mitigation measures and/or corrective measures "if warranted."

As set forth herein, this Review of Conditions must be comprehensive, legally compliant and must impose new conditions to address ongoing violations and impacts and correct significant errors in the 2000 approval for the West Pico Drill Site.

1. The Review of Conditions Must Include a Comprehensive Compliance Inspection.

The Review of Conditions for the West Pico Drill Site needs to be prefaced by a Comprehensive Compliance Inspection led by the Office of the Petroleum Administrator. This Review of Conditions should follow the example of the one and only Comprehensive Compliance Inspection of an oil drill site ever conducted by the City—the Rancho Park Drill Site inspection conducted in March/April 2017. Only a full inspection by a qualified professional can fully define the scope of the project in the current review. Thus, the inspection is necessary to

inform compliance with conditions of approval, CEQA clearance and, by the same measure, inform the ZA and the public regarding corrective measures that should be required.

2. The City Must Comply with ZA Memo 133 in its Review of Conditions By Requiring CEQA Review for the Projects on the Drill Site.

The Review of Conditions for the West Pico Drill Site must be compliant with CEQA and with the City's own guidelines in ZA Memo 133. It has been established beyond the shadow of a doubt that mitigation measures from the 2000 approval and its associated EIR have failed to protect the community. Odor complaints from the community are well document and are matched by testimony from Council Member Paul Koretz. The Los Angeles Fire Department also imposed citations on the operators of the West Pico Drill Site for leaving petroleum exposed on surfaces in 2017 and 2018.

Multiple conditions from the 2000 approval have been violated, and the City has failed to enforce mitigation measures established through the associated EIR. Conditions 46, 47, 53, 57, 61, 72, and 78 (concerning odors, nuisance, good oil field practices, redrilling, and reviews of conditions) have all been violated. "Mitigating conditions are not mere expressions of hope." (*Lincoln Place Tenants Ass'n v. City of Los Angeles* (2005) 130 Cal.App.4th 1491, 1508.) CEQA requires mitigation measures to be concrete and enforceable. (Pub. Resources Code § 21081.6(b).) From at least 2006 to the present the ZA and the City have failed to monitor or enforce these conditions in violation of CEQA.

In addition to those ongoing CEQA violations by the City, PCEC has stepped forward to do honest research on projects executed at the site since 2000. PCEC agrees with NASE that there have been 25 unapproved projects, including 24 projects on oil wells that require discretionary review by the ZA according to City code, and thus CEQA clearance by State law. ZA Memo 133 directly states that proposals to drill, redrill, or convert wells are ineligible for categorical exemptions under CEQA. The 25 unapproved projects and the obvious need to revise mitigation measures makes reliance on categorical exemptions utterly improper. An Initial Study and an MND are required, at minimum, and that is what NASE requests.

3. The Continuing Impacts to the Community Demonstrate a Need to Impose New Conditions Through the Review of Conditions.

The ongoing impacts to the community surrounding the West Pico Drill Site, and the numerous violations of existing conditions of approval, demonstrate a clear need to impose new conditions through the Review of Conditions process to prevent these problems from continuing.

Based on NASE's familiarity with the impacts to the community and the existing conditions, it is our position (supported by PCEC) that the following new conditions must be adopted:

- Annual Compliance Inspections led or overseen by qualified professional staff in the Office of the Petroleum Administrator.

- Permanent 24/7 Emissions Monitoring, with recorded data that is reported to the Petroleum Administrator, the ZA, and the public on a quarterly basis.

- Incorporation of the requirement of cyclical Five Year Reviews of Conditions from the 2001 Settlement Agreement into the ZA conditions for the site, using the full procedures delineated in Condition 78 of the 2000 approval as per the Settlement Agreement.

- Immediate Emergency and Accident Reporting to the City (to LAFD, the Petroleum Administrator, and the local Council office) for any emergency or accident that must be reported to any Federal, State, or regional agency.

The need for additional conditions may be identified through the comprehensive compliance inspection as well.

4. The Review of Conditions Must Correct Several Errors from the 2000 Approval.

The Review of Conditions for the West Pico Drill Site must also correct significant errors from the 2000 approval that are inconsistent with City law, the actual record of approvals for the site, and the facts of what actually exists at the site. Those errors include:

- **Delete Condition 72 to Eliminate its Contradiction with LAMC 13.01.H and 13.01I.** This condition addressing "redrilling" directly contradicts the provisions of Los Angeles Municipal Code sections 13.01.H and 13.01.I. Both of these sections require discretionary approval by the ZA before any oil well is drilled, redrilled, or converted between producer and injection well. The contradiction may have contributed to the rash of unapproved projects at the site since 2000, including the redrilling of 12 wells since 2000 without ZA review, approval, or CEQA clearance. Condition 72's undermining of LAMC 13.01.H and 13.01.I on drilling and redrilling wells may have also contributed to the conversion of 10 wells since 2000 without ZA review, approval, or CEQA clearance per the requirements of ZA Memo 133.

- **Correct the Number of Existing Wells.** The 2000 ZA approval for the West Pico Drill Site incorrectly asserts that 69 wells existed at the site in 2000 and that 69 wells had been approved. Only 59 wells currently exist at the site, and only 57 existed in 2000. Only 57 wells have been approved for the site by the ZA. The ZA's error in 2000 reflected a lack of knowledge about the drill site, a lack of knowledge about the difference between a well cellar and a well, and a failure to cross-check with State records from DOGGR (now CalGEM) even as the ZA wrote conditions requiring that all monitoring agencies need to be consulted. This error may have contributed to the drilling of unapproved wells without CEQA clearance in 2005 and 2010.

- **West Pico Drill Site Includes Both 9101 and 9151 West Pico Blvd as a Single Controlled Drill Site.** The 2000 approval improperly split the single integrated "Controlled Drill Site" into two sites because the operator in 2000 proposed a construction project that would occur on only one half of the site. This error runs afoul of LAMC 13.01, especially 13.01.E.2.b. A Controlled Drill Site is the only kind of conditionally approved land use on which oil can be produced from wells and processed for sale. Only one Controlled Drill Site can exist in Oil Drilling District U-131, and only one has ever been approved: namely the West Pico Drill Site, approved in ZA-1965-17683. The ZA severed the unified Controlled Drill Site into two in 2000, leaving both without a legally sustainable basis for operation. This error also may have contributed to the improper installation of microturbines by obscuring the prohibition against electric generation on the Controlled Drill Site or anywhere in the Oil Drilling District that was written into the 1965 approval to establish the Controlled Drill Site. The 2000 approval, which completely rewrote and supplanted the 1965 approval, also prohibits electric generation at the West Pico Drill Site. By improperly splitting the Controlled Drill Site in two, the 2000 approval left the other half of the Controlled Drill Site without any approval or conditions in place.

B. These Remedies Are Necessitated by the Ongoing and Potential Legal Violations.

NASE has chosen to focus on remedies in this communication in a continuing effort to achieve relief for the community and legal compliance by the City. However, the description of the remedies, above, should provide you with an indication of some of the legal violations we may seek to challenge in court, if necessary. These include:

- Ongoing violations of CEQA for the City's failure to enforce mitigation measures from the EIR associated with the 2000 approval for the West Pico Drill Site.

- Failure to require CEQA review for discretionary, and recently discovered, well drilling, redrilling and conversion projects at the West Pico Drill Site.

- The proposed improper reliance on categorical exemptions for the current review of the West Pico Drill Site.

- Failure to enforce LAMC 13.01.H and 13.01.I by allowing operation of 25 unapproved oil well projects on the West Pico Drill Site.

- Violated LAMC 13.01.E.2.b by dividing the Controlled Drill Site into two sites in 2000.

- Breach of the 2000 Settlement Agreement due to the City's failure to conduct the required five-year reviews for the West Pico Drill Site for at least the last 10 years. No legally required reviews have been held during Councilmember Koretz's term in the City Council until NASE demanded this review in November 2019.

- The current ZA review process also appears to be running afoul of the requirements of the 2000 Settlement Agreement, CEQA and City regulations due to its improperly narrow focus and the ZA's stated position that the process would not result in the modification of any conditions.

Conclusion

The problems at the West Pico Drill Site are not isolated incidents and they are not unknown to City officials. The City has been negligent in its land use-based regulation of oil drill sites, failing to protect the communities impacted by these drill sites. It has never performed regular inspections to monitor for compliance with ZA-assigned conditions, and so mitigation measures routinely are not followed and not enforced. Similarly, the City continues to engage in a pattern and practice of handing out categorical exemptions from CEQA review for oil projects, contrary to the requirements of CEQA, ZA Memo 133 and LAMC 13.01.H and 13.01.I. Taken together, this pattern of negligence gives a green light to unapproved projects and turns a blind eye to poor work practices, all at the expense of communities the City is supposed to protect.

Most confounding here is the City's refusal to address environmental, health, and safety protections when an operating oil company comes forward to join with the community in asking the City to implement CEQA properly and to do inspections, require emissions monitoring, and perform serious reviews. This situation must be remedied. It is NASE's hope that the current ZA process can be revised to begin to address these ongoing issues, but if not, we are prepared to pursue available legal options.

Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer

HEALTH RISK ASSESSMENT REPORT
BreitBurn Drill Site
Los Angeles, California

1.0 INTRODUCTION

On behalf of Neighbors for a Safe Environment (NASE), Geomatrix Consultants, Inc. (Geomatrix) has prepared this health risk assessment for air emissions from operations at the BreitBurn Oil Company (BreitBurn) drill site (the drill site) at the corner of West Pico Boulevard and South Doheny Drive in Los Angeles, California (Figure 1). This health risk assessment provides an evaluation of results of air quality sampling conducted at and near the drill site in 2004 and 2005 (Geomatrix, 2005). The approach for conducting the air quality sampling and health risk assessment were outlined in the settlement agreement between NASE and BreitBurn dated June 8, 2001, which provided a general approach for conducting the work, and the *Sampling and Analysis Plan and Human Health Risk Assessment Work Plan* (Geomatrix, 2004), which provided a detailed methodology for collecting air quality samples and conducting the health risk assessment.

The objective of this project was to collect air quality data that reflect emissions of chemicals during operations at the drill site (excluding concentrations of chemicals associated with background conditions) and to quantify potential exposure to these chemicals by residents and industrial/commercial receptors in the vicinity. Three principal activity modes were evaluated: well-pulling/maintenance, drilling/redrilling, and idle. The latter category reflects potential emissions associated with oil and gas extraction (e.g., pumping of crude oil) in the absence of drilling activities. Samples were collected from on-site sources and at off-site locations in the neighborhood immediately upwind and downwind during all three activity modes to identify and quantify chemicals emitted and potential off-site impacts. The data collected was used in this quantitative HRA to assess the potential for short-term and long-term health effects associated with emissions from the drill site. Potential human health risk was evaluated separately for the emission measurements and the ambient air measurements.

This report provides detailed information regarding site background, data evaluation, exposure assessment, toxicity assessment, and risk characterization.

2.0 SITE BACKGROUND

Much of the information in this section is based on descriptions provided by BreitBurn and obtained during site visits conducted by representatives of Geomatrix. The drill site is an oil drilling and producing facility that was originally constructed by Occidental Petroleum Corporation in 1965. Fifty-nine of 69 wells authorized by the City of Los Angeles and reaching into the oil-production zone have been completed or abandoned. The remaining 10 wells have been drilled to a depth sufficient to allow cementing in place of the first casing, conductor pipe. The drill site currently extracts approximately 700 barrels of oil and 1,200,000 cubic feet of natural gas per day on a 24-hour, 7-day per week operating schedule.

2.1 SITE CONFIGURATION

The drill site consists of a support building, a movable catwalk building surrounding and attached to the derrick (drilling tower), a drilling mud processing building, two well cellars that contain the 69 wellheads, and incidental equipment and ancillary structures (Figure 2). The drill site houses a permanent, mobile, electrically-powered derrick approximately 23 feet on each side, 128 feet tall and enclosed within an architectural structure. The ground surface of the drill site is covered in concrete or asphalt at or near grade. Most permanent equipment is below grade in well cellars or located inside enclosed structures. Where buildings do not create a boundary, the drill site is surrounded by 25-foot walls intended to provide noise control and visual screening.

2.2 OPERATIONS

The derrick is used for the two general types of operations routinely conducted at the drill site: well maintenance (which usually includes pipe-pulling) and drilling/redrilling operations. BreitBurn normally engages in each of these activities for several months per year (i.e., 2 to 6 months each); the derrick is not used during the remaining time. Well maintenance consists of lifting pipe from the well in sections, stacking the sections vertically within the derrick, repairing the well or its equipment, and then lowering these sections back into the well. Pipe-pulling activities typically occur over several hours to a few days and usually continue on a 24-hour-per-day basis. Drilling/redrilling operations consist of drilling a new hole and/or using the upper portions of an existing well for slant drilling a new portion of the well in the production zone. Drilling/redrilling operations typically occur 24 hours per day and may last for several days to more than one month at a time.

When the drill rig is in use and at nearly all other times, there is, by design, an updraft of air in the tower. There are three fans on top of the derrick creating this updraft: one pulls air from the rig floor, one pulls air from the mud house, and one is a swing fan that can pull air from either source but not both at the same time. In addition, fans in the supply building and purge air fans (bringing in outside air) contribute to the updraft in the derrick tower. This updraft sweeps chemical vapors being released by drilling/redrilling or pipe-pulling activities into the tower air and out the top of the structure.

When drilling a well, mud – a water-based slurry of clay type materials – is pumped into the well for several reasons, including lubrication, debris removal, and occasionally to power the drill rotation. During drilling, mud constantly flows out of the well carrying the drilling debris (shavings). The mud is transported in pipes to the mud house where the shavings are separated from the mud, which is then reused. During the separation process using shakers and screens, crude oil in the mud can release petroleum-based vapors. Fans mounted in the mud house move sweep air through the mud house to capture these vapors and move them into a large duct that runs several hundred feet to nearly the top of the inside of the drilling tower where it vents to the atmosphere. There is an additional induced draft (ID) fan near the top of the tower to help draw the vent air through the duct work. The ID fans in the derrick are always on (even during idle periods). No mud is pumped during well maintenance operations or during idle periods.

The well heads are located in two cellars, each configured as a long, narrow, recessed corridor. In these cellars, there may be small amounts of standing crude oil or oily water and oil present on well heads and pipes more or less at all times. These cellars were identified as a source of fugitive emissions.

Other activities at the drill site include truck deliveries to the support building and cleaning operations. The diesel engine exhaust from truck deliveries was also considered as a source of chemical emissions and was included as another source to be quantified. In addition, diesel engines are used in the supply building intermittently to power a pumping system.

For the purpose of estimating off-site air concentrations, BreitBurn personnel provided a projection of drilling and maintenance activities for the next 30 years. The percentages are based on a total possible operation period of 365 days per year. As shown in Table 1, projected conditions in 2005 represent the maximum duration of these activities in total. Idle conditions (e.g., emissions from well cellars and diesel engines) were assumed to exist as a baseline for 24 hours per day for 365 days per years in addition to emissions from any drilling or maintenance

activities. In accord with the applicable air toxics risk assessment methodology (e.g., AB2588 Toxic Hotspots regulations, OEHHA, 2003), current operations were presumed to continue unchanged over time for the purpose of calculating risk.

3.0 DATA EVALUATION

Data evaluation is the process of analyzing site characteristics and analytical data to identify chemicals of potential concern (COPCs) to be evaluated in the HRA. This section of the risk assessment summarizes emission source and ambient air measurements and provides a summary of all COPCs identified at the site. The *Air Quality Sampling Report* (Sampling Report, Geomatrix, 2005) provides a detailed summary of data collection methods and results.

3.1 CHEMICAL CHARACTERIZATION

Air samples were collected at on-site source locations and off-site ambient air locations and analyzed for volatile organic chemicals (VOCs) using EPA Method TO-15. In addition, the lab was instructed to report the ten tentatively identified compounds (TICs) with the highest detected concentrations.

3.2 CHEMICALS OF POTENTIAL CONCERN

For ambient air samples, chemicals also detected in at least one BreitBurn source sample were identified as chemicals of potential concern (COPCs). Chemicals detected in at least one source sample and chemicals that are major constituents of diesel exhaust, quantified using emission factors developed by the California Air Resources Board (CARB) as described in the Sampling Report, were included as COPCs. For ambient air samples, chemicals also detected in at least one BreitBurn source sample were identified as chemicals of potential concern (COPCs). This approach is designed to be conservative and does not necessarily mean that the concentration measured is related to emissions from the BreitBurn drill site. Chemicals detected at ambient off-site locations, but not detected in facility emissions, were not considered COPCs.

Twenty-six COPCs were detected in facility emissions, 20 of which are petroleum hydrocarbons known to be found in crude oil and/or natural gas. Concentrations of six non-petroleum related hydrocarbons (acetone, carbon disulfide, 2-propanol, tetrachloroethene, tetrahydrofuran, and trichloroethene) were measured at one or more of the sources at the drill site. Concentrations of carbon disulfide, tetrahydrofuran, and trichloroethylene were not measured in ambient air samples. Measured source concentrations of acetone and tetrachloroethylene, in general, seemed higher on average than measured ambient air

concentrations. Similarly, concentrations of 2-propanol seemed slightly higher than ambient air concentrations, but this observation is not conclusive. To be conservative, all chemicals detected at drill site sources were retained in this analysis although some of these chemicals are not reportedly used at the drill site. In calculating risk, concentrations of COPCs representative of "background" concentrations in ambient air were subtracted from measured concentrations at the sources to eliminate the potential for evaluating background concentrations of chemicals entering the drill site as part of facility emissions. Based on the CARB emission factors, five major constituents of diesel exhaust were also included as COPCs. The COPCs identified in the Sampling Report and evaluated in this HRA are presented in Table 2.

4.0 EXPOSURE ASSESSMENT

Exposure assessment is the process of describing, measuring or estimating the intensity, frequency, and duration of potential human exposure to chemicals of potential concern (COPCs) in environmental media (e.g., soil, water and air) at a site. This evaluation focuses on potential inhalation exposure to chemicals emitted from the drill site for nearby commercial and residential receptors. Two separate approaches to exposure assessment were conducted in this HRA. Potential long-term exposure was evaluated based on the emission measurements at the sources, and potential short-term exposure was evaluated based on the ambient air measurements in the vicinity of BreitBurn. Since ambient air measurements reflect conditions over a short time span (i.e., hours), they can not be construed as representing a reasonable estimate of long-term exposure potential. Sections 4.1 and 4.2 describe further the process of estimating exposure for short-term and long-term exposures, respectively.

4.1 AMBIENT AIR MEASUREMENTS

Ambient air measurements were reviewed to identify chemicals that also were detected in emissions from the facility (facility-specific chemicals). A total of 19 chemicals were detected in ambient air and also were measured in facility emissions; however, this does not mean necessarily that the drill site is the source of the measured concentration. The measured air concentration was compared to acute noncarcinogenic health criteria (Section 5.0) to assess potential acute human health risks. Ambient air measurements are presented in Table 3.

4.2 EMISSION MEASUREMENTS AND AIR DISPERSION MODELING

Estimates of potential human health risks associated with measured chemical emissions were evaluated using methodology consistent with guidelines published by the Office of Environmental Human Health Assessment (OEHHA, 2003) for evaluating air toxics in California.

Emission estimates and source characteristics were based on measurements collected during idle conditions and during well drilling and maintenance activities or reflect reported diesel engine use at the facility.

4.2.1 Source Characterization

Emissions of COPCs from three source locations are evaluated in this assessment: the drill rig tower, the well cellars, and the supply building vent (diesel emissions). This section also describes how the sources were characterized for the purpose of air dispersion modeling. Table 4 summarizes source characteristics, and Figure 2 shows the locations used in the modeling.

Emissions from drill rig operations (drilling and maintenance) and the mud house (drilling only) are vented through the drilling tower. The top of the drilling tower is approximately 128 feet above grade. The surface area of the emission source at the top of the drilling tower is approximately 50 square meters (m^2) and emissions from the tower flow through the entire surface. The average measured flow rate from the tower was 30 cubic meters per second. The tower was modeled as a point source. The tower diameter used in the model was derived using the cross-sectional area of the tower and assuming a point source with the same area. The drilling tower is mobile and can be slowly moved along railroad-like rails in order to access all wellheads. It can move east-west along each well cellar; the north cellar is 144 feet long and the south cellar is approximately 100 feet long. The drilling tower can also move north-south approximately 30 feet to move between the two well cellars. For the purpose of modeling, the drilling tower source was placed approximately in the center of the possible locations since movement of the drilling tower is not predictable. By placing the tower in the center of the possible locations, it was intended to reflect the long-term average location.

The well cellars are two elongated trenches about ten feet deep, in which the production wells are located. A small thermal updraft from each of the well cellars was measured with tracer gas flows. This updraft will carry emissions from the oily water, standing crude oil, or fugitive leaks from the well heads out of the cellars into the open air in the drilling yard. The emissions from the well cellars were modeled as six point sources of equal size; the total cross-sectional area of the modeled sources was approximately equal to the area of the well cellars. The release height was set equal to the outer wall height (25 feet) since emissions would need to clear the wall before dispersing off site. The well cellars were set up as point sources so that potential building downwash related to these sources would be accounted for. The flow rate was set to 0.1 m/s to represent negligible vertical velocity and then converted to volumetric

flow rate based on the source diameter. This volumetric flow rate was similar to measurements reported in the Sampling Report. These sources were modeled in a separate model run from the tower model run so that stack-tip downwash algorithms were not incorporated into the model (as was necessary for the tower emissions) since the cellars are not truly discrete stacks.

At certain times, especially during drilling, there may be diesel-powered truck activity to and from the BreitBurn site with continued main or auxiliary engine operation inside the support building. Some of these emissions are collected directly from the exhaust pipe of the engine through a vapor capture system and blown horizontally out of the south side of the supply building through a set of louvers approximately 30 to 40 feet above grade. The louvers are approximately 10 feet wide and 8 feet high. Other diesel exhaust would have been released within the supply building. General air from this building, including the exhaust fumes, was vented into the tower and mixed with the air leaving the top of the tower. To be conservative, all diesel emissions were assumed to exit the supply building via the set of louvers. Because the flow rate from the vent is not known and the emissions are released horizontally, the emissions were modeled as a volume source with an initial vertical dimension corresponding to the height of the vent and an initial lateral dimension corresponding to the width of the vent. The release height was set as 25 feet.

4.2.2 Emission Rates

Emission rates for each source were developed in the Sampling Report, which are slightly different than the emission estimates used in this risk assessment. The differences are as follows:

- Ambient background concentrations of the COPCs in air have been subtracted from the source measurement prior to the calculation of exposure and risk.
- A duplicate sample for the tower emissions was included in the calculation in the Sampling Report, but has been eliminated from the revised calculation since inclusion would over represent the concentration at the source on that particular day.

In Appendix A, updated emissions estimates are presented that account for these revisions. In some cases, the background concentration was greater than the measured source concentration so the emission rate for that measurement period was 0. The average background concentration in ambient air is represented by the average concentration for all upwind and downwind monitoring stations. The average emission rates presented in Appendix A represent emissions averaged over days when specific activities were occurring at the drill site. To account for the intermittent nature of drilling and maintenance activities, BreitBurn's operating schedule

(Table 1) was used as an activity duration factor to develop an annual average emission rate for drilling and maintenance emissions (Table 5). BreitBurn's projected schedule for 2005 was used as the most conservative measure of potential emissions from drilling and maintenance consistent with regulatory guidance (OEHHA, 2003). The emissions from drilling and maintenance activities were summed to produce total annual average emissions from the tower.

The average emission rate presented in the Sampling Report for cellar emissions represented the emissions from one cellar. To account for the contribution of one cellar and one-half of the other cellar (the half not influenced directly by the tower), the average emission rate was multiplied by a factor of 1.5. The cellar emissions are presented in Table 5.

Diesel engine emission rates were not adjusted from those presented in the *Air Quality Sampling Report* (Geomatrix, 2005) except to add emissions from the main diesel engine and auxiliary diesel engine together. Diesel engine emission rates are presented in Table 6.

4.2.3 Receptors

A receptor grid was developed based on 25-meter receptor spacing around the facility and at the facility boundary (Figure 3). As shown on Figure 3, residential receptors are located in the vicinity of the BreitBurn drill site. Residential populations were identified based on aerial photographs of the site and observations made during site visits. A receptor grid was set in a 1 kilometer radius of the facility boundary. Figure 3 shows a subset of all receptors included in the evaluation. During a site visit, receptor locations that coincided with buildings more than two-stories in height were identified. In the vicinity of the drill site, these were typically apartment or office buildings where air intakes would likely be located on the roof. For receptor locations identified as more than two-stories, the receptor height was increased by 10 feet for each story (e.g., for a three-story building the receptor height was set at 30 feet).

In addition, key off-site receptors (e.g., schools, hospitals, and day care centers) were identified in the vicinity of the drill site and specific receptor locations were added to the model (Table 7).

4.2.4 Air Dispersion Modeling

Air dispersion modeling was conducted using the Industrial Source Complex Short-Term (ISCST; version 02035, U.S. EPA, 1995) emission model to predict off-site chemical concentrations based on the measurements at the site. An electronic scaled facility diagram was used to locate sources using the Universal Transverse Mercator coordinate system. Meteorological data from the West Los Angeles, California station as provided by the South Coast Air Quality Management District was used in the modeling. Source, building, and

receptor elevations were provided by importing a USGS Digital Elevation Model (DEM) quad for Beverly Hills, California into the model.

U.S. EPA regulatory default options for modeling were used with the following exceptions:

- For well cellars, stack tip downwash algorithms were not included because the emissions are not from a true stack.
- To address a potential problem that may occur when the receptor elevation is below the stack base elevation, a non-regulatory default option was used. If this adjustment was made it is noted on the modeling output.

4.2.5 Predicted Off-Site Concentrations

Annual average air concentrations for all COPCs were predicted at receptors located on a 25-meter grid spacing surrounding the drill site. Summary results are presented in Table 8 and receptor locations are shown on Figure 4. Table 8 only presents results for receptors in the immediate vicinity of the drill site. All results are included in the modeling output in Appendix B. Among the grid receptors, a specific maximum exposed individual resident (MEIR) and a specific maximum exposed individual worker (MEIW) were identified based on the subsequent risk characterization (Section 6.0). Concentrations of COPCs were also predicted at key off-site locations.

4.2.6 Exposure Quantification

Potential exposure was estimated using exposure assumptions (Table 9) as appropriate to each receptor and for each health effect. For acute effects, no exposure adjustments are made because any receptor could be present in the vicinity of the drill site for one hour, the estimated duration of exposure. For chronic effects, the predicted concentration in air was adjusted by an exposure factor for the duration and frequency of worker exposure, but was not adjusted for residential exposure. Worker exposure was adjusted for working 8 out of 24 hours per day and 245 out of 365 days per year. For carcinogenic exposure, lifetime average daily dose (LADD) was calculated for the purpose of estimating risk for both residents and workers, as follows.

$$LADD = Ca \times DBR \times A \times EF \times ED \times 1x10^{-6} / AT$$

where:
- Ca = Predicted concentration in air ($\mu g/m^3$)
- DBR = Daily breathing rate (L/kg-day)
- A = Inhalation absorption factor
- EF = Exposure frequency (days/year)
- ED = Exposure duration (years)
- AT = Averaging time (years)

5.0 TOXICITY ASSESSMENT

Toxicity assessment entails quantifying the relationship between the dose of a chemical and the incidence of adverse effects in the exposed population. The result of the toxicity or dose-response assessment is toxicity criteria that are used in the risk characterization to estimate the likelihood of adverse effects occurring in humans at different exposure levels. The toxicity criteria used to evaluate noncarcinogenic health risks are commonly referred to as reference doses (RfDs) or reference exposure levels (RELs). Toxicity criteria used to evaluate carcinogenic health risks are referred to as potency or slope factors (SFs).

The Office of Environmental Health Hazard Assessment of Cal-EPA or U.S. EPA has completed toxicity assessments for many of the COPCs identified during air quality sampling. In cases where these agencies have not published acute toxicity criteria, other reliable sources were consulted. The associated toxicity criteria for the COPCs evaluated in this HRA were selected according to the following hierarchy:

1. Cal-EPA, Office of Environmental Health Hazard Assessment, 2005, on-line databases for Acute Reference Exposure Levels, Chronic Reference Exposure Levels, and Cancer Potency Factors, http://oehha.ca.gov/air/hot_spots/index.html;
2. U.S. EPA Integrated Risk Information System (IRIS), 2005, on-line database for toxicity criteria, http://www.epa.gov/iris/index.html;
3. U.S. EPA, 2004, Preliminary Remediation Goals (PRGs); and
4. U.S. EPA, 1997b, Health Effects Assessment Summary Tables, FY-1997 Annual, Office of Solid Waste and Emergency Response, Washington, D.C.

If a toxicity criterion was not available for acute exposures from one of these references, toxicity criteria from the following references were identified and the most conservative value was used in the evaluation.

- National Institute for Occupational Safety and Health (NIOSH), Recommended Exposure Limit (REL);
- American Conference of Governmental Industrial Hygienists, 2004, Threshold Limit Values;
- Agency for Toxic Substances and Disease Registry (ATSDR), 2005, Minimum Risk Levels; and
- California Air Resources Board, 2005, California Ambient Air Quality Standards.

If a toxicity criterion was not available for chronic noncarcinogenic exposures from one of these references, toxicity criteria from the following references were identified and the most conservative value was used in the evaluation.

- Agency for Toxic Substances and Disease Registry (ATSDR), 2005, Minimum Risk Levels; and
- Total Petroleum Hydrocarbon Work Group Series, 1997, Volume 4, Development of Fraction Specific Reference Doses (RfDs) and Reference Concentrations (RfCs) for Total Petroleum Hydrocarbons (TPH).

For some chemicals, specific toxicity criteria were not available. In these cases, toxicity criteria for surrogates with similar chemical properties were used. Petroleum hydrocarbons with five to eight carbon atoms (heptane, total methylpentanes, 2-methylbutane, methylcyclopentane, and pentane), had the same toxicity criteria and were grouped together for the purpose of modeling. The toxicity criteria used in this assessment are presented in Table 10 and the rationale is presented in Appendix C.

6.0 RISK CHARACTERIZATION

Risk characterization represents the final step in the risk assessment process. In this step, the results of the exposure and toxicity assessments are integrated into quantitative or qualitative estimates of potential health risks. Potential noncarcinogenic health effects and carcinogenic health risks are characterized separately.

6.1 NONCARCINOGENIC HEALTH EFFECTS

Potential adverse noncarcinogenic health effects were evaluated using the hazard index (also called HI) approach as recommended by U.S. EPA.[6] The first step in this approach is to compare the average daily dose (ADD) for each chemical to the appropriate REL. Acute and chronic comparisons were conducted independently. The comparison for chronic exposure was adjusted for workers to reflect the breathing rate and exposure duration as appropriate. This comparison is expressed in terms of a "hazard quotient," which is calculated as follows:

$$\text{Hazard Quotient}_i = \frac{\text{Concentration}_i}{\text{REL}_i}$$

Where: Concentration = Concentration of chemical "i" in air ($\mu g/m^3$)
REL = Reference Exposure Level for chemical "i" ($\mu g/m^3$)

A hazard quotient less than or equal to 1 indicates that the predicted exposure to that chemical should not result in an adverse noncarcinogenic health effect (U.S. EPA, 1989; SCAQMD, 2005a). For existing facilities with multiple sources, SCAQMD requires risk reduction measures for hazard indexes greater than 3 (SCAQMD, 2005b). In cases where individual chemicals potentially act on the same organs or result in the same health endpoint (e.g., respiratory irritants), potential additive effects may be addressed by calculating a hazard index as follows:

$$\text{Hazard Index} = \sum_{i=1}^{n} \text{Hazard Quotient}_i$$

A hazard index of less than or equal to 3 for existing facilities indicates acceptable levels of exposure for chemicals having an additive effect. In this risk assessment, a screening-level hazard index was calculated by summing the hazard quotients for all chemicals, regardless of toxic endpoint (U.S. EPA, 1989). This approach is generally believed to overestimate the potential for noncarcinogenic health effects due to simultaneous exposure to multiple chemicals because it does not account for different toxic endpoints (U.S. EPA, 1989; NRC, 1988; Risk Commission, 1997; Seed, et al., 1995). However, it can be used as a screening tool to rapidly identify those exposure scenarios for which exposure to multiple chemicals does not pose a noncarcinogenic health risk. If the screening hazard index is greater than 1, a target organ-specific hazard index may be calculated to more accurately assess the potential for noncarcinogenic effects to specific target organs based on target organs for each chemical identified by OEHHA.

6.1.1 Acute Noncarcinogenic Health Effects

The maximum measured ambient concentration of each COPC, regardless of background concentrations or upwind/downwind location, was compared to the acute reference exposure levels. As shown on Table 7, the concentrations were two or more orders of magnitude lower than the acute reference exposure levels, indicating that chemical emissions from the drill site would not result in an acute public health risk for short-term exposure under the conditions evaluated.

6.1.2 Chronic Noncarcinogenic Health Effects

The predicted annual average concentrations of COPCs were compared to the chronic reference exposure levels. The total chronic hazard indexes for the MEIR and MEIW were 0.02 and 0.004, respectively. The MEIR is also the point of maximum impact. The chemical-specific hazard quotients are presented in Table 11. These values are well below a hazard index of 3,

indicating that chemical emissions from the drill site would not result in a public health risk for chronic noncarcinogenic exposure under the conditions evaluated. Appendix D presents noncarcinogenic hazard indexes for all off-site receptors evaluated.

6.2 CARCINOGENIC HEALTH EFFECTS

Carcinogenic health risks are defined in terms of the increased theoretical probability of an individual developing cancer as the result of exposure to a given chemical at a given concentration. Conceptually, calculations and assumptions are intended to provide upper-bound estimates of hypothetical risk under the assumption that there is no threshold for the carcinogenic effect. Actual risk may be lower, if not zero. Incremental lifetime excess cancer risks are estimated as follows:

$$\text{Lifetime Excess Cancer Risk}_i = \text{LADD}_i \times \text{SF}_i$$

Where: LADD_i = Lifetime Average Daily Dose of Chemical "i" in air ($\mu g/m^3$)
SF_i = Slope Factor for Chemical "i" ($\mu g/m^3$)

As with hazard indices, the estimated excess cancer risks for each chemical were summed across all carcinogenic chemicals to estimate the total excess cancer risk for the exposed individual. The result was an incremental lifetime excess cancer risk related to emissions measured at the drill site.

Regulatory agencies such as Cal-EPA and U.S. EPA have defined what is considered an acceptable level of risk in similar though slightly different ways. The U.S. EPA considers $1x10^{-6}$ to $1x10^{-4}$ to be the target range for acceptable risks at sites where remediation or mitigation is considered (U.S. EPA, 1990a and 1990b). Estimates of lifetime excess cancer risk associated with exposure to chemicals of less than one-in-one-million ($1x10^{-6}$) are considered to be so low as to not warrant any further investigation or analysis (U.S. EPA, 1990a). Typically, U.S. EPA uses the $1x10^{-6}$ risk level as a point of departure for considering risk management measures, but will also consider site-specific conditions that allow for acceptance of risks higher than this level but within the acceptable risk range. Within the State of California, Cal-EPA also tends to work within the same target range for acceptable risks. Pursuant to the California Safe Drinking Water & Toxic Enforcement Act of 1986, the Office of Environmental Health Hazard Assessment has established a no significant risk level at $1x10^{-5}$ (CCR Division 21.5, Title 22, э 12703). In the South Coast Air Quality Management District (SCAQMD), risks from a new emission source within an existing facility must be less

than $1x10^{-6}$ or less than $1x10^{-5}$ if best available control technology for toxics (T-BACT) is used (SCAQMD, 2005a). For cumulative exposure from multiple sources at an existing facility, SCAQMD requires risk reduction measures for risks exceeding 25 in a million ($25x10^{-6}$) (SCAQMD, 2005b).

It is our understanding that under the terms of the settlement agreement, which required this risk assessment, if the potential carcinogenic risk exceeded $1x10^{-6}$, The Department of Building and Safety, the Zoning Administrator, the South Coast Air Quality Management District, and the Division of Oil and Gas would need to be notified. If the potential carcinogenic risk exceeded one in a hundred thousand ($1x10^{-5}$), BreitBurn would request a public hearing.

It should be noted that cancer risks in the $1x10^{-6}$ to $1x10^{-4}$ range or higher do not necessarily mean that adverse health effects will be observed. Current methodology for estimating the carcinogenic potential of chemicals is believed to not underestimate the true risk, but could overestimate the true risk by a considerable degree. In fact, the range of possible risks includes zero.

The estimated LADD and slope factor for each chemical were used to estimate carcinogenic risk. The estimated carcinogenic risk for the MEIR and MEIW were $8x10^{-6}$ and $1x10^{-6}$, respectively. The MEIR is also the point of maximum impact. The chemical-specific carcinogenic risks are presented in Table 12. These values are within the acceptable risk range used by U.S. EPA and below $1x10^{-5}$, the level typically used for air toxics programs in California. The estimated human health risks at key off-site receptors are presented on Table 13. Estimates using standard residential exposure assumptions and worker exposure assumptions are presented. Potential exposure by children at the pre-school would be significantly less since they would be present for a limited number of years (2 to 3 years) compared to the worker (40 years). Figure 5 presents the general area within which predicted risks exceeded $1x10^{-6}$. Appendix E presents estimated carcinogenic risk for off-site receptors with predicted risk greater than $1x10^{-6}$.

Only four of the chemicals measured in facility emissions were considered carcinogens; of these the most significant contribution (79 percent) to carcinogenic risk was benzene ($6.2x10^{-6}$ at the MEIR) and diesel particulates ($1.7x10^{-6}$ at the MEIR). The source of the benzene that resulted in the predicted risk was the emissions from the well cellars, primarily based on one measurement on January 7, 2005 (240 $\mu g/m^3$). The remaining three measurements of benzene at the cellars were less than or equal to 13 $\mu g/m^3$. It should also be noted that the benzene

concentration in air predicted by the air dispersion model at the MEIR (0.22 μg/m^3) is less than lowest concentration measured in ambient samples (0.76 μg/m^3) and below concentrations measured in ambient air in the South Coast Air Quality Management District Air Basin (0.75 μg/m^3, CARB, 2004).

The primary source of the diesel particulates was the estimated emissions from auxiliary engines used to power pumping equipment in the supply house. The estimated contribution of trucks coming in and out of the facility was not significant compared to the use of the diesel engines to power pumping equipment, representing only 7 percent of the total time diesel engines were operated. BreitBurn provided an estimate of the duration of the use of diesel engines for pumping activities during the site visit, but because of the intermittent nature of the activity actual duration could not be verified. The estimated concentration of diesel particulates in the South Coast Air Quality Management District in ambient air was 3.6 μg/m^3 in 1990 (CARB, 1998) and was 3.1 μg/m^3 in 1999 (SCAQMD, 2000). These concentrations are significantly higher than the predicted air concentration of 0.0054 μg/m^3 predicted at the MEIR in the model.

6.3 UNCERTAINTY ANALYSIS

Uncertainty is inherent in many aspects of the risk assessment process, and generally arises from a lack of knowledge of (1) site conditions, (2) toxicity and dose-response of the COPCs, and (3) the extent to which an individual will be exposed to those chemicals. This lack of knowledge means that assumptions must be made based on information presented in the scientific literature or professional judgment. While some assumptions have significant scientific basis, others have much less. The assumptions that introduce the greatest amount of uncertainty and their effect on the noncarcinogenic and carcinogenic risk estimates are discussed below. This discussion is generally qualitative in nature, reflecting the difficulty in quantifying the uncertainty in specific assumptions. In general, assumptions were selected in a manner that purposefully biases the process toward health conservatism.

- For the ambient air evaluation, a limited number of measurements were made. However, since the measurements were significantly lower than acute toxicity criteria, additional ambient measurements would not be likely to change this conclusion.
- A limited number of source measurements were made to characterize emissions during the different facility activity modes (four for drilling and one for maintenance). As conditions during drilling and maintenance activities are not

consistent, these measurements may over or underestimate emissions on an annual basis. However, emissions from these sources did not result in carcinogenic risks or hazard indexes exceeding acceptable levels. Emissions from these sources would have to be at least 10 times higher than those measured to results in a significant increase to estimated risk.

- There was a high variability among the well cellar measurements where samples on one day were at least 10 times higher than the other three samples. A specific reason for the higher measurements was not identified and so they were used as if they represented emissions 25 percent of the time. This assumption may overestimate risk if the higher measurement represents emissions that occur less than 25 percent of the time.

- The estimate of diesel emissions was based on operation estimates by BreitBurn personnel and default emission rates for the types of engines operated. The assumptions used in this assessment were intended to overestimate potential emissions from diesel engines. More specific documentation of operation and types of engines would be useful for assessing the uncertainty in the diesel emission estimates as a key contributor to overall health risk.

- Background concentrations of benzene in the vicinity of the drill site as measured in ambient samples and general background concentrations in the South Coast Air Quality Management District are higher than the predicted concentrations from sources at the drill site. Thus, ambient measurements can not be used to corroborate the model results. This suggests that ambient conditions are dominated by sources other than the drill site.

- Background concentrations of diesel particulates in the South Coast Air Quality Management District as estimated by CARB are significantly higher than predicted concentrations of diesel particulates by the model. Thus, ambient measurements can not be used to corroborate the model results. This suggests that ambient conditions are the result from sources other than the drill site.

- The exposure assessment is based on conservative exposure assumptions. For example, the evaluation assumes that a worker will be exposed for 245 days per year for 40 years and a resident will be exposed for 350 days per year for 70 years at the same concentration. This and other upper-bound estimates of exposure most likely overestimate the potential health risks associated with exposure to the COPCs emitted from the BreitBurn drill site.

- One of the largest sources of uncertainty in any risk assessment is associated with the scientific community's limited understanding of the toxicity of most chemicals in humans following exposure to the low concentrations generally encountered in the environment. The majority of available toxicity data are from animal studies, which are then extrapolated using mathematical models or multiple uncertainty factors to generate toxicity criteria used to predict what might occur in humans. In aggregate it is believed that the uncertainty is conservative; actual risk will be lower.

7.0 CONCLUSIONS

Geomatrix Consultants, Inc. (Geomatrix) has prepared this health risk assessment for air emissions from operations at the BreitBurn Oil Company (BreitBurn) drill site (the drill site) at the corner of West Pico Boulevard and South Doheny Drive in Los Angeles, California (Figure 1). The objective of this project was to collect air quality data that reflect emissions of chemicals during operations at the drill site (excluding concentrations of chemicals associated with background conditions) and to quantify potential exposures to residents and industrial/commercial receptors in the vicinity. Potential human health risk was evaluated separately for the ambient air measurements and source emission measurements.

The risk assessment results are summarized in Table 14:

- The ambient air concentrations were two or more orders of magnitude lower than the acute reference exposure levels, indicating that chemical emissions from the drill site would not result in an acute public health risk for acute exposure under the conditions evaluated.
- The total chronic hazard indexes for the MEIR and MEIW were 0.02 and 0.004, respectively. These values are well below a hazard index of 1, indicating that chemical emissions from the drill site would not result in a public health risk for chronic noncarcinogenic exposure under the conditions evaluated.
- The estimated carcinogenic risk for the MEIR and MEIW were $8x10^{-6}$ and $1x10^{-6}$, respectively. These values are within the acceptable risk range as defined by U.S. EPA and below $25x10^{-5}$, the level used by SCAQMD to regulate existing emission sources. In addition, the activities at the BreitBurn drill site do not appear to contribute significantly to background air concentrations of key chemicals (benzene and diesel particulates).

Under the terms of the settlement agreement, which required this risk assessment, if the potential carcinogenic risk exceeded $1x10^{-6}$, The Department of Building and Safety, the Zoning Administrator, the South Coast Air Quality Management District, and the Division of Oil and Gas would need to be notified. Based on these results, notification is required, but there is sufficient uncertainty in the results that further evaluation may be warranted if any risk management decision is to be made. Specifically, more data regarding the emissions from the well cellars and the use of diesel equipment on site could further refine the most significant contributions to the estimated risk. As described in Section 6.3, one of the measurements from the well cellars was significantly higher than the other three measurements. Additional data could indicate whether this was an unusual condition that should not be represented as occurring 25 percent of the time. Also, the use of diesel equipment on site is not well documented so assumptions were provided by BreitBurn personnel. This uncertainty could be resolved by monitoring of diesel equipment use over time.

Notes:

[1] TICs presented were detected multiple times and are petroleum hydrocarbons.

[2] Average of ambient air data for chemicals detected in facility emissions and in ambient air samples; half the reporting limit was used for non-detect results

Negative sign indicates the chemical was not detected at the reporting limit shown.
Bold values indicate detected concentrations.

Notes:

[1] Calculated in the Air Quality Sampling Report, Geomatrix, 2005.

[2] BreitBurn rig usage estimates for 2005.

[3] Annual Average Emission Rate = Emission Rate x Activity Duration Factor

[4] The sum of drilling and maintenance emission factors.

[5] Annual Average Emission Rate = Average emission rate multiplied by 1.5 to account for the contribution from one cellar and half of the other cellar not influenced by the tower. Average emission rates were estimated as emissions from one cellar.

-- = not applicable; no predicted emissions for that chemical

TABLE 6

DIESEL ENGINE EMISSION RATES

BreitBurn Drill Site

Los Angeles, California

Chemicals	Equipment Source	Annual Average Emission Rate[1] (g/sec)	Total Annual Average Emission Rate[2] (g/sec)
Nitrogen Oxides	Main Diesel Engine	1.93E-04	6.76E-04
	Auxiliary Diesel Engine	4.83E-04	
Reactive Organic Gases	Main Diesel Engine	1.12E-05	3.91E-05
	Auxiliary Diesel Engine	2.79E-05	
Carbon Monoxide	Main Diesel Engine	6.67E-05	2.34E-04
	Auxiliary Diesel Engine	1.67E-04	
Sulfur Oxides	Main Diesel Engine	2.02E-06	7.06E-06
	Auxiliary Diesel Engine	5.04E-06	
Particulate Matter	Main Diesel Engine	6.39E-06	2.23E-05
	Auxiliary Diesel Engine	1.60E-05	

Notes:

[1] Derived in the Air Quality Sampling Report, Geomatrix, 2005, Table 7.

[2] Sum of emissions from main diesel engine and auxiliary diesel engine.

TABLE 7

LOCATION OF KEY OFF-SITE RECEPTORS[1]

BreitBurn Drill Site

Los Angeles, California

Receptor Type	Description	Address	Receptor #	Height[2]	UTM Coordinates[3]
Child care facility	Garden School: Chabad Westside Preschool[3]	9051 W. Pico Blvd	693	GL	371840.9 , 3768970.0
			694	30 ft	371865.9 , 3768970.0
			695	GL	371890.9 , 3768970.0
			732	GL	371840.9 , 3768995.0
			733	30 ft	371865.9 , 3768995.0
			734	GL	371890.9 3768995.0

Notes:

[1] Sensitive receptors with greater than a one-in-a-million risk are presented.

[2] GL = ground level receptor; Elevated receptor has height indicated (e.g. 3 story building = 30 ft).

[3] Universal Transverse Mercator Coordinate System

[4] Represented by six receptor locations on the 25-m grid; locations indicated in Figure 4.

Geomatrix

TABLE 8

PREDICTED OFF-SITE AIR CONCENTRATIONS FROM AIR DISPERSION MODELING[1]

BreitBurn Drill Site

Los Angeles, California

Concentrations reported in micrograms per cubic meter ($\mu g/m^3$)

Notes:

[1] Selected receptors nearest the facility.

[2] Concentrations were not estimated for tower and cellar emissions for these receptors because of proximity to the buildings or wall.

Geomatrix

TABLE 9

EXPOSURE ASSUMPTIONS[1]

BreitBurn Drill Site
Los Angeles, California

Exposure Parameter	Units	Resident	Commercial/Industrial Worker[2]
GENERAL EXPOSURE PARAMETERS			
Exposure Frequency (EF)	days/year	350	245
Exposure Duration (ED)	years	70	40
Averaging Time (AT)	days	25,550	25,550
PATHWAY-SPECIFIC PARAMETERS			
Inhalation			
Daily Breathing Rate (DBR)[3]	L/kg-day	302	149
Inhalation Absorption Factor (A)	Unitless	1	1

Note:

1 Inhalation exposure is calculated as: Cair * DBR * A * EF *ED * 10^{-6}/AT (OEHHA, 2003)
2 The daily breathing rate for this receptor accounts for daily exposure for 8 hours per day.
3 The daily breathing rate for the residential receptor was based on California Air Resources guidance when a single point estimate of health risk is being calculated for risk management purposes (CARB, 2003).

Geomatrix

TABLE 10

SUMMARY OF TOXICITY CRITERIA
FOR CHEMICALS OF POTENTIAL CONCERN

BreitBurn Drill Site
Los Angeles, California

Chemical	Acute REL[1] µg/m^3	Chronic REL[1] µg/m^3	Cancer Slope Factor[2] (mg/kg-day)$^{-1}$
Acetone	62,000	31,000	--
Benzene	1,300	60	0.1
Butane	238,000	--	--
C5 to C8 Hydrocarbons	NA	18,400	
2-Butanone (Methyl Ethyl Ketone)	13,000	5,000	--
Carbon Disulfide	6,200	800	--
Cumene	24,600	400	--
Cyclohexane	34,400	6,000	--
Ethylbenzene	4,340	2,000	--
4-Ethyltoluene	22,000	700	--
Heptane	163,900	18,400	--
Hexane	180,000	200	--
2-Hexanone	20,500	3,000	--
Total Methyl pentanes	180,000	18,400	--
2-Methyl butane	180,000	18,400	--
Methyl cyclohexane	161,000	3,000	--
Methyl cyclopentane	138,000	18,400	--
Pentane	177,000	18,400	--
2-Propanol	49,100	32,000	--
Propylbenzene	4,910	140	--
Tetrachloroethene	20,000	270	0.021
Tetrahydrofuran	59,000	301	--
Toluene	37,000	300	--
Trichloroethene	10,700	600	0.007
1,2,4-Trimethylbenzene	12,300	6	--
1,3,5-Trimethylbenzene	12,300	6	--
Total Xylenes	22,000	700	--

TABLE 10

SUMMARY OF TOXICITY CRITERIA
FOR CHEMICALS OF POTENTIAL CONCERN

BreitBurn Drill Site
Los Angeles, California

Chemical	Acute REL[1] µg/m^3	Chronic REL[1] µg/m^3	Cancer Slope Factor[2] (mg/kg-day)$^{-1}$
Associated With Diesel Emissions:			
Nitrogen Oxides	470	470	--
Reactive Organic Gases	13,000	1,000	--
Carbon Monoxide	23,000	10,000	--
Sulfur Oxides	660	660	--
Particulate Matter	50,000	5	1.1

Notes:

[1] Reference Exposure Limits (REL); various sources; for derivation of values, see Appendix C.

Notes:

[1] Includes emissions of heptane, total methylpentanes, pentane, methylbutane, methylcyclopentane.

[2] Maximum Exposed Individual Resident (Receptor 773)

[3] Residential receptor assumed to be exposed 100% of the time. Exposure factor for occupational exposure duration represents 8 out of 24 hours and 245 out of 365 days per year (22%).

[4] Hazard Index = concentration x exposure factor / RfC

[5] Maximum Exposed Individual Worker (Receptor 772)

TABLE 12

ESTIMATED CARCINOGENIC RISK

BreitBurn Drill Site

Los Angeles, California

Description	Benzene	Tetrachloroethene	Trichloroethene	Particulate Matter	TOTAL CANCER RISK
Cancer Inhalation Unit Risk ($\mu g/m^3)^{-1}$	0.1	0.007	0.007	1.1	
MEIR[1]					
Predicted Air Concentration ($\mu g/m^3$)	2.1E-01	2.4E-02	1.6E-02	5.4E-03	
Exposure Factor[2]	2.9E-04	2.9E-04	2.9E-04	2.9E-04	
Cancer Risk	6.2E-06	4.9E-08	3.3E-08	1.7E-06	8E-06
MEIW[3]					
Predicted Air Concentration ($\mu g/m^3$)	1.5E-01	1.7E-02	1.2E-02	9.0E-03	
Exposure Factor[4]	5.7E-05	5.7E-05	5.7E-05	5.7E-05	
Cancer Risk	8.6E-07	6.7E-09	4.6E-09	5.7E-07	1E-06

Notes:

[1] Maximum Exposed Individual Resident (Receptor 773)

[2] The Exposure Factor was calculated as:

302 L/kg-day*0.001 m3/L *0.001 mg/mg * 350/365days*70years/70 years (2.9x10-4)

[3] Maximum Exposed Individual Worker (Receptor 772)

[4] The Exposure Factor was calculated as:

149 L/kg-day *0.001 m3/L * 0.001 mg/mg * 245/365 days *40/70 years (5.7x10-5)

Geomatrix

TABLE 13

POTENTIAL CARCINOGENIC RISK AT KEY OFF-SITE RECEPTORS

BreitBurn Drill Site

Los Angeles, California

Description	Address	Receptor ID #	Cancer Risk - Residential Scenario[1]	Cancer Risk - Worker Scenario[2]
Garden School: Chabad Westside Preschool	9051 W. Pico Blvd	693	2.0E-06	4.0E-07
		694	1.7E-06	3.3E-07
		695	1.4E-06	2.7E-07
		732	3.6E-06	7.0E-07
		733	2.5E-06	4.9E-07
		734	1.9E-06	3.7E-07

Note:

[1] Calculations presented in Appendix E as a residential-scenario.

[2] Risk adjusted for an adult worker scenario; calculated as:

Cancer Risk * 149/302 * 245/350 days *40/70 years (0.2)

Geomatrix

Notes:
[1] Measured source concentration minus average ambient concentration. If the measured concentration was less than the detection limit, one-half the detection limit was used for the calculation. If ambient was greater than measured, then "0" was recorded.
[2] Average of ambient air data for chemicals detected in facility emissions and in ambient air samples; calculated in Table 3.
[3] A duplicate of BB-1 was removed and not used in calculation of emission rates.
[4] ND = not detected in ambient air.

 - - -
```

```
            4. Calms Processing Routine.
            5. Not Use Missing Data Processing Routine.
            6. Default Wind Profile Exponents.
            7. Default Vertical Potential Temperature Gradients.
            HE>ZI  - Adjusts Vertical Term for cases when HE > ZI,
                     which may occur for receptors below source base elevation.

 **Model Accepts Receptors on ELEV Terrain.

 **Model Assumes No FLAGPOLE Receptor Heights.

 **Model Calculates ANNUAL Averages Only

 **This Run Includes:     2 Source(s);      3 Source Group(s); and    1790 Receptor(s)

 **The Model Assumes A Pollutant Type of:  OTHER

 **Model Set To Continue RUNning After the Setup Testing.

 **Output Options Selected:
         Model Outputs Tables of ANNUAL Averages by Receptor
         Model Outputs External File(s) of High Values for Plotting (PLOTFILE Keyword)

 **NOTE:  The Following Flags May Appear Following CONC Values:  c for Calm Hours
                                                                 m for Missing Hours
                                                                 b for Both Calm and Missing Hours

 **Misc. Inputs:  Anem. Hgt. (m) =    10.00 ;    Decay Coef. =       0.0000 ;    Rot. Angle =     0.0
                  Emission Units = GRAMS/SEC                              ;  Emission Rate Unit Factor =
0.10000E+07
                  Output Units   = MICROGRAMS/M**3

 **Approximate Storage Requirements of Model =     1.3 MB of RAM.

 **Input Runstream File:          B:\AIR MODELING\HHRA\9195_DIESEL_TOWER.DAT
 **Output Print File:             B:\AIR MODELING\HHRA\9195_DIESEL_TOWER.LST

 **Model Set To Continue RUNning After the Setup Testing.

 **Output Options Selected:
         Model Outputs Tables of ANNUAL Averages by Receptor
         Model Outputs External File(s) of High Values for Plotting (PLOTFILE Keyword)

 **NOTE:  The Following Flags May Appear Following CONC Values:  c for Calm Hours
                                                                 m for Missing Hours
                                                                 b for Both Calm and Missing Hours

 **Misc. Inputs:  Anem. Hgt. (m) =    10.00 ;    Decay Coef. =       0.0000 ;    Rot. Angle =     0.0
                  Emission Units = GRAMS/SEC                                ;  Emission Rate Unit Factor =
0.10000E+07
                  Output Units   = MICROGRAMS/M**3

 **Approximate Storage Requirements of Model =     1.3 MB of RAM.

 **Model Set To Continue RUNning After the Setup Testing.

 **Output Options Selected:
         Model Outputs Tables of ANNUAL Averages by Receptor
         Model Outputs External File(s) of High Values for Plotting (PLOTFILE Keyword)

 **NOTE:  The Following Flags May Appear Following CONC Values:  c for Calm Hours
                                                                 m for Missing Hours
                                                                 b for Both Calm and Missing Hours

 **Misc. Inputs:  Anem. Hgt. (m) =    10.00 ;    Decay Coef. =       0.0000 ;    Rot. Angle =     0.0
                  Emission Units = GRAMS/SEC                                ;  Emission Rate Unit Factor =
0.10000E+07

Notes:

[1] Includes emissions of heptane, total methylpentanes, pentane, methylbutane, methylcyclopentane.

[2] Sum; Hazard Index = concentration x exposure factor (1) / RfC

ZA Memo 133

OFFICE OF ZONING ADMINISTRATION

MEMORANDUM

ZA MEMORANDUM NO. 133

September 19, 2016

TO: Office of Zoning Administration
Development Services Centers
Department of Building and Safety
Department of Public Works – Bureau of Engineering
Los Angeles Fire Department
Los Angeles Department of Water and Power

FROM: Linn K. Wyatt
Chief Zoning Administrator

SUBJECT: **APPLICATION AND PROCESSING REQUIREMENTS, INCLUDING CEQA REVIEW, FOR OIL AND GAS APPROVALS PURSUANT TO LOS ANGELES MUNICIPAL CODE SECTION 13.01-H.**

This Memorandum supersedes ZA Memorandum No. 94, dated December 12, 1994, and ZA Memorandum No. 94A, dated March 24, 2000.

This Memorandum is intended to establish a comprehensive set of procedures and policies for the acceptance and processing of applications for oil drilling approvals pursuant to Los Angeles Municipal Code (LAMC) Section 13.01-H and to establish City guidelines for the California Environmental Quality Act (CEQA) review of Section 13.01-H oil drilling applications.

I. Background

The LAMC requires a formal application and a filing fee in conjunction with a request for a determination of conditions for the conduct of oil drilling pursuant to LAMC Section 13.01-H. Other than the requirement for an application and payment of a filing fee, the LAMC contains no express procedural requirements for the determination of conditions under Section 13.01-H for an original approval or for a modification or clarification to a previously approved determination of conditions.

Z.A. Memoranda Nos. 94 and 94A

Historically, as described in ZA Memoranda Nos. 94 and 94A, applicants were permitted to apply for modifications to the original conditions for oil drilling approvals through the use of a more limited review process (similar to a plan approval under LAMC Section 12.24-L and M).

The use of the process outlined in Memoranda Nos. 94 and 94A is no longer permitted for any Section 13.01-H application, including those submitted as a determination of conditions, modification of condition, request for clarification, or related approval. All applicants seeking an approval under Section 13.01-H must follow the application procedures outlined in this Memorandum. All applications seeking any approval under Section 13.01-H will be processed by the City, including the Office of the Zoning Administrator, pursuant to this Memorandum.

Existing Approvals with Modification Procedures

In addition to the above historical process, there are existing active approvals which include conditions establishing a process for subsequent modifications or condition review. An example of one condition reads substantially as follows:

> *Drilling operations for the first X wells identified in the grant clause of the instant determination shall be completed within 36 months from the effective date of this determination. The drilling for the following X wells as hereby authorized shall be subject to a review of plans by the Zoning Administrator, without a public hearing, for the purpose of updating the record with the well identification and path.*

Another condition reads substantially as follows:

> *Review of Conditions. Two years following completion of construction… the applicant shall submit a Plan Approval application for reviewing the effectiveness of these conditions. … The applicant shall submit a 500-foot radius map with accompanying labels for owners and occupants. The Zoning Administrator may set the matter for public hearing if warranted.*

Both of these conditions include processes that are inconsistent with the processes established in this Memorandum. The first condition is inconsistent because it allows for modifications without a public hearing. The second condition is inconsistent because it allows the Zoning Administrator to not set a public hearing for a Plan Approval and implies the notice radius is 500 feet.

To the extent that any existing condition or grant in an existing approval gives the Zoning Administrator discretion in the process to be followed for a modification or condition review, the procedures in this Memorandum shall be followed, in accordance with the findings in Section II and the purpose statements in Section III.

To the extent that any existing condition or grant in an existing approval mandates a procedure that is inconsistent with this Memorandum, the Zoning Administrator shall consider whether a Plan Approval process shall be initiated by the City to revise any conditions to protect the public health, safety and welfare, including any condition establishing a process inconsistent with the purpose of this Memorandum. On the other hand, if an existing condition or provision is not modified through a Plan Approval, then the process outlined in the existing approval shall be followed.

Nothing in this Memorandum is intended to expand the authority the City has to initiate a Plan Approval.

II. Findings

In issuing this Memorandum, the Zoning Administrator makes the following findings:

A. In adopting the California Environmental Quality Act[1], the Legislature declared:

> It is the intent of the Legislature that all agencies of the state government which regulate activities of private individuals, corporations, and public agencies which are found to affect the quality of the environment, shall regulate such activities so that major consideration is given to preventing environmental damage, while providing a decent home and satisfying living environment for every Californian. (Public Resources Code Section 21000(g).

B. The CEQA Guidelines provide that CEQA's basic goal of protecting the environment has two purposes:

(1) avoiding, reducing, or preventing environmental damage where possible by requiring alternatives or mitigation measures; and

(2) providing information to decision-makers and the public concerning the environmental effects of proposed and approved actions. (CEQA guidelines 15002(a).)

C. One oft-repeated purpose of the CEQA Guidelines is to provide for public participation, including as set forth in Section 15201:

> Public participation is an essential part of the CEQA process. Each public agency should include provisions in its CEQA procedure for wide public involvement, formal and informal, consistent with its existing activities and procedures, in order to receive and evaluate public reactions to environmental issue related to the agency's activities. Such procedure should include, wherever possible,

[1] Public Resources Code, Sections 21000, *et seq*.

making environmental information available in electronic format on the Internet, on the web site maintained and utilized by the public agency.

D. Although CEQA does not require formal hearings at any state of the environmental review process, section 15202 provides that:

...

(b) If an agency provides a public hearing on its decision to carry out or approve a project, the agency should include environmental review as one of the subjects for the hearing.

(c) A public hearing on the environmental impact of a project should usually be held when the lead agency determines it would facilitate the purposes and goals of CEQA to do so. The hearing may be held in conjunction with and as part of normal planning activities.

...

(f) A public agency may include, in its implementing procedures, procedures for the conducting of public hearings pursuant to this section. The procedures may adopt existing notice and hearing requirements of the public agency for regularly conducted legislative, planning, and other activities.

E. Applications for oil and gas projects under LAMC Section 13.01-H have the potential to create unique risks and hazards to have the potential for significant and immediate impacts on the health, safety, and welfare of the residents in and around the project site through increased noise, odor, dust, traffic, and other disturbances, as well as the potential to significantly impact the City's air, water, soil, biological quality, geology, water, stormwater and wastewater infrastructure, transportation, emergency response plans and other aesthetic values and community resources.

F. People living and working within the land use and environmental impact range of oil and gas operations and activities have a substantial interest in participating in a public hearing on 13.01-H approvals.

G. Section 13.01-H provides authority for the Zoning Administrator to condition, approve or deny a Section 13.01-H application under the City's police powers to protect public health, safety and welfare and to issue and implement reasonable procedures to process Section 13.01-H applications consistent with the requirements for due process.

III. Purpose and Intent of Memorandum

This Memorandum is issued with the following intent:

- Ensure that the City complies with all legal requirements of CEQA in approving Section 13.01-H projects;
- Provide all parties that may be impacted by a project subject to a Section 13.01-H application an opportunity to participate in a public hearing;
- Meet the intent of CEQA in the review and approval of CEQA findings and determinations, to provide adequate public participation;
- Ensure that staff has time to adequately consider and respond to, if necessary, evidence submitted on a Section 13.01-H application and its related environmental findings (including the CEQA Guideline Section 15300.2 exceptions) prior to the issuance of any decision;
- Provide decision-makers and City Staff, and the public with the information and data needed for adequate decision-making under CEQA and Section 13.01-H;
- Ensure that Section 13.01-H applications are processed efficiently;
- Ensure that applicants, staff, and the public can rely on a consistent practice in reviewing Section 13.01-H applications;
- Provide for transparent disclosure and participation process; and
- Ensure that the city's processing and approvals pursuant to 13.01-H will not result in adverse effects to public health, safety, and welfare

IV. Application Requirements

The original case number shall be used for the plan approval request. Before an application may be deemed complete, the applicant must submit:

1) A completed "Land Use Application For Oil & Gas Project Conditional Approval" (CP Form CP-7834) with all required attachments, as specified in the application and the Instructions (CP Form CP-7833.)
2) A completed Environmental Assessment Form for Oil and Gas Projects (EAF-O, CP-7832), with all required attachments.
3) The filing fee pursuant to LAMC Section 19.01.

V. Processing Section 13.01-H Applications

A. CEQA Review

The following review procedures are intended to provide guidelines to implement CEQA on all Section 13.01-H applications. Nothing in this Memorandum or the guidelines provided herein are intended to conflict with CEQA. To the extent that these guidelines are silent or ambiguous, the Zoning Administrator shall fall back on the requirements and intent of CEQA. To the extent that these guidelines impermissibly conflict with CEQA, the provisions of CEQA control. Nothing in these Guidelines is intended to conflict with the Permit Streamlining Act, Gov't Code Section Government Code § 65920 et seq.

1. Preliminary Review for Exemptions

No categorical exemption forms will be processed for consideration or issued at the Planning Department Development Services. The applicant shall submit a complete EAF-O form with their application, which shall be reviewed by the Zoning Administrator. The Zoning Administrator will conduct a preliminary review to determine whether the application qualifies for an exemption from environmental review pursuant to CEQA. The Zoning Administrator may require the applicant to provide additional supporting materials from the applicant to support the use of a categorical exemption.

An application to drill, re-drill, deepen, or convert a well is not eligible for a categorical exemption and shall require an Initial Study or an EIR as described in section V.A.2. All other projects may be reviewed to determine if the project is exempt under any applicable categorical exemption in CEQA Guidelines Section 15300-15333 or any City Guidelines (adopted pursuant to CEQA). If a project is determined not to fall into any categorical exemption based on the project description, an Initial Study shall be prepared pursuant to section V.A.2. If the project falls within a categorical exemption, the Zoning Administrator shall determine if, based upon the whole of the record, any exception to any exemption under CEQA Guidelines, Section 15300.2, applies to the project, including, but not limited to the following:

> Cumulative Impact. All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant.
>
> Significant Effect. A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.

If the project is determined to be categorically exempt (CE) and no exceptions apply, the Zoning Administrator shall do all of the following:

- Give the public hearing notice required in section V.B., including a notice of an intent to adopt a categorical exemption to all property owners and occupants within a 1,500-foot radius of the project site's outer boundary, and provide for a 35-day comment period on the project, prior to approval. The public hearing may be held during the comment period. The hearing notice (with the notice of intent to adopt a CE) must be provided in English and Spanish.

- If after the 35-day comment period, or any time prior to making a decision on the project, the Zoning Administrator determines that substantial evidence does not support the use of the exemption, including from the existence of an exception in Section 15300.2, the Zoning Administrator shall require an Initial Study to be prepared consistent with the procedures outlined herein.

- Alternatively, if the Zoning Administrator finds after the 35-day comment period, or any time prior to making a decision on the project, that additional information and analysis is required to determine if the categorical exemption is supported with substantial evidence, and the applicant desires the City to use a categorical exemption rather than a prepare an Initial Study, the Zoning Administrator may require the applicant to submit additional information or documents and/or technical studies or reports, including requiring the applicant to hire independent consultants to prepare any necessary technical studies or reports or peer review any prepared studies or reports. If after reviewing any additional documents, reports or studies, required by the Zoning Administrator, it is determined that a categorical exemption is not supported by substantial evidence, an Initial Study shall be prepared.

- If the use of the categorical exemption is supported by substantial evidence in the record at the time of the decision, the Zoning Administrator shall ensure the record contains a memorandum or narrative substantiating the use of the categorical exemption, including explaining how substantial evidence in the administrative record supports the use of the exemption, and that the Zoning Administrator considered whether any exception to an exemption under CEQA Guidelines Section 15300.2 is applicable, including providing where necessary an explanation or evidence to demonstrate that any comments submitted on the intent to adopt the Categorical Exemption do not provide substantial evidence that an exception applies or the exemption does not apply.

2. Initial Study Determination

For any project that does not qualify for a categorical exemption, including any project to drill, redrill, or convert a well, an Initial Study must be completed.

Nothing in this subsection is intended to require the preparation of an Initial Study, when a preliminary review of the project demonstrates an EIR is clearly required, pursuant to CEQA Guidelines Section 15060(d).

The Initial Study must be prepared by an environmental consultant with the qualifications and experience required in this Memorandum. The Zoning Administrator may require the applicant to provide any additional documents, information or technical studies or reports necessary to complete the environmental review of the project, including requiring the applicant to hire an independent contractor to prepare or peer review technical studies or reports. The Initial Study shall comply with Section 15063 of the CEQA Guidelines and be prepared using Appendix G to the CEQA Guidelines and any City issued procedures or guidelines.

If the Initial Study shows both of the following Health Impact Assessment Criteria apply, the Zoning Administrator shall also require a Health Impact Assessment (HIA), as defined in Subsection V.A.5., before preparing the environmental clearance for the project:

- one or more of the air or hazards impact thresholds on Appendix G identified as III(a), III(b), III(d), VIII(a),VIII(b), VIII(c),or VIII(g) are found to be "less than significant impact with mitigation"; and
- the project is within 1,500 feet of any sensitive receptors, as defined by SCAQMD.

After the Initial Study is completed (and the HIA, if necessary), the Zoning Administrator will determine whether the proposed environmental clearance for the proposed project is a Negative Declaration (ND) or a Mitigated Negative Declaration (MND) or whether an EIR is required pursuant to sections 15065 or 15064 of the CEQA Guidelines.

If the Initial Study demonstrates that all of the impact areas will have no impact or less than significant impact, the Zoning Administrator may prepare a ND. (Note: if the Health Impact Assessment Criteria apply, a ND could not be prepared because the Initial Study identified significant impact requiring mitigation.)

If the Initial Study (and the HIA, if required) demonstrates that the project will not result in a significant impact with mitigation imposed, the Zoning Administrator may prepare a MND.

If the Initial Study (and the HIA, if required) demonstrates that the project may result in a significant impact to the environment that cannot be mitigated to less than significant, the Zoning Administrator shall require the preparation of an EIR. In determining whether an EIR is required, the Zoning Administrator shall review and consider all of the following CEQA Guidelines, without limitation to any other applicable requirements of CEQA:

- 15064 (guidelines on determining significant impacts),
- 15064.4 (guidelines on determining greenhouse gas impacts),
- 15064.5 (guidelines on determining cultural and archaeological impacts), and
- 15065 (guidelines requiring consideration of Mandatory Findings of Significance, including subsection (a)(4): "The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.")

If an ND or MND is issued, the Zoning Administrator shall publish a Notice of Intent to Adopt an ND or MND pursuant to CEQA Guidelines Section 15073, prepare the ND or MND findings (and the Mitigation Monitoring Program for a MND) and process the application pursuant to Section IV. The Public Hearing notice sent in section V.B. will include a statement that the City has published a Notice of Intent to Adopt an ND or MND and include a link to the City's website where the Notice of Intent is published. The Notice of Intent to Adopt an ND or MND shall be published on the City's website in English and Spanish.

If the Initial Study demonstrates the project requires an Environmental Impact Report (EIR), the Zoning Administrator shall follow the procedures in section V.A.3.

3. Environmental Impact Report

If an EIR is to be prepared on a project, in addition to any other requirements of CEQA, the City will require all of the following:

- Provide the Notice of Preparation to all property owners and occupants within a 1,500-foot radius of the project site's outer boundary; and
- Prepare a Health Impact Assessment, as defined in section V.A.5., if not already prepared, and provide a relevant summary of the Health Impact Assessment in the EIR where appropriate to inform the required analysis. The Health Impact Assessment shall be considered in any certification of the EIR and the approval, conditional approval, or denial of the Section 13.01-H application.

An environmental consultant with qualifications and experience provided in section V.A.4 must prepare the EIR. The EIR must be prepared and certified in compliance with CEQA, including but not limited, CEQA Guideline Sections 15080-15097, 15120-15155.

4. Environmental Consultant Qualifications

The City shall ensure that any environmental consultant that is preparing an Initial Study, MND, ND, or an EIR on a 13.01-H project has the following qualifications and experience:

- The Project Manager has at least seven (7) years' experience preparing CEQA documents.
- The Project Manager has prepared and/or reviewed at least five (5) EIRs for projects involving oil and gas drilling or production.
- The consultant or consultant team, including any subcontractors, have demonstrated training, knowledge, and experience in the following topic areas as they specifically relate to oil and gas projects: environmental health, public health, hazardous materials, air quality, GHG emissions, water quality, geology, noise, traffic, aesthetics, and risk and safety issues.
- In the case of EIRs or MNDs requiring Health Impact Assessments, the consultant team, including any subcontractors, has at least five (5) years' experience in preparing Health Impact Assessments. The consultant who prepares the HIA shall be familiar with accepted HIA process and content including, but not limited to, the "Minimum Elements and Practice Standards for Health Impact Assessment," Version 3.

The City shall ensure that all environmental consultants have copies of this Memorandum prior to preparation of any Initial Study, ND, MND or EIR.

5. Health Impact Assessment (HIA)

A HIA is defined as follows:

> A study of the project for the surrounding vicinity identifying pollution and population indicators, such as, but not limited to, those analyzed in the

California Communities Environmental Health Screening Tool; the number of people affected by the project; short term or permanent impacts caused by the project; likelihood that impacts will occur; and recommended mitigation measures.

Any HIA required under these procedures shall be used to inform whether an EIR is required and whether to approve, condition, or deny the application under Section 13.01-H.

B. Public Participation

The Zoning Administrator will hold a public hearing on all Section 13.01 applications prior to project approval.

Notice of this public hearing must be sent to all property owners and occupants within a 1,500-foot radius of the project site's outer boundary, in English and Spanish. For projects being approved with a CE, ND or MND, the Notice of Intent to Adopt a CE, ND or MND may be combined with the public hearing notice.

C. Final Determination

Notices of final decisions will be issued to the applicant, all residents abutting the project site, and all individuals who request such notice.

All Zoning Administrator Section 13.01-H Determinations may be appealed to the Area Planning Commission. The Area Planning Commission decision is final. All CEQA determinations by the Zoning Administrator or the Area Planning Commission are subject to appeal to the City Council pursuant to Public Resources Code Section 21151(c).

Nothing in this Memorandum is intended to limit the Zoning Administrator's express and inherent authority to administer LAMC Section 13.01-H.

Legal Description : Lots 883-888, Tract 6380

Pursuant to the provisions of Section 12.24-M of the Los Angeles Municipal Code, and as required by Condition No. 78 under Case Nos. BZA 2000-1697 and ZA 17683(PAD), I hereby DETERMINE:

that the Conditions of approval have been and are being complied with, that the operation of the facility poses no ongoing health risk, that necessary inspections of the facility by government agencies will continue, and that further hearings or formal review by the Zoning Administrator are not indicated.

BreitBurn Site Characteristics/Operational Overview

The drill site is an oil drilling and producing facility that was originally constructed by Occidental Petroleum Corporation in 1965. Fifty-nine of 69 wells authorized by the City of Los Angeles and reaching into the oil-production zone have been completed or abandoned. The remaining 10 wells have been drilled to a depth sufficient to allow cementing in place of the first casing, conductor pipe. The site currently extracts approximately 700 barrels of oil and 1,200,000 cubic feet of natural gas per day on a 24-hour, seven-day per week operating schedule.

The drill site consists of a support building, a movable catwalk building surrounding and attached to the derrick (drilling tower), a drilling mud processing building, two well cellars that contain the 69 wellheads, and incidental equipment and ancillary structures. The drilling tower is mobile and can be slowly moved along railroad-like rails in order to access all wellheads. It can move east-west along each well cellar; the north cellar is 144 feet long and the south cellar is approximately 100 feet long. The drilling tower can also move north-south approximately 30 feet to move between the two well cellars. The drill site houses a

permanent, mobile, electrically-powered derrick approximately 23 feet on each side, 128 feet tall and enclosed within an architectural structure. The ground surface of the drill site is covered in concrete or asphalt at or near grade. Most permanent equipment is below grade in well cellars or located inside enclosed structures. Where buildings do not create a boundary, the drill site is surrounded by 25-foot walls intended to provide noise control and visual screening.

The derrick is used for the two general types of operations routinely conducted at the drill site: well maintenance (which usually includes pipe-pulling) and drilling/redrilling operations. BreitBurn normally engages in each of these activities for several months per year (i.e., 2 to 6 months each); the derrick is not used during the remaining time. Well maintenance consists of lifting pipe from the well in sections, stacking the sections vertically within the derrick, repairing the well or its equipment, and then lowering these sections back into the well. Pipepulling activities typically occur over several hours to a few days and usually continue on a 24-hour-per-day basis. Drilling/redrilling operations consist of drilling a new hole and/or using the upper portions of an existing well for slant drilling a new portion of the well in the production zone. Drilling/redrilling operations typically occur 24 hours per day and may last for several days to more than one month at a time.

When the drill rig is in use and at nearly all other times, there is, by design, an updraft of air in the tower. There are three fans on top of the derrick creating this updraft: one pulls air from the rig floor, one pulls air from the mud house, and one is a swing fan that can pull air from either source but not both at the same time. In addition, fans in the supply building and purge air fans (bringing in outside air) contribute to the updraft in the derrick tower. This updraft sweeps chemical vapors being released by drilling/redrilling or pipe-pulling activities into the tower air and out the top of the structure. When drilling a well, mud – a water-based slurry of clay type materials – is pumped into the well for several reasons, including lubrication, debris removal, and occasionally to power the drill rotation. During drilling, mud constantly flows out of the well carrying the drilling debris (shavings). The mud is transported in pipes to the mud house where the shavings are separated from the mud, which is then reused. During the separation process using shakers and screens, crude oil in the mud can release petroleum-based vapors. Fans mounted in the mud house move sweep air through the mud house to capture these vapors and move them into a large duct that runs several hundred feet to nearly the top of the inside of the drilling tower where it vents to the atmosphere. There is an additional induced draft (ID) fan near the top of the tower to help draw the vent air through the duct work. The ID fans in the derrick are always on (even during idle periods). No mud is pumped during well maintenance operations or during idle periods.

The well heads are located in two cellars, each configured as a long, narrow, recessed corridor. In these cellars, there may be small amounts of standing crude oil or oily water and oil present on well heads and pipes more or less at all times. Other activities at the drill site include truck deliveries to the support building and cleaning operations. In addition, diesel engines are used in the supply building intermittently to power a pumping system. For the purpose of estimating off-site air concentrations, BreitBurn personnel provided a projection of drilling and maintenance activities for the next 30 years.

Public Hearing

The Zoning Administrator conducted a public hearing at the West Los Angeles Municipal Building, Second Floor Hearing Room, 1645 Corinth Avenue, on June 16, 2005, commencing at approximately 9:30 a.m. The Zoning Administrator highlighted the purpose of the hearing and explained the procedures to be followed during the course of the hearing.

Rae Drazin, a vice president of Neighbors for a Safe Environment ["NASE"] stated that she walked by the facility and did not see any hearing notice on the property; the hearing should not be conducted.

In response, Mike Tolbert, a representative for BreitBurn Energy Company ["BreitBurn"], the applicant, testified that notices of this hearing were posted approximately 8 days prior to the hearing; he handed the notices to site personnel that day. He is unaware of any notices having been removed.

John Kuespert, a geologist for BreitBurn, testified that he posted a copy of the notice on doors to both streets using strong tape. He observed the notices several days ago.

Gregory Brown, an attorney for BreitBurn, stated that a hearing for a conditional use requires the posting of a hearing notice but that this hearing is a plan approval, not a conditional use, and is for the express purpose of reviewing compliance with the Conditions previously established.

Richard Weiner, an attorney and representative of NASE, advised that a risk assessment report is required to be prepared in accordance with the settlement agreement between the neighbors and the applicant. Completion of the risk assessment report has been delayed due to actions of the applicant. The Zoning Administrator should continue the matter for 90 days in order to consider the conclusions of the report when it is available as well as comments from the public on those conclusions. Mr. Weiner identified Paragraphs 1 and 2 of the settlement agreement as the source for the obligation to provide the report. In response to the Zoning Administrator's inquiry as to when the report is required to be completed, Mr. Weiner advised that there is no stated timetable. Paragraph 4.b of the agreement does require that the Zoning Administrator consider the risk assessment in rendering a written determination.

Mr. Brown stated that emissions were evaluated in the environmental impact report [EIR] for the present facility. BreitBurn has funded the risk assessment study which he believes will confirm the conclusions in the EIR. BreitBurn does not manage the study; this is handed off to NASE. The last sampling was done in January 2005. The settlement agreement required the risk assessment report to be submitted prior to the instant review. Condition No. 78 requires that the review take place two years after the facility begins drilling operations but does not require a public hearing. The Condition gives the Zoning Administrator discretion to conduct a public review and hearing if the assessment report identifies problems. Mr. Brown referred to the continuation of Paragraph 4.b that Mr. Weiner did not mention: if the risk assessment report shows a cancer risk, then a hearing is warranted. Mr. Brown doubts any significant risk will be shown in the report.

Ms. Drazin testified that the risk assessment results required timely sampling during various BreitBurn events and progress payments were not always paid immediately.

Hal Washburn, of BreitBurn and Chris Williamson, vice president of operations of BreitBurn, narrated a 15-minute slide show. The slides showed, among other features, physical changes from the previous plant to the current facility, and discussed the expenditure of $20 million in plant upgrades. The applicant removed a major source of diesel pollution - the drill rig now operates entirely on electricity. The aesthetics of the facility are substantially improved. Noise is shielded through taller perimeter walls, the derrick is soundproofed, early alert gas detectors and advanced fire alarm and fire suppression systems have been installed, video recording equipment has been installed to detect exterior noise - sensitive enough to detect rain hitting the building, all employees are trained in a neighborhood awareness program, no visible work occurs on religious holidays, and the applicant has responded quickly to the few violations that government agencies have issued. [A copy of the slide images are provided in the case file.]

Dolores Dolgoff, a resident of Canfield Avenue, two blocks to the south of the BreitBurn facility, stated that in her daily walks to work, she routinely passes the applicant's property at various hours in the mornings and afternoons. At no time has she ever heard any noise, smelled any odor, or observed any heavy vehicles blocking traffic that was related to the applicant's property. The site is one of the most attractive on Pico Boulevard between Robertson Boulevard and Beverly Drive. She wishes other businesses were as conscientious about their activities as BreitBurn is about its operation. Residents living next to commercial businesses are at their own risk and should expect more noise and activity than if they are far removed. In response to the Zoning Administrator's inquiry, Ms. Dolgoff acknowledged that she receives oil royalty payments from BreitBurn.

Ben Newlander, a Swall Drive resident, prefaced his remarks by declaring that he receives oil royalties. He described himself as a triathelete. He has cycled from his house past the BreitBurn site "hundreds of times" and has never detected any odor. He also frequently walks by in the evenings. He also stated that he has heard no unusual noise emanating from the property.

Max Whitehouse, another neighbor, prefaced his remarks by declaring that he receives no royalties. He has lived nearby for the past 22 years. BreitBurn has made neighborhood relations a top priority. The typical gardeners probably pollute the air more with their mowers and blowers than BreitBurn and they make more noise. He is aware of no noise coming from the site. In his opinion, BreitBurn is a better neighbor than a nearby market which impacts the area with its outdoor garbage and rats.

Sherry Tedeschi, another neighbor, stated that she has observed no impacts from BreitBurn's operation. She also praised the applicant for maintaining good relations with the neighborhood. The complaints voiced today have been repeated for years.

Jonathon Friedman, a neighbor and board member of the South of Robertson Organization [SORO] - the neighborhood council for this area, stated that the applicant enjoys the overall support of the neighborhood. From his house he can see the drill tower. He receives no oil royalties. The tower is attractive, and it does not block out the sun. In his experience, the applicant has been an exemplary neighbor. The applicant has shown religious

sensitivity. Oil royalties to area property owners is a source of economic prosperity in the neighborhood. He too wishes all businesses would operate as sensitively as BreitBurn.

Sylvia Gross, a 32-year resident of the area, noted that she walks a lot. She has never smelled any odors from the site. Only one time did she see a big truck related to BreitBurn's operation and she saw men directing it onto the property. The noise from the nearby gas station, on the other hand, is terrible.

Mike Graver, owner of the Goodyear store at Cardiff Avenue, testified that BreitBurn informs him ahead of time if any anticipated operations will impact his business. The redevelopment of the oil drilling operations has been a major improvement.

Harold Fisher, another nearby resident and SORO board member, complained of frequently enduring odors from the site. He has also detected noise coming from the site. He has observed trucks using Oakhurst Drive. He speculated that employees "probably park on Oakhurst." He believes there are more employees parking there than before the remodeling of the facility because it is now a 24-hour operation.

Evelyn Wiles, a neighbor and NASE board member, complained that the hotline phone number frequently did not work. She has walked around the site various times and has smelled odors.

Ms. Drazin stated that NASE is not opposed to the project but it wants to make sure there are no impacts from its operation on residents. NASE is putting together a report of actual data. She does not believe the accuracy of the underlying EIR data which included no on-site testing. She has smelled crude oil many times when she goes by the site.

Mr. Weiner remarked that on the last two days during the Jewish holiday of Shavuot he was walking past site around 8:15 a.m. and heard "a tremendous noise" lasting five minutes or longer. "It sounded like 100 or more pipes falling." He has also observed trucks backing up across Doheny Drive which creates traffic congestion.

On rebuttal, Mr. Brown pointed out that BreitBurn has two parking lots immediately adjacent to the drill site and one behind the adjacent processing facility to the west. Neighbors park there on occasion. Given the proximity of the company's parking lots, there is no reason for employees to park on any street. The Southern California Air Quality Maintenance District has been there "dozens of times", sometimes without notice at random times, and the Zoning Administrator has been presented a log of their inspections. Only on one occasion did that agency note any faint odors; at all other times there was either no odor detected or the detected odor was from other locations and sources.

The Zoning Administrator concluded the oral testimony and announced that the matter would be taken under advisement pending the completion of the risk assessment report, its release, and comments in response.

Geomatrix Consultants, Inc., on behalf of Neighbors for a Safe Environment (NASE) prepared and issued a health risk assessment dated February 1, 2006, for air emissions from operations at the drill site. The objective of this project was to collect air quality data that reflect emissions of chemicals during operations at the drill site (excluding

concentrations of chemicals associated with background conditions) and to quantify potential exposures to residents and industrial/commercial receptors in the vicinity. Potential human health risk was evaluated separately for the ambient air measurements and source emission measurements.

The Geomatrix health risk assessment concluded as follows:

1. The ambient air concentrations were two or more orders of magnitude lower than the acute reference exposure levels, indicating that chemical emissions from the drill site would not result in an acute public health risk for acute exposure under the conditions evaluated.

2. The total chronic hazard indexes for the MEIR and MEIW were 0.02 and 0.004, respectively. These values are well below a hazard index of 1, indicating that chemical emissions from the drill site would not result in a public health risk for chronic noncarcinogenic exposure under the conditions evaluated.

3. The estimated carcinogenic risk for the MEIR and MEIW were $8x10^{-6}$ and $1x10^{-6}$, respectively. These values are within the acceptable risk range as defined by U.S. EPA and below $25x10^{-5}$, the level used by SCAQMD to regulate existing emission sources. In addition, the activities at the BreitBurn drill site do not appear to contribute significantly to background air concentrations of key chemicals (benzene and diesel particulates).

The Geomatrix Uncertainty Analysis made the following conclusions:

For the ambient air evaluation, a limited number of measurements were made. However, since the measurements were significantly lower than acute toxicity criteria, additional ambient measurements would not be likely to change this conclusion.

- A limited number of source measurements were made to characterize emissions during the different facility activity modes (four for drilling and one for maintenance). As conditions during drilling and maintenance activities are not consistent, these measurements may over or underestimate emissions on an annual basis. However, emissions from these sources did not result in carcinogenic risks or hazard indexes exceeding acceptable levels. Emissions from these sources would have to be at least 10 times higher than those measured to results in a significant increase to estimated risk.

- Background concentrations of benzene in the vicinity of the drill site as measured in ambient samples and general background concentrations in the South Coast Air Quality Management District are higher than the predicted concentrations from sources at the drill site. Thus, ambient measurements can not be used to corroborate the model results. This suggests that ambient conditions are dominated by sources other than the drill site.

- Background concentrations of diesel particulates in the South Coast Air Quality Management District as estimated by the California Air Resources Board ["CARB"] are significantly higher than predicted concentrations of diesel particulates by the

model. Thus, ambient measurements can not be used to corroborate the model results. This suggests that ambient conditions are the result from sources other than the drill site.

- The exposure assessment is based on conservative exposure assumptions. For example, the evaluation assumes that a worker will be exposed for 245 days per year for 40 years and a resident will be exposed for 350 days per year for 70 years at the same concentration. This and other upper-bound estimates of exposure most likely overestimate the potential health risks associated with exposure to the COPCs emitted from the BreitBurn drill site.

- One of the largest sources of uncertainty in any risk assessment is associated with the scientific community's limited understanding of the toxicity of most chemicals in humans following exposure to the low concentrations generally encountered in the environment. The majority of available toxicity data are from animal studies, which are then extrapolated using mathematical models or multiple uncertainty factors to generate toxicity criteria used to predict what might occur in humans. In the aggregate it is believed that the uncertainty is conservative; actual risk will be lower.

Breitburn Energy Company, in a letter to the Zoning Administrator dated February 1, 2006, discloses that a health risk assessment has been prepared by PCR Services Corporation "in order to correct several errors contained in [the Geomatrix report]." A copy of that report, dated January 2006, was attached. Some of the PCR observations and conclusions in that report are these:

1. Geomatrix "does not account for or measure the vast vehicular traffic immediately adjacent to the facility (for approximately 40,000 gasoline and diesel vehicles per day on Pico Boulevard) nor for emissions that come from the very high volume gas station across Doheny from the drillsite."

2. The sampling location does not account for the two large dry cleaners across the street and immediately upwind from the site. "PERC is used extensively in dry cleaning but is not used at the BreitBurn site. The Geomatrix testing did not identify the likely source of the PERC in ambient air. Instead, Geomatrix included the PERC cancer risk in the air attributable to the BreitBurn site."

3. The one high recording of benzene, on January 8, 2004, did not include ambient measurements for the same day, so that "it is impossible to determine if the benzene was coming from the facility or an outside source."

4. "The Geomatrix HRA included all chemicals detected at drill site sources even though some of these chemicals are not reportedly used or generated at the drill site."

5. Because drilling activities will decrease from 40 percent in 2005 to 3.2 percent in 2009 and beyond, the Geomatrix assessment that current levels of exposure will continue for 70 years is contrary to anticipated exposure levels. Likewise, as idle time will increase from 22 percent in 2005 to 71 percent in 2009 and beyond, the cancer risk results presented in the Geomatrix HRA greatly overstate the potential risk.

6. "Overall, cancer risk as a result of the facility is within the acceptable risk range used by U. S. EPA and below the level typically used for air toxics programs in California and recommended SCAQMD."

According to PCR,

- the California Air Resources Board (CARB) calculated the cancer risk attributable to the old diesel rig alone was as high as 15 - 40 per million
- Geomatrix concludes that the risk from the entire modernized site is 8 per million
- PCR calculates the risk from the entire modernized site is 1.2 per million
- In comparison, the CARB data assigns a risk of 30 per million to a typical dry cleaning plant. There are two dry cleaning plants across the street from the drillsite.

DISCUSSION

The entitlement process involving the modernization of oil drilling and recovery operations at this site was highly contentious. Ultimately, BreitBurn was given the land use approval it needed to proceed. The project was subsequently constructed. The Zoning Administrator conducted a public hearing approximately two years after the modernized facility was issued its certificate of occupancy. At that time, some residents complained of an oil odor and occasional ground shaking attributable to the ongoing operations of the drill site. A review of materials submitted by BreitBurn demonstrated compliance with the numerous Conditions of approval, corroborated by permits, photographs, and other documentation.

During this period of review, the Zoning Administrator met on occasion with one or more members of Neighbors for a Safe Environment (NASE), staff of the Department of Building and Safety, staff of the South Coast Air Quality Maintenance District, a council office staff member, and representatives of BreitBurn.

Because this facility is unique as compared with most land uses in the City and given the heightened attention of the underlying approval process, the Zoning Administrator toured the facility to experience it first hand, and walked around the immediate area.

Issuance of this written determination was significantly delayed in order to accommodate the interests of both BreitBurn and neighbors who wanted the health risk assessment information to be a basis for the instant determination. While initial indications at the public hearing in June 2005 anticipated release of the assessment report within 90 days, the report was not issued until February 2006. In that interim period of time, the Zoning Administrator inquired as to the ongoing status of the assessment and assured the parties that nothing would be issued by the City until the assessment was available to be reviewed. During the interim 8 months, very little information relating to day to day operations was submitted by any party. While the Zoning Administrator wanted to conclude the review as quickly as possible in the event major risk may have been occurring, there was also the desire to have a competent technical analysis upon which such a conclusion could be drawn. No documented or alleged problems occurred during the advisement period.

The Geomatrix and PCR health risk assessments have proved to be worth the wait. The Geomatrix report concludes that health risks are quite low and well within the range of safety. The PCR report concludes that the health risks are even lower than reported by Geomatrix. Based upon these two reports, cancer risk is substantially less as a result of the modernization program than existed beforehand.

Based upon the public testimony received, discussions with other regulatory agencies, and an on-site visit at the facility, I have determined that the Conditions of approval have been and are being complied with, that the operation of the facility poses no ongoing health risk, that necessary inspections of the facility by government agencies will continue, and that further hearings or formal review by the Zoning Administrator are not indicated. By the terms of the Conditions, the Zoning Administrator reserves the right to revisit alleged non-compliance in the future.

APPEAL PERIOD - EFFECTIVE DATE

The Zoning Administrator's determination in this matter will become effective after MARCH 28, 2006, unless an appeal therefrom is filed with the City Planning Department. It is strongly advised that appeals be filed early during the appeal period and in person so that imperfections/incompleteness may be corrected before the appeal period expires. Any appeal must be filed on the prescribed forms, accompanied by the required fee, a copy of the Zoning Administrator's action, and received and receipted at a public office of the Department of City Planning on or before the above date or the appeal will not be accepted. **Forms are available on-line at www.lacity.org/pln**. Public offices are located at:

The time in which a party may seek judicial review of this determination is governed by California Code of Civil Procedure Section 1094.6. Under that provision, a petitioner may seek judicial review of any decision of the City pursuant to California Code of Civil Procedure Section 1094.5, only if the petition for writ of mandate pursuant to that section is filed no later than the 90th day following the date on which the City's decision becomes final.

Re: Z.A. CASE NO. 18893
Northeasterly corner
Pico Bl. & Cardiff Av.
Expansion of existing
controlled drill site.
O. D. District U-131
D. M. No. 548

Greetings:

In the matter of the application of Rose Fink, current owner, and Occidental Petroleum Corporation, optionee, owner-operator and lessee, for Determination of Conditions and Methods of Operation to be followed in expansion to the west on three C2 zoned lots, the production facilities portion of the existing previously authorized controlled drill site in Oil Drilling District U-131, please be advised that based upon the Findings of Fact hereinafter set forth and by virtue of authority contained in Section 13.01-E, F and H of the Municipal Code, the Chief Zoning Administrator hereby authorizes an extension of the controlled drill site approved under Z. A. Case 17683 onto Lots 1037, 1038 and 1039, Tract No. 6380 located at the northeasterly corner of Pico Boulevard and Cardiff Avenue so that the enlarged controlled drill site will comprise:

> Lots 883-888, and Lots 1035-1039, Tract 6380 located northerly of Pico Boulevard between Doheny Drive and Cardiff Av., Beverlywood District;

and the use of the here involved expanded portion of the controlled drill site for installation and operation of additional production

facilities in connection with the existing or future oil wells as authorized and which have their surface locations on the portions of the controlled drill site located easterly of Oakhurst Drive and which oil wells are producing oil, gas or other hydrocarbon substances from the subsurface beneath involved Oil Drilling District U-131 or surrounding established oil drilling districts as heretofore or hereafter authorized, all subject to the following terms and conditions:

1. That all the detailed terms and conditions specified under Z. A. Case No. 17683 with respect to development of the controlled drill site and to the drilling and production activity thereon shall apply to the activities on the expanded site and are by reference made a part hereof and shall be complied with to the same extent as if herein restated in detail except as herein clarified or modified, it being clearly understood that as specified in Condition No. 3 thereof, all surface drilling operations shall be confined to that portion of the site comprising Lots 884-887 and with the expanded portion of the site now comprising Lot 1035-1039 used only for corollary operations and expanded production facilities with no surface oil drilling conducted thereon and with Lots 883 and 888 utilized only for buffer landscaping treatment and incidental employee parking facility.

2. That prior to expansion of the controlled drill site onto said Lots 1037-39:

   A. All existing buildings shall be removed therefrom and the land necessary to provide the curved or cut corner at Pico Blvd. and Cardiff Avenue and necessary land to widen the southerly side of the alley abutting the northerly portion of the three lots to the normal 20' alley width, shall be dedicated and improved or suitably guaranteed in a manner and under the procedures provided in Sec. 12.37 of the Municipal Code.

   B. The Occidental Petroleum Corporation, operator of the facility, shall effectively demonstrate its ability to comply with the details and intent of the conditions applying to the present controlled drill site operations by:

      (1) Impressing upon the drilling personnel and truck operators or others who have occasion to bring trucks or equipment to the site that they are operating in close proximity to a residential neighborhood and to avoid any activity which would result in unusual or loud sounds and particularly during the hours of 7:30 P.M. to 7:30 A.M. and that doors to the drilling rig must be kept closed

0590010009

except when actually in use for installing or removing equipment, gates to the drill site must be kept closed except when a vehicle is actually entering or leaving the site and no vehicle be allowed to project outside of the gates and prevent them from being closed. Furthermore, that truck motors be stopped as soon as the vehicle is inside the site and the motor not started again until the vehicle is ready to leave the site, except that during daylight hours only the motor may be run when essential in logging and testing operations and in construction work where concrete transit mixers, truck cranes and rig movers are required but in such event the motor shall be adequately muffled.

(2) That a noiseless type of vacuum pump powered by electricity shall be installed and henceforth used for pumping drilling wastes into the collector tank truck and that no longer shall the truck motor be utilized for this purpose.

(3) That as a further amplification of Condition No. 21 of Z. A. Case 17683 and in order to further reduce the emanation of odors from the premises, in no event shall drilling muds or fluids containing odorous or volatile oil be hereafter utilized in the drilling operations and that any oils utilized for unusual lubrication purposes in connection with equipment or operations on the premises, other than the actual petroleum produced from the subsurface, shall be treated with chlorophyl, Deodall or some other type of effective deodorant.

(4) That additional soundproofing or change in design be effected by installing baffles and directing sound from the ventilators for the pumps and compressors so that the sound emanating therefrom as measured at locations adjacent to the drill site will at no time exceed the ambient sound encountered in the vicinity at approximately 3:00 A.M.

3. That the expanded portion of the controlled drill site here involved and westerly of the present production site facilities shall be enclosed with an attractive ornamental wall similar to that enclosing the adjoining portion of the site with similar attractive planter box reveals and observing the same landscaped setback and conforming with other landscaping details outlined in Condition No. 3 of Z. A. Case 17683 and with landscape treatment of the parkway along Cardiff Avenue as specified in said condition

059001000010

for the parkways along Doheny and Oakhurst Drives. It is understood that an attractively designed new soundproof equipment building may be constructed on the southwesterly portion of the expanded site, designed in a manner similar to that of the existing equipment building on the southeasterly corner of the production site and that the exterior walls of such production building may serve as part of the required enclosing fixture and all in the manner as indicated on the plot plan for the expanded production facilities, Exhibit "B" and the artist's perspective drawing Exhibit "X" attached to the application.

4. That as a further amplification of cross-referenced Condition No. 18, Subsection F, Sec. 13.01 of the Municipal Code which under Condition No. 1 of Z. A. Case 17683 applies to operation on the enlarged drill site, and in order to further reduce emanation of noise and prevent emanation of vibrations from the site, all newly installed pumps, compressors and ventilating equipment shall be installed under the direction of a recognized acoustical engineer and be properly cushioned so that vibrations therefrom will not extend beyond the drill site and so that at no time will the sound generated by this equipment exceed the ambient sound encountered in the vicinity of the site at approximately 3:00 A.M.

5. That in connection with drilling operations on that portion of the site where such operations are permitted, in no event shall noisy or jarring operations necessary to remove or dislodge a so-called "lost fish" or wedged drilling tool, such as recently occurred, be conducted during the hours of 6:00 P.M. and 8:00 A.M. or at any time on Sunday or nationally observed holiday such as Christmas, New Year, Memorial Day, July 4, Labor Day, Veterans Day and Thanksgiving.

6. That in connection with any portable equipment brought in to service an oil well after it has been completed, such as specified in crossreferenced Condition No. 4 of Sec. 13.01-F of the Municipal Code, such portable equipment shall be semi-soundproofed in a manner such as has been required in connection with the several temporary geological core hole operations conducted by the operator at other locations and such portable equipment shall not be operated between the hours of 7:30 P.M. onde day and 7:30 A.M. of the following day, or on Sundays or the nationally observed holidays listed in Condition No. 5.

7. That all of the items and qualifications contained in Condition No. 2 above which are prerequisite to expanding

0590010001

The controlled drill site shall continue to apply and be complied with in connection with operations on the existing and enlarged site.

8. That for the operators' protection against possible unjustified complaints and to assist the City enforcement officials in determining the merit of complaints against unusual noises, it is suggested that the operators install and maintain on the site adjacent to the alley near the oil drilling rig a sound-recording device which has a continuous graph which would indicate the time and date at which any unusual sound or noise emanates from the drilling activity. Furthermore, that an employee be entrusted with keeping a log of the time and date and cause of any unusual noise created by drilling operations or created by some external factor such as a sonic boom, low-flying airplanes, etc., and which could be compared with the continuous graph.

9. That in connection with the herein authorized expansion of the production site, the applicant-operator shall acquire Lot 1040 of Tract 6380 and shall continue to maintain and utilize said lot as a permitted transitional automobile parking facility in full compliance with the provisions of Sec. 12.21-A,6 of the Municipal Code and as a buffer between the expanded production facilities and the adjoining apartment house development provided, however, that employees working on night shifts shall be requested to utilize the parking area northerly of the portion of the drill site between Oakhurst and Doheny and shall be instructed to be considerate of the tenants of adjacent apartment houses when entering and leaving the parking facilities particularly during night hours.

10. That this determination permitting expansion of the controlled drill site shall in no event be considered as authorization for the drilling of any additional wells upon the drill site beyond those which have heretofore been authorized on the site under Z. A. Cases Nos. 17683, 18201, 18200, 18484, 18471 and 18623. Authority for drilling any additional wells must be authorized under separate application.

The applicants' attention is called to the fact that this determination is not a permit or license and that any permits and licenses required by law must be obtained from the proper public agency. Furthermore, that if any condition of this grant is violated or if the same be not complied with in every respect, then the applicants or their successors in interest may be prosecuted for violating these conditions the same as for any violation of the requirements contained in the Municipal Code. If this property is subleased or assigned to another oil company for drilling or production purposes, it is incumbent upon the applicants to notify said sublessee or assignee of the terms and

0590010012

conditions to the satisfaction of the Administrator. The Chief Zoning Administrator's determination in this matter will become effective after an elapsed period of ten (10) days from the date of this communication unless an appeal therefrom is filed with the Board of Zoning Adjustment.

FINDINGS OF FACT

After thorough consideration of the statements contained in the application including the affidavit from the co-applicant's Petroleum Engineer, the statements made at the public hearing before the Chief Zoning Administrator on July 11, 1967, the communications from the Councilman from the District, the individual letters and substantial petitions both from property owners and tenants in the surrounding community both in favor and in protest to granting the request, the communications from the attorney representing some of the protestants, the communication dated July 5, 1967 to the Petroleum Administrator from the Chief Investigator of the Department of Building and Safety concerning investigation and certain recommendations with respect to controlling noise and odors complained of by some neighbors, the communication from the Vice President of the Occidental Petroleum Corporation dated July 11, 1967 outlining steps which have already been taken to eliminate the source of complaints, correspondence with the applicant-operator with respect to a tentative determination and suggested terms and conditions, and the proceedings under Z. A. Case No. 17291 involving applicant's exploratory core hole, City Plan Cases Nos. 18356, 18357, 18358 and 19677 and Ord. Nos. 130340, 130341, 130342 and 133511 which established Oil Drilling Districts U-131, U-132, U-133 and U-150, and Z. A. Cases Nos. 17683 which authorized establishment of the existing controlled drill site, and 18191, 18200, 18201, 18471, 18484 and 18623 which authorized use of the controlled drill site for bottoming wells under the previously mentioned oil drilling districts, all of which are by reference made a part hereof, as well as personal inspection of the subject property and surrounding neighborhood on several occasions and conferences with representatives of the applicant, the protestants, the Petroleum Administrator and the City Councilman concerning both the current proposal and complaints concerning some of the problems resulting from drilling activities on the existing controlled drill site, I find as follows:

1. The existing controlled drill site which is being utilized for drilling and producing oil wells under Oil Drilling Districts U-131, U-132, U-133 and U-150 comprising some 400 acres of property under community-type lease to the co-applicant Occidental Petroleum Corporation immediately adjoins on the east the three lots here directly involved. This existing controlled drill site, for the reasons stated therein, was authorized under Z. A. Case No. 17683 and was developed by the co-applicant at considerable expense as the first major innovation in landscaping and

0590010013

architectural treatment for this type of urbanized oil drilling site. When the oil drilling districts in this vicinity were established, it was contemplated that this controlled drill site would be utilized for developing the surrounding districts since the ordinances creating these districts specifically and currently prohibit establishment of a controlled drill site therein and require that the district be developed from a drill site outside thereof with the ordinance creating District U-131 being the only one which permitted the Zoning Administrator to authorize a drill site therein. Furthermore, on the basis of results from the core hole drilled under Z. A. Case No. 17291, co-applicant believed only one small drill site would be necessary to drill and develop oil reserves from the one productive sand found in that exploratory test. To date, twelve successful oil wells have been drilled and completed on the drill site with both the oil and gas encountered far exceeding in quantity and quality the reserves expected from the core hole described above and upon which present production facilities were based. In fact, these drilling activities together with the operations of co-applicant's competitors, have confirmed that there is a major east/west anticline extending the full 7000' length of the applicant's leased area and with at least three known separate thick productive sands in this anticline. Most significant is the recent discovery of a deep gas-condensate zone which requires special producing facilities and for which no preparations were made on the present limited site. The ordinances establishing the four oil drilling districts being developed from this controlled drill site authorized the Zoning Administrator to initially permit a maximum of 20 wells bottomed under the collective districts, but based upon the results of the existing wells, the City Council by specific action increased authorization for a maximum of 44 oil wells and there is now pending before the City Council a request for and a recommendation by the City Administrative Officer to permit a number of additional wells under District U-150.

2. Although there is room on the portion of the drill site easterly of Oakhurst Drive where surface drilling operations are permitted, to accommodate drilling of the additional oil wells which have already been authorized, the existing production facilities on the limited portion of the site westerly of Oakhurst Avenue are only sufficient to handle the production from the existing wells (currently approximately 8000 bbl. of oil per day plus extensive gas) and are inadequate to handle production from additional wells which the applicant is obligated to drill for efficient development and to comply with lease requirements. It is essential to provide additional production facilities in anticipation of production

0590010000014

rates of 15,000 to 20,000 bbls. per day or curtail production from the existing and future wells which will greatly reduce royalty returns to the hundreds of landowners who participate in the community-type leases. The unexpectedly large volumes of gas which have been encountered necessitate additional facilities and compressors to conform the same to pipeline specifications. There is no vacant land available in the vicinity upon which these needed additional production facilities can be established. Applicant has already acquired some adjacent apartment house sites north of the site but use thereof would involve expanding the drill site into a residentially zoned neighborhood. The most logical place to expand the facilities is on the commercially zoned property to the west here directly involved, which is owned by the applicant individual but under option to the applicant oil company. Expansion onto the involved property would require removal of a popular neighborhood market but we understand both the owner of the property and the lessee operator of the market fully approve of the proposal since the market has experienced a steady reduction in patronage due to competition of nearby more modern supermarkets. WE also understand the popular meat department in the subject market has plans to relocate in the general neighborhood.

3. The determination under Z. A. Case No. 17683 which authorized the present controlled drill site recognized that the site was not the most appropriate for this type of use and was rather limited but under proper development standards and controls would be the least objectionable to the general community than any other site which could be assembled in the area. As would probably be the case with respect to any drill site in this quality neighborhood, there was some protest from surrounding property owners against the original establishment of the controlled drill site. Due to this fact and the sensitive nature of the operations, very stringent regulations and controls were developed and the applicant oil company has invested considerably more than the usual amounts into attractively developing the site, constructing the architecturally designed oil drilling structure and in endeavoring to control all objectionable features of the operation. Nevertheless, there has been persistent complaints by some of the original objectors and some of the tenants in the neighborhood concerning certain features of the oil drilling activities on the site and there has been some negligence on the part of the applicant oil company in meticulously complying with the conditions of the extant grant and particularly in controlling the activities of the employees on the site and operators of trucks and equipment which services the site. Permitting any expansion of the production facilities without the applicant-operator first demonstrating its ability to comply with the details and intent of the

0590010001 5

applicable conditions controlling activities on the present drill site and without further conditions and limitations on the development and use of the expanded portion of the site and continued activities on the current site would be detrimental to the general public welfare and the best interests of the surrounding property owners and their tenants. However, under the conditions, limitations and further controls outlined above, and which have been reviewed and agreed to by the applicant oil company, granting the request and permitting expansion of the controlled drill site onto the here involved property only for the purpose of providing additional production facilities would not involve these objections, should serve to improve conditions and eliminate the source of most of the complaints concerning activities on the present site and would assist the applicant oil operator in more efficiently removing the valuable hydrocarbons which it has established are present under most of its community leases in the neighborhood, and comply with the expressed desire of the City Council that there be no additional drill sites established by the applicant to develop the subject four oil drilling districts. Although there is protest from some of the near property owners against the subject application, it appears obvious to the Administrator that there would be equal or even more vigorous protest concerning enlargement of the drill site in any other manner or the establishment of a second controlled drill site in the general area to serve one or more of the adjacent three oil drilling districts.

SUMMARY OF PUBLIC HEARING

Z. A. CASE NO. 18893
DETERMINATION OF CONDITIONS
AND METHODS OF OPERATION

PETITIONER: ROSE FINK and OCCIDENTAL PETROLEUM CORP.

An application for Determination of Conditions and Methods of Operation on a site comprising Lots 1037, 1038 and 1039, Tract No. 6380, located in the C2-1-0 Zone at the northeasterly corner of Pico Boulevard and Cardiff Avenue, Beverlywood District, and Oil Drilling District U-131, to permit expansion onto said site of the existing Controlled Oil Drilling Site authorized under Z. A. Case No. 17683 on adjoining property to the east and extending along Pico Boulevard to Doheny Drive, with said proposed expansion area of the controlled drill site to be utilized only for additional production facilities for oil and gas from existing wells or wells proposed to be drilled on the portion of the drill site between Oakhurst and Doheny Drive, application states existing market building will be removed and site will be improved with attractive enclosing walls and buildings similar to the adjoining site and no drilling from proposed expanded area (existing parking lot north of alley to be retained for employee parking), as more particularly set forth in detail on the application, maps and exhibits on file.

CHIEF ZONING ADMINISTRATOR HUBER E. SMUTZ conducted a public hearing on this application on Tuesday, July 11, 1967 at approximately 9:00 a.m. in Room 561-A Los Angeles City Hall.

DISPOSITION

Under advisement -- written determination to follow.

0590010019

ADMINISTRATOR'S CONCLUDING REMARKS

Obviously, I think that it is apparent to all those present that I couldn't possibly evaluate the testimony that has been presented on both sides and make a fair analysis of the application that is here before us.

I recall very definitely that when these Oil Drilling Districts were created, there was a protest fromsome of the same speakers that are here today opposing the creation of the District, and this happens in many of the situations that come to our attention.

The City Council has made a determination based upon apparently the insistence of not just a majority, but 75% or 80%, 90% of the property owners in the area that they favor extraction of this mineral wealth, oil, and based upon this insistence of the property owners, the City Council has created Oil Drilling Districts.

We have to have an oil drilling site somewhere in the district. I think it stands to reason that some people are discommoded to some extent by the presence of an oil drilling site, no matter where you locate it. Our obligation is to see that the operations on such an oil drilling site create the minimum amount of discomfiture or inconvenience to surrounding property owners.

The City Attorney has advised us in several opinions, that we are obligated to permit an oil drilling site and in his latest opinion set forth with respect to this problem in discussing the whole subject of zoning, that in the application of zoning, no matter what type of use you are considering, some people are inconvenienced, but zoning and the whole application of zoning has to be based upon the general public welfare and the greatest good to the greatest number of people, and some people apparently are affected more seriously than others in the application of zoning and zoning regulations, so it would be, I think, utterly impossible to think that this problem before us could be resolved with everybody being completely in favor and no possible complaints with respect to the opposition, but our job is to try to minimize those complaints, and that is the way we intend to approach this particular problem.

I am not too impressed with some of the complaints that have been made about the owenrs of apartment houses, the rental problem. I don't like to make a personal reference, but my wife and I happen to own a 7-unit apartment and I know every problem that anyone of you can bring up about tenants and vacancies.

0590001000020

I have three vacancies right now. I had two vacancies for over a year, so this question of vacancies doesn't impress me a bit. You've got vacancies all over town and it is a general problem and no one can tell me it can be traced directly to the oil drilling, although there may be some association and we can consider these approaches and know exactly what you are speaking of in your problem with tenants. My taxes went up. Do you think I could get any raise in rent without threats of moving? A couple moved out and the others requested a reduction, so I know every one of the problems you are mentioning.

We have had suggestions made to us on some of our other oil drilling sites about this matter of putting a more pleasant odor in the mud and the Diesel fuel and things used on the site, and I think this has merit, irrespective of any expansion of production facilities, the control of features on the present drill site in this regard; however, one speaker mentioned perfume and we aren't drilling for perfume but oil, and every one has a different selection of the types of odors that they may like.

I recall one of the most vigorously opposed hearings I ever conducted was one where they wanted to put a perfumed candle factory on commercially zoned property and these people complained about the odor, so even if you had Chanel No. 5 coming out of the oil drilling, some people would be offended by that particular odor, I assure you, so the best we can do is try to find a neutral odor that won't offend everybody.

I am sure that some of the problems concerning this proposal may stem from some sentiments, either one way or the other, with respect to Norm's Market and we have had this come up in other zoning problems. While it is corollary to this request, we have no control over whether a market stays in the particular locality or moves elsewhere, and we see them coming and going just like we see restaurants come and go and I think we have to discount that feature.

Perhaps there is emotion that may be in some people's minds with respect to the proposal here before us, but we do have to consider the element of what are the alternatives, are there any alternatives and frankly, I question that there is any alternative except one that would probably just transfer any burden or any complaints from one area to another area, so in the long run we wouldn't be solving the problem. It would be like when you oil one squeaky wheel, then the next wheel starts squeaking and then you have to oil it, and I am going to do my best to try to evaluate this matter and try to come up with some kind of a sensible answer. We will take this matter under advisement and evaluate it.

0560010021

Incidentally, I have been in this zoning game now for 41½ years. I have conducted thousands of hearings, read thousands of petitions both for and against and that is why we don't put too much credence in petitions, because we know how signatures are obtained on both sides of the question, whether by those in objection or not. Some of the letters withdrawing their names indicate that there may have been some misrepresentation on both sides of this matter, just not by one side. Well, thank you for your attention.

EXHIBIT K

Settlement Agreement

34 #24

SETTLEMENT AGREEMENT

This SETTLEMENT AGREEMENT (the "Agreement") is entered into effective as of the date of last execution shown opposite the signature blocks below (the "Effective Date"), between the CITY OF LOS ANGELES, a municipal corporation and local public agency, the CITY COUNCIL OF THE CITY OF LOS ANGELES, a local public agency, (collectively these two parties are sometimes referred to herein as "City"), NEIGHBORS FOR A SAFE ENVIRONMENT, a California nonprofit corporation ("NASE"), RAE DRAZIN, Ph.D., an individual, MINA SOLOMON, an individual, (NASE, Drazin and Solomon are sometimes collectively referred to as "Petitioners"), and BREITBURN ENERGY COMPANY LLC, a California limited liability company ("BreitBurn"). The purpose of this Agreement is to settle litigation relating to the approvals for the construction and operation of the West Pico Drillsite Modernization Project, Los Angeles County, California.

RECITALS

A. In 1999, BreitBurn applied for a change in its Determination of Conditions and Methods of Operations for an existing drillsite located at 9101 West Pico Boulevard, Los Angeles, California (the "Project"). The Project calls for the modernization of the drillsite and the recovery of additional oil reserves and includes, among other things, the raising of the exterior wall, the enclosure of the drilling and workover rig in a soundproofed and architecturally treated structure, and the building of an enclosed support building. The Project also includes the removal of the existing diesel workover rig. The Project also removes prior limitations on permissible days and hours for redrilling and reworking of wells.

B. The environmental assessment process began in 1998. A Draft EIR was completed and distributed for comments on April 15, 1999. The Final EIR was issued by the City in October of 1999.

C. The Zoning Administrator held a public hearing on December 2, 1999 (ZA Case No. 17683-PAD). The Zoning Administrator issued her decision on April 5, 2000. That decision approved a modification of the existing conditions and methods of operation for the drillsite and imposed 78 conditions on the approval.

D. The Petitioners filed an appeal of the Zoning Administrator's decision to the Board of Zoning Appeals ("BZA"). A public hearing was held before the BZA on May 23, 2000 (BZA Case No. 2000-1697). The BZA approved certification of the EIR, the adoption of the Mitigation Monitoring Plan and adopted the environmental findings made by the Zoning Administrator. The BZA then denied the appeal and adopted the plan approval and conditions imposed by the Zoning Administrator, with corrections recommended by the Zoning Administrator ("Plan Approval"). The Plan Approval was not further appealable.

E. The Petitioners appealed the BZA decision on the EIR certification to the City Council. A public hearing was held before the full City Council on October 25, 2000 (Council File No. 2000-1842). The City Council voted in favor of certifying the EIR and adopting the findings of the BZA as the findings of the City Council. The Notice of Determination of the certification was filed with the County Clerk the same day.

F. The Petitioners filed a petition for writ of mandate in the Superior Court of Los Angeles County styled *Neighbors For A Safe Environment, etc., et al. v. City of Los Angeles, et al.*, LASC No. BC 240760 (the "Action") seeking to set aside the certification of the EIR and the underlying permit approvals.

G. On May 9, 2001, the Superior Court,Judge David P. Yaffe, presiding, entered a judgment ordering the clerk to issue a peremptory writ of mandate ordering the City to set aside its certification of the EIR and related approvals. The Statement of Decision of the Court indicates that the Court was concerned about the EIR's response to questions concerning nighttime noise.

H. On May 16, 2001, the City mailed to interested persons an Addendum to the EIR addressing the issue of nighttime noise and informing them of further proceedings before the City Council on May 22, 2001. The Addendum concluded that noise from the facility at night will not alter any resident's ability to sleep. The Addendum and related City Staff report were circulated to approximately 800 owners and occupants of all properties surrounding the Project. The Petitioners filed objections to the report with the City.

I. On June 1, 2001, BreitBurn and the City filed a Notice of Intention to Move for a New Trial.

J. The parties have reached an agreement resolving all of the issues in the Action and wish to fully and finally terminate the Action pursuant to this Agreement. By entering into this Agreement, BreitBurn and the City have agreed to undertake additional measures relating both to nighttime noise, air quality and enforecement at the Project.

NOW, THEREFORE, in consideration of the mutual covenants and conditions contained herein, and for other good and valuable consideration, the adequacy and receipt of which is hereby acknowledged, the parties agree as follows:

AGREEMENT

1. Obtaining of air quality data

a. On occasions to be prescribed by the Air Quality Consultant (defined in Item 1(d), below), the Air Quality Consultant will sample fugitive and other emissions inside the derrick structure. BreitBurn will, as far in advance as is practicable and at least 24 hours in advance, inform the Air Quality Consultant of the timing of those operations most likely to produce such emissions, including those periods when solvents are utilized. The Air Quality Consultant will take samples at representative times and will determine, in conjunction with BreitBurn, the relative percentages of time the facility undertakes various operations.

b. The Air Quality Consultant will order that the samples be tested for such substances as shall be specified by the Risk Assessment Expert (defined in Item 2, below).

c. The analysis of the emissions analyzed pursuant to this agreement will be performed by an independent laboratory certified by the State to perform such tests.

d. NASE will designate a consultant (the "Air Quality Consultant") who shall be a certified industrial hygienist or an individual with a minimum of 5 years experience in air emissions sampling in the Los Angeles Basin.

e. BreitBurn may request and thereupon will be given split samples obtained by the Air Quality Consultant under this section for the purpose of BreitBurn performing duplicate testing at its expense.

f. On occasions to be determined by the Air Quality Consultant, and simultaneous with the obtaining of the samples within the BreitBurn facility, the Air Quality Consultant will obtain ambient air quality samples upwind and downwind from the BreitBurn facility. Those samples will be analyzed at the same laboratory for the same substances as were tested for within the BreitBurn facility.

g. BreitBurn and NASE will deliver to each other, and to the Risk Assessment Expert (described in Item 2, below) a copy of the laboratory results of all testing performed under the provisions of this section, and of the reports of the Air Quality Consultant as to the manner of taking the samples and the rationale for such manner, and the determination concerning the various operations at the facility pursuant to subsection 1(a), in order that the risk assessment, described in the next section, accurately characterizes the emissions from the facility over time.

2. Development of Risk Assessment

a. NASE will designate a toxicologist who shall be a Ph.D. level Diplomat of the American Board of Toxicology (the "Risk Assessment Expert").

b. The Risk Assessment Expert will prepare and deliver to NASE, to BreitBurn, and to the Zoning Administrator a report (the "Risk Assessment Report") detailing the professional conclusions of the Risk Assessment Expert concerning the incremental risk to the nearest off-site human receptors of cancer and other indicated diseases posed by operations at the BreitBurn facility. The Risk Assessment Report will specifically address the population in close proximity to the site, e.g., children of school age. The Risk Assessment Report, including all modeling, will be conducted in a manner consistent with relevant and applicable guidance documents published by the United States Environmental Protection Agency and the California Environmental Protection Agency. The Risk Assessment Expert shall exclude from his or her analysis of incremental risk all chemicals and risks associated with ambient air at the site received from any sources other than the BreitBurn facility.

3. Noise

a. In carrying out Conditions No. 77 and 78, and in addition to the other Conditions imposed, the Zoning Administrator will consider, based on data and reports, if any, submitted by BreitBurn, NASE or any neighbor, the extent to which the nighttime operations of the BreitBurn facility disturb the sleep of surrounding residents.

b. In developing the noise requirements prescribed by the City, BreitBurn and its consultant shall consider, and the Zoning Administrator will review, the properties of sounds generated by the facility, in addition to decibels, that may contribute to the disturbance of the community at night and the data gathered pursuant to subsection 3(a).

c. If the Zoning Administrator determines that nighttime noise from facility operations creates an unreasonable impact on nearby residents, the Zoning Administrator shall consider such additional mitigating measures as shall be required to eliminate any such impact. In the event that the Zoning Administrator determines that nighttime operations cannot be sufficiently mitigated by other means to eliminate unreasonable impacts, the Zoning Administrator shall order that workover or other operations not occur during the nighttime hours.

d. Actions taken by the Zoning Administrator shall be subject to normal City procedures and appeals.

4. Enforcement

a. If at any time the Risk Assessment Expert determines that the operations at the BreitBurn facility pose a risk of cancer of greater than one in a million (1×10^{-6}), the Risk Assessment Consultant shall report that finding and recommendations to the Department of Building and Safety, the Zoning Administrator, the South Coast Air Quality Management District, and the Division of Oil and Gas.

b. At the Review of Conditions required by Condition No. 78 imposed by the BZA and adopted by the City Council, to occur two years after construction and the issuance of a Temporary or Permanent Certificate of Occupancy, the Zoning Administrator will consider the findings and conclusions of the Risk Assessment Expert and impose any additional conditions deemed appropriate or within the Zoning Administrator's continuing jurisdiction under Condition No. 77 or otherwise. If the report of the Risk Assessment Expert indicates that the operations at the BreitBurn facility pose a risk of cancer of greater than one in a hundred thousand (1×10^{-5}), BreitBurn will request a public hearing and a public hearing will be deemed warranted pursuant to Condition No. 78. (This provision does not otherwise limit the Zoning Administrator's discretion to set the matter for public hearing.) Within ninety (90) days prior to the fifth anniversary of the first review held

pursuant to Condition No. 78, and on each five-year anniversary thereafter, BreitBurn will request an additional review of conditions pursuant to the procedures prescribed in Condition No. 78 and the Zoning Administrator will conduct a review of conditions as prescribed in Condition No. 78 and will issue a report of its review and schedule a further public hearing, if warranted. Such report shall be promptly forwarded to NASE, BreitBurn and the applicable Neighborhood Council.

c. For a period of two years following completion of construction, the City will designate one or more individuals at the managerial level of the Department of Building and Safety, who will receive complaints regarding odors or noise at the BreitBurn site on a 24-hour basis. The Department of Building and Safety will forward logs of such complaints to NASE and the Zoning Administrator's office. The Department of Building and Safety will report complaints within two (2) hours to the appropriate agency; e.g., the Police Department for noise; the South Coast AQMD for odors.

5. Financial Provisions

a. BreitBurn will pay:

1. $65,000 to NASE for attorney's fees and costs in this matter;

2. $25,000 to NASE to be used by it to engage technical advisors and perform testing not otherwise provided for in the Agreement and/or for other community projects;

3. Invoices from the laboratories utilized by NASE, the Air Quality Consultant, or the Risk Assessment Expert to analyze the air quality samples;

4. Invoices from NASE or the Air Quality Consultant described in Section 1 for the work described therein;

5. Invoices from the Risk Assessment Expert or from any other costs associated with the risk assessment work described in Section 2 for the work described therein;

6. Any fees assessed by the City for the services described in Section 4(c);

7. Any other reasonable and necessary costs of carrying out the provisions of the Agreement.

8. The maximum cumulative total that BreitBurn shall be required to pay for items 3 through 5 above, shall not exceed $150,000. No expense of BreitBurn for split samples, consultants to BreitBurn or any other voluntary expenditure of BreitBurn shall be included within said $150,000. BreitBurn shall send statements to NASE periodically showing the sums expended in conjunction with such activities. NASE shall contractually require the Air Quality Consultant and the Risk Assessment Expert to perform their services in a manner prescribed by this Agreement, but BreitBurn shall promptly pay their duly presented invoices irrespective of any disagreement that BreitBurn may have concerning their findings and conclusions or their manner of performance.

b. Items 1 and 2 above shall be due and payable immediately upon the complete implementation of the resolution of dispute provisions of Section 6 this Agreement, including the right of BreitBurn to proceed immediately to complete and operate the project without any further administrative or legal proceedings as set forth in Section 6(f). Items 3 through 7 shall be due and payable upon normal commercial terms upon presentation of invoices.

6. Resolution of Dispute

a. Within three days of the approval of the Agreement by all parties thereto, each of the Petitioners, through a letter submitted to the City Clerk by their counsel, will withdraw their objections before the City to the Project and will support the making of any related actions of the City necessary to implement the Plan Approval and this Agreement.

b. Following approval by the City of this Agreement, each of the Petitioners will stipulate to, and join in any motion or request made by BreitBurn to, set aside the judgment previously entered in this case and dismiss the action with prejudice and request that the Court enter a new judgment denying in its entirety the requested writ of mandate or in the alternative to enter an order unconditionally quashing the writ of mandate previously issued. That stipulation and/or joinder shall recite that the parties have reached a settlement in this case, and that costs and fees shall not be awarded to either party under the judgment to be entered. Should the judgment of the Court thereafter award costs or fees to either party, such party shall not seek to enforce that provision.

c. If the Superior Court will not set aside the Judgment heretofore entered, and/or will not quash the writ of mandate heretofore entered and served, the Petitioners will join in supporting and will not thereafter object to the return to the Superior Court's writ of mandate to be filed by the City and describing its actions as in accordance with this Agreement as in satisfaction of the requirements of the writ.

d. Neither party shall make any post-judgment motion nor seek to appeal the judgment entered, following resolution of this matter in accordance with this Agreement.

e. Nothing in this Agreement shall constitute an admission by any party of any fact, nor shall it constitute a waiver of any right or objection of any petitioner to the facility or any of the operations thereof in the future, outside of the context ofthe Action.

f. It is the intention of the parties that the Project be allowed to proceed immediately in accordance with the prior conditions of approval as amended only by the terms of this Agreement. In the absence of the complete implementation of the resolution of dispute provisions of this Agreement, including the right of BreitBurn to proceed immediately to complete and operate the project without any further administrative or legal proceedings, it is the intent of BreitBurn and the City to file an appeal from the judgment entered by the Superior Court on May 9, 2001. A Notice of Entry of Judgment was served by Petitioners in this case on May 17, 2001. Pursuant to California Rules of Court section 2(a) provides that a notice of appeal must be filed no later than July 16, 2001. If the City does not take the actions set forth in subsection 6(b) or the Court has not accepted the actions of the City as in compliance with the writ or set aside the writ as provided in subsections 6(b) or (c), on or before July 16, 2001, then, unless otherwise agreed to by all parties, any party thereto may file a notice of appeal on such date and this Agreement shall terminate and be void.

7. Knowing Agreement

The parties each affirms that he/she/it has carefully read the foregoing and understands that this is a settlement agreement, and further affirms that each has reviewed and discussed the same with its counsel and knows the contents herein and has discussed the legal effect hereof and that the party executing the same does so of its own free act.

8. Entire Agreement

This Agreement embodies the entire understanding of and agreement between the parties as of the Effective Date and the parties each hereby agrees that the terms and provisions of this Agreement can only be changed, altered, or modified in any respect, by an instrument in writing and signed by all of the parties.

9. California Law

This Agreement shall be governed by, construed and enforced in accordance with the laws of the State of California and enforcement of this Agreement may be had in any court of appropriate jurisdiction in California.

10. Binding Effect and Benefit

This Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective successors and assigns.

11. Authority of Signatories

All persons executing this Agreement on behalf of any entity hereby represent that they have proper authority to do so and to bind the entity to it.

12. Interpretation of Agreement

The parties have all participated in the drafting and preparation of this Agreement. Hence, in any construction to be made of this Agreement, the same shall not be construed against or in favor of any party on the basis that it or another proposed specific language.

13. Counterparts

This Agreement may be executed in two or more counterparts, each of which shall be deemed an original but all of which together shall constitute one and the same instrument. This Agreement will become effective only when executed by all parties.

Re: Appeal of Zoning Administrator Determination for Plan Approval at West Pico Drill Site; Case Nos. ZA-1989-17683-PA2, ENV-2020-1328-CE, ZA-1989-17683-PA2-1A

Honorable Commissioners:

On behalf of Neighbors for A Safe Environment (NASE), a California nonprofit corporation seeking to protect neighborhoods from the impacts of oil drilling and production, we write regarding the appeal of the Zoning Administrator (ZA) Determination for Plan Approval at the West Pico Drill Site.

NASE understands that there are two appeals before the Commission, both ours and an appeal filed by Council District 5 (CD5). NASE's appeal includes details regarding violations at this drill site that are based on extensive research regarding legal requirements and activities that have occurred at the West Pico Drill Site. In reviewing the appeal statement filed by CD5, we discovered it includes factual inaccuracies and does not include several major legal violations addressed in NASE's appeal. NASE sent communications regarding these issues to CD5. To ensure that the Commission has the most accurate record before it when reviewing this matter, we have attached that letter identifying the need for factual clarifications. (Attachment 1.)

The attached letter to CD5 identifies several violations not contained in the CD5 appeal, including, but not limited to: the illegal split of the West Pico Drill Site; 24 illegal well drilling and conversion projects that have taken place at the drill site without Zoning

Administrator approval or environmental review; and repeated and ongoing violations of CEQA. These are significant violations that we urge the Commission to address.

To ensure the Commission has relevant information before it to address the significant issue of the 24 illegal well drilling and conversion projects, we have also attached a copy of a critical document on this issue from the ZA case file. The site operator, PCEC, sent an email to the ZA on June 19, 2020, acknowledging the execution of these 24 projects without the required ZA approval and CEQA review. The email identifies the well projects by individual well name, date, and work performed, and as such must be considered as part of your assessment in this matter. (Attachment 2.)

Further, the attached letter to CD5 (Attachment 1) identifies the ultimate relief NASE is seeking as a result of our appeal, through a new ZA review and environmental review pursuant CEQA. We request the Commission carefully consider the following remedies:

- voiding the 2000 Zoning Administrator approval and any permits based upon it because it illegally split the West Pico Drill Site, in violation of the prohibition on more than one drill site in Oil Drilling District U-131;
- requiring the immediate plugging of all idle wells and any illegally drilled, redrilled or converted wells;
- revisions to the conditions of approval for the site to mitigate ongoing impacts to the community, to comply with the City's Municipal Code requirements, and to be consistent with the terms of the settlement agreement regarding this drill site between NASE, the City and the site operators.

Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer

Re: Appeal of Zoning Administrator Determination for Plan Approval at West Pico Drill Site; Case Nos. ZA-1989-17683-PA2, ENV-2020-1328-CE, ZA-1989-17683-PA2-1A

Dear Councilmember Koretz:

On behalf of Neighbors for A Safe Environment (NASE), a California nonprofit corporation seeking to protect neighborhoods from the impacts of oil drilling and production, we write to recognize that you have taken the unusual step of submitting an administrative appeal of the June 2, 2021 Zoning Administrator Determination for Plan Approval at the West Pico Drill Site ("ZA Determination") on behalf of Council District 5 (CD5). As you are aware, NASE has also filed an appeal of this determination and has actively engaged in the administrative process. NASE has informed me that your Land Use Deputy, Daniel Skolnick, contacted Rabbi Yonah Bookstein to set up a time to "discuss the advocacy for the appeal." While it is my understanding the Rabbi has not yet received a response regarding the times he provided for an appointment with Mr. Skolnick, NASE has asked me to take up Mr. Skolnick's invitation and open the lines of communication.

NASE was dismayed that the ZA Determination found the West Pico Drill Site to be in substantial compliance, despite the mountain of evidence to the contrary, and that it required no further protections for the community. NASE filed its appeal of the ZA Determination to protect the community surrounding this drill site and to ensure the City enforces legal requirements at oil drilling sites generally.

To ensure protections for the community and compliance with legal requirements, we want to make sure the appeal case is as strong possible. To that end, we address the following items in this letter:

- There appear to be substantive factual inaccuracies in the appeal statement CD5 submitted. We have identified the most consequential of these issues in detail below and provide factual information that we believe is essential to the appeal case. NASE believes it would be beneficial to have any substantive errors revised prior to the appeal hearing so that they do not distract or detract from a strong challenge to the ZA's ruling. If you think there are facts to which we are not aware, we would greatly appreciate documentation regarding those issues to ensure our own statements are as accurate as possible as well.

- NASE also requests clarification regarding CD5's proposals for resolving the problems at the West Pico Drill Site included in the CD5 appeal statement, including CD5's requested remedies and its requested process.

- NASE also requests that CD5 support our appeal, including several proposals included in our appeal statement.

I. Factual Clarifications

A. Lack of Compliance with 2001 Settlement Agreement and ZA Conditions.

As set forth in NASE's appeal and many prior submissions to the ZA, the City and West Pico Drill Site operator have violated the 2001 settlement agreement between NASE, the City and the site operator. The CD5 appeal correctly identifies some of these violations, but omits mention of others. Additionally, there are several alleged violations of the settlement agreement set forth in the CD5 appeal that are not factually supported.

- <u>Required Reviews of Conditions:</u> The CD5 appeal contains several important inaccuracies and omissions concerning these reviews:

    - The CD5 appeal claims there was no 2006 plan approval process. (CD5 appeal p. 2.) However, ZA-1989-17683-PA1 was the two-year post-project "Review of Conditions" required by Condition 78 of the 2000 ZA approval (ZA-1989-17683-PAD). It was initiated in 2005 and completed in 2006. Documentation for this review of conditions is included in the case file for this Plan Approval review (PA2).

    - The CD5 appeal correctly identifies that the 5 Year Review of Conditions required by the Settlement Agreement were not held in 2011 and 2016, but

fails to acknowledge that the City was bound by the Settlement Agreement to hold this review and has failed in this obligation.

- The CD5 appeal also states that "the operator did not in 2019 initiate a Plan Approval process," however, 2019 was not a scheduled year for a 5 Year Review of Conditions. Additionally, the operator did initiate submission of a Plan Approval application in 2019, but only after NASE alerted the City of its duty under the Settlement Agreement, triggering the Chief ZA's November 19, 2019 letter ordering a review.

- As set forth below and in NASE's appeal, the City's failure to require timely Plan Approval proceedings in 2010-11 and 2015-16, and the fact that the current review was only initiated at the insistence of NASE, demonstrates the need to revise the conditions of approval for the Drill Site to comport with the requirements of the 2001 Settlement Agreement to enforce the requirement for future reviews.

- Reports on Air Quality Data and Risk Assessment Report: The CD5 appeal states that the reports on air quality data and risk assessment required by the 2001 Settlement Agreement are not in the case file (CD5 appeal pp. 1, 3), suggesting that those reports were never done. However, these reports were prepared one time as required by the 2001 Settlement Agreement and submitted in connection with the 2006 Plan Approval, discussed in the 2006 ZA determination and are included in the City records for this site.

  - The 2001 Settlement Agreement does not require the performance of air quality and risk assessment reports in every 5-year review of conditions. That is why NASE has been requesting new ZA-assigned conditions including, but not limited to, permanent 24/7 emissions monitoring, annual general compliance inspections by the Petroleum Administrator, and writing the Settlement Agreement requirement of 5 Year Reviews into the conditions of use for the site. This monitoring and assessment would provide data for future risk assessment studies and aid in enforcement of existing City laws and assigned conditions.

- Failure to Review Mitigation Measures: The CD5 appeal correctly notes that the "ZA did not review mitigation measures in its letter of determination." (CD5 appeal p. 3.) However, the CD5 appeal does not address the nexus with CEQA created by this required review, which is vital to ensuring adequate and legally enforceable mitigation for the community surrounding the West Pico Drill Site.

- While Section 4b of the 2001 Settlement Agreement extends Condition 78 to require Reviews of Conditions every five years, it is Condition 78 itself, written by the ZA in 2000, that requires these reviews "evaluate the neighborhood impacts of project operations and the efficacy of mitigation measures."

    - In failing to evaluate the efficacy of mitigation measures, the ZA Determination fails to follow the requirements of Condition 78.

- Reviewing and revising mitigation measures to reduce significant environment impacts, cumulative impacts, and redress the failure of mitigation monitoring and enforcement programs must be done through the CEQA process to ensure the revised measures actually address the impacts to the community and are legally enforceable.

    - Instead, the ZA Determination improperly relies on a Class 1 categorical exemption, exempting ongoing activities from environmental review, to legitimize years of illegal actions. It also improperly relies upon a Class 21 exemption for enforcement actions, despite failing to include any corrective enforcement actions.

    - This is why a categorical exemption from environmental review under CEQA was improper and fatal to the integrity of the ZA's Determination, as NASE as pointed out at ZA hearings, in letters submitted to the ZA and in previous communications with CD5.

    - The CD5 appeal does not address the need for CEQA review when identifying the lack of review of mitigation measures. It is our understanding that CD5 has previously argued in favor of reliance on a categorical exemption at this site. NASE urges you to change this position to allow necessary protective measures for the community to be evaluated and to revise your appeal to address the need for environmental review.

B. Open Orders to Comply.

The CD5 appeal refers to open orders to comply that have not been resolved. For the most part, this is not factually correct. The public record shows that true orders to comply from LAFD, SCAQMD, and DOGGR/CalGEM have been resolved and closed.

There is, however, an important issue of idle wells at the site that NASE believes must be specifically addressed.

LAFD issued a February 25, 2020 Idle Well Notice per LAMC 57.5706.3.16.1. While this notice states it is an Order to Comply, the LAFD has not treated such notices as orders to comply. Shortly after this notice was issued, Battalion Chief James Hayden, head of the LAFD Industrial and Commercial Unit that oversees oil wells, was cited in an LA Times article as saying that the LAFD does not enforce Idle Well Notices.[1] The documentary record of Idle Well Notices and LAFD inaction at drill sites across the City substantiates the accuracy of Battalion Chief Hayden's description. The City generally does nothing about idle wells.

NASE is concerned that the City will treat idle wells on the drill site in the same manner it has on other drill sites in the City, and either ignore them after issuing the notice or issue a variance to formally release the operator from the requirements of the idle well notice. As set forth in the April 22, 2021 letter submitted by Professor Salman in this matter, **we urge CD5 to use the Plan Approval appeal as an opportunity to require the plugging of any idle wells on the drill site as both a matter of good public policy and a measure of equity to compensate for the wrongs done at the drill site.**

C. There Can Be Only One Controlled Drill Site in Drilling District U-131.

As clearly documented in NASE's appeal, the West Pico Drill Site is the only Controlled Drill Site allowed in Oil Drilling District U-131 and spans the lots on both sides of Oakhurst Drive. Thus, contrary to claims made by the ZA Determination, the production facilities at 9151 West Pico Boulevard are part of the same Controlled Drill Site and cannot legally be split off as a separate site.

It appears from the statement in the CD5 appeal that "the Plan Approval action is only for a portion of this facility" that CD5 is claiming there are two distinct drill sites on West Pico. (CD5 Appeal p. 1.) NASE urges CD5 to address this lack of clarity and specifically state that there can only be one legal Controlled Drill Site in this drilling district and that oil production activities cannot take place outside of a Controlled Drill Site.

Additionally, as discussed below, NASE also urges CD5 to support NASE's position that permits issued at the West Pico Drill Site pursuant to the illegal split of the site contained in the 2000 ZA approval must be voided, including the 2000 ZA approval itself:

[1] https://www.latimes.com/environment/story/2020-03-05/deserted-oil-wells-los-angeles-toxic-fumes-cleanup-costs.

- LAMC 13.01.E.2.b allows there to be only one site for oil drilling and production activities in Oil Drilling District U-131. A major flaw of the ZA Determination and the 2000 ZA approval is a claim that there are two legal sites.[2]

- LAMC 13.01 defines a Controlled Drill Site as the only kind of ZA-approved land use in "urbanized" districts on which oil drilling and production activities are allowable.

- All of the operator's records with DOGGR/CalGEM, SCAQMD, and for spill prevention and emergency planning, etc., treat the Controlled Drill Site as a single integrated unit with interchangeable street addresses because that is what the Controlled Drill Site is, both in its actual operations and by City law as per LAMC 13.01.

- Despite this, as detailed in NASE's appeal, since the 2000 ZA approval, the so-called "production facility" half of the Controlled Drill Site is operating outside of the law with no standing conditions or Conditional Use Approval, leaving the surrounding community without necessary protections.

- Because the split of the Controlled Drill Site contained in the 2000 ZA approval was issued in clear violation of the City's Municipal Code, that approval and all permits relying upon it should be deemed void pursuant to LAMC 11.02, which declares that permits inconsistent with City Code "shall be void."

- We urge CD5 to join in NASE's arguments regarding the illegal split of the drill site into two sites.

D. Illegal Activities Have Occurred at the Drill Site, Including Illegal Well Drilling.

NASE was surprised to find that the CD5 appeal does not address the fact that since 2000 there have been numerous illegal projects at the West Pico Drill Site. These include **24 illegal well projects** (2 new wells, 12 redrills, and 10 well conversions) plus the illegal installation of microturbines. These illegal projects are all completely documented in the public records of DOGGR/CalGEM and the LAFD. NASE even got the current site operator to stipulate in writing that site operators had executed these

[2] Creating a second Controlled Drill Site would be illegal in Drilling District U-131 because the District has only 70 acres. The ZA made a massive error in 2000 that appears to have illegally split the site in two and the ZA in the 2005-06 PA1 case and now the ZA in the PA2 case has repeated the error.

projects without Code-required ZA reviews and approvals and without required CEQA clearances.

The ZA has not required formal review and approval of these projects by the ZA, as required by LAMC 13.01.H and 13.01.I. This also violates ZA Memo 133, which requires public hearings and prohibits reliance on categorical exemptions from CEQA for projects to drill, re-drill or convert wells. The current ZA Determination requires nothing more than for the Drill Site operator to submit any DOGGR/CalGEM documentation of theses illegal well projects to be submitted to the Office of the ZA.

The ZA attempts to justify this failure to address illegal well projects by referencing Condition 72 of the 2000 approval. That condition addresses only the redrilling of wells, not the drilling of new wells or the conversion of wells. Moreover, Condition 72 is, and was at the time it was adopted, inconsistent with LAMC 13.01.H and 13.01.I, which states that that no City permits shall be issued to drill, redrill, or convert wells without prior discretionary approval by the ZA.

As such, NASE has urged the City to declare all LAFD project and operating permits for the illegally drilled, redrilled or converted wells, as well as the LADBS permits for microturbines, void per the requirements of LAMC 11.02. We urge CD5 to revise its appeal to address these illegal actions and require remediation, including the plugging of illegal wells.

II. CD5 Appeal Requested Remedies and Processes.

The relief requested and the relief available as part of the appeal proceedings is a very important consideration as it can influence whether the appeal will be granted and it needs to serve as protection for the community surrounding the West Pico Drill Site at least until the next 5-year review of conditions. With this in mind, we have several questions regarding the specific relief sought by CD5 and the processes through which CD5 believes it can be achieved.

The CD5 appeal "recommend[s] a revocation hearing for the entire facility." Since this recommendation lacks detail, NASE requests clarification:

- Is CD5 advocating for the revocation of all approvals associated with the West Pico Drill Site, and thus a closure of the drill site, or just a future hearing on issue of revocation?

- If CD5 is recommending revocation and closure of the drill site, NASE appreciates the proposal, but requests additional explanation regarding whether this is actually a viable proposal.

- The CD5 appeal concludes by advocating for the imposition of two additional conditions at the West Pico Drill Site, which appears to be inconsistent with the recommendation for a "revocation hearing"; thus, we request clarification regarding the specific relief sought by CD5.

It is our understanding that Nuisance Abatement/Revocation proceedings are defined by LAMC 12.27.1, and the process is defined in 12.27.1.C, which establishes the findings that must be made in order to allow the City to revoke an approval:

> The Director may require the discontinuance or revocation of a land use or discretionary zoning approval only upon finding that:
>
> (a) prior governmental efforts to cause the owner or operator to eliminate the problems associated with the land use or discretionary zoning approval have failed (examples include formal action, such as citations, orders or hearings by the Police Department, Department of Building and Safety, the Director, a Zoning Administrator, the City Planning Commission, or any other governmental agency); and
>
> (b) the owner or operator has failed to demonstrate, to the satisfaction of the Director, the willingness or ability to eliminate the problems associated with the land use or discretionary zoning approval.

NASE is unclear how such a revocation process would work for the West Pico Drill Site and requests CD5 provide us and other members of the public interested in this issue with detailed information regarding how the process would work.

Additionally, it is our understanding, based on recent statements made by the City Attorney, that environmental review would be required to revoke approvals for a drill site.[3] This is because plugging wells and demolishing a drill site are activities that can have negative environmental impacts even as they eliminate a negative impact on the environment. NASE has not requested environmental review as a delay tactic, but instead wants to ensure any such actions do not result in further impacts to the community. Advocating for revocation of the approvals at the West Pico Drill Site does not allow for legal escape from CEQA.

[3] According to the City Attorney's November 2020 testimony to City Council, environmental review would be required to revoke approvals for a drill site. The City Attorney told City Council that "environmental review under CEQA" will be needed for proposed legislation to phase out oil drill sites via amortization and retroactive setbacks or declarations of non-conforming use due to the potential impacts associated with drill site closure.

NASE is also uncertain whether the findings required by LAMC 12.27.1.C can be made based upon the existing record for this site. Our concern is that there has been a lack of effort by City agencies to order corrections for illegal projects and void permits or to fix failed mitigation measures. Since we want to ensure that the site operator would not be able to easily overturn a revocation for the site, please let us know what evidence CD5 would rely upon to persuade the Director of Planning to make the required revocation findings.

While NASE has proven that there are numerous serious problems at the drill site, we are concerned that the City's failure to conduct general compliance inspections at this site (and other drill sites throughout the City) has hampered the City's ability to document violations and order corrections. For example, while there have been years of illegal drilling, redrilling and well conversions at the drill site, the lack of general compliance inspections has allowed the site operator to take these illegal actions without City Notices of Violation or Orders to Comply. Based on this, NASE has advocated for stronger conditions and annual inspections so that violations can be documented and there is strong evidence in place to shut down well sites when there are serious ongoing violations.

Further, since it is highly unusual for a Council District to file an appeal of a ZA Determination, something we have not previously observed in the City, we have several questions regarding this process. First, since there already had been an appeal of the ZA Determination filed by a local community organization at the time the CD5 appeal was filed, NASE is curious as to why CD5 chose to file its own appeal instead of supporting NASE's appeal and/or providing its recommendations at the APC hearing. Is there an additional benefit to CD5 filing its own appeal? Additionally, how does the City process work when a representative of the City appeals a City determination in its official capacity? For example, would this appeal result in any conflicts if the matter is further appealed to the City Council?

NASE has received questions from community members about the substance of the CD5 appeal and the unusual circumstance of a Council District becoming an appellant against a ZA decision. In addition to sending you this letter to try to correct errors that could detract from the strength of the case to overturn the ZA ruling, NASE also wants to alert you that it is being asked questions which will require responses.

III. Support for NASE Appeal.

As a community organization representing the interests of the community surrounding the West Pico Drill Site, NASE requests that CD5 support our appeal of the ZA Determination, specifically the following proposals:

- As discussed above, NASE's appeal details that the 2000 ZA approval and permits that rely upon it should already be deemed void under the LAMC 11.02 because the split of the drill site in that approval violates the clear prohibition on more than one drill site in Oil Drilling District U-131.

- Require revision of Condition 72 because it allows for redrilling of wells without full discretionary ZA review, in contradiction with LAMC sections 13.01.H, 13.01.I and ZA Memo 133.

- Require, per Professor Salman's April 22, 2021 letter to ZA, the immediate plugging of all idle wells and any illegally drilled, redrilled or converted wells and impose a new condition ordering that wells that go idle for two years in the future must be plugged in the third year.

Conclusion

We hope this letter helps identify NASE's concerns in the appeal process. We also look forward to your responses and finding a path to effective advocacy for a strong appeal case that can bring real changes and relief from impacts to the community. Further, NASE has received questions from the community regarding the CD5 appeal. We believe this letter and your responses will assist in addressing those questions.

Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer

Dylan Sittig <dylan.sittig@lacity.org>

PCEC West Pico Project

Michael Finch <mfinch@energyprojectllc.com> Fri, Jun 19, 2020 at 4:34 PM
To: Edber Macedo <edber.macedo@lacity.org>
Cc: "Lisa.Webber@lacity.org" <Lisa.Webber@lacity.org>, "Estineh.Mailian@lacity.org" <Estineh.Mailian@lacity.org>, "Vanessa.Soto@lacity.org" <Vanessa.Soto@lacity.org>, "Jennifer.Tobkin@lacity.org" <Jennifer.Tobkin@lacity.org>, Dylan Sittig <dylan.sittig@lacity.org>, Philip Brown <philip.brown@pceclp.com>, "Rick Clark (rick.clark@pceclp.com)" <rick.clark@pceclp.com>

Edber, per our conversation here is our thoughts on the items we discussed.

PCEC was recently contacted by a member of the public and several issues and outstanding questions have been brought to our attention, including (1) whether the wells that have been drilled, re-drilled, and/or converted since the 2000 ZA approval required further ZA approval under LAMC 13.01H and 13.01I; (2) whether activities such as drilling, re-drilling, and/or converting wells underwent adequate CEQA review as part of the EIR process for the 2000 ZA approval; and (3) whether Condition #1 of the 1965 ZA 17683 and Condition #B-49 of the 2000 ZAD 17683 need to be modified to reflect that onsite generation of power is occurring on the production site.

With regard to the first issue, after reviewing our well files, and the 2000 ZA determination, it is clear that certain wells have been drilled, re-drilled and converted since that approval – see "Well List" below. In light of LAMC 13.01H and 13.01I, a question has surfaced regarding whether these well activities required further authorization or approval by the ZA. We have not seen any approvals by the ZA and our conclusion is that applications were likely never submitted to the City. We believe this was because of Condition 72 of the 2000 ZAD 17683 determination which states in part *"Without prior written approval from the Zoning Administrator, no more than the existing 69 wells may be drilled, operated or maintained at the site and these wells shall be located at their current surface locations."* This condition suggests that the 2000 ZA approval covered a total of 69 wells and, provided the facility did not exceed the 69 wells, no further ZA approvals for drilling and redrilling were required. However, it appears the facility may not have had 69 existing wells at the time of the determination. This may have been a misunderstanding during the determination between well "slots" vs actual wells. In any event, a question now exists regarding whether the wells that have been drilled, re-drilled, and/or converted since the 2000 ZA approval required further ZA review and approval pursuant to LAMC 13.01H and 13.01I.

A follow along question concerns the scope of environmental review done for the 2000 approval and whether the review covered specific well activities. It's been suggested that as part of the 2000 approval (drill site modernization project) the activity of drilling, redrilling, and converting wells may not have been covered as part of the EIR process. Rather, the 2000 approval covered only construction of the perimeter walls and a permanent derrick, not drilling or well conversions, because apparently these activities were not part of the project description. If this is accurate, a question now exists regarding the adequacy of the currently proposed Categorical Exemption, and whether additional environmental review should be conducted to cover not only past well activities, but also those that are likely to occur in the future.

The last item is the installation of the microturbine. PCEC identified the installation of the microturbine in its February 2020 application to the City. This installation occurred in 2018 and PCEC obtained a SCAQMD permit, LA building permit, and a LA DWP permit. The 1965 ZA 17683 case Condition #1 included a provision, among others, requiring the project to comply with LAMC 13.01F(b)43.

13.01F(b)43 provides:

That drilling, pumping and other power operations shall at all times be carried on only by electrical power and that such power shall not be generated on the controlled drilling site or in the district.

In addition, 2000 ZAD 17683*Condition B-49* provides:

All Electric Power. All drilling and reworking operations at the site shall at all times be carried on only by electric power and such power shall not be generated on the controlled drilling site or in the district.

The 2000 ZAD 17683 Condition B-49 seems to suggest that power generation cannot happen at the controlled drill site or in the district for drilling and reworking operations, therefore the implication would be that this condition would not be applicable to the production operations.

The facility has two separate power meters. One is dedicated to the drill site and the other the production site. The microturbine is dedicated to the production site only. A question now exists whether Condition #1 of the 1965 ZA 17683 and Condition #B-49 of the 2000 ZAD 17683 need to be modified to reflect that onsite generation of power is occurring on the production site.

PCEC is working with historical documents and realize the City may have more insight. We are asking if the wells drilled, re-drilled, and converted since 2000 required a permit under 13.01H and 1301I? Also, did activities such as drilling, re-drilling, and/or converting wells undergo adequate CEQA review as part of the EIR process for the 2000 ZA approval, or is further review now required? Finally, does Condition #1 of the 1965 ZA 17683 and condition #B-49 of the 2000 ZAD 17683 need to be modified to reflect that onsite generation of power is occurring on the production site. If the answers to any of these questions is yes, then we would like to meet to discuss and decide how to address and reconcile these issues as part of the current process. We look forward to any guidance you can give us.

Thank you

Well List

STATEMENT OF REASONS FOR APPEAL;
Case No. ZA-1989-17683
ENV-2020-1328-CE

On behalf of Neighbors for A Safe Environment (NASE), a California nonprofit corporation seeking to protect neighborhoods from the impacts of oil drilling and production, we provide this summary of our reasons for appeal of the Plan Approval determination for 9101 West Pico Boulevard. Additional details regarding these legal violations and proposals to address those violations are included in the referenced attachments to this statement of reasons.

The overarching failing of the June 2, 2021 Zoning Administrator (ZA) Determination is that, while it recognizes some of the many legal violations on the site and says at one point that "the current conditions…may not be completely adequate to preserve the health, safety and general welfare of the nearby residential neighborhood," it fails to impose or revise any conditions to ensure these violations and impacts are rectified. Indeed, the headline of the ZA Determination and the effective part of the ruling is a statement that the site is and has been "substantially" in compliance – a statement that the rest of the ZA Determination undermines. The ZA Determination also fails to address many of the most serious violations at 9101 and 9151 West Pico Boulevard. The continuing lack of oversight, investigation, and any consequences for years of illegal activity allowed by the ZA Determination is a green light for all oil companies to ignore City law and CEQA at all drill sites in the City. That endangers not just the public living around the West Pico Drill Site, but also sets precedent that will endanger all communities living around oil drill sites throughout the City.

A. Violation of Conditions of Approval

The June 2, 2021 ZA Determination acknowledges that the operator is in violation of a number of conditions of approval for the site, including Conditions 36, 39, 49 and 72. In addition, there are also violations of Conditions 46, 47, 53, 57, 61 and 78 due to the odor impacts experienced by the community, documented improper waste disposal, noncompliance with fire safety requirements, and lack of timely conditions review which has led to many of the impacts identified herein. (See Attachment 1, August 24, 2020 NASE Letter to ZA.)

The ZA Determination identifies a number of these violations, but then reverses itself and makes the overarching finding that there is substantial compliance with conditions of approval. This fails to "bridge the analytic gap between the raw evidence and ultimate decision," requiring the determination to be set aside as unsupported. (*Topanga Assn. for a Scenic Community v. County of Los Angeles* (1974) 11 Cal.3d 506, 515.)

This failure to ensure compliance with conditions of approval is also a violation of the California Environmental Quality Act (CEQA). "Mitigating conditions are not mere expressions of hope." (*Lincoln Place Tenants Ass'n v. City of Los Angeles* (2005) 130 Cal.App.4th 1491, 1508.) CEQA requires mitigation measures to be concrete and enforceable. (Pub. Resources Code § 21081.6(b).)

B. Los Angeles Municipal Code Violations

In correspondence with the ZA's office, NASE identified several ways in which actions at the site violate plain requirements and prohibitions for oil drilling and production contained in the City's Municipal Code. (Attachment 1.) The ZA Determination includes factual conclusions that concur with several of the Municipal Code violations identified by NASE, but does not require any corrective actions, instead allowing them to continue without any consequences.

As identified by NASE, the Zoning Administrator and the operator have been in violation of Los Angeles Municipal Code (LAMC) § 13.01.E.2.b since the 2000 approval in ZA-1989-17683-PAD because only one Controlled Drill Site can exist in Oil Drilling District U-131. The current ZA Determination in ZA-1989-17683-PA2 continues to insist there are two sites, despite having been shown the pertinent code and the record of ZA determinations from the opening of a single Controlled Drill Site in 1965 until the error of the ZA-1989-17683-PAD in 2000 purporting to see two distinct sites.

The Controlled Drill Site was established by Case No. ZA-17683 in 1965 and defined as a single site spanning lots on both sides of Oakhurst Drive. The Controlled Drill Site was established on two City blocks from the outset, and established as a single integrated Controlled Drill Site as per LAMC 13.01. Here is the legal description and identification of the two-block Controlled Drill Site authorized by Case No. ZA-17683 in 1965:

Re: Z. A. CASE NO. 17683
N'ly of Pico Blvd.
E'ly & W'ly of Oakhurst Drive
Oil Drilling District
No. U-131
D. M. No. 5484

Greetings:

In the matter of the application of Occidental Petroleum Corporation, owners and lessees, for approval of a controlled drill site and for determination of conditions and methods of operation to be followed in drilling for and production of oil and gas on a site consisting of two sections classified in the C2, R3 and R4-1 Zone in Oil Drilling District No. U-131, please be advised that based upon the Findings of Facts hereinafter set forth and by virtue of authority contained in Section 13.01-E, F and H of the Municipal Code, the Chief Zoning Administrator hereby authorizes the use of a site comprising:

Lots 883-888, inc., and Lots 1035 and 1036, Tract 6380, located northerly of Pico Boulevard and extending from Doheny Drive to include the northwesterly corner of Oakhurst Drive, Beverlywood District,

as a controlled drill site on which to drill wells and conduct surface operations in connection with the development and bottoming of wells under Oil Drilling District U-131, consisting of that 70-acre drilling district depicted and described on the map which is a part of Ordinance No. 130340, as well as for surface operations in connection with wells which by subsequent action may be authorized to be bottomed under adjoining and adjacent districts, and also

That drill site was then extended to include the street front on Pico Boulevard from Oakhurst to Cardiff in 1967 pursuant to Case No. ZA-18893 to form one larger site.

The 2000 ZA approval in ZA-1989-17683-PA2 incorrectly asserts that Case No. ZA-18893 created two separate sites. Not only is the existence of two sites in District U-131 forbidden by LAMC 13.01.E.2.b, but the header and opening paragraph of Case No. ZA-18893 from 1967 also make it clear that there was only one drill site:

Re: Z.A. CASE NO. 18893
Northeasterly corner
Pico Bl. & Cardiff Av.
Expansion of existing
controlled drill site.
O. D. District U-131
D. M. No. 548

Greetings:

In the matter of the application of Rose Fink, current owner, and Occidental Petroleum Corporation, optionee, owner-operator and lessee, for Determination of Conditions and Methods of Operation to be followed in expansion to the west on three C2 zoned lots, the production facilities portion of the existing previously authorized controlled drill site in Oil Drilling District U-131, please be advised that based upon the Findings of Fact hereinafter set forth and by virtue of authority contained in Section 13.01-E, F and H of the Municipal Code, the Chief Zoning Administrator hereby authorizes an extension of the controlled drill site approved under Z. A. Case 17683 onto Lots 1037, 1038 and 1039, Tract No. 6380 located at the northeasterly corner of Pico Boulevard and Cardiff Avenue so that the enlarged controlled drill site will comprise:

Lots 883-888, and Lots 1035-1039, Tract 6380 located northerly of Pico Boulevard between Doheny Drive and Cardiff Av., Beverlywood District;

Thus, the drill site was not split until the 2000 ZA approval. The terms of LAMC § 13.01.E.2.b have been in effect continuously since February 1945. An approved Controlled Drill Site is the only kind of land use entitlement that allows for oil production activity in areas Zoned "O." Only one Controlled Drill Site is allowed per 40 acres of Oil Drilling District and the subject district, U-131, has only 70 acres. Two sites are not allowed by code and ZA-1989-17683-PAD created two sites in violation of the LAMC. Approvals, such as ZA-1989-17683-PAD, that are issued in violation of the LAMC "shall be void" as per LAMC § 11.02. Thus, the

split was illegal when it occurred, remains illegal, and the ZA Determination in ZA-1989-17683-PA2 is fatally flawed by this and other errors. (See Attachment 1.)

The operator is also in violation of LAMC § 13.01.F.26 due to the installation of micro-turbines at 9151 West Pico Boulevard. The ZA Determination acknowledges this violation, but does not impose any remedial conditions or required environmental review. Instead, the "Staff Review" section of the determination suggests an application for the micro-turbines is required to be submitted, proposing segmented or piecemealed cases to possibly take the place of a single larger review that could view the entirety of violations, deficient conditions, and at least 25 projects executed illegally. Splitting this up into smaller bites obscures the totality of environmental impacts and violates CEQA's requirement that the whole of a project—"all phases of project planning, implementation, and operation"—are to be considered when assessing environmental review for a project. (CEQA Guidelines §15063, subd. (a)(1).)

Further, Condition 72 is in direct contradiction with LAMC §§ 13.01.H and 13.01.I because it allows redrilling of wells without a full discretionary review by the ZA, which has been expressly required by Code since at least 1955. The ZA Determination acknowledges this contradiction but fails to require any revision to the condition and compounds the error further in its unsupported interpretation of this condition. Condition 72 speaks only of "redrilling"; it does not mention drilling of new wells or conversion of wells between Class A and Class B (i.e., production and injection). The ZA Determination nevertheless stretches the already illegal Condition 72 to cover new wells and converted wells. Since 2000, the site operator has drilled 2 new wells, redrilled 12 existing wells, and converted 10 wells between Classes A and B, all without application to the ZA. The site operator admitted this to the ZA in writing on June 19, 2020. LAMC 13.01.H and 13.01.I plainly require full application to the ZA for review and approval of all of these activities. Since at least 2000, it has been standard practice for ZA's to hold public hearings on all such applications. Since 2016, ZA Memo 133 has explicitly required that public hearings be held, and has forbidden projects to drill, redrill, or convert wells from receiving a categorical exemption from environmental review.

Despite these clear requirements, the ZA Determination claims that all illegal well projects, including even new wells and well conversions, should be handled by the inadequate and illegal procedure set out in Condition 72. No corrective conditions, review of oil well projects, or any type of enforcement is proposed. Instead, the ZA Determination requires only that all filings to the California Department of Oil, Gas and Geothermal Resources be submitted to the ZA Office. This not only fails to address the 24 unapproved oil well projects on the West Pico Drill Site executed since 2000, it compounds and expands the illegality of the 2000 approval. It endangers all communities living near all oil drill sites in City by setting a precedent to ignore the scant legal protections that they have had.

Additionally, because the 2000 ZA approval for the site was issued in violation of these Municipal Code provisions, the 2000 approval, and all subsequent approvals and City permits that rely upon it, should be deemed void pursuant to LAMC § 11.02. (See Attachment 2, March 23, 2021 NASE Letter.)

C. Violation of 2001 Settlement Agreement

The ZA Determination acknowledges the City's and operator's violation of the 2001 settlement agreement with NASE due to the failure to conduct the required five-year reviews for the site. The only reason the current review was commenced was based on a demand from NASE for the City to do so. While the ZA Determination states that the City will continue with the required reviews going forward, this fails to address the impacts to NASE and others in the surrounding community that resulted from the many years the reviews were not conducted and there were numerous violations as the site. Moreover, the current Plan Approval review fails to meet the requirements of the 2001 settlement agreement because there are no corrective conditions imposed or modification of existing conditions to address the ongoing issues at the site. The Zoning Administrator stated at public hearings for this Plan Approval review that the adequacy of conditions would not be evaluated, which violates the Settlement Agreement use of Condition 78 to set the scope and process for 5 Year "Reviews of Conditions" that "evaluate the efficacy of mitigation measures" and change them if warranted. This Plan Approval review did not even consider writing the Settlement Agreement's requirement of cyclical 5 Year Reviews of Conditions into a new a condition, despite an acknowledgment by the ZA Determination and in statements at public hearings that the ZA office had failed to hold these required reviews.

D. California Environmental Quality Act Violations

The ZA Determination improperly relies on Class 1 and Class 21 categorical exemptions to avoid environmental review under CEQA. The interpretation of the language of the guidelines implementing CEQA or the scope of a particular CEQA exemption presents "a question of law, subject to de novo review" by a court. (*Fairbank v. City of Mill Valley* (1999) 75 Cal.App.4th 1243, 1252; *Azusa Land Reclamation Co. v. Main San Gabriel Basin Watermaster* (1997) 52 Cal.App.4th 1165, 1192.) "[A categorical] exemption can be relied on only if a factual evaluation of the agency's proposed activity reveals that it applies." (*Muzzy Ranch Co. v. Solano County Airport Land Use Com*. (2007) 41 Cal.4th 372, 386.) "[T]he agency invoking the [categorical] exemption has the burden of demonstrating" that substantial evidence supports its factual finding that the project fell within the exemption. (*Ibid*.) The City has not met this burden.

First, the ZA Determination is essentially using a Class 1 exemption to legitimize years of illegal actions, which this exemption is not intended to do. Reliance on this categorical exemption and the ZA's willful blindness to noncompliance with requirements to apply to the ZA for discretionary approval of oil well projects incentivizes all oil companies operating in the City to evade application and review for projects in the future. Exempting these unapproved oil well projects from environmental review based on ongoing illegal activities piles illegality on top of illegality. Moreover, it deprives the public and decision makers of information necessary to assess the Project's impacts.

A Class 21 exemption exempts enforcement actions from environmental review. The ZA Determination fails to acknowledge the significant irony in relying on this exemption after identifying noncompliance but imposing no corrective enforcement actions.

Moreover, to the extent this Plan Approval reviewed any of the illegal drilling, redrilling, and converting of wells that has been conducted at the site since 2000, the City is prohibited from relying on a categorical exemption by its own CEQA guidelines in ZA Memo 133. (Attachment 3, ZA Memo 133.)

Exceptions to reliance on a categorical exemption also apply. CEQA prohibits use of a categorical exemption when there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances." (CEQA Guidelines § 15300.2, subd. (c).) The ongoing legal violations on the site are unusual circumstances and those unusual circumstances have led to and will continue to lead to adverse air quality, odor, noise and other impacts on the surrounding community.

For all of these reasons, and those to be presented in more detail before the West Los Angeles Area Planning Commission, this appeal seeks to overturn this Plan Approval until: all illegal projects executed at the site are reviewed in accordance with City and State law; the efficacy of mitigation measures and all conditions are properly reviewed in accordance with the Settlement Agreement, Condition 72, and CEQA; and mitigation measures have been imposed to address ongoing impacts and the site is in legal compliance. NASE also reserves the right to provide supplemental evidence and analysis regarding the basis of this appeal.

Re: ZA-1989-17683-PA2; Need for Comprehensive Review of Conditions at the West Pico Drill Site (9101 & 9151 W Pico Blvd, Los Angeles, CA 90035) to Address Numerous Legal Violations and Community Impacts

Dear Mr. Irving,

On behalf of Neighbors for A Safe Environment (NASE), a California nonprofit corporation, we seek to address ongoing and emerging legal violations at the West Pico Drill Site (9101 & 9151 West Pico Blvd, Council District 5) that have led to a failure to provide necessary protections to the community surrounding this drill site. NASE has extensively communicated with the Zoning Administrator (ZA) and documented the bases of its concerns. NASE has also cooperated with the operator of the West Pico Drill Site, the Pacific Coast Energy Company (PCEC), and together with PCEC presented a set of practical solutions to the ZA. We urge the City to implement the reasonable and viable remedies we have previously presented and which are outlined below.

Unfortunately, thus far, the City has failed to act on the remedies NASE has proposed, including NASE's request for a Review of Conditions as per the procedures required by the 2001 Settlement Agreement between NASE, the City and the West Pico Drill Site operator and Condition 78 of the 2000 approval in ZA-1989-17683-PAD. Additionally, despite clear requirements in the City's Municipal Code and ZA Memo 133 for discretionary approval supported by environmental review for any oil well drilling, redrilling or conversion project, the City persists in relying on inapplicable categorical exemptions from the California Environmental Quality Act (CEQA) for approvals. Thus far, the City has also refused to impose

necessary modification of conditions to correct a great many ongoing violations of CEQA and City law by the City, as well as by the current and prior site operators.

NASE has retained our firm to make another effort to convince the City to bring its own practices of land use regulation and petroleum administration into compliance with the 2001 Settlement Agreement, CEQA, and City law. This letter outlines the remedies that would achieve those simple goals and provide necessary protection for the surrounding community. It also gives the City notice that if persistent violations are not rectified, NASE is prepared to seek legal remedies to require compliance with the Settlement Agreement and enforce CEQA and City law. We hope that the City will prefer to open discussion about a reasonable set of remedies.

A. NASE Urges the City to Adopt Remedies to Address Legal Violations and Impacts to the Community.

From its initial communication with the Chief ZA in November 2019 up until now, NASE has asked for only modest and eminently viable remedies to alleviate impacts to the community and ensure compliance with the law. NASE has requested that ZA-1989-17683-PA2 be a Review of Conditions, as mandated by the 2001 Settlement Agreement and Condition 78 of the 2000 approval in ZA-1989-17683-PAD. Pursuant to the 2001 Settlement Agreement and Condition 78, the review must:

- examine the West Pico Drill Site's compliance with conditions of approval;
- assess "neighborhood impacts;" and
- evaluate the "efficacy of mitigation measures," with modification of the mitigation measures and/or corrective measures "if warranted."

As set forth herein, this Review of Conditions must be comprehensive, legally compliant and must impose new conditions to address ongoing violations and impacts and correct significant errors in the 2000 approval for the West Pico Drill Site.

1. The Review of Conditions Must Include a Comprehensive Compliance Inspection.

The Review of Conditions for the West Pico Drill Site needs to be prefaced by a Comprehensive Compliance Inspection led by the Office of the Petroleum Administrator. This Review of Conditions should follow the example of the one and only Comprehensive Compliance Inspection of an oil drill site ever conducted by the City—the Rancho Park Drill Site inspection conducted in March/April 2017. Only a full inspection by a qualified professional can fully define the scope of the project in the current review. Thus, the inspection is necessary to

inform compliance with conditions of approval, CEQA clearance and, by the same measure, inform the ZA and the public regarding corrective measures that should be required.

2. The City Must Comply with ZA Memo 133 in its Review of Conditions By Requiring CEQA Review for the Projects on the Drill Site.

The Review of Conditions for the West Pico Drill Site must be compliant with CEQA and with the City's own guidelines in ZA Memo 133. It has been established beyond the shadow of a doubt that mitigation measures from the 2000 approval and its associated EIR have failed to protect the community. Odor complaints from the community are well document and are matched by testimony from Council Member Paul Koretz. The Los Angeles Fire Department also imposed citations on the operators of the West Pico Drill Site for leaving petroleum exposed on surfaces in 2017 and 2018.

Multiple conditions from the 2000 approval have been violated, and the City has failed to enforce mitigation measures established through the associated EIR. Conditions 46, 47, 53, 57, 61, 72, and 78 (concerning odors, nuisance, good oil field practices, redrilling, and reviews of conditions) have all been violated. "Mitigating conditions are not mere expressions of hope." (*Lincoln Place Tenants Ass'n v. City of Los Angeles* (2005) 130 Cal.App.4th 1491, 1508.) CEQA requires mitigation measures to be concrete and enforceable. (Pub. Resources Code § 21081.6(b).) From at least 2006 to the present the ZA and the City have failed to monitor or enforce these conditions in violation of CEQA.

In addition to those ongoing CEQA violations by the City, PCEC has stepped forward to do honest research on projects executed at the site since 2000. PCEC agrees with NASE that there have been 25 unapproved projects, including 24 projects on oil wells that require discretionary review by the ZA according to City code, and thus CEQA clearance by State law. ZA Memo 133 directly states that proposals to drill, redrill, or convert wells are ineligible for categorical exemptions under CEQA. The 25 unapproved projects and the obvious need to revise mitigation measures makes reliance on categorical exemptions utterly improper. An Initial Study and an MND are required, at minimum, and that is what NASE requests.

3. The Continuing Impacts to the Community Demonstrate a Need to Impose New Conditions Through the Review of Conditions.

The ongoing impacts to the community surrounding the West Pico Drill Site, and the numerous violations of existing conditions of approval, demonstrate a clear need to impose new conditions through the Review of Conditions process to prevent these problems from continuing.

Based on NASE's familiarity with the impacts to the community and the existing conditions, it is our position (supported by PCEC) that the following new conditions must be adopted:

- Annual Compliance Inspections led or overseen by qualified professional staff in the Office of the Petroleum Administrator.

- Permanent 24/7 Emissions Monitoring, with recorded data that is reported to the Petroleum Administrator, the ZA, and the public on a quarterly basis.

- Incorporation of the requirement of cyclical Five Year Reviews of Conditions from the 2001 Settlement Agreement into the ZA conditions for the site, using the full procedures delineated in Condition 78 of the 2000 approval as per the Settlement Agreement.

- Immediate Emergency and Accident Reporting to the City (to LAFD, the Petroleum Administrator, and the local Council office) for any emergency or accident that must be reported to any Federal, State, or regional agency.

The need for additional conditions may be identified through the comprehensive compliance inspection as well.

4. The Review of Conditions Must Correct Several Errors from the 2000 Approval.

The Review of Conditions for the West Pico Drill Site must also correct significant errors from the 2000 approval that are inconsistent with City law, the actual record of approvals for the site, and the facts of what actually exists at the site. Those errors include:

- **Delete Condition 72 to Eliminate its Contradiction with LAMC 13.01.H and 13.01I.** This condition addressing "redrilling" directly contradicts the provisions of Los Angeles Municipal Code sections 13.01.H and 13.01.I. Both of these sections require discretionary approval by the ZA before any oil well is drilled, redrilled, or converted between producer and injection well. The contradiction may have contributed to the rash of unapproved projects at the site since 2000, including the redrilling of 12 wells since 2000 without ZA review, approval, or CEQA clearance. Condition 72's undermining of LAMC 13.01.H and 13.01.I on drilling and redrilling wells may have also contributed to the conversion of 10 wells since 2000 without ZA review, approval, or CEQA clearance per the requirements of ZA Memo 133.

- **Correct the Number of Existing Wells.** The 2000 ZA approval for the West Pico Drill Site incorrectly asserts that 69 wells existed at the site in 2000 and that 69 wells had been approved. Only 59 wells currently exist at the site, and only 57 existed in 2000. Only 57 wells have been approved for the site by the ZA. The ZA's error in 2000 reflected a lack of knowledge about the drill site, a lack of knowledge about the difference between a well cellar and a well, and a failure to cross-check with State records from DOGGR (now CalGEM) even as the ZA wrote conditions requiring that all monitoring agencies need to be consulted. This error may have contributed to the drilling of unapproved wells without CEQA clearance in 2005 and 2010.

- **West Pico Drill Site Includes Both 9101 and 9151 West Pico Blvd as a Single Controlled Drill Site.** The 2000 approval improperly split the single integrated "Controlled Drill Site" into two sites because the operator in 2000 proposed a construction project that would occur on only one half of the site. This error runs afoul of LAMC 13.01, especially 13.01.E.2.b. A Controlled Drill Site is the only kind of conditionally approved land use on which oil can be produced from wells and processed for sale. Only one Controlled Drill Site can exist in Oil Drilling District U-131, and only one has ever been approved: namely the West Pico Drill Site, approved in ZA-1965-17683. The ZA severed the unified Controlled Drill Site into two in 2000, leaving both without a legally sustainable basis for operation. This error also may have contributed to the improper installation of microturbines by obscuring the prohibition against electric generation on the Controlled Drill Site or anywhere in the Oil Drilling District that was written into the 1965 approval to establish the Controlled Drill Site. The 2000 approval, which completely rewrote and supplanted the 1965 approval, also prohibits electric generation at the West Pico Drill Site. By improperly splitting the Controlled Drill Site in two, the 2000 approval left the other half of the Controlled Drill Site without any approval or conditions in place.

B. These Remedies Are Necessitated by the Ongoing and Potential Legal Violations.

NASE has chosen to focus on remedies in this communication in a continuing effort to achieve relief for the community and legal compliance by the City. However, the description of the remedies, above, should provide you with an indication of some of the legal violations we may seek to challenge in court, if necessary. These include:

- Ongoing violations of CEQA for the City's failure to enforce mitigation measures from the EIR associated with the 2000 approval for the West Pico Drill Site.

- Failure to require CEQA review for discretionary, and recently discovered, well drilling, redrilling and conversion projects at the West Pico Drill Site.

- The proposed improper reliance on categorical exemptions for the current review of the West Pico Drill Site.

- Failure to enforce LAMC 13.01.H and 13.01.I by allowing operation of 25 unapproved oil well projects on the West Pico Drill Site.

- Violated LAMC 13.01.E.2.b by dividing the Controlled Drill Site into two sites in 2000.

- Breach of the 2000 Settlement Agreement due to the City's failure to conduct the required five-year reviews for the West Pico Drill Site for at least the last 10 years. No legally required reviews have been held during Councilmember Koretz's term in the City Council until NASE demanded this review in November 2019.

- The current ZA review process also appears to be running afoul of the requirements of the 2000 Settlement Agreement, CEQA and City regulations due to its improperly narrow focus and the ZA's stated position that the process would not result in the modification of any conditions.

Conclusion

The problems at the West Pico Drill Site are not isolated incidents and they are not unknown to City officials. The City has been negligent in its land use-based regulation of oil drill sites, failing to protect the communities impacted by these drill sites. It has never performed regular inspections to monitor for compliance with ZA-assigned conditions, and so mitigation measures routinely are not followed and not enforced. Similarly, the City continues to engage in a pattern and practice of handing out categorical exemptions from CEQA review for oil projects, contrary to the requirements of CEQA, ZA Memo 133 and LAMC 13.01.H and 13.01.I. Taken together, this pattern of negligence gives a green light to unapproved projects and turns a blind eye to poor work practices, all at the expense of communities the City is supposed to protect.

Most confounding here is the City's refusal to address environmental, health, and safety protections when an operating oil company comes forward to join with the community in asking the City to implement CEQA properly and to do inspections, require emissions monitoring, and perform serious reviews. This situation must be remedied. It is NASE's hope that the current ZA process can be revised to begin to address these ongoing issues, but if not, we are prepared to pursue available legal options.

Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer

Re: PRA Request R006330-120320 for West Pico Drill Site; Retention of Oil Permitting Records; and Permit Inspection Fees

Dear Mr. Uyemura, Mr. Terrazas and Ms. Crowley,

On behalf of Neighbors for A Safe Environment (NASE), a California nonprofit corporation seeking to protect neighborhoods from the impacts of oil drilling, we seek to address a partially outstanding Public Records Act (PRA) request from Professor Michael Salman regarding documents relating to permits for oil wells within the City of Los Angeles. We also seek to address the City's record retention policies for these and other related documents, as well as a lack of monitoring of oil drilling activities demonstrated by documents and other information that Professor Salman has received.

Outstanding Public Records Act Request

Professor Salman submitted PRA Request R006330 on December 3, 2020, requesting records pertaining to Los Angeles Fire Departments (LAFD) oil well operating permits for the wells at the West Pico Drill Site that are processed by the Office of Finance for the years spanning 2000 to 2020. This request was submitted to the Office of Finance after Professor Salman spent approximately two months trying to obtain these records from the LAFD. After several requests to LAFD, each supported by additional identifying information to help staff locate the records, LAFD personnel told Professor Salman that the Office of Finance was "the custodian for operational permits" and "the Custodian of Records" for those permits.

The Office of Finance has provided Professor Salman with pdf copies of operating permits for the years 2005-2020. We understand that the Office of Finance digitized records from the start date of 2005, and that paper records for earlier permits may not exist in the Office of Finance. We do not know whether copies of these earlier permits exist in the files of the LAFD, but to the extent they do, we request that any such records held by the LAFD please be produced in response to the several PRA requests that have been filed by Professor Salman.

While the Office of Finance has provided copies of operating permits identified above, it has not yet provided Professor Salman with copies of any communications with LAFD or LADBS or City Planning. It is our understanding that Finance is working with other City information technology agencies to determine if there are electronic records it can recover. If the Office of Finance cannot provide copies of these requested documents from its own files, then we request that the Office of Finance, as the Custodian of Records, please obtain copies from the LAFD Harbor Industrial Unit and from the LADBS and/or City Planning, where these communications originated.

Record Retention for Oil Well Permitting Documents

Professor Salman has received conflicting information from the Office of Finance and LAFD regarding the record retention policies of these departments for documents relating to oil well permits. PRA Request R006330 included a request for all applications, authorizations/rejections communicated by the LAFD and/or LADBS and/or Department of City Planning, communications with the LAFD and/or LADBS and/or City Planning,

communications with the operating oil company, and the permits themselves. There have been inconsistencies in responses to Professor Salman regarding how long the Office of Finance and LAFD retain these documents.

Given that it is unclear how long these documents will be retained under existing department procedures, this letter serves to put the Office of Finance on notice that these records must be retained due to the potential for litigation by NASE addressing oil well operating permits at the West Pico Drill Site. All records (paper, electronic, and on other media) pertaining to LAFD oil well operating permits for the wells at the West Pico Drill Site that are processed by the Office of Finance – including applications, authorizations/rejections communicated by the LAFD and/or LADBS and/or Department of City Planning, communications with the LAFD and/or LADBS and/or City Planning, communications with the operating oil company, and the permits themselves should be retained.

The Zoning Administrator, City Attorney, Petroleum Administrator and other City officials and staff have been advised of the potential for litigation concerning the City's actions and negligence at the West Pico Drill Site (9101 & 9151 W Pico Blvd, Los Angeles, CA 90035) and other similar sites where there has been a pattern and practice of violating City law and CEQA. Please see the attached letter to those City officials and staff, sent on August 24, 2020, in connection with a still open Planning Department case, number ZA-1989-17683-PA2. (Attachment 1.)

Below we set forth additional issues of concern by NASE regarding the City of Los Angeles's failure to monitor, implement, and enforce its own laws governing the operation of oil wells and oil drill sites, as well as the City's violation of the California Environmental Quality Act (CEQA), that are the subjects of potential litigation concerning the West Pico Drill Site and other drill sites within the City.

Renewal of Annual Operating Permits Despite Legal Violations.

LAFD Annual Operating Permits are required for oil wells. (Los Angeles Municipal Code (LAMC) 57.106.6.1, LAMC 57.106.6.3.2.) These Annual Operating Permits are conditioned upon an agreement "to comply with all regulations, laws, or ordinances pertaining thereto." (LAMC 57.105.3.9.1.2.) One such regulation is that: "No person shall drill, deepen or maintain an oil well or convert an oil well from one class to

the other and no permits shall be issued for that use, *until a determination has been made by the Zoning Administrator or Area Planning Commission* pursuant to the procedure prescribed in Subsection H of this section." (LAMC 13.01.I, emphasis added.)

There are currently 57 oil wells at the West Pico Drill Site. As the attached letter to the Zoning Administrator explains, since 2000 there have been 2 new wells drilled, 12 existing wells re-drilled, and 10 wells converted at the West Pico Drill Site, all without application to the Zoning Administrator and therefore without Zoning Administrator approval required by the LAMC and without environmental clearance required by CEQA. All of these wells have been granted LAFD operating permits and annual renewals, despite this failure to comply with City regulations and State law.

Non-compliance with City regulations at oil drill sites is a Citywide problem. For example, the Banning Semi-Controlled Drill Site in Wilmington, established in 2006, has approximately 220 wells and is one of the most troubled sites in the City. There are lengthy records of violations logged by DOGGR/CalGEM and SCAQMD, many of which also violate City law and Zoning Administrator assigned conditions restricting odors, fumes, noise and other nuisances. There have been projects executed without required Zoning Administrator approval, in violation of City regulations. The operator of this site applied for a slew of DOGGR permits to drill new wells in 2019, telling DOGGR that its 2006 Zoning Administrator approval and MND provided local approval and CEQA clearance, failing to disclose that the 2006 approval for drilling new wells was limited to a term of 12 years and expired in August 2018. Despite this, we believe that LAFD Annual Operating Permits for the Banning site in Wilmington are renewed year after year, in violation of the requirement for operator compliance "with all regulations, laws, or ordinances."

In addition to requiring operator compliance "with all regulations, laws, or ordinances," the LAMC also declares that: "Notwithstanding any other provisions of this Code or any other ordinance of the City of Los Angeles, no permit or license shall be issued in violation of any provisions of this Code or any other ordinance of the City of Los Angeles; if any permit or license is issued in violation of any provision of this Code or any other ordinance of the City of Los Angeles the same shall be void. Any permit or license issued, which purports to authorize the doing of any act prohibited by any other provision of this Code or any other ordinance of the City of Los Angeles, *shall be void*." (LAMC 11.02, emphasis added; LAMC 11.01 ["'Shall' is mandatory"].) To the extent

Annual Operating Permits were issued for unapproved or unlawfully approved projects or were issued or renewed despite violations of City regulations, they must be considered void.

Failure to Expend Permitting Renewal Fees for Intended Purpose

The violations of City and State law referenced above and the long history of non-compliance by the operators of the West Pico Drill Site and Banning Semi-Controlled Drill Site in Wilmington is traceable to the City's failure and refusal to do general compliance inspections and enforce its own laws.

The LAFD Annual Operating Permits are issued after a fee is paid, and a fee is required each year for the renewal of the LAFD Annual Operating Permits. These fees were established and are imposed by the City to cover the cost of annual compliance inspections for each drill site in the City. In fiscal year 2020-21, the permit fee was $1,290. For next year, the LAFD has requested and the City Council has agreed to increase the fee to $1,670. This is a cost per permit, and each oil well requires its own permit. The permit cost is calculated to pay for five "inspector hours" per oil well. (See Report from Board of Fire Commissioners," November 18, 2020 https://clkrep.lacity.org/onlinedocs/2020/20-1501_rpt_FC_11-18-2020.pdf, incorporated by reference.) The permit fee is expressly earmarked to pay for oil well inspections, and the permit is conditioned on compliance "with all regulations, laws, or ordinances."

These permitting fees result in significant revenue for the LAFD. There are approximately 1,100 oil wells in the City, so in 2020-21 more than $1.4 million was collected in operating permit fees. With the recently approved fee increase, next year the City will collect $1.8 million to pay for inspections. The West Pico Drill Site has 57 oil wells. In fiscal year 2020-21, $73,530 was collected in permit fees at this one drill site to cover the cost of compliance inspections. The Banning Semi-Controlled Drill Site in Wilmington has approximately 220 wells. In 2020-21, $283,000 of fees earmarked for LAFD compliance inspections of the wells was collected for the operating permits at this site.

Despite collecting significant annual renewal fees to cover the cost of compliance inspections for each oil well in the City, Professor Salman has been informed by LAFD that compliance inspections of each site have no connection to permit renewal. These renewals are approved automatically upon payment of the fee without any reference to

what might be found during inspections, as a matter of standard operating procedure. Indeed, LAFD operating permits have been renewed when there were open and unresolved Notices of Violation from the LAFD itself. Additionally, it is our understanding that the LAFD inspections that are performed look only for Fire Code violations and do not crosscheck approvals from the Zoning Administrator nor permitting and Notices of Violation from any other agency. Thus, when renewing the permits, LAFD has not verified operator compliance "with all regulations, laws, or ordinances."

Failing to expend permitting fees in the manner they were intended, to fund annual compliance inspections, appears to be a major contributing factor to the numerous drill site violations noted above and in the attached letter. Allowing non-compliance with City law by failing to inspect for non-compliance appears to be a continuing pattern and practice. This failure to perform fully-funded annual compliance inspections is particularly alarming given the potential dangers presented by poorly run and poorly regulated oil well operations that have been a subject of major concern in the City for years.

Conclusion

We look forward to your prompt response regarding the outstanding Public Records Act request by Professor Salman. NASE also urges you to carefully consider the legal issues and community concerns we have outlined above. Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer

Re: ZA-1989-17683-PA2; Need for Comprehensive Review of Conditions at the West Pico Drill Site (9101 & 9151 W Pico Blvd, Los Angeles, CA 90035) to Address Numerous Legal Violations and Community Impacts

Dear Mr. Irving,

On behalf of Neighbors for A Safe Environment (NASE), a California nonprofit corporation, we seek to address ongoing and emerging legal violations at the West Pico Drill Site (9101 & 9151 West Pico Blvd, Council District 5) that have led to a failure to provide necessary protections to the community surrounding this drill site. NASE has extensively communicated with the Zoning Administrator (ZA) and documented the bases of its concerns. NASE has also cooperated with the operator of the West Pico Drill Site, the Pacific Coast Energy Company (PCEC), and together with PCEC presented a set of practical solutions to the ZA. We urge the City to implement the reasonable and viable remedies we have previously presented and which are outlined below.

Unfortunately, thus far, the City has failed to act on the remedies NASE has proposed, including NASE's request for a Review of Conditions as per the procedures required by the 2001 Settlement Agreement between NASE, the City and the West Pico Drill Site operator and Condition 78 of the 2000 approval in ZA-1989-17683-PAD. Additionally, despite clear requirements in the City's Municipal Code and ZA Memo 133 for discretionary approval supported by environmental review for any oil well drilling, redrilling or conversion project, the City persists in relying on inapplicable categorical exemptions from the California Environmental Quality Act (CEQA) for approvals. Thus far, the City has also refused to impose

necessary modification of conditions to correct a great many ongoing violations of CEQA and City law by the City, as well as by the current and prior site operators.

NASE has retained our firm to make another effort to convince the City to bring its own practices of land use regulation and petroleum administration into compliance with the 2001 Settlement Agreement, CEQA, and City law. This letter outlines the remedies that would achieve those simple goals and provide necessary protection for the surrounding community. It also gives the City notice that if persistent violations are not rectified, NASE is prepared to seek legal remedies to require compliance with the Settlement Agreement and enforce CEQA and City law. We hope that the City will prefer to open discussion about a reasonable set of remedies.

A. NASE Urges the City to Adopt Remedies to Address Legal Violations and Impacts to the Community.

From its initial communication with the Chief ZA in November 2019 up until now, NASE has asked for only modest and eminently viable remedies to alleviate impacts to the community and ensure compliance with the law. NASE has requested that ZA-1989-17683-PA2 be a Review of Conditions, as mandated by the 2001 Settlement Agreement and Condition 78 of the 2000 approval in ZA-1989-17683-PAD. Pursuant to the 2001 Settlement Agreement and Condition 78, the review must:

- examine the West Pico Drill Site's compliance with conditions of approval;
- assess "neighborhood impacts;" and
- evaluate the "efficacy of mitigation measures," with modification of the mitigation measures and/or corrective measures "if warranted."

As set forth herein, this Review of Conditions must be comprehensive, legally compliant and must impose new conditions to address ongoing violations and impacts and correct significant errors in the 2000 approval for the West Pico Drill Site.

1. The Review of Conditions Must Include a Comprehensive Compliance Inspection.

The Review of Conditions for the West Pico Drill Site needs to be prefaced by a Comprehensive Compliance Inspection led by the Office of the Petroleum Administrator. This Review of Conditions should follow the example of the one and only Comprehensive Compliance Inspection of an oil drill site ever conducted by the City—the Rancho Park Drill Site inspection conducted in March/April 2017. Only a full inspection by a qualified professional can fully define the scope of the project in the current review. Thus, the inspection is necessary to

inform compliance with conditions of approval, CEQA clearance and, by the same measure, inform the ZA and the public regarding corrective measures that should be required.

2. The City Must Comply with ZA Memo 133 in its Review of Conditions By Requiring CEQA Review for the Projects on the Drill Site.

The Review of Conditions for the West Pico Drill Site must be compliant with CEQA and with the City's own guidelines in ZA Memo 133. It has been established beyond the shadow of a doubt that mitigation measures from the 2000 approval and its associated EIR have failed to protect the community. Odor complaints from the community are well document and are matched by testimony from Council Member Paul Koretz. The Los Angeles Fire Department also imposed citations on the operators of the West Pico Drill Site for leaving petroleum exposed on surfaces in 2017 and 2018.

Multiple conditions from the 2000 approval have been violated, and the City has failed to enforce mitigation measures established through the associated EIR. Conditions 46, 47, 53, 57, 61, 72, and 78 (concerning odors, nuisance, good oil field practices, redrilling, and reviews of conditions) have all been violated. "Mitigating conditions are not mere expressions of hope." (*Lincoln Place Tenants Ass'n v. City of Los Angeles* (2005) 130 Cal.App.4th 1491, 1508.) CEQA requires mitigation measures to be concrete and enforceable. (Pub. Resources Code § 21081.6(b).) From at least 2006 to the present the ZA and the City have failed to monitor or enforce these conditions in violation of CEQA.

In addition to those ongoing CEQA violations by the City, PCEC has stepped forward to do honest research on projects executed at the site since 2000. PCEC agrees with NASE that there have been 25 unapproved projects, including 24 projects on oil wells that require discretionary review by the ZA according to City code, and thus CEQA clearance by State law. ZA Memo 133 directly states that proposals to drill, redrill, or convert wells are ineligible for categorical exemptions under CEQA. The 25 unapproved projects and the obvious need to revise mitigation measures makes reliance on categorical exemptions utterly improper. An Initial Study and an MND are required, at minimum, and that is what NASE requests.

3. The Continuing Impacts to the Community Demonstrate a Need to Impose New Conditions Through the Review of Conditions.

The ongoing impacts to the community surrounding the West Pico Drill Site, and the numerous violations of existing conditions of approval, demonstrate a clear need to impose new conditions through the Review of Conditions process to prevent these problems from continuing.

Based on NASE's familiarity with the impacts to the community and the existing conditions, it is our position (supported by PCEC) that the following new conditions must be adopted:

- Annual Compliance Inspections led or overseen by qualified professional staff in the Office of the Petroleum Administrator.

- Permanent 24/7 Emissions Monitoring, with recorded data that is reported to the Petroleum Administrator, the ZA, and the public on a quarterly basis.

- Incorporation of the requirement of cyclical Five Year Reviews of Conditions from the 2001 Settlement Agreement into the ZA conditions for the site, using the full procedures delineated in Condition 78 of the 2000 approval as per the Settlement Agreement.

- Immediate Emergency and Accident Reporting to the City (to LAFD, the Petroleum Administrator, and the local Council office) for any emergency or accident that must be reported to any Federal, State, or regional agency.

The need for additional conditions may be identified through the comprehensive compliance inspection as well.

4. The Review of Conditions Must Correct Several Errors from the 2000 Approval.

The Review of Conditions for the West Pico Drill Site must also correct significant errors from the 2000 approval that are inconsistent with City law, the actual record of approvals for the site, and the facts of what actually exists at the site. Those errors include:

- **Delete Condition 72 to Eliminate its Contradiction with LAMC 13.01.H and 13.01I.** This condition addressing "redrilling" directly contradicts the provisions of Los Angeles Municipal Code sections 13.01.H and 13.01.I. Both of these sections require discretionary approval by the ZA before any oil well is drilled, redrilled, or converted between producer and injection well. The contradiction may have contributed to the rash of unapproved projects at the site since 2000, including the redrilling of 12 wells since 2000 without ZA review, approval, or CEQA clearance. Condition 72's undermining of LAMC 13.01.H and 13.01.I on drilling and redrilling wells may have also contributed to the conversion of 10 wells since 2000 without ZA review, approval, or CEQA clearance per the requirements of ZA Memo 133.

- **Correct the Number of Existing Wells.** The 2000 ZA approval for the West Pico Drill Site incorrectly asserts that 69 wells existed at the site in 2000 and that 69 wells had been approved. Only 59 wells currently exist at the site, and only 57 existed in 2000. Only 57 wells have been approved for the site by the ZA. The ZA's error in 2000 reflected a lack of knowledge about the drill site, a lack of knowledge about the difference between a well cellar and a well, and a failure to cross-check with State records from DOGGR (now CalGEM) even as the ZA wrote conditions requiring that all monitoring agencies need to be consulted. This error may have contributed to the drilling of unapproved wells without CEQA clearance in 2005 and 2010.

- **West Pico Drill Site Includes Both 9101 and 9151 West Pico Blvd as a Single Controlled Drill Site.** The 2000 approval improperly split the single integrated "Controlled Drill Site" into two sites because the operator in 2000 proposed a construction project that would occur on only one half of the site. This error runs afoul of LAMC 13.01, especially 13.01.E.2.b. A Controlled Drill Site is the only kind of conditionally approved land use on which oil can be produced from wells and processed for sale. Only one Controlled Drill Site can exist in Oil Drilling District U-131, and only one has ever been approved: namely the West Pico Drill Site, approved in ZA-1965-17683. The ZA severed the unified Controlled Drill Site into two in 2000, leaving both without a legally sustainable basis for operation. This error also may have contributed to the improper installation of microturbines by obscuring the prohibition against electric generation on the Controlled Drill Site or anywhere in the Oil Drilling District that was written into the 1965 approval to establish the Controlled Drill Site. The 2000 approval, which completely rewrote and supplanted the 1965 approval, also prohibits electric generation at the West Pico Drill Site. By improperly splitting the Controlled Drill Site in two, the 2000 approval left the other half of the Controlled Drill Site without any approval or conditions in place.

B. These Remedies Are Necessitated by the Ongoing and Potential Legal Violations.

NASE has chosen to focus on remedies in this communication in a continuing effort to achieve relief for the community and legal compliance by the City. However, the description of the remedies, above, should provide you with an indication of some of the legal violations we may seek to challenge in court, if necessary. These include:

- Ongoing violations of CEQA for the City's failure to enforce mitigation measures from the EIR associated with the 2000 approval for the West Pico Drill Site.

- Failure to require CEQA review for discretionary, and recently discovered, well drilling, redrilling and conversion projects at the West Pico Drill Site.

- The proposed improper reliance on categorical exemptions for the current review of the West Pico Drill Site.

- Failure to enforce LAMC 13.01.H and 13.01.I by allowing operation of 25 unapproved oil well projects on the West Pico Drill Site.

- Violated LAMC 13.01.E.2.b by dividing the Controlled Drill Site into two sites in 2000.

- Breach of the 2000 Settlement Agreement due to the City's failure to conduct the required five-year reviews for the West Pico Drill Site for at least the last 10 years. No legally required reviews have been held during Councilmember Koretz's term in the City Council until NASE demanded this review in November 2019.

- The current ZA review process also appears to be running afoul of the requirements of the 2000 Settlement Agreement, CEQA and City regulations due to its improperly narrow focus and the ZA's stated position that the process would not result in the modification of any conditions.

Conclusion

The problems at the West Pico Drill Site are not isolated incidents and they are not unknown to City officials. The City has been negligent in its land use-based regulation of oil drill sites, failing to protect the communities impacted by these drill sites. It has never performed regular inspections to monitor for compliance with ZA-assigned conditions, and so mitigation measures routinely are not followed and not enforced. Similarly, the City continues to engage in a pattern and practice of handing out categorical exemptions from CEQA review for oil projects, contrary to the requirements of CEQA, ZA Memo 133 and LAMC 13.01.H and 13.01.I. Taken together, this pattern of negligence gives a green light to unapproved projects and turns a blind eye to poor work practices, all at the expense of communities the City is supposed to protect.

Most confounding here is the City's refusal to address environmental, health, and safety protections when an operating oil company comes forward to join with the community in asking the City to implement CEQA properly and to do inspections, require emissions monitoring, and perform serious reviews. This situation must be remedied. It is NASE's hope that the current ZA process can be revised to begin to address these ongoing issues, but if not, we are prepared to pursue available legal options.

Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer

OFFICE OF ZONING ADMINISTRATION

MEMORANDUM

ZA MEMORANDUM NO. 133

September 19, 2016

TO: Office of Zoning Administration
Development Services Centers
Department of Building and Safety
Department of Public Works – Bureau of Engineering
Los Angeles Fire Department
Los Angeles Department of Water and Power

FROM: Linn K. Wyatt
Chief Zoning Administrator

SUBJECT: **APPLICATION AND PROCESSING REQUIREMENTS, INCLUDING CEQA REVIEW, FOR OIL AND GAS APPROVALS PURSUANT TO LOS ANGELES MUNICIPAL CODE SECTION 13.01-H.**

This Memorandum supersedes ZA Memorandum No. 94, dated December 12, 1994, and ZA Memorandum No. 94A, dated March 24, 2000.

This Memorandum is intended to establish a comprehensive set of procedures and policies for the acceptance and processing of applications for oil drilling approvals pursuant to Los Angeles Municipal Code (LAMC) Section 13.01-H and to establish City guidelines for the California Environmental Quality Act (CEQA) review of Section 13.01-H oil drilling applications.

I. Background

The LAMC requires a formal application and a filing fee in conjunction with a request for a determination of conditions for the conduct of oil drilling pursuant to LAMC Section 13.01-H. Other than the requirement for an application and payment of a filing fee, the LAMC contains no express procedural requirements for the determination of conditions under Section 13.01-H for an original approval or for a modification or clarification to a previously approved determination of conditions.

Z.A. Memoranda Nos. 94 and 94A

Historically, as described in ZA Memoranda Nos. 94 and 94A, applicants were permitted to apply for modifications to the original conditions for oil drilling approvals through the use of a more limited review process (similar to a plan approval under LAMC Section 12.24-L and M).

The use of the process outlined in Memoranda Nos. 94 and 94A is no longer permitted for any Section 13.01-H application, including those submitted as a determination of conditions, modification of condition, request for clarification, or related approval. All applicants seeking an approval under Section 13.01-H must follow the application procedures outlined in this Memorandum. All applications seeking any approval under Section 13.01-H will be processed by the City, including the Office of the Zoning Administrator, pursuant to this Memorandum.

Existing Approvals with Modification Procedures

In addition to the above historical process, there are existing active approvals which include conditions establishing a process for subsequent modifications or condition review. An example of one condition reads substantially as follows:

> *Drilling operations for the first X wells identified in the grant clause of the instant determination shall be completed within 36 months from the effective date of this determination. The drilling for the following X wells as hereby authorized shall be subject to a review of plans by the Zoning Administrator, without a public hearing, for the purpose of updating the record with the well identification and path.*

Another condition reads substantially as follows:

> *Review of Conditions. Two years following completion of construction… the applicant shall submit a Plan Approval application for reviewing the effectiveness of these conditions. … The applicant shall submit a 500-foot radius map with accompanying labels for owners and occupants. The Zoning Administrator may set the matter for public hearing if warranted.*

Both of these conditions include processes that are inconsistent with the processes established in this Memorandum. The first condition is inconsistent because it allows for modifications without a public hearing. The second condition is inconsistent because it allows the Zoning Administrator to not set a public hearing for a Plan Approval and implies the notice radius is 500 feet.

To the extent that any existing condition or grant in an existing approval gives the Zoning Administrator discretion in the process to be followed for a modification or condition review, the procedures in this Memorandum shall be followed, in accordance with the findings in Section II and the purpose statements in Section III.

To the extent that any existing condition or grant in an existing approval mandates a procedure that is inconsistent with this Memorandum, the Zoning Administrator shall consider whether a Plan Approval process shall be initiated by the City to revise any conditions to protect the public health, safety and welfare, including any condition establishing a process inconsistent with the purpose of this Memorandum. On the other hand, if an existing condition or provision is not modified through a Plan Approval, then the process outlined in the existing approval shall be followed.

Nothing in this Memorandum is intended to expand the authority the City has to initiate a Plan Approval.

II. Findings

In issuing this Memorandum, the Zoning Administrator makes the following findings:

A. In adopting the California Environmental Quality Act[1], the Legislature declared:

> It is the intent of the Legislature that all agencies of the state government which regulate activities of private individuals, corporations, and public agencies which are found to affect the quality of the environment, shall regulate such activities so that major consideration is given to preventing environmental damage, while providing a decent home and satisfying living environment for every Californian. (Public Resources Code Section 21000(g).

B. The CEQA Guidelines provide that CEQA's basic goal of protecting the environment has two purposes:

(1) avoiding, reducing, or preventing environmental damage where possible by requiring alternatives or mitigation measures; and

(2) providing information to decision-makers and the public concerning the environmental effects of proposed and approved actions. (CEQA guidelines 15002(a).)

C. One oft-repeated purpose of the CEQA Guidelines is to provide for public participation, including as set forth in Section 15201:

> Public participation is an essential part of the CEQA process. Each public agency should include provisions in its CEQA procedure for wide public involvement, formal and informal, consistent with its existing activities and procedures, in order to receive and evaluate public reactions to environmental issue related to the agency's activities. Such procedure should include, wherever possible,

[1] Public Resources Code, Sections 21000, *et seq*.

making environmental information available in electronic format on the Internet, on the web site maintained and utilized by the public agency.

D. Although CEQA does not require formal hearings at any state of the environmental review process, section 15202 provides that:

...

(b) If an agency provides a public hearing on its decision to carry out or approve a project, the agency should include environmental review as one of the subjects for the hearing.

(c) A public hearing on the environmental impact of a project should usually be held when the lead agency determines it would facilitate the purposes and goals of CEQA to do so. The hearing may be held in conjunction with and as part of normal planning activities.

...

(f) A public agency may include, in its implementing procedures, procedures for the conducting of public hearings pursuant to this section. The procedures may adopt existing notice and hearing requirements of the public agency for regularly conducted legislative, planning, and other activities.

E. Applications for oil and gas projects under LAMC Section 13.01-H have the potential to create unique risks and hazards to have the potential for significant and immediate impacts on the health, safety, and welfare of the residents in and around the project site through increased noise, odor, dust, traffic, and other disturbances, as well as the potential to significantly impact the City's air, water, soil, biological quality, geology, water, stormwater and wastewater infrastructure, transportation, emergency response plans and other aesthetic values and community resources.

F. People living and working within the land use and environmental impact range of oil and gas operations and activities have a substantial interest in participating in a public hearing on 13.01-H approvals.

G. Section 13.01-H provides authority for the Zoning Administrator to condition, approve or deny a Section 13.01-H application under the City's police powers to protect public health, safety and welfare and to issue and implement reasonable procedures to process Section 13.01-H applications consistent with the requirements for due process.

III. Purpose and Intent of Memorandum

This Memorandum is issued with the following intent:

- Ensure that the City complies with all legal requirements of CEQA in approving Section 13.01-H projects;
- Provide all parties that may be impacted by a project subject to a Section 13.01-H application an opportunity to participate in a public hearing;
- Meet the intent of CEQA in the review and approval of CEQA findings and determinations, to provide adequate public participation;
- Ensure that staff has time to adequately consider and respond to, if necessary, evidence submitted on a Section 13.01-H application and its related environmental findings (including the CEQA Guideline Section 15300.2 exceptions) prior to the issuance of any decision;
- Provide decision-makers and City Staff, and the public with the information and data needed for adequate decision-making under CEQA and Section 13.01-H;
- Ensure that Section 13.01-H applications are processed efficiently;
- Ensure that applicants, staff, and the public can rely on a consistent practice in reviewing Section 13.01-H applications;
- Provide for transparent disclosure and participation process; and
- Ensure that the city's processing and approvals pursuant to 13.01-H will not result in adverse effects to public health, safety, and welfare

IV. Application Requirements

The original case number shall be used for the plan approval request. Before an application may be deemed complete, the applicant must submit:

1) A completed "Land Use Application For Oil & Gas Project Conditional Approval" (CP Form CP-7834) with all required attachments, as specified in the application and the Instructions (CP Form CP-7833.)
2) A completed Environmental Assessment Form for Oil and Gas Projects (EAF-O, CP-7832), with all required attachments.
3) The filing fee pursuant to LAMC Section 19.01.

V. Processing Section 13.01-H Applications

A. CEQA Review

The following review procedures are intended to provide guidelines to implement CEQA on all Section 13.01-H applications. Nothing in this Memorandum or the guidelines provided herein are intended to conflict with CEQA. To the extent that these guidelines are silent or ambiguous, the Zoning Administrator shall fall back on the requirements and intent of CEQA. To the extent that these guidelines impermissibly conflict with CEQA, the provisions of CEQA control. Nothing in these Guidelines is intended to conflict with the Permit Streamlining Act, Gov't Code Section Government Code § 65920 et seq.

1. Preliminary Review for Exemptions

No categorical exemption forms will be processed for consideration or issued at the Planning Department Development Services. The applicant shall submit a complete EAF-O form with their application, which shall be reviewed by the Zoning Administrator. The Zoning Administrator will conduct a preliminary review to determine whether the application qualifies for an exemption from environmental review pursuant to CEQA. The Zoning Administrator may require the applicant to provide additional supporting materials from the applicant to support the use of a categorical exemption.

An application to drill, re-drill, deepen, or convert a well is not eligible for a categorical exemption and shall require an Initial Study or an EIR as described in section V.A.2. All other projects may be reviewed to determine if the project is exempt under any applicable categorical exemption in CEQA Guidelines Section 15300-15333 or any City Guidelines (adopted pursuant to CEQA). If a project is determined not to fall into any categorical exemption based on the project description, an Initial Study shall be prepared pursuant to section V.A.2. If the project falls within a categorical exemption, the Zoning Administrator shall determine if, based upon the whole of the record, any exception to any exemption under CEQA Guidelines, Section 15300.2, applies to the project, including, but not limited to the following:

> Cumulative Impact. All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant.
>
> Significant Effect. A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.

If the project is determined to be categorically exempt (CE) and no exceptions apply, the Zoning Administrator shall do all of the following:

- Give the public hearing notice required in section V.B., including a notice of an intent to adopt a categorical exemption to all property owners and occupants within a 1,500-foot radius of the project site's outer boundary, and provide for a 35-day comment period on the project, prior to approval. The public hearing may be held during the comment period. The hearing notice (with the notice of intent to adopt a CE) must be provided in English and Spanish.

- If after the 35-day comment period, or any time prior to making a decision on the project, the Zoning Administrator determines that substantial evidence does not support the use of the exemption, including from the existence of an exception in Section 15300.2, the Zoning Administrator shall require an Initial Study to be prepared consistent with the procedures outlined herein.

- Alternatively, if the Zoning Administrator finds after the 35-day comment period, or any time prior to making a decision on the project, that additional information and analysis is required to determine if the categorical exemption is supported with substantial evidence, and the applicant desires the City to use a categorical exemption rather than a prepare an Initial Study, the Zoning Administrator may require the applicant to submit additional information or documents and/or technical studies or reports, including requiring the applicant to hire independent consultants to prepare any necessary technical studies or reports or peer review any prepared studies or reports. If after reviewing any additional documents, reports or studies, required by the Zoning Administrator, it is determined that a categorical exemption is not supported by substantial evidence, an Initial Study shall be prepared.

- If the use of the categorical exemption is supported by substantial evidence in the record at the time of the decision, the Zoning Administrator shall ensure the record contains a memorandum or narrative substantiating the use of the categorical exemption, including explaining how substantial evidence in the administrative record supports the use of the exemption, and that the Zoning Administrator considered whether any exception to an exemption under CEQA Guidelines Section 15300.2 is applicable, including providing where necessary an explanation or evidence to demonstrate that any comments submitted on the intent to adopt the Categorical Exemption do not provide substantial evidence that an exception applies or the exemption does not apply.

2. Initial Study Determination

For any project that does not qualify for a categorical exemption, including any project to drill, redrill, or convert a well, an Initial Study must be completed.

Nothing in this subsection is intended to require the preparation of an Initial Study, when a preliminary review of the project demonstrates an EIR is clearly required, pursuant to CEQA Guidelines Section 15060(d).

The Initial Study must be prepared by an environmental consultant with the qualifications and experience required in this Memorandum. The Zoning Administrator may require the applicant to provide any additional documents, information or technical studies or reports necessary to complete the environmental review of the project, including requiring the applicant to hire an independent contractor to prepare or peer review technical studies or reports. The Initial Study shall comply with Section 15063 of the CEQA Guidelines and be prepared using Appendix G to the CEQA Guidelines and any City issued procedures or guidelines.

If the Initial Study shows both of the following Health Impact Assessment Criteria apply, the Zoning Administrator shall also require a Health Impact Assessment (HIA), as defined in Subsection V.A.5., before preparing the environmental clearance for the project:

- one or more of the air or hazards impact thresholds on Appendix G identified as III(a), III(b), III(d), VIII(a),VIII(b), VIII(c),or VIII(g) are found to be "less than significant impact with mitigation"; and
- the project is within 1,500 feet of any sensitive receptors, as defined by SCAQMD.

After the Initial Study is completed (and the HIA, if necessary), the Zoning Administrator will determine whether the proposed environmental clearance for the proposed project is a Negative Declaration (ND) or a Mitigated Negative Declaration (MND) or whether an EIR is required pursuant to sections 15065 or 15064 of the CEQA Guidelines.

If the Initial Study demonstrates that all of the impact areas will have no impact or less than significant impact, the Zoning Administrator may prepare a ND. (Note: if the Health Impact Assessment Criteria apply, a ND could not be prepared because the Initial Study identified significant impact requiring mitigation.)

If the Initial Study (and the HIA, if required) demonstrates that the project will not result in a significant impact with mitigation imposed, the Zoning Administrator may prepare a MND.

If the Initial Study (and the HIA, if required) demonstrates that the project may result in a significant impact to the environment that cannot be mitigated to less than significant, the Zoning Administrator shall require the preparation of an EIR. In determining whether an EIR is required, the Zoning Administrator shall review and consider all of the following CEQA Guidelines, without limitation to any other applicable requirements of CEQA:

- 15064 (guidelines on determining significant impacts),
- 15064.4 (guidelines on determining greenhouse gas impacts),
- 15064.5 (guidelines on determining cultural and archaeological impacts), and
- 15065 (guidelines requiring consideration of Mandatory Findings of Significance, including subsection (a)(4): "The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.")

If an ND or MND is issued, the Zoning Administrator shall publish a Notice of Intent to Adopt an ND or MND pursuant to CEQA Guidelines Section 15073, prepare the ND or MND findings (and the Mitigation Monitoring Program for a MND) and process the application pursuant to Section IV. The Public Hearing notice sent in section V.B. will include a statement that the City has published a Notice of Intent to Adopt an ND or MND and include a link to the City's website where the Notice of Intent is published. The Notice of Intent to Adopt an ND or MND shall be published on the City's website in English and Spanish.

If the Initial Study demonstrates the project requires an Environmental Impact Report (EIR), the Zoning Administrator shall follow the procedures in section V.A.3.

3. Environmental Impact Report

If an EIR is to be prepared on a project, in addition to any other requirements of CEQA, the City will require all of the following:

- Provide the Notice of Preparation to all property owners and occupants within a 1,500-foot radius of the project site's outer boundary; and
- Prepare a Health Impact Assessment, as defined in section V.A.5., if not already prepared, and provide a relevant summary of the Health Impact Assessment in the EIR where appropriate to inform the required analysis. The Health Impact Assessment shall be considered in any certification of the EIR and the approval, conditional approval, or denial of the Section 13.01-H application.

An environmental consultant with qualifications and experience provided in section V.A.4 must prepare the EIR. The EIR must be prepared and certified in compliance with CEQA, including but not limited, CEQA Guideline Sections 15080-15097, 15120-15155.

4. Environmental Consultant Qualifications

The City shall ensure that any environmental consultant that is preparing an Initial Study, MND, ND, or an EIR on a 13.01-H project has the following qualifications and experience:

- The Project Manager has at least seven (7) years' experience preparing CEQA documents.
- The Project Manager has prepared and/or reviewed at least five (5) EIRs for projects involving oil and gas drilling or production.
- The consultant or consultant team, including any subcontractors, have demonstrated training, knowledge, and experience in the following topic areas as they specifically relate to oil and gas projects: environmental health, public health, hazardous materials, air quality, GHG emissions, water quality, geology, noise, traffic, aesthetics, and risk and safety issues.
- In the case of EIRs or MNDs requiring Health Impact Assessments, the consultant team, including any subcontractors, has at least five (5) years' experience in preparing Health Impact Assessments. The consultant who prepares the HIA shall be familiar with accepted HIA process and content including, but not limited to, the "Minimum Elements and Practice Standards for Health Impact Assessment," Version 3.

The City shall ensure that all environmental consultants have copies of this Memorandum prior to preparation of any Initial Study, ND, MND or EIR.

5. Health Impact Assessment (HIA)

A HIA is defined as follows:

> A study of the project for the surrounding vicinity identifying pollution and population indicators, such as, but not limited to, those analyzed in the

California Communities Environmental Health Screening Tool; the number of people affected by the project; short term or permanent impacts caused by the project; likelihood that impacts will occur; and recommended mitigation measures.

Any HIA required under these procedures shall be used to inform whether an EIR is required and whether to approve, condition, or deny the application under Section 13.01-H.

B. Public Participation

The Zoning Administrator will hold a public hearing on all Section 13.01 applications prior to project approval.

Notice of this public hearing must be sent to all property owners and occupants within a 1,500-foot radius of the project site's outer boundary, in English and Spanish. For projects being approved with a CE, ND or MND, the Notice of Intent to Adopt a CE, ND or MND may be combined with the public hearing notice.

C. Final Determination

Notices of final decisions will be issued to the applicant, all residents abutting the project site, and all individuals who request such notice.

All Zoning Administrator Section 13.01-H Determinations may be appealed to the Area Planning Commission. The Area Planning Commission decision is final. All CEQA determinations by the Zoning Administrator or the Area Planning Commission are subject to appeal to the City Council pursuant to Public Resources Code Section 21151(c).

Nothing in this Memorandum is intended to limit the Zoning Administrator's express and inherent authority to administer LAMC Section 13.01-H.

Adam Rich <adamzr@gmail.com> Tue, Aug 3, 2021 at 1:59 PM
To: apcwestla@lacity.org

To the West Los Angeles Area Planning Commission,

I support NASE's appeal of the zoning administrator's decision in the West Pico Drill Site case (ZA-1989-17683-PA2-1A) and urge you to overturn the decision of the zoning administrator.

As a former board member of the South Robertson Neighborhoods Council board and a former Vice-chair of its Public Safety committee, I have had the opportunity in the past to review documents provided by NASE. I have become convinced that the West Pico drill site has been out of compliance for years.

I encourage the planning commission to spend the time to thoroughly investigate the claims made by NASE. I think you will find that the zoning administrator's decision was wrong in this instance.

I live a few blocks away from the drill site. I worship at a synagogue that is even closer. Emissions from that site could directly affect the health of my family and friends.

Thank you for your time and work on behalf of our community.

Sincerely,

Adam Rich

To the West Los Angeles Area Planning Commission,

I support NASE's appeal of the ZA's decision in the West Pico Drill Site case (ZA-1989-17683-PA2-1A) and urge you to overturn the ZA's decision. The city's negligence and failure in regulating this oil drilling site (and others) is a willful disregard for the health and safety of the citizens who live in the area.

I urge you to overturn the ZA's decision in order to protect the health and safety of those who live in the affected areas.

Yours,

Aimee Zeltzer

Cc: Michael Salman <salman@history.ucla.edu>, Rabbi Yonah Bookstein <rabbiyonah@gmail.com>

To the Members of the West Los Angeles Area Planning Commission:

I am writing to strongly urge you to grant Neighbors for A Safe Environment's (NASE) appeal of the 6/2/21 Zoning Administrator (ZA) ruling. You have an excellent opportunity to protect public health and end Pacific Coast Energy Company's (PCEC) egregious conduct at the West Pico Drill Site, and you should take it.

PCEC has been engaged in ongoing, egregious violations at the West Pico Drill Site for years. In fact, PCEC explicitly admitted in its 6/19/20 letter to the ZA that it violated multiple sections of the Los Angeles Municipal Code by failing to comply with the City Code and CEQA. The ZA, for its part, has also recognized its own failure to comply with the City's own environmental review policies. Despite these admissions by both the site operator and the City's ZA, the ZA has decided to allow this unsafe and reckless oil drilling use to continue in the middle of a dense residential neighborhood. This result is dangerous - not only because of the potentially harmful public health impacts that PCEC's activities have on the surrounding neighborhoods, but also because it tells oil well operators across the City that they can ignore the City Code, ZA assigned conditions, the California Environmental Quality Act, and the ZA's own policies on environmental review with impunity.

You have an opportunity to legally terminate a use that is harmful to the health of the community, while at the same time making clear that violations of oil well operating permits will not be tolerated. As an environmental and land use attorney and a long-time area resident and LA City Council candidate running to represent the surrounding community, I urge you to seize the once-in-a-generation opportunity before you and choose to put our community's health first.

Sincerely,

Katy Young Yaroslavsky
Candidate for LA City Council District 5

Dear West Los Angeles Area Planning Commission,

We are residents, homeowners, citizens and taxpayers living in the Pico-Robertson area for 40 years.

We very strongly support NASE's appeal of the ZA's decision in the West Pico Drill Site case (ZA-1989-17683-PA2-1A) and we urge you to overturn the ZA's decision.

We will continue to follow this matter very closely.

Most sincerely,

Re: ZA-1989-17683-PA2-1A, West Pico Drill Site, 9101 & 9151 W. Pico Blvd, Los Angeles, CA, 90035

To the West Los Angeles Area Planning Commission,

In regard to Case No. ZA-1989-17683, ENV-2020-1328-CE, and by vote of 13 yea, 0 nay and 1 abstention at the July 15, 2021 General Board meeting, the South Robertson Neighborhoods Council (SORONC) fully supports the appeal filed by NASE (Neighbors for A Safe Environment), a California nonprofit environmental organization formed by our neighbors in 2000 due to concerns about the West Pico Drill Site.

We have attached a letter by NASE's attorney Amy Minteer of Chatten-Brown, Carstens & Minteer LLP, and the letter's attachments and addenda, which delineate the basis for the appeal.

As Ms. Minteer's letter points out, the West Pico Drill Site is operating in violation of:

- the conditions under which the project was approved,
- the Los Angeles Municipal Code
- the California Environmental Quality Act (CEQA), and
- the 2001 Settlement Agreement with NASE which requires periodic reviews and corrective actions for environmental and operational defects.

SORONC is charged with affirmatively acting to support the health, safety, and welfare of our stakeholders. City laws and regulations that are supposed to govern the operation of the drill site are expressly intended to protect public safety and health., Likewise for CEQA, the State of California's landmark environmental law. Therefore we find the ZA Determination abhorrent due to the determination's utter disregard for City laws and regulations, and its evasion of the requirements for environmental review under CEQA. This puts the safety, health, and welfare of our stakeholders at unnecessary risk.

SORONC stakeholders of all ages live, work, eat, play, learn, socialize and invest in close proximity to the West Pico Drill Site.

Re: ZA-1989-17683-PA2-1A, Supporting NASE's Appeal

To the West Los Angeles Area Planning Commission

A Zoning Administrator (ZA) review pursuant to LAMC 13.01 and related sections of the Municipal Code is required to be a Quasi-Judicial endeavor. The ZA is enjoined to follow the law, make findings of fact, and not abuse discretion.

In this case, the ZA violated City law, violated Condition 78 of the 2000 ZA approval, and issued a determination that is wholly divorced from undisputed facts.

The ZA also violated the State's CEQA law and the ZA's own guidelines (ZA Memo 133) for implementing CEQA in oil cases by issuing a Categorical Exemption from CEQA. This was contraindicated in a case that was 1) commanded by Condition 78 to evaluate environmental impacts of project operations and evaluate the efficacy of mitigation measures, and 2) marked by 25 major illegal projects and myriad violations of law and ZA assigned conditions over the past two decades.

In short, the ZA's determination in Case No ZA-1989-17683-PA2 is shot through with errors of law and fact and self-contradictions. Abuses of discretion in the ZA's handling of the case are so extreme that they far exceed the definition of discretion and flow over into violation of law.

I am writing to prove that by showing you snapshots of key documents, and to let you know that those documents (or the information in them, with citations to the sources) were sent to the ZA and Council Member Paul Koretz during the course of the ZA review. I know that because I sent them to the ZA and ZA's office as well as to Mr Koretz and his staff. My submissions to the ZA and ZA's office should all be in the ZA case file.

I have advised and assisted NASE since October 2019, helping them to bring to the City's attention (particularly the Chief ZA, the Director of Planning, the City Attorney, and CD5 Council Member Paul Koretz) that the City was in breach of the 2001 Settlement Agreement and that there were documented problems at the site, including illegal projects. Since October 2019, I

have conducted research for NASE and the community on public record evidence to document and prove beyond the shadow of a doubt that there have been two decades of serious problems at the West Pico Drill Site since the 2000 ZA approval. As a Professor Emeritus of History at UCLA with 7 years of specialization on the history and current public policy of oil industry regulation in the City of Los Angeles, I bring a special set of skills to this task. [1] The substantive evidence presented to you by NASE's attorney, Ms. Minteer, largely comes from my research.

As I will show you below, the ZA cannot credibly claim he did not see the evidence proving that:

- Condition 78 of the 2000 ZA approval (ZA-1989-17683-PAD) required this current case to be a Review of Conditions in which the ZA must "evaluate the neighborhood impacts of project operations and the efficacy of mitigation measures," rather than a mere "Review of Compliance."
- DOGGR records and the oil company's admission prove that 25 major projects have been executed since 2000, 24 of them on oil wells (including drilling 2 new wells, redrilling 12 existing wells, and converting 10 wells) without ZA review and approvals required by LAMC 13.01.H and 13.01.I.
- LAMC 13.01.H defines the required reviews of these projects as "discretionary actions," in which the ZA is empowered to deny the application or require modifications or set conditions. That discretionary action triggers the need for CEQA clearance. Because the 25 projects were executed without the ZA reviews and approvals required by City Code, they were also executed in violation of CEQA with no environmental clearance at all.
- ZA Memo 133, promulgated in 2016 in response the City's settlement of a lawsuit concerning the City's routine granting of Categorical Exemptions in oil case, expressly prohibits eligibility for Categorical Exemptions in cases involving the drilling, redrilling, or conversion of oil wells. All three were done at this drill site.
- LAMC 13.01.E.2.b and the history of ZA approvals for the West Pico Controlled Drill Site make it clear that the site was and by force of law had to be one single integrated Controlled Drill Site up until the 2000 ZA approval split the single Controlled Drill Site into two illegal sites.
- The 2000 ZA approval also set an illegal condition, contrary to LAMC 13.01.H and 13.01.I, to allow "redrilling" to be conducted without full ZA review.
- LAMC 11.02 declares that "inconsistent permits" that conflict with the LAMC "shall be void," and LAMC 11.01 helpfully clarifies that the word "shall" means

[1] I am a recently retired professor of history at UCLA and a resident of the West Adams section of the City who lives 2500 feet from the Murphy Drill Site on West Adams Blvd and 2000 feet from the former 4th Avenue Drill Site on Washington Blvd (plugged and decommissioned in 2017-18 as result of unique circumstances and my advocacy alongside my neighbors and the important support of former City Council President Herb Wesson). Since 2014, I have researched the history of the oil industry and its regulation in the City, the SCAQMD district, and the State, while engaging in advocacy for strengthened regulation in all of those jurisdictions. As a history professor, I have research skills that few people possess, and I have a facility for learning about technology, law, economics, and public policy.

"mandatory," which makes the 2000 ZA approval void, makes all City permits issued pursuant to the 2000 ZA approval void, and makes void all LAFD drilling, redrilling, and annual oil well operating permits for wells that have had illegal projects.

The ZA simply chose to ignore this documentation and/or make up "alternative facts" not supported by the law and not supported by the case file and public record documents. No amount of discretion allows a ZA to do that, so this all is properly understood as "error" on both the law and undisputed facts.

The following snapshots of key documents will show you that the ZA ruling violated City Code, violated ZA assigned conditions, violated the State's CEQA law, and violated the ZA's own policy on environmental review. The ZA ruling is thoroughly in error. It must be overturned.

Page 1 of the ZA ruling from June 2, 2021.

- **The ZA granted an improper Categorical Exemption from environmental review (an exemption Mr. Koretz adamantly requested & defended).**
- **The ZA referred to Condition 78 of the 2000 approval and the 2001 Settlement Agreement that mandate a Review of Conditions that assesses environmental impacts and the effectiveness of mitigation measures. But the ZA refused to review conditions, environmental impacts, and the effectiveness of mitigation measures. At the two public hearings on the case the ZA stated he would not even consider revising any conditions, and by granting a CE from CEQA he put the question of environmental impacts and mitigation measures off the table. The ZA himself violated the ZA assigned condition.**
- **Last, the absurd operative determination that the site is and has been in compliance, despite all of the incontrovertible evidence to the contrary, violates City and the State's CEQA law by divorcing the ruling from any relation to fact.**

CASE NO. ZA-1989-17683-PA2
PLAN APPROVAL
9101 West Pico Boulevard
West Los Angeles Planning Area
Zone: C4-1VL-O
D.M.: 132B169
C.D.: 5 - Koretz
CEQA: ENV-2020-1328-CE
Legal Description: Lots 883-888, Block None, Tract TR 6380

Pursuant to California Environmental Quality Act (CEQA), I hereby DETERMINE:

That the project is exempt from CEQA pursuant to CEQA Guidelines Section 15301, (Class 1), and Section 15321 (Class 21) and, there is no substantial evidence demonstrating that any exceptions contained Section 15300.2 of the State CEQA Guidelines regarding location, cumulative impacts, significant effects or unusual circumstances, scenic highways or hazardous waste site, or historical resources applies.

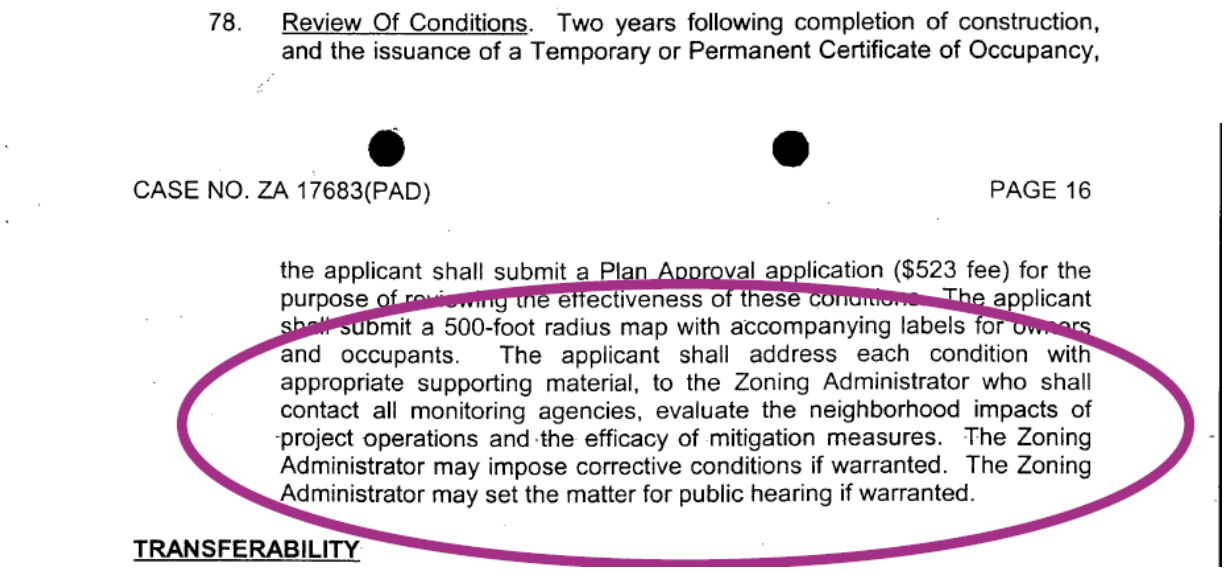
Pursuant to Los Angeles Municipal Code Section 12.24 M, and as required by Condition No. 78 under Case No. ZA-17683(PAD), BZA No. 2000-1697 and clause 4.b of the 2001 Settlement Agreement, between the City of Angeles, Neighbors For A Safe Environment, (NASE), Rae Drazin, Ph.D., Mina Solomon, and Breitburn Energy Company LLC, to settle litigation relating to approvals for the construction and operation the West Pico Drill Site Modernization Project, Neighbors For A Safe Environment v City of Los Angeles, Los Angeles Superior Court Case No. BC240760] ("Settlement Agreement").

I hereby DETERMINE, based on the whole of the administrative record,

That the Conditions of Approval of Determination BZA No. 2000-1697 have been and are being substantially complied with, though necessary inspections of the facility by government agencies will continue to ensure continued compliance.

Condition 78 from the 2000 ZA approval, which the 2001 Settlement Agreement extended to mandate Reviews of Conditions every 5 years.

- **You can see that Condition 78 calls for a "Review of Conditions" in which the ZA must "evaluate the neighborhood impacts of project operations and the efficacy of mitigation measures."**
- **The ZA refused to do this. The ZA violated a ZA-assigned condition imposed on the site, and thereby also violated the Settlement Agreement and the State CEQA law (the ZA refused to require environmental review).**



78. Review Of Conditions. Two years following completion of construction, and the issuance of a Temporary or Permanent Certificate of Occupancy,

CASE NO. ZA 17683(PAD) PAGE 16

the applicant shall submit a Plan Approval application ($523 fee) for the purpose of reviewing the effectiveness of these conditions. The applicant shall submit a 500-foot radius map with accompanying labels for owners and occupants. The applicant shall address each condition with appropriate supporting material, to the Zoning Administrator who shall contact all monitoring agencies, evaluate the neighborhood impacts of project operations and the efficacy of mitigation measures. The Zoning Administrator may impose corrective conditions if warranted. The Zoning Administrator may set the matter for public hearing if warranted.

TRANSFERABILITY

PCEC's June 19, 2020 email to the ZA's office and City Attorney admitted that they executed 25 major projects, including 24 major oil well projects, without submitting any applications to the ZA for ZA review required by City Code and without CEQA clearance.

- **They even cited the Municipal Code that they violated: LAMC 13.01.H and 13.01.I, which require ZA reviews and approvals that the ZA cannot bypass or refuse to conduct.**
- **The ZA decided that he did not need to follow the City's law requiring ZA reviews of drilling, redrilling, and well conversions. That is illegal.**
- **PCEC provided a detailed list of unreviewed projects, identifying the well name, the nature of the project (new drill, re-drilll, conversion), and the year conducted. The full PCEC email with the itemized list has been sent to the APC by Amy Minteer.**
- **I was the community member who brought this matter of unreviewed and unapproved projects to PCEC's attention. I personally reviewed the DOGGR (State**

regulatory agency) records for each well on the site and compared them to the absence of any ZA approvals in the City Records boxes of case file for the site.

- **I informed the ZA's office about the problem of unreviewed and unapproved projects by early spring 2020. I sent the ZA office DOGGR well records and provided citations to find all of them online.**

Michael Finch <mfinch@energyprojectllc.com> Fri, Jun 19, 2020 at 4:34 PM
To: Edber Macedo <edber.macedo@lacity.org>
Cc: "Lisa.Webber@lacity.org" <Lisa.Webber@lacity.org>, "Estineh.Mailian@lacity.org" <Estineh.Mailian@lacity.org>, "Vanessa.Soto@lacity.org" <Vanessa.Soto@lacity.org>, "Jennifer.Tobkin@lacity.org" <Jennifer.Tobkin@lacity.org>, Dylan Sittig <dylan.sittig@lacity.org>, Philip Brown <philip.brown@pceclp.com>, "Rick Clark (rick.clark@pceclp.com)" <rick.clark@pceclp.com>

Edber, per our conversation here is our thoughts on the items we discussed.

PCEC was recently contacted by a member of the public and several issues and outstanding questions have been brought to our attention, including (1) whether the wells that have been drilled, re-drilled, and/or converted since the 2000 ZA approval required further ZA approval under LAMC 13.01H and 13.01I; (2) whether activities such as drilling, re-drilling, and/or converting wells underwent adequate CEQA review as part of the EIR process for the 2000 ZA approval; and (3) whether Condition #1 of the 1965 ZA 17683 and Condition #B-49 of the 2000 ZAD 17683 need to be modified to reflect that onsite generation of power is occurring on the production site.

With regard to the first issue, after reviewing our well files, and the 2000 ZA determination, it is clear that certain wells have been drilled, re-drilled and converted since that approval – see "Well List" below. In light of LAMC 13.01H and 13.01I, a question has surfaced regarding whether these well activities required further authorization or approval by the ZA. We have not seen any approvals by the ZA and our conclusion is that applications were likely never submitted to the City. We believe this was because of Condition 72 of the 2000 ZAD 17683 determination which states in part *"Without prior written approval from the Zoning Administrator, no more than the existing 69 wells may be drilled, operated or maintained at the site and these wells shall be located at their current surface locations."* This condition suggests that the 2000 ZA approval covered a total of 69 wells and, provided the facility did not exceed the 69 wells, no further ZA approvals for drilling and redrilling were required. However, it appears the facility may not have had 69 existing wells at the time of the determination. This may have been a misunderstanding during the determination between well "slots" vs actual wells. In any event, a question now exists regarding whether the wells that have been drilled, re-drilled, and/or converted since the 2000 ZA approval required further ZA review and approval pursuant to LAMC 13.01H and 13.01I.

A follow along question concerns the scope of environmental review done for the 2000 approval and whether the review covered specific well activities. It's been suggested that as part of the 2000 approval (drill site modernization project) the activity of drilling, redrilling, and converting wells may not have been covered as part of the EIR process. Rather, the 2000 approval covered only construction of the perimeter walls and a permanent derrick, not drilling or well conversions, because apparently these activities were not part of the project description. If this is accurate, a question now exists regarding the adequacy of the currently proposed Categorical Exemption, and whether additional environmental review should be conducted to cover not only past well activities, but also those that are likely to occur in the future.

LAMC 13.01.H and 13.01.I

- City Code has required ZA review and approval of oil well projects as discretionary actions since 1945.
- The text of LAMC 13.01.H and 13.01.I has been fundamentally stable since 1955, and completely unaltered since 2000.

H. Drilling Site Requirements. Any person desiring to drill, deepen or maintain an oil well in an oil drilling district that has been established by ordinance, or to drill or deepen and subsequently maintain an oil well in the M3 Zone within 500 feet of a more restrictive zone shall file an application in the Department of City Planning on a form provided by the Department, requesting a determination of the conditions under which the operations may be conducted. **(Para. Amended by Ord. No. 173,492, Eff. 10/10/00.)**

I. Permits. (Amended by Ord. No. 173,268, Eff. 7/1/00, Oper. 7/1/00.) No person shall drill, deepen or maintain an oil well or convert an oil well from one class to the other and no permits shall be issued for that use, until a determination has been made by the Zoning Administrator or Area Planning Commission pursuant to the procedure prescribed in Subsection H of this section.

ZA Memo 133

- **ZA Memo 133 is ZA policy for how the ZA will process oil cases and decide on appropriate levels of environmental review mandated by the State's CEQA law.**
- **The City issued ZA Memo 133 in response to a lawsuit that the City settled in 2016. The lawsuit concerned the pattern and practice of the ZA handing out Categorical Exemptions (CEs) from environmental review in oil cases as if they were Halloween candy.**
- **Since the issuance of ZA Memo 133 in 2016, all 5 oil cases reviewed by the ZA have been given improper CEs from environmental review.**
- **ZA Memo 133 expressly prohibits the issuance of exemptions from environmental review in cases involving the drilling, redrilling, or conversion of wells. The West Pico Drill Site case has all three, and so much more.**
- **The ZA had proof that there had been 24 oil well projects since 2000 (2 new drills, 12 redrills, 10 conversions) and simply chose to ignore both City Code and ZA Memo 133.**

OFFICE OF ZONING ADMINISTRATION

MEMORANDUM

ZA MEMORANDUM NO. 133

September 19, 2016

TO: Office of Zoning Administration
Development Services Centers
Department of Building and Safety
Department of Public Works – Bureau of Engineering
Los Angeles Fire Department
Los Angeles Department of Water and Power

FROM: Linn K. Wyatt
Chief Zoning Administrator

SUBJECT: **APPLICATION AND PROCESSING REQUIREMENTS, INCLUDING CEQA REVIEW, FOR OIL AND GAS APPROVALS PURSUANT TO LOS ANGELES MUNICIPAL CODE SECTION 13.01-H.**

This Memorandum supersedes ZA Memorandum No. 94, dated December 12, 1994, and ZA Memorandum No. 94A, dated March 24, 2000.

This Memorandum is intended to establish a comprehensive set of procedures and policies for the acceptance and processing of applications for oil drilling approvals pursuant to Los Angeles Municipal Code (LAMC) Section 13.01-H and to establish City guidelines for the California Environmental Quality Act (CEQA) review of Section 13.01-H oil drilling applications.

I. Background

The LAMC requires a formal application and a filing fee in conjunction with a request for a determination of conditions for the conduct of oil drilling pursuant to LAMC Section 13.01-H. Other than the requirement for an application and payment of a filing fee, the LAMC contains no express procedural requirements for the determination of conditions under Section 13.01-H for an original approval or for a modification or clarification to a previously approved determination of conditions.

planning, and other activities.

E. Applications for oil and gas projects under LAMC Section 13.01-H have the potential to create unique risks and hazards to have the potential for significant and immediate impacts on the health, safety, and welfare of the residents in and around the project site through increased noise, odor, dust, traffic, and other disturbances, as well as the potential to significantly impact the City's air, water, soil, biological quality, geology, water, stormwater and wastewater infrastructure, transportation, emergency response plans and other aesthetic values and community resources.

F. People living and working within the land use and environmental impact range of oil and gas operations and activities have a substantial interest in participating in a public hearing on 13.01-H approvals.

G. Section 13.01-H provides authority for the Zoning Administrator to condition, approve or deny a Section 13.01-H application under the City's police powers to protect public health, safety and welfare and to issue and implement reasonable procedures to process Section 13.01-H applications consistent with the requirements for due process.

---

1. Preliminary Review for Exemptions

No categorical exemption forms will be processed for consideration or issued at the Planning Department Development Services. The applicant shall submit a complete EAF-O form with their application, which shall be reviewed by the Zoning Administrator. The Zoning Administrator will conduct a preliminary review to determine whether the application qualifies for an exemption from environmental review pursuant to CEQA. The Zoning Administrator may require the applicant to provide additional supporting materials from the applicant to support the use of a categorical exemption.

An application to drill, re-drill, deepen, or convert a well is not eligible for a categorical exemption and shall require an Initial Study or an EIR as described in section V.A.2. All other projects may be reviewed to determine if the project is exempt under any applicable categorical exemption in CEQA Guidelines Section 15300-15333 or any City Guidelines (adopted pursuant to CEQA). If a project is determined not to fall into any categorical exemption based on the project description, an Initial Study shall be prepared pursuant to section V.A.2. If the project falls within a categorical exemption, the Zoning Administrator shall determine if, based upon the whole of the record, any exception to any exemption under CEQA Guidelines, Section 15300.2, applies to the project, including, but not limited to the following:

Cumulative Impact. All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant.

Significant Effect. A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.

LAMC 13.01.E.2.b prohibits any more than one Controlled Drill Site in Oil Drilling District U-131, where the West Pico Drill Site is located.

- Oil Drilling District U-131 has 70 acres. It would require at least 80 acres to allow legal formation of two Controlled Drill Sites.
- LAMC 13.01 defines a Controlled Drill Site as the only kind of site on which oil drilling, wells, and production activities can be legally established in "urbanized" districts.
- Special procedures and a ZA review are required to approve a new Controlled Drill Site, if it is legally allowable.

2. **Urbanized Areas** – Each oil drilling district established in an urbanized area shall he subject to the following conditions:

(a) Each district shall be not less than 40 acres in area, including all streets, ways and alleys within the boundaries thereof.

(b) **(Amended by Ord. No. 173,268, Eff. 7/1/00, Oper. 7/1/00.)** Not more than one controlled drill site shall be permitted for each 40 acres in any district and that site shall not be larger than two acres when used to develop a district approximating the minimum size; provided, however, that where the site is to be used for the development of larger oil drilling districts or where the Zoning Administrator requires that more than one oil drilling district be developed from one controlled drilling site, the site may be increased, at the discretion of the Zoning Administrator when concurred in by the Board of Fire Commissioners, by not more than two acres for each 40 acres included in the district or districts.

The 1965 ZA approval (ZA-1965-17683) for opening the West Pico Drill Site expressly approved a single Controlled Drill Site spread over parts of two city blocks straddling Oakhurst Drive.

The 1967 ZA case (ZA-1967-18893) approved an expansion of that single Controlled Drill Site to cover two full City blocks fronting Pico Blvd, from Cardiff to Doheny.

- The ZA and ZA's office were directed to these ZA approvals repeatedly in spring and summer 2020.
- But the ZA kept insisting on following the error of the 2000 ZA approval that split the single Controlled Drill Site in two, contrary to City Code's prohibition in LAMC 13.01.E.2.b and contrary to the requirement to hold a special ZA review about establishing a second Controlled Drill Site.
- The ZA in his June 2, 2021 determination continues to insist there there are two different sites and that only one is under review.
- The ZA says the 1967 ZA approval split the site. It clearly did no such thing.
- Condition 76 of the 2000 ZA approval expressly superseded and replaced "all prior Conditions of Operation applicable to the drill site," which if it had been legal would have eliminated all approvals for half of the Controlled Drill Site:

Re: Z.A. CASE NO. 18893
Northeasterly corner
Pico Bl. & Cardiff Av.
Expansion of existing
controlled drill site.
O. D. District U-131
D. M. No. 548

Greetings:

In the matter of the application of Rose Fink, current owner, and Occidental Petroleum Corporation, optionee, owner-operator and lessee, for Determination of Conditions and Methods of Operation to be followed in expansion to the west on three C2 zoned lots, the production facilities portion of the existing previously authorized controlled drill site in Oil Drilling District U-131, please be advised that based upon the Findings of Fact hereinafter set forth and by virtue of authority contained in Section 13.01-E, F and H of the Municipal Code, the Chief Zoning Administrator hereby authorizes an extension of the controlled drill site approved under Z. A. Case 17683 onto Lots 1037, 1038 and 1039, Tract No. 6380 located at the northeasterly corner of Pico Boulevard and Cardiff Avenue so that the enlarged controlled drill site will comprise:

Lots 883-888, and Lots 1035-1039, Tract 6380 located northerly of Pico Boulevard between Doheny Drive and Cardiff Av., Beverlywood District;

Condition 72 of the 2000 ZA approval set an illegal procedure for allowing oil wells to be redrilled.

- LAMC 13.01.H and 13.01.I set requirements for ZA reviews of proposals to redrill wells and makes them discretionary projects.
- The ZA in 2000 violated City Code by writing a condition in conflict with the Code.
- The ZA in the current case ignored this illegality, continued it, and then extended it to cover the drilling of new wells and converting of wells, which were not discussed at all in the 2000 approval and is also in illegal conflict with City Code.

- The ZA in 2000 erred in mistaking the number of slots in the well cellar (69) for the number of actual wells. In 2000, there were 55 open wells at the Controlled Drill Site and 2 plugged wells. In 2005 and 2010 new wells were drilled without application to or approval from the ZA, bring the total today to 57 open wells at the site and 2 plugged wells.

72. Limitations On Well Redrilling. Without prior written approval from the Zoning Administrator, no more than the existing 69 wells may be drilled, operated or maintained at the site and these wells shall be located at their current surface locations. All wells will be drilled from existing well cellars using existing strings of pipe or surface conductor pipe. In the event that applicant redrills any of the existing wells, the applicant shall provide the Zoning Administrators office with duplicate copies of all filings pertaining to such well filed with the California Division of Oil, Gas and Geothermal Resources, including such filings showing the bottom-hole location and the total depth of each such well. Furthermore, the applicant, upon request by the Zoning Administrator, shall furnish such additional information concerning the status, exact bottom hole location, productivity, etc., of the various wells drilled from the property, as to enable the Zoning Administrator to properly and intelligently administer the oil drilling regulations in this area; said information to be either verbal or in writing and to be kept confidential by the Zoning Administrator if so desired by the applicant.

LAMC 11.02 makes void all permits inconsistent with City Code

- The ZA was shown the text of LAMC 11.02
- The ZA approvals from 2000 and 2021 are inconsistent with City Code.
- City permits issued pursuant to the 2000 ZA approval are void.
- LAFD drilling, redrilling, and annual oil well operating permits issued for the 22 well on which the 24 illegal projects were performed are void, because they are inconsistent with the requirements of LAMC 13.01.I that requires ZA approval before City permits are issued and before wells are drilled, redrilled, or converted.
- The ZA was sent copies of LAFD project permits, annual operating permits, CUPA HazMat permits, and improper and void LADBS permits related to the project addressed by the 2000 approval.
- The ZA ignored all of this and ruled that the site is in compliance.

SEC. 11.02. INCONSISTENT PERMITS AND LICENSES.
(Amended by Ord. No. 134,358, Eff. 6/8/67.)

Notwithstanding any other provisions of this Code or any other ordinance of the City of Los Angeles, no permit or license shall be issued in violation of any provisions of this Code or any other ordinance of the City of Los Angeles; if any permit or license is issued in violation of

any provision of this Code or any other ordinance of the City of Los Angeles the same shall be void. Any permit or license issued, which purports to authorize the doing of any act prohibited by any other provision of this Code or any other ordinance of the City of Los Angeles, shall be void. Provided, however, that upon publication of a zone change, height district or building line ordinance the Superintendent of Building may issue a permit for a building or structure which will comply with all of the requirements of the new zone, height district or building line. No such permit shall be issued unless the applicant has first executed and filed with the Superintendent of Building a notarized agreement assuming all risk and agreeing to remove all buildings or structures authorized by the permit in the event the zone change, height district or building line ordinance should become effective.

LAMC 11.01 defines "shall" as meaning "mandatory"; therefore the permits in conflict with City Code are void and the ZA has a duty to recognize that.

SEC. 11.01. DEFINITIONS AND INTERPRETATION.

(a) The following words and phrases whenever used in this Code shall be construed as defined in this section unless from the context a different meaning is intended, or unless a *different meaning is specifically defined and more particularly directed to the use of such words* or phrases:

. . .

"**Shall**" and "**May**." "**Shall**" is mandatory; "**May**" is permissive.

The ZA ruling in ZA-1989-17683-PA2 repeatedly ignores facts and replaces them with fiction. The ZA ruling repeatedly violates City Code, Condition 78 of the 2000 ZA approval, the 2001 Settlement Agreement, and CEQA.

The ZA ruling is in error concerning the law and the facts. It must be overturned.

Yours,

Michael Salman
Professor Emeritus
History, UCLA

To: apcwestla@lacity.org, dylan.sittig@lacity.org

Hello,

As someone who resides within 1500 feet of the West Pico Oil Drill Site, I heartily support NASE's appeal of the Zoning Administrator's June 2, 2021 decision. Please overturn the ZA's ruling.

Sincerely,
Pamela White
1420 S. Oakhurst Drive, 90035

West Los Angeles Area Planning Commission; Elected City Officials; Candidates in 2022 City Elections,

501 people have signed a petition on Action Network telling you to Stop Illegal Oil Drilling in the City of Los Angeles.

Here is the petition they signed:

> We Support Neighbors for A Safe Environment's (NASE's) Appeal to Overturn the Zoning Administrator's Lawless Decision on the West Pico Drill Site (ZA-1989-17683-PA2-1A)
>
> On June 2, 2021, the Zoning Administrator (ZA) in the Los Angeles Department of City Planning Department issued a ruling that openly declares that illegal oil well drilling at the West Pico Drill Site can stand unaltered, unreviewed, and without remedy. The ZA likewise ruled that numerous other health, safety, and environmental violations of City law and the ZA's own Conditional Use Approval for the drill site do not matter.
>
> The ZA recognized the rampant illegality but ruled that the West Pico Drill Site is and has been in "substantial compliance."
>
> Yes, the ZA said up is down and 2+2=5. He contradicted himself openly and without a fig leaf of embarrassment. He openly declared he did not need to follow City law governing the review of oil drilling and production. His ruling was lawless and illegal.
>
> This is not just a danger to the communities around the West Pico Drill Site, but to all communities around all oil drill sites in the City.
>
> Neighbors for a Safe Environment (NASE) has appealed the ZA's ruling to the West Los Angeles Area Planning Commission. NASE is a local non-profit (501C4) neighborhood organization formed to protect the community from the impacts of oil drilling and production.
>
> • We, the signatories of this petition, support NASE's appeal to overturn the entirety of the ZA's dangerous and illegal decision.
>
> • We call on the West Los Angeles Area Planning Commission to study the case closely and thoroughly, and to preserve its jurisdiction over the case so that it is not rushed into hasty action.
>
> • We call on all elected officials in the City of Los Angeles and all candidates running for elected office to demand that the ZA's ruling be overturned and that the underlying Review of Conditions for the West Pico Drill Site be started again with clear instructions to obey all City and State laws and obligations, including those that require proper environmental review under the State's CEQA law and the terms of the City's 2001 Settlement Agreement with NASE.
>
> • We insist that illegal actions, illegal oil well projects, and violations of health and safety regulations must be remedied with penalties, increased protections for the community, and equitable measures in the interest of good public policy (such as the plugging of illegal wells and idle wells).

You can view each petition signer and the comments they left you below.

Thank you,

Pico Robertson Health and Safety Coalition

155. Ian Dawson (*ZIP code: 90034)*
I have no issue with legal oil well drilling. But, having found out that no oversight, review, penalties or safeguards by either the Zoning Administration or the LA Department of City Planning has occurred over the last few decades, requires public action and intervention to make the city do their legal job to protect citizens. Those that have ignored the law should be fired immediately and all drilling should stop until all wells are reviewed by an independent auditor, and only then can drilling permits be re-issued.

156. Ivan kamil (*ZIP code: 90064)*

Re: ZA-1989-17683-PA2-1A
West Pico Drill Site, 9101 & 9151 W. Pico Boulevard, Los Angeles, CA 90035
Appeal by Neighbors for a Safe Environment (NASE)

To the West Los Angeles Area Planning Commission:

The Cheviot Hills Home Owners' Association represents some 1400 households situated not far from the West Pico Drill Site.

Our Association has participated in multiple land use cases of various kinds that have come before the Zoning Administrator for review. Many of our members have done the same in their professional and private capacities. We are now writing in support of the pending appeal by Neighbors for a Safe Environment (NASE).

In the matter of the "Plan Approval" for the West Pico Drill Site (Case No. ZA-1989-17683-PA2 & ENV-2020-1328-CE), we urge the West Los Angeles Area Planning Commission to overturn both the error-filled June 2, 2021 Zoning Administrator determination and the inappropriate categorical exemption from environmental review on which the Zoning Administrator's faulty review was based.

From the perspective of our collective experience in land use cases, as well as our proximity to the West Pico Drill Site, we are dismayed that the City allowed 24 major oil well projects to be executed without applications to the Zoning Administrator for legally required discretionary reviews and environmental clearance under CEQA, not to mention a 25th major project to install one megawatt of microturbine electric generators that are expressly prohibited by ZA conditions of use. This is unfathomable to those of us who have wrestled with the rigors of Zoning Administrator reviews and CEQA reviews.

In light of these 25 illegal projects and numerous other documented violations of City Code and conditions of approval, it is incredible that the Zoning Administrator could declare on the first page of his June 2, 2021 determination that: ***"I hereby DETERMINE, based on the whole of the administrative record, [t]hat the Conditions of Approval of Determination BZA No. 2000- 1697 have been and are being substantially complied with."*** That is an error of law and facts, contradicted many times within the Zoning Administrator's own letter of determination.

We are troubled to learn that this massive evasion of required reviews was enabled by the lack of City compliance inspections, from the same City that inspects home remodeling, billboards and countless other less serious activities that require City approvals and permits. More than a few of our members are frightened to hear that a work culture of sloppiness involving violations of the City's Fire Code, State oil well safety laws, and SCAQMD air emissions laws has grown in the shadow of the City's inattention. We cannot understand how the City can approve initial land use entitlements for an activity as inherently risky and historically troubled as oil production, especially in a residential neighborhood, and then turn a completely blind eye to the most basic requirements of compliance and enforcement during the ongoing life of the land use. We cannot understand how the Zoning Administrator in the current case could order no corrective actions and write no new conditions to protect our health and safety, and at the same time declare that "inspections…will continue" when the City does not do even the most basic compliance inspections.

We hoped that the current ZA review would be the starting point to turn this situation around. We are frustrated that the opposite has happened.

The same oil drill site that was allowed to evade ZA reviews and environmental reviews for 25 major projects is now being exempted from environmental review and being given a pass on a shocking array of illegal projects and other violations. The same oil drill site that was supposed to have Reviews of Conditions in 2010 and 2015 to "evaluate…the efficacy of mitigation measures" and change them as warranted has received a review that excluded consideration of the need for enhanced mitigation measures. There has been no CEQA process to consider the efficacy of mitigation, monitoring and enforcement measures that have obviously failed. This violates both Condition 78 of the 2000 ZA approval and Section 4.b of the 2001 Settlement Agreement, as well as CEQA and every ZA approval since the drill site was first given land use entitlement in 1965. The statements of the presiding ZA at the two summer 2020 public hearings declaring that no mitigation measures will be changed short-circuited legally required review processes.

The 25 unapproved projects, dozens of illegal and void City permits, and other problems documented by community members and reported to the Zoning Administrator were not addressed, but were buried in contradictory statements in the ZA's determination, alternately recognizing some of the violations but then determining on the first page that there has been compliance. This allows illegal activity to stand in place without equity or protection for the community, and it sets in motion another violation of CEQA for segmenting a larger known project into smaller pieces that obscure the full environmental impact.

We strongly urge you to send this case back for the proper environmental review under CEQA that it should have received from the outset: An initial study, followed by either a Mitigated Negative Declaration or an Environmental Impact Report. That is the necessary procedural and substantive first step toward holding a full and proper ZA review that addresses all the requirements of Condition 78 of the 2000 ZA approval, Section 4.b of the 2001 Settlement Agreement, and the documented evidence of 25 major unapproved projects and dozens of additional permitting and compliance problems.

Our Association understands the importance of following proper rules and regulations. We rely on the rigor of the City's Zoning Administrator, Engineering, and Building and Safety reviews to keep us all safe when our local residents undertake projects that could have an impact upon neighbors. We cannot accept that the same agencies would allow an oil drill site in close proximity to our neighborhood to escape environmental reviews under CEQA and even facilitate it by granting an exemption, nor can we understand how 25 major projects at an oil drill site could be allowed to happen without a review and allowed to persist when reported to the Zoning Administrator.

Plainly, the correct course of action is to begin this review again and to do it properly.

Sincerely,

Bob Keehn, President

Dear members of the Area Planning Commission:

I was unsurprised to receive notice of the meeting regarding the appeal of recent rulings on the West Pico Drilling Site, given we live just a block from the pumping station.

The facility has been decades-long nuisance for us. There are signs of what's going on on the pavement outside the facility -- you can sometimes see the rainbow-like colors indicating oil presence on the concrete sidewalk outside the retaining wall whenever there's water present (for example, after rain). However, many of the residents don't even know that behind the retaining wall is an oil well. It's not required for landlords or home sellers to tell new residents even though petrochemicals are a known carcinogen, and the longer you live by them, the more concern there is.
After reading that there are indeed multiple legal violations hidden behind that wall, it seems to me that the operators depend on the anonymity that the wall provides.

We need to learn more about what exactly the operators are doing at the West Pico wells and how it impacts us. Personally, I'm concerned that there have been rather a lot of cancers and benign tumors among friends who have lived within a 3 block radius of the site. Are they just naturally occurring, and the fact I know of so many cases is just because so many people live in this tight little neighborhood? Or is there something else going on? We don't know because there has been insufficient environmental impact review.

I want to see regulations enforced, a thorough independent environmental review conducted, and if the results are concerning, I'd like to see the well shut down and the site properly ameliorated. I'm very concerned that the planning commission didn't take these actions previously EVEN WHEN THE DOCUMENT THE CITY PROVIDED EXPOSED VIOLATIONS. Not only was I puzzled by the lack of logic in the decision, it makes me question whether those who are supposed to be looking after the wellbeing of residents have instead prioritized the interests of businesses from outside our community.

Thank you for your attention,
Rebecca Klempner

Dear West Los Angeles Area Planning Commission Members:

I write in strong support of NASE's appeal of the 6/2/21 Zoning Administrator ruling. The ZA decision is nonsensical on a number of fronts, and sets a very dangerous precedent for our city. It must be overturned.

The ruling states that Pacific Coast Energy Company is in full compliance, despite the fact that the company underwent 25 different unpermitted projects at the site (as admitted by PCEC in their own 6/19/20 letter and as detailed in the Department of City Planning's staff report). The ruling grants a Categorical Exemption (CE) from environmental review, despite the fact that ZA Memorandum 133 expressly prohibits the granting of CEs for projects drilling, re-drilling, or conversion of oil wells.

In short, the ruling is shocking. Not only does it fail to require any actions in response to the unpermitted projects, but it rewards PCEC's illegal conduct with the type of exemption applied to benign projects like adding signage or building a bike path.

Oil drilling in close proximity to residences is exactly the kind of use from which CEQA was designed to protect the public. The 6/2/21 ruling refuses to provide any new protection for stakeholders in Pico-Robertson. It also encourages lawlessness by other well operators. As a candidate running to represent a district with one of the highest concentrations of oil wells in the city, I am deeply concerned about the precedent this ruling would set if it is allowed to stand. I ask that you protect Angelenos by overturning this decision.

Sincerely,
Scott Epstein
Candidate for LA City Council District 5

Oil well decision

1 message

Saran Kirschbaum <sarank@icloud.com> Tue, Jul 20, 2021 at 11:40 PM
To: apcwestla@lacity.org

To the West Los Angeles Area Planning Commission,

I support NASE's appeal of the ZA's decision in the West Pico Drill Site case (ZA-1989-17683-PA2-1A) and urge you to overturn the ZA's decision.

I live not far from the West Pico Drill site and am very concerned about the safety of any oil well on Pico. I know that oil is under many of the houses as well as businesses in the area.
This area also has earthquake faults and that alone is enough reason not to continue drilling in the area. Climate change should also overturn the decision because it is removing the use of oil in the near future.
Please overturn ZA's decision.
Thank you, Saran Kirschbaum

Re: ZA-1989-17683-PA2 & ENV-2020-1328-CE; West Pico Drill Site, 9101 & 9151 W. Pico Blvd, Los Angeles, CA, 90035

To the West Los Angeles Area Planning Commission,

The Beverlywood Homes Association represents 1,354 members and their families who reside South of the West Pico Drill Site.

Our Association engages in rigorous design reviews of residential projects in our neighborhood and our organization has participated in multiple land use cases of different kinds that have come before the Zoning Administrator for review. Many of our members have done the same in our professional and private capacities.

In the matter of the "Plan Approval" for the West Pico Drill Site (Case No. ZA-1989-17683-PA2 & ENV-2020-1328-CE), we urge the West Los Angeles Area Planning Commission to overturn both the error-filled June 2, 2021 Zoning Administrator determination and the inappropriate Categorical Exemption from environmental review on which the Zoning Administrator's faulty review was based.

From the perspective of our collective experience in land use cases as well as being neighbors of the West Pico Drill Site, we are shocked that the City allowed 24 major oil well projects to be executed without applications to the Zoning Administrator for legally required discretionary reviews and environmental clearance under CEQA, plus a 25th major project to install one megawatt of microturbine electric generators that are expressly prohibited by ZA conditions of use. This is unfathomable to the many of us who have wrestled with the rigors of Zoning Administrator reviews and CEQA reviews.

In light of these 25 illegal projects and numerous other documented violations of City Code and Conditions of Approval, it is beyond shocking that the Zoning Administrator could declare on page 1 of his determination issued on June 2, 2021 that: ***"I hereby DETERMINE, based on the whole of the administrative record, [t]hat the Conditions of Approval of Determination BZA No. 2000-1697 have been and are being substantially complied with."*** That is an error of law and facts, contradicted many times within the Zoning Administrator's own Letter of Determination.

We are startled to learn that this massive evasion of required reviews was enabled by the lack of City compliance inspections, from the same City that inspects home remodeling, billboards, and countless other less serious activities that require City approvals and permits. More than a few of our members are frightened to hear that a work culture of sloppiness involving violations of the City's Fire Code, State oil well safety laws, and SCAQMD air emissions laws has grown in the shadow of the City's inattention. We cannot understand how the City can approve initial land use entitlements for an activity as inherently risky and historically troubled as oil production, especially in a residential neighborhood, and then turn a completely blind eye to the most basic requirements of compliance and enforcement during the ongoing life of the land use. We cannot understand how the Zoning Administrator in the current case could order no corrective actions and write no new conditions to protect our health and safety, and at the same time declare that "inspections . . . will continue" when the City does not do even the most basic compliance inspections.

We hoped that the current ZA review would be the starting point to turn this situation around. But we are dismayed to learn that the opposite has happened.

The same oil drill site that was allowed to evade ZA reviews and environmental reviews for 25 major projects is now being exempted from environmental review and being given a pass on a shocking array of illegal projects and other violations.

The same oil drill site that was supposed to have Reviews of Conditions in 2010 and 2015 to "evaluate . . . the efficacy of mitigation measures" and change them as warranted has received a review that excluded consideration of the need for enhanced mitigation measures. There has been no CEQA process to consider the efficacy of mitigation, monitoring, and enforcement measures that have self-evidently failed. This violates both Condition 78 of the 2000 ZA approval and Section 4.b of the 2001 Settlement Agreement, as well as CEQA and every ZA approval since the drill site was first given land use entitlement in 1965. The statements of the presiding ZA at the two summer 2020 public hearings declaring that no mitigation measures will be changed short-circuited legally required review processes

The 25 unapproved projects, dozens of illegal and void City permits, and other problems documented by community members and reported to the Zoning Administrator were not addressed, but were buried in contradictory statements in the ZA's determination, alternately recognizing some of the violations but then determining on page 1 that there has been compliance. This allows illegal activity to stand in place without equity or protection for the community, and it sets in motion another violation of CEQA for segmenting a larger known project into smaller pieces that obscure the full environmental impact.

We implore you to send this case back for the proper environmental review under CEQA that it should have had from the outset: an initial study, followed by either a Mitigated Negative Declaration or an Environmental Impact Report. That is the necessary procedural and substantive first step toward holding a full and proper ZA review that addresses all the requirements of Condition 78 of the 2000 ZA approval, Section 4.b of the 2001 Settlement Agreement, and the documented evidence of 25 major unapproved projects and dozens of additional permitting and compliance problems.

Our homeowner's association understands the importance of following proper rules and regulations. We rely on the rigor of the City's Zoning Administrator, Engineering, and Building and Safety reviews to keep us all safe when our local residents undertake projects that could have an impact upon neighbors. We cannot accept that the same agencies would allow an oil drill site in our neighborhood to escape environmental reviews under CEQA and even facilitate it by granting an exemption, nor can we understand how 25 major projects at an oil drill site could be allowed to happen without a review and allowed to persist when reported to the Zoning Administrator.

The correct course of action is to begin this review again and to do it properly.

Sincerely,

Scott Krieger, President

To those elected officials who are responsible for the health and safety of residents near oil drilling sites in our neighborhoods,

How can it possibly be that these sites are not regulated as the law requires? This is really appalling and unacceptable. Please, please take care of this so that the children, women, and men; who live near these drill sites; will be protected from the health hazards they present or close them down.

Thanks so much,

Denise Mordecai, Ph.D.

My name is Richard S. Weiner and I am sending this email to the Area Planning Commission in support of the Appeal filed by Amy C. Minteer, Esq. on behalf of Neighbors For A Safe Environment (NASE).

My wife and I have lived in our home for more than 22 years, which is within 1500 feet of the West Pico Drill Site.

I am one of the founders and members of the Board of Director and Secretary of NASE, which is a California non-profit Public Benefit corporation. NASE was founded in 2000 to seek better and stronger protections for the community when BreitBurn Energy Company (BreitBurn) asked the Zoning Administrator to approve expanded operating rights on the Drill Site. Breitburn is the predecessor of the current Applicant, Pacific Coast Energy Company (PCEC).

The Drill Site is in the middle of a residentially zoned neighborhood. There are numerous schools and houses of worship within close proximity.

NASE filed suit in 2000-01 against BreitBurn and the City, and won a Writ of Mandate from the Los Angeles Superior Court ordering revisions to an Environmental Impact Report and reconsideration of the ZA's decision. That Writ caused BreitBurn and the City to seek a settlement with NASE, known in this current matter as the 2001 Settlement Agreement. Among the many provisions of the Settlement Agreement was a requirement for cyclical 5 Year Reviews of Conditions by the Zoning Administrator to examine compliance, "neighborhood impacts," and "the efficacy of mitigation measures" as per a procedure for a two-year post project check-up defined in Condition 78 of the 2000 ZA approval. The 5 Year Reviews of Conditions that were supposed to commence in 2010 and be held again in 2015 never happened. NASE prompted the initiation of the current review in November 2019 by notifying the Chief ZA and City Attorney that the 2001 Settlement Agreement had been violated. The ZA has failed in the current review to abide by the terms of the 2001 Settlement Agreement and Condition 78 of the 2000 ZA approval.

As pointed out in Ms.Minteer's Appeal on behalf of NASE, the Zoning Administrator has acknowledged that PCEC has violated numerous aspects of the Settlement Agreement, the 2000 ZA approval, and City code. As she also points out, there are also substantial CEQA violations. Yet, despite the imperative of Condition 78 of the 2000 ZA approval to assess environmental impacts and the "efficacy of mitigation measures," and despite the massive record of non-compliance and illegal projects, the ZA granted an improper Categorical Exemption from environmental review. This short circuited the ZA's entire review and helped to the produce the ZA's self-contradicted conclusion that the drill site is and has been in substantial compliance. As Ms. Minteer explains, the ZA's ruling is itself in violation of both City law and CEQA.

The ZA ruling has winked at illegal oil drilling projects executed without applications, reviews, and approvals required by City Code, and thereby dismisses City law in a way it is not authorized to do. This is illegal and poses a danger not just to the communities around the West Pico Drill Site but to the entire city.

The ZA decision should be reversed and the entire matter sent back to a fresh ZA with clear instructions to rehear the matter in compliance with the terms of the Settlement Agreement, Condition 78 of the 2000 ZA approval, City code, and CEQA.

I would be on the telephone voicing my support of the NASE Appeal at the hearing, but at the time of the hearing I will be flying to a Granddaughter's engagement party in New York.

Sincerely,

Richard S. Weiner

Re: Case No. ZA-1989-17683-PA2-1A; Supporting NASE's Appeal

Dear Commissioners:

My name is Sam Yebri. I am a concerned resident, business owner, and father of four young children who attend school blocks near the oil and gas wells operating at 9101 and 9151 W. Pico Blvd., Los Angeles, CA 90035 (the "West Pico Drill Site"). I am also a former Los Angeles City Commissioner and candidate for Los Angeles City Council to represent the 5th District. I am writing to express my strong support for the appeal filed by Neighbors for A Safe Environment ("NASE") requesting that the West Los Angeles Area Planning Commission overturn the Zoning Administrator's ("ZA") decision regarding the West Pico Drill Site (Case No. ZA-1989-17683-PA2-1A).

The ZA's June 2, 2021 Letter of Determination (the "LOD") correctly noted that the operator of the West Pico Drill Site was in violation of several conditions imposed by the Board of Zoning Appeal, fire, life, and safety violations regulations of the Los Angeles Fire Department, and the terms of a Settlement Agreement that the City of Los Angeles entered into with NASE in 2001 (the "2001 Settlement Agreement"). Yet, despite these substantial and blatant violations, the LOD – without valid justification or meaningful explanation – concluded that the West Pico Drill Site was in "substantial compliance" with all city and state laws.

The LOD must be overturned. As set forth in detail in NASE's appeal, the LOD is filled with internal contradictions and legal and factual errors. Moreover, in effect, the LOD ruled that illegal oil well drilling near our homes, schools, and houses of worship may continue unabated, un-inspected, and without consequence. This ruling endangers neighboring residents and sets a dangerous precedent for similar health, safety, and environmental violations throughout the City of Los Angeles. As such, the unlawful and dangerous LOD must be overturned and this matter must be carefully reviewed *de novo* in compliance with California's CEQA laws and the terms of the 2001 Settlement Agreement.

Sincerely,

Sam Yebri
