DEPARTMENT OF CITY PLANNING

APPEAL RECOMMENDATION REPORT

West Los Angeles Area Planning Commission

Date: August 18, 2021
Time: after 4:30 p.m.*
Place: In conformity with the Governor's Executive Order N-29-20 (March 17, 2020) and due to concerns over COVID-19, the West LA APC meeting will be conducted entirely telephonically by Zoom [https://zoom.us/].

The meeting's telephone number and access code access number will be provided no later than 72 hours before the meeting on the meeting agenda published at https://planning.lacity.org/about/commissions-boards-hearings and/or by contacting apcwestla@lacity.org

Public Hearing: Required
Appeal Status: Not further appealable
Expiration Date: September 1, 2021, Subject to tolling
Multiple Approval: No

Case No.: ZA-1989-17683-PA2-1A
CEQA No.: ENV-2020-1328-CE
Incidental Cases: None
Related Cases: None
Council No.: 5 – Koretz
Plan Area: West Los Angeles
Plan Overlay: None
Certified NC: South Robertson
GPLU: Neighborhood Commercial
Zone: C4-1VL-O

Applicant: Phil Brown, Pacific Coast Energy Company

Appellant A: Amy Minteer, Chatten-Brown, Carstens & Minteer LLP representing Neighbors for a Safe Environment

Appellant B: Paul Koretz, Council District 5
Representative: Daniel Skolnick, Council District 5

PROJECT LOCATION: 9101 West Pico Boulevard

PROJECT: A Plan Approval to review the effectiveness and applicant's compliance with conditions imposed in Case Nos. BZA-2000-1697 and ZA-17683(PAD) for the existing 0.706 acre West Pico Oil Drill Site. There is no request for modification of any existing condition of approval and no proposed expansion of the use. The review is required by Paragraph 4.b of the June 2001 Settlement Agreement in the case of *Neighbors For A Safe Environment v. City of Los Angeles*, Los Angeles Superior Court Case No. BC240760, and will be conducted pursuant to Section 12.24-M of the Los Angeles Municipal Code and Condition No. 78 in Case Nos. BZA 2000-1697 and ZA 17683(PAD). The Zoning Administrator may impose corrective conditions if warranted.

APPEAL REQUESTS: Pursuant to Los Angeles Municipal Code ("LAMC") Sections 12.24 M, appeals of the entire determination by the Zoning Administrator in a Plan Approval review of conditions for the project.

Appeals of a determination by the Zoning Administrator that the Project is exempt from the California Environmental Quality Act (CEQA) pursuant to State CEQA Guidelines, Article 19, Section 15301 (Class 1) and Section 15321 (Class 21), and there is no substantial evidence demonstrating that an exception to a categorical exemption pursuant to CEQA Guidelines, Section 15300.2 applies.

RECOMMENDED ACTIONS:

1. **Deny** both appeals of ZA-1989-17683-PA2-1A;
2. **Determine** that, based on the whole of the administrative record as supported by the justification prepared and found in the environmental case file, the Project is exempt from the California Environmental Quality Act ("CEQA") pursuant to State CEQA Guidelines, Article 19, Section 15301

(Class 1) and Section 15321 (Class 21), and there is no substantial evidence demonstrating that any exceptions contained in Section 15300.2 of the State CEQA Guidelines, regarding location, cumulative impacts, significant effects or unusual circumstances, scenic highways, or hazardous waste sites, or historical resources applies.

3. **Sustain** the Zoning Administrator's Plan Approval Determination that the Conditions of Approval of Determination BZA No. 2000-1697 have been and are being substantially complied with, though necessary inspections of the facility by government agencies will continue to ensure continued compliance.
4. **Adopt** the Zoning Administrator's Determination.

VINCENT P. BERTONI, AICP
Director of Planning

Theodore L. Irving, AICP
Associate Zoning Administrator

ADVICE TO PUBLIC: *The exact time this report will be considered during the meeting is uncertain since there may be several other items on the agenda. Written communications may be mailed to the *Commission Secretariat, Room 273, City Hall, 200 North Spring Street, Los Angeles, CA 90012* (Phone No. 213-978-1300). While all written communications are given to the Commission for consideration, the initial packets are sent to the week prior to the Commission's meeting date. If you challenge these agenda items in court, you may be limited to raising only those issues you or someone else raised at the public hearing agendized herein, or in written correspondence on these matters delivered to this agency at or prior to the public hearing. As a covered entity under Title II of the Americans with Disabilities Act, the City of Los Angeles does not discriminate on the basis of disability, and upon request, will provide reasonable accommodation to ensure equal access to these programs, services and activities. Sign language interpreters, assistive listening devices, or other auxiliary aids and/or other services may be provided upon request. To ensure availability of services, please make your request not later than three working days (72 hours) prior to the meeting by calling the Commission Secretariat at (213) 978-1300.

PROJECT ANALYSIS

APPELLATE DECISION BODY

Pursuant to Section 12.24 M of the Los Angeles Municipal Code ("LAMC"), appeals of Plan Approval cases are heard by the Area Planning Commission.

PROJECT SUMMARY

On June 2, 2021, the Zoning Administrator issued a Plan Approval review of conditions for the review of the effectiveness and applicant's compliance with conditions imposed in Case Nos. BZA-2000-1697 and ZA-17683(PAD) for the existing 0.706 acre West Pico Oil Drill Site. ZA-17683(PAD) was a request for modification of conditions and methods of operation for an existing oil/gas extraction site, with an existing approved maximum of 69 wells, and approval of plans therefore permitting a 129-foot in height electronically powered derrick, Lots 883-883 of Tract 6380 on property located in the C4-1VL-O Zone.

There was no request for modification of any existing condition of approval and no proposed expansion of the use.

The review was required by Paragraph 4.b of the June 2001 Settlement Agreement in the case of *Neighbors For A Safe Environment v. City of Los Angeles*, Los Angeles Superior Court Case No. BC240760, and was conducted pursuant to Section 12.24 M of the Los Angeles Municipal Code and Condition No. 78 in Case Nos. BZA 2000-1697 and ZA-17683(PAD). The Zoning Administrator may impose corrective conditions if warranted.

Two timely appeals followed. On June 16, 2021, Amy Minteer of Chatten-Brown, Carstens & Minteer LLP on behalf of Neighbors for a Safe Environment filed one appeal. On June 17, 2020, a second appeal was filed by Daniel Skolnick of Council District 5 on behalf of Councilmember Paul Koretz.

BACKGROUND

Subject Property

The subject property is the oil and gas extraction portion of a larger controlled drill site, known as the West Pico Oil Drill Site, which was first permitted in 1965. The oil and gas extraction (drill) site is a level, rectangular-shaped, parcel of land consisting of approximately 0.706 acres, having a frontage of approximately 192 feet on the north side of Pico Boulevard and a uniform depth of 185 feet, divided by a through alley between Doheny Drive and Oakhurst Drive. (See site photos in Exhibit D)

The subject property is presently developed with an oil drilling operation with 58 wells (previously there were 59 and the operator advised there is no plan to drill the additional 10 permitted wells [as permitted by Case ZA-17683].) The drill site is enclosed on all sides with 25-foot-high walls, except for the two parking lot areas. Trees and plantings line the exterior of the walls. The drill site consists of a support building, a moveable catwalk building surrounding and attached to the derrick (drilling tower), a drilling mud processing building, two well cellars that contain the wellheads, and incidental equipment and ancillary structures. The drilling tower is mobile and can be slowly moved along rails in order to access all wellheads. The permanent, mobile, electrically powered derrick is approximately 128 feet tall and enclosed within an architectural structure. The

ground surface of the drill site is covered in concrete or asphalt at or near grade. Most permanent equipment is below grade in well cellars or located inside enclosed structures.

Zoning and Land Use Designation

The site is located within the West Los Angeles Community Plan, which designates the site for Neighborhood Commercial land uses with C4 as the corresponding zone. The subject site is zoned C4-1VL-O. The “O” suffix in the [Q]R3-1-O zone is a supplemental use district which indicates an Oil Drilling District where the drilling of oil wells or the production from the wells of oil, gases or other hydrocarbon substances may be permitted. The site is within Urbanized Oil Drilling District No. U-131 established by Ordinance No. 130,340.

Surrounding Properties

Adjacent properties to the north of the subject property are zoned R3-1VL-O and are developed with two-story apartment buildings. Properties to the south across Pico Boulevard are zoned C4-1VL-O and are developed with low-rise commercial buildings occupied by a variety of commercial and religious uses. Properties to the east across Doheny Drive are zoned C4-1VL-O are a gas station and other commercial uses.

The property to the west of the drill site across Oakhurst Drive is zoned C4-1VL-O and improved with the production facility portion of the West Pico Drill Site operated by the applicant. This production site was authorized July 28, 1967, pursuant to Case No. ZA-18893, for Lots 1037, 1038 and 1039, of Tract No. 6380 generally located at the northeasterly corner of Pico Boulevard and Cardiff Avenue.

History of this Plan Approval

Case No. ZA17683(PAD): Following the certification of an Environmental Impact Report on April 5, 2000 (EIR 98-0149 PA [SCH #98091043]), the Zoning Administrator approved a modification of existing conditions and methods of operation for the existing oil/gas extraction site, with a previously approved maximum of 69 wells, and an approval of plans permitting a 129-foot in height electrically powered derrick. In conjunction with permitting the new derrick, other modifications of conditions included an increase in fencing around the entire drilling site to a height of approximately 25 feet from the existing 12-foot wall; the installation of a 24-hour noise and video monitoring system; and the installation of an early alert detection system to alert the Los Angeles City Fire Department (LAFD) of hydrogen sulfide and methane.

The subject Plan Approval, which applies to the oil and gas extraction portion of the drill site, began with a November 19, 2019, letter from the Chief Zoning Administrator notifying the operator of the West Pico Oil Drill Site that it is required to file a Plan Approval for a review of compliance with the conditions imposed under Case No. ZA-17683(PAD). The letter from the Chief Zoning Administrator was in response to concerns raised by members of the public relative to the operation of the drill site and the enforcement of the 2001 Settlement Agreement that resolved the *Neighbors For a Safe Environment v City of Los Angeles* lawsuit. The Settlement Agreement requires the operator to submit an application for a plan approval every five years in order to conduct a compliance review to verify that the operator is complying with the conditions of approval outlined in the April 2000 determination. The Settlement Agreement states that the Zoning Administrator will conduct a review of conditions as prescribed in Condition No. 78 in Case Nos. BZA-2000-1697 and ZA 17683(PAD) and will issue a report of its review and schedule a public hearing, “if warranted.” The operator had not submitted an application for a review of conditions in several years.

On February 28, 2020, the operator submitted an application to the Department of City Planning for a Plan Approval (Case No. ZA-1989-17683-PA2) to review compliance with the conditions of approval imposed under Case Nos. BZA-2000-1697 and ZA17683(PAD). The operator did not request any modification of any existing condition of approval. While the operator also maintains a production facility site along Pico Boulevard between Oakhurst Drive and Cardiff Avenue, the production facility site is not the subject of the Plan Approval application by the terms of the requirements of BZA-2000-1697 Condition 78 and the Settlement Agreement.

On June 22, 2020, City officials conducted a site visit of the West Pico Drill Site. The City was represented by the Zoning Administrator's Office, Office of Petroleum Administration, and the Fire Department.

Public Hearings were conducted on July 9, 2020 and August 27, 2020 to take formal testimony from the residents, stakeholders, community groups, and the operator. At the conclusion of the Public Hearings, the matter was taken under advisement and the record kept open until the Determination was issued.

Records from the Department of City Planning, the Department of Building and Safety, the Los Angeles Fire Department, the Southern California Air Quality Management District, and the California Department of Conservation Geologic Energy Management Division (CalGEM) were reviewed before issuing the Plan Approval determination. Also, a review of current oil drilling and oil production best practices used to safeguard communities was conducted as a part of the evaluation.

After consideration of the whole of the administrative record, the Zoning Administrator found that the Conditions of Approval of Determination BZA No. 2000-1697 have been and are being substantially complied with, though necessary inspections of the facility by government agencies will continue to ensure continued compliance. Additionally, the operator was in violation of Condition 36, Condition 39, Condition 49 and Condition 72 of the conditions of approval imposed by the Board of Zoning Appeal in its action taken on BZA No. 2000-1697 (the appeal of Case No. ZA-1989-17683-PAD). Also, the Zoning Administrator found the operator was in violation of clause 4b of the 2001 Settlement Agreement. Further, the Zoning Administrator's Office learned the operator's production facility is in violation of Municipal Code Section 13.01-F.26, which requires that all power operations be carried on by electrical power and that said power be generated off-site. As a result, and because this process did not include a review of conditions at the production portion of the drill site, the ZA instructed the operator to file a separate Plan Approval application to obtain the authorization for the installation of the micro-turbines on the production facility site, which were installed without the approval of the Zoning Administrator.

Public Correspondence

Over 50 letters and emails were received related to the project before the Determination was issued. The issues raised in the comments included alleged ongoing compliance issues at the site, health and safety concerns related to odors and other operations, lack of inspections, concerns with the Plan Approval review process and scope of the environmental review, among other concerns. A neighborhood petition with approximately 142 signatures was submitted expressing health and safety concerns related to the ongoing oil and gas drilling and production. For all public correspondence, see Exhibit F.

APPEAL ANALYSIS

Two (2) appeals were filed in a timely manner within the appeal period ending June 17, 2021. The appellants include:

A Amy Minteer of Chatten-Brown, Carstens & Minteer LLP on behalf of Neighbors for a Safe Environment
B Daniel Skolnick of Council District 5 on behalf of Councilmember Paul Koretz

The following is a summary of the appeal points and staff's response. The full appeal justifications are provided in Exhibit E. Appeal points are organized by appeal point topic (1, 2, 3, etc.) and then by appellant (A, B). Similar appeal points are grouped for staff response.

APPEAL POINT 1: COMPLIANCE WITH CONDITIONS

Appeal Point 1-A: *"[The Zoning Administrator's Determination] fails to impose or revise any conditions to ensure these violations and impacts are rectified."*

"The ZA Determination identifies a number of these violations, but then reverses itself and makes the overarching finding that there is substantial compliance with conditions of approval. This fails to "bridge the analytic gap between the raw evidence and ultimate decision," requiring the determination to be set aside as unsupported." "This failure to ensure compliance with conditions of approval is also a violation of the California Environmental Quality Act (CEQA)."

Appeal Point 1-B *"A review of the case file indicates that the operators of the facility failed to maintain compliance with all of the conditions of the Settlement Agreement and the requirements of the Los Angeles Municipal Code in addition to other regulatory requirements. The Conditions of Approval of Determination have not been substantially complied with. Require reports of the settlement agreement are absent from the case file and open orders to comply have not been resolved. Permit history is either absent or work was done without permits. No evidence of Mitigation Monitoring for the EIR has been submitted to the case file."*

"The Letter states on page 2 that the "Office of Zoning Administration review of the whole of the record found that the operator was in violation of Condition 36, Condition 39, Condition 49 and Condition 72 of the conditions of approval imposed by the Board of Zoning Appeal in its action taken on BZA No. 2000-1697 (the appeal of Case No. ZA-1989-17683-PAD). Also, the Zoning Administrator found the operator was in violation of clause 4b of the 2001 Settlement Agreement." I believe that those violations alone as detailed by the Zoning Administrator provide ample evidence that the Conditions have not been and are not being substantially complied with."

Staff Response:

This Plan Approval is the second Plan Approval related to whether the operation has complied with the conditions of approval for the 2000 modernization of the extraction portion of the drill site. The majority of the conditions imposed in the 2000 letter of determination were related to the construction activities associated with the modernization efforts.

The first review of the conditions of approval was completed in 2006 (ZA 1989-17683(PA1)) by Zoning Administrator Daniel Green, who determined that the operator was in full compliance with all 78 conditions of approval in BZA No. 2000-1697 (the appeal of Case No. ZA-1989-17683-PAD). The Zoning Administrator's 2006 determination letter was not appealed and therefore was final (the 2006 determination is attached as Exhibit I.)

The Plan Approval at issue is the second review of the conditions of approval related to the modernization efforts of the extraction portion of the drill site. This review considered all 78 conditions of approval again, but since the construction activity was completed and its 27 related conditions reviewed and determined to be compliant, the focus of the Zoning Administrator review was on the operational (40 conditions) and general (11 conditions) conditions of approval. Of the 51 operational and general conditions, four conditions of approval were determined to be non-compliant. In sum, four out of 78 conditions imposed in conjunction with the modernization efforts on the extraction portion of the drill site were determined to be non-compliant. Of the four non-compliance conditions, it was the actual reporting that did not occur in a timely manner in three instances. The fourth alleged violations required clarification as to whether the electrical power source is from the Department of Water and Power, which it is.

The appellants' reference to "all of the conditions" overlooks the fact that the construction related conditions were reviewed many years ago and it was determined that the modernization project complied with those conditions at the time. No appeal of the Zoning Administrator's 2006 action was filed and the conclusions reached in that document cannot be challenged now

The appellant also claims the Zoning Administrator failed to impose or revise conditions to ensure the "violations do not occur again." As stated in the determination letter, two of the four violations identified have already been corrected: the Spill Prevention Plan was submitted to the case file Condition No. 36) and the Zoning Administrator verified that "the drill (oil and extraction) site is electronically powered by the Department of Water and Power through a 3,500-KVA transformer Condition No. 49. Two other conditions of approval (Condition Nos. 39 and 72) will be complied with within 60 days of the final action related to this Plan Approval.

The Zoning Administrator's decision was based on the evidence presented with respect to the application or case by the operator, stakeholders, and relevant public agencies. This evidence was compiled into the administrative record, which contains all of the evidence presented to the Zoning Administrator for consideration in connection with the application or case. Ultimately, the Zoning Administrator's determination was supported by substantial evidence in the record. Although this Plan Approval procedure did not require the Zoning Administrator to make specific findings (such as would be required in a Conditional Use Permit or Zone Variance), the Zoning Administrator's determination contains a thoughtful discussion of the thought process and reasoning for reaching arriving at his conclusion.

APPEAL POINT 2: ADDITIONAL CONDITIONS

Appeal Point 2-A: ***"****The ZA Determination includes factual conclusions that concur with several of the Municipal Code violations identified by NASE, but does not require any corrective actions, instead allowing them to continue without any consequences."*

"The Zoning Administrator stated at public hearings for this Plan Approval review that the adequacy of conditions would not be evaluated, which violates the Settlement Agreement use of Condition 78 to set the scope and process for 5 Year "Reviews of Conditions" that "evaluate the efficacy of mitigation measures" and change them if warranted."

Appeal Point 2-B: ***"****The concerning record detail shows a substantial violation of the Agreement for well over a decade, merit the imposition of additional conditions and corrective measures, including:*

a) A condition requiring the installation of an air monitoring system so as to protect the residents surrounding the drill site from fugitive emissions such as those as detailed in the Letter and to allow the

South Coast Air Quality Management District (SCAQMD) to better track such.

b) A condition such as that already agreed to by the Rancho Park Drill Site operator and the surrounding neighborhood residents and actively requested by the West Pico Drill Site operator in these proceedings to, until such time the City of Los Angeles has in place its own annual inspections ordinance, hire a third party consultant to perform an annual inspection of the West Pico Drill Site and to deliver those findings to the City of Los Angeles Petroleum Administrator within sixty (60) days of the inspection annually."

Staff Response:

The operator was found to be non-compliant with just four of 78 conditions of approval; two of the four were immediately addressed by providing the Spill Prevention Plan and verifying that the extraction site is electronically powered by the Department of Water and Power. The two other outstanding matters are related to submitting the actual documents to the Planning Department case file. The operator is instructed to provide the reports from the noise monitoring system and documents from CalGEM within 60 days of the final action related to this Plan Approval

Substantial evidence indicating a nuisance stemming from the oil drilling operation was not evident in the case file, site visit or testimony, and therefore, there was no need for additional conditions to be imposed by the Zoning Administrator.

Regarding annual inspection reporting or the installation of air monitoring system, the Council Office and the Office Petroleum Administrator may choose to work together with the operator to develop a processes and procedures for annual inspections, report, and monitoring. There is not sufficient evidence within this Plan Approval Compliance review to impose a condition requiring annual inspection reporting or the installation of an air monitoring system at this time.

APPEAL POINT 3: SETTLEMENT AGREEMENT

Appeal Point 3-A: **"***While the ZA Determination states that the City will continue with the required reviews going forward, this fails to address the impacts to NASE and others in the surrounding community that resulted from the many years the reviews were not conducted and there were numerous violations as the site."*

Appeal Point 3-B: **"***The fact that the operator did not in 2019 initiate a Plan Approval process, nor in 2011, nor in 2006, is, in and of itself, an ongoing and substantial violation of the Agreement with NASE."*

"Items from the [2001 Settlement] Agreement were not mentioned in the Letter of Determination, nor are the reports they detail to be found in the case file, which is a substantive omission."

Staff Response:

The 2000 approved modernization of the oil extraction portion of the controlled drill site required compliance with 78 conditions of approval. The conditions of approval were initially imposed by the Zoning Administrator in its approval of the project, and were upheld by the Board of Zoning Appeal, when it denied an appeal of the Zoning Administrator's action. The Board of Zoning Appeals action was subsequently litigated which resulted in the 2001 Settlement Agreement, that

required, among other things, the operator file a Plan Approval every five years to determine compliance with the conditions of approval.

In the 2001 Settlement Agreement, NASE and /or the operator agreed to conduct studies relating to the operation of the drill site following the completion of the modernization project. These studies were performed by NASE and/or the Operator, and were reviewed and discussed by the Zoning Administrator (Danial Green) in his 2006 Determination, attached as Exhibit I. Any documents provided to the City by NASE and/or the Operator are included in the case file for ZA for Case No. ZA-1989-17682-PA1, including the Health Risk Assessment prepared by Geomatix for NASE in 2005 (Exhibit G). The Settlement Agreement did not require that these studies be ongoing or repeated beyond the time frames required by the Agreement.

The Zoning Administrator also notes that several conditions mentioned in the appeals were time limited. For example, Condition No. 37 SCAQMD Reporting, states that the Office of Zoning Administration shall request that the SCAQMND report every two weeks to the Office of Zoning Administration on the air quality at the drill site during the first two years of operation, including reporting of all inspections and reports of complaints. The Zoning Administrator in its 2006 compliance review was satisfied with the reporting and therefore, the condition was deemed in compliance.

Condition No. 38, Odor Monitoring, states that the applicant (operator) shall hire an independent consultant, approved by the Zoning Administrator, to perform weekly odor monitoring during the months of June, July, August and September for the first two years of operation and report the result to the Office of Zoning Administration. Thus, only during the first two years of operating after receiving an approval, the reporting of odor was required to be performed by an independent consultant, which was approved by the Zoning Administrator. The Zoning Administrator in its 2006 compliance review was satisfied with the reporting and therefore, the condition was deemed in compliance.

There was no appeal of the Zoning Administrator’s compliance review determination that the operator was in compliance with all of the condition of approval including construction and operational conditions.

Since 2006, the conditions of approval related to the construction activity for the modernization project have been determined to be compliant, and practically speaking, do not require regular compliance review because the construction activity was completed prior to the 2006 Plan Approval review.

As for the operational conditions, the 2006 determination concluded the operational aspect of the modernization project complied with all relevant conditions of approval. It is true that since 2006, the applicant has not applied for a Plan Approval as required by the Settlement Agreement, nor has the Department of City Planning conducted another compliance review. However, there has also been very little documented evidence of violations of the operational conditions, except for the four violations mentioned above.

The Zoning Administrator acknowledges that many stakeholders expressed concerns about the presence of the drill site and acknowledges that testimony was provided at the public hearings relating to smells and noises from the drill site. However, the whole of the administrative record lacked evidence demonstrating continued violation of specific conditions of operation that would warrant a finding that the operator has violated a condition of approval.

APPEAL POINT 4: MICROTURBINES

Appeal Point 4-A: *"The operator is also in violation of LAMC § 13.01.F.26 due to the installation of microturbines at 9151 West Pico Boulevard. The ZA Determination acknowledges this violation, but does not impose any remedial conditions or required environmental review. Instead, the "Staff Review" section of the determination suggests an application for the micro-turbines is required to be submitted, proposing segmented or piecemealed cases to possibly take the place of a single larger review that could view the entirety of violations, deficient conditions, and at least 25 projects executed illegally. Splitting this up into smaller bites obscures the totality of environmental impacts and violates CEQA's requirement that the whole of a project—"all phases of project planning, implementation, and operation"—are to be considered when assessing environmental review for a project."*

Appeal Point 4-B: *""The Zoning Administrator's Office learned the operator's production facility is in violation of Municipal Code Section 13.01-F.26, which requires that all power operations be carried on by electrical power and that said power be generated off-site.""*

Staff Response:

This appeal point ignores the action before the Zoning Administrator. This Plan Approval was limited to determining the effectiveness of the conditions of approval related to the modernization of the extraction portion of the drill site only. The conditions of approval were derived from mitigation measures from an Environmental Impact Report (EIR) for the modernization of the drill site, certified in 2000. The mitigation measures were adopted as conditions of approval by the Zoning Administrator, approved by the Board of Zoning Appeals. The review of the conditions of approval is in response to a requirement or obligation to examine the effectiveness and compliance by the operator for just the modernization of the drill site, pursuant to a settlement agreement entered into to resolve litigation relating to the certification of the EIR.

The modernization project involved only the extraction portion of the controlled drill site, not the production site, and the EIR evaluated only the modernization of the extraction portion of the drill site. The Zoning Administrator's review during the Plan Approval review was consistent with the other decision-making bodies associated with approving the modernization of the extraction portion of the drill site.

The Zoning Administrator considered the effectiveness of the conditions of approval for the production facility site operation as outlined in Case No. ZA-18893. However, since the production facility is not part of the modernization project, the Zoning Administrator suggests that an application for a Plan Approval be submitted, and authorization be obtained for the installation of the microturbines. The application is due no later than 90 days from the final effective date of this decision.

APPEAL POINT 5: DRILL SITE

Appeal Point 5-A: *"As identified by NASE, the Zoning Administrator and the operator have been in violation of Los Angeles Municipal Code (LAMC) § 13.01.E.2.b since the 2000 approval in ZA-1989-17683-PAD because only one Controlled Drill Site can exist in Oil Drilling District U-131. The current ZA Determination in ZA-1989-17683-PA2 continues to insist there are two sites, despite having been shown the pertinent code and the record of ZA*

determinations from the opening of a single Controlled Drill Site in 1965 until the error of the ZA-1989-17683-PAD in 2000 purporting to see two distinct sites."

"Because the 2000 ZA approval for the site was issued in violation of these Municipal Code provisions, the 2000 approval, and all subsequent approvals and City permits that rely upon it, should be deemed void pursuant to LAMC § 11.02.

Staff Response:

Appellant's argument is not well taken. There is only one Controlled Drill Site, which is comprised of two parts: a drill (extraction portion) site and a production facility (see page 6). In 1965, the Controlled Drill Site, which was primarily extracting oil, was approved by the Zoning Administrator (ZA-17683) to service oil drilling districts U-131, U-132, and U-150. The Controlled Drill Site expanded in 1967 to include a production facility when Ordinance No 18893 was adopted by the City Council (See Exhibit J). The West Pico Drill Site is a formal Controlled Drill Site with a drilling (extraction) portion and a production facility portion. The July 28, 1967 letter of determination specifically noted that the Zoning Administrator was authorizing the "expansion" of the existing controlled drill site, to create an "enlarged controlled drill site," not the creation of a second drill site within the Oil District.

LAMC Section 13.01- defines a "Controlled Drill Site" as the particular location within an oil drilling district in an "Urbanized Area" upon which surface operation for the drilling, deepening or operation of an oil well or any incidental operation are permitted under the terms of this section, subject to the conditions prescribed by written determination by the Zoning Administrator."

The modernization project approved in 2000 involved the extraction portion of the controlled drill site. No split of the controlled drill site occurred in the 2000 approval.

APPEAL POINT 6: RE-DRILLING

Appeal Point 6-A: *"Condition 72 is in direct contradiction with LAMC §§ 13.01.H and 13.01.I because it allows redrilling of wells without a full discretionary review by the ZA, which has been expressly required by Code since at least 1955. The ZA Determination acknowledges this contradiction but fails to require any revision to the condition and compounds the error further in its unsupported interpretation of this condition. Condition 72 speaks only of "redrilling"; it does not mention drilling of new wells or conversion of wells between Class A and Class B (i.e., production and injection). The ZA Determination nevertheless stretches the already illegal Condition 72 to cover new wells and converted wells."*

Staff Response:

Condition No. 72 was imposed on the oil drilling (extraction) site as part of the modernization project (see Determination Letter, Page 27). The operator has a vested right to this condition, which gives the operator the authority to drill and re-drill without obtaining further written approval from the Zoning Administrator's office. The operator may drill up to 69 wells (as permitted by Case ZA-17683) but as with any new well, the operator must also obtain authorization from CalGEM, formerly the California Division of Oil, Gas and Geothermal Resources. As of 2000, the operator had drilled 59 wells and the condition authorized ten additional wells provided state authorization was obtained.

As for any existing well, the operator is only required to produce copies of the re-drilling filings as such wells are already authorized by the City of Los Angeles and the State of California. So, converting any of the existing 59 wells from production to injection, or injection to production, only requires that the copies of the filings to CalGEM be sent to the Zoning Administrator's office.

The Zoning Administrator acknowledges the failure of the operator to send copies of the filings pertaining to the drilling activities. The operator was instructed to submit copies to the office of Zoning Administrator within 60 days.

APPEAL POINT 7: ENVIRONMENTAL CLEARANCE

Appeal Point 7-A: *"The ZA Determination is essentially using a Class 1 exemption to legitimize years of illegal actions, which this exemption is not intended to do." "It deprives the public and decision makers of information necessary to assess the Project's impacts."*

"A Class 21 exemption exempts enforcement actions from environmental review. The ZA Determination fails to acknowledge the significant irony in relying on this exemption after identifying noncompliance but imposing no corrective enforcement actions."

"To the extent this Plan Approval reviewed any of the illegal drilling, redrilling, and converting of wells that has been conducted at the site since 2000, the City is prohibited from relying on a categorical exemption by its own CEQA guidelines in ZA Memo 133."

"Exceptions to reliance on a categorical exemption also apply. CEQA prohibits use of a categorical exemption when there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances." (CEQA Guidelines § 15300.2, subd. (c).) The ongoing legal violations on the site are unusual circumstances and those unusual circumstances have led to and will continue to lead to adverse air quality, odor, noise and other impacts on the surrounding community."

Staff Response:

As stated in Public Resources Code § 21065, a "project" as defined for CEQA review, must be "an activity which may cause either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment." While it would have been reasonable for the City to determine that the Zoning Administrator's review of compliance with and effectiveness of the conditions imposed under a previous entitlement was not a project pursuant to CEQA due to the lack of direct or indirect physical change in the environment, the City nonetheless issued Class 1 and Class 21 categorical exemptions.

The City provided detailed justification for its use of these categorical exemptions in the Zoning Administrator's Determination. The whole of the administrative record supports the City's use of these exemptions.

Class 1 and 21 categorical exemptions, at issue here, are the appropriate categorical exemptions for unmodified, continued operation of an existing drill site and related compliance review. As detailed in the Zoning Administrator's Determination and the administrative record, the City has provided substantial evidence to supports its determination that the review is exempt from CEQA pursuant to CEQA Guidelines, Section 15301 (Class 1) and Section 15321 (Class 21), and there

is no substantial evidence demonstrating that an exception to a categorical exemption pursuant to CEQA Guidelines, Section 15300.2 applies.

Pursuant to CEQA Guidelines Section 15301, a Class 1 exemption is for existing facilities and, "the key consideration is whether the project involves negligible or no expansion of use." The Zoning Administrator's Determination was provided in response to the applicant submitting documentation, as required by a Settlement Agreement; the applicant did not propose any expansion of previously permitted use. The Settlement Agreement did not obligate the City to perform de novo environmental review on the scope of the oil drilling operation as a part of the required condition review. The Class 1 exemption issued for this review was not as the appellant suggests to legalize illegal actions rather, the Class 1 exemption clarifies that the Zoning Administrator's Determination does not expand the scope of the existing oil drilling operations.

Pursuant to CEQA Guidelines Section 15321, a Class 21 exemption is for enforcement actions by regulatory agencies and, "the adoption of an administrative decision or order enforcing or revoking the lease, permit, license, certificate, or entitlement for use or enforcing the general rule, standard, or objective." The "significant irony" claimed by the appellant is not an exception to an exemption nor can it be considered as an unusual circumstance. The regulatory action would not result in any physical impacts on the environment.

The City's determination that this review falls within the Class 1 and 21 categorical exemptions also includes findings that demonstrate that none of the exceptions identified in the CEQA Guidelines apply. Here, the burden shifts to the challenging party to produce evidence showing that one of the exceptions applies to take the review out of the exempt category. The Appellants have not met their burden as there is no evidence in the record to conclude that any of the exceptions otherwise apply. Argument, speculation, unsubstantiated opinion, or narrative does not constitute substantial evidence.

Appellant's next suggestion that the City is prohibited from relying on a categorical exemption by its own "CEQA guidelines in ZA Memo 133" is not a correct statement. ZA Memorandum No. 133 (ZA Memo 133 or ZA Memo, attached as Exhibit H) is a policy memorandum establishing a revised set of standardized procedures for the acceptance and processing of future discretionary applications for oil drilling approvals pursuant to LAMC Section 13.01-H. This code section reads in pertinent part, "[any] person desiring to drill, deepen or maintain an oil well….shall file an application in the Department of City Planning on a form provided by the Department, requesting a determination of the conditions under which the operations may be conducted." (LAMC Section 13.01-H.) As this Plan Approval did not involve a request by the operator to "drill, deepen, or maintain an oil well, then neither the applicant, nor the City, was required to follow ZA Memo 133.

CONCLUSION

In consideration of the foregoing, it is submitted that the Zoning Administrator acted reasonably in approving Case Nos. ZA-1989-17683-PA2 and ENV-2020-1328-CE. Upon in-depth review and analysis of the issues raised by the appellants, no errors or abuse of discretion by the Zoning Administrator were found in regards to the appeal points raised. For the reasons stated herein, and as provided in the Zoning Administrator's Determination, the appeals cannot be substantiated and therefore should be denied. Therefore, it is recommended that the West Los Angeles Area Planning Commission Deny both appeals; Determine, based on the whole of the administrative record, that the Project is exempt from the California Environmental Quality Act (CEQA) pursuant to CEQA Guidelines, Article 19, Section 15301 (Class 1) and Section 15321 (Class 21), and there is no substantial evidence demonstrating that an exception to a categorical exemption pursuant to CEQA Guidelines, Section 15300.2 applies; Sustain the Determination by the Zoning Administrator, and Adopt the Zoning Administrator Determination.

PLAN APPROVAL
9101 West Pico Boulevard
West Los Angeles Planning Area
Zone: C4-1VL-O
D.M.: 132B169
C.D.: 5 - Koretz
CEQA: ENV-2020-1328-CE
Legal Description: Lots 883-888, Block None, Tract TR 6380

Pursuant to California Environmental Quality Act (CEQA), I hereby DETERMINE:

That the project is exempt from CEQA pursuant to CEQA Guidelines Section 15301, (Class 1), and Section 15321 (Class 21) and, there is no substantial evidence demonstrating that any exceptions contained Section 15300.2 of the State CEQA Guidelines regarding location, cumulative impacts, significant effects or unusual circumstances, scenic highways or hazardous waste site, or historical resources applies.

Pursuant to Los Angeles Municipal Code Section 12.24 M, and as required by Condition No. 78 under Case No. ZA-17683(PAD), BZA No. 2000-1697 and clause 4.b of the 2001 Settlement Agreement, between the City of Angeles, Neighbors For A Safe Environment, (NASE), Rae Drazin, Ph.D., Mina Solomon, and Breitburn Energy Company LLC, to settle litigation relating to approvals for the construction and operation the West Pico Drill Site Modernization Project, Neighbors For A Safe Environment v City of Los Angeles, Los Angeles Superior Court Case No. BC240760] ("Settlement Agreement").

I hereby DETERMINE, based on the whole of the administrative record,

That the Conditions of Approval of Determination BZA No. 2000-1697 have been and are being substantially complied with, though necessary inspections of the facility by government agencies will continue to ensure continued compliance.

This Plan Approval determination results from the research and findings of this office, as well as the testimony raised by residents and stakeholders from the community surrounding the West Pico Oil Drill Site operation. This determination is in response to the application filed by the operator as mandated by clause 4.b of the Settlement Agreement.

Research of reports from the Department of City Planning, the Department of Building and Safety, the Los Angeles Fire Department, the Southern California Air Quality Management District, and the California Department of Conservation Geologic Energy Management Division (CalGEM) was conducted before issuing this determination. Also, a review of current oil drilling and oil production best practices used to safeguard communities was conducted as a part of the evaluation of the West Pico Oil Drill Site operation. This office also conducted a visit to the site on June 22, 2020.

This Plan Approval process began with a November 19, 2019 letter from the Chief Zoning Administrator notifying the operator of the West Pico Oil Drill Site that it was required to file a Plan Approval for a review of compliance with the conditions imposed under Case No. ZA-17683(PAD), as required by the Settlement Agreement.

On February 28, 2020, the operator submitted an application to the Department of City Planning for a Plan Approval (Case No. ZA-1989-17683-PA2) to review compliance with the conditions of approval imposed under Case No. ZA-17683(PAD). The applicant did not request any modification of any existing condition of approval.

A Public Hearing was conducted on July 9, 2020 to take formal testimony from the residents, stakeholders, community groups, and the operator. At the conclusion of the Public Hearing, the matter was taken under advisement to look into the public hearing notification process as it was reported that the call-in phone number was incorrect, and that the Zoning Administrator required additional time to research statements made during public testimony.

A second Public Hearing was conducted on August 27, 2020 after it was confirmed that an error occurred in the noticing of the July public hearing (the call-in phone number was incorrect on the notice). Testimony was again taken from the residents, stakeholders, community groups, and the operator. At the conclusion of the Public Hearing, the matter was taken under advisement.

The Office of Zoning Administration review of the whole of the record found that the operator was in violation of Condition 36, Condition 39, Condition 49 and Condition 72 of the conditions of approval imposed by the Board of Zoning Appeal in its action taken on BZA No. 2000-1697 (the appeal of Case No. ZA-1989-17683-PAD). Also, the Zoning Administrator found the operator was in violation of clause 4b of the 2001 Settlement Agreement.

Further, the Zoning Administrator's Office learned the operator's production facility is in violation of Municipal Code Section 13.01-F.26, which requires that all power operations be carried on by electrical power and that said power be generated off-site.

The details of these violations, as well as the Zoning Administrator's responses, are provided in the "Staff Review of Compliance with Conditions" section of the report.

AUTHORIZATION

Pursuant to LAMC Section 12.24 M, the Zoning Administrator may determine that existing uses may be extended on an approved site provided that plans are submitted to and approved by the Zoning Administrator.

Pursuant to LAMC 13.01-E.2(i) – A Zoning Administrator may impose additional conditions or require corrective measures to be taken if he or she finds, after actual observations or experience with drilling one or more of the wells in the district, that additional conditions are necessary to afford greater protection to surrounding property.

Pursuant to ZA-1989-17683(PA1) Condition No. 77 (Continued Oversight) - A Zoning Administrator may impose additional conditions of required corrective measures to be taken if he or she finds, after actual observation or experience with drilling one or more of the wells in the district, that additional conditions are necessary to afford greater protection to surrounding property, and Condition No. 78 (Review of Conditions) two years following the completion of construction, and the issuance of a Temporary or Permanent Certificate of Occupancy, the applicant shall submit a Plan Approval application ($523 fee) for the purpose of reviewing the effectiveness of these conditions. The applicant shall submit a 500-foot radius map with accompanying labels for owners and occupants. The applicant shall address each condition with appropriate supporting material, to the Zoning Administrator who shall contact all monitoring agencies, evaluate the neighborhood impacts of project operations and the efficacy of mitigation measures. The Zoning Administrator may impose corrective conditions of warranted. The Zoning Administrator may set the matter for public hearing if warranted.

Pursuant to clause 4.b of the 2001 Settlement Agreement, the operator is required to file a Plan Approval for compliance review on each five-year anniversary of the last review.

NOTICE

The applicant is further advised that subsequent contact regarding this Determination must be with the Development Services Center. This would include clarification, verification of condition compliance and plans or building permit applications, etc., and shall be accomplished **BY APPOINTMENT ONLY**, in order to assure that you receive service with a minimum amount of waiting. You should advise any consultant representing you of this requirement as well.

FINDINGS OF FACT

After thorough consideration of the statements contained in the application, the plans submitted therewith, and the statements made at the public hearings on July 9, 2020 and August 27, 2020, all of which are by reference made a part hereof, the whole of the administrative record as well as knowledge of the property and surrounding district, I find as follows:

BACKGROUND

The subject property is the oil and gas extraction portion of a controlled drill site, known as the West Pico Oil Drill Site, which was first permitted in 1965. The oil and gas extraction (drill) site is a level, rectangular-shaped, parcel of land consisting of approximately 0.706 acres, having a frontage of approximately 192 feet on the north side of Pico Boulevard and a uniform depth of 185 feet, divided by a through alley between Doheny Drive and Oakhurst Drive. The drill site is in the C4-1VL-O Zone and within Urbanized Oil Drilling District No. U-131 established by Ordinance No. 130,340.

Adjoining properties to the north of the subject property are zoned R3-1VL-O and are developed with two-story apartment buildings. Properties to the south across Pico Boulevard are zoned C4-1VL-O and are developed with low-rise commercial buildings occupied by a variety of commercial and religious uses. Adjoining properties to the east across Doheny Drive are zoned C4-1VL-O are a gas station and other commercial uses.

The property to the west of the drill site across Oakhurst Drive is zoned C4-1VL-O and improved with the production facility portion of the West Pico Drill Site operated by the applicant. This production site was authorized July 28, 1967 pursuant to Case No. ZA-18893, for Lots 1037,1038 and 1039, of Tract No. 6380 generally located at the northeasterly corner of Pico boulevard and Cardiff Avenue.

Pico Boulevard, adjoining the property to the south, is an Avenue I with a designated width of 100 feet and is fully improved with a paved roadway, concrete curb, gutter, and sidewalk.

Doheny Drive, adjoining the property to the east, is a Collector Street with a designated width of 66 feet and is fully improved with a paved roadway, concrete curb, gutter, and sidewalk.

Oakhurst Drive, adjoining the property to the east, is a Local Street with a designated width of 60 feet and is fully improved with a paved roadway, concrete curb, gutter, and sidewalk.

The alley, bisecting the property to the north is a through alley and is improved with asphalt pavement and concrete gutter within a 15-20-foot dedication. To the north of the alley is a parking area and an apartment building owned by the project applicant.

Following the adoption of an Environmental Impact Report on April 5, 2000, the Zoning Administrator approved a modification of existing conditions and methods of operation for the existing oil/gas extraction site, with existing approved maximum of 69 wells, and an approval of plans permitting a 129-foot in height electrically-powered derrick. In conjunction with permitting the new derrick, other modification of conditions included an increase in fencing around the entire drilling site to a height of approximately 25 feet from the existing 12-foot wall; the installation of a 24-hour noise and video monitoring system; and the installation of an early alert detection system to alert the Los Angeles City Fire Department (LAFD) of hydrogen sulfide and methane (Case No. ZA 17683(PAD)).

The subject property is presently developed with an oil drilling operation with 58 wells (previously there were 59 and the operator advised there is no plan to drill the additional 10 permitted wells.) The drill site is enclosed on all sides with 25-foot-high walls, except for the two parking lot areas. Trees and plantings line the exterior of the walls. The drill site consists of a support building, a moveable catwalk building surrounding and attached to the derrick (drilling tower), a drilling mud processing building, two well cellars that contain the wellheads, and incidental equipment and ancillary structures. The drilling tower is mobile and can be slowly moved along rails in order to access all wellheads. The permanent, mobile, electrically powered derrick is approximately 128 feet tall and enclosed within an architectural structure. The ground surface of the drill site is covered in concrete or asphalt at or near grade. Most permanent equipment is below grade in well cellars or located inside enclosed structures.

The operator also maintains the production facility site located to the west of the drill site, along Pico Boulevard between Oakhurst Drive and Cardiff Avenue. The production facility site, as authorized under Case No. ZA 18893, was not part of the modernization project analyzed in the 2000 EIR; thus, the production facility site was not addressed as part of the first Plan Approval (Case No. 17683(PAD)), its appeal (BZA 2000-1697) and the subsequent litigation or the 2001 Settlement Agreement. Further, the production facility site was not part of the 2006 Plan Approval (Case No. ZA 17683(PAD)(PA1)).

This Plan Approval, which applies to the drill site (oil and gas extraction), began with a November 19, 2019 letter from the Chief Zoning Administrator notifying the operator of the West Pico Oil Drill Site that it is required to file a Plan Approval for a review of compliance with the conditions imposed under Case No. ZA-17683(PAD). The letter from the Chief Zoning Administrator was in response to concerns raised by members of the public relative to the operation of the drill site and the enforcement of the 2001 Settlement Agreement. The Settlement Agreement requires the operator to submit an application for a plan approval every five years in order to conduct a compliance review to verify that the operator is complying with the conditions of approval outlined in the April 2000 determination.

On February 28, 2020, the operator submitted an application to the Department of City Planning for a Plan Approval (Case No. ZA-1989-17683-PA2) to review compliance with the conditions of approval imposed under Case Nos. BZA-2000-1697 and ZA-17683(PAD). The operator did not request any modification of any existing condition of approval. While the operator also maintains a production facility site along Pico Boulevard between Oakhurst Drive and Cardiff Avenue; the production facility site is not the subject of the Plan Approval application for the reason explained above.

On June 22, 2020, City officials conducted a site visit of the West Pico Drill Site as was the case in the 2006 Plan Approval review of conditions because oil drilling facilities are unique operations compared to most land uses in the City and given the heightened attention of the governing documents. The City was represented by the Zoning Administrator's Office, Office of Petroleum Administration, and the Fire Department.

Previous zoning related actions on the site/in the area include:

Subject Property:

Case No. ZA-17683-PAD-PA1 – On March 13, 2006, the Zoning Administrator determined that the conditions of approval have been and are being complied with, that the operation of the facility poses no ongoing health risk, that necessary inspections of the facility by government agencies will continue, and that further hearings of formal review by the Zoning Administrator are not indicated.

Case No. BZA 2000-1697 August 23, 2000 – The Board of Zoning Appeals denied the appeal and sustained the decision of the Zoning Administrator, while approving a modification of the existing conditions and methods of operation for the existing oil/gas extraction site (with an already approved maximum of 69 wells), and approval of plans, therefore permitting a 129-foot in height electrically-powered derrick, on Lots Nos. 883-888.

Case No. ZA-17683-PAD – On April 5, 2000, the Zoning Administrator approved a modification of existing conditions and methods of operation for the existing oil/gas extraction site (with an already approved maximum of 69 wells), and approval of plans, therefore permitting a 129-foot in height electrically-powered derrick, on Lots Nos. 883-888.

Case No. BZA 4121 – On March 7, 1990, OXY, USA, Inc.'s appeal was granted limiting portable derrick hours of operation to 8 a.m. to 5:30 p.m. Monday through Friday, not to exceed 10 working days a month, in lieu of OXY's request not to construct a structure to obscure oil dwelling and related equipment.

Case No. ZA-17683 – On April 17, 1965, the Zoning Administrator approved a drill site with an enclosed drilling structure, known as a derrick. Under Case Nos. CPC 18356, 18357 and 19667, respectively, Oil Drilling Districts U-131, U-132 and U-150 were created by the City Council.

Surrounding Properties:

Case No. ZA-18893 - On July 28, 1967, the Zoning Administrator authorized an extension of the controlled drill site for the installation and operation of additional production [Production Facilities Site] in connection with the existing or future oil wells as authorized.

Other Public Agency Actions:

Los Angeles Department of Building and Safety (LADBS)

Permit # 00010-10001-02105 - Permit issued January 6, 2003 for the [New One Story Building "Mud Bldg H2 Occ, 2,410 sq. ft Type V-N & Support Bldg S2 Occ 6,500 sq ft Type II-N" 1-sty PHASE I ONLY] TO CORRECT PARKING: 12 Existing "NO CHANGE" and legal description, location 9101 Pico Boulevard.

Permit # 00010-10000-0215 - Certificate of Occupancy issued July 30, 2003 for the Mud /Storage Building and Support structure, location 9101 Pico Boulevard.

Permit # 11045-90000-00107 – Permit issued May 19, 2011 for the changing out of an air compressor in the support bay, location 9101 Pico Boulevard.

Permit # 11045-90000-00111 – Permit issued May 24, 2011 for replacing an air compressor, location 9101 Pico Boulevard.

Permit # 17041-10000-43682 – Permit issued December 7, 2017 for the installation of an IPGSM system, located at 9101 Pico Boulevard.

Los Angeles Fire Department (LAFD)

February 7, 2013 - The Los Angeles Fire Department issued a Fire/Life Safety Violation notice ordering the operator to "Comply With the Requirement as Noted" following a Fire and Life Safety Inspection which revealed that the property was required to test and repair its protection equipment as prescribed by LAMC Section 57.01.35 and 57.20.15. *(The operator corrected the violation.)*

June 16, 2015 - The Los Angeles Fire Department issued a Fire/Life Safety Violation notice ordering the operator to "Comply With the Requirement as Noted" following a Fire and Life Safety Inspection which revealed that the property was required to provide on every oil well or mount on wall a sign or plate showing the LAFD number that is assigned to each oil well. *(The operator corrected the violation.)*

September 21, 2017 - The Los Angeles Fire Department issued a Fire/Life Safety Violation notice ordering the operator to "Comply With the Requirement as Noted" following a Fire and Life Safety Inspection which revealed that the property was violation of several section of the fire code. The operator was ordered to correct violations related to LAMC Section 57.5706.3.2.2. (Discharge and Combustible Material On Ground). *(The operator corrected the violation.)*

November 24, 2018 - The Los Angeles Fire Department issued a Fire/Life Safety Violation notice ordering the operator to "Comply With the Requirement as Noted" following a Fire and Life Safety Inspection which revealed that the property was violation of several section of the fire code. The operator was ordered to correct violations related to LAMC Section 57.5706.3.2.2. (Discharge and Combustible Material On Ground) and LAMC Section 57.5706.3.16.1 (Nonoperating Oil Wells) *(The operator corrected the violation.)*

February 25, 2020 - The Los Angeles Fire Department issued a Fire/Life Safety Violation notice ordering the operator to "Comply With Requirement As Noted" following an Annual Fire and Life Safety Inspection which revealed that the property was in violation of the municipal code and ordered to correct such violation. LAMC Section 57.5706.3.16.1 (Non-operating Oil Wells) states "Abandoned or reactivated oil well, in which for a continuous period of one year has not been in operation or has ceased to produce petroleum or natural gas shall be abandoned or reactivated in 30 days after notice has been given by the Chief." The operator has not filed in any application to abandon the wells nor has

there been an attempt to re-activate the wells. (*As of April 29, 2021, the operator has yet to correct the violation according to Inspector I. Rodriquez of the Fire Department Harbor Fire Prevention Unit. The Zoning Administrator understands that the operator is cooperating with the Fire Department to correct the violation.)*

South Coast Air Quality Management District (SCAQMD)

March 28, 2018 – SCAQMD issued a series of Permits to Construct relative to the installation of a microturbine on the operator's production facility site. The permits were granted with the requirement to comply with ten conditions. SCAQMD subsequently issued a series of Permits to Operate which were related to the Permits to Construct.

February 28, 2020 - SCAQMD issued a Notice of Violation for a leak over 50,000 ppm detected from Well #41 during [the] District inspection. The leak violated Rule 1173 which regulates Fugitive Emissions of VOC. The matter has since been corrected and the operation is in compliance; however, the violation has not been closed by the legal team of the SCAQMD.

Department of Conservation, Division of Oil Gas and Geothermal Resources (DOGGR), ((now California Geologic Energy Management Division (CalGEM))

April 17, 2019 - DOGGR issued a Safety Systems and Environmental Lease Inspection report for the West Pico Drill Site concluding that "[tested safety systems responded as designed. No violations were observed during the lease inspection."

PUBLIC HEARING

The initial public hearing on this Plan Approval application was conducted July 9, 2020, remotely in accordance with the Governor's Executive Order N-29-20 dated March 17, 2020 and due to the concerns over COVID-19. However, it was discovered upon the close of the hearing that the hearing notice was issued in error. A second remote public hearing was conducted on August 27, 2020.

Testimony from both hearings is incorporated into this report.

July 9, 2020 Testimony

Mike Finch – Applicant's Representative

- There are some items, we'd like to bring up as part of the compliance review, some communications we had with stakeholders, and some considerations for the Zoning Administrator,
- My opening remarks relate to the notice and the July 8th letter, which says something along the line that there is no request for modifications of any existing conditions of approval,
- The Pacific Coast Energy Company owns and operates the drill site located at 9101 West Pico Boulevard,
- We own the parking lots and the attached production site on the other side of Oakhurst Drive,

- We have 58 wells; previously there were 59 wells; West Pico Well 23 was abandoned; there are 7 injectors; there are 11 conductors remaining on the site,
- The drill site has the wells, the piping and rigs and associated drilling equipment and workover equipment,
- The fluids go through underground piping over to the production site, where the oil, gas and water is separated, and the water is returned back to the drill site where it is injected into the injector wells,
- The project was originally owned by Oxy until 1993, and then it was purchased by Breitburn Energy, that was from 1993 to 2016,
- Pacific Coast Energy Company (PCEC) became the owner from 2016 to 2019,
- PCEC is now under new ownership, through a company called New Bridge,
- I want to touch upon compliance review,
- Condition No. A-14 [Exterior Lighting] (from Case 17683-PAD [Exterior Lighting], talks about not having streetlights above the walls; the lights were installed at the request of PCEC; the lights are owned and operated by the City of LA,
- The idea is to light the area up to reduce some of the activity in the area,
- Condition No. B-36 [Spill Prevention Plan], A SPCC (spill prevention and control countermeasure) plan was provided as part of the submittal for the process; we are seeking clarification; the condition is lacking in direction.
- Typically, Spill Prevention Plans have to be reviewed every 5 years,
- Condition No. B-39 [Noise Monitoring] talks about quarterly noise report that have to be submitted.
- We have reviewed several of the noise exceedances and the majority are related to traffic, sirens, garbage trucks, gardeners,
- Going forward, it seems somewhat impossible to have a written report done and submit it quarterly,
- We would like to work with the ZA and the community to better manage the reporting,
- The noise monitoring system was down for about two months; it was repaired in February 2020,
- Condition B-49 [All Electric Power] is a condition that is interesting because it relates to drilling and re-working operations at the site, shall at all times be carried on by electrical power, and such power shall not be generated at the control drill site or in the district.
- We know now that that is not happening; however, we have another site which is the production site, and a micro turbine was installed in 2018,
- It is important as it relates to our request later in the presentation,
- Condition No. B-61 [Leak Detection and Odor Control] – we did not provide all the odor monitoring reports, but we provided a sampling,
- The reason is that we would have to scan 365 reports for several years,
- But we do in fact have those reports,
- Condition No. C-72 [Limitation of Well Redrilling] is a little bit confusing,
- There is some confusion on the operator's side as to what is required versus what is not required as it relates to drilling wells on the site,
- When you look at [LAMC Section] 13.01 H and I; there seems to be a conflict there,
- We want to seek additional guidance or clarification on such a condition,
- We have been working with one primary stakeholder who represents a couple folks,
- Through the discussions, we have a come up a few things we would like to offer up today, which we believe would be beneficial for everybody,
- It is categorized in our July 8th letter and also in an email dated June 19th,

- The three items discussed we are committed to doing, if the Zoning Administrator believes this would be helpful,
- The first item relates to several wells, two wells that had been drilled and there were some re-drills and some conversions that happened post 2000,
- Looking back on the case numbers on both the sites, we are interested if those are going to need some sort or Zoning Administrator approval retroactively,
- It was our understanding that there may be a condition in this Plan Approval that says come back at a later date through a subsequent process and go through and have those things approved,
- Another other item is related to the micro turbine on the production site,
- The other two items we'd like to offer up and are committed to doing, is to have condition that calls for an annual inspection of the site performed by the Petroleum Administrator or third party
- Last, we are willing to evaluate a fencing line area emissions monitoring system to see the economic and technical feasibility of such a system and potentially install a system,
- Really, what we are asking is to continue our operations with the conditions, with the exception of the items just discussed,
- We would like to see some changes that clarify existing conditions and also add some conditions that would provide a safer operation going forward,

Richard Weiner – Officer of N A S E

- We are a party in the lawsuit,
- The Settlement Agreement mandates a 5-year review of the drill site,
- I'm concern about the reported odor problems, and reported compliance problems,
- We believe there must be annual compliance inspections and 24-7 emissions monitoring,
- The City's failure to properly request an environmental review as required by CEQA, is disturbing,
- NASE and I are represented by Professor Michael Salman, who submitted an email to you,
- We endorsed his written submissions and statements given at the hearing,
- We want clarity and transparency to continue and be an essential part of the hearing and reporting,

Aria Zarifpour - South Crest Drive Resident

- The phone number on the flyer is incorrect; I had to do research to find this number,
- Lots of residents are not aware of this number,
- I would like to see a new hearing,
- I would like to see the same level of care and sensitivity provided to prevent the combustion on operating this drilling investment, extended to this community,
- There should be a review every 5 year as mandated 14 years ago,
- We have been left in the dark for 14 years,
- I propose four initiatives:
    1. The installation of an on-site 24-7 air quality monitoring system to ensure air quality violations are caught on the spot,
    2. An independent 3rd party oversight commission with no ties or input from the operator,
    3. Long term studies conducted to identify the correlation between higher health risk associated with living within 1,500-foot radius of the site,
    4. Annual on-site testing,

- I hope the safety and health of the community is more important than the status quo of non-compliance.

Michael Salman – Representative
- Emeritus Professor of History at UCLA, where I have studied the history and the present-day regulations of the oil industry,
- I represent Mr. Richard Wiener and Ray Drazin, they are officers of NASE,
- Parties to the 2001 Settlement Agreement with the City of LA that required this review to be held on a 5-year recurring basis,
- We prompted the Chief Zoning Administrator to order the holding of the review by notifying the City in November 2019 that it was out of compliance with the settlement agreement,
- We call for the City to conduct a complete compliance review,
- We did a review of the conditions, and we found 25 non-compliance issues,
- The LAMC has been clear such activities require zoning approval,
- LA refuses to do a complete compliance review,
- The Petroleum Administrator did a desk top inspection,
- The Petroleum Administrator missed everything,
- They did not consult with the state records,
- CalGEM records the show work done with approvals; that's wrong,
- There are no CE documents in the case file,
- We request 1) annual inspections, 2) [fence line] monitoring of emissions, 3) compliance with the 2001 Settlement Agreement, 4) 5-year performance monitoring.

Sofia Lewis - Resident
- I'm a resident with asthma,
- I'd like to know what's being done to prevent leaks,
- I was not aware of the oil drilling facility.

Sherry Lewis – Resident
- Senior Citizen with medical concerns,
- I noticed a foul smell in the air,
- The smell contributed to my stress,
- Health concerns limits my ability to shop only in the neighborhood,
- I support a plan for annual inspection,
- I support a plan for continue 24/7 monitoring.
- I support a plan for compliance with the settlement agreement,
- The company agrees to complying with the regulations.

Christina Pisano - Resident
- I'm concern with health affects; there is a lack of transparency,
- If I smell gas, who do I report it to,
- Who informs us about an emergency,
- I request a plan for annual inspection,
- I request a plan for 24/7 emission monitoring,
- I request a plan for compliance inspections,
- I'm disappointed that they're putting profits over people.

Amy Zelzer - Beverly Boulevard Resident
- I'm an attorney who represented Porter Ranch,
- There should be clear signage of an oil drilling operation,

- People need to know; people exposed to constant exposure are at risk,
- There should be an annual inspection report; there should be 24/7 monitoring,
- There should be ½ mile buffer to protect the community.

Charlie Carnow - Alcott Street Resident
- I'm perplexed about the hearing notice, the categorical exemption review,
- This is surprising; I'm for 24/7 emission monitoring,
- There should be signage for complaints in the front of the facility.

Dr. Rae Drazin, PhD
- N A S E member,
- The Settle Agreement is not being enforced,
- There are still concerns.

Rabbi Yonah Bookstein – Pico Robertson Health Coalition
- I represent the Pico Robertson Health Coalition,
- Some callers are members of the coalition,
- It's unacceptable that the hearing notice had the incorrect number,
- I question that the hearing is completely transparent,
- I want to focus on two issues:
  1. Chemical smells came from the operation and we had to have people vacate the building,
  2. The plan approval has shown to be unacceptable; so how can the hearing be conducted without a proper environmental report?
- I'm puzzled by the lack attendance,

Daniel Scholnik – CD 4 Representative
- The wrong phone number is inexcusable,
- The Council District Office wants the drill site shut down.

August 27, 2020 Testimony

Mike Finch – Representative, Pacific Coast Energy Company, LP
- I want to cover the following topics: I got a couple of opening remarks, I'll talk the site location and the general description of the operation, the ownership history, PCEC compliance review of conditions, working with some stakeholder and some considerations for the Zoning Administrator,
- My opening remarks go back to our letter dated July 8, 2020, as it relates to the hearing notice,
- There is no request for modifications of existing conditions of approval; I want to bring it to your attention because it will be relevant,
- The site location and general description of the operation,
- My opening remarks relate to the notice and the July 8th letter, which says something along the line that there is no request for modifications of any existing conditions of approval,
- The Pacific Coast Energy Company owns and operates the drill site located at 9101 West Pico Boulevard,
- We own the parking lots and the attached production site on the other side of Oakhurst Drive,
- We have 58 wells; previously there were 59 wells; West Pico 23 was abandoned; there are 7 injectors,
- Now there are 11 conductors remaining on the site,

- The drill site includes the wells, the piping and rigs and associated drilling equipment and workover equipment,
- The fluids go through underground piping over to the production site, where the oil, gas and water is separated, and the water is returned back to the drill site where it is injected into the injector wells,
- The project was originally owned by Oxy until 1993, and then it was sold to Breitburn Energy, that was from 1993 to 2016,
- Pacific Coast Energy Company then became the owner from 2016 to 2019,
- PCEC is now under new ownership, through a company called New Bridge,
- I want to talk about compliance review on Case No. 17683 from the 2000 approval,
- Condition No. A14, basically says there are not supposed to be any streetlights installed above the wall of the facility,
- There were some lights installed at our request by the LADWP and operated by LADWP, but paid for by PCEC,
- That's a condition we would like to have looked at,
- Condition No. B-36 [Spill Prevention Plan] A SPCC (spill prevention and control countermeasure) plan was provided as part of the submittal for the process; not sure if this was submitted on an ongoing process,
- The condition is vague, and we would like to get some clarity as to how often we are supposed to submit the SPCC plan,
- Typically, the plan a reviewed every 5 years or sooner, if substantial changes occur,
- [Condition No.] B-39 A-6, [Noise Monitoring] ask for a quarterly noise report to be submitted,
- We have reviewed several of the noise exceedances and the majority are related to traffic, sirens, garbage trucks, gardeners,
- Going forward, it seems somewhat impossible to have a written report done and submit it quarterly,
- We would like to work with the ZA and the community to manage the reporting better,
- [Condition] B-39 [Noise Monitoring], we had our noise monitoring system down for about two months,
- It was repaired in February 2020,
- [Condition] B-4 [All Electric Power] is a condition that is interesting because it relates to drilling and re-working operations at the site which shall at all times be carried on by electrical power, and such power shall not be generated at the control drill site or in the district.
- We know now that that is not happening; however, we have another site which is the production site, and a micro turbine was installed in 2018,
- It is important as it relates to our request later in the presentation,
- Condition No. B-61 [Leak Detection and Odor Control] – we did not provide all the odor monitoring reports, but we provided a sampling,
- The reason for that is that we would have to scan 365 [reports] for several years,
- But we do in fact have those reports.
- Condition No. C-72 [Limitations on Well Redrilling] C72 is a little bit confusing.
- There is some confusion on the operator's side as to what is required versus what is not required as it relates to drilling wells on the site,
- When you look at [LAMC Section] 13.01 H and I; there seems to be a conflict there,
- We want to seek additional guidance or clarification on such a condition,
- We have been working with one primary stakeholder who represents a couple folks,

- Through the discussions, we have come up with a few things we would like to offer up today, which we believe would be beneficial for everybody.
- It is categorized in our July 8th letter and also in an email dated June 19th,
- There are three items discussed we are committed to doing, if the Zoning Administrator believes this would be helpful,
- The first item relates to several wells, two wells that had been drilled and there were some re-drills and some conversion that happened post 2000,
- Looking back on the case numbers on both the sites, we are interested if those are going to need some sort of Zoning Administrator approval retroactively,
- It was our understanding that there may be a condition in this Plan Approval that says come back at a later date through a subsequent process and go though and have those things approved,
- Another item is related to the micro turbine on the production site,
- The other two items we'd like to offer up and are committed to doing is to have condition that calls for an annual inspection of the site performed by the Petroleum Administrator or third party
- Last, we are willing to evaluate a fencing line area emissions monitoring system to see the economic and technical feasibility of such a system and potentially install a system,
- Really, what we are asking is to continue our operations with the conditions, with the exception of the items just discussed,
- We would like to see some changes that clarify existing conditions and also add some conditions that would provide a safer operation going forward,

Linda Theung – Board Member South Robertson Neighborhood Council

- The governing board discussed this review and compliance problems at the site and the need for the ZA to assign new conditions,
- We are deeply concern about the record of compliance problems, including odor problems, the Fire Department, South Coast Air Quality Management District citations and the failure to hold 5-year reviews,
- There have been 25 unapproved projects that have been executed since 2000,
- We are deeply troubled by the City's failure enforce conditions and to perform a comprehensive compliance inspection before bringing case to hearing, and the City's refusal to perform an environmental review as required by state law, and city guidelines,
- Our board voted on June 18 to send a letter on this case; we heard at the meeting the operating company was willing to acknowledge in writing that there have been 25 unapproved projects executed at the site since 2000,
- Two new, twelve redrilling, and the conversion of 10 wells from producer to injector,
- All required discretionary review and approval by the Zoning Administrator per the code,
- PCEC sent a letter to the Zoning Administrator acknowledging the 25 projects did need a review,
- Our letter dated June 18th did not reference the full scope of the project,
- All of these unapproved projects require CEQA review and are ineligible for a categorical exemption,
- Splitting the projects from the current review will be illegal piecemealing, in order to obscure the fullness of the environmental impact,

Charlie Carnow – Alcott Street Resident

- I want to echo the Neighborhood Council's comment,

- Not sure why we are here; it appears PCEC agrees that the conditions need changes,
- We need annual emissions monitoring, annual inspection and 24-7 emissions monitoring,
- The environmental review has exceptions to the exceptions provided by categorical exemptions,
- There admittedly are tons of unpermitted drilling sites on the property,
- Not sure why its controversial that we would need a more thorough environmental review, given a lot of the assumptions of the approval were violated or were wrong,
- I hope the conditions are changed to reflect what the community has demanded and to get the appropriate environmental review.

Scott Silver – Real Estate Attorney and Investor

- I live two blocks south of the Rancho Park Drill Site,
- It is connected to this drill site; for me, it is like ground hog day,
- Following the November 17 Mercaptan spill, I became more educated about oil drilling,
- The City has a lack of monitoring and enforcement of existing conditions of zoning,
- And the Zoning Administrator is unwilling to add conditions to zoning, even when the public is calling for conditions to be placed on the site,
- Mr. Irving, you were the ZA in the [Rancho Park] case, and I was upset to hear that unless there is a public nuisance at the drill site then the conditions of annual inspect and emission monitoring are not required.
- Why should you wait until there is a nuisance to have these public safety laws enacted and enforced?
- The City should be doing annual inspections and emissions monitoring to prevent a nuisance and not in response to a nuisance,
- The drill site owners have been more responsive and transparent, and voluntarily want to bring their sites up to code,
- They invite our inspections; they invite City inspections,
- The City Council and our Council Districts say they are going to do these inspections, but it has been three years since the City Council instructed the City Attorney draft an ordinance for inspections,
- This is another opportunity to finally walk the walk, not just talk the talk,
- The oil company is conceding to the request of the community and agreeing to the conditions of emissions monitoring and annual compliance inspections,
- Let's not wait for a nuisance, spill or emergency and let's start doing the annual inspection,

Cherie Lewis- Attorney / Senior Citizen

- Because of the polluted air and smells, I limit my time in the area,
- Sad, I cannot fully shop in my own neighborhood because of health concerns,
- I'm sad for the children attending schools in the area,
- I support the plan to correct the violations of the Settlement Agreement, California State law and Los Angeles city law,
- I support the plan to monitor the drill site on a 24-7 basis, and to conduct annual inspections of the drill site,
- I thank the drill company for its willingness to improve its conduct in the neighborhood,
- I heard the office of Paul Koretz is opposed to this plan and, I'm very disappointed,
- I call upon Mr. Koretz to review his stance on this matter and work with his constituents,

- I request the Zoning Administrator accept this plan so that the long overdue process to remedy this unhealthy situation can began as soon as possible,

Michael Salman – Representative

- At the beginning of the hearing, you indicated this is a controversial hearing,
- On November 19, 2019, the Chief Zoning Administrator ordered the holding of this review,
- The officers of NASE complained to her that the 2001 Settlement Agreement called for recurring 5-year review and that they were never held,
- She said the review is mandated by Clause B of the Settlement Agreement, approved by City Council,
- Clause B invoked Condition 78 of the 2001 ZA approval, an approval reached with a full environmental approval,
- Condition 78 says the Zoning Administrator shall evaluate the neighborhood impacts and the efficacy of the mitigation measures; the Zoning Administrator may impose corrective conditions if warranted,
- The title of Condition 78 is "Review of Conditions" not review of compliance,
- The efficacy of conditions set in conjunction with a full environmental impact report, under CEQA, is what is supposed to be going on,
- This should not be a review of compliance but a review of efficacy of conditions,
- Conditions whose efficacy has failed,
- The review is violating the Settlement Agreement and Condition 78 of the 2000 approval,
- Evaluating the efficacy of the conditions cannot be done outside of the CEQA process; giving this review a categorical exemption puts it outside the CEQA process,
- The Department of City Planning's application instructions (master application) Item No 4 says - The applicant must provide information regarding any intent to develop a larger project.
- On June 19, 2020, PCEC sent the Chief Zoning Administrator an email in which PCEC enumerated 25 projects that had been conducted at the site and executed since 2000 without review by the ZA,
- Including 24 major oil well operations, drilling new wells, re-drilling existing wells, and converting wells,
- 24 operations in which the LAMC says the Zoning Administrator must do a discretionary review and grant an approval before such operation can be conducted,
- Given the Department of City Planning's own application instructions, the application for this case needs be amended to include the 25 projects,
- The reason is under CEQA, if you have a larger project and you split it up, you segment or you piece meal it into smaller parts, that skews the full environmental impact,
- The State Supreme Court has called this piecemealing; since the 1970, it has repeatedly ruled it is illegal,
- PCEC is not doing the piece mealing; the Zoning Administrator is doing it to prevent the possibility of a proper environmental review that could see the scope of the entire project,
- The California Environmental Quality Act, dates back to 1970,
- It is the State of California landmark environmental protection legislation,
- CEQA has both procedure and substantive requirements, part of which the environmental review is supposed to inform decision makers and supposed to inform the public,

- So, the public has access to environmental information so that the public can be informed participants in public decision making,
- A CEQA clearance can't be done after the fact; an environmental review under CEQA has to be done early in the process so that it can inform the process,
- Final point concerns the Zoning Administrator's proposal, not the applicant, to use a categorial exemption,
- I would like to know why Mr. Irving keeps changing the class of the categorical exemption,
- There are no documents in the file about the categorical exemption,
- The only documents that have any notation about the environmental clearance is the hearing notice; it says Class 9 and Class 21 categorical exemption,
- At the July 9 hearing, Mr. Irving first said it was a Class 1 Categorical Exemption, then at the end of the hearing, he said it was a Class 21 Categorial Exemption,
- Mr. Irving reiterated it's a Class 21 Categorical Exemption.
- Class 21 is for enforcement, enforcement would mean referral for prosecution or revocation,
- This is not a revocation proceeding, which would be governed LAMC Section 12.27.1.
- Mr. Irving says it's a review of compliance; that's not covered by Class 21,
- Any categorical exemption is inappropriate because we are dealing with a review.
- Condition 78 of the 2000 approval says it is about the efficacy of mitigation measures that have transparently failed,
- These are mitigation measures that were set with an EIR back in the 2000 approval,
- And we are also dealing with 25 unapproved projects including 24 major well operations,
- Bringing this case forward with a categorical exemption is a travesty that violates state law.
- All of this has been brought to the attention of the Zoning Administrator, the City Attorney's Office and the Council Office by Amy Mateer, who is a lawyer retained by NASE (Neighbors for A Safe Environment),
- NASE is a locally based community environmental organization that won the settlement agreement in 2000,
- Ms. Mateer walks through this issue step by step; there is more going on that is illegal,
- We are looking at a smoldering pile of illegality on the part of the City,
- As Scott Silver said, an oil company has sat up straight and looked the situation square in the face, and has been honest about it and has come forward to do what the public has requested, but the City has refused to do it,
- Very last point, in 2001 Mike Feuer was Council Member of CD 5, and was the member who introduced the motion to approve the 2001 settlement agreement,
- In the 1995 review, when Mike Feuer was Councilmember elect, he wrote to the Zoning Administrator,
- Mr. Feuer said there needs to be independent monitoring of noise, odors and air quality; that's basically calling for inspections,
- In 1995, Mike Feuer knew inspections were needed because there were none,
- 1995 was 25 years ago; Mr. Feuer has been the City Attorney since 2013,
- Mr. Koretz has been the Council member since 2009; he was Councilmember when the 2010 review didn't happen; he was the Councilmember when the 2015 review didn't happen,
- These are not problems that are unknown to the city, nor unknown to Mr. Feuer or Mr. Koretz,

- The need for inspection of oil sites is well known and widely known,
- And it's not happening because the Zoning Administrator, the City Attorney and Council are refusing to do it,
- All of that is going on in this case in a smoldering radioactive pit of illegality by the City refusing to observe the CEQA, refusing to observe the City's own guidelines for implementing CEQA, refusing to observe the City's own municipal code.
- People should be shocked and outraged; remember everything that happens,

Rabi Yonah Bookstein – Pico Robertson Health and Safety Coalition Member

- I've lived and worked in Pico Robertson since 2009,
- I represent the Pico Robertson Health and Safety Coalition, a group of 85 concerned citizens,
- When the City approved the drilling of oil in the 1960s, it was generations ago,
- Los Angeles and science have progressed substantially in the last 70 years,
- Our group of 85 formed almost two years ago; we started because of our ongoing concerns including complaints by residents of odors,
- In addition, it was formed because people discovered that they were living next to an active oil well site,
- One of the affects building a 20-foot-high wall around the oil operations and around the processing site on the block west, was that many residents didn't know what they were living next to,
- We are very disturbed that our City Councilman, the City Council and the Zoning Administrator seem intent on blocking environmental protections,
- Recently, I listened to a state hearing on the future of oil drilling in the state,
- The oil industry lined up dozens of employees to speak on behalf of their positions,
- In this case, there was nobody to call in support of the continued operation of the site as things are going now; there is no support for things to continue,
- Everything we've heard today and at the previous hearing from the citizen groups, SORO Neighborhood Council, NASE, our organization, including the operator, thinks something has to change,
- Yet, that is not the position of the Zoning Administration Office because we are going on with the hearing,
- Studies have shown the potential negative affect of ongoing exposure to volatile organic compounds; these compounds have no smell and impossible to detect by your nose,
- We know the operation has been cited by the Los Angeles Fire Department for safety violations,
- We agree with the testimony from Mr. Silver, from the Rancho Park Citizenry and our dear Professor Michael Salman,
- It's shocking the City doesn't listen to these groups,
- The operators have major violations; we've known that; it's documented,
- Perhaps these occurred under previous ownership, but that does not mean they should be looked over,
- This review should be following the requirements of the 2001 Settlement Agreement and Condition 78 of the 2000 approval,
- We are supposed to be discussing the efficacy of mitigation measures and a comprehensive compliance inspection by the City Petroleum Administrator,
- We are familiar with the infamous desk inspection; but we actually need a real inspection before the review goes to hearing,
- This hearing shouldn't be happening; we should be having this hearing at another time,

- There needs to be an environmental review under CEQA; the categorial exemption that we are operating under for this hearing is incorrect and violating state law,
- Our group since the beginning has been advocating for immediate inspections,
- Followed by annual compliance inspections; we need 24-7 fence line monitoring with evidence that is recorded and available to the public,
- We need the 5-year review which was mandated by the settlement agreement,
- Mike Feuer was the Councilman for our district; the City Council, City Attorney and the Councilman should be on top of their game,
- If they are not going to look out for the citizenry, why are they in their office,
- It was pointed out that there are micro-turbines onsite; he did mention they are forbidden; while they may have been put at the production facility; it is still one site, it's not like it is a different site,
- The whole site operates under one permit that the City agreed to in the 1960s,
- You can't have a micro turbine on a site, anywhere on the location; it doesn't matter if it's near the oil well or the production facility,
- They were forbidden by the settlement agreement,
- If they are to be allowed, they have to be done in a way which ensures the safety of all involved,
- The annual monitoring of odors is necessary,
- The harmful chemical that are released when there are errors in the process,
- The operator pointed out that there were no phone calls of odor complaints,
- This is not evidence that there might not be problems,
- For example, my office is across the street from the oil well; I have been working from home during COVID and many other people; most of the businesses are closed down so there are not many people on the street to smell the odor,
- So that fact that there are no phone calls is really not evidence,
- When people do smell things, we instruct them to call South Coast Air Quality Management District,
- You really have to be a detective to find the phone number on the building; there are these small poorly lit signs on one of the doors,
- For all those reasons, I find it really insufficient to take in consideration that this site is not causing trouble,
- We are approaching the Jewish Holiday, Rosh Hashanah, the Jewish New Year,
- It's a day of introspection, coming to terms with the things we did wrong in the previous year; it's about repairing wrongs,
- What are we going to do going forward?
- We have to be true not only to City code, state law or to the will of the neighborhood, but we also have to be good before God,
- What are we doing going forward; we can fix the past mistakes, but we have to first acknowledge the past mistakes and we have to come to terms with those mistakes, and then come up with solutions to fix those mistakes,
- I find the operator is more interested in fixing and amending past wrongs than our City Councilman,

Jennifer Susich – Glenville Resident

- Thanks to everyone who has spoken this morning,
- Everyone that spoke early has illuminated the issues quite well,
- As someone who moved to the area in 2016 and has had numerous health issues, I'm very interested in what's going on at the site, and possible violations,
- I want to echo their calls for there to be environmental reviews, and for there to be more regulations and ongoing checks to make sure everything is done appropriately,

- I'm very concern as someone who lives in close proximity and that there are multiple schools in the area,
- It's very concerning and disturbing to know that there are so many violations.

Richard Wiener - NASE Member

- I'm one of the founders and member of the board of directors of NASE,
- NASE is party to the 2001 Settlement Agreement, which calls of the review of conditions under which the Pico drill site is operating, every 5 years,
- Review of compliance, and violations over the 5 years shows the necessity of review of conditions is appropriate and necessary,
- There was no hearing or approval of conditions in 2010 or 2015, and it is only because NASE demanded that this hearing is being held,
- It is totally inappropriate that the City and Zoning Administrator insist on a categorical exemption for an environmental review given the numerous violations of the law, but especially because PCEC has joined in the request with NASE for a review of these conditions,
- While the representative of the Councilman Koretz office join in the ZA 's intention to grant a categorical exemption, reiterate the Councilman Koretz intention to have a 2,500-foot setback for operation of the Pico site, knowing full well that baring a catastrophe occurrence, that is not remotely possible to have a 2,500 setback,
- NASE, through its attorney, notified the City of its intent to seek legal remedies if the City continues to refuse to address the numerous violations of CEQA, and the 2001 Settlement Agreement that it made with NASE,
- A categorical exemption in light of the numerous violations of the existing conditions, we maintain is a violation of CEQA and the Zoning Administrator should order a mitigated negative declaration,
- The new conditions should require 1) an annual compliance inspection for compliance with ZA conditions and City Code, 2) permanent 24-7 emissions monitoring with recorded data that is reported publicly to the city on a quarterly basis, 3) the recurring 5-year review of conditions as mandated by the 2001 Settlement Agreement,

Dr. Matthew Lafferman – Nearby Resident

- I'm a physician who lives within the vicinity of the oil well,
- The technical components of the situation are beyond me but as a physician, the potential health hazards are within my knowledge base,
- My experience and research have shown me that there are significant health hazards to being within the vicinity of oil wells on a prolong basis,
- Some of those negative effects include gastrointestinal side effects, headaches, nose bleeds, and cancer,
- Cancer has hit my own family; my wife was diagnosed with breast cancer at a young age; it was not hereditary breast cancer; there was no history of breast cancer in her family,
- She has been treated and she is alive now, eight or so years later,
- So, the question is what kind of data has been collected as far as the health effects of living close to oil wells,
- LA County Department of Health has done a report of the health effects and confirm some of these potentials and have certain recommendations as far as distance for living from oil wells,
- I wonder why the City hasn't followed up on these recommendations,
- LA County has one of the shortest setback regulations in the nation; in Dallas, the recommendation they follow is no residence within 1,500 feet,

- In Maryland, it's 1,000 feet from homes and schools,
- I just want to lend my voice as a physician,

Daniel Skolnick Council Deputy, Council District Koretz

- Oil and gas extractions are incompatible land use around homes, schools and houses of worship,
- This is an oil drilling site with an egregious record, and Council Koretz wants this public nuisance shutdown as quickly as possible, not regulated, not condition – shutdown,
- First, we must document and so we have this process, which is a Plan Approval to review the effectiveness of the applicant's compliance with conditions,
- There is no request for modification of any of the existing conditions and no proposed expansion of use,
- So, a reasonable person will tell you that in a review of conditions and inspections, there is no environmental impact,
- Let's not get into this delay tactic about having additional environmental review,
- Let's not allow for oil company advocates to mis-inform our community,
- The fact of the matter is we have this process; things need to be done completely, they need to be done correctly; they need to be done accurately without delay,
- My fellow community members, please understand that you are hearing a lot of bad information,
- There is a terrible bad actor in your community that is harming your health,
- We need to complete this process without delay about EIRs; what is the environmental impact of an inspection?
- We will find out what is happening at this site and that is not an environmental impact; that is knowing the truth.

CORRESPONDENCE

April 17, 2019	The Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR) reported that on November 28 and 29, its engineers witnessed tests of the safety systems and conducted an environmental lease inspection of wells and facilities at the Pacific Coast Energy Company. The tested safety systems responded as designed; no violation was observed during the lease inspections.
February 21, 2020	In two letters, the South Robertson Neighborhood Council made an "urgent" request that the City Council pass an ordinance to require annual general compliance inspections and 24/7 emissions monitoring at oi drill sites without further delay. The Neighborhood Council also requested the West Pico Drill Site to undergo a comprehensive compliance inspection by the Petroleum Administrator with the inspection report to be released before the Zoning Administrator holds a public hearing in the upcoming ZA Review Compliance.
May 25, 2020	In the letter, the writer expresses "grave" concern about the process through which the upcoming Review of Compliance and Conditions at the West Pico Drill Site seems to be heading toward

	Public Hearing without first having the Petroleum Administrator conduct or lead a comprehensive compliance inspection of the drill site.
June 5, 2020	Michael Salman expressed "grave and urgent" concern that the Review of Compliance of the West Pico Drill site was being unduly rushed in a way that will poorly serve everyone – the public, the operating oil company, the City and the Planning Department. The writer argues the Petroleum Administrator should first perform a comprehensive compliance inspection of the drill site before conducting a public hearing.
June 19, 2020	Michael Finch, PCEC representative, shared that the company was recently contacted by a member from the public and several issues and outstanding questions were brought their attention, including (1) whether the wells that have been drilled, re-drilled, and/or converted since the 2000 ZA approval required further approval under LAMC Section 13.01-H and13.01-I; (2) whether activities such as drilling, re-drilling and/or converting wells underwent adequate CEQA review as part of the EIR process for the 2000 approval; and (3) whether Condition #1 of the 1965 ZA 17683 and Condition #B 49 of the 2000 ZAD 17683 need to be modified to reflect that onsite generation of power is occurring on the production site.
June 24, 2020	Michael Salman shared that the applicant and he have identified exactly the same list of projects that require retroactive review. We have also had substantial conversation about solutions to other outstanding issues and problems. He expressed confidence that a consensus or near consensus solution is readily within reach and that getting to those solutions requires a full and proper review of the 25 unapproved projects.
July 5, 2020	Dr. Rae Drazin, a party to the 2001 Settlement Agreement and has been living within 5 blocks of the oil drilling site since 1974, wrote "[i]t's quite amazing that the non-compliance issues are still with us, even as the owners of the Site have changed. I am concerned with ongoing odors and the lack of 24/7 monitoring and overall compliance and sincerely hope that finally in 2020 the neighborhood, especially the children, will be protected from potential environmental hazards caused by this facility."
July 5, 2020	Richard S. Weiner, a founder and current officer of NASE, a party to the 2001 Settlement Agreement. Almost 20 years later the neighborhood has yet to realize the minimal environmental protections we assumed the Settlement Agreement provided. We believe it is necessary to have annual inspections and 24/7 monitoring of the Pico site."

July 7, 2020 — Charlie Carnow expressed concerns about the compliance issues and odors from the drill site which is located next to multiple schools, houses of worship and our homes. He expressed concerns about the lack of environmental review under CEQA. He urged the requirement of an annual compliance inspection and 24/7 emissions monitoring of the site to protect the public health and safety as had been done for other projects.

July 8, 2020 — Pacific Coast Energy Company (PCEC) shared its continuous work with the stakeholders and the City regarding efforts to address issues of community concern and to implement measures that will improve the overall safety and compliance of the West Pico facility. PCEC expressed a commitment to work with the City on appropriate conditions of approval to address the following:

1. The three items outlined in the June 19, 2020 email.
2. Annual inspections of the site operations by the Petroleum Administrator and/or a qualified third party approved by the Petroleum Administrator,
3. Evaluation of the feasibility of installing a fenceline emissions monitoring system using commercially available equipment that provides continuous monitoring and data recording.

July 8, 2020 — Michael Salman pointed out that there are two big categories of compliance problems: Non-compliance by the operator and Non-Compliance, including and encompassing violations of procedure and failures to perform administrative duties, including but not limited to duties under CEQA, by the City.

August 24, 2020 — Chatten-Brown, Carstens & Minteer, LLP, attorneys for Neighbors for a Safe Environment (NASE), sought to address the ongoing and emerging legal violations at the West Pico Drill Site that have led to a failure to provide protections to the community surrounding the subject drill site.

September 1, 2020 — Maia Lefferman (via ActionNetwork) provided a petition signed by 142 people expressing strong concern regarding the health and safety risk posed by oil and gas drilling and production in our neighborhood. The petition calls on the Zoning Administrator and local City Council Representative to require: 1) Full and proper environmental review as required by CEQA, 2) Annual Compliance Inspections, 3) Permanent 24/7 Emissions Monitoring with recorded data that is reported publicly, and 4) that the City obey its own laws and obey state laws in order to protect the health, safety and the environment,

September 11, 2020 — Council Member Paul Koretz sent a letter to the constituents of Council District 5 expressing his support for the advocacy of the stakeholders in the community, and his desire to achieve the same

goals as the stakeholders. The letter expressed his continued involvement with the oil drilling site.

September 28, 2020 In an email to Planning Staff, Michael Finch requested a meeting with the Planning Staff, the City Attorney, and the Chief Zoning Administrator to consider a new application vs amending the existing application, elimination of existing conditions, addition of new conditions, conditions related to the entire drill site, and other project changes needed to address community concerns.

March 24, 2021 Chatten-Brown, Carstens & Minteer LLP submitted a PRA Request R006330-120320 for West Pico Drill site; retention of Oil Permitting Records; and Permit Inspection Fees. The PRA Request was addressed to the City of Los Angeles Office of Finance, and the Los Angeles Fire Chief and Fire Marshal.

April 22, 2021 Michael Salman submitted an email that included multiple sets of LAFD Annual Oil Well Operating Permits for the individual oil wells at the West Pico Drill site, dating back to 2000, along with a spreadsheet listing over 900 individual permits. It was claimed that 22 of the permits were illegal, invalid, or void for years. It was also stated that there is a circle of negligence because the Zoning Administrator and the Fire Department do not check prior records, prior approvals or permits when considering their actions.

STAFF REVIEW OF COMPLIANCE WITH CONDITIONS

After listening to public testimony and after a thorough review of the material submitted to the public record, it was concluded that the operator failed to comply with a condition of the 2001 Settlement Agreement, and two conditions of the Zoning Administrator's grant. It was also concluded that the operator completed numerous projects on the drill site which were not authorized as part of the modernization of the drill site or the municipal code. Finally, it was learned that the operator performed projects on the adjacent production site without authorization, including the installation of the micro-turbines.

2001 Settlement Agreement Condition

Clause 4.b: On June 8, 2001, the City of Los Angeles, the operator and concerned parties entered into an agreement where all parties mutually agreed to thirteen clauses in order to settle the litigation filed challenging the EIR certified in connection with the drill site modernization approval, *Neighbors for A Safe Environmental v. City of Los Angeles*, LASC Case No. BC240760. Pursuant to clause 4.b of the 2001 agreement, the operator is required to file a Plan Approval for compliance review on each five-year anniversary of the latest review. The latest review was completed March 13, 2006, in which case, the operator was required to file a Pan Approval in 2011 and failed to do so. The operator did not file the 2020 Plan Approval application until after the failure was pointed out by this Office.

The ZA hereby determines that the operator is now fully in compliance with this condition as result of the 2020 filing. The operator is instructed to that it must

comply with the Settlement Agreement moving forward, and submit a Plan Approval application every five years, starting from 5 years after this determination becomes final.

ZA-1989-17683 Conditions

On March 13, 2006, the Zoning Administrator as required by Condition No. 78 under Case Nos. BZA 2000-1697 and ZA -17683(PAD) determined "that the conditions of approval have been and are being complied with, that the operation of the facility poses no ongoing health risk, that necessary inspections of the facility by government agencies will continue and that further hearings of formal review by the Zoning Administrator are not indicated." The operator continues to comply with a substantial number of the conditions of approval; however, the operator failed to show compliance with Condition Nos. 36, 39, 49 and 72 at the time the application was submitted. The operator has since provided evidence of compliance with two of the four conditions.

36. **Spill Prevention Plan. The applicant shall at all times maintain an oil spill prevention control and countermeasure plan in conformance with applicable law. A copy of the Spill Prevention Plan shall be given to the Zoning Administrator for placement in the file.**

    Condition No. 36. The operator submitted a 2016 copy of the Spill Prevention Plan to demonstrate compliance with Condition No 36, which indicates the operator has had such a plan.

    The ZA hereby determines that the operator is now fully in compliance with this condition.

39. **Noise Monitoring. The applicant shall install a 24-hour noise and video monitoring system substantially as follows.**
    a) The noise monitoring system shall utilize the following:
    1) **The installation of an outdoor, calibrated microphone on the north portion of the drill site (on side of nearest residences).**
    2) **The installation of a decibel meter and connected personal computer in the new support building.**
    3) **The personal computer will be programmed to record sound decibel measurements on a 24-hour basis.**
    4) **If feasible, the system will include an automatic paging system attached to the computer which will automatically page the applicant's on-duty supervisor if the noise monitor records reading over a preset warning level.**
    5) **The applicant's on-duty supervisor will immediately investigate any noise problems and take appropriate action. The supervisor shall prepare a written report on each such incident.**
    6) **During the first 24 month of operation of the modernized drill site, the applicant will print out and send to the Zoning Administrator a monthly report of all recorded noises above the preset level together with all investigation reports for the period; afterward, the applicant shall provide such reports to the Zoning Administrator on a quarterly basis.**

7) **The system will be designed and installed, and the preset warning levels will be determined, by a qualified, independent noise consulting firm agreed upon by the Zoning Administrator and the applicant. The preset warning values will be determined during the first several weeks of operation based upon actual site conditions.**

b) **The video monitoring system shall utilize the following components or features:**
   1) **The installation of multiple video cameras on the walls of the drill site providing video coverage at various locations within the drill site and just outside of the drill site walls, including, but not limited to· the alley along the north of the site, the derrick structure, and. the support building. To avoid privacy concerns, the videotape system shall not record sound nor videotape any locations which are not owned by the applicant or are public.**
   2) **The installation of a video recorder in the support building, which will videotape the camera images and the time of the recording.**
   3) **The videotape will be used to help determine the origin and cause of any noise issues, in conjunction with the noise monitoring system. The videotapes will be available to the noise consultant and the Zoning Administrator, upon request. Videotapes shall be maintained by the applicant for at least 60 days.**

Condition No. 39: The operator admitted it was not in full compliance with Condition No. 39. The noise monitoring system has been installed, functioning properly and sending alerts to PCEC personnel. These noise alerts have been monitored and reviewed to determine if the noise exceedances were attributed to the facility. However, the operator failed to provide quarterly noise reports to this Office. The operator requests "clarification" as what noise exceedances require reporting since much of the activity is unrelated to the facility.

The Zoning Administrator hereby determines the operation is not in compliance with the condition and instructs the operator to submit to the record those monitoring reports that include activities which exceed the ambient noises within 60 days of the date this determination becomes final. The monitoring report is to cover the 36-month period prior to the submittal of this Plan Approval application.

The Zoning Administrator expects that the operator will comply with this condition going forward. If the operator wishes to formally request a change to the condition so that it specifically requires the reporting of noise attributed to the oil drilling operation only, the operator must submit an application for a Plan Approval with the appropriate fee to formally request this change.

49. **All Electric Power. All drilling and reworking operations at the site shall at all times be carried on only by electrical power and such power shall not be generated on the controlled drilling site or in the district.**

Condition No. 49: The operator indicated the drill (oil and extraction) site is electronically powered by the Department of Water and Power (DWP) through a

3,500-KVA transformer in the Support Building on the drill site; the production site's electrical power source (micro-turbines) is not used by the drill site.

The ZA hereby determines that the operator is now fully in compliance with this condition as it relates to the drill site.

With regard to the production facility site which is not part of this review, the ZA instructs the operator to file a separate Plan Approval application within 90 days to obtain the authorization for the installation of the micro-turbines on the production facility site, which were installed without the approval of the Zoning Administrator.

72. **Limitations On Well Redrilling. Without prior written approval from the Zoning Administrator, no more than the existing 69 wells may be drilled, operated or maintained at the site and these wells shall be located at their current surface locations. All wells will be drilled from existing well cellars using existing strings of pipe or surface conductor pipe. In the event that applicant redrills any of the existing wells, the applicant shall provide the Zoning Administrators office with duplicate copies of all filings pertaining to such well filed with the California Division of Oil, Gas and Geothermal Resources, including such filings showing the bottom-hole location and the total depth of each such well. Furthermore, the applicant, upon request by the Zoning Administrator, shall furnish such additional information concerning the status, exact bottom hole location, productivity, etc., of the various wells drilled from the property, as to enable the Zoning Administrator to properly and intelligently administer the oil drilling regulations in this area; said information to be either verbal or in writing and to be kept confidential by the Zoning Administrator if so desired by the applicant.**

Condition No. 72: The operator has stated that "since the beginning of the modernization project a total of 59 wells have been drilled. One has been abandoned leaving a total of 58 wells at the site." Testimony was also provided that two wells have been had been drilled, there have been some re-drills and some conversions of wells since 2000.

As stated "the applicant shall provide the Zoning Administrators office with duplicate copies of all filings pertaining to such well[s] filed with the California Division of Oil, Gas and Geothermal Resources, including such filings showing the bottom-hole location and the total depth of each such well." The Zoning Administrator's office is not in receipt such of filings and hereby determines the operation is not in compliance with the condition. The operator is instructed to submit copies of all past permits allowing drilling and redrilling of wells within 60 days of the date this determination is final.

Municipal Code Provisions

LAMC Section 13.01-H states "[any] person desiring to drill, deepen or maintain an oil well in an oil drilling district that has been established by ordinance, or to drill or deepen and subsequently maintain an oil well in the M3 Zone within 500 feet of a more restrictive zone shall file an application in the Planning Department, requesting a determination of the conditions under which the operation may be conducted."

LAMC Section 13.01-I states "[no] person shall drill, deepen or maintain an oil well or convert an oil well from one class to the other and no permits shall be issued for that use, until a determination has been made by the Zoning Administrator or Area Planning Commission pursuant to the procedure prescribed in Subsection H of this section."

Testimony and evidence were provided that the operator completed a number of projects involving the drilling and re-drilling of wells on the drill site without approvals from the Zoning Administrator. While DOGGR records were provided relative to the drill/redrill work competed for two wells (West Pico 58 and West Pico 59), the operator acknowledged that a number of drilling and re-drilling projects were completed without specific written Zoning Administrator approval because it was believed that Condition No. 72 allowed for such projects. Also, the Planning Department's case tracking system has no record of any planning application filed seeking permission for drilling or redrilling work.

While Condition No. 72 may have allowed additional drilling or re-drilling, it also required the applicant "provide the Zoning Administrator's office with duplicate copies of all filings pertaining to such well filed with the California Department of Oil, Gas and Geothermal Resources, including such filings showing the bottom-hole location and the total depth of each such well." Copies of such documents were not submitted to the Office of Zoning Administration. The Zoning Administrator instructs the operator to submit copies of the filings, made to the California Department of Oil, Gas and Geothermal Resources, to the Office of Zoning administration within 60 days of the date this determination become final.

DISCUSSION

The review of the whole of the case file indicates that the operator of the drill site has failed to maintain full compliance with all of the Zoning Administrator's conditions of approval of ZA-1989-17683(PAD)(PA1), the Los Angeles Municipal Code provisions applicable to oil drilling sites and permits; and the 2001 Settlement agreement.

Additional testimony was provided that the operator completed projects on the adjoining production site. The installation of micro-turbines on the production portion of the controlled drilling site was performed without any authorization from the Zoning Administrator. LAMC Section 13.01 F.26 requires "[that] all power operations other than drilling in said district shall at all times be carried on only by means of electrical power, which power shall not be generated on the drilling site." The operator installed the micro-turbines on the production portion of the controlled drilling site in violation of the municipal code.

An awareness of the effects that urban oil drilling and production operations have on communities has grown since the facility was first granted an approval to be established as a controlled drill site, and particularly over the last several years since the West Pico Oil Drill site was given authorization to modernize. The technology used for oil and gas extraction and production has advanced significantly over the years, and the measures to protect communities have advanced as well. A review and evaluation of the applicant's Plan Approval request has led to research of the industry's best practices and technological advancements, for example using micro-turbines to generate electricity on site, rather than burden local public resources, or the use of real time reporting of drilling

activities, are generally good practices.

Based on the review of the public records, a site visit and the testimony from the public about noise, odor, truck traffic, and other evidence submitted to the record, it is hereby determined that the current conditions of approval imposed on the whole of the drill site may not be completely adequate to preserve the health, safety and general welfare of the nearby residential neighborhood. The Zoning Administrator notes that the production facility was approved over 50 years ago and there has never been a review of the conditions of approval to determine their effectiveness. The drill site, on the other hand, has had two reviews since the modernization project was completed.

Based upon the foregoing, the Zoning Administrator believes that additional conditions, or required corrective measures may need to be taken, as he has found, after actual observations or experience with drilling one or more of the wells in the district that additional conditions are necessary to afford greater protection to surrounding property, considering the whole of the drill site, including the drilling portion and the production portion, pursuant to LAMC 13.01-E.2(i).

Testimony was provided regarding the production site, focusing on projects and activities occurring on said site without authorization. As part of this review, the Zoning Administrator learned that the production site operates, in part pursuant to all conditions of approval for the drill site as outlined in Case No. ZA-17683. As the Plan Approval herein is limited to determining the effectiveness of the conditions of approval related to the modernization of the drill site only, the Zoning Administrator will review the effectiveness of the conditions of approval for the production facility site operation outlined in Case No. ZA-18893 with the operator's application for Plan Approval, pursuant to LAMC Section 12.24 M, to obtain authorization for the installation of the micro-turbines on its production facility site.

ADDITIONAL DISCUSSIONS:

As an unmodified, continued operation of an existing drill site and related compliance review, the Proposed Project qualifies for exemption from the California Environmental Quality Act (CEQA) pursuant to State CEQA Guidelines, Article 19, Sections 15301 (Class 1) and 15321 (Class 21).

Section 15301; Class 1 consists of the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of existing or former use. The key consideration is whether the project involves negligible or no expansion of use.

The proposed project is a required Plan Approval, pursuant to a 2001 Settlement Agreement that mandates periodic compliance review of conditions imposed on the continued operation of an existing drill site that was modernized. The proposed project qualifies for the Class 1 exemption because (1) the review of conditions applies to the continued operation of the existing West Pico Oil Drill Site and (2) no expansion of the existing drill site's use, pursuant to LAMC Section 13.01 has been requested. The

proposed project will not result in a change the number of wells as the capacity of the oil and gas extraction facility will remain the same.

Section 15321; Class 21 Category 2: Consists of Actions by regulatory agencies to enforce or revoke a lease, permit, license, certificate, or other entitlement for use issued, adopted, or prescribed by the regulatory agency or enforcement of law, general rule, standard, or objective, administered or adopted by the regulatory agency. This includes the adoption of an administrative decision or order enforcing or revoking the lease, permit, license, certificate, or entitlement for use or enforcing the general rule, standard, or objective.

The proposed project qualifies for the Class 21 exemption because it involves a Plan Approval to review the applicant's compliance with and effectiveness of the conditions imposed under Case Nos. BZA-2000-1697 and ZA-17683(PAD). The proposed project would permit the continued operation of the drill site subject to the existing conditions and corrective conditions if warranted. The regulatory action would not result in any impacts on the environment.

CEQA Section 15300.2: Exceptions to the Use of Categorical Exemptions.

The City has considered whether the Proposed Project is subject any of the six (6) exceptions that would prohibit the use of a categorical exemption as set forth in State CEQA Guidelines Section 15300.2. The six (6) exceptions to this Exemption are: (a) Location; (b) Cumulative Impacts; (c) Significant Effect; (d) Scenic Highways; (e) Hazardous Waste Sites; and (f) Historical Resources.

1. Location. *Classes 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located – a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. Therefore, these classes are considered to apply in all instances, except where the project may impact on an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, state, or local agencies.*

The proposed project is not relying on Exemption Classes 3, 4, 5, 6, or 11 and is thusly not subject to this exception.

2. Cumulative Impacts. *All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant.*

According to the California Department of Conservation (CalGEM) Well Finder database, the closest oil drilling facility is located near the intersection of Pico Boulevard and Avenue of the Stars, in Rancho Park, approximately 0.9 miles away from the project site. As such, there are no known successive projects of the same type and in the same place as the proposed project. The Plan Approval review of conditions of approval compliance and the subsequent reporting involves no changes of the existing baseline conditions as the resulting review will not change the number of wells or the production activities. Therefore, this exception does not apply.

3. Significant Effect. *A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.*

The proposed project is a required Plan Approval, pursuant to a 2001 Settlement Agreement that mandates periodic compliance review of conditions imposed on the continued operation of an existing drill site that was authorized for modernization. A Plan Approval, that reviews the effectiveness of the conditions of approval of an operating oil well site, is not an activity that typically involves unusual circumstances that will lead to a significant effect on the environment. The proposed Plan Approval review is no different as the request seeks to review compliance or non-compliance the conditions of approval that were imposed in connection with Case Nos. BZA 2000-1997 and ZA-17683(PAD). No request has been made to modify any condition which will result in a significant impact on the immediate environment.

The project site will remain enclosed on all sides with 25-foot-high walls, except for the two parking lot areas. Trees and plants will continue to line the exterior of the walls. Adjoining properties to the north of the project site will remain zoned R3-1VL-O and developed with two-story apartment buildings. Properties to the south across Pico Boulevard will remain zoned C4-1VL-O and developed with low-rise commercial buildings occupied by a variety of commercial and religious uses. Adjoining properties to the east across Doheny Drive will remain zoned C4-1VL-O and include a gas station and other commercial uses. Properties to the west of the subject site across Oakhurst Drive will remain zoned C4-1VL-O and developed with an oil processing site operated by the applicant. The existing drill site's operation remains bound by all prior conditions of approval and regulatory requirements from the Southern California Air Quality Management District (SCAQMD). Therefore, the baseline conditions will remain unchanged and there are no foreseeable impacts from the project. Thus, there are no unusual circumstances and no reasonable possibility that the project and on site activities will lead to a significant effect on the environment, and this exception does not apply.

4. Scenic Highways. *A categorical exemption shall not be used for a project which may result in damage to scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated as a state scenic highway.*

The only State Scenic Highway within the City of Los Angeles is the Topanga Canyon State Scenic Highway, State Route 27, which travels through a portion of Topanga State Park. The project site is approximately 10 miles east of State Route 27. Therefore, the proposed project will not result in any damage to any scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated as a state scenic highway, and this exception does not apply.

5. Hazardous Waste. *A categorical exemption shall not be used for a project located on a site which is included on any list complied pursuant to Section 65962.5 of the Government Code.*

According to Envirostor, the State of California's database of Hazardous Waste Sites, neither the project site, nor any site in the vicinity, is identified as a hazardous waste site, and this exception does not apply.

6. Historic Resources. *A categorical exemption shall not be used for a project which may cause a substantial adverse change in the significance of a historical resource.*

The project site has been identified as a potential historic resource in Survey LA the citywide survey of Los Angeles, but not designated as such; and the proposed project is a required Plan Approval, pursuant to a 2001 Settlement Agreement that mandates periodic compliance review of conditions imposed on the continued operation of an existing drill site that was authorized for modernization. The proposed project proposes no changes to the physical or operational components of the oil drill facility, and based on this, the proposed project will not result in any substantial adverse change to the significance of a historic resource and this exception does not apply.

INDEMNIFICATION AND REIMBURSEMENT OF LITIGATION COSTS.

Applicant shall do all of the following:

i. Defend, indemnify and hold harmless the City from any and all actions against the City relating to or arising out of the City's processing and approval of this entitlement, including but not limited to, an action to attack, challenge, set aside, void or otherwise modify or annul the approval of the entitlement, the environmental review of the entitlement, or the approval of subsequent permit decisions or to claim personal property damage, including from inverse condemnation or any other constitutional claim.

ii. Reimburse the City for any and all costs incurred in defense of an action related to or arising out of the City's processing and approval of the entitlement, including but not limited to payment of all court costs and attorney's fees, costs of any judgments or awards against the City (including an award of attorney's fees), damages and/or settlement costs.

iii. Submit an initial deposit for the City's litigation costs to the City within 10 days' notice of the City tendering defense to the Applicant and requesting a deposit. The initial deposit shall be in an amount set by the City Attorney's Office, in its sole discretion, based on the nature and scope of action, but in no event shall the initial deposit be less than $50,000. The City's failure to notice or collect the deposit does not relieve the Applicant from responsibility to reimburse the City pursuant to the requirement in paragraph (ii).

iv. Submit supplemental deposits upon notice by the City. Supplemental deposits may be required in an increased amount from the initial deposit if found necessary by the City to protect the City's interests. The City's failure to notice or collect the deposit does not relieve the Applicant from responsibility to reimburse the City pursuant to the requirement (ii).

v. If the City determines it necessary to protect the City's interests, execute an indemnity and reimbursement agreement with the City under terms consistent with the requirements of this condition.

The City shall notify the applicant within a reasonable period of time of its receipt of any action and the City shall cooperate in the defense. If the City fails to notify the applicant of any claim, action or proceeding in a reasonable time, or if the City fails to reasonably cooperate in the defense, the applicant shall not thereafter be responsible to defend, indemnify or hold harmless the City.

The City shall have the sole right to choose its counsel, including the City Attorney's office or outside counsel. At its sole discretion, the City may participate at its own expense in the defense of any action, but such participation shall not relieve the applicant of any obligation imposed by this condition. In the event the Applicant fails to comply with this condition, in whole or in part, the City may withdraw its defense of the action, void its approval of the entitlement, or take any other action. The City retains the right to make all decisions with respect to its representations in any legal proceeding, including its inherent right to abandon or settle litigation.

For purposes of this condition, the following definitions apply:

"City" shall be defined to include the City, its agents, officers, boards, commission, committees, employees and volunteers.

"Action" shall be defined to include suits, proceedings (including those held under alternative dispute resolution procedures), claims or lawsuits. Actions includes actions, as defined herein, alleging failure to comply with any federal, state or local law.

Nothing in the definitions included in this paragraph are intended to limit the rights of the City or the obligations of the Applicant otherwise created by this condition.

APPEAL PERIOD - EFFECTIVE DATE

The applicant's attention is called to the fact that this determination is not a permit or license and that any permits and licenses required by law must be obtained from the proper public agency. The Zoning Administrator's determination in this matter will become effective after **June 17, 2021**, unless an appeal therefrom is filed with the City Planning Department. It is strongly advised that appeals be filed early during the appeal period and in person so that imperfections/incompleteness may be corrected before the appeal period expires. Any appeal must be filed on the prescribed forms, accompanied by the required fee, a copy of the Zoning Administrator's action, and received and receipted at a public office of the Department of City Planning on or before the above date or the appeal will not be accepted. **Forms are available on-line at http://planning.lacity.org**. Public offices are located at:

Figueroa Plaza	**Marvin Braude San Fernando Valley Constituent Service Center**	**West Los Angeles Development Services Center**
201 North Figueroa Street	6262 Van Nuys Blvd., Room 251	1828 Sawtelle Blvd., 2nd Floor
4th Floor	Van Nuys, CA 91401	West Los Angeles, CA 90025
Los Angeles, CA 90012	(818) 374-5050	(310) 231-2912
(213) 482-7077		

If you seek judicial review of any decision of the City pursuant to California Code of Civil Procedure Section 1094.5, the petition for writ of mandate pursuant to that section must be filed no later than the 90th day following the date on which the City's decision became final pursuant to California Code of Civil Procedure Section 1094.6. There may be other time limits which also affect your ability to seek judicial review.

Inquiries regarding this matter shall be directed to Dylan Sittig, City Planning Associate for the Department of City Planning at (213) 978-1197.

JUSTIFICATION FOR PROJECT EXEMPTION
CASE NO. ENV-2020-1328-CE

Project Description

The Proposed Project is for a Plan Approval to review the effectiveness of and Applicant's compliance with conditions imposed in Case Nos. BZA-2000-1697 and ZA-17683(PAD). The 0.706 acre West Pico Oil Drill Site is in the C4-1VL-O zone and within Urbanized Oil Drilling District No. U-131 established by Ordinance 130,340. There is no request for modification of any existing condition of approval and no proposed expansion of the use. This review is required by Paragraph 4.b of the June 2001 Settlement Agreement in the case of *Neighbors For A Safe Environment v. City of Los Angeles*, Los Angeles Superior Court Case No. BC240760, and will be conducted pursuant to Section 12.24-M of the Los Angeles Municipal Code and Condition No. 78 in Case Nos. BZA 2000-1697 and ZA 17683(PAD).

CEQA Determination - Applicable Categorical Exemption Categories:

As an unmodified, continued operation of an existing drill site and related compliance review, the Proposed Project qualifies for exemption from the California Environmental Quality Act (CEQA) pursuant to State CEQA Guidelines, Article 19, Sections 15301 (Class 1) and 15321 (Class 21).

Section 15301; Class 1 consists of the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of existing or former use. The key consideration is whether the project involves negligible or no expansion of use.

The proposed project is a required Plan Approval, pursuant to a 2001 Settlement Agreement that mandates periodic compliance review of conditions imposed on the continued operation of an existing drill site that was modernized. The proposed project qualifies for the Class 1 exemption because (1) the review of conditions applies to the continued operation of the existing West Pico Oil Drill Site and (2) no expansion of the existing drill site's use, pursuant to LAMC Section 13.01 has been requested. The proposed project will not result in a change the number of wells as the capacity of the oil and gas extraction facility will remain the same.

Section 15321; Class 21 Category 2: Consists of Actions by regulatory agencies to enforce or revoke a lease, permit, license, certificate, or other entitlement for use issued, adopted, or prescribed by the regulatory agency or enforcement of law, general rule, standard, or objective, administered or adopted by the regulatory agency. This includes the adoption of an administrative decision or order enforcing or revoking the lease, permit, license, certificate, or entitlement for use or enforcing the general rule, standard, or objective.

The proposed project qualifies for the Class 21 exemption because it involves a Plan Approval to review the applicant's compliance with and effectiveness of the conditions imposed under Case Nos. BZA-2000-1697 and ZA-17683(PAD). The proposed project would permit the continued operation of the drill site subject to the existing conditions and corrective conditions if warranted. The regulatory action would not result in any impacts on the environment.

CEQA Section 15300.2: Exceptions to the Use of Categorical Exemptions.

The City has considered whether the Proposed Project is subject any of the six (6) exceptions that would prohibit the use of a categorical exemption as set forth in State CEQA Guidelines Section 15300.2. The six

(6) exceptions to this Exemption are: (a) Location; (b) Cumulative Impacts; (c) Significant Effect; (d) Scenic Highways; (e) Hazardous Waste Sites; and (f) Historical Resources.

1. Location. *Classes 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located – a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. Therefore, these classes are considered to apply in all instances, except where the project may impact on an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, state, or local agencies.*

The proposed project is not relying on Exemption Classes 3, 4, 5, 6, or 11 and is thusly not subject to this exception.

2. Cumulative Impacts. *All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant.*

According to the California Department of Conservation (CalGEM) Well Finder database, the closest oil drilling facility is located near the intersection of Pico Boulevard and Avenue of the Stars, in Rancho Park, approximately 0.9 miles away from the project site. As such, there are no known successive projects of the same type and in the same place as the proposed project. The Plan Approval review of conditions of approval compliance and the subsequent reporting involves no changes of the existing baseline conditions as the resulting review will not change the number of wells or the production activities. Therefore, this exception does not apply.

3. Significant Effect. *A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.*

The proposed project is a required Plan Approval, pursuant to a 2001 Settlement Agreement that mandates periodic compliance review of conditions imposed on the continued operation of an existing drill site that was authorized for modernization. A Plan Approval, that reviews the effectiveness of the conditions of approval of an operating oil well site, is not an activity that typically involves unusual circumstances that will lead to a significant effect on the environment. The proposed Plan Approval review is no different as the request seeks to review compliance or non-compliance the conditions of approval that were imposed in connection with Case Nos. BZA 2000-1997 and ZA-17683(PAD). No request has been made to modify any condition which will result in a significant impact on the immediate environment.

The project site will remain enclosed on all sides with 25-foot-high walls, except for the two parking lot areas. Trees and plants will continue to line the exterior of the walls. Adjoining properties to the north of the project site will remain zoned R3-1VL-O and developed with two-story apartment buildings. Properties to the south across Pico Boulevard will remain zoned C4-1VL-O and developed with low-rise commercial buildings occupied by a variety of commercial and religious uses. Adjoining properties to the east across Doheny Drive will remain zoned C4-1VL-O and include a gas station and other commercial uses. Properties to the west of the subject site across Oakhurst Drive will remain zoned C4-1VL-O and developed with an oil processing site operated by the applicant. The existing drill site's operation remains bound by all prior conditions of approval and regulatory requirements from the Southern California Air Quality Management District (SCAQMD). Therefore, the baseline conditions will remain unchanged and there are no foreseeable impacts from the project. Thus, there are no unusual circumstances and no reasonable possibility that the project and on site activities will lead to a significant effect on the environment, and this exception does not apply.

4. Scenic Highways. *A categorical exemption shall not be used for a project which may result in damage to scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated as a state scenic highway.*

The only State Scenic Highway within the City of Los Angeles is the Topanga Canyon State Scenic Highway, State Route 27, which travels through a portion of Topanga State Park. The project site is approximately 10 miles east of State Route 27. Therefore, the proposed project will not result in any damage to any scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar

resources, within a highway officially designated as a state scenic highway, and this exception does not apply.

5. Hazardous Waste. *A categorical exemption shall not be used for a project located on a site which is included on any list complied pursuant to Section 65962.5 of the Government Code.*

According to Envirostor, the State of California's database of Hazardous Waste Sites, neither the project site, nor any site in the vicinity, is identified as a hazardous waste site, and this exception does not apply.

6. Historic Resources. *A categorical exemption shall not be used for a project which may cause a substantial adverse change in the significance of a historical resource.*

The project site has been identified as a potential historic resource in Survey LA the citywide survey of Los Angeles, but not designated as such; and the proposed project is a required Plan Approval, pursuant to a 2001 Settlement Agreement that mandates periodic compliance review of conditions imposed on the continued operation of an existing drill site that was authorized for modernization. The proposed project proposes no changes to the physical or operational components of the oil drill facility, and based on this, the proposed project will not result in any substantial adverse change to the significance of a historic resource and this exception does not apply.

APPLICATIONS:

APPEAL APPLICATION

Instructions and Checklist

Related Code Section: Refer to the City Planning case determination to identify the Zone Code section for the entitlement and the appeal procedure.

Purpose: This application is for the appeal of Department of City Planning determinations authorized by the Los Angeles Municipal Code (LAMC).

A. APPELLATE BODY/CASE INFORMATION

1. APPELLATE BODY

☒ Area Planning Commission ☐ City Planning Commission ☐ City Council ☐ Director of Planning
☐ Zoning Administrator

Regarding Case Number: ZA 1989-17683-PA2

Project Address: 9101 W. Pico Blvd.

Final Date to Appeal: June 17, 2021

2. APPELLANT

Appellant Identity: (check all that apply)
☐ Representative ☐ Property Owner
☐ Applicant ☐ Operator of the Use/Site

☒ Person, other than the Applicant, Owner or Operator claiming to be aggrieved
Paul Koretz, Councilmember, Fifth District

☐ Person affected by the determination made by the **Department of Building and Safety**

☐ Representative ☐ Owner ☐ Aggrieved Party
☐ Applicant ☐ Operator

3. APPELLANT INFORMATION

Appellant's Name: Paul Koretz, Councilmember,

Company/Organization: CDS

Mailing Address: 200 N. Spring St

City: Los Angeles State: CA Zip: 90012

Telephone: 213.473.7005 E-mail: Paul.Koretz@lacity.org

a. Is the appeal being filed on your behalf or on behalf of another party, organization or company?

☐ Self ☒ Other: CDS

b. Is the appeal being filed to support the original applicant's position? ☐ Yes ☒ No

4. REPRESENTATIVE/AGENT INFORMATION

Representative/Agent name (if applicable): Daniel Skolnik, Senior Planning Deputy

Company: Same as appellent

Mailing Address: _____

City: _____ State: _____. Zip: _____

Telephone: _____ E-mail: _____

5. JUSTIFICATION/REASON FOR APPEAL

a. Is the entire decision, or only parts of it being appealed? ☒ Entire ☐ Part

b. Are specific conditions of approval being appealed? ☐ Yes ☐ No

If Yes, list the condition number(s) here: _____

Attach a separate sheet providing your reasons for the appeal. Your reason must state:

- ☒ The reason for the appeal
- ☒ How you are aggrieved by the decision
- ☒ Specifically the points at issue
- ☒ Why you believe the decision-maker erred or abused their discretion

6. APPLICANT'S AFFIDAVIT

I certify that the statements contained in this application are complete and true:

Appellant Signature: Daniel Skolnik - Planning Deputy Date: 6/16/21

GENERAL APPEAL FILING REQUIREMENTS

B. *ALL CASES REQUIRE THE FOLLOWING ITEMS - SEE THE ADDITIONAL INSTRUCTIONS FOR SPECIFIC CASE TYPES*

1. Appeal Documents

a. Three (3) sets - The following documents are required for each appeal filed (1 original and 2 duplicates) Each case being appealed is required to provide three (3) sets of the listed documents.

- ☑ Appeal Application (form CP-7769)
- ☑ Justification/Reason for Appeal
- ☑ Copies of Original Determination Letter

b. Electronic Copy

☑ Provide an electronic copy of your appeal documents on a flash drive (planning staff will upload materials during filing and return the flash drive to you) or a CD (which will remain in the file). The following items must be saved as individual PDFs and labeled accordingly (e.g. "Appeal Form.pdf", "Justification/Reason Statement.pdf", or "Original Determination Letter.pdf" etc.). No file should exceed 9.8 MB in size.

c. Appeal Fee

- ☐ Original Applicant - A fee equal to 85% of the original application fee, provide a copy of the original application receipt(s) to calculate the fee per LAMC Section 19.01B 1.
- ☐ Aggrieved Party - The fee charged shall be in accordance with the LAMC Section 19.01B 1.

d. Notice Requirement

- ☐ Mailing List - All appeals require noticing per the applicable LAMC section(s). Original Applicants must provide noticing per the LAMC
- ☐ Mailing Fee - The appeal notice mailing fee is paid by the project applicant, payment is made to the City Planning's mailing contractor (BTC), a copy of the receipt must be submitted as proof of payment.

SPECIFIC CASE TYPES - APPEAL FILING INFORMATION

C. DENSITY BONUS / TRANSIT ORIENTED COMMUNITES (TOC)

1. **Density Bonus/TOC**
   Appeal procedures for Density Bonus/TOC per LAMC Section 12.22.A 25 (g) f.

NOTE:
- Density Bonus/TOC cases, only the *on menu or additional incentives* items can be appealed.

- Appeals of Density Bonus/TOC cases can only be filed by adjacent owners or tenants (must have documentation), and always only appealable to the Citywide Planning Commission.

  ☐ Provide documentation to confirm adjacent owner or tenant status, i.e., a lease agreement, rent receipt, utility bill, property tax bill, ZIMAS, drivers license, bill statement etc.

D. WAIVER OF DEDICATION AND OR IMPROVEMENT

Appeal procedure for Waiver of Dedication or Improvement per LAMC Section 12.37 I.

NOTE:
- Waivers for By-Right Projects, can only be appealed by the owner.

- When a Waiver is on appeal and is part of a master land use application request or subdivider's statement for a project, the applicant may appeal pursuant to the procedures that governs the entitlement.

E. TENTATIVE TRACT/VESTING

1. **Tentative Tract/Vesting** - Appeal procedure for Tentative Tract / Vesting application per LAMC Section 17.54 A.

   NOTE: Appeals to the City Council from a determination on a Tentative Tract (TT or VTT) by the Area or City Planning Commission must be filed within 10 days of the date of the written determination of said Commission.

   ☐ Provide a copy of the written determination letter from Commission.

F. BUILDING AND SAFETY DETERMINATION

☐ **1.** Appeal of the *Department of Building and Safety* determination, per LAMC 12.26 K 1, an appellant is considered the **Original Applicant** and must provide noticing and pay mailing fees.

a. Appeal Fee
- ☐ Original Applicant - The fee charged shall be in accordance with LAMC Section 19.01B 2, as stated in the Building and Safety determination letter, plus all surcharges. (the fee specified in Table 4-A, Section 98.0403.2 of the City of Los Angeles Building Code)

b. Notice Requirement
- ☐ Mailing Fee - The applicant must pay mailing fees to City Planning's mailing contractor (BTC) and submit a copy of receipt as proof of payment.

☐ **2.** Appeal of the *Director of City Planning* determination per LAMC Section 12.26 K 6, an applicant or any other aggrieved person may file an appeal, and is appealable to the Area Planning Commission or Citywide Planning Commission as noted in the determination.

a. Appeal Fee
- ☐ Original Applicant - The fee charged shall be in accordance with the LAMC Section 19.01 B 1 a.

b. Notice Requirement
- ☐ Mailing List - The appeal notification requirements per LAMC Section 12.26 K 7 apply.
- ☐ Mailing Fees - The appeal notice mailing fee is made to City Planning's mailing contractor (BTC), a copy of receipt must be submitted as proof of payment.

G. NUISANCE ABATEMENT

1. **Nuisance Abatement -** Appeal procedure for Nuisance Abatement per LAMC Section 12.27.1 C 4

NOTE:
- Nuisance Abatement is only appealable to the City Council.

a. Appeal Fee

☐ Aggrieved Party the fee charged shall be in accordance with the LAMC Section 19.01 B 1.

2. **Plan Approval/Compliance Review**
Appeal procedure for Nuisance Abatement Plan Approval/Compliance Review per LAMC Section 12.27.1 C 4.

a. Appeal Fee

☐ Compliance Review - The fee charged shall be in accordance with the LAMC Section 19.01 B.
☐ Modification - The fee shall be in accordance with the LAMC Section 19.01 B.

NOTES

A Certified Neighborhood Council (CNC) or a person identified as a member of a CNC or as representing the CNC may not file an appeal on behalf of the Neighborhood Council; persons affiliated with a CNC may only file as an individual on behalf of self.

***Please note** that the appellate body must act on your appeal within a time period specified in the Section(s) of the Los Angeles Municipal Code (LAMC) pertaining to the type of appeal being filed. The Department of City Planning will make its best efforts to have appeals scheduled prior to the appellate body's last day to act in order to provide due process to the appellant. If the appellate body is unable to come to a consensus or is unable to hear and consider the appeal prior to the last day to act, the appeal is automatically deemed denied, and the original decision will stand. The last day to act as defined in the LAMC may only be extended if formally agreed upon by the applicant.*

West Los Angeles Area Planning Commission
Los Angeles City Hall
200 N. Spring Street

Dear Esteemed Commissioners:

In reviewing the Zoning Administrator's determination, dated June 2, 2021, for Case number ZA-1989-17683-PA2, a Plan Approval, I am aggrieved and have decided to appeal this determination to protect the health and safety of the community which I represent.

For the reasons listed below in addition to the entirety of the record, I am requesting that this commission find that the Zoning Administrator erred and abused his discretion and that the subject site is not in substantial compliance with the conditions set forth in the settlement agreement. I further ask you to use the City's police powers in proportion to the potential danger to the community by denying the Plan Approval and move to recommend a revocation hearing for the entire facility. It must be understood that the Plan Approval action is only for a portion of this facility.

A review of the case file indicates that the operators of the facility failed to maintain compliance with all of the conditions of the Settlement Agreement and the requirements of the Los Angeles Municipal Code in addition to other regulatory requirements. The Conditions of Approval of Determination have not been substantially complied with. Require reports of the settlement agreement are absent from the case file and open orders to comply have not been resolved. Permit history is either absent or work was done without permits. No evidence of Mitigation Monitoring for the EIR has been submitted to the case file.

While acknowledging that the Applicant violated some of the conditions of approval, the ZA nonetheless erred in determining that the Applicant was in substantial compliance with the

Settlement Agreement. The record is clear, the operation has a long list of orders from LA Fire among other agencies, has not provided required studies as required in the settlement agreement or provided any evidence of mitigation monitoring for the EIR. This is evidence enough that the subject site is not in substantial conformance.

The following are the points upon which I appeal the ZA's Determination Letter:

1) The 2001 "Settlement Agreement" between the City of Los Angeles ("the City"), the City Council, Neighbors for a Safe Environment (NASE), and the "Operator" of the Oil Drilling Site at 9101 West Pico Boulevard states that the operator is every five years to submit an application to the Department of City Planning for a Plan Approval (Case No. ZA-1989017683-PA2) to review compliance with the conditions of approval imposed under Case No. ZA-17683(PAD). On page 2 of the Letter, the Zoning Administrator states that "This Plan Approval process began with a November 19, 2019 letter from the Chief Zoning Administrator notifying the operator of the West Pico Drill Site that it was required to file a Plan Approval for a review of compliance with the conditions imposed under Case No. ZA-17683(PAD), as required by the Settlement Agreement." The fact that the operator did not in 2019 initiate a Plan Approval process, nor in 2011, nor in 2006, is, in and of itself, an ongoing and substantial violation of the Agreement with NASE.

2) The Letter states on page 2 that the "Office of Zoning Administration review of the whole of the record found that the operator was in violation of Condition 36, Condition 39, Condition 49 and Condition 72 of the conditions of approval imposed by the Board of Zoning Appeal in its action taken on BZA No. 2000-1697 (the appeal of Case No. ZA-1989-17683-PAD). Also, the Zoning Administrator found the operator was in violation of clause 4b of the 2001 Settlement Agreement." I believe that those violations alone as detailed by the Zoning Administrator provide ample evidence that the Conditions have not been and are not being substantially complied with.

    a) Condition 36

    b) Condition 39

    c) Condition 49

    d) Condition 72

3) "The Zoning Administrator's Office learned the operator's production facility is in violation of Municipal Code Section 13.01-F.26, which requires that all power operations be carried on by electrical power and that said power be generated off-site."

4) The following items from the Agreement were not mentioned in the Letter of Determination, nor are the reports they detail to be found in the case file, which is a substantive omission.

   a) Under, "Obtaining of air quality data" (Agreement, pg. 3), the Agreement states that NASE will designate a consultant (the "Air Quality Consultant") and a "Risk Assessment Expert" who will sample fugitive and other emissions inside the derrick structure and report on the incremental risk to the nearest off-site human receptors of cancer and other indicated diseases posed by operations at the drill site facility. There is no mention of this in the Letter of Determination and no such reports can be found in the case file.

   b) Under "Noise" (Agreement, pg. 5), the Agreement states in regards to nighttime noise creating an unreasonable impact on nearby residents, that the Zoning Administrator shall consider additional mitigating measures as shall be required to eliminate any such impact. The ZA did not review mitigation measures in its Letter of Determination.

   c) Under "Enforcement" (Agreement, pg. 6), the Agreement states that the Risk Assessment Expert shall report any risk of cancer to the regulatory agencies, including the City and that the ZA will impose any additional conditions deemed appropriate. There is no mention of this in the Letter of Determination, nor in the case file.

      i) The Agreement further states that the operator will, upon each five-year anniversary of the first review of conditions, request an additional review of conditions pursuant to the procedures prescribed in Condition No. 78. The operator has not requested any such review of conditions, missing 2011, 2016, until the City requested the operator act. This is a substantial omission of an important agreement point for more than a decade and a half.

      ii) The City of LA's Department of Building and Safety was designated to receive and log complaints regarding odors and noise at the drill site on a 24-hour basis. There are no such logs in the case file.

d) Under "Financial Provisions" (Agreement, pg. 7), the Agreement states that the operator will pay NASE to engage technical experts and perform testing, pay for laboratories to analyze the air quality samples, among other items. There is no mention of this arrangement in the Letter of Determination, nor are reports to be found in the case file.

From the Letter, page 3, "Pursuant to LAMC Section 13.01-E.2(i) - A Zoning Administrator may impose additional conditions or require corrective measures to be taken if he or she finds, after actual observations or experience with drilling one or more of the wells in the district, that additional conditions are necessary to afford greater protection to surrounding property. I Believe that the concerning record detail shows a substantial violation of the Agreement for well over a decade, merit the imposition of additional conditions and corrective measures, including:

a) A condition requiring the installation of an air monitoring system so as to protect the residents surrounding the drill site from fugitive emissions such as those as detailed in the Letter and to allow the South Coast Air Quality Management District (SCAQMD) to better track such.

b) A condition such as that already agreed to by the Rancho Park Drill Site operator and the surrounding neighborhood residents and actively requested by the West Pico Drill Site operator in these proceedings to, until such time the City of Los Angeles has in place its own annual inspections ordinance, hire a third party consultant to perform an annual inspection of the West Pico Drill Site and to deliver those findings to the City of Los Angeles Petroleum Administrator within sixty (60) days of the inspection annually.

Respectfully submitted,

Paul Koretz

APPLICATIONS:

APPEAL APPLICATION

Instructions and Checklist

Related Code Section: Refer to the City Planning case determination to identify the Zone Code section for the entitlement and the appeal procedure.

Purpose: This application is for the appeal of Department of City Planning determinations authorized by the Los Angeles Municipal Code (LAMC).

A. APPELLATE BODY/CASE INFORMATION

1. APPELLATE BODY

☑ Area Planning Commission ☐ City Planning Commission ☐ City Council ☐ Director of Planning
☐ Zoning Administrator

Regarding Case Number: ZA-1989-17683-PA2

Project Address: 9101 West Pico Boulevard

Final Date to Appeal: 06/17/2021

2. APPELLANT

Appellant Identity: (check all that apply)
❒ Representative ❒ Property Owner
❒ Applicant ❒ Operator of the Use/Site

☑ Person, other than the Applicant, Owner or Operator claiming to be aggrieved

☐ Person affected by the determination made by the **Department of Building and Safety**

❒ Representative ❒ Owner ❒ Aggrieved Party
❒ Applicant ❒ Operator

3. APPELLANT INFORMATION

Appellant's Name: Amy C. Minteer on behalf of Neighbors for a Safe Environment

Company/Organization: Chatten-Brown, Carstens & Minteer LLP

Mailing Address: 2200 Pacific Coast Highway, Ste. 318

City: Hermosa Beach State: CA Zip: 90254

Telephone: (310) 798-2400 E-mail: acm@cbcearthlaw.com

a. Is the appeal being filed on your behalf or on behalf of another party, organization or company?

☐ Self ☑ Other: Neighbors for a Safe Environment

b. Is the appeal being filed to support the original applicant's position? ☐ Yes ☑ No

4. REPRESENTATIVE/AGENT INFORMATION

Representative/Agent name (if applicable): _____

Company: _____

Mailing Address: _____

City: _____ State: _____. Zip: _____

Telephone: _____ E-mail: _____

5. JUSTIFICATION/REASON FOR APPEAL

a. Is the entire decision, or only parts of it being appealed? ☑ Entire ☐ Part

b. Are specific conditions of approval being appealed? ☐ Yes ☑ No

If Yes, list the condition number(s) here: _____

Attach a separate sheet providing your reasons for the appeal. Your reason must state:

☑ The reason for the appeal ☑ How you are aggrieved by the decision

☑ Specifically the points at issue ☑ Why you believe the decision-maker erred or abused their discretion

6. APPLICANT'S AFFIDAVIT

I certify that the statements contained in this application are complete and true:

Appellant Signature: _____ Date: June 16, 2021

GENERAL APPEAL FILING REQUIREMENTS

B. ***ALL CASES REQUIRE THE FOLLOWING ITEMS - SEE THE ADDITIONAL INSTRUCTIONS FOR SPECIFIC CASE TYPES***

1. Appeal Documents

a. Three (3) sets - The following documents are required for each appeal filed (1 original and 2 duplicates) Each case being appealed is required to provide three (3) sets of the listed documents.

☐ Appeal Application (form CP-7769)
☐ Justification/Reason for Appeal
☐ Copies of Original Determination Letter

b. Electronic Copy

☐ Provide an electronic copy of your appeal documents on a flash drive (planning staff will upload materials during filing and return the flash drive to you) or a CD (which will remain in the file). The following items must be saved as individual PDFs and labeled accordingly (e.g. "Appeal Form.pdf", "Justification/Reason Statement.pdf", or "Original Determination Letter.pdf" etc.). No file should exceed 9.8 MB in size.

c. Appeal Fee

☐ Original Applicant - A fee equal to 85% of the original application fee, provide a copy of the original application receipt(s) to calculate the fee per LAMC Section 19.01B 1.
☐ Aggrieved Party - The fee charged shall be in accordance with the LAMC Section 19.01B 1.

d. Notice Requirement

☐ Mailing List - All appeals require noticing per the applicable LAMC section(s). Original Applicants must provide noticing per the LAMC
☐ Mailing Fee - The appeal notice mailing fee is paid by the project applicant, payment is made to the City Planning's mailing contractor (BTC), a copy of the receipt must be submitted as proof of payment.

SPECIFIC CASE TYPES - APPEAL FILING INFORMATION

C. DENSITY BONUS / TRANSIT ORIENTED COMMUNITES (TOC)

1. Density Bonus/TOC
Appeal procedures for Density Bonus/TOC per LAMC Section 12.22.A 25 (g) f.

NOTE:
- Density Bonus/TOC cases, only the *on menu or additional incentives* items can be appealed.

- Appeals of Density Bonus/TOC cases can only be filed by adjacent owners or tenants (must have documentation), and always only appealable to the Citywide Planning Commission.

☐ Provide documentation to confirm adjacent owner or tenant status, i.e., a lease agreement, rent receipt, utility bill, property tax bill, ZIMAS, drivers license, bill statement etc.

D. WAIVER OF DEDICATION AND OR IMPROVEMENT

Appeal procedure for Waiver of Dedication or Improvement per LAMC Section 12.37 I.

NOTE:
- Waivers for By-Right Projects, can only be appealed by the owner.

- When a Waiver is on appeal and is part of a master land use application request or subdivider's statement for a project, the applicant may appeal pursuant to the procedures that governs the entitlement.

E. TENTATIVE TRACT/VESTING

1. Tentative Tract/Vesting - Appeal procedure for Tentative Tract / Vesting application per LAMC Section 17.54 A.

NOTE: Appeals to the City Council from a determination on a Tentative Tract (TT or VTT) by the Area or City Planning Commission must be filed within 10 days of the date of the written determination of said Commission.

☐ Provide a copy of the written determination letter from Commission.

F. BUILDING AND SAFETY DETERMINATION

☐ **1.** Appeal of the *Department of Building and Safety* determination, per LAMC 12.26 K 1, an appellant is considered the **Original Applicant** and must provide noticing and pay mailing fees.

a. Appeal Fee
☐ Original Applicant - The fee charged shall be in accordance with LAMC Section 19.01B 2, as stated in the Building and Safety determination letter, plus all surcharges. (the fee specified in Table 4-A, Section 98.0403.2 of the City of Los Angeles Building Code)

b. Notice Requirement
☐ Mailing Fee - The applicant must pay mailing fees to City Planning's mailing contractor (BTC) and submit a copy of receipt as proof of payment.

☐ **2.** Appeal of the *Director of City Planning* determination per LAMC Section 12.26 K 6, an applicant or any other aggrieved person may file an appeal, and is appealable to the Area Planning Commission or Citywide Planning Commission as noted in the determination.

a. Appeal Fee
☐ Original Applicant - The fee charged shall be in accordance with the LAMC Section 19.01 B 1 a.

b. Notice Requirement
☐ Mailing List - The appeal notification requirements per LAMC Section 12.26 K 7 apply.
☐ Mailing Fees - The appeal notice mailing fee is made to City Planning's mailing contractor (BTC), a copy of receipt must be submitted as proof of payment.

G. NUISANCE ABATEMENT

1. Nuisance Abatement - Appeal procedure for Nuisance Abatement per LAMC Section 12.27.1 C 4

NOTE:
- Nuisance Abatement is only appealable to the City Council.

a. Appeal Fee

☐ Aggrieved Party the fee charged shall be in accordance with the LAMC Section 19.01 B 1.

2. Plan Approval/Compliance Review

Appeal procedure for Nuisance Abatement Plan Approval/Compliance Review per LAMC Section 12.27.1 C 4.

a. Appeal Fee

☐ Compliance Review - The fee charged shall be in accordance with the LAMC Section 19.01 B.

☐ Modification - The fee shall be in accordance with the LAMC Section 19.01 B.

NOTES

A Certified Neighborhood Council (CNC) or a person identified as a member of a CNC or as representing the CNC may not file an appeal on behalf of the Neighborhood Council; persons affiliated with a CNC may only file as an individual on behalf of self.

***Please note** that the appellate body must act on your appeal within a time period specified in the Section(s) of the Los Angeles Municipal Code (LAMC) pertaining to the type of appeal being filed. The Department of City Planning will make its best efforts to have appeals scheduled prior to the appellate body's last day to act in order to provide due process to the appellant. If the appellate body is unable to come to a consensus or is unable to hear and consider the appeal prior to the last day to act, the appeal is automatically deemed denied, and the original decision will stand. The last day to act as defined in the LAMC may only be extended if formally agreed upon by the applicant.*

STATEMENT OF REASONS FOR APPEAL;
Case No. ZA-1989-17683
ENV-2020-1328-CE

On behalf of Neighbors for A Safe Environment (NASE), a California nonprofit corporation seeking to protect neighborhoods from the impacts of oil drilling and production, we provide this summary of our reasons for appeal of the Plan Approval determination for 9101 West Pico Boulevard. Additional details regarding these legal violations and proposals to address those violations are included in the referenced attachments to this statement of reasons.

The overarching failing of the June 2, 2021 Zoning Administrator (ZA) Determination is that, while it recognizes some of the many legal violations on the site and says at one point that "the current conditions…may not be completely adequate to preserve the health, safety and general welfare of the nearby residential neighborhood," it fails to impose or revise any conditions to ensure these violations and impacts are rectified. Indeed, the headline of the ZA Determination and the effective part of the ruling is a statement that the site is and has been "substantially" in compliance – a statement that the rest of the ZA Determination undermines. The ZA Determination also fails to address many of the most serious violations at 9101 and 9151 West Pico Boulevard. The continuing lack of oversight, investigation, and any consequences for years of illegal activity allowed by the ZA Determination is a green light for all oil companies to ignore City law and CEQA at all drill sites in the City. That endangers not just the public living around the West Pico Drill Site, but also sets precedent that will endanger all communities living around oil drill sites throughout the City.

A. Violation of Conditions of Approval

The June 2, 2021 ZA Determination acknowledges that the operator is in violation of a number of conditions of approval for the site, including Conditions 36, 39, 49 and 72. In addition, there are also violations of Conditions 46, 47, 53, 57, 61 and 78 due to the odor impacts experienced by the community, documented improper waste disposal, noncompliance with fire safety requirements, and lack of timely conditions review which has led to many of the impacts identified herein. (See Attachment 1, August 24, 2020 NASE Letter to ZA.)

The ZA Determination identifies a number of these violations, but then reverses itself and makes the overarching finding that there is substantial compliance with conditions of approval. This fails to "bridge the analytic gap between the raw evidence and ultimate decision," requiring the determination to be set aside as unsupported. (*Topanga Assn. for a Scenic Community v. County of Los Angeles* (1974) 11 Cal.3d 506, 515.)

This failure to ensure compliance with conditions of approval is also a violation of the California Environmental Quality Act (CEQA). "Mitigating conditions are not mere expressions of hope." (*Lincoln Place Tenants Ass'n v. City of Los Angeles* (2005) 130 Cal.App.4th 1491, 1508.) CEQA requires mitigation measures to be concrete and enforceable. (Pub. Resources Code § 21081.6(b).)

B. Los Angeles Municipal Code Violations

In correspondence with the ZA's office, NASE identified several ways in which actions at the site violate plain requirements and prohibitions for oil drilling and production contained in the City's Municipal Code. (Attachment 1.) The ZA Determination includes factual conclusions that concur with several of the Municipal Code violations identified by NASE, but does not require any corrective actions, instead allowing them to continue without any consequences.

As identified by NASE, the Zoning Administrator and the operator have been in violation of Los Angeles Municipal Code (LAMC) § 13.01.E.2.b since the 2000 approval in ZA-1989-17683-PAD because only one Controlled Drill Site can exist in Oil Drilling District U-131. The current ZA Determination in ZA-1989-17683-PA2 continues to insist there are two sites, despite having been shown the pertinent code and the record of ZA determinations from the opening of a single Controlled Drill Site in 1965 until the error of the ZA-1989-17683-PAD in 2000 purporting to see two distinct sites.

The Controlled Drill Site was established by Case No. ZA-17683 in 1965 and defined as a single site spanning lots on both sides of Oakhurst Drive. The Controlled Drill Site was established on two City blocks from the outset, and established as a single integrated Controlled Drill Site as per LAMC 13.01. Here is the legal description and identification of the two-block Controlled Drill Site authorized by Case No. ZA-17683 in 1965:

Re: Z. A. CASE NO. 17683
N'ly of Pico Blvd.
E'ly & W'ly of Oakhurst Drive
Oil Drilling District
No. U-131
D. M. No. 5484

Greetings:

In the matter of the application of Occidental Petroleum Corporation, owners and lessees, for approval of a controlled drill site and for determination of conditions and methods of operation to be followed in drilling for and production of oil and gas on a site consisting of two sections classified in the C2, R3 and R4-1 Zone in Oil Drilling District No. U-131, please be advised that based upon the Findings of Facts hereinafter set forth and by virtue of authority contained in Section 13.01-E, F and H of the Municipal Code, the Chief Zoning Administrator hereby authorizes the use of a site comprising:

Lots 883-888, inc., and Lots 1035 and 1036, Tract 6380, located northerly of Pico Boulevard and extending from Doheny Drive to include the northwesterly corner of Oakhurst Drive, Beverlywood District,

as a controlled drill site on which to drill wells and conduct surface operations in connection with the development and bottoming of wells under Oil Drilling District U-131, consisting of that 70-acre drilling district depicted and described on the map which is a part of Ordinance No. 130340, as well as for surface operations in connection with wells which by subsequent action may be authorized to be bottomed under adjoining and adjacent districts, and also

That drill site was then extended to include the street front on Pico Boulevard from Oakhurst to Cardiff in 1967 pursuant to Case No. ZA-18893 to form one larger site.

The 2000 ZA approval in ZA-1989-17683-PA2 incorrectly asserts that Case No. ZA-18893 created two separate sites. Not only is the existence of two sites in District U-131 forbidden by LAMC 13.01.E.2.b, but the header and opening paragraph of Case No. ZA-18893 from 1967 also make it clear that there was only one drill site:

Re: Z.A. CASE NO. 18893
Northeasterly corner
Pico Bl. & Cardiff Av.
Expansion of existing
controlled drill site.
O. D. District U-131
D. M. No. 548

Greetings:

In the matter of the application of Rose Fink, current owner, and Occidental Petroleum Corporation, optionee, owner-operator and lessee, for Determination of Conditions and Methods of Operation to be followed in expansion to the west on three C2 zoned lots, the production facilities portion of the existing previously authorized controlled drill site in Oil Drilling District U-131, please be advised that based upon the Findings of Fact hereinafter set forth and by virtue of authority contained in Section 13.01-E, F and H of the Municipal Code, the Chief Zoning Administrator hereby authorizes an extension of the controlled drill site approved under Z. A. Case 17683 onto Lots 1037, 1038 and 1039, Tract No. 6380 located at the northeasterly corner of Pico Boulevard and Cardiff Avenue so that the enlarged controlled drill site will comprise:

Lots 883-888, and Lots 1035-1039, Tract 6380 located northerly of Pico Boulevard between Doheny Drive and Cardiff Av., Beverlywood District;

Thus, the drill site was not split until the 2000 ZA approval. The terms of LAMC § 13.01.E.2.b have been in effect continuously since February 1945. An approved Controlled Drill Site is the only kind of land use entitlement that allows for oil production activity in areas Zoned "O." Only one Controlled Drill Site is allowed per 40 acres of Oil Drilling District and the subject district, U-131, has only 70 acres. Two sites are not allowed by code and ZA-1989-17683-PAD created two sites in violation of the LAMC. Approvals, such as ZA-1989-17683-PAD, that are issued in violation of the LAMC "shall be void" as per LAMC § 11.02. Thus, the

split was illegal when it occurred, remains illegal, and the ZA Determination in ZA-1989-17683-PA2 is fatally flawed by this and other errors. (See Attachment 1.)

The operator is also in violation of LAMC § 13.01.F.26 due to the installation of micro-turbines at 9151 West Pico Boulevard. The ZA Determination acknowledges this violation, but does not impose any remedial conditions or required environmental review. Instead, the "Staff Review" section of the determination suggests an application for the micro-turbines is required to be submitted, proposing segmented or piecemealed cases to possibly take the place of a single larger review that could view the entirety of violations, deficient conditions, and at least 25 projects executed illegally. Splitting this up into smaller bites obscures the totality of environmental impacts and violates CEQA's requirement that the whole of a project—"all phases of project planning, implementation, and operation"—are to be considered when assessing environmental review for a project. (CEQA Guidelines §15063, subd. (a)(1).)

Further, Condition 72 is in direct contradiction with LAMC §§ 13.01.H and 13.01.I because it allows redrilling of wells without a full discretionary review by the ZA, which has been expressly required by Code since at least 1955. The ZA Determination acknowledges this contradiction but fails to require any revision to the condition and compounds the error further in its unsupported interpretation of this condition. Condition 72 speaks only of "redrilling"; it does not mention drilling of new wells or conversion of wells between Class A and Class B (i.e., production and injection). The ZA Determination nevertheless stretches the already illegal Condition 72 to cover new wells and converted wells. Since 2000, the site operator has drilled 2 new wells, redrilled 12 existing wells, and converted 10 wells between Classes A and B, all without application to the ZA. The site operator admitted this to the ZA in writing on June 19, 2020. LAMC 13.01.H and 13.01.I plainly require full application to the ZA for review and approval of all of these activities. Since at least 2000, it has been standard practice for ZA's to hold public hearings on all such applications. Since 2016, ZA Memo 133 has explicitly required that public hearings be held, and has forbidden projects to drill, redrill, or convert wells from receiving a categorical exemption from environmental review.

Despite these clear requirements, the ZA Determination claims that all illegal well projects, including even new wells and well conversions, should be handled by the inadequate and illegal procedure set out in Condition 72. No corrective conditions, review of oil well projects, or any type of enforcement is proposed. Instead, the ZA Determination requires only that all filings to the California Department of Oil, Gas and Geothermal Resources be submitted to the ZA Office. This not only fails to address the 24 unapproved oil well projects on the West Pico Drill Site executed since 2000, it compounds and expands the illegality of the 2000 approval. It endangers all communities living near all oil drill sites in City by setting a precedent to ignore the scant legal protections that they have had.

Additionally, because the 2000 ZA approval for the site was issued in violation of these Municipal Code provisions, the 2000 approval, and all subsequent approvals and City permits that rely upon it, should be deemed void pursuant to LAMC § 11.02. (See Attachment 2, March 23, 2021 NASE Letter.)

C. Violation of 2001 Settlement Agreement

The ZA Determination acknowledges the City's and operator's violation of the 2001 settlement agreement with NASE due to the failure to conduct the required five-year reviews for the site. The only reason the current review was commenced was based on a demand from NASE for the City to do so. While the ZA Determination states that the City will continue with the required reviews going forward, this fails to address the impacts to NASE and others in the surrounding community that resulted from the many years the reviews were not conducted and there were numerous violations as the site. Moreover, the current Plan Approval review fails to meet the requirements of the 2001 settlement agreement because there are no corrective conditions imposed or modification of existing conditions to address the ongoing issues at the site. The Zoning Administrator stated at public hearings for this Plan Approval review that the adequacy of conditions would not be evaluated, which violates the Settlement Agreement use of Condition 78 to set the scope and process for 5 Year "Reviews of Conditions" that "evaluate the efficacy of mitigation measures" and change them if warranted. This Plan Approval review did not even consider writing the Settlement Agreement's requirement of cyclical 5 Year Reviews of Conditions into a new a condition, despite an acknowledgment by the ZA Determination and in statements at public hearings that the ZA office had failed to hold these required reviews.

D. California Environmental Quality Act Violations

The ZA Determination improperly relies on Class 1 and Class 21 categorical exemptions to avoid environmental review under CEQA. The interpretation of the language of the guidelines implementing CEQA or the scope of a particular CEQA exemption presents "a question of law, subject to de novo review" by a court. (*Fairbank v. City of Mill Valley* (1999) 75 Cal.App.4th 1243, 1252; *Azusa Land Reclamation Co. v. Main San Gabriel Basin Watermaster* (1997) 52 Cal.App.4th 1165, 1192.) "[A categorical] exemption can be relied on only if a factual evaluation of the agency's proposed activity reveals that it applies." (*Muzzy Ranch Co. v. Solano County Airport Land Use Com*. (2007) 41 Cal.4th 372, 386.) "[T]he agency invoking the [categorical] exemption has the burden of demonstrating" that substantial evidence supports its factual finding that the project fell within the exemption. (*Ibid*.) The City has not met this burden.

First, the ZA Determination is essentially using a Class 1 exemption to legitimize years of illegal actions, which this exemption is not intended to do. Reliance on this categorical exemption and the ZA's willful blindness to noncompliance with requirements to apply to the ZA for discretionary approval of oil well projects incentivizes all oil companies operating in the City to evade application and review for projects in the future. Exempting these unapproved oil well projects from environmental review based on ongoing illegal activities piles illegality on top of illegality. Moreover, it deprives the public and decision makers of information necessary to assess the Project's impacts.

A Class 21 exemption exempts enforcement actions from environmental review. The ZA Determination fails to acknowledge the significant irony in relying on this exemption after identifying noncompliance but imposing no corrective enforcement actions.

Moreover, to the extent this Plan Approval reviewed any of the illegal drilling, redrilling, and converting of wells that has been conducted at the site since 2000, the City is prohibited from relying on a categorical exemption by its own CEQA guidelines in ZA Memo 133. (Attachment 3, ZA Memo 133.)

Exceptions to reliance on a categorical exemption also apply. CEQA prohibits use of a categorical exemption when there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances." (CEQA Guidelines § 15300.2, subd. (c).) The ongoing legal violations on the site are unusual circumstances and those unusual circumstances have led to and will continue to lead to adverse air quality, odor, noise and other impacts on the surrounding community.

For all of these reasons, and those to be presented in more detail before the West Los Angeles Area Planning Commission, this appeal seeks to overturn this Plan Approval until: all illegal projects executed at the site are reviewed in accordance with City and State law; the efficacy of mitigation measures and all conditions are properly reviewed in accordance with the Settlement Agreement, Condition 72, and CEQA; and mitigation measures have been imposed to address ongoing impacts and the site is in legal compliance. NASE also reserves the right to provide supplemental evidence and analysis regarding the basis of this appeal.

Re: ZA-1989-17683-PA2; Need for Comprehensive Review of Conditions at the West Pico Drill Site (9101 & 9151 W Pico Blvd, Los Angeles, CA 90035) to Address Numerous Legal Violations and Community Impacts

Dear Mr. Irving,

On behalf of Neighbors for A Safe Environment (NASE), a California nonprofit corporation, we seek to address ongoing and emerging legal violations at the West Pico Drill Site (9101 & 9151 West Pico Blvd, Council District 5) that have led to a failure to provide necessary protections to the community surrounding this drill site. NASE has extensively communicated with the Zoning Administrator (ZA) and documented the bases of its concerns. NASE has also cooperated with the operator of the West Pico Drill Site, the Pacific Coast Energy Company (PCEC), and together with PCEC presented a set of practical solutions to the ZA. We urge the City to implement the reasonable and viable remedies we have previously presented and which are outlined below.

Unfortunately, thus far, the City has failed to act on the remedies NASE has proposed, including NASE's request for a Review of Conditions as per the procedures required by the 2001 Settlement Agreement between NASE, the City and the West Pico Drill Site operator and Condition 78 of the 2000 approval in ZA-1989-17683-PAD. Additionally, despite clear requirements in the City's Municipal Code and ZA Memo 133 for discretionary approval supported by environmental review for any oil well drilling, redrilling or conversion project, the City persists in relying on inapplicable categorical exemptions from the California Environmental Quality Act (CEQA) for approvals. Thus far, the City has also refused to impose

necessary modification of conditions to correct a great many ongoing violations of CEQA and City law by the City, as well as by the current and prior site operators.

NASE has retained our firm to make another effort to convince the City to bring its own practices of land use regulation and petroleum administration into compliance with the 2001 Settlement Agreement, CEQA, and City law. This letter outlines the remedies that would achieve those simple goals and provide necessary protection for the surrounding community. It also gives the City notice that if persistent violations are not rectified, NASE is prepared to seek legal remedies to require compliance with the Settlement Agreement and enforce CEQA and City law. We hope that the City will prefer to open discussion about a reasonable set of remedies.

A. NASE Urges the City to Adopt Remedies to Address Legal Violations and Impacts to the Community.

From its initial communication with the Chief ZA in November 2019 up until now, NASE has asked for only modest and eminently viable remedies to alleviate impacts to the community and ensure compliance with the law. NASE has requested that ZA-1989-17683-PA2 be a Review of Conditions, as mandated by the 2001 Settlement Agreement and Condition 78 of the 2000 approval in ZA-1989-17683-PAD. Pursuant to the 2001 Settlement Agreement and Condition 78, the review must:

- examine the West Pico Drill Site's compliance with conditions of approval;
- assess "neighborhood impacts;" and
- evaluate the "efficacy of mitigation measures," with modification of the mitigation measures and/or corrective measures "if warranted."

As set forth herein, this Review of Conditions must be comprehensive, legally compliant and must impose new conditions to address ongoing violations and impacts and correct significant errors in the 2000 approval for the West Pico Drill Site.

1. The Review of Conditions Must Include a Comprehensive Compliance Inspection.

The Review of Conditions for the West Pico Drill Site needs to be prefaced by a Comprehensive Compliance Inspection led by the Office of the Petroleum Administrator. This Review of Conditions should follow the example of the one and only Comprehensive Compliance Inspection of an oil drill site ever conducted by the City—the Rancho Park Drill Site inspection conducted in March/April 2017. Only a full inspection by a qualified professional can fully define the scope of the project in the current review. Thus, the inspection is necessary to

inform compliance with conditions of approval, CEQA clearance and, by the same measure, inform the ZA and the public regarding corrective measures that should be required.

2. The City Must Comply with ZA Memo 133 in its Review of Conditions By Requiring CEQA Review for the Projects on the Drill Site.

The Review of Conditions for the West Pico Drill Site must be compliant with CEQA and with the City's own guidelines in ZA Memo 133. It has been established beyond the shadow of a doubt that mitigation measures from the 2000 approval and its associated EIR have failed to protect the community. Odor complaints from the community are well document and are matched by testimony from Council Member Paul Koretz. The Los Angeles Fire Department also imposed citations on the operators of the West Pico Drill Site for leaving petroleum exposed on surfaces in 2017 and 2018.

Multiple conditions from the 2000 approval have been violated, and the City has failed to enforce mitigation measures established through the associated EIR. Conditions 46, 47, 53, 57, 61, 72, and 78 (concerning odors, nuisance, good oil field practices, redrilling, and reviews of conditions) have all been violated. "Mitigating conditions are not mere expressions of hope." (*Lincoln Place Tenants Ass'n v. City of Los Angeles* (2005) 130 Cal.App.4th 1491, 1508.) CEQA requires mitigation measures to be concrete and enforceable. (Pub. Resources Code § 21081.6(b).) From at least 2006 to the present the ZA and the City have failed to monitor or enforce these conditions in violation of CEQA.

In addition to those ongoing CEQA violations by the City, PCEC has stepped forward to do honest research on projects executed at the site since 2000. PCEC agrees with NASE that there have been 25 unapproved projects, including 24 projects on oil wells that require discretionary review by the ZA according to City code, and thus CEQA clearance by State law. ZA Memo 133 directly states that proposals to drill, redrill, or convert wells are ineligible for categorical exemptions under CEQA. The 25 unapproved projects and the obvious need to revise mitigation measures makes reliance on categorical exemptions utterly improper. An Initial Study and an MND are required, at minimum, and that is what NASE requests.

3. The Continuing Impacts to the Community Demonstrate a Need to Impose New Conditions Through the Review of Conditions.

The ongoing impacts to the community surrounding the West Pico Drill Site, and the numerous violations of existing conditions of approval, demonstrate a clear need to impose new conditions through the Review of Conditions process to prevent these problems from continuing.

Based on NASE's familiarity with the impacts to the community and the existing conditions, it is our position (supported by PCEC) that the following new conditions must be adopted:

- Annual Compliance Inspections led or overseen by qualified professional staff in the Office of the Petroleum Administrator.

- Permanent 24/7 Emissions Monitoring, with recorded data that is reported to the Petroleum Administrator, the ZA, and the public on a quarterly basis.

- Incorporation of the requirement of cyclical Five Year Reviews of Conditions from the 2001 Settlement Agreement into the ZA conditions for the site, using the full procedures delineated in Condition 78 of the 2000 approval as per the Settlement Agreement.

- Immediate Emergency and Accident Reporting to the City (to LAFD, the Petroleum Administrator, and the local Council office) for any emergency or accident that must be reported to any Federal, State, or regional agency.

The need for additional conditions may be identified through the comprehensive compliance inspection as well.

4. The Review of Conditions Must Correct Several Errors from the 2000 Approval.

The Review of Conditions for the West Pico Drill Site must also correct significant errors from the 2000 approval that are inconsistent with City law, the actual record of approvals for the site, and the facts of what actually exists at the site. Those errors include:

- **Delete Condition 72 to Eliminate its Contradiction with LAMC 13.01.H and 13.01I.** This condition addressing "redrilling" directly contradicts the provisions of Los Angeles Municipal Code sections 13.01.H and 13.01.I. Both of these sections require discretionary approval by the ZA before any oil well is drilled, redrilled, or converted between producer and injection well. The contradiction may have contributed to the rash of unapproved projects at the site since 2000, including the redrilling of 12 wells since 2000 without ZA review, approval, or CEQA clearance. Condition 72's undermining of LAMC 13.01.H and 13.01.I on drilling and redrilling wells may have also contributed to the conversion of 10 wells since 2000 without ZA review, approval, or CEQA clearance per the requirements of ZA Memo 133.

- **Correct the Number of Existing Wells.** The 2000 ZA approval for the West Pico Drill Site incorrectly asserts that 69 wells existed at the site in 2000 and that 69 wells had been approved. Only 59 wells currently exist at the site, and only 57 existed in 2000. Only 57 wells have been approved for the site by the ZA. The ZA's error in 2000 reflected a lack of knowledge about the drill site, a lack of knowledge about the difference between a well cellar and a well, and a failure to cross-check with State records from DOGGR (now CalGEM) even as the ZA wrote conditions requiring that all monitoring agencies need to be consulted. This error may have contributed to the drilling of unapproved wells without CEQA clearance in 2005 and 2010.

- **West Pico Drill Site Includes Both 9101 and 9151 West Pico Blvd as a Single Controlled Drill Site.** The 2000 approval improperly split the single integrated "Controlled Drill Site" into two sites because the operator in 2000 proposed a construction project that would occur on only one half of the site. This error runs afoul of LAMC 13.01, especially 13.01.E.2.b. A Controlled Drill Site is the only kind of conditionally approved land use on which oil can be produced from wells and processed for sale. Only one Controlled Drill Site can exist in Oil Drilling District U-131, and only one has ever been approved: namely the West Pico Drill Site, approved in ZA-1965-17683. The ZA severed the unified Controlled Drill Site into two in 2000, leaving both without a legally sustainable basis for operation. This error also may have contributed to the improper installation of microturbines by obscuring the prohibition against electric generation on the Controlled Drill Site or anywhere in the Oil Drilling District that was written into the 1965 approval to establish the Controlled Drill Site. The 2000 approval, which completely rewrote and supplanted the 1965 approval, also prohibits electric generation at the West Pico Drill Site. By improperly splitting the Controlled Drill Site in two, the 2000 approval left the other half of the Controlled Drill Site without any approval or conditions in place.

B. These Remedies Are Necessitated by the Ongoing and Potential Legal Violations.

NASE has chosen to focus on remedies in this communication in a continuing effort to achieve relief for the community and legal compliance by the City. However, the description of the remedies, above, should provide you with an indication of some of the legal violations we may seek to challenge in court, if necessary. These include:

- Ongoing violations of CEQA for the City's failure to enforce mitigation measures from the EIR associated with the 2000 approval for the West Pico Drill Site.

- Failure to require CEQA review for discretionary, and recently discovered, well drilling, redrilling and conversion projects at the West Pico Drill Site.

- The proposed improper reliance on categorical exemptions for the current review of the West Pico Drill Site.

- Failure to enforce LAMC 13.01.H and 13.01.I by allowing operation of 25 unapproved oil well projects on the West Pico Drill Site.

- Violated LAMC 13.01.E.2.b by dividing the Controlled Drill Site into two sites in 2000.

- Breach of the 2000 Settlement Agreement due to the City's failure to conduct the required five-year reviews for the West Pico Drill Site for at least the last 10 years. No legally required reviews have been held during Councilmember Koretz's term in the City Council until NASE demanded this review in November 2019.

- The current ZA review process also appears to be running afoul of the requirements of the 2000 Settlement Agreement, CEQA and City regulations due to its improperly narrow focus and the ZA's stated position that the process would not result in the modification of any conditions.

Conclusion

The problems at the West Pico Drill Site are not isolated incidents and they are not unknown to City officials. The City has been negligent in its land use-based regulation of oil drill sites, failing to protect the communities impacted by these drill sites. It has never performed regular inspections to monitor for compliance with ZA-assigned conditions, and so mitigation measures routinely are not followed and not enforced. Similarly, the City continues to engage in a pattern and practice of handing out categorical exemptions from CEQA review for oil projects, contrary to the requirements of CEQA, ZA Memo 133 and LAMC 13.01.H and 13.01.I. Taken together, this pattern of negligence gives a green light to unapproved projects and turns a blind eye to poor work practices, all at the expense of communities the City is supposed to protect.

Most confounding here is the City's refusal to address environmental, health, and safety protections when an operating oil company comes forward to join with the community in asking the City to implement CEQA properly and to do inspections, require emissions monitoring, and perform serious reviews. This situation must be remedied. It is NASE's hope that the current ZA process can be revised to begin to address these ongoing issues, but if not, we are prepared to pursue available legal options.

Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer

Re: PRA Request R006330-120320 for West Pico Drill Site; Retention of Oil Permitting Records; and Permit Inspection Fees

Dear Mr. Uyemura, Mr. Terrazas and Ms. Crowley,

On behalf of Neighbors for A Safe Environment (NASE), a California nonprofit corporation seeking to protect neighborhoods from the impacts of oil drilling, we seek to address a partially outstanding Public Records Act (PRA) request from Professor Michael Salman regarding documents relating to permits for oil wells within the City of Los Angeles. We also seek to address the City's record retention policies for these and other related documents, as well as a lack of monitoring of oil drilling activities demonstrated by documents and other information that Professor Salman has received.

Outstanding Public Records Act Request

Professor Salman submitted PRA Request R006330 on December 3, 2020, requesting records pertaining to Los Angeles Fire Departments (LAFD) oil well operating permits for the wells at the West Pico Drill Site that are processed by the Office of Finance for the years spanning 2000 to 2020. This request was submitted to the Office of Finance after Professor Salman spent approximately two months trying to obtain these records from the LAFD. After several requests to LAFD, each supported by additional identifying information to help staff locate the records, LAFD personnel told Professor Salman that the Office of Finance was "the custodian for operational permits" and "the Custodian of Records" for those permits.

The Office of Finance has provided Professor Salman with pdf copies of operating permits for the years 2005-2020. We understand that the Office of Finance digitized records from the start date of 2005, and that paper records for earlier permits may not exist in the Office of Finance. We do not know whether copies of these earlier permits exist in the files of the LAFD, but to the extent they do, we request that any such records held by the LAFD please be produced in response to the several PRA requests that have been filed by Professor Salman.

While the Office of Finance has provided copies of operating permits identified above, it has not yet provided Professor Salman with copies of any communications with LAFD or LADBS or City Planning. It is our understanding that Finance is working with other City information technology agencies to determine if there are electronic records it can recover. If the Office of Finance cannot provide copies of these requested documents from its own files, then we request that the Office of Finance, as the Custodian of Records, please obtain copies from the LAFD Harbor Industrial Unit and from the LADBS and/or City Planning, where these communications originated.

Record Retention for Oil Well Permitting Documents

Professor Salman has received conflicting information from the Office of Finance and LAFD regarding the record retention policies of these departments for documents relating to oil well permits. PRA Request R006330 included a request for all applications, authorizations/rejections communicated by the LAFD and/or LADBS and/or Department of City Planning, communications with the LAFD and/or LADBS and/or City Planning,

communications with the operating oil company, and the permits themselves. There have been inconsistencies in responses to Professor Salman regarding how long the Office of Finance and LAFD retain these documents.

Given that it is unclear how long these documents will be retained under existing department procedures, this letter serves to put the Office of Finance on notice that these records must be retained due to the potential for litigation by NASE addressing oil well operating permits at the West Pico Drill Site. All records (paper, electronic, and on other media) pertaining to LAFD oil well operating permits for the wells at the West Pico Drill Site that are processed by the Office of Finance – including applications, authorizations/rejections communicated by the LAFD and/or LADBS and/or Department of City Planning, communications with the LAFD and/or LADBS and/or City Planning, communications with the operating oil company, and the permits themselves should be retained.

The Zoning Administrator, City Attorney, Petroleum Administrator and other City officials and staff have been advised of the potential for litigation concerning the City's actions and negligence at the West Pico Drill Site (9101 & 9151 W Pico Blvd, Los Angeles, CA 90035) and other similar sites where there has been a pattern and practice of violating City law and CEQA. Please see the attached letter to those City officials and staff, sent on August 24, 2020, in connection with a still open Planning Department case, number ZA-1989-17683-PA2. (Attachment 1.)

Below we set forth additional issues of concern by NASE regarding the City of Los Angeles's failure to monitor, implement, and enforce its own laws governing the operation of oil wells and oil drill sites, as well as the City's violation of the California Environmental Quality Act (CEQA), that are the subjects of potential litigation concerning the West Pico Drill Site and other drill sites within the City.

Renewal of Annual Operating Permits Despite Legal Violations.

LAFD Annual Operating Permits are required for oil wells. (Los Angeles Municipal Code (LAMC) 57.106.6.1, LAMC 57.106.6.3.2.) These Annual Operating Permits are conditioned upon an agreement "to comply with all regulations, laws, or ordinances pertaining thereto." (LAMC 57.105.3.9.1.2.) One such regulation is that: "No person shall drill, deepen or maintain an oil well or convert an oil well from one class to

the other and no permits shall be issued for that use, *until a determination has been made by the Zoning Administrator or Area Planning Commission* pursuant to the procedure prescribed in Subsection H of this section." (LAMC 13.01.I, emphasis added.)

There are currently 57 oil wells at the West Pico Drill Site. As the attached letter to the Zoning Administrator explains, since 2000 there have been 2 new wells drilled, 12 existing wells re-drilled, and 10 wells converted at the West Pico Drill Site, all without application to the Zoning Administrator and therefore without Zoning Administrator approval required by the LAMC and without environmental clearance required by CEQA. All of these wells have been granted LAFD operating permits and annual renewals, despite this failure to comply with City regulations and State law.

Non-compliance with City regulations at oil drill sites is a Citywide problem. For example, the Banning Semi-Controlled Drill Site in Wilmington, established in 2006, has approximately 220 wells and is one of the most troubled sites in the City. There are lengthy records of violations logged by DOGGR/CalGEM and SCAQMD, many of which also violate City law and Zoning Administrator assigned conditions restricting odors, fumes, noise and other nuisances. There have been projects executed without required Zoning Administrator approval, in violation of City regulations. The operator of this site applied for a slew of DOGGR permits to drill new wells in 2019, telling DOGGR that its 2006 Zoning Administrator approval and MND provided local approval and CEQA clearance, failing to disclose that the 2006 approval for drilling new wells was limited to a term of 12 years and expired in August 2018. Despite this, we believe that LAFD Annual Operating Permits for the Banning site in Wilmington are renewed year after year, in violation of the requirement for operator compliance "with all regulations, laws, or ordinances."

In addition to requiring operator compliance "with all regulations, laws, or ordinances," the LAMC also declares that: "Notwithstanding any other provisions of this Code or any other ordinance of the City of Los Angeles, no permit or license shall be issued in violation of any provisions of this Code or any other ordinance of the City of Los Angeles; if any permit or license is issued in violation of any provision of this Code or any other ordinance of the City of Los Angeles the same shall be void. Any permit or license issued, which purports to authorize the doing of any act prohibited by any other provision of this Code or any other ordinance of the City of Los Angeles, *shall be void*." (LAMC 11.02, emphasis added; LAMC 11.01 ["'Shall' is mandatory"].) To the extent

Annual Operating Permits were issued for unapproved or unlawfully approved projects or were issued or renewed despite violations of City regulations, they must be considered void.

Failure to Expend Permitting Renewal Fees for Intended Purpose

The violations of City and State law referenced above and the long history of non-compliance by the operators of the West Pico Drill Site and Banning Semi-Controlled Drill Site in Wilmington is traceable to the City's failure and refusal to do general compliance inspections and enforce its own laws.

The LAFD Annual Operating Permits are issued after a fee is paid, and a fee is required each year for the renewal of the LAFD Annual Operating Permits. These fees were established and are imposed by the City to cover the cost of annual compliance inspections for each drill site in the City. In fiscal year 2020-21, the permit fee was $1,290. For next year, the LAFD has requested and the City Council has agreed to increase the fee to $1,670. This is a cost per permit, and each oil well requires its own permit. The permit cost is calculated to pay for five "inspector hours" per oil well. (See Report from Board of Fire Commissioners," November 18, 2020 https://clkrep.lacity.org/onlinedocs/2020/20-1501_rpt_FC_11-18-2020.pdf, incorporated by reference.) The permit fee is expressly earmarked to pay for oil well inspections, and the permit is conditioned on compliance "with all regulations, laws, or ordinances."

These permitting fees result in significant revenue for the LAFD. There are approximately 1,100 oil wells in the City, so in 2020-21 more than $1.4 million was collected in operating permit fees. With the recently approved fee increase, next year the City will collect $1.8 million to pay for inspections. The West Pico Drill Site has 57 oil wells. In fiscal year 2020-21, $73,530 was collected in permit fees at this one drill site to cover the cost of compliance inspections. The Banning Semi-Controlled Drill Site in Wilmington has approximately 220 wells. In 2020-21, $283,000 of fees earmarked for LAFD compliance inspections of the wells was collected for the operating permits at this site.

Despite collecting significant annual renewal fees to cover the cost of compliance inspections for each oil well in the City, Professor Salman has been informed by LAFD that compliance inspections of each site have no connection to permit renewal. These renewals are approved automatically upon payment of the fee without any reference to

what might be found during inspections, as a matter of standard operating procedure. Indeed, LAFD operating permits have been renewed when there were open and unresolved Notices of Violation from the LAFD itself. Additionally, it is our understanding that the LAFD inspections that are performed look only for Fire Code violations and do not crosscheck approvals from the Zoning Administrator nor permitting and Notices of Violation from any other agency. Thus, when renewing the permits, LAFD has not verified operator compliance "with all regulations, laws, or ordinances."

Failing to expend permitting fees in the manner they were intended, to fund annual compliance inspections, appears to be a major contributing factor to the numerous drill site violations noted above and in the attached letter. Allowing non-compliance with City law by failing to inspect for non-compliance appears to be a continuing pattern and practice. This failure to perform fully-funded annual compliance inspections is particularly alarming given the potential dangers presented by poorly run and poorly regulated oil well operations that have been a subject of major concern in the City for years.

Conclusion

We look forward to your prompt response regarding the outstanding Public Records Act request by Professor Salman. NASE also urges you to carefully consider the legal issues and community concerns we have outlined above. Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer

Re: ZA-1989-17683-PA2; Need for Comprehensive Review of Conditions at the West Pico Drill Site (9101 & 9151 W Pico Blvd, Los Angeles, CA 90035) to Address Numerous Legal Violations and Community Impacts

Dear Mr. Irving,

On behalf of Neighbors for A Safe Environment (NASE), a California nonprofit corporation, we seek to address ongoing and emerging legal violations at the West Pico Drill Site (9101 & 9151 West Pico Blvd, Council District 5) that have led to a failure to provide necessary protections to the community surrounding this drill site. NASE has extensively communicated with the Zoning Administrator (ZA) and documented the bases of its concerns. NASE has also cooperated with the operator of the West Pico Drill Site, the Pacific Coast Energy Company (PCEC), and together with PCEC presented a set of practical solutions to the ZA. We urge the City to implement the reasonable and viable remedies we have previously presented and which are outlined below.

Unfortunately, thus far, the City has failed to act on the remedies NASE has proposed, including NASE's request for a Review of Conditions as per the procedures required by the 2001 Settlement Agreement between NASE, the City and the West Pico Drill Site operator and Condition 78 of the 2000 approval in ZA-1989-17683-PAD. Additionally, despite clear requirements in the City's Municipal Code and ZA Memo 133 for discretionary approval supported by environmental review for any oil well drilling, redrilling or conversion project, the City persists in relying on inapplicable categorical exemptions from the California Environmental Quality Act (CEQA) for approvals. Thus far, the City has also refused to impose

necessary modification of conditions to correct a great many ongoing violations of CEQA and City law by the City, as well as by the current and prior site operators.

NASE has retained our firm to make another effort to convince the City to bring its own practices of land use regulation and petroleum administration into compliance with the 2001 Settlement Agreement, CEQA, and City law. This letter outlines the remedies that would achieve those simple goals and provide necessary protection for the surrounding community. It also gives the City notice that if persistent violations are not rectified, NASE is prepared to seek legal remedies to require compliance with the Settlement Agreement and enforce CEQA and City law. We hope that the City will prefer to open discussion about a reasonable set of remedies.

A. NASE Urges the City to Adopt Remedies to Address Legal Violations and Impacts to the Community.

From its initial communication with the Chief ZA in November 2019 up until now, NASE has asked for only modest and eminently viable remedies to alleviate impacts to the community and ensure compliance with the law. NASE has requested that ZA-1989-17683-PA2 be a Review of Conditions, as mandated by the 2001 Settlement Agreement and Condition 78 of the 2000 approval in ZA-1989-17683-PAD. Pursuant to the 2001 Settlement Agreement and Condition 78, the review must:

- examine the West Pico Drill Site's compliance with conditions of approval;
- assess "neighborhood impacts;" and
- evaluate the "efficacy of mitigation measures," with modification of the mitigation measures and/or corrective measures "if warranted."

As set forth herein, this Review of Conditions must be comprehensive, legally compliant and must impose new conditions to address ongoing violations and impacts and correct significant errors in the 2000 approval for the West Pico Drill Site.

1. The Review of Conditions Must Include a Comprehensive Compliance Inspection.

The Review of Conditions for the West Pico Drill Site needs to be prefaced by a Comprehensive Compliance Inspection led by the Office of the Petroleum Administrator. This Review of Conditions should follow the example of the one and only Comprehensive Compliance Inspection of an oil drill site ever conducted by the City—the Rancho Park Drill Site inspection conducted in March/April 2017. Only a full inspection by a qualified professional can fully define the scope of the project in the current review. Thus, the inspection is necessary to

inform compliance with conditions of approval, CEQA clearance and, by the same measure, inform the ZA and the public regarding corrective measures that should be required.

2. The City Must Comply with ZA Memo 133 in its Review of Conditions By Requiring CEQA Review for the Projects on the Drill Site.

The Review of Conditions for the West Pico Drill Site must be compliant with CEQA and with the City's own guidelines in ZA Memo 133. It has been established beyond the shadow of a doubt that mitigation measures from the 2000 approval and its associated EIR have failed to protect the community. Odor complaints from the community are well document and are matched by testimony from Council Member Paul Koretz. The Los Angeles Fire Department also imposed citations on the operators of the West Pico Drill Site for leaving petroleum exposed on surfaces in 2017 and 2018.

Multiple conditions from the 2000 approval have been violated, and the City has failed to enforce mitigation measures established through the associated EIR. Conditions 46, 47, 53, 57, 61, 72, and 78 (concerning odors, nuisance, good oil field practices, redrilling, and reviews of conditions) have all been violated. "Mitigating conditions are not mere expressions of hope." (*Lincoln Place Tenants Ass'n v. City of Los Angeles* (2005) 130 Cal.App.4th 1491, 1508.) CEQA requires mitigation measures to be concrete and enforceable. (Pub. Resources Code § 21081.6(b).) From at least 2006 to the present the ZA and the City have failed to monitor or enforce these conditions in violation of CEQA.

In addition to those ongoing CEQA violations by the City, PCEC has stepped forward to do honest research on projects executed at the site since 2000. PCEC agrees with NASE that there have been 25 unapproved projects, including 24 projects on oil wells that require discretionary review by the ZA according to City code, and thus CEQA clearance by State law. ZA Memo 133 directly states that proposals to drill, redrill, or convert wells are ineligible for categorical exemptions under CEQA. The 25 unapproved projects and the obvious need to revise mitigation measures makes reliance on categorical exemptions utterly improper. An Initial Study and an MND are required, at minimum, and that is what NASE requests.

3. The Continuing Impacts to the Community Demonstrate a Need to Impose New Conditions Through the Review of Conditions.

The ongoing impacts to the community surrounding the West Pico Drill Site, and the numerous violations of existing conditions of approval, demonstrate a clear need to impose new conditions through the Review of Conditions process to prevent these problems from continuing.

Based on NASE's familiarity with the impacts to the community and the existing conditions, it is our position (supported by PCEC) that the following new conditions must be adopted:

- Annual Compliance Inspections led or overseen by qualified professional staff in the Office of the Petroleum Administrator.

- Permanent 24/7 Emissions Monitoring, with recorded data that is reported to the Petroleum Administrator, the ZA, and the public on a quarterly basis.

- Incorporation of the requirement of cyclical Five Year Reviews of Conditions from the 2001 Settlement Agreement into the ZA conditions for the site, using the full procedures delineated in Condition 78 of the 2000 approval as per the Settlement Agreement.

- Immediate Emergency and Accident Reporting to the City (to LAFD, the Petroleum Administrator, and the local Council office) for any emergency or accident that must be reported to any Federal, State, or regional agency.

The need for additional conditions may be identified through the comprehensive compliance inspection as well.

4. The Review of Conditions Must Correct Several Errors from the 2000 Approval.

The Review of Conditions for the West Pico Drill Site must also correct significant errors from the 2000 approval that are inconsistent with City law, the actual record of approvals for the site, and the facts of what actually exists at the site. Those errors include:

- **Delete Condition 72 to Eliminate its Contradiction with LAMC 13.01.H and 13.01I.** This condition addressing "redrilling" directly contradicts the provisions of Los Angeles Municipal Code sections 13.01.H and 13.01.I. Both of these sections require discretionary approval by the ZA before any oil well is drilled, redrilled, or converted between producer and injection well. The contradiction may have contributed to the rash of unapproved projects at the site since 2000, including the redrilling of 12 wells since 2000 without ZA review, approval, or CEQA clearance. Condition 72's undermining of LAMC 13.01.H and 13.01.I on drilling and redrilling wells may have also contributed to the conversion of 10 wells since 2000 without ZA review, approval, or CEQA clearance per the requirements of ZA Memo 133.

- **Correct the Number of Existing Wells.** The 2000 ZA approval for the West Pico Drill Site incorrectly asserts that 69 wells existed at the site in 2000 and that 69 wells had been approved. Only 59 wells currently exist at the site, and only 57 existed in 2000. Only 57 wells have been approved for the site by the ZA. The ZA's error in 2000 reflected a lack of knowledge about the drill site, a lack of knowledge about the difference between a well cellar and a well, and a failure to cross-check with State records from DOGGR (now CalGEM) even as the ZA wrote conditions requiring that all monitoring agencies need to be consulted. This error may have contributed to the drilling of unapproved wells without CEQA clearance in 2005 and 2010.

- **West Pico Drill Site Includes Both 9101 and 9151 West Pico Blvd as a Single Controlled Drill Site.** The 2000 approval improperly split the single integrated "Controlled Drill Site" into two sites because the operator in 2000 proposed a construction project that would occur on only one half of the site. This error runs afoul of LAMC 13.01, especially 13.01.E.2.b. A Controlled Drill Site is the only kind of conditionally approved land use on which oil can be produced from wells and processed for sale. Only one Controlled Drill Site can exist in Oil Drilling District U-131, and only one has ever been approved: namely the West Pico Drill Site, approved in ZA-1965-17683. The ZA severed the unified Controlled Drill Site into two in 2000, leaving both without a legally sustainable basis for operation. This error also may have contributed to the improper installation of microturbines by obscuring the prohibition against electric generation on the Controlled Drill Site or anywhere in the Oil Drilling District that was written into the 1965 approval to establish the Controlled Drill Site. The 2000 approval, which completely rewrote and supplanted the 1965 approval, also prohibits electric generation at the West Pico Drill Site. By improperly splitting the Controlled Drill Site in two, the 2000 approval left the other half of the Controlled Drill Site without any approval or conditions in place.

B. These Remedies Are Necessitated by the Ongoing and Potential Legal Violations.

NASE has chosen to focus on remedies in this communication in a continuing effort to achieve relief for the community and legal compliance by the City. However, the description of the remedies, above, should provide you with an indication of some of the legal violations we may seek to challenge in court, if necessary. These include:

- Ongoing violations of CEQA for the City's failure to enforce mitigation measures from the EIR associated with the 2000 approval for the West Pico Drill Site.

- Failure to require CEQA review for discretionary, and recently discovered, well drilling, redrilling and conversion projects at the West Pico Drill Site.

- The proposed improper reliance on categorical exemptions for the current review of the West Pico Drill Site.

- Failure to enforce LAMC 13.01.H and 13.01.I by allowing operation of 25 unapproved oil well projects on the West Pico Drill Site.

- Violated LAMC 13.01.E.2.b by dividing the Controlled Drill Site into two sites in 2000.

- Breach of the 2000 Settlement Agreement due to the City's failure to conduct the required five-year reviews for the West Pico Drill Site for at least the last 10 years. No legally required reviews have been held during Councilmember Koretz's term in the City Council until NASE demanded this review in November 2019.

- The current ZA review process also appears to be running afoul of the requirements of the 2000 Settlement Agreement, CEQA and City regulations due to its improperly narrow focus and the ZA's stated position that the process would not result in the modification of any conditions.

Conclusion

The problems at the West Pico Drill Site are not isolated incidents and they are not unknown to City officials. The City has been negligent in its land use-based regulation of oil drill sites, failing to protect the communities impacted by these drill sites. It has never performed regular inspections to monitor for compliance with ZA-assigned conditions, and so mitigation measures routinely are not followed and not enforced. Similarly, the City continues to engage in a pattern and practice of handing out categorical exemptions from CEQA review for oil projects, contrary to the requirements of CEQA, ZA Memo 133 and LAMC 13.01.H and 13.01.I. Taken together, this pattern of negligence gives a green light to unapproved projects and turns a blind eye to poor work practices, all at the expense of communities the City is supposed to protect.

Most confounding here is the City's refusal to address environmental, health, and safety protections when an operating oil company comes forward to join with the community in asking the City to implement CEQA properly and to do inspections, require emissions monitoring, and perform serious reviews. This situation must be remedied. It is NASE's hope that the current ZA process can be revised to begin to address these ongoing issues, but if not, we are prepared to pursue available legal options.

Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer

OFFICE OF ZONING ADMINISTRATION

MEMORANDUM

ZA MEMORANDUM NO. 133

September 19, 2016

TO: Office of Zoning Administration
Development Services Centers
Department of Building and Safety
Department of Public Works – Bureau of Engineering
Los Angeles Fire Department
Los Angeles Department of Water and Power

FROM: Linn K. Wyatt
Chief Zoning Administrator

SUBJECT: **APPLICATION AND PROCESSING REQUIREMENTS, INCLUDING CEQA REVIEW, FOR OIL AND GAS APPROVALS PURSUANT TO LOS ANGELES MUNICIPAL CODE SECTION 13.01-H.**

This Memorandum supersedes ZA Memorandum No. 94, dated December 12, 1994, and ZA Memorandum No. 94A, dated March 24, 2000.

This Memorandum is intended to establish a comprehensive set of procedures and policies for the acceptance and processing of applications for oil drilling approvals pursuant to Los Angeles Municipal Code (LAMC) Section 13.01-H and to establish City guidelines for the California Environmental Quality Act (CEQA) review of Section 13.01-H oil drilling applications.

I. Background

The LAMC requires a formal application and a filing fee in conjunction with a request for a determination of conditions for the conduct of oil drilling pursuant to LAMC Section 13.01-H. Other than the requirement for an application and payment of a filing fee, the LAMC contains no express procedural requirements for the determination of conditions under Section 13.01-H for an original approval or for a modification or clarification to a previously approved determination of conditions.

Z.A. Memoranda Nos. 94 and 94A

Historically, as described in ZA Memoranda Nos. 94 and 94A, applicants were permitted to apply for modifications to the original conditions for oil drilling approvals through the use of a more limited review process (similar to a plan approval under LAMC Section 12.24-L and M).

The use of the process outlined in Memoranda Nos. 94 and 94A is no longer permitted for any Section 13.01-H application, including those submitted as a determination of conditions, modification of condition, request for clarification, or related approval. All applicants seeking an approval under Section 13.01-H must follow the application procedures outlined in this Memorandum. All applications seeking any approval under Section 13.01-H will be processed by the City, including the Office of the Zoning Administrator, pursuant to this Memorandum.

Existing Approvals with Modification Procedures

In addition to the above historical process, there are existing active approvals which include conditions establishing a process for subsequent modifications or condition review. An example of one condition reads substantially as follows:

> *Drilling operations for the first X wells identified in the grant clause of the instant determination shall be completed within 36 months from the effective date of this determination. The drilling for the following X wells as hereby authorized shall be subject to a review of plans by the Zoning Administrator, without a public hearing, for the purpose of updating the record with the well identification and path.*

Another condition reads substantially as follows:

> *Review of Conditions. Two years following completion of construction… the applicant shall submit a Plan Approval application for reviewing the effectiveness of these conditions. … The applicant shall submit a 500-foot radius map with accompanying labels for owners and occupants. The Zoning Administrator may set the matter for public hearing if warranted.*

Both of these conditions include processes that are inconsistent with the processes established in this Memorandum. The first condition is inconsistent because it allows for modifications without a public hearing. The second condition is inconsistent because it allows the Zoning Administrator to not set a public hearing for a Plan Approval and implies the notice radius is 500 feet.

To the extent that any existing condition or grant in an existing approval gives the Zoning Administrator discretion in the process to be followed for a modification or condition review, the procedures in this Memorandum shall be followed, in accordance with the findings in Section II and the purpose statements in Section III.

To the extent that any existing condition or grant in an existing approval mandates a procedure that is inconsistent with this Memorandum, the Zoning Administrator shall consider whether a Plan Approval process shall be initiated by the City to revise any conditions to protect the public health, safety and welfare, including any condition establishing a process inconsistent with the purpose of this Memorandum. On the other hand, if an existing condition or provision is not modified through a Plan Approval, then the process outlined in the existing approval shall be followed.

Nothing in this Memorandum is intended to expand the authority the City has to initiate a Plan Approval.

II. Findings

In issuing this Memorandum, the Zoning Administrator makes the following findings:

A. In adopting the California Environmental Quality Act[1], the Legislature declared:

> It is the intent of the Legislature that all agencies of the state government which regulate activities of private individuals, corporations, and public agencies which are found to affect the quality of the environment, shall regulate such activities so that major consideration is given to preventing environmental damage, while providing a decent home and satisfying living environment for every Californian. (Public Resources Code Section 21000(g).

B. The CEQA Guidelines provide that CEQA's basic goal of protecting the environment has two purposes:

(1) avoiding, reducing, or preventing environmental damage where possible by requiring alternatives or mitigation measures; and

(2) providing information to decision-makers and the public concerning the environmental effects of proposed and approved actions. (CEQA guidelines 15002(a).)

C. One oft-repeated purpose of the CEQA Guidelines is to provide for public participation, including as set forth in Section 15201:

> Public participation is an essential part of the CEQA process. Each public agency should include provisions in its CEQA procedure for wide public involvement, formal and informal, consistent with its existing activities and procedures, in order to receive and evaluate public reactions to environmental issue related to the agency's activities. Such procedure should include, wherever possible,

[1] Public Resources Code, Sections 21000, *et seq*.

making environmental information available in electronic format on the Internet, on the web site maintained and utilized by the public agency.

D. Although CEQA does not require formal hearings at any state of the environmental review process, section 15202 provides that:

...

(b) If an agency provides a public hearing on its decision to carry out or approve a project, the agency should include environmental review as one of the subjects for the hearing.

(c) A public hearing on the environmental impact of a project should usually be held when the lead agency determines it would facilitate the purposes and goals of CEQA to do so. The hearing may be held in conjunction with and as part of normal planning activities.

...

(f) A public agency may include, in its implementing procedures, procedures for the conducting of public hearings pursuant to this section. The procedures may adopt existing notice and hearing requirements of the public agency for regularly conducted legislative, planning, and other activities.

E. Applications for oil and gas projects under LAMC Section 13.01-H have the potential to create unique risks and hazards to have the potential for significant and immediate impacts on the health, safety, and welfare of the residents in and around the project site through increased noise, odor, dust, traffic, and other disturbances, as well as the potential to significantly impact the City's air, water, soil, biological quality, geology, water, stormwater and wastewater infrastructure, transportation, emergency response plans and other aesthetic values and community resources.

F. People living and working within the land use and environmental impact range of oil and gas operations and activities have a substantial interest in participating in a public hearing on 13.01-H approvals.

G. Section 13.01-H provides authority for the Zoning Administrator to condition, approve or deny a Section 13.01-H application under the City's police powers to protect public health, safety and welfare and to issue and implement reasonable procedures to process Section 13.01-H applications consistent with the requirements for due process.

III. Purpose and Intent of Memorandum

This Memorandum is issued with the following intent:

- Ensure that the City complies with all legal requirements of CEQA in approving Section 13.01-H projects;
- Provide all parties that may be impacted by a project subject to a Section 13.01-H application an opportunity to participate in a public hearing;
- Meet the intent of CEQA in the review and approval of CEQA findings and determinations, to provide adequate public participation;
- Ensure that staff has time to adequately consider and respond to, if necessary, evidence submitted on a Section 13.01-H application and its related environmental findings (including the CEQA Guideline Section 15300.2 exceptions) prior to the issuance of any decision;
- Provide decision-makers and City Staff, and the public with the information and data needed for adequate decision-making under CEQA and Section 13.01-H;
- Ensure that Section 13.01-H applications are processed efficiently;
- Ensure that applicants, staff, and the public can rely on a consistent practice in reviewing Section 13.01-H applications;
- Provide for transparent disclosure and participation process; and
- Ensure that the city's processing and approvals pursuant to 13.01-H will not result in adverse effects to public health, safety, and welfare

IV. Application Requirements

The original case number shall be used for the plan approval request. Before an application may be deemed complete, the applicant must submit:

1) A completed "Land Use Application For Oil & Gas Project Conditional Approval" (CP Form CP-7834) with all required attachments, as specified in the application and the Instructions (CP Form CP-7833.)
2) A completed Environmental Assessment Form for Oil and Gas Projects (EAF-O, CP-7832), with all required attachments.
3) The filing fee pursuant to LAMC Section 19.01.

V. Processing Section 13.01-H Applications

A. CEQA Review

The following review procedures are intended to provide guidelines to implement CEQA on all Section 13.01-H applications. Nothing in this Memorandum or the guidelines provided herein are intended to conflict with CEQA. To the extent that these guidelines are silent or ambiguous, the Zoning Administrator shall fall back on the requirements and intent of CEQA. To the extent that these guidelines impermissibly conflict with CEQA, the provisions of CEQA control. Nothing in these Guidelines is intended to conflict with the Permit Streamlining Act, Gov't Code Section Government Code § 65920 et seq.

1. Preliminary Review for Exemptions

No categorical exemption forms will be processed for consideration or issued at the Planning Department Development Services. The applicant shall submit a complete EAF-O form with their application, which shall be reviewed by the Zoning Administrator. The Zoning Administrator will conduct a preliminary review to determine whether the application qualifies for an exemption from environmental review pursuant to CEQA. The Zoning Administrator may require the applicant to provide additional supporting materials from the applicant to support the use of a categorical exemption.

An application to drill, re-drill, deepen, or convert a well is not eligible for a categorical exemption and shall require an Initial Study or an EIR as described in section V.A.2. All other projects may be reviewed to determine if the project is exempt under any applicable categorical exemption in CEQA Guidelines Section 15300-15333 or any City Guidelines (adopted pursuant to CEQA). If a project is determined not to fall into any categorical exemption based on the project description, an Initial Study shall be prepared pursuant to section V.A.2. If the project falls within a categorical exemption, the Zoning Administrator shall determine if, based upon the whole of the record, any exception to any exemption under CEQA Guidelines, Section 15300.2, applies to the project, including, but not limited to the following:

> Cumulative Impact. All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant.
>
> Significant Effect. A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.

If the project is determined to be categorically exempt (CE) and no exceptions apply, the Zoning Administrator shall do all of the following:

- Give the public hearing notice required in section V.B., including a notice of an intent to adopt a categorical exemption to all property owners and occupants within a 1,500-foot radius of the project site's outer boundary, and provide for a 35-day comment period on the project, prior to approval. The public hearing may be held during the comment period. The hearing notice (with the notice of intent to adopt a CE) must be provided in English and Spanish.

- If after the 35-day comment period, or any time prior to making a decision on the project, the Zoning Administrator determines that substantial evidence does not support the use of the exemption, including from the existence of an exception in Section 15300.2, the Zoning Administrator shall require an Initial Study to be prepared consistent with the procedures outlined herein.

- Alternatively, if the Zoning Administrator finds after the 35-day comment period, or any time prior to making a decision on the project, that additional information and analysis is required to determine if the categorical exemption is supported with substantial evidence, and the applicant desires the City to use a categorical exemption rather than a prepare an Initial Study, the Zoning Administrator may require the applicant to submit additional information or documents and/or technical studies or reports, including requiring the applicant to hire independent consultants to prepare any necessary technical studies or reports or peer review any prepared studies or reports. If after reviewing any additional documents, reports or studies, required by the Zoning Administrator, it is determined that a categorical exemption is not supported by substantial evidence, an Initial Study shall be prepared.

- If the use of the categorical exemption is supported by substantial evidence in the record at the time of the decision, the Zoning Administrator shall ensure the record contains a memorandum or narrative substantiating the use of the categorical exemption, including explaining how substantial evidence in the administrative record supports the use of the exemption, and that the Zoning Administrator considered whether any exception to an exemption under CEQA Guidelines Section 15300.2 is applicable, including providing where necessary an explanation or evidence to demonstrate that any comments submitted on the intent to adopt the Categorical Exemption do not provide substantial evidence that an exception applies or the exemption does not apply.

2. Initial Study Determination

For any project that does not qualify for a categorical exemption, including any project to drill, redrill, or convert a well, an Initial Study must be completed.

Nothing in this subsection is intended to require the preparation of an Initial Study, when a preliminary review of the project demonstrates an EIR is clearly required, pursuant to CEQA Guidelines Section 15060(d).

The Initial Study must be prepared by an environmental consultant with the qualifications and experience required in this Memorandum. The Zoning Administrator may require the applicant to provide any additional documents, information or technical studies or reports necessary to complete the environmental review of the project, including requiring the applicant to hire an independent contractor to prepare or peer review technical studies or reports. The Initial Study shall comply with Section 15063 of the CEQA Guidelines and be prepared using Appendix G to the CEQA Guidelines and any City issued procedures or guidelines.

If the Initial Study shows both of the following Health Impact Assessment Criteria apply, the Zoning Administrator shall also require a Health Impact Assessment (HIA), as defined in Subsection V.A.5., before preparing the environmental clearance for the project:

- one or more of the air or hazards impact thresholds on Appendix G identified as III(a), III(b), III(d), VIII(a),VIII(b), VIII(c),or VIII(g) are found to be "less than significant impact with mitigation"; and
- the project is within 1,500 feet of any sensitive receptors, as defined by SCAQMD.

After the Initial Study is completed (and the HIA, if necessary), the Zoning Administrator will determine whether the proposed environmental clearance for the proposed project is a Negative Declaration (ND) or a Mitigated Negative Declaration (MND) or whether an EIR is required pursuant to sections 15065 or 15064 of the CEQA Guidelines.

If the Initial Study demonstrates that all of the impact areas will have no impact or less than significant impact, the Zoning Administrator may prepare a ND. (Note: if the Health Impact Assessment Criteria apply, a ND could not be prepared because the Initial Study identified significant impact requiring mitigation.)

If the Initial Study (and the HIA, if required) demonstrates that the project will not result in a significant impact with mitigation imposed, the Zoning Administrator may prepare a MND.

If the Initial Study (and the HIA, if required) demonstrates that the project may result in a significant impact to the environment that cannot be mitigated to less than significant, the Zoning Administrator shall require the preparation of an EIR. In determining whether an EIR is required, the Zoning Administrator shall review and consider all of the following CEQA Guidelines, without limitation to any other applicable requirements of CEQA:

- 15064 (guidelines on determining significant impacts),
- 15064.4 (guidelines on determining greenhouse gas impacts),
- 15064.5 (guidelines on determining cultural and archaeological impacts), and
- 15065 (guidelines requiring consideration of Mandatory Findings of Significance, including subsection (a)(4): "The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.")

If an ND or MND is issued, the Zoning Administrator shall publish a Notice of Intent to Adopt an ND or MND pursuant to CEQA Guidelines Section 15073, prepare the ND or MND findings (and the Mitigation Monitoring Program for a MND) and process the application pursuant to Section IV. The Public Hearing notice sent in section V.B. will include a statement that the City has published a Notice of Intent to Adopt an ND or MND and include a link to the City's website where the Notice of Intent is published. The Notice of Intent to Adopt an ND or MND shall be published on the City's website in English and Spanish.

If the Initial Study demonstrates the project requires an Environmental Impact Report (EIR), the Zoning Administrator shall follow the procedures in section V.A.3.

3. Environmental Impact Report

If an EIR is to be prepared on a project, in addition to any other requirements of CEQA, the City will require all of the following:

- Provide the Notice of Preparation to all property owners and occupants within a 1,500-foot radius of the project site's outer boundary; and
- Prepare a Health Impact Assessment, as defined in section V.A.5., if not already prepared, and provide a relevant summary of the Health Impact Assessment in the EIR where appropriate to inform the required analysis. The Health Impact Assessment shall be considered in any certification of the EIR and the approval, conditional approval, or denial of the Section 13.01-H application.

An environmental consultant with qualifications and experience provided in section V.A.4 must prepare the EIR. The EIR must be prepared and certified in compliance with CEQA, including but not limited, CEQA Guideline Sections 15080-15097, 15120-15155.

4. Environmental Consultant Qualifications

The City shall ensure that any environmental consultant that is preparing an Initial Study, MND, ND, or an EIR on a 13.01-H project has the following qualifications and experience:

- The Project Manager has at least seven (7) years' experience preparing CEQA documents.
- The Project Manager has prepared and/or reviewed at least five (5) EIRs for projects involving oil and gas drilling or production.
- The consultant or consultant team, including any subcontractors, have demonstrated training, knowledge, and experience in the following topic areas as they specifically relate to oil and gas projects: environmental health, public health, hazardous materials, air quality, GHG emissions, water quality, geology, noise, traffic, aesthetics, and risk and safety issues.
- In the case of EIRs or MNDs requiring Health Impact Assessments, the consultant team, including any subcontractors, has at least five (5) years' experience in preparing Health Impact Assessments. The consultant who prepares the HIA shall be familiar with accepted HIA process and content including, but not limited to, the "Minimum Elements and Practice Standards for Health Impact Assessment," Version 3.

The City shall ensure that all environmental consultants have copies of this Memorandum prior to preparation of any Initial Study, ND, MND or EIR.

5. Health Impact Assessment (HIA)

A HIA is defined as follows:

> A study of the project for the surrounding vicinity identifying pollution and population indicators, such as, but not limited to, those analyzed in the

California Communities Environmental Health Screening Tool; the number of people affected by the project; short term or permanent impacts caused by the project; likelihood that impacts will occur; and recommended mitigation measures.

Any HIA required under these procedures shall be used to inform whether an EIR is required and whether to approve, condition, or deny the application under Section 13.01-H.

B. Public Participation

The Zoning Administrator will hold a public hearing on all Section 13.01 applications prior to project approval.

Notice of this public hearing must be sent to all property owners and occupants within a 1,500-foot radius of the project site's outer boundary, in English and Spanish. For projects being approved with a CE, ND or MND, the Notice of Intent to Adopt a CE, ND or MND may be combined with the public hearing notice.

C. Final Determination

Notices of final decisions will be issued to the applicant, all residents abutting the project site, and all individuals who request such notice.

All Zoning Administrator Section 13.01-H Determinations may be appealed to the Area Planning Commission. The Area Planning Commission decision is final. All CEQA determinations by the Zoning Administrator or the Area Planning Commission are subject to appeal to the City Council pursuant to Public Resources Code Section 21151(c).

Nothing in this Memorandum is intended to limit the Zoning Administrator's express and inherent authority to administer LAMC Section 13.01-H.

To the West Los Angeles Area Planning Commission,

Please add the **attached petition with signatures** to the case file for ZA-1989-17683-PA2-1A, concerning the West Pico Drill Site, to be heard by the WLA APC on August 18, 2021..

The petition signers support NASE's appeal to overturn the ZA's ruling.

The text of the petition is copied below. The original with signatures is in the attachment.

Yours,

The Pico Robertson Health and Safety Coalition

Re: WLA APC Appeal Case No ZA-1989-17683-PA2-1A, Supporting NASE's Appeal

501 people have signed a petition on Action Network telling you to Stop Illegal Oil Drilling in the City of Los Angeles.

Here is the petition they signed (SIGNATURES ATTACHED):

> We Support Neighbors for A Safe Environment's (NASE's) Appeal to Overturn the Zoning Administrator's Lawless Decision on the West Pico Drill Site (ZA-1989-17683-PA2-1A)
>
> On June 2, 2021, the Zoning Administrator (ZA) in the Los Angeles Department of City Planning Department issued a ruling that openly declares that illegal oil well drilling at the West Pico Drill Site can stand unaltered, unreviewed, and without remedy. The ZA likewise ruled that numerous other health, safety, and environmental violations of City law and the ZA's own Conditional Use Approval for the drill site do not matter.
>
> The ZA recognized the rampant illegality but ruled that the West Pico Drill Site is and has been in "substantial compliance."
>
> Yes, the ZA said up is down and 2+2=5. He contradicted himself openly and without a fig leaf of embarrassment. He openly declared he did not need to follow City law governing the review of oil drilling and production. His ruling was lawless and illegal.
>
> This is not just a danger to the communities around the West Pico Drill Site, but to all communities around all oil drill sites in the City.
>
> Neighbors for a Safe Environment (NASE) has appealed the ZA's ruling to the West Los Angeles Area Planning Commission. NASE is a local non-profit (501C4) neighborhood organization formed to protect the community from the impacts of oil drilling and production.
>
> • We, the signatories of this petition, support NASE's appeal to overturn the entirety of the ZA's dangerous and illegal decision.
>
> • We call on the West Los Angeles Area Planning Commission to study the case closely and thoroughly, and to preserve its jurisdiction over the case so that it is not rushed into hasty action.
>
> • We call on all elected officials in the City of Los Angeles and all candidates running for elected office to demand that the ZA's ruling be overturned and that the underlying Review of Conditions for the West Pico Drill Site be started again with clear instructions to obey all City and State laws and obligations, including those

that require proper environmental review under the State's CEQA law and the terms of the City's 2001 Settlement Agreement with NASE.

• We insist that illegal actions, illegal oil well projects, and violations of health and safety regulations must be remedied with penalties, increased protections for the community, and equitable measures in the interest of good public policy (such as the plugging of illegal wells and idle wells).

Petition 8-9-21 to stop-illegal-oil-drilling-in-the-city-of-los-angeles-2 SIGNATURES.pdf
177K

West Los Angeles Area Planning Commission; Elected City Officials; Candidates in 2022 City Elections,

501 people have signed a petition on Action Network telling you to Stop Illegal Oil Drilling in the City of Los Angeles.

Here is the petition they signed:

We Support Neighbors for A Safe Environment's (NASE's) Appeal to Overturn the Zoning Administrator's Lawless Decision on the West Pico Drill Site (ZA-1989-17683-PA2-1A)

On June 2, 2021, the Zoning Administrator (ZA) in the Los Angeles Department of City Planning Department issued a ruling that openly declares that illegal oil well drilling at the West Pico Drill Site can stand unaltered, unreviewed, and without remedy. The ZA likewise ruled that numerous other health, safety, and environmental violations of City law and the ZA's own Conditional Use Approval for the drill site do not matter.

The ZA recognized the rampant illegality but ruled that the West Pico Drill Site is and has been in "substantial compliance."

Yes, the ZA said up is down and 2+2=5. He contradicted himself openly and without a fig leaf of embarrassment. He openly declared he did not need to follow City law governing the review of oil drilling and production. His ruling was lawless and illegal.

This is not just a danger to the communities around the West Pico Drill Site, but to all communities around all oil drill sites in the City.

Neighbors for a Safe Environment (NASE) has appealed the ZA's ruling to the West Los Angeles Area Planning Commission. NASE is a local non-profit (501C4) neighborhood organization formed to protect the community from the impacts of oil drilling and production.

• We, the signatories of this petition, support NASE's appeal to overturn the entirety of the ZA's dangerous and illegal decision.

• We call on the West Los Angeles Area Planning Commission to study the case closely and thoroughly, and to preserve its jurisdiction over the case so that it is not rushed into hasty action.

• We call on all elected officials in the City of Los Angeles and all candidates running for elected office to demand that the ZA's ruling be overturned and that the underlying Review of Conditions for the West Pico Drill Site be started again with clear instructions to obey all City and State laws and obligations, including those that require proper environmental review under the State's CEQA law and the terms of the City's 2001 Settlement Agreement with NASE.

• We insist that illegal actions, illegal oil well projects, and violations of health and safety regulations must be remedied with penalties, increased protections for the community, and equitable measures in the interest of good public policy (such as the plugging of illegal wells and idle wells).

155. Ian Dawson (*ZIP code: 90034)*
I have no issue with legal oil well drilling. But, having found out that no oversight, review, penalties or safeguards by either the Zoning Administration or the LA Department of City Planning has occurred over the last few decades, requires public action and intervention to make the city do their legal job to protect citizens. Those that have ignored the law should be fired immediately and all drilling should stop until all wells are reviewed by an independent auditor, and only then can drilling permits be re-issued.

156. Ivan kamil (*ZIP code: 90064)*

157. Ilona Razhavsky (*ZIP code: 90035)*

ZA-1989-17683-PA2-1A, supporting NASE's appeal

Katy for LA City Council <info@katyforla.com> Mon, Aug 9, 2021 at 1:00 PM
To: apcwestla@lacity.org, dylan.sittig@lacity.org
Cc: Michael Salman <salman@history.ucla.edu>, Rabbi Yonah Bookstein <rabbiyonah@gmail.com>

To the Members of the West Los Angeles Area Planning Commission:

I am writing to strongly urge you to grant Neighbors for A Safe Environment's (NASE) appeal of the 6/2/21 Zoning Administrator (ZA) ruling. You have an excellent opportunity to protect public health and end Pacific Coast Energy Company's (PCEC) egregious conduct at the West Pico Drill Site, and you should take it.

PCEC has been engaged in ongoing, egregious violations at the West Pico Drill Site for years. In fact, PCEC explicitly admitted in its 6/19/20 letter to the ZA that it violated multiple sections of the Los Angeles Municipal Code by failing to comply with the City Code and CEQA. The ZA, for its part, has also recognized its own failure to comply with the City's own environmental review policies. Despite these admissions by both the site operator and the City's ZA, the ZA has decided to allow this unsafe and reckless oil drilling use to continue in the middle of a dense residential neighborhood. This result is dangerous - not only because of the potentially harmful public health impacts that PCEC's activities have on the surrounding neighborhoods, but also because it tells oil well operators across the City that they can ignore the City Code, ZA assigned conditions, the California Environmental Quality Act, and the ZA's own policies on environmental review with impunity.

You have an opportunity to legally terminate a use that is harmful to the health of the community, while at the same time making clear that violations of oil well operating permits will not be tolerated. As an environmental and land use attorney and a long-time area resident and LA City Council candidate running to represent the surrounding community, I urge you to seize the once-in-a-generation opportunity before you and choose to put our community's health first.

Sincerely,

Katy Young Yaroslavsky
Candidate for LA City Council District 5

Dylan Sittig <dylan.sittig@lacity.org>

Case No. ZA-1989-17683-PA2-1A; Supporting NASE's Appeal

1 message

Dear West Los Angeles Area Planning Commission Members:

I write in strong support of NASE's appeal of the 6/2/21 Zoning Administrator ruling. The ZA decision is nonsensical on a number of fronts, and sets a very dangerous precedent for our city. It must be overturned.

The ruling states that Pacific Coast Energy Company is in full compliance, despite the fact that the company underwent 25 different unpermitted projects at the site (as admitted by PCEC in their own 6/19/20 letter and as detailed in the Department of City Planning's staff report). The ruling grants a Categorical Exemption (CE) from environmental review, despite the fact that ZA Memorandum 133 expressly prohibits the granting of CEs for projects drilling, re-drilling, or conversion of oil wells.

In short, the ruling is shocking. Not only does it fail to require any actions in response to the unpermitted projects, but it rewards PCEC's illegal conduct with the type of exemption applied to benign projects like adding signage or building a bike path.

Oil drilling in close proximity to residences is exactly the kind of use from which CEQA was designed to protect the public. The 6/2/21 ruling refuses to provide any new protection for stakeholders in Pico-Robertson. It also encourages lawlessness by other well operators. As a candidate running to represent a district with one of the highest concentrations of oil wells in the city, I am deeply concerned about the precedent this ruling would set if it is allowed to stand. I ask that you protect Angelenos by overturning this decision.

Sincerely,
Scott Epstein
Candidate for LA City Council District 5

Re: Case No. ZA-1989-17683-PA2-1A; Supporting NASE's Appeal

Dear Commissioners:

My name is Sam Yebri. I am a concerned resident, business owner, and father of four young children who attend school blocks near the oil and gas wells operating at 9101 and 9151 W. Pico Blvd., Los Angeles, CA 90035 (the "West Pico Drill Site"). I am also a former Los Angeles City Commissioner and candidate for Los Angeles City Council to represent the 5th District. I am writing to express my strong support for the appeal filed by Neighbors for A Safe Environment ("NASE") requesting that the West Los Angeles Area Planning Commission overturn the Zoning Administrator's ("ZA") decision regarding the West Pico Drill Site (Case No. ZA-1989-17683-PA2-1A).

The ZA's June 2, 2021 Letter of Determination (the "LOD") correctly noted that the operator of the West Pico Drill Site was in violation of several conditions imposed by the Board of Zoning Appeal, fire, life, and safety violations regulations of the Los Angeles Fire Department, and the terms of a Settlement Agreement that the City of Los Angeles entered into with NASE in 2001 (the "2001 Settlement Agreement"). Yet, despite these substantial and blatant violations, the LOD – without valid justification or meaningful explanation – concluded that the West Pico Drill Site was in "substantial compliance" with all city and state laws.

The LOD must be overturned. As set forth in detail in NASE's appeal, the LOD is filled with internal contradictions and legal and factual errors. Moreover, in effect, the LOD ruled that illegal oil well drilling near our homes, schools, and houses of worship may continue unabated, un-inspected, and without consequence. This ruling endangers neighboring residents and sets a dangerous precedent for similar health, safety, and environmental violations throughout the City of Los Angeles. As such, the unlawful and dangerous LOD must be overturned and this matter must be carefully reviewed *de novo* in compliance with California's CEQA laws and the terms of the 2001 Settlement Agreement.

Sincerely,

Sam Yebri

Pamela White <pamelasw4224@gmail.com> Mon, Jul 26, 2021 at 2:09 PM
To: apcwestla@lacity.org, dylan.sittig@lacity.org

Hello,

As someone who resides within 1500 feet of the West Pico Oil Drill Site, I heartily support NASE's appeal of the Zoning Administrator's June 2, 2021 decision. Please overturn the ZA's ruling.

Sincerely,
Pamela White
1420 S. Oakhurst Drive, 90035

My name is Richard S. Weiner and I am sending this email to the Area Planning Commission in support of the Appeal filed by Amy C. Minteer, Esq. on behalf of Neighbors For A Safe Environment (NASE).

My wife and I have lived in our home for more than 22 years, which is within 1500 feet of the West Pico Drill Site.

I am one of the founders and members of the Board of Director and Secretary of NASE, which is a California non-profit Public Benefit corporation. NASE was founded in 2000 to seek better and stronger protections for the community when BreitBurn Energy Company (BreitBurn) asked the Zoning Administrator to approve expanded operating rights on the Drill Site. Breitburn is the predecessor of the current Applicant, Pacific Coast Energy Company (PCEC).

The Drill Site is in the middle of a residentially zoned neighborhood. There are numerous schools and houses of worship within close proximity.

NASE filed suit in 2000-01 against BreitBurn and the City, and won a Writ of Mandate from the Los Angeles Superior Court ordering revisions to an Environmental Impact Report and reconsideration of the ZA's decision. That Writ caused BreitBurn and the City to seek a settlement with NASE, known in this current matter as the 2001 Settlement Agreement. Among the many provisions of the Settlement Agreement was a requirement for cyclical 5 Year Reviews of Conditions by the Zoning Administrator to examine compliance, "neighborhood impacts," and "the efficacy of mitigation measures" as per a procedure for a two-year post project check-up defined in Condition 78 of the 2000 ZA approval. The 5 Year Reviews of Conditions that were supposed to commence in 2010 and be held again in 2015 never happened. NASE prompted the initiation of the current review in November 2019 by notifying the Chief ZA and City Attorney that the 2001 Settlement Agreement had been violated. The ZA has failed in the current review to abide by the terms of the 2001 Settlement Agreement and Condition 78 of the 2000 ZA approval.

As pointed out in Ms.Minteer's Appeal on behalf of NASE, the Zoning Administrator has acknowledged that PCEC has violated numerous aspects of the Settlement Agreement, the 2000 ZA approval, and City code. As she also points out, there are also substantial CEQA violations. Yet, despite the imperative of Condition 78 of the 2000 ZA approval to assess environmental impacts and the "efficacy of mitigation measures," and despite the massive record of non-compliance and illegal projects, the ZA granted an improper Categorical Exemption from environmental review. This short circuited the ZA's entire review and helped to the produce the ZA's self-contradicted conclusion that the drill site is and has been in substantial compliance. As Ms. Minteer explains, the ZA's ruling is itself in violation of both City law and CEQA.

The ZA ruling has winked at illegal oil drilling projects executed without applications, reviews, and approvals required by City Code, and thereby dismisses City law in a way it is not authorized to do. This is illegal and poses a danger not just to the communities around the West Pico Drill Site but to the entire city.

The ZA decision should be reversed and the entire matter sent back to a fresh ZA with clear instructions to rehear the matter in compliance with the terms of the Settlement Agreement, Condition 78 of the 2000 ZA approval, City code, and CEQA.

I would be on the telephone voicing my support of the NASE Appeal at the hearing, but at the time of the hearing I will be flying to a Granddaughter's engagement party in New York.

Sincerely,

Richard S. Weiner

Re: ZA-1989-17683-PA2-1A, West Pico Drill Site, 9101 & 9151 W. Pico Blvd, Los Angeles, CA, 90035

To the West Los Angeles Area Planning Commission,

In regard to Case No. ZA-1989-17683, ENV-2020-1328-CE, and by vote of 13 yea, 0 nay and 1 abstention at the July 15, 2021 General Board meeting, the South Robertson Neighborhoods Council (SORONC) fully supports the appeal filed by NASE (Neighbors for A Safe Environment), a California nonprofit environmental organization formed by our neighbors in 2000 due to concerns about the West Pico Drill Site.

We have attached a letter by NASE's attorney Amy Minteer of Chatten-Brown, Carstens & Minteer LLP, and the letter's attachments and addenda, which delineate the basis for the appeal.

As Ms. Minteer's letter points out, the West Pico Drill Site is operating in violation of:

- the conditions under which the project was approved,
- the Los Angeles Municipal Code
- the California Environmental Quality Act (CEQA), and
- the 2001 Settlement Agreement with NASE which requires periodic reviews and corrective actions for environmental and operational defects.

SORONC is charged with affirmatively acting to support the health, safety, and welfare of our stakeholders. City laws and regulations that are supposed to govern the operation of the drill site are expressly intended to protect public safety and health., Likewise for CEQA, the State of California's landmark environmental law. Therefore we find the ZA Determination abhorrent due to the determination's utter disregard for City laws and regulations, and its evasion of the requirements for environmental review under CEQA. This puts the safety, health, and welfare of our stakeholders at unnecessary risk.

SORONC stakeholders of all ages live, work, eat, play, learn, socialize and invest in close proximity to the West Pico Drill Site.

Re: also a question about the zoom link

1 message

James Williams <james.k.williams@lacity.org> Tue, Jul 27, 2021 at 9:26 AM
To: Michael Salman <salman@history.ucla.edu>
Bcc: dylan.sittig@lacity.org

Good morning Michael,

There are a few moving parts to the notification process. The Commission Office is tasked with sharing the appeal information for the West LA Area Planning Commission's public hearing. We do that most effectively through the agenda. Please see the link below to a previous agenda and note the instructions, links and information that is provided there. There are links to the staff reports for each item that detail the project, the approval and the appeal.

https://planning.lacity.org/dcpapi/meetings/document/69762

The Zoom link and the passcode are the same information that will be shared on the agenda which will be posted one week before the meeting. I am not sure if you have a different copy of the hearing notice? I have attached the version that I am using and it is fairly clear and does name Amy Minteer? I will share your concerns with staff and supervisors.

I have added the Rules of Procedure for the West LA Area Planning Commission to clear up any confusion with the submission process. We are basically asking that all materials and comments be submitted ten days before the hearing date. We will accept comments and documents after that cutoff, but there will be size restrictions on submissions leading up to the hearing date. The contact email for the West Los Angeles Area Planning Commission is apcwestla@lacity.org.

The hearing notice is a brief summary of the project or appeal and an invitation for the public to participate in the hearing and gain clear knowledge of the project and any perceived challenges. There is more information within the initial action (that was appealed) and within the staff report and related documents that are shared with the public via the agenda. The Commission Office posts the same information that the Planning Commission reviews in preparation for the meeting.

Please feel free to share the attached information and to encourage your supporters to visit the Planning Department website as a source of information regarding the Planning process.

One more question:

Is the zoom link on the hearing notice correctly formatted? It does not seem to function as a link, unlike the link for the agenda.

In general, the formatting for this notice is not optimal for easy reading, link access, etc. The type is small, legibility is obscured by colored backgrounds, etc.

Case No. ZA-1989-17683-PA2-1A, Supporting NASE's appeal

Rebecca Klempner <beccaklempner@gmail.com> Wed, Jul 28, 2021 at 12:40 PM
To: apcwestla@lacity.org, dylan.sittig@lacity.org

Dear members of the Area Planning Commission:

I was unsurprised to receive notice of the meeting regarding the appeal of recent rulings on the West Pico Drilling Site, given we live just a block from the pumping station.

The facility has been decades-long nuisance for us. There are signs of what's going on on the pavement outside the facility -- you can sometimes see the rainbow-like colors indicating oil presence on the concrete sidewalk outside the retaining wall whenever there's water present (for example, after rain). However, many of the residents don't even know that behind the retaining wall is an oil well. It's not required for landlords or home sellers to tell new residents even though petrochemicals are a known carcinogen, and the longer you live by them, the more concern there is.
After reading that there are indeed multiple legal violations hidden behind that wall, it seems to me that the operators depend on the anonymity that the wall provides.

We need to learn more about what exactly the operators are doing at the West Pico wells and how it impacts us. Personally, I'm concerned that there have been rather a lot of cancers and benign tumors among friends who have lived within a 3 block radius of the site. Are they just naturally occurring, and the fact I know of so many cases is just because so many people live in this tight little neighborhood? Or is there something else going on? We don't know because there has been insufficient environmental impact review.

I want to see regulations enforced, a thorough independent environmental review conducted, and if the results are concerning, I'd like to see the well shut down and the site properly ameliorated. I'm very concerned that the planning commission didn't take these actions previously EVEN WHEN THE DOCUMENT THE CITY PROVIDED EXPOSED VIOLATIONS. Not only was I puzzled by the lack of logic in the decision, it makes me question whether those who are supposed to be looking after the wellbeing of residents have instead prioritized the interests of businesses from outside our community.

Thank you for your attention,

Re: ZA-1989-17683-PA2-1A
West Pico Drill Site, 9101 & 9151 W. Pico Boulevard, Los Angeles, CA 90035
Appeal by Neighbors for a Safe Environment (NASE)

To the West Los Angeles Area Planning Commission:

The Cheviot Hills Home Owners' Association represents some 1400 households situated not far from the West Pico Drill Site.

Our Association has participated in multiple land use cases of various kinds that have come before the Zoning Administrator for review. Many of our members have done the same in their professional and private capacities. We are now writing in support of the pending appeal by Neighbors for a Safe Environment (NASE).

In the matter of the "Plan Approval" for the West Pico Drill Site (Case No. ZA-1989-17683-PA2 & ENV-2020-1328-CE), we urge the West Los Angeles Area Planning Commission to overturn both the error-filled June 2, 2021 Zoning Administrator determination and the inappropriate categorical exemption from environmental review on which the Zoning Administrator's faulty review was based.

From the perspective of our collective experience in land use cases, as well as our proximity to the West Pico Drill Site, we are dismayed that the City allowed 24 major oil well projects to be executed without applications to the Zoning Administrator for legally required discretionary reviews and environmental clearance under CEQA, not to mention a 25th major project to install one megawatt of microturbine electric generators that are expressly prohibited by ZA conditions of use. This is unfathomable to those of us who have wrestled with the rigors of Zoning Administrator reviews and CEQA reviews.

In light of these 25 illegal projects and numerous other documented violations of City Code and conditions of approval, it is incredible that the Zoning Administrator could declare on the first page of his June 2, 2021 determination that: ***"I hereby DETERMINE, based on the whole of the administrative record, [t]hat the Conditions of Approval of Determination BZA No. 2000- 1697 have been and are being substantially complied with."*** That is an error of law and facts, contradicted many times within the Zoning Administrator's own letter of determination.

We are troubled to learn that this massive evasion of required reviews was enabled by the lack of City compliance inspections, from the same City that inspects home remodeling, billboards and countless other less serious activities that require City approvals and permits. More than a few of our members are frightened to hear that a work culture of sloppiness involving violations of the City's Fire Code, State oil well safety laws, and SCAQMD air emissions laws has grown in the shadow of the City's inattention. We cannot understand how the City can approve initial land use entitlements for an activity as inherently risky and historically troubled as oil production, especially in a residential neighborhood, and then turn a completely blind eye to the most basic requirements of compliance and enforcement during the ongoing life of the land use. We cannot understand how the Zoning Administrator in the current case could order no corrective actions and write no new conditions to protect our health and safety, and at the same time declare that "inspections…will continue" when the City does not do even the most basic compliance inspections.

We hoped that the current ZA review would be the starting point to turn this situation around. We are frustrated that the opposite has happened.

The same oil drill site that was allowed to evade ZA reviews and environmental reviews for 25 major projects is now being exempted from environmental review and being given a pass on a shocking array of illegal projects and other violations. The same oil drill site that was supposed to have Reviews of Conditions in 2010 and 2015 to "evaluate…the efficacy of mitigation measures" and change them as warranted has received a review that excluded consideration of the need for enhanced mitigation measures. There has been no CEQA process to consider the efficacy of mitigation, monitoring and enforcement measures that have obviously failed. This violates both Condition 78 of the 2000 ZA approval and Section 4.b of the 2001 Settlement Agreement, as well as CEQA and every ZA approval since the drill site was first given land use entitlement in 1965. The statements of the presiding ZA at the two summer 2020 public hearings declaring that no mitigation measures will be changed short-circuited legally required review processes.

The 25 unapproved projects, dozens of illegal and void City permits, and other problems documented by community members and reported to the Zoning Administrator were not addressed, but were buried in contradictory statements in the ZA's determination, alternately recognizing some of the violations but then determining on the first page that there has been compliance. This allows illegal activity to stand in place without equity or protection for the community, and it sets in motion another violation of CEQA for segmenting a larger known project into smaller pieces that obscure the full environmental impact.

We strongly urge you to send this case back for the proper environmental review under CEQA that it should have received from the outset: An initial study, followed by either a Mitigated Negative Declaration or an Environmental Impact Report. That is the necessary procedural and substantive first step toward holding a full and proper ZA review that addresses all the requirements of Condition 78 of the 2000 ZA approval, Section 4.b of the 2001 Settlement Agreement, and the documented evidence of 25 major unapproved projects and dozens of additional permitting and compliance problems.

Our Association understands the importance of following proper rules and regulations. We rely on the rigor of the City's Zoning Administrator, Engineering, and Building and Safety reviews to keep us all safe when our local residents undertake projects that could have an impact upon neighbors. We cannot accept that the same agencies would allow an oil drill site in close proximity to our neighborhood to escape environmental reviews under CEQA and even facilitate it by granting an exemption, nor can we understand how 25 major projects at an oil drill site could be allowed to happen without a review and allowed to persist when reported to the Zoning Administrator.

Plainly, the correct course of action is to begin this review again and to do it properly.

Sincerely,

Bob Keehn, President

Re: ZA-1989-17683-PA2 & ENV-2020-1328-CE; West Pico Drill Site, 9101 & 9151 W. Pico Blvd, Los Angeles, CA, 90035

To the West Los Angeles Area Planning Commission,

The Beverlywood Homes Association represents 1,354 members and their families who reside South of the West Pico Drill Site.

Our Association engages in rigorous design reviews of residential projects in our neighborhood and our organization has participated in multiple land use cases of different kinds that have come before the Zoning Administrator for review. Many of our members have done the same in our professional and private capacities.

In the matter of the "Plan Approval" for the West Pico Drill Site (Case No. ZA-1989-17683-PA2 & ENV-2020-1328-CE), we urge the West Los Angeles Area Planning Commission to overturn both the error-filled June 2, 2021 Zoning Administrator determination and the inappropriate Categorical Exemption from environmental review on which the Zoning Administrator's faulty review was based.

From the perspective of our collective experience in land use cases as well as being neighbors of the West Pico Drill Site, we are shocked that the City allowed 24 major oil well projects to be executed without applications to the Zoning Administrator for legally required discretionary reviews and environmental clearance under CEQA, plus a 25th major project to install one megawatt of microturbine electric generators that are expressly prohibited by ZA conditions of use. This is unfathomable to the many of us who have wrestled with the rigors of Zoning Administrator reviews and CEQA reviews.

In light of these 25 illegal projects and numerous other documented violations of City Code and Conditions of Approval, it is beyond shocking that the Zoning Administrator could declare on page 1 of his determination issued on June 2, 2021 that: ***"I hereby DETERMINE, based on the whole of the administrative record, [t]hat the Conditions of Approval of Determination BZA No. 2000-1697 have been and are being substantially complied with."*** That is an error of law and facts, contradicted many times within the Zoning Administrator's own Letter of Determination.

We are startled to learn that this massive evasion of required reviews was enabled by the lack of City compliance inspections, from the same City that inspects home remodeling, billboards, and countless other less serious activities that require City approvals and permits. More than a few of our members are frightened to hear that a work culture of sloppiness involving violations of the City's Fire Code, State oil well safety laws, and SCAQMD air emissions laws has grown in the shadow of the City's inattention. We cannot understand how the City can approve initial land use entitlements for an activity as inherently risky and historically troubled as oil production, especially in a residential neighborhood, and then turn a completely blind eye to the most basic requirements of compliance and enforcement during the ongoing life of the land use. We cannot understand how the Zoning Administrator in the current case could order no corrective actions and write no new conditions to protect our health and safety, and at the same time declare that "inspections . . . will continue" when the City does not do even the most basic compliance inspections.

We hoped that the current ZA review would be the starting point to turn this situation around. But we are dismayed to learn that the opposite has happened.

The same oil drill site that was allowed to evade ZA reviews and environmental reviews for 25 major projects is now being exempted from environmental review and being given a pass on a shocking array of illegal projects and other violations.

The same oil drill site that was supposed to have Reviews of Conditions in 2010 and 2015 to "evaluate . . . the efficacy of mitigation measures" and change them as warranted has received a review that excluded consideration of the need for enhanced mitigation measures. There has been no CEQA process to consider the efficacy of mitigation, monitoring, and enforcement measures that have self-evidently failed. This violates both Condition 78 of the 2000 ZA approval and Section 4.b of the 2001 Settlement Agreement, as well as CEQA and every ZA approval since the drill site was first given land use entitlement in 1965. The statements of the presiding ZA at the two summer 2020 public hearings declaring that no mitigation measures will be changed short-circuited legally required review processes

The 25 unapproved projects, dozens of illegal and void City permits, and other problems documented by community members and reported to the Zoning Administrator were not addressed, but were buried in contradictory statements in the ZA's determination, alternately recognizing some of the violations but then determining on page 1 that there has been compliance. This allows illegal activity to stand in place without equity or protection for the community, and it sets in motion another violation of CEQA for segmenting a larger known project into smaller pieces that obscure the full environmental impact.

We implore you to send this case back for the proper environmental review under CEQA that it should have had from the outset: an initial study, followed by either a Mitigated Negative Declaration or an Environmental Impact Report. That is the necessary procedural and substantive first step toward holding a full and proper ZA review that addresses all the requirements of Condition 78 of the 2000 ZA approval, Section 4.b of the 2001 Settlement Agreement, and the documented evidence of 25 major unapproved projects and dozens of additional permitting and compliance problems.

Our homeowner's association understands the importance of following proper rules and regulations. We rely on the rigor of the City's Zoning Administrator, Engineering, and Building and Safety reviews to keep us all safe when our local residents undertake projects that could have an impact upon neighbors. We cannot accept that the same agencies would allow an oil drill site in our neighborhood to escape environmental reviews under CEQA and even facilitate it by granting an exemption, nor can we understand how 25 major projects at an oil drill site could be allowed to happen without a review and allowed to persist when reported to the Zoning Administrator.

The correct course of action is to begin this review again and to do it properly.

PCEC West Pico Project - Request For Meeting

Dylan Sittig <dylan.sittig@lacity.org> Tue, Oct 13, 2020 at 11:24 AM
To: Michael Finch <mfinch@energyprojectllc.com>
Cc: Edber Macedo <edber.macedo@lacity.org>, Philip Brown <philip.brown@pceclp.com>

Hi Michael,

I was able to discuss this with our staff. Given that the case has already gone to a hearing, we do not feel it is appropriate to have another meeting right now. The ZA does have the authority to amend the conditions, as necessary, even if there was not a change requested by the applicant. However, if you would like to send additional information, you may still do that while the determination is pending. Certainly once the decision letter comes out and if final, we can discuss next steps.

Sincerely,
Dylan

Hi Michael,

Apologies for the delayed response. Edber is out of the office for the week and I was out for a few days. I will circle this request with our team and get back to you next week.

Sincerely,
Dylan

On Mon, Sep 28, 2020 at 2:58 PM Michael Finch <mfinch@energyprojectllc.com> wrote:

> Dylan and Edber, in order to address concerns raised by NASE and other community members during the ZA hearings PCEC is considering submitting a new application or amending the existing application for the West Pico Project. We would like to schedule a meeting with the City to discuss the path forward. Our attorney will also be joining. In order to have a meaningful discussion we would like to have the City attorney working on our case, the head ZA, and appropriate planning staff. Here are the following agenda items:
>
> - New application vs. amending the existing application.
> - Elimination of existing conditions that are no longer applicable.
> - Addition of new conditions to address community concerns.
> - Conditions related to the entire drill site (location of wells and the site that has the production equipment). We believe this is the “drill site.”
> - Other project changes needed to address community concerns.

Associate Zoning Administrator Theodore Irving, CD5 City Council Member Paul Koretz, City Planner Dylan Sittig, CD5 Chief of Staff Joan Pelico, CD5 Director of Environmental Affairs Andy Shrader, CD5 Senior Land Use Deputy Daniel Skolnick,

209 people have signed a petition on Action Network telling you to DEMAND ENVIRONMENTAL REVIEW, ANNUAL INSPECTIONS, and EMISSIONS MONITORING at the WEST PICO DRILL SITE.

Here is the petition they signed:

> We are writing to you as a group of extremely concerned local residents, regarding the health and safety risk posed by oil and gas drilling and production in our neighborhood.
>
> The West Pico Drill Site (located at 9101 & 9151 W. Pico Blvd, Los Angeles, CA 90035)_ is located in a densely populated urban setting, surrounded by schools, homes, and places of worship.
>
> The City of Los Angeles has never required Annual Compliance Inspections at any oil drill site in the City. Inspections are the most basic element of any compliance and safety requirement. Due to the City's negligence in never requiring inspections, compliance problems have proliferated.
>
> The City also has a track record of improperly exempting oil drill sites from the environmental review that is required by the California Environmental Quality Act (CEQA), and it is doing this yet again in the case of the West Pico Drill Site.
>
> We call upon the Zoning Administrator and our local City Council Member Paul Koretz to require:
> - Full and proper environmental review as required by CEQA.
> - Annual Compliance Inspections.
> - Permanent 24/7 Emissions Monitoring with recorded data that is reported publicly to the City on a quarterly basis.
> - That the City obey its own laws and obey State laws in order to protect public health, safety, and the environment.

You can view each petition signer and the comments they left you below.

Thank you,

Pico Robertson Health and Safety Coalition

Both the Pico and Rancho Park (Hillcrest) sites pose a danger to our community. These facilities are ticking time bombs! One accident can result in a major disaster. They must be strictly regulation or should be SHUT DOWN.
Research the gas explosion on Venice Blvd in 1976 If you have any doubt about how disastrous an accident can be with a gas pipeline from a drilling facility.

148. rabbi simcha GREEN (*ZIP code: 90211)*
Beverly Hills is also concerned

149. Yonah B (*ZIP code: 90035)*

150. Rachel Bookstein (*ZIP code: 90035)*
Thank you all for paying attention to this important community environmental issue!

186. Yoni Segura (*ZIP code: 90035)*

187. Lynn Rohatiner (*ZIP code: 90034)*
I am concerned about the heallth effects of drilling in our neighborhood.
My children and grandchildren live in this neighborhood. Please drill in an area far away from kids and schools.

188. Aimee Zeltzer (*ZIP code: 90211)*
I used to live a few block away. I still attend Pico Shul and frequent Pico Robertson for many activities like shopping, eating out, and visiting friends. It effects us ALL. I am still a neighbor and live a few blocks away and still feel strongly that the CITY should DO SOMETHING ABOUT IT....especially

since the Gas Company has said they would. An elected governing body of officials are suppose to enact laws and regulations to protect its citizens. THANK YOU

September 11, 2020

Dear Neighbors,

Thank you all so much for sharing your concerns about the West Pico Drill Site, located at the corner of Pico and Doheny. NASE (Neighbors for a Safe Environment) has had a long and contentious relationship with this drill site and I appreciate your strong advocacy over two decades on behalf of community, friends and neighbors. I also appreciate, as always, the work and focus of the South Robertson Neighborhoods Council, who is always on top of issues affecting the surrounding neighborhoods and has a long history of mutual cooperation with my staff and I.

I must admit I have been fairly surprised by some of the negative responses my staff and I have received, given that I have been one of the City Council's leaders in regaining a foothold on an out-of-control oil and gas industry which has operated for decades without proper oversight. After my legislation with Councilmember Bonin to ban fracking in Los Angeles got stalled, it became apparent from the departmental responses that we could not move forward without an oil and gas expert, so we introduced legislation in April 2015 to hire one -- the Petroleum Administrator. I worked with then-Council President Wesson through several stages of legislation to develop the position. And I am one of the principle co-authors of the legislation calling for 2,500 foot health and safety buffer zones around oil and gas operations in the City, legislation which we expect will eventually shut down the West Pico Drill Site permanently.

People have complained that we didn't act on the West Pico Drill Site earlier. Before last year, my office had received just one complaint about the site. Unfortunately, we need more than that if we are to be

able to spur our overburdened city bureaucracy into action. We need specific odors or noises reported at specific times to help us make a case for increased scrutiny. Once we did hear more loudly from Rabbi Bookstein and the community and subsequently found out from NASE about the existing settlement agreement that the oil companies operating the West Pico Drill Site had clearly violated, we immediately contacted the Planning Department. This directly resulted in the current Zoning Administrator hearings about the site. I also asked the Fire Department, which is the department currently tasked with regularly inspecting oil and gas operations within the City, to perform inspections and document violations, which they have done, toward building a strong case of ongoing malfeasance against the operator.

We all want the same thing. Oil and gas operations are an inherently incompatible land use with neighborhoods, schools, hospitals, houses of faith and, frankly, anywhere that people live and breathe. Our friends and neighbors must be protected from these operations.

The November 2019 letter from Neighbors for a Safe Environment requested five items:

a) **ZA Review of Conditions** – This is currently occurring. I introduced this motion to institute a clear and transparent transition plan to cover change of operators or a change of Councilmembers going forward and we expect Planning to keep it going every five years. As I will be termed out in 2022, the community may want to consider engaging the next Councilmember before five years are up.

b) **Request for inspection** – The ZA Review of Conditions *is* an inspection and is following established protocol. On June 22, 2020, the following City departments visited the location for an onsite inspection: the Office of the Zoning Administration, Office of Petroleum and Natural Gas Administration and Safety, and Los Angeles Fire Department. I had also previously asked the Fire Department to conduct additional inspections, which they did.

c) **Request for annual inspection** - I am supportive of the ZA adding a new condition to require an annual inspection at this site. I also support the ongoing citywide legislation for annual inspections of all drill sites, which needs to be approved by the entire City Council. The fee study has finally been completed by the consultant and a report is forthcoming.

d) **Fence-Line monitoring** - I support adding a new condition of use requiring fence-line emissions monitoring.

e) **Request to Amend Condition 78 to include 5 year reviews** - I am not opposed, but do not believe this is necessary as it is already a requirement of the legal settlement.

I wanted to give you some of the details of my plans for the site, so that you can realize we are all working toward the same goals:

- I will soon be introducing a motion requesting that the City Attorney's Environment Justice Unit investigate the code violations the Fire Department found on the site. This may result in criminal charges, and at a minimum, will put violations into the legal record.
- I will introduce a motion directing the LAFD to report on the results of their investigation and what they found on site**.**
- I will examine the Zoning Administrator's Letter of Determination to see what additional violations will be found there, as well. And if the findings are inadequate, we will appeal.

My staff and I, after serious consultation with the City Attorney's office, have also met with Jamie Hall, a local California Environmental Quality Act (CEQA) Attorney who has the distinction of having actually won a recent CEQA case before the California Supreme Court, which is enough to convince me of his expertise. This confirmed our belief that the CEQA actions called for in the online petition signed by community members, while certainly well-intentioned, are guided by a misunderstanding of the CEQA process and how it relates to this specific Zoning Administrator's inspection process, a Review of Conditions. Rather than asking the applicant to file for an additional entitlement to authorize unpermitted activity and conducting environment review, we believe the value to the community would be best served by vigorously enforcing the law and stopping that illegal and unpermitted activity.

In this case, the Zoning Administrator is only conducting a Review of Conditions. The ZA has not been asked for, nor would this office support, any expansion or modification of the previous use. Nor may they authorize the continuation of any illegal, unpermitted activity. Simply put, any such activity must be discontinued. A Review of Conditions, in and of itself, has no environmental impact and therefore a CEQA exemption is appropriate. Again, the unpermitted work on the site is not covered by CEQA under the current ZA case as it is not included in the project description and can't be legalized under this instant request. If the applicant chooses in the future to file an additional application to legalize unpermitted improvements to the site, that application would require a robust and detailed CEQA report, which would only be beneficial to the oil company. But this is not the case now. No such permit has been applied for and this office would oppose such a request and would advocate for the highest level of environmental review authorized under the law – a full Environmental Impact Report (EIR).

Lastly, I strongly encourage you to continue to report any nuisances that you feel may be occurring at the drill site or the production site, located at 9101 West Pico Boulevard, such as noise, odor, dust, smoke or vibration to the following:

The Office of Zoning Administration	**South Coast AQMD**	**Los Angeles Department of Building and Safety**	**Los Angeles Fire Department**
RE:ZA-1989-17683-PA2 ATTN: Dylan Sittig, City Planning Associate 200 N. To: Dylan Sittig <dylan.sittig@lacity.org>

Hi, my name is Aria Zarifpour, I am a student at UC Berkeley. I've lived on 1483 south crest drive with my family for about 16 years of my life, which is less than a .3 miles distance from the West Pico Drill Site.

Since the July 9th hearing, I've been doing extra research about the West Pico Drill Site and City regulation of the oil industry.

I learned that in 1995 (25 years ago, and 5 years before I was born) Council Member-elect Mike Feuer wrote to the Zoning Administrator. He called for inspection monitoring to enforce mitigation measures for noise and odors within the West Pico Drill Site. He did so when there was a ZA Review of the site with Mitigated Negative Declaration for environmental review to satisfy the CEQA law.

While Mr. Feuer called for that in 1995. 25 years later there are still no City Compliance Inspections and no Emissions Monitoring requirements today. He was the CD5 Council member from 1995-2001, and he has been the City Attorney since 2013.
Mr Koretz has been the Council Member for CD5 since 2009.
Unfortunately, we still don't have inspections or emissions monitoring, and the City has gone backward on requiring environmental review.
I don't understand how they and the ZA haven't fixed a problem they have known about since at least 1995, and maybe even all the way back to 1989 or 1984. I hope there is more action regarding this issue. Thank you!
(ZA-95-0153 is the case number I'm referring to)

Subject: Tes mony - West Pico Drill Site - July 9, 2020 - Rabbi Yonah Bookstein

My name is Cherie Lewis, and I am an a orney. I am a senior ciz en who often shops near the area of the West Pico Drill Site. Because of the polluted air and foul smell emanang fr om the Drill Site, I limit my me in the ar ea. It is very sad for me that I cannot freely shop in my own neighborhood due to serious health concerns. I am sad for the children in the nearby public and private schools who are exposed to this unhealthy situaon f or many hours on every school day. To start the process of remedying this unacceptable situaon, I s trongly support the plan to correct violaons of the e xisng Se lemen t Agreement, California state law, and Los Angeles city law. I strong support the plan to monitor Drill Site on a 24/7 basis and conduct annual inspecons of the Drill Sit e. I thank the Drill Site company for its willingness to improve its conduct and work with the neighborhood. I have heard that the office of Paul Koretz is opposed to this plan, and I am very disappointed. I call upon Mr. Koretz to review his stance on this ma er and to work with his constuen ts in the neighborhood to improve this unhealthy situaon. My f ocus today is forward-looking. Therefore, I request that the Zoning Administrator accept this plan so that the long overdue process of remedying this unhealthy situaon c an begin as soon as possible. Thank you.

Linda Theung testimony

Re: 9101 West Pico Boulevard (Case # ZA-1989-17683-PA2 / CEQA # ENV-2020-1328-CE)

Testimony delivered on Thursday, August 27, 2020

My name is Linda Theung. I am a Board Member of the South Robertson Neighborhoods Council, and I am speaking on behalf of the NC. The West Pico Drill Site is located within the boundaries of our NC's boundaries. Our Governing Board discussed this Review, the compliance problems at the site, and the need for new ZA-assigned conditions at meetings in January, February, and June of this year. We sent letters to the ZA after each of those three Board meetings, each time supported by unanimous votes of the Board.

Our NC's board, the community, and our constituents are deeply concerned by the record of compliance problems at the West Pico Drill Site, including odor problems, LA Fire Department and South Coast Air Quality Management District citations for spills and leaks, the failure to hold required Five Year Reviews in BOTH 2010 and 2015, and the shocking fact that 25 unapproved projects have been executed since 2000 with no monitoring at all by the City.

We are also deeply troubled by the City's failure to enforce conditions, by the City's failure to perform a comprehensive compliance inspection before bringing this case to hearing, and by the City's refusal to perform an environmental review under CEQA as required by State law and the City's own guidelines for implementing CEQA.

When our Board voted on June 18, 2020 to send its last letter on this case, we heard at our meeting that the operating oil company, PCEC, was going to acknowledge in writing to the ZA that there have been 25 unapproved projects executed at the drill site since 2000, including the drilling of 2 new wells, the redrilling of 12 existing wells, and the conversion of 10 wells

between producer and injector – all of which expressly require discretionary review and approval by the ZA according to the Los Angeles Municipal Code.

PCEC submitted its letter to the ZA acknowledging that these 25 projects need ZA review and environmental review on June 19, after our Board meeting, so our letter dated June 18 did not reference the full set of unapproved projects, and could not speak to PCEC's responsible request for full and proper environmental review. All of these unapproved projects require CEQA review and are ineligible for Categorical Exemptions according to the City's own guidelines for implementing CEQA. Splitting them from this current review, as the City seems to be doing, would be illegal piecemealing of a larger project so as to obscure the fullness of its environmental impact.

In addition, the obvious failure of existing mitigation measures and need for new mitigation measures also necessitates a CEQA review in this case. According to the 2001 Settlement Agreement and Condition 78 of the 2000 approval, this review is supposed to be a Review of Conditions, and it is supposed to evaluate the "efficacy of mitigation measures" and change them if warranted. Any analysis of mitigation measures must be done through the CEQA process, according to the State's CEQA law. The evidence of the need for revised conditions is beyond dispute. PCEC agrees that new and improved conditions are needed. Yet the City persists in refusing to do the environmental review required by CEQA.

The South Robertson Neighborhoods Council reiterates its follow positions on this matter:

- This review needs to follow the requirements of the 2001 Settlement Agreement.
- That a Comprehensive Compliance Inspection by the City's Petroleum Administrator needs to be conducted, with a publicly accessible report, before this review goes to hearing.
- That proper environmental review under CEQA is required and a Categorical Exemption is absolutely wrong.

- That new conditions are clearly needed to require
    - Annual Compliance Inspections for compliance with ZA conditions and City code
    - Permanent 24/7 Emission Monitoring with recorded data that is reported publicly to the City on a quarterly basis
    - And to write into the ZA assigned conditions the requirement of Five Year Reviews of Conditions from the 2001 Settlement Agreement, which was affirmed in 2001 by then Council member Mike Feuer and the rest of City Council.

These are reasonable and viable requests. The site operator appears to agree they are necessary, too. The City should commit to these reviews.

More than just reasonable requests, they are what is required by law. CEQA is State law. The City's guidelines on implementing CEQA in oil cases are the ZA's own guidelines. Mike Feuer and City Council voted to approve the Settlement Agreement in 2001. City Council in 2017 voted to look into emissions monitoring. City Council in 2018 voted to request the City Attorney to draft an ordinance to require annual compliance inspections.

Nevertheless, the City is not complying with CEQA, its own guidelines, its own Municipal code, or the Settlement Agreement it signed in 2001. All of this puts our community at risk, and it is wrong.

ZA-1989-17683-PA2 (comment from the previous hearing)

Daniel Skolnick <daniel.skolnick@lacity.org> Thu, Aug 27, 2020 at 9:34 AM
To: Dylan Sittig <dylan.sittig@lacity.org>

This is an oil-drilling site with an egregious record that Councilman Koretz wants to shut down as quickly as possible.

This is a site with a history expired permits, unpermitted activity, and numerous violations, including fire/life safety violations that endanger our community.

One of the ways that bad actors prolong their bad behavior is by making additional discretionary request and studies- including superfluous environmental review because bad actors know that it will take years to process and complete.

As long as the City has an application in review, Departments and the City Attorney have limited leverage to force compliance. Why? Because if the City takes an applicant to court the judge will ask for the City to complete the process and then attempt to gain local compliance, and only after all those additional steps are exhausted will the item will be heard in court.

However, now the project is going through a DCP plan approval for compliance review with no proposed changes. The proposed environmental review is a CE. Community advocates are unwittingly requesting an initial study, and the applicant (the operator) is happily agreeing.

The completion of this process with the commensurate inspections will be enough to begin shutdown and revocation. Further environmental review and study will delay the process to the benefit of the operator and the detriment of the community.
We have a process, and Councilman Paul Koretz requests that the process is completed, correctly, accurately, and without delay.

RE: Public Hearing on Pico Drill Site Set For Thursday, August 27th

Dylan Sittig,

For more than 40 years, Liberty Hill Foundation has been Los Angeles' epicenter for social justice, incubating cutting-edge social movements, transforming neighborhoods, and empowering the leaders of tomorrow. Liberty Hill is committed to racial equity, LBGTQ rights, economic opportunity, and environmental justice.

As a non-profit organization operating in Council District 5, Liberty Hill Foundation is aware and concerned about the detrimental environmental and public health implications on residents and other community stakeholders (e.g. business owners, workers, hospital patients, school children, etc.) connected to the exposers of the West Pico Drill Site. It has been well documented health costs associated with living near oil and gas wells include cancer, respiratory illnesses, preterm birth risks and high risk pregnancies. The toxins of active oil drilling are particular harmful to children and pregnant women [1]. In 2015, Liberty Hill published *Drilling Down:The Community Consequences of Expanded Oil Development in L.A.* , a report which details the negative health impacts experienced by front line communities facing oil drilling from South LA to the Harbor area.

Additionally, compounded by the public health risky of COVID-19, multiple studies have found that exposure to higher amounts of air pollution also increases a population's vulnerability to the coronavirus. A major study of air pollution and COVID-19 mortality in the United States found that exposure to even a small increase in fine particulate matter ($PM_{2.5}$) was linked to an 8% greater chance of dying from COVID-19.[2] We can no longer sacrifice our health and the health of our children, neighbors, and friends to the oil and gas industry.

Liberty Hill Foundation recommends the immediate closer of West Pico Drill the as part of a 2,500 ft public health and safety buffer we support to be enacted by the City and County of Los Angeles. The Culver City Council has recently passed to close the oil drilling in the Inglewood Oil fields in their district. We advocate for Department of City Planning Office of Zoning Administration and Councilman Koretz stand on the right side of history and move away from the production of oil and towards sustainable energy practices in CD5 and the entire City of Los Angeles.

Sincerely,

Bayoán Rosselló-Cornier
Senior Program Manager, Environmental Health & Justice
Liberty Hill Foundation

Associate Zoning Administrator
Theodore Irving
c/o Dylan Sittig, City Planning Associate
200 N. Spring St, Room 720
Los Angeles, CA 90012

Re: ZA-1989-17683-PA2; Need for Comprehensive Review of Conditions at the West Pico Drill Site (9101 & 9151 W Pico Blvd, Los Angeles, CA 90035) to Address Numerous Legal Violations and Community Impacts

Dear Mr. Irving,

On behalf of Neighbors for A Safe Environment (NASE), a California nonprofit corporation, we seek to address ongoing and emerging legal violations at the West Pico Drill Site (9101 & 9151 West Pico Blvd, Council District 5) that have led to a failure to provide necessary protections to the community surrounding this drill site. NASE has extensively communicated with the Zoning Administrator (ZA) and documented the bases of its concerns. NASE has also cooperated with the operator of the West Pico Drill Site, the Pacific Coast Energy Company (PCEC), and together with PCEC presented a set of practical solutions to the ZA. We urge the City to implement the reasonable and viable remedies we have previously presented and which are outlined below.

Unfortunately, thus far, the City has failed to act on the remedies NASE has proposed, including NASE's request for a Review of Conditions as per the procedures required by the 2001 Settlement Agreement between NASE, the City and the West Pico Drill Site operator and Condition 78 of the 2000 approval in ZA-1989-17683-PAD. Additionally, despite clear requirements in the City's Municipal Code and ZA Memo 133 for discretionary approval supported by environmental review for any oil well drilling, redrilling or conversion project, the City persists in relying on inapplicable categorical exemptions from the California Environmental Quality Act (CEQA) for approvals. Thus far, the City has also refused to impose

necessary modification of conditions to correct a great many ongoing violations of CEQA and City law by the City, as well as by the current and prior site operators.

NASE has retained our firm to make another effort to convince the City to bring its own practices of land use regulation and petroleum administration into compliance with the 2001 Settlement Agreement, CEQA, and City law. This letter outlines the remedies that would achieve those simple goals and provide necessary protection for the surrounding community. It also gives the City notice that if persistent violations are not rectified, NASE is prepared to seek legal remedies to require compliance with the Settlement Agreement and enforce CEQA and City law. We hope that the City will prefer to open discussion about a reasonable set of remedies.

A. NASE Urges the City to Adopt Remedies to Address Legal Violations and Impacts to the Community.

From its initial communication with the Chief ZA in November 2019 up until now, NASE has asked for only modest and eminently viable remedies to alleviate impacts to the community and ensure compliance with the law. NASE has requested that ZA-1989-17683-PA2 be a Review of Conditions, as mandated by the 2001 Settlement Agreement and Condition 78 of the 2000 approval in ZA-1989-17683-PAD. Pursuant to the 2001 Settlement Agreement and Condition 78, the review must:

- examine the West Pico Drill Site's compliance with conditions of approval;
- assess "neighborhood impacts;" and
- evaluate the "efficacy of mitigation measures," with modification of the mitigation measures and/or corrective measures "if warranted."

As set forth herein, this Review of Conditions must be comprehensive, legally compliant and must impose new conditions to address ongoing violations and impacts and correct significant errors in the 2000 approval for the West Pico Drill Site.

1. The Review of Conditions Must Include a Comprehensive Compliance Inspection.

The Review of Conditions for the West Pico Drill Site needs to be prefaced by a Comprehensive Compliance Inspection led by the Office of the Petroleum Administrator. This Review of Conditions should follow the example of the one and only Comprehensive Compliance Inspection of an oil drill site ever conducted by the City—the Rancho Park Drill Site inspection conducted in March/April 2017. Only a full inspection by a qualified professional can fully define the scope of the project in the current review. Thus, the inspection is necessary to

inform compliance with conditions of approval, CEQA clearance and, by the same measure, inform the ZA and the public regarding corrective measures that should be required.

2. The City Must Comply with ZA Memo 133 in its Review of Conditions By Requiring CEQA Review for the Projects on the Drill Site.

The Review of Conditions for the West Pico Drill Site must be compliant with CEQA and with the City's own guidelines in ZA Memo 133. It has been established beyond the shadow of a doubt that mitigation measures from the 2000 approval and its associated EIR have failed to protect the community. Odor complaints from the community are well document and are matched by testimony from Council Member Paul Koretz. The Los Angeles Fire Department also imposed citations on the operators of the West Pico Drill Site for leaving petroleum exposed on surfaces in 2017 and 2018.

Multiple conditions from the 2000 approval have been violated, and the City has failed to enforce mitigation measures established through the associated EIR. Conditions 46, 47, 53, 57, 61, 72, and 78 (concerning odors, nuisance, good oil field practices, redrilling, and reviews of conditions) have all been violated. "Mitigating conditions are not mere expressions of hope." (*Lincoln Place Tenants Ass'n v. City of Los Angeles* (2005) 130 Cal.App.4th 1491, 1508.) CEQA requires mitigation measures to be concrete and enforceable. (Pub. Resources Code § 21081.6(b).) From at least 2006 to the present the ZA and the City have failed to monitor or enforce these conditions in violation of CEQA.

In addition to those ongoing CEQA violations by the City, PCEC has stepped forward to do honest research on projects executed at the site since 2000. PCEC agrees with NASE that there have been 25 unapproved projects, including 24 projects on oil wells that require discretionary review by the ZA according to City code, and thus CEQA clearance by State law. ZA Memo 133 directly states that proposals to drill, redrill, or convert wells are ineligible for categorical exemptions under CEQA. The 25 unapproved projects and the obvious need to revise mitigation measures makes reliance on categorical exemptions utterly improper. An Initial Study and an MND are required, at minimum, and that is what NASE requests.

3. The Continuing Impacts to the Community Demonstrate a Need to Impose New Conditions Through the Review of Conditions.

The ongoing impacts to the community surrounding the West Pico Drill Site, and the numerous violations of existing conditions of approval, demonstrate a clear need to impose new conditions through the Review of Conditions process to prevent these problems from continuing.

Based on NASE's familiarity with the impacts to the community and the existing conditions, it is our position (supported by PCEC) that the following new conditions must be adopted:

- Annual Compliance Inspections led or overseen by qualified professional staff in the Office of the Petroleum Administrator.

- Permanent 24/7 Emissions Monitoring, with recorded data that is reported to the Petroleum Administrator, the ZA, and the public on a quarterly basis.

- Incorporation of the requirement of cyclical Five Year Reviews of Conditions from the 2001 Settlement Agreement into the ZA conditions for the site, using the full procedures delineated in Condition 78 of the 2000 approval as per the Settlement Agreement.

- Immediate Emergency and Accident Reporting to the City (to LAFD, the Petroleum Administrator, and the local Council office) for any emergency or accident that must be reported to any Federal, State, or regional agency.

The need for additional conditions may be identified through the comprehensive compliance inspection as well.

4. The Review of Conditions Must Correct Several Errors from the 2000 Approval.

The Review of Conditions for the West Pico Drill Site must also correct significant errors from the 2000 approval that are inconsistent with City law, the actual record of approvals for the site, and the facts of what actually exists at the site. Those errors include:

- **Delete Condition 72 to Eliminate its Contradiction with LAMC 13.01.H and 13.01I.** This condition addressing "redrilling" directly contradicts the provisions of Los Angeles Municipal Code sections 13.01.H and 13.01.I. Both of these sections require discretionary approval by the ZA before any oil well is drilled, redrilled, or converted between producer and injection well. The contradiction may have contributed to the rash of unapproved projects at the site since 2000, including the redrilling of 12 wells since 2000 without ZA review, approval, or CEQA clearance. Condition 72's undermining of LAMC 13.01.H and 13.01.I on drilling and redrilling wells may have also contributed to the conversion of 10 wells since 2000 without ZA review, approval, or CEQA clearance per the requirements of ZA Memo 133.

- **Correct the Number of Existing Wells.** The 2000 ZA approval for the West Pico Drill Site incorrectly asserts that 69 wells existed at the site in 2000 and that 69 wells had been approved. Only 59 wells currently exist at the site, and only 57 existed in 2000. Only 57 wells have been approved for the site by the ZA. The ZA's error in 2000 reflected a lack of knowledge about the drill site, a lack of knowledge about the difference between a well cellar and a well, and a failure to cross-check with State records from DOGGR (now CalGEM) even as the ZA wrote conditions requiring that all monitoring agencies need to be consulted. This error may have contributed to the drilling of unapproved wells without CEQA clearance in 2005 and 2010.

- **West Pico Drill Site Includes Both 9101 and 9151 West Pico Blvd as a Single Controlled Drill Site.** The 2000 approval improperly split the single integrated "Controlled Drill Site" into two sites because the operator in 2000 proposed a construction project that would occur on only one half of the site. This error runs afoul of LAMC 13.01, especially 13.01.E.2.b. A Controlled Drill Site is the only kind of conditionally approved land use on which oil can be produced from wells and processed for sale. Only one Controlled Drill Site can exist in Oil Drilling District U-131, and only one has ever been approved: namely the West Pico Drill Site, approved in ZA-1965-17683. The ZA severed the unified Controlled Drill Site into two in 2000, leaving both without a legally sustainable basis for operation. This error also may have contributed to the improper installation of microturbines by obscuring the prohibition against electric generation on the Controlled Drill Site or anywhere in the Oil Drilling District that was written into the 1965 approval to establish the Controlled Drill Site. The 2000 approval, which completely rewrote and supplanted the 1965 approval, also prohibits electric generation at the West Pico Drill Site. By improperly splitting the Controlled Drill Site in two, the 2000 approval left the other half of the Controlled Drill Site without any approval or conditions in place.

B. These Remedies Are Necessitated by the Ongoing and Potential Legal Violations.

NASE has chosen to focus on remedies in this communication in a continuing effort to achieve relief for the community and legal compliance by the City. However, the description of the remedies, above, should provide you with an indication of some of the legal violations we may seek to challenge in court, if necessary. These include:

- Ongoing violations of CEQA for the City's failure to enforce mitigation measures from the EIR associated with the 2000 approval for the West Pico Drill Site.

- Failure to require CEQA review for discretionary, and recently discovered, well drilling, redrilling and conversion projects at the West Pico Drill Site.

- The proposed improper reliance on categorical exemptions for the current review of the West Pico Drill Site.

- Failure to enforce LAMC 13.01.H and 13.01.I by allowing operation of 25 unapproved oil well projects on the West Pico Drill Site.

- Violated LAMC 13.01.E.2.b by dividing the Controlled Drill Site into two sites in 2000.

- Breach of the 2000 Settlement Agreement due to the City's failure to conduct the required five-year reviews for the West Pico Drill Site for at least the last 10 years. No legally required reviews have been held during Councilmember Koretz's term in the City Council until NASE demanded this review in November 2019.

- The current ZA review process also appears to be running afoul of the requirements of the 2000 Settlement Agreement, CEQA and City regulations due to its improperly narrow focus and the ZA's stated position that the process would not result in the modification of any conditions.

Conclusion

The problems at the West Pico Drill Site are not isolated incidents and they are not unknown to City officials. The City has been negligent in its land use-based regulation of oil drill sites, failing to protect the communities impacted by these drill sites. It has never performed regular inspections to monitor for compliance with ZA-assigned conditions, and so mitigation measures routinely are not followed and not enforced. Similarly, the City continues to engage in a pattern and practice of handing out categorical exemptions from CEQA review for oil projects, contrary to the requirements of CEQA, ZA Memo 133 and LAMC 13.01.H and 13.01.I. Taken together, this pattern of negligence gives a green light to unapproved projects and turns a blind eye to poor work practices, all at the expense of communities the City is supposed to protect.

Most confounding here is the City's refusal to address environmental, health, and safety protections when an operating oil company comes forward to join with the community in asking the City to implement CEQA properly and to do inspections, require emissions monitoring, and perform serious reviews. This situation must be remedied. It is NASE's hope that the current ZA process can be revised to begin to address these ongoing issues, but if not, we are prepared to pursue available legal options.

Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer

Zoning hearing on oil drilling at Pico and Robertson

3 messages

Amy Schweiger <aschweiger@libertyhill.org> Mon, Aug 24, 2020 at 1:55 PM
To: "dylan.sittig@lacity.org" <dylan.sittig@lacity.org>

Dear Dylan,

I am writing in regard to the zoning hearing on the drill site at the corner of Pico and Roberson. As a longtime resident of Beverlywood - and Councilmember Koretz's district -- I was shocked to find out that we had a dangerous, non-compliant oil drill site in our neighborhood, less than a mile from my home.

I am a supporter of STAND-LA and their demand for a 2,500 foot setback between oil drill sites and sensitive sites such as schools, homes and houses of worship. This drill site is mere feet from a busy synagogue and a day school as well as homes and businesses. Every day, children and families are exposed to an array of toxic chemical emanating from this site. PM2.5 exposure is linked to a higher chance of dying from COVID, as well as increased rates of asthma and other respiratory diseases.

I urge the City Council to close this dangerous drill site - and to move towards passing the 2,500 foot setback ordinance.

Thank you,

Amy Schweiger

To: Dylan Sittig <dylan.sittig@lacity.org>

Thank you. And a correction - the well is in the Pico Robertson neighborhood but at the corner of Pico and Doheny.

Dear Associate Zoning Administrator Irving,

I am writing to regarding West Pico Drill Site (ZA-1989-17683-PA2).

My wife and I and our four children reside in the neighborhood directly impacted by the West Pico Drill Site. We have lived here since 2004. I'm extremely concerned about air pollution, safety issues, compliance issues and odors from the drill site.

I urge you to require an immediate and thorough compliance inspection and 24/7 emissions monitoring of the site to protect public health and safety.

I am also VERY concerned about the lack of environmental review under CEQA. We now know that there are 25 unapproved projects at the site, in addition to numerous previous safety violations.

My office and prayer meeting space have been located directly across the street from the Drill Site since 2016. During that time we have had multiple occasions when the overbearing smell of oil drove us to close windows and even leave the building.

In the fall of 2019, I was able to look inside the drill site as their doors were left open. (A child could have wandered in as well!) The stench of oil was overpowering, and it looked like the scene of an industrial facility that we might find on the far outskirts of a city. However, this THE DRILL SITE SITS IN THE MIDDLE OF A DENSE RESIDENTIAL NEIGHBORHOOD.

Rabbi Yonah Bookstein
1480 Rexford Dr., Los Angles, CA 90035

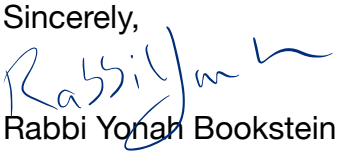
There are many potential issues with oil and gas drilling that are well known to scientists and physicians. People near these sites can be exposed to: benzene, volatile organic compounds, and petroleum which are all area dangerous to your health. The longer and more sustained the exposure the worse it is. Children and the elderly are likely more vulnerable. Some of the potential harm linked increased exposure to these chemicals can include: increased risk of premature births, headaches, nosebleeds, and in extreme cases cancers, miscarriage, and birth defects.

Based on the potential hazards, our first-hand experience with odors and exposure to polluted air, the documented unapproved projects, the safety violations and the proximity of the site to schools, synagogues, and citizens - please require an immediate compliance inspection and 24/7 emissions monitoring of the site **before any decision is reached on the future of the site.**

The residents, tax-payers, businesses, and the ZA deserve to know what is going on there before reaching any decision on the future of the site.

As a Rabbi I will add a point about ethics and morality. It is morally wrong that billboards in Los Angeles have more oversight that nearly 60 oil wells in our densely populated neighborhood, next to multiple schools, houses of worship, and of course our homes.

Sincerely,



Rabbi Yonah Bookstein

Strong Smell of Gas Morning of July 22nd, 2020

Christina Pisani <chriscpisani@gmail.com> Wed, Jul 22, 2020 at 6:55 AM
To: Dylan Sittig <dylan.sittig@lacity.org>

Good morning Mr. Sittig,

I just returned from walking my dog and there is a very strong smell of gas in the area directly surrounding the oil site on Pico and Doheny. This is highly concerning and as a community we have not been provided an unbiased 3rd party inspector who can come assess the issue.

Please let me know who I can reach out to next time this occurs and please let me know what your team is doing to resolve this issue.

"Public" Hearing

Christina Pisani <chriscpisani@gmail.com> Fri, Jul 10, 2020 at 8:17 AM
To: dylan.sittig@lacity.org

Dear Mr. Sittig,

My name is Christina Pisani and I spoke yesterday at the "public" hearing. I would like to express my deep level of concern of how the hearing was handled. The information provided to the public was incorrect and when members of the community (multiple) reached out for answers they were told the line worked for "many people", which was clearly not true. This was by no means a public hearing and we demand a second hearing and to be provided enough time to organize and inform the community. I personally, upon hearing about this hearing created flyers (as you can see attached here) and distributed hundreds around my community to get people involved. I had people reach out to me directly via email and on NextDoor saying they were unable to access the meeting. This is simply unacceptable. The lack of transparency in which your department and the oil company hide behind shows how corrupt and flawed this office is. You have placed profits over people. Over the people and communities you were hired to serve. We here in the community are constantly at risk living dangerously close to an active oil site, with questionable and illegal activities occurring behind windowless walls, in a building purposefully designed to look like a synagogue in a Jewish neighborhood to avoid suspicions.

I would like to request the following actions be taken:

1) Pacific Coast Energy Company LP **MUST** implement 24/7 emissions monitoring systems immediately. This should've been implemented a long time ago as this technology has been accessible for decades. Homes, places of worship and families are located within feet of this site and it astonishes me that this has not been enforced. It feels ridiculous that we have to even ask.

2) Annual inspections by a 3rd party organization. Annual inspections. Annual inspections. Annual inspections. Again, why are we even having to ask?

3) Transparency to the community and community outreach to educate nearby residents on:

- Who to call to place concerns around odors or safety (NOT the oil company itself)
- What to do in the case of an emergency/ what does "Shelter in Place" mean
- And transparency on the company's activities- permit statuses, illegal activities, and a public website that is updated quarterly on leaks or other incidences.

I would also like to be notified directly as to when the next meeting will be. I never received anything in the mail about this past meeting and only came to hear about it after my neighbor received a letter in the mail and told me. Obviously, your department is failing to get these letters out to ALL members of the community. Which is why I took it upon myself to inform my neighbors and will be doing so again.

Our government is failing us.
Concerned citizen,
Chrisna Pisani

Oil Drilling.pdf

END OIL DRILLING IN OUR NEIGHBORHOOD!

FACTS:

- **9101 West Pico Blvd (corner of Pico Blvd & Doheny) is the site of 40 active oil drills and the city is in the process of reviewing if changes should be made to current regulations.**
- The site is 100 ft from homes, schools, synagogues and businesses.
- Studies suggest that oil drills should not be within 2,500 ft of residences to protect people's health and safety (EHP.org & Stand.LA).
- Drilling sites are known to have detrimental health and environmental impacts on the communities they occupy, including cancer, asthma, frequent headaches, nose bleeds and environmental pollution.

WHAT YOU CAN DO:

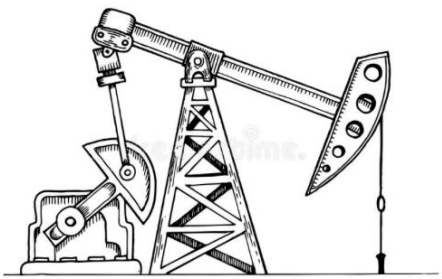
Attend the upcoming virtual public hearing to have your voice heard!

Email City Planning Associate Dylan Sittig at Dylan.sittig@lacity.org for information regarding the site and to also demand change!

WHEN:

Thursday, July 9th
9:00AM

Dial in by phone:
(699) 900-9128
Meeting ID#:
944 0679 8653#



For more information from your local concerned neighbor please contact Christina at chriscpisani@gmail.com

Subject: Tes mony - West Pico Drill Site - July 9, 2020 - Submission by Cherie Lewis

My name is Cherie Lewis, and I have resided for over a decade in the neighborhood of the West Pico Drill Site. I am a senior ciz en, and like many senior ciz ens, I have medical issues. I like shopping in the stores on Pico Blvd., but I generally limit my shopping me in the s tores near the corner of Pico & Doheny because of the foul smelling air. It is my understanding that the source of the foul smelling air is the West Pico Drill Site. I am able to smell the foul air when I visit this area, but unfortunately, I am unable to discern the contaminants in the air. This situaon is a sour ce of connuing s tress for me and my friends, both seniors & non-seniors. We are sad that we are unable to freely shop in the area near Pico & Doheny because of air polluon c aused by the West Pico Drill Site. We are sad that health concerns limit our ability to freely shop in our own neighborhood. Our self-exposed limitaon is c aused by our unwillingness to expose ourselves to polluted air in the area. To start the process of remedying this unacceptable situaon, I s trongly support a plan to conduct annual inspecons of this drill sit e, starng in July 2020. I also support a plan t o connuously monit or this drill site on a 24/7 basis. It is my understanding that many persons have requested this plan over a period of years, and that this plan has not yet been accepted by the City of Los Angeles. It is also my understanding that the company that operates the drill site has recently agreed to this plan. My focus today is forward-looking. Therefore, I request that the Zoning Administrator accept this plan today so that the process of annual inspecons and c onnuous monit oring can begin as soon as possible. Thank you.

Requested writing of my public testimony

Aria Z <ariazarifpourlaw@gmail.com> Thu, Jul 9, 2020 at 9:42 AM
To: Dylan Sittig <dylan.sittig@lacity.org>

I would like to note that the phone number on the flyers given to the public did not contain the correct number, potentially reducing the number of participants at the hearing today. I would like to see a paper with correct information and an additional hearing for the public so those in the who missed today's hearing can give their public testimony.

Hello, my name is Aria and I would like to see the same level of care and sensitivity provided to preventing the combustion of the operator's drilling investments, extended to this community.

This facility's lack of compliance to initiate a review every five years, mandated 14 years ago to ensure the safety of this community, demonstrates their indifference to ensuring such safety.
We have been left in the dark for 14 years.

With this lack of accountability in mind, I propose 3 initiatives:
1. The installation of on site 24/7 sensitive air quality monitors, which would include levels of benzene emissions, to ensure air quality problems are caught on the spot and do not linger, such as the 50 PPM leak violation in February of this year.
2. An independent, third party, oversight commission, with no ties to or influence from the Pacific Coast Energy Company. The purpose of this commission would be to ensure oversight and compliance of this facility, as it is obvious there they have no incentive to so and the city is too overwhelmed to keep such a close eye on operations.

3. Long term studies conducted to find any correlation with higher health risks associated with living within a 1500 foot radius of the site, corroborated with on-site testing and ambient measurements.

4. Tri-annual on-site testing of the various emissions and compliance

I hope that the safety and health of this community is more important than keeping the status quo of noncompliance.

Michael Salman <salman@history.ucla.edu> Thu, Jul 9, 2020 at 9:18 AM
To: Edber Macedo <edber.macedo@lacity.org>, Dylan Sittig <dylan.sittig@lacity.org>

and he just said 5 minutes for representative of groups.

yesterday i was told everyone gets the same 1 to 3 minutes, or 2 to 3 minutes.

this is a procedural irregularity inimical to the mandate for collecting testimony and transparency.

ZA is also asking people to somehow indicate whether they are for or against the project> What is the project? The city refused to do an inspection and evaded CEQA, so the project has not been defined in any adequate way.

and now he says a Class 1 CE, which is not on the notice and there is no other documentation.

Office of Zoning Administration
Edber Macedo, City Planning Associate
(edber.macedo@lacity.org)
200 N. Spring St., Room 763
Los Angeles, CA 90012

PCEC continues to work with stakeholders and the City regarding efforts to address issues of community concern and to implement measures that will improve the overall safety and compliance of the West Pico facility. In follow up to our discussion, and in preparation for the upcoming July 9, 2020 public hearing concerning case ZA-1989-17683-PA2, PCEC reiterates its commitment to working with the City on the development of appropriate conditions of approval to address the following issues:

1. The three items outlined in our June 19, 2020 email – see attached. It is our understanding that the development of any conditions needed to address these items is beyond the scope of the pending Plan Approval (PA) process, and that a separate review process will occur within a reasonable time following the Zoning Administrator's decision on the PA to address these items. PCEC is willing to accept a condition to this effect.

2. Annual inspections of site operations by the Petroleum Administrator and/or a qualified third party approved by the Petroleum Administrator, in concert with such other City agencies as the Petroleum Administrator and/or City Code deems necessary, in order to evaluate compliance with City Code, conditions assigned in ZA approvals, and City permits.

3. Evaluation of the feasibility of installing a fenceline emissions monitoring system using commercially available equipment that provides continuous monitoring and data recording of quantities of specified pollutants in a manner to be approved by the Petroleum Administrator. The evaluation will consider both the economical and technological feasibility of installing an effective fenceline emissions monitoring system.

PCEC recognizes the importance of working with the City to develop and refine the details of the foregoing proposed conditions so that all parties, including stakeholders, understand the requirements applicable to PCEC's West Pico operations. However, all proposed conditions, as ultimately articulated by the City, must be reasonable and economically and technologically feasible. In addition, the conditions may be replaced by any regulations adopted by the City that are substantially similar or relate to the proposed conditions. Finally, the conditions cannot be inconsistent with applicable federal, state of agency laws or rules.

PCEC is committed to working in good faith with the City, and the community, to develop an appropriate set of conditions adequate to address issues of community concern and to implement measures that will improve the overall safety and compliance of the West Pico facility. Thank you for your time and continued attention to this matter.

Subject:	PCEC West Pico Project

Edber, per our conversation here is our thoughts on the items we discussed.

PCEC was recently contacted by a member of the public and several issues and outstanding questions have been brought to our attention, including (1) whether the wells that have been drilled, re-drilled, and/or converted since the 2000 ZA approval required further ZA approval under LAMC 13.01H and 13.01I; (2) whether activities such as drilling, re-drilling, and/or converting wells underwent adequate CEQA review as part of the EIR process for the 2000 ZA approval; and (3) whether Condition #1 of the 1965 ZA 17683 and Condition #B-49 of the 2000 ZAD 17683 need to be modified to reflect that onsite generation of power is occurring on the production site.

With regard to the first issue, after reviewing our well files, and the 2000 ZA determination, it is clear that certain wells have been drilled, re-drilled and converted since that approval – see "Well List" below. In light of LAMC 13.01H and 13.01I, a question has surfaced regarding whether these well activities required further authorization or approval by the ZA. We have not seen any approvals by the ZA and our conclusion is that applications were likely never submitted to the City. We believe this was because of Condition 72 of the 2000 ZAD 17683 determination which states in part *"Without prior written approval from the Zoning Administrator, no more than the existing 69 wells may be drilled, operated or maintained at the site and these wells shall be located at their current surface locations."* This condition suggests that the 2000 ZA approval covered a total of 69 wells and, provided the facility did not exceed the 69 wells, no further ZA approvals for drilling and redrilling were required. However, it appears the facility may not have had 69 existing wells at the time of the determination. This may have been a misunderstanding during the determination between well "slots" vs actual wells. In any event, a question now exists regarding whether the wells that have been drilled, re-drilled, and/or converted since the 2000 ZA approval required further ZA review and approval pursuant to LAMC 13.01H and 13.01I.

A follow along question concerns the scope of environmental review done for the 2000 approval and whether the review covered specific well activities. It's been suggested that as part of the 2000 approval (drill site modernization project) the activity of drilling, redrilling, and converting wells may not have been covered as part of the EIR process. Rather, the 2000 approval covered only construction of the perimeter walls and a permanent derrick, not drilling or well conversions, because apparently these activities were not part of the project description. If this is accurate, a question now exists regarding the adequacy of the currently proposed Categorical Exemption, and whether additional environmental review should be conducted to cover not only past well activities, but also those that are likely to occur in the future.

The last item is the installation of the microturbine. PCEC identified the installation of the microturbine in its February 2020 application to the City. This installation occurred in 2018 and PCEC obtained a SCAQMD permit, LA building permit, and a LA DWP permit. The 1965 ZA 17683 case Condition #1 included a provision, among others, requiring the project to comply with LAMC 13.01F(b)43.

13.01F(b)43 provides:

That drilling, pumping and other power operations shall at all times be carried on only by electrical power and that such power shall not be generated on the controlled drilling site or in the district.

In addition, 2000 ZAD 17683*Condition B-49* provides:
All Electric Power. All drilling and reworking operations at the site shall at all times be carried on only by electric power and such power shall not be generated on the controlled drilling site or in the district.

The 2000 ZAD 17683 Condition B-49 seems to suggest that power generation cannot happen at the controlled drill site or in the district for drilling and reworking operations, therefore the implication would be that this condition would not be applicable to the production operations.

The facility has two separate power meters. One is dedicated to the drill site and the other the production site. The microturbine is dedicated to the production site only. A question now exists whether Condition #1 of the 1965 ZA 17683 and Condition #B-49 of the 2000 ZAD 17683 need to be modified to reflect that onsite generation of power is occurring on the production site.

PCEC is working with historical documents and realize the City may have more insight. We are asking if the wells drilled, re-drilled, and converted since 2000 required a permit under 13.01H and 1301I? Also, did activities such as drilling, re-drilling, and/or converting wells undergo adequate CEQA review as part of the EIR process for the 2000 ZA approval, or is further review now required? Finally, does Condition #1 of the 1965 ZA 17683 and condition #B-49 of the 2000 ZAD 17683 need to be modified to reflect that onsite generation of power is occurring on the production site. If the answers to any of these questions is yes, then we would like to meet to discuss and decide how to address and reconcile these issues as part of the current process. We look forward to any guidance you can give us.

Thank you

Re: West Pico Drill Site; ZA-1989-17683-PA2; ENV-2020-1328-CE

Submitted via email to Dylan Sittig, City Planner

Dear Associate ZA Irving,

This is a final pre-hearing submission that I am presenting in my capacity as representative for Richard Weiner and Dr. Rae Drazin, officers of NASE and parties to the 2001 Settlement Agreement, as well as on my own behalf as a citizen.

There are two big categories of compliance problems in this case:

A) Non-Compliance by the operator.

B) Non-Compliance, including and encompassing violations of procedure and failures to perform administrative duties, including but not limited to duties under CEQA, by the City.

Much of this non-compliance has already been extensively documented in written communications and documents sent to the office of the Chief ZA, to the Director and/or Deputy Director of Planning, and/or to the City Planner assigned to this case. Not all of that correspondence is in the case file. It should all be there, and I include it herein by reference.

There are some additional significant instances of non-compliance that need to be noted anew here in this last submission before the public hearing, as well as several major episodes that merit underscoring again.

It will be most expeditious to organize what follows into three parts:

Part 1: Requested Outcome of this Case with a Corrected Process and New Conditions to Produce Compliance Now, Help Ensure Compliance in the Future, and Protect Public Health, Safety, and the Environment.

Part 2: A Summary of Major Episodes of Non-Compliance by the Operator, Which Cannot be Exhaustive Because No Comprehensive Compliance Inspection has Been Conducted by the City.

Part 3: A Statement Objecting to Non-Compliance by the City, Including and Encompassing but Not Limited to Violations of Procedure and Failures to Perform Administrative Duties, both in the Proceedings and Case File of this Review and During the Past 20 Years.

Parts 1 and 2 are the simplest and most straight forward. This is largely due to the admirable cooperation and honesty of the applicant, PCEC.

First, PCEC has acknowledged in writing to the Planning Department (see emails from PCEC dated June 19 and July 8, 2020) that 25 unreviewed projects were executed at the West Pico Drill Site since 2000, including 24 well operations covered by LAMC 13.01.H and 13.01.I, and by ZA Memo 133's guidelines for implementing CEQA in oil cases.

The 25th project was the installation of the microturbines, which PCEC acknowledges required ZA review to provide relief from the prohibition set in Condition 1 of the "mother case," ZA-1965-17683, against electric generation anywhere on any part of the Controlled Drill Site (including the so-called "production facility" located at 9151 W Pico) and anywhere in the Oil Drilling District.

Second, PCEC's letter of July 8, 2020, requests a new condition requiring real annual compliance inspections and commits to exploring the installation of 24/7 emissions monitoring. These are the community's top two requests for new conditions, and the applicant is requesting them, too. The community's other requests for new conditions are very simple: write the required 5 year reviews into a condition so they are not bypassed again and copy the Rancho Park condition about emergency and accident notification into a new condition. This is the consensus solution we have been telling you about.

Together, that means that Parts 1 and 2 of this letter will be the quickest and easiest parts of the letter.

Part 3 is different. The City's non-compliance is a huge mess and we have not yet seen movement to set it right. Part 3 will take more time and space to discuss.

Part 1:
Requested Outcome of this Case with a Corrected Process and New Conditions to Produce Compliance Now, Help Ensure Compliance in the Future, and Protect Public Health, Safety, and the Environment.

We request the following new conditions be required at the whole Controlled Drill Site, as defined by the mother case, ZA-1965-17683, and as expanded as per ZA-1967-18893.

- **Require Annual Compliance Inspections Led or Approved by Petroleum Administrator:** The operator shall formally arrange for an Annual Compliance Inspection to be led by the Office of the Petroleum Administrator OR performed by a professional engineering firm approved by the Petroleum Administrator with Petroleum Administrator review and approval of the final report, to ascertain compliance with City Code and ZA-assigned conditions. Copies of the inspection report to be delivered to the ZA and Council District 5 Office.

- **Require Permanent 24/7 Emissions Monitoring:** Installation and continuous operation of 24/7 Emissions Monitoring using up-to-date equipment that records data and has a central alarm connection to an office that is staffed 24/7. The operator must secure approval of the monitoring system equipment from the Office of the Petroleum

Administrator. Emissions data shall be reported quarterly to the Office of the Petroleum Administrator and the ZA, and both offices shall promptly forward copies of the quarterly data to the Council District 5 Office.

- **Require Recurring Five Year Reviews of Compliance and Conditions by the ZA, as Mandated by the City's 2001 Settlement Agreement:** Amend Condition 78 of the 2000 ZA determination to include the terms of the Settlement Agreement that require recurring Five Year Reviews of Conditions.

- **Require Emergency, Accident, and Spill Reporting to the City:** The applicant shall immediately notify appropriate City agencies and entities, including the Los Angeles Fire Department, the Petroleum Administrator, and the local City Council office, of an emergency, accident or spill that requires reporting to any State, County, or regional agency.

We have requested repeatedly that this case retroactively review the 25 projects executed since 2000 without application to or approval from the ZA. These projects include the microturbine installation on the Controlled Drill Site, in contravention of Condition 1 of ZA-1965-17683 which approved the establishment of the Controlled Drill Site, and the other 24 projects were all well operations.

The unapproved well operations included drilling 2 new wells, the re-drilling of 12 existing wells, and the conversion of 10 wells between injector and producer (or vice versa). None were submitted to the ZA. All require review and approval by the ZA by terms of LAMC 13.01.H and 13.01.I, central code provisions that were last altered in October and July 2000, respectively. The entire case archive in City Records for ZA-17683 has been searched, and no applications or other documents for these projects were ever submitted to the ZA.

All 25 of these projects required environmental clearance under CEQA at the time they were planned and executed. They require environmental clearance under CEQA today, which means that clearance must be processed under today's CEQA procedures.

In 2016, Chief Zoning Administrator Linn Wyatt issued ZA Memo 133, setting new guidelines for how Planning will implement CEQA in oil cases. These new guidelines were promulgated as the result of a lawsuit over the City's pattern and practice of giving out improper Categorical Exemptions from Environmental Review under CEQA to oil well projects in the City.

ZA Memo 133 forbids the issuance of Categorical Exemptions for exactly the kinds of well projects that were executed at the West Pico Drill Site: the drilling of new wells, the re-drilling of existing wells, and the conversion of wells. It requires at least an Initial Study, and in this case would require an MND or an EIR because all approvals for well projects come with mitigation measures.

The review of the microturbines would also require at least an MND because approving the microturbines would require changing an existing mitigation measure (the prohibition on electric generation in Condition 1 of the 1965 "mother case") and it should only be done with a sound study to assess the need for noise mitigation and a careful analysis of emissions.

If reviewed properly, including a proper CEQA review and in view of the readiness of PCEC to agree to reasonable and sensible mitigation measures (i.e. annual inspections, emissions monitoring), we would not object to retroactive approvals of those projects with proper new mitigation measures attached.

Part 2:
A Summary of Major Episodes of Non-Compliance by the Operator, Which Cannot be Exhaustive Because No Comprehensive Compliance Inspection has Been Conducted by the City.

There is a remarkable record of non-compliance at the West Pico Drill Site since 2000. A few general comments are necessary at the outset before itemizing the specifics.

Except for odor problems, our ability to discern non-compliance is largely based on our own review of public record documents from DOGGR/CalGEM (the State agency that regulate down-hole well activities), SCAQMD, LADBS, LAFD, and the ZA case record for the site in City back to its origins, which is stored in the City Records office.

After documenting substantial non-compliance, we long ago called for a comprehensive compliance inspection by the City, through the office of the Petroleum Administrator. This request was refused or ignored. When former Petroleum Administrator Uduak Ntuk did a full on-site comprehensive compliance inspection of the Rancho Park Drill Site in 2017, he spotted more than double the number of instances of non-compliance than I had previously documented from public records (which is what initiated that case). Sometimes things are done and visible on site that do not have a document trail.

This is a Review of Compliance without a compliance inspection, though there was a site visit when the applicant invited Planning, the LAFD, and the Petroleum Administrator to visit.

There was a so-called “desk inspection” of the site by the Petroleum Administrator in fall 2019, but that was not the interim inspection ordered by Council in CF 18-0203 passed on September 7, 2018, and the “desk inspection” flagged zero of the compliance violations we have identified. It missed the 2001 Settlement Agreement, did not examine DOGGR/CalGEM well records, and said nothing about LAFD Notices of Violation. In other words, the “desk inspection” was an empty and ineffective gesture.

This is also a review with an incomplete file that does not speak to several key Conditions in force at the site, especially Conditions related to odor prevention and odor monitoring.

And this a review that is, so far, being exempted from environmental review under CEQA. CEQA has procedural and substantive requirements, many of which are designed to inform the public about environmental impacts and the efficacy of mitigation measures so that the public can participate meaningfully in legislative and administrative decision making processes. We are being deprived of this critical source of information by Planning’s erroneous decision to bring the case to hearing with a Categorical Exemption.

We also must emphasize a few points about the site operators. Ownership and management of the operations have changed hands several times. The founder, Occidental, sold the operation to Breitburn in approximately 1993. Breitburn spun off the site and other properties as Pacific Coast Energy Company (PCEC) in approximately 2011 or 2012. New ownership acquired full title to PCEC in September 2019.

We are now, since early June, in open and regular communication with the representatives and management of PCEC, under its new ownership. They have been responsive and honest, acknowledging major compliance issues not just in communication to us, but in writing to the ZA. Beyond acknowledging the problems, PCEC's letter sent to the ZA today shows they are stepping up to resolve the problems. They have shown nothing but good faith in seeking proper resolution to these issues.

Nevertheless, the record of non-compliance needs to be documented, because it is central not only to this case, but also critical to understanding the incredible extent of the City's failure to implement and enforce its own code, its own ZA assigned conditions, and its duties under CEQA. That monumental failure to live up to promises and legal commitments to protect and serve the public will be the subject of Part 3.

That said, here is an incomplete list of major instances of non-compliance that is documented in the public record. Documents and links to documents proving these instances of non-compliance are in the case file, and most of this documentation has been delivered by us in the absence of a serious effort by the City to examine the site.

- **Failure to hold required Five Year Reviews.** Five Year Reviews were not held in 2010-11 and 2015-16, as required by the 2001 Settlement Agreement, and have never been held until now.
- **Installation of microturbines without ZA reviews when expressly prohibited by ZA-assigned conditions.** Five 200 Kilowatt microturbine electric generators (1 Megawatt total) were installed in 2018-19 with no application to or approval from the ZA, despite the express prohibition of electric generation on site or anywhere in the larger Oil Drilling District that is mandated in ZA Condition 49 of the 2000 determination in ZA-1989-17683-PAD and in ZA Condition 1 (applying LAMC 13.01.F.43) in the 1965 "mother case" ZA-1965-17683. Condition 1 of the 1965 "mother case" still applies to the half of the Controlled Drill Site that houses the microturbines.
- **Drilling of two new wells without ZA approvals required by LAMC 13.01.** Two new oil wells, West Pico Well #58 (API # 03726615) and Well #59 (API # 03727133), were drilled in 2005-06 and 2010, respectively, without application to or approval from the ZA, despite the express requirements of LAMC 13.01.H and 13.01.I for such approval.
    - CalGEM permit applications, permits, and work history records prove the wells were drilled. Documents have been submitted and are in the case file.
    - The last new well reviewed by a ZA was approved by in 1979, with a tight expiration date to utilize the approval or have it expire.
    - No more than 60 wells have ever existed on the site. No more than 58 wells have been approved by the ZA. A well cellar with larger capacity was approved in 1969 in ZA-17683, but a well cellar is not a well, and wells require specific

approval as per LAMC 13.01. From 1969 through 1979, the site operator returned to the ZA each time it wanted approvals for new wells.
    - The 2000 determination expressly did not approve any new wells.
    - There were no ZA approvals for the wells drilled in 2005-06 and 2010.
    - The ZA who wrote the March 2006 determination on the two-year checkup Review did not know a new well was drilled while the Review case was on his desk because there was no application for it and no site inspection by a qualified professional.
- **Re-drilling of 12 existing wells without ZA reviews or approvals required by LAMC 13.01.** 12 existing wells were re-drilled between 2000 and 2020. PCEC and I have both submitted identical lists of these wells to the ZA. No applications were submitted to the ZA. The documentation is available on CalGEM's "Well Search" and "Well Finder" systems, and is indisputable.
- **Conversion of 10 wells between injector-producer (or vice versa) without ZA reviews or approvals required by LAMC 13.01.** All between 2000 and 2020. No applications, no reviews. PCEC and I have each submitted identical lists of these wells to the ZA. The documentation is available on CalGEM's "Well Search" and "Well Finder" systems, and is indisputable.
- **All projects undertaken without ZA review also, per force, violated CEQA since Planning is the lead agency for CEQA reviews of projects at the drill site.** Each of these projects required environmental clearance under CEQA, but the operator skirted CEQA review by not applying to the ZA for approval, and the operator wrongly told DOGGR (old name of CalGEM) that the local lead agency did not require any CEQA documents or clearance for the well operations in question. In fact, every well operation at other drill sites in the City that was reviewed by the ZA from 2000 to the present has been processed by Planning for environmental clearance under CEQA (even if given inappropriate exemptions, CEQA documentation was required).
- **Repeated LAFD Notices of Violation for leaving spilled or leaked Petroleum on surfaces, which also violated of Conditions 46 ("Avoidance of Nuisance"), 47 ("Waste Disposal"), 57 ("Odor Control"), and 61 ("Leak Detection and Odor Control") of the 2000 determination in ZA-1989-17683-PAD and Condition 1 (applying LAMC 13.01.F.18 and F.37) of the 1965 "mother case" ZA-1965-17683.** In September 2017 and October 2018, the LAFD issued Notices of "Fire/Life Safety Violation" at the West Pico Drill Site for the violation of "L.A.M.C. 57.5706.3.2.2 Discharge and Combustible Materials on Ground."
    - In 2017, the citation specified "You are hereby ordered to remove any waste petroleum, petroleum refuse or waste matter from the surface of the ground, and walls of the cellars."
    - In 2018, the citation specified "You are hereby ordered to remove any waste petroleum, petroleum refuse or waste matter from the surface of the ground, around or near any oil well, derrick, pump, cellar, tank, oil pump, or combustible structure." These specifications are not quotations of the code, so they would seem to be possible descriptions of places where LAFD found spilled or leaked petroleum.
    - We have previously sent copies of LAFD Notices of Violation to the ZA and they are in the case file.

- **Odor Problems as reported in first person testimony of Council Member Paul Koretz in City Council Committee on October 15, 2019.** Numerous neighbors have complained of petroleum odors around the drill site over the past several years, but Council Member Paul Koretz's personal testimony presented at the City Council's Energy, Climate Change and Environmental Justice Committee's meeting of October 15, 2019 stands out as recorded testimony by an Officer of the City. ***Mr. Koretz said, "You can smell the oil. You can taste the oil."***
    - Transcript of the committee meeting: https://lacity.granicus.com/TranscriptViewer.php?view_id=46&clip_id=19441
    - Audio recording of the committee meeting, with Mr. Koretz's testimony at the 2 hour 23 minute mark: https://lacity.granicus.com/MediaPlayer.php?view_id=46&clip_id=19441).
- **Spilled or leaked petroleum that is not cleaned up could cause odor problems, so the LAFD documented evidence of petroleum leaks or spills that were not cleaned up further substantiates the personal testimony of Council Member Paul Koretz and complaints from neighbors of the drill site.**
- **The Planning Department Case File on the drill site documents decades of complaints about odors from the drill site, from the 1960s to the present, which have been repeatedly noted and several times affirmed by Reviewing ZAs.** There is a long history of non-compliance and nuisance that has never been satisfactorily addressed.
- **The case file includes a Notice of Violation from SCAQMD, from February 2020, for a gas leak at well-head #43 at a concentration of greater than 50,000 parts per million, which exceeds SCAQMD regulations.**
- **The case file includes additional Notices of Violation from the LAFD, and an older Notice from SCAQMD**

To reiterate, PCEC has acknowledged the most major violations and supplied documentation on some of the lesser items, too. PCEC has come forward asking to resolve all of these matters, including the 24 well projects and the microturbines, and to do so with a proper environmental review. And PCEC has stepped forward to request the same top new conditions that the community requests.

Part 3:
A Statement Objecting to Non-Compliance by the City, Including and Encompassing but Not Limited to Violations of Procedure and Failures to Perform Administrative Duties, both in the Proceedings and Case File of this Review and During the Past 20 Years.

The City's failures in relation to this Controlled Drill Site and this review are legion.

Time may not permit a full list of all the problems. What follows speaks to a larger set of problems concerning the City's failure to live up to its own City Code, its obligations under CEQA, its conditions assigned in ZA approvals, and decades of promises by Mayors, City Attorneys, Council Members, and Zoning Administrators that there would be "strict controls" and "strict compliance" at the oil drill sites that those Officers of the City have authorized to operate in the City.

- The ZA never issued an addendum to the EIR that was the subject of the court ruling and settlement agreement in 2001, as required by State law since 1989.
- The ZA never updated the Mitigation Monitoring & Reporting Plan (MMRP) attached to that EIR after the settlement agreement, as required by State law since 1989.
- The ZA never issued an addendum or correction or any additional or new letter to amend the 2000 determination in ZA-1989-17683-PAD after the Settlement Agreement changed several of the conditions and added several new mitigation and enforcement measures.
- Perhaps partly as a result of this, the 5 Year Reviews required by the 2001 Settlement Agreement were never held, when they should have been held in 2010-11 and 2015-16.
- The ZA in 2000 made a long series of errors, too long to catalog here, including misunderstanding the difference between a well and a well cellar, failing to understand that "the Controlled Drill Site" approved by the 1965 "mother case" is an integrated whole that cannot be split apart without undermining its legal standing to operate, and then after treating the drill site as two different properties and declaring that the 2000 decision applied only to the half with well heads the ZA then wrote a series of conditions that necessarily apply to both halves.
    - The time limit to appeal is long past, but the errors continue to trip up the ZA today.
- The ZA in the two-year post-project check-up review held in 2005-06 on the modernization project that was finally approved after the 2001 Settlement at least recognized the difference between a well and a well cellar with an open slot for a well. But that ZA did not know that a new well was being drilled, without approval, at te very time that 2005-06 was on their desk.
- The City has never required or performed regular inspections for general compliance with City Code and ZA assigned conditions, not at this drill site or at any drill site in the City. LAFD inspections for fire code compliance, only, are the only regular City inspections that are required by City law.
- As result of the failure to do inspections, non-compliance at drill sites in the City is epidemic, if not fully universal. The West Pico case seems to be the worst.
- The failure to do inspections, the failure to do enforcement, and the City's lack of an expert with training and experience in or around the industry (except for the 2016-2019 tenure of Uduak Ntuk as Petroleum Administrator after that office was revived following twenty years of being totally forgotten) invites rampant non-compliance.
- When the officers of NASE reminded the City in early November 2019 that their 2001 Settlement Agreement mandated recurring 5 Year Reviews that had never happened, they also called on the City to perform a Comprehensive Compliance Inspection to inform a ZA review. They were joined by the local Neighborhood Council, Rabbi Bookstein, and local community members and other local Rabbis.
- We argued that without such an inspection, the ZA would have no independent source of information on compliance, and no staff on hand in Planning with knowledge of drill sites and oil well records who could identify compliance problems particular to the industry (i.e., recognize equipment on a drill site, know how to review CalGEM records, etc).
- We also argued that an inspection was needed in order to assess the level of environmental review required by CEQA, which requires a "hard look" at the project

under review. In this case, the project would be defined by the scope of compliance issues, and that in turn would shape the evaluation of present and future mitigation measures.

- Our request for an inspection was refused and/or ignored.
- The case file is manifestly incomplete, and incomplete in ways that reflect a poor and inaccurate reading of the ZA approvals and ZA-assigned conditions that are in force at the site.
- For example, on May 15, 2020, ZA staff informed PCEC that the case was on hold and required PCEC to submit quarterly noise reports as per Condition 39 of the 2000 approval. But Planning staff did not catch that Condition 39's reporting requirement had a two year time span and expired in 2005, and compliance was reviewed in 2005-06 in ZA-1989-17683-PA1.
- For another example, the May 15, 2020 asked for delivery of the risk assessment report required by the Settlement Agreement. Planning staff seem to have missed that this report was required to be delivered in 2005, and that it was delivered in 2006, and was reviewed in the 2005-06 PA1 review.
- It seems that Planning staff did not call the full case file from City Records, for if they had done so they'd have seen the risk assessment study, the determination in the 2005-06 PA1 case, and they'd also perhaps have attended to the import of approvals starting with the 1965 "mother case." The pdf copies of the current case file that I received on June 29 do not include any of those earlier cases that define the size and footprint of the Controlled Drill Site and contain the approvals for wells.
- ***Meanwhile, the ZA staff's May 15, 2020 letter to PCEC that asked for documents on compliance with multiple expired conditions that were reviewed in 2005-06 DID NOT ask for records pertinent to Condition 61 on Leak Detection and Odor Control, which is still in force. Condition 61 requires a record of a daily walk of the drill site to check for odors. PCEC submitted just one such record, dated December 31, 2019, the last business day before its application was originally due. Planning staff did not ask for any additional records, despite the known fact that odor complaints were part of the genesis of this review.***
- ***Misunderstanding that other conditions had already expired is one thing, but the negligence of not calling for documents on Condition 61 speaks to severe inattention to this case.***
- The case file contains no documents at all about the Categorical Exemption that Planning has proposed.
- The hearing Notice lists a CEQA case number and document number, ENV-2020-1328-CE, which Planning staff have told me in writing does not exist and pertains to no document.
- The hearing Notice says the CE is a Class 9 (inspections only) and a Class 21 (enforcement: i.e. revocation or referral for prosecution) exemption. But this Review is neither of those things. Revocation would take place under LAMC 12.27.1. There is no inspection, and it is not inspection only by the terms of the same Notice that lists the CE as Class 9.
- The hearing Notice says the ZA may impose "corrective conditions." That means modifying mitigations, and that is at the core of environmental review under CEQA.

- ***Condition 78 of the 2000 determination is invoked by the Settlement Agreement for the procedure to use in the 5 Year Reviews. Condition 78 says the ZA will review the "effectiveness" of conditions, "evaluate the neighborhood impacts," and evaluate the "efficacy of mitigation measures." None of that can be done in compliance with CEQA under a Categorical Exemption because it is all about studying and potentially modifying conditions, which is at the essence of what CEQA is all about.***
- ***Add in the facts of non-compliance and the inadequacy of conditions that have been manifest since the Chief ZA ordered this review on November 19, 2019, and this is astounding. Remember that the starting points were: odor complaints, proof that mandatory 5 Year Reviews had never been held, and the microturbine installation contrary to conditions forbidding electric generation anywhere on the Controlled Drill Site or in the Oil Drilling District.***
- ***But it became worse after that when, starting in March, the ZA's office was first informed of wells that had been drilled without application or ZA review or CEQA clearance. That should have triggered the action prescribed by ZA Memo 133, which the City had just successfully defended in the California Court of Appeals in 2019!***
- ***We are sadly back to the City's old pattern and practice of handing out improper Categorical Exemptions in oil cases, which people thought had been fixed by the City's settlement of a lawsuit about it in 2016.***

There is considerably more that is not right about procedure and substance of the City's handling of this case. But it is approaching 4PM the day before the public hearing, and this letter must be submitted.

PCEC has come forward along with the community to present a solution to problems.

We need to see if the City can do its part, despite a record running up to the present that does not inspire confidence in the City. Isn't time to turn that ship around? It would be to everyone's benefit, even the City's.

Yours

Michael Salman

West Pico Drill Site (ZA-1989-17683-PA2) - Comment by Local Resident in Favor of Annual Compliance Inspection and 24/7 Emissions Monitoring

Cherie Lewis <cherie0206@hotmail.com> Wed, Jul 8, 2020 at 9:51 AM
To: "dylan.sittig@lacity.org" <dylan.sittig@lacity.org>

Dear Associate Zoning Administrator Irving,

This le er involves the West Pico Drill Site (ZA-1989-17683-PA2) (hereina. er "the Drill Site").

As a local resident, I am very concerned about the impact on the neighborhood caused by the strong odors & foul air which connuously emana te from the Drill Site.

Thousands of residents & visitors are affected by this situaon on a daily basis. The loc al neighborhood is density populated and includes mulple public & priv ate schools, thousands of houses & apartment buildings, mulple Elder care Facilies, mulple houses of w orship, & hundreds of small & large businesses.

Yet, despite the fact that many people, over a period of many years, have requested environmental review under the CEQA, lile r eview or oversight of the Drill Site has been conducted. The situaon has w orsened over me, and mos t recently, it has been learned that the Drill Site has 25 unapproved projects on its premises. This serious situaon is unaccep table.

To protect public health & safety, this situaon should be r emedied as soon as possible. We urge you to require an annual compliance inspecon & c onnuous 24/7 emissions monit oring of the Drill Site.

As a resident of Los Angeles for many decades, I feel betrayed by the local government, which has declined over me t o take acon on this en vironmental danger. As a person with medical issues, I feel vulnerable when I shop at stores near the Drill Site, which is located right in the middle of a business district.

Since any assessment of any situaon begins with a r eview of the facts, an inspecon of the Drill Sit e is needed to ascertain the facts of the situaon. Without an inspecon, the f acts are unknown. Facts are necessary before any decision is made regarding the Drill Site. Please postpone any decision on the Drill Site unl a thor ough inspecon is c onducted by imparal pr ofessionals. Thank you.

Sincerely,

Cherie Lewis, Esq.

Dear Associate Zoning Administrator Irving,

I am writing to regarding West Pico Drill Site (ZA-1989-17683-PA2).

I'm a resident of the neighborhood directly impacted by the West Pico Drill Site. I'm very concerned about compliance issues and odors from the drill site which is located next to multiple schools, houses of worship, and our homes.

I urge you to require an annual compliance inspection and 24/7 emissions monitoring of the site to protect public health and safety.

I am also VERY concerned about the lack of environmental review under CEQA. We now know that there are 25 unapproved projects at the site, in addition to previous safety violations.

[insert your own testimony or experience and feelings here]

It's morally wrong that our billboards have more oversight than oil wells in our densely populated neighborhood!

Sincerely,

Eitan MELAMED

SUBJECT: West Pico Drill Site (ZA-1989-17683-PA2)

Dear Associate Zoning Administrator Irving,

I am writing to regarding West Pico Drill Site (ZA-1989-17683-PA2).

I'm a frequent visitor to the neighborhood directly impacted by the West Pico Drill Site. I attend synagogue services there. I'm extremely concerned about compliance issues and odors from the drill site which is located next to multiple schools, houses of worship, and our homes. This is clearly a health hazard as has been proven in other cities that had similar drilling sites.

I urge you to require an annual compliance inspection and 24/7 emissions monitoring of the site to protect public health and safety.

I am also VERY concerned about the lack of environmental review under CEQA. We now know that there are 25 unapproved projects at the site.

I was not able to pray in synagogue because I was overwhelmed by the smell that made me ill.

It's morally wrong that our billboards have more oversight than oil wells in our densely populated neighborhood!

Sincerely,

Tova Abady

Dear Associate Zoning Administrator Irving,

I am writing to you in regards to West Pico Drill Site (ZA-1989-17683-PA2).

I'm a resident of the neighborhood directly impacted by the West Pico Drill Site. I'm very concerned about compliance issues and odors from the drill site which is located next to multiple schools, houses of worship, and our homes.

I urge you to require an annual compliance inspection and 24/7 emissions monitoring of the site to protect public health and safety.

I am also VERY concerned about the lack of environmental review under CEQA. We now know that there are 25 unapproved projects at the site, in addition to previous safety violations.

This is unacceptable and I urge you to act and work for the Safety of my family and other people in the area.

It's morally wrong that our billboards have more oversight than oil wells in our densely populated neighborhood!

Sincerely,

Anat Sadan

Dear Associate Zoning Administrator Irving,

I am writing to regarding West Pico Drill Site (ZA-1989-17683-PA2).

My family and I live on S. Wetherly Dr and my children attend Hillel Hebrew Academy on Olympic and Doheny. I'm very concerned about the drill site including compliance issues and odors from the drill site which is located next to multiple schools, houses of worship, and our homes.

I urge you to require an annual compliance inspection and 24/7 emissions monitoring of the site to protect public health and safety.

I am also VERY concerned about the lack of environmental review under CEQA. We now know that there are 25 unapproved projects at the site, in addition to previous safety violations.

Our neighborhood and community our relying on you to do the right thing and protect the health of our families. Our request is reasonable and fair and I hope you make the decision to ensure that the drill site is in compliance and not a danger to the neighborhood.

Sincerely,

Steve Fried

Dear fellow Angelenos,
I am writing regarding the West Pico Drill Site (ZA-1989-17683-PA2).

I'm a resident of the neighborhood directly impacted by that site. I'm very concerned about compliance issues and odors from the drill site, which is located close to and, in some cases, directly next to multiple schools, houses of worship, and our homes.

I urge you to require an annual compliance inspection and 24/7 emissions monitoring of the site to protect public health and safety.

I am also *very* concerned about the lack of environmental review under CEQA. We now know that there are 25 unapproved projects at the site, in addition to previous safety violations. It's morally wrong that our billboards have more oversight than oil wells in our densely populated neighborhood!

Sincerely,

Miriam Duman Goldberg

Questions about hearing, case, case file re West Pico Drill Site (ZA-1989-17683-PA2)

Michael Salman <salman@history.ucla.edu> Tue, Jul 7, 2020 at 12:20 PM
To: Dylan Sittig <dylan.sittig@lacity.org>
Cc: Estineh Mailian <estineh.mailian@lacity.org>, Lisa Webber <lisa.webber@lacity.org>, Edber Macedo <edber.macedo@lacity.org>, Rae Drazin <rae@md-advocate.net>, Richard Weiner <rswatty@ca.rr.com>, Rabbi Yonah Bookstein <rabbiyonah@gmail.com>, "mfinch@energyprojectllc.com" <mfinch@energyprojectllc.com>

Dear Dylan

I'd like to follow up on the issue of speaking me a t the hearing, and leave other ma. ers aside for the moment.

I am adding Mike Finch, PCEC's representav e, to the cc list of this reply.

In the Murphy Drill Site case handled by Associate ZA Charlie Rausch (ZA-1959-15227-O-PA5) and in the 4th Ave Drill Site case handled by Associate ZA David Weintraub, I was given speaking me equal t o the applicant as a community representav e. The Murphy case involved a new project applicaon. The 4th A ve case was a Review of Compliance/Condions in r esponse to documented non-compliance.

Both of those ZA cases were held because of community and Neighborhood Council intervenon in which I played a primary role. That is true even of the Murphy case, in which there was a new project applicaon. Assistant City Attorney Kaufmann-Macias was involved in those developments.

In the current case concerning the West Pico Drill Site, the Review stems from the combinaon of the 2001 Selemen t Agreement and the demonstraon of c ompliance issues brought to the attenon of mulple Offices of the City by officers of NASE (party to the Selemen t) and by Rabbi Bookstein.

Is it really the decision of Associate ZA Irving not to accord NASE's representav e speaking me on a par with the applicant, despite past precedent and the specific history of this case?

Michael Salman

Subject: Re: Ques ons about hearing, case, case file re West Pico Drill Site (ZA-1989-17683-PA2)

Hello,

Thank you for your comments, they have been received and will be added to the case file.

I am able to respond to some of your questions related to the upcoming hearing and procedures. The mailed public hearing notice serves as the official public notice for the project. The hearing will proceed as scheduled and noticed. At ZA Hearings, the applicants are asked to present their project and then all members of the public are given equal time to provide verbal comments. Time cannot be transferred to other members of the public during public comment. At the hearing, part of what the Zoning Administrator will consider is the appropriate environmental clearance. Thus, no final CEQA document is available at this time. A Public Records Act request does not affect, nor is affected by, a scheduled

hearing. Your PRA request is being processed and Beatrice is aware of your desire to review our response prior to the hearing. We have provided you a timely review of all of the documents in the case file.

The only additional items that have been added to the case file since your review have been multiple emails from you (which you already have) and the attached email.

Sincerely,
Dylan

> > >
> > > I am writing to you as representative for Richard Weiner and Dr Rae Drazin, officers of NASE, and parties to the 2001 Settlement Agreement. And I am also writing in my own capacity as a citizen.

1) Is the hearing going forward on July 9? Or is the case on hold?

Planning's Case Information system still says the case is on hold, and does not list a day and time for the hearing.

2) If the hearing is going forward, will I be accorded equal speaking time with the applicant? I would be speaking as Richard Weiner's and Dr Rae Drazin's representative.

This is how other similar hearings on Reviews of Compliance/Conditions of drill sites have been organized (for example, ZA-1994-16773-PA2 on the 4th Ave Drill Site, in 2017).

We are the original source for the information about most of the non-compliance at this site: the failure to hold the 5 year reviews mandated by the 2001 Settlement, the microturbines, the 24 well projects, the LAFD citations in 2017 & 2018 for exposed petroleum, etc.

While I would speak for Richard and Rae if a slot parallel to the applicant is allowed, I believe Richard and Rae might also like the chance to speak briefly in the public comment section on a par with other members of the public, so that their own voices are on the record and heard.

3) Is there a CEQA clearance document ready now, four days before the hearing? Will the hearing go forward with no CEQA document at all to review?

I first inquired with Edber Macedo on June 22 about ENV-2020-1328-CE, which is listed on the hearing notice. On June 26 I was told no such document exists, and the copy of the file I was sent on June 29 contained no documents at all about environmental clearance.

The case file now contains documents from CalGEM and links to CalGEM records that prove that 24 well projects have been conducted since 2000 (2 new wells, 12 re-drilled wells, 10 well conversions), all of which were executed without application to the ZA for approval and without environmental clearance. And the case file contains a letter from the applicant that acknowledges these facts.

Is it really the Department of Planning's plan to go forward with the hearing with Categorical Exemption on the hearing notices but no documents at all in the case file about this exemption?

4) Will the records pertinent to my PRA request for all documents & communications related to the decision to bring the case to hearing with a Categorical Exemption or a proposed Categorical Exemption be made available before the hearing? If not, will the hearing go forward with no access to any documents related to the processing of CEQA's procedural and substantive requirements, except for the EAF form completed by the applicant?

5) Your letter to PCEC of May 15, 2020, alerted the company that the case would be on hold until various documents were provided, including "quarterly noise reports" per Condition 39. *Why did you not ask for records of daily odor inspections, which are required by Condition 61?*

This inexplicable combination raises serious doubts about the thoroughness of this review.

Petroleum odor problems are part of the genesis of this case. Odor complaints from Rabbi Bookstein and Council Member Paul Koretz (voiced by Mr Koretz personally in a Council Committee meeting on October 15, 2019) prompted me to bring to light the requirement of the 2001 Settlement Agreement to hold 5 Year Reviews, and then prompted Richard Weiner and Dr. Rae Drazin to contact the Chief ZA and Deputy Director of Planning.

In its application, PCEC submitted one record of a daily perimeter inspection for odors, and that record is dated December 31, 2019 - see page 294 of the "Findings" pdf, where the document is mistakenly filed under Condition 38.

Such records are required by Condition 61 on a continuing basis, from the date of effectiveness of ZA-1989-17683-PAD after the Council action to finalize the Settlement in June 2001 to the present.

Did you ask PCEC for additional records? No indication of that is in the case file.

But your letter of May 15 asked for quarterly noise reports as per Condition 39. It would appear that the ZA's office did notice that was a requirement that ran for only two years after completion of the modernization project - i.e., from 2003-2005.

Condition 38 was also time limited to the first two years after completion of the modernization project, i.e., 2003-2005. In its "Findings," PCEC submitted recent records showing its compliance with SCAQMD Rule 1173 and 1176, which are not about odors but about gas leaks and VOC leaks, many of which are not odorous.

Those reports for compliance with SCAQMD Rules also cover both halves of the Controlled Drill Site, both the processing half at 9151 Pico and the well head half at 9101 Pico, because both halves together make up the oil production operation as per both SCAQMD's rules and the City of LA's law, namely LAMC 13.01.E.2.b.

How could all of this slip by without notice by you or the ZA?

So the case was put on hold partly for a request for documents about a noise reporting condition that has been extinct for 15 years, when no complaints about noise are in the current case file?

But you and the ZA's office seem to have not noticed that Condition 61, about odor monitoring, is still in force and requires daily record keeping, which you did not request.

This is quite shocking because petroleum odor complaints are part of the genesis of this case and the complaints are backed up by the two LAFD citations for exposed petroleum in 2017 and 2018.

6) Will the case still go forward to hearing with so glaringly incomplete a file and so much chaos?

Yours

Michael Salman

Mr. Sittig,

I was a party to the 2001 Settlement Agreement and have been living within 5 blocks of the oil drilling site since 1974. It's quite amazing that the non-compliance issues are still with us, even as the owners of the Site have changed. I am concerned with ongoing odors and the lack of 24/7 monitoring and overall compliance, and sincerely hope that finally in 2020 the neighborhood, especially the children, will be protected from potential environmental hazards caused by this facility.

I am thankful to Professor Michael Salman, who has been working tirelessly to achieve this goal. He is authorized to speak on my behalf as my representative.

Sincerely,

Dear Mr Sittig,
I am one of the founders and remain an officer of Neighbors for a Safe Environment (NASE). As you know, NASE is a party to the 2001 Settlement Agreement along with Applicant's predecessor. Almost 20 years later the neighborhood has yet to realize the minimal environmental protections we assumed the Settlement Agreement provided. We believe it is necessary to have annual inspections and 24/7 monitoring of the Pico site.
Professor Michael Salman will be representing us at the hearing this week, and we request that he be allowed at least the same amount of speaking time as the applicant .
Sincerely , Richard S.Weiner

Dear Dylan

I just checked the Case Information System. A pdf of what I saw at 10AM today is attached:

The system still says the case is on hold, but now adds that a virtual hearing is scheduled for "9:00 AM" on a day that is not specified.

I can only guess that my email sent last night has been read, though I have not yet received a reply - I understand that you probably come into the office at 8:30 or 9AM and then need time to attend to various things.

However, we are three days away from the hearing. The case is listed as on "Hold." The hearing date is not on the case information system. And there is still no environmental clearance document to review, etc.

May I please request a timely reply to the questions I asked last night about **1)** the hold, **2)** speaking time at the hearing, **3)** the environmental clearance document, **4)** the records pertinent to my PRA request, **5)** the incompleteness of the case file concerning especially Condition 61 and why Planning did not ask for these records from PCEC, and **6)** is the hearing actually going forward on Thursday under these conditions?

And there is one more question I will add now: **7)** Have any documents been added to the case file since you sent me pdf copies of it on June 29? If the answer is yes, please send me copies of those documents.

Thank you

Michael Salman

Questions about hearing, case, case file re West Pico Drill Site (ZA-1989-17683-PA2)

Michael Salman <salman@history.ucla.edu> Sun, Jul 5, 2020 at 5:41 PM
To: Dylan Sittig <dylan.sittig@lacity.org>
Cc: Estineh Mailian <estineh.mailian@lacity.org>, vince.bertoni@lacity.org, lisa.webber@lacity.org, Edber Macedo <edber.macedo@lacity.org>, Rae Drazin <rae@md-advocate.net>, Richard Weiner <rswatty@ca.rr.com>, Rabbi Yonah Bookstein <rabbiyonah@gmail.com>

Dear Dylan

I am writing to ask a series of questions about the hearing, case, and case file for thw West Pico Drill Site (ZA-1989-17683-PA2), for which Notice has been given for a hearing this coming Thursday, July 9.

I am writing to you as representative for Richard Weiner and Dr Rae Drazin, officers of NASE, and parties to the 2001 Settlement Agreement. And I am also writing in my own capacity as a citizen.

1) Is the hearing going forward on July 9? Or is the case on hold?

Planning's Case Information system still says the case is on hold, and does not list a day and time for the hearing.

2) If the hearing is going forward, will I be accorded equal speaking time with the applicant? I would be speaking as Richard Weiner's and Dr Rae Drazin's representative.

This is how other similar hearings on Reviews of Compliance/Conditions of drill sites have been organized (for example, ZA-1994-16773-PA2 on the 4th Ave Drill Site, in 2017).

We are the original source for the information about most of the non-compliance at this site: the failure to hold the 5 year reviews mandated by the 2001 Settlement, the microturbines, the 24 well projects, the LAFD citations in 2017 & 2018 for exposed petroleum, etc.

While I would speak for Richard and Rae if a slot parallel to the applicant is allowed, I believe Richard and Rae might also like the chance to speak briefly in the public comment section on a par with other members of the public, so that their own voices are on the record and heard.

3) Is there a CEQA clearance document ready now, four days before the hearing? Will the hearing go forward with no CEQA document at all to review?

I first inquired with Edber Macedo on June 22 about ENV-2020-1328-CE, which is listed on the hearing notice. On June 26 I was told no such document exists, and the copy of the file I was sent on June 29 contained no documents at all about environmental clearance.

The case file now contains documents from CalGEM and links to CalGEM records that prove that 24 well projects have been conducted since 2000 (2 new wells, 12 re-drilled wells, 10 well conversions), all of which were executed without application to the ZA for approval and without environmental clearance. And the case file contains a letter from the applicant that acknowledges these facts.

Is it really the Department of Planning's plan to go forward with the hearing with Categorical Exemption on the hearing notices but no documents at all in the case file about this exemption?

4) Will the records pertinent to my PRA request for all documents & communications related to the decision to bring the case to hearing with a Categorical Exemption or a proposed Categorical Exemption be made available before the hearing? If not, will the hearing go forward with no access to any documents related to the processing of CEQA's procedural and substantive requirements, except for the EAF form completed by the applicant?

5) Your letter to PCEC of May 15, 2020, alerted the company that the case would be on hold until various documents were provided, including "quarterly noise reports" per Condition 39. *Why did you not ask for records of daily odor inspections, which are required by Condition 61?*

This inexplicable combination raises serious doubts about the thoroughness of this review.

Petroleum odor problems are part of the genesis of this case. Odor complaints from Rabbi Bookstein and Council Member Paul Koretz (voiced by Mr Koretz personally in a Council Committee meeting on October 15, 2019) prompted me to bring to light the requirement of the 2001 Settlement Agreement to hold 5 Year Reviews, and then prompted Richard Weiner and Dr. Rae Drazin to contact the Chief ZA and Deputy Director of Planning.

In its application, PCEC submitted one record of a daily perimeter inspection for odors, and that record is dated December 31, 2019 - see page 294 of the "Findings" pdf, where the document is mistakenly filed under Condition 38.

Such records are required by Condition 61 on a continuing basis, from the date of effectiveness of ZA-1989-17683-PAD after the Council action to finalize the Settlement in June 2001 to the present.

Did you ask PCEC for additional records? No indication of that is in the case file.

But your letter of May 15 asked for quarterly noise reports as per Condition 39. It would appear that the ZA's office did notice that was a requirement that ran for only two years after completion of the modernization project - i.e., from 2003-2005.

Condition 38 was also time limited to the first two years after completion of the modernization project, i.e., 2003-2005. In its "Findings," PCEC submitted recent records showing its compliance with SCAQMD Rule 1173 and 1176, which are not about odors but about gas leaks and VOC leaks, many of which are not odorous.

Those reports for compliance with SCAQMD Rules also cover both halves of the Controlled Drill Site, both the processing half at 9151 Pico and the well head half at 9101 Pico, because both halves together make up the oil production operation as per both SCAQMD's rules and the City of LA's law, namely LAMC 13.01.E.2.b.

How could all of this slip by without notice by you or the ZA?

So the case was put on hold partly for a request for documents about a noise reporting condition that has been extinct for 15 years, when no complaints about noise are in the current case file?

But you and the ZA's office seem to have not noticed that Condition 61, about odor monitoring, is still in force and requires daily record keeping, which you did not request.

This is quite shocking because petroleum odor complaints are part of the genesis of this case and the complaints are backed up by the two LAFD citations for exposed petroleum in 2017 and 2018.

6) Will the case still go forward to hearing with so glaringly incomplete a file and so much chaos?

Yours

Michael Salman

Dear Council Member Koretz, Director Bertoni, Chief Zoning Administrator Mailian, City Attorney Feuer, and staff,

Please find the attached letters of concern from the South Robertson Neighborhood Council regarding the West Pico Drill Site located at 9101 W. Pico Blvd.

Please note that, while the February letter has a "draft" watermark, SORO did indeed approve this letter. Due to technical difficulties caused by the pandemic, we have been unable to remove the watermark, but we wanted to get these letters to you now so they can be considered before the upcoming July 9 hearing.

Best Regards,
Jessica Barclay-Strobel

SORO Board Member

Re: Urgent Need for City Ordinances to Require Annual Oil Drill Site General Compliance Inspections and 24/7 Emissions Monitoring

Dear Council Member Koretz,

I am writing on behalf of the South Robertson Neighborhoods Council ("SORO NC") to make an urgent request that City Council pass ordinances to require annual general compliance inspections and 24/7 emissions monitoring at oil drill sites without further delay.

At a duly-noticed meeting of the General Board on February 20, 2020, SORO NC voted 00 yes / 00 no / 00 abstain to send you this letter of urgent concern.

Background on SORO NC's Recent Realization that the City Does Not Require Annual Compliance Inspections or Emissions Monitoring and has been Delaying/Avoiding Action for Years.

Like many other communities in Los Angeles, we have been living with an urban oil drill site in our midst - the West Pico Drill Site – for many decades. On a cyclical basis, every ten to twenty years our community becomes alerted to problems at the site that suddenly make us aware that there is a complex oil and gas extraction operation next door to residences, schools, houses of worship, and retail businesses.

There have been problems at the West Pico Drill Site in the past, as there have been at almost all oil drill sites in the City. However, after the Settlement Agreement between the City and the site operator was approved by City Council in 2001, the operations at the site became quieter, and it seems most people generally ignored the existence of the drill site.

More significantly, the City ignored the drill site, and thus the Five Year Reviews required by the Settlement Agreement were not held in 2010-11 and 2015-16. We now know the neglect extended far beyond that serious lapse.

As we have advised you and the City Attorney and Planning Department in a separate letter, the site operator drilled and/or re-drilled several wells (at least three that we have documented, and as many as twelve according to the site operator) during the years since 2003 – none of which were reviewed and approved by the ZA, as required by LAMC 13.01.H and 13.01.I. In addition, as you already know, five microturbine electric generators were installed in 2018-19, also without ZA review and approval, and in the face of a ZA-assigned condition that prohibits electric generation on site.

We know about this now because odor complaints about the drill site spurred citizens to research the site and find a long trail of compliance problems that the City has been ignoring for decades. We were startled to learn this. We were equally startled to learn that the same City that passed an ordinance to inspect billboards every year cannot be moved to require inspections of oil drill sites in residential neighborhoods.

The Need for Annual Compliance Inspections to Enforce Compliance with City Code and ZA Conditions

As you already know from the recent similar case at the Rancho Park Drill Site, there is an epidemic of non-compliance with City Code and ZA-assigned conditions spread

neighborhoods council

across many oil drill sites in the City. The malady has an obvious root cause: The City has never performed regular general compliance inspections of oil drill sites.

The City's lack of any regular general compliance inspections has signaled to operators that they can undertake a wide variety of projects without making legally required applications to the ZA for approval. They thereby skirt the State's CEQA law, because CEQA review devolves to the City. The same operators get permits from CalGEM (formerly DOGGR) and SCAQMD for these projects because they know those agencies do routine inspections, surprise inspections, and inspections when there are complaints. That disparity in enforcement – zero from the City vs fairly effective enforcement by CalGEM and SCAQMD – created the paper trail citizens followed to document non-compliance with City Code at Rancho Park in 2017 and at West Pico now.

The Stalled Inspection Motion: CF 18-0203

On September 7, 2018, Council unanimously passed CF18-0203, which called for an inspection ordinance and a study of emissions monitoring. The motion passed by Council asked the City Attorney to draft an ordinance for an inspection program, but the City Attorney did not do it, and Council never followed up.

The motion directed the Petroleum Administrator to commence interim inspections until the ordinance is passed, but no inspections have been done.

When CF 18-0203 passed through the ECCEJ Committee on August 21, 2018, chaired by the current Council President, Ms. Nury Martinez, the Committee report called inspections "the critical first step." The reason is obvious. Without inspections to monitor and enforce compliance, all other parts of the code and ZA-assigned conditions are worthless.

We ask you to take the lead in urging Council to enact an oil drill site annual inspection ordinance. And then to follow immediately with an ordinance that requires 24/7 emissions monitoring at all sites, with systems to be approved by the City's Petroleum Administrator.

The public policy necessity of these steps is obvious. The viability of these steps is obvious.

We hope that you will respond to us with an explanation of how you will handle this matter expeditiously so as to protect public safety.

Please do not hesitate to contact me if you have any questions about this letter.

Sincerely,

dylan.sittig@lacity.org
19 June 2020

Re: ZA-1989-17683-PA2; ENV-2020-1328-EAF

Dear Mr. Sittig,

I am writing on behalf of the South Robertson Neighborhoods Council ("SORO NC") to comment on the Review of Compliance for the West Pico Drill Site, located at 9101 & 9150 W. Pico Blvd, and to request specific changes to the Zoning Administrator ("ZA") assigned conditions of use that govern that Controlled Drill Site.

At a duly-noticed meeting of the General Board on June 18, 2020, SORO NC resolved by a vote to send you this letter.

1. Documented Evidence of Compliance Problems

As you are likely aware, multiple compliance problems have already been documented by reviewing the West Pico Drill Site's Planning Department case files with reference to the 2001 Settlement Agreement and other public documents.

From these public records, we know that the following issues existed:

- **Failure to hold required Five Year Reviews.** No reviews have been conducted since at least 2005-06 as they were not held 2010-11 or 2015-16.
- **Installation of expressly prohibited microturbiness.** Five 200 Kilowatt microturbine electric generators (1 Megawatt total) were installed in 2018-19 with no application to or approval from the ZA, despite the express prohibition of electric generation on site. The operator acknowledges in its current PA Application for this review that it installed one microturbine, but it erroneously claims that microturbines are not prohibited.[1].
- **Drilling of two new wells without ZA approvals.** Two new oil wells, West Pico Well #58 (API # 03726615) and Well #59 (API # 03727133), were drilled in 2005-06 and 2010, respectively, without ZA Approval as required.[2],.
- **Re-drilling of at least one existing well without ZA approval.** At least one existing oil well, HW Well #10 (API # 03721994) was re-drilled in 2004, without ZA Approval.[3]
- **Operator claims that 12 new wells have been drilled at the site since 2003.** Operator's affiliate stated that twelve new wells have been drilled from this location since 2003. While this appears to be an inaccurate statement, it may refer to the re-drilling of existing wells as well as the drilling of two new wells, which fails to reference that all 59 wells have appeared to be operational

[1] See ZA Condition 49 of the 2000 determination in ZA-1989-17683-PAD and in ZA Condition 1 (applying LAMC 13.01.F.43) in the 1965 "mother case" ZA-1965-17683
[2] LAMC 13.01.H and 13.01.I
[3] *Ibid*.

- **All projects undertaken without ZA review are in violation of CEQA.** Each of these projects, including at least one re-drilled well, two newly drilled wells, and the installation of five 200 Kilowatt microturbines required environmental clearance under CEQA, but the operator failed to obtain the necessary ZA approval and wrongly informed CalGEM that no CEQA documents were necessary.

- **Repeated LAFD Notices of Violation for leaving spiled or leaked Petroleum on surfaces..** The LAFD resumed annual inspections of drill sites to monitor compliance in or about 2017. On multiple separate occasions, Fire Safety violations were found as set forth in the attached notices. Said violations were further problematic as they violated the conditions set forth in the prior action related to this drill site.[4]

- **Odor Problems emanating from the drill site.** Numerous neighbors in addition to Council Member Paul Koretz's own personal testimony have complained of petroleum odors around the drill site for past several years. At a committee meeting on October 15, 2019, *Mr. Koretz said, "You can smell the oil. You can taste the oil."*[5]

2. Revised Conditions, ZA Findings, and ZA Orders to Monitor and Enforce Compliance, and to Protect the Environment, Public Health, and Public Safety

There is a clear and long history of non-compliance and nuisance at the West Pico Drill Site, which indicates the need for stronger enforcement mechanisms and stronger protections for the environment, public health, and public safety. We request that the ZA to adopt the following new and modified Conditions of Use, Findings, and Orders to protect public health, safety, and the environment, and ensure future compliance with City law at the West Pico Drill Site.

- **Require Annual Compliance Inspections Led by Petroleum Administrator:** Annual Compliance Inspection to be led by the Office of the Petroleum Administrator, an office that was revived in 2016 for this specific purpose, to ascertain compliance with City Code and ZA-assigned conditions, with copies of the inspection report to be delivered to the ZA and Council District 5 Office.

- **Require Permanent 24/7 Emissions Monitoring:** Installation and continuous operation of 24/7 Emissions Monitoring using up-to-date equipment that records data and has a central alarm connection to an office that is staffed 24/7. The monitoring system equipment must be approved by the Office of the Petroleum Administrator, either by listing the system on a pre-approved list or by review of individual application. Emissions data shall be reported quarterly to the Office of the Petroleum Administrator and the ZA, and both offices shall promptly forward copies of the quarterly data to the Council District 5 Office.

- **Require Recurring Five Year Reviews of Compliance and Conditions by the ZA, as Mandated by the City's 2001 Settlement Agreement:** Amend Condition 78 of the 2000 ZA determination to include the terms of the Settlement Agreement that require recurring Five Year Reviews of Conditions.

- **Finding & Order: Find that the 5 Microturbines Installed in 2018 were Illegally Installed and Order that they Either be Removed or Made the Subject of a Full Application for ZA Review**

[4] See Conditions 46, 47, 57, and 61 of the 2000 determination in ZA-1989-17683-PAD and Condition 1 of the 1965 "mother case" ZA-1965-17683

[5] o Transcript - https://lacity.granicus.com/TranscriptViewer.php?view_id=46&clip_id=19441

Within Six (6) Months. This review shall also be done under CEQA and failure to comply should result in prompt revocation proceedings under LAMC 12.27.1.

- **Finding & Order: Find that Wells Drilled or Re-Drilled since 2003 were Drilled Without ZA Approval and Order that Within 6 Months All Such Wells Made the Subject of a Full Application for ZA Review.** This review shall also be done under CEQA and failure to comply should result in prompt revocation proceedings under LAMC 12.27.1

3) Concerns about Process and Thoroughness in this Review

In February 2020, SORO NC wrote to Chief Zoning Administrator Mailian requesting that the Petroleum Administrator be tasked to conduct a comprehensive compliance inspection and report the results before this Review of Compliance is sent forward to Public Hearing. SORO NC has not received a response, and it appears that no comprehensive compliance inspection is being completed.

We remain concerned that, without a comprehensive compliance inspection before the Public Hearing, the ZA and the public will be deprived of necessary and critical information and we remain concerned that any later report from the Petroleum Administrator to the ZA after the Public Hearing would impinge on the due process rights of all parties.

The evidence presented above demonstrates that in addition to non-compliance with specific mitigation measures imposed by ZA conditions, the operator of the site has conducted multiple major projects without ZA review and therefore without CEQA clearance.

A fresh and new and proper environmental review is needed in this case. The nature of the case (non-compliance and projects undertaken without application) necessitates a comprehensive compliance inspection as the predicate to define the scope of review under CEQA.

Please do not hesitate to contact me if you have any questions about this letter.

Sincerely,

February 21, 2020

Re: Review of Compliance at the West Pico Drill Site

Dear Council Member Koretz, Director Bertoni, Chief Zoning Administrator Mailian, and City Attorney Feuer,

I am writing on behalf of the South Robertson Neighborhoods Council ("SORO NC") to make an urgent request for the West Pico Drill Site to be given a comprehensive compliance inspection by the Petroleum Administrator with the inspection report to be released before the Zoning Administrator (ZA) holds a public hearing in the upcoming ZA Review Compliance.

At a duly-noticed meeting of the General Board on February 20, 2020, SORO NC voted 00 yes / 00 no / 00 abstain to send you this letter of urgent concern and to request that a comprehensive compliance inspection be ordered without delay.

Background: Documented Evidence of Compliance Problems

As you are aware, multiple compliance problems have already been documented by cross-checking the West Pico Drill Site's Planning case files against the 2001 Settlement Agreement and public documents available online from LADBS and SCAQMD.

From these public records, we know that required Five Year Reviews were not held in 2010-11 and 2015-16.

We know that five microturbine electric generators were installed in 2018-19 with no approval from the ZA despite the express prohibition of electric generation on site in ZA condition 49.

These two compliance problems are more widely known to the general public thanks to reporting by the LA Times, which also mentioned an LAFD notice of violation for exposed petroleum or petroleum waste in 2018. There is a second similar LAFD notice of violation from 2017, too.

You have received a copy our stakeholder Rabbi Yonah Bookstein's complaint to SCAQMD, which documents that all of PCEC's permits from SCAQMD for the West Pico Drill Site are listed as "expired" by SCAQMD and, following SCAQMD's very clear rules, should be adjudged void since September 3, 2019 when new ownership bought the operation but failed to transfer the SCAQMD permits. The failure to maintain all necessary permits in good standing violates the ZA's approvals for use of the site, so this SCAQMD problem is also a City compliance problem.

And, although there have been no ZA approvals for the site operator to drill new wells or re-drill/deepen existing wells for more than 20 years, several such operations have been undertaken, proven by CalGEM (formerly DOGGR) records for wells at the drill site. Indeed, PCEC's subsidiary Pacific Coast Royalty Trust claims that "Twelve new wells have been drilled from this location since 2003."
https://www.pacificcoastoiltrust.com/trust_overview/properties

Our stakeholders have not yet reviewed the full DATA files for all 62 wells listed at the site on the CalGEM Well Finder System, but a review of several well records already reveals three drilling projects since 2003:

1. New well drilled in 2010: West Pico Well 59, API # 03727133 https://secure.conservation.ca.gov/WellRecord/037/03727133/03727133_2018-12-07_DATA.pdf
2. New Well drilled in 2005-06: West Pico Well 58 API # API 03726615 https://secure.conservation.ca.gov/WellRecord/037/03726615/03726615_2019-04-17_DATA.pdf
3. Well re-drilled in February-April 2004: HW Well 10API # 03721994 https://secure.conservation.ca.gov/WellRecord/037/03721994/03721994_DATA_2014-08-25.pdf

A full review of all the CALGEM well records might show more drilling operations since 2003, perhaps as many as 12, as PCEC itself proclaims – ***but none of these were approved by the ZA, as plainly required by LAMC 13.01.H Drilling Site Requirements and 13.01.I* Permits.**

Why a Comprehensive Compliance Inspection led by the Petroleum Administrator is Needed Prior to the Public Hearing in the ZA Review

In 2017, the Petroleum Administrator organized and led a comprehensive compliance inspection of the Rancho Park Drill Site pursuant to a directive from City Council (CF 17-0149). That action by Council was prompted by documented evidence of several projects undertaken at that site over a twenty year period without required ZA approvals, including the installation of microturbines and gas engine generators, gas processing equipment, and a large flare to burn gas. That documentary record was assembled the same way that our stakeholders have been assembling the documentary record of compliance problems at the West Pico Drill Site, namely by cross-checking the Planning case files with public records from LADBS, SCAQMD, and DOGGR (now CalGEM). ***When the Petroleum Administrator led an on-site inspection in March 2017, his team found more than twice as many compliance issues than could be ascertained from the documentary record alone.*** The subsequent report on that inspection led to the ZA convening a Review of Compliance.

It is the position of the SORO NC Land Use Committee and of the General Board of SORO NC that the compliance problems at the West Pico Drill Site need to be addressed by the City with at least the same level of attention that the City bestowed on compliance problems at the neighboring Rancho Park Drill Site. Anything less would be unjust and indefensible.

Producing the results of an on-site comprehensive compliance inspection before the holding of the public hearing in the upcoming ZA Review of Compliance is necessary for five major reasons:

1. **An expert inspection report before the hearing is necessary to inform the ZA on technical matters he or she will hear about at the hearing**. Without that report coming in advance of the hearing the ZA would be unprepared and would likely miss the significance of crucial facts to be discussed at the hearing.
2. **An expert inspection report made available for public review before the hearing is absolutely essential for informing the public about compliance on the site.** Without that report, the public has no ability to see inside the site to evaluate compliance problems not evident in publicly available documents.
3. **An expert inspection report made available for review by all parties before the hearing is essential for running a fair hearing that protects everyone's due process rights, including both the site operator's rights**

DRAFT

soro
south robertson
neighborhoods council

and the public's rights. The City has been sued over this very issue when expert reports by the Petroleum Administrator have been provided to the ZA long after the public hearing has passed and just shortly before the ZA rendered a determination. That serves nobody's interests and is a bad practice.

4. **A site inspection by a qualified expert is a standard practice of good government and common sense.** From County Health inspections of restaurants to LADBS inspections of bathroom remodels, LAPD crime scene investigations, LAFD fire prevention inspections and arson investigations, all the way to the City's ordinance requiring annual inspections of billboards, site inspections are such a fundamental necessity and such an ordinary practice that we are shocked that we find ourselves needing to make a case for inspecting an oil drill site in a residential neighborhood.
5. **The so-called "Desk Inspection" of the West Pico Drill Site produced by Petroleum Administrator staff in late 2019 has been proven incomplete and grossly inadequate, so it is clear that the model to follow is that which was done for the Rancho Park Drill Site in the March 2017 on-site inspection and the resultant report issued in April 2017.** Anything less would be beneath the standard for public safety and good governance.

The Authority to Conduct an Inspection of the Drill Site

LAMC 12.26.D provides the authority to inspect "whenever it is necessary . . . or whenever" there is "reasonable cause to believe that" there are violations of the Zoning Code "or other applicable law."

The Superintendent of Building "or his authorized representative," who could be the Petroleum Administrator or could be accompanied by the Petroleum Administrator as per Administrative Code 19.48, "is hereby authorized to enter such property at any reasonable time and to inspect the same."

There is more than "reasonable cause to believe that" there are violations of the Zoning Code, and there is obvious necessity for an inspection to inform the ZA's Review of Compliance, to inform the public, to protect due process rights, and to meet the needs of good governance and common sense.

The Zoning Code thus empowers the Director of Planning and the ZA to ask the Superintendent of Building to inspect. Because evaluating compliance at oil drill sites requires specialized knowledge that LADBS staff do not possess, the proper step is for Planning and the Superintendent of Building to direct the Petroleum Administrator to lead the inspection of the site. This is expressly provided for in the Administrative Code and it is one of the principal reasons there is a Petroleum Administrator.

It should be noted, too that Section 19.48 (a) also gives the Petroleum Administrator the duty to "obtain requested technical advice," so that if the Petroleum Administrator and Board of Public Works believe it is necessary to hire outside professionals on contract to perform some parts of the inspection, that general practice is already authorized by the City Code (alongside all other rules and processes governing contracts).

The fact that the Petroleum Administrator successfully and effectively inspected the Rancho Park Drill Site in 2017 proves that it can be done, and that it can be completed in two months or less.

DRAFT

We hope that you will respond to us with an explanation of how you will handle this matter so as to protect public safety and demonstrate good governance.

Please do not hesitate to contact me if you have any questions about this letter.

Sincerely,

Krystal Návar

Public Records Act Request & comments Re: request to see the case file for ZA-1989-17683-PA2 & ENV-2020-1328-CE

Michael Salman <salman@history.ucla.edu> Mon, Jun 29, 2020 at 6:06 PM
To: Dylan Sittig <dylan.sittig@lacity.org>
Cc: Edber Macedo <edber.macedo@lacity.org>, Estineh Mailian <estineh.mailian@lacity.org>, vince.bertoni@lacity.org, lisa.webber@lacity.org

Dear Dylan

This afternoon I received an email from Bryan Walker with 4 pdf files and this message: "Attached are the complete case material documents for both ZA-1989-17683-PA2 and ENV-2020-1328-EAF for your review. Thank you. "

Thank you for this prompt response, especially under the extraordinary work conditions of the public health emergency.

I am writing to convey two concerns, **the second of which I will frame in the form of a Public Records Request**.

There are also other significant issues in these documents that I hope we will have a chance to discuss soon.

In emails to Mr. Bertoni, Ms. Webber, and Ms. Mailian I have proposed and requested a meeting with them, to also be attended by PCEC's representative Mike Finch. I know from Mr. Finch that he would be amenable to such a meeting. But I have not received a response from Planning to my requests for this meeting.

Here are the two concerns I wish to raise now:

1) Organization of the case file and completeness of the case file:

- Correspondence concerning the case is split between the "left side" and "right side" pdf files, and hence between the left and right sides of the physical file.
- Correspondence from the public is not in chronological order of receipt, and thus appears jumbled, with related correspondence from close to the same date separated by correspondence from weeks later that addresses other topics. In my experience, it is common to arranged correspondence chronologically by descending date.
- Similarly, the materials from PCEC are in two pdf files and thus in two locations in the physical file, and these are also not fully chronological.
- Notices of Violation from regulatory agencies are in scattered places: the EAF file, the Pocket, and the right side.
    - On the EAF, it appears you made a note that Notices of Violation needed to be included in the EAF, and then some LAFD Notices were included, but not all the LAFD Notices, and not the SCAQMD Notices that are filed elsewhere only - it would be easy for the ZA not to have a clear view of this record.
- My concern here is about making the file more legible for the ZA
- In addition, the record of past ZA approvals is critical in this case. I have reviewed the historical case file in City records (1965 to present), much of which is also in the OPNGAS "desk inspection" from November 2019. The whole prior case record should be made part of the current case file. At minimum, it is absolutely critical that the following cases be included in the case file for the ZA to review:
    - ZA-1965-17683 (mother case that established one single integrated Controlled Drill Site across two City blocks).
    - ZA-1967-18893 (continued to treat as one integrated Controlled Drill Site as did all cases until 2000 & approved expansion of the processing half located at 9151 W Pico)
    - ZA-1967-18191 (authorized drilling of first wells from site that would bottom under Beverly Hills)
    - ZA-1969-17683 (approved expansion of the well cellar but not the drilling of new wells to fill the slots in the cellar)
    - ZA-1972-20869 (one of several cases from 1969-1979 that approved specific numbers of additional new wells, proving that ZA-1969-17683 approved the expanded cellar but not any new wells)
    - ZV-79-137-O (from June 29, 1979, the last case on Planning's own Chronology of Cases in which a new well was approved or any new drilling or re-drilling was approved)
    - ZA-1989-17683 (a Review of Conditions that addressed years of complaints).
    - EIR 98-0149-PA (the EIR for the project proposed in 1998 and approved in 2000, which subsequently went to court - critical for seeing that this current review is of an entirely different set of projects and operations not considered in that two decade old EIR)
    - ZA-1989-17683-PAD is already in the case file

- 2001 Settlement Agreement is already there
- Any supplement or addendum to the EIR after the Settlement changed mitigations and the MMRP, but I saw no such documents in the case file at City Records.
- ZA-1989-17683-PA1 (the Review from 2005-06) is already in the case file.

2) Public Records Act Request Concerning the Decision to Bring the Case to Hearing with a Proposed Categorical Exemption from CEQA under Class 9 and Class 21, as Indicated on the Hearing Notice, and Comment on the Inappropriate of these Exemptions

The Hearing Notices lists a CEQA case number, ENV-2020-1328-CE, and the Notice states:

> REQUESTED ACTION(S): The Zoning Administrator shall consider:
> 1. An Exemption from the California Environmental Quality Act (CEQA) pursuant to CEQA Guidelines Section 15309 (Class 9) and Section 15321 (Class 21).

There is nothing in the case file that speaks to this proposal or the decision to bring the case to hearing with a Categorical Exemption under Classes 9 & 21..

I am requesting, as per the Public Records Act, that I please be given access to all paperwork, emails, letters, memos, reports, proposals, and written discussions or analyses of the proposed Categorical Exemption in this case, by any Planning staff members involved in the environmental clearance process in this case and by any officers of Planning involved in the environmental clearance process in this case.

In addition to my prior indication of the obvious clash of the proposed Categorical Exemption with ZA Memo 133 when it comes to any Review that considers the drilling, re-drilling, and/or conversion of wells -- as this review must grapple with 24 such well projects -- I want to point to another glaring clash that is presented on the Hearing Notice itself.

A Class 9 Categorical Exemption can be given in a proceeding that is entirely for the purpose of inspection. But this Review is not an "inspection" at all, and it is certainly "not limited entirely to inspections." Here is the definition of a Class 9 exemption from the CEQA Guidelines:

> 15309. INSPECTIONS Class 9 consists of activities limited entirely to inspections, to check for performance of an operation, or quality, health, or safety of a project, including related activities such as inspection for possible mislabeling, misrepresentation, or adulteration of products. Note: Authority cited: Section 21083, Public Resources Code; Reference: Section 21084, Public Resources Code.

A Class 21 Categorical Exemption can be given for enforcement activities, typified by revocation, but this review is not a revocation proceeding (which would be governed by LAMC 12.27.1)

> 15321. ENFORCEMENT ACTIONS BY REGULATORY AGENCIES Class 21 consists of: (a) Actions by regulatory agencies to enforce or revoke a lease, permit, license, certificate, or other entitlement for use issued, adopted, or prescribed by the regulatory agency or enforcement of a law, general rule, standard, or objective, administered or adopted by the regulatory agency. Such actions include, but are not limited to, the following: (1) The direct referral of a violation of lease, permit, license, certificate, or entitlement for use or of a general rule, standard, or objective to the Attorney General, District Attorney, or City Attorney as appropriate, for judicial enforcement; (2) The adoption of an administrative decision or order enforcing or revoking the lease, permit, license, certificate, or entitlement for use or enforcing the general rule, standard, or objective. (b) Law enforcement activities by peace officers acting under any law that provides a criminal sanction; (c) Construction activities undertaken by the public agency taking the enforcement or revocation action are not included in this exemption. Note: Authority cited: Section 21083, Public Resources Code; Reference: Section 21084, Public Resources Code.

What is on the table in this review, according to the Hearing Notice itself, is a consideration of conditions, i.e., mitigation measures. The Hearing Notice says, "The Zoning Administrator may impose corrective conditions if warranted."

Evaluating mitigation measures and their need triggers the procedural and substantive requirements set by CEQA.

This case is not "limited entirely to inspections," nor is it a revocation case. Class 9 and Class 21 Categorical Exemptions are entirely inappropriate.

The Court of Appeals decision that upheld ZA Memo 133 in 2019 turned, in part, on the continuing power of the ZA authorized by LAMC 13.01.E.2.i to modify conditions at oil drill sites as experience or observation demonstrated the need, as well as by the authorization under LAMC 13.01 to establish or modify conditions for projects at Controlled Drill Site requiring approval.

Condition 78 of ZA-1989-17683-PAD sets the procedure for this review, as per the expanded terms of the 2001 Settlement Agreement, calling for the assessment of the "effectiveness" of conditions, the evaluation of "neighborhood impacts," and an analysis of "the efficacy of mitigation measures." That is not a mere inspection, nor is it a revocation proceeding. It is the heart of what environmental review under CEQA is about.

Bringing this case to hearing without even an Initial Study, let alone without a draft MND or draft EIR that assesses mitigation measures, is starkly inappropriate.

Yours,

Michael Salman

Case No.	ZA-1989-17683-PA2
CEQA No.	ENV-2020-1328-CE
Held By:	Associate Zoning Administrator
Date:	**July 9, 2020**
Time:	**9:00 a.m.**
Place:	In conformity with the Governor's Executive Order N-29-20 (March 17, 2020) and due to concerns over COVID-19, the Office of Zoning Administration Public Hearing will be conducted entirely telephonically.

Hello Mike,

Thank you for the email and the response to the hold letter. It has been received and will be reviewed in the next few days.

I have a few project updates for you. First, we are looking at a tentative hearing date of July 9th at 9am. We need to finalize that date soon in order to meet notification requirements. If this date presents an issue for your team's participation, please let me know as soon as possible (on Monday if possible). As I mentioned on the phone yesterday, the hearing would be conducted telephonically. This will allow for the same public participation as normal Zoning Administrator hearings. We began conducting hearings over the phone a few weeks ago and will have conducted well over 100 hearings over the phone by July 9th. For more information, please see the information compiled on this website about the telephonic hearings. There will most likely not be a decision made at the hearing and instead it would serve as an opportunity to hear from members of the public. Please let me know if the date presents an issue.

Second, you mentioned on the phone that you would be willing to host a site visit for us as a part of the review. After some internal discussions, we believe that would be beneficial to our review. We would want to work with you to respect any procedures you have in place regarding COVID-19, thus we are wondering if you have any special protocols we should be aware of, including a maximum capacity for the visit. Maybe we could look to have the site visit during the week of June 15th or 22nd; are there a few dates and times that would work for you within that period?

Thank you and please have a nice weekend.

Sincerely,
Dylan

Dylan, thank for the response. As to the hearing we are discussing with our group to make sure the right individuals can attend. We need another day or so. As to the site visit, either of those days work. As for our protocols, we suggest following the City guidance on face masks and also the CDC guidance on social distancing. I suspect we could have 6-8 people in the facility and meet these guidelines. Please let us know what works for you.

Thanks

Mike Finch

Hi Mike,

Please let me know today, if possible, if you and your team will be able to attend a July 9th hearing date. I do apologize for the last minute request.

I will ask our team about the two dates for a site visit and will ensure that we limit our group size to be safe.

Thank you,
Dylan

Dylan, yes we are fine with the July 9th date.

On another note, can you/ us invite the Petroleum Administration to the site visit. We would like to familiarize them with the facility as well. I think it would be helpful to get some input from them. Your thoughts?

Hi Michael,

That's great. Thank you for confirming the hearing date.

Thank you for bringing up the Petroleum Administrator. We agree that they should accompany Planning on the upcoming site visit. We can reach out and coordinate with their office. We are also planning to extend the invitation to our City colleagues at the Building and Safety Department and Fire Department. While keeping in mind the limits on the group size.

I hope to get back to you in the next few days more about the site visit as we continue to coordinate.

Thank you,
Dylan

Hello Mike,

I hope that you are well. The morning of June 22nd will work best for the Zoning and Petroleum Administrators for the site visit. Would meeting on site at 9:30am on June 22nd work for your team?

Secondly, the attached hearing notice will be mailed out to the 1500ft radius by Monday. The Council Office has been provided with the notice. We will be notifying interested parties who have already submitted comments to us about the hearing over email later this afternoon.

Please let me know about the date and time for the site visit.

Sincerely,
Dylan

Hello,

I want to confirm with you the site visit schedules for Monday at 9:30am. The City will bring three staff from Planning's Office of Zoning Administration, three or four staff from the Petroleum Office, and it is my understanding that Fire Chief Hayden will be in attendance but he might not be able to make it.

Is there a phone number that we should call if staff are running late or can't find the front door? (Just as a contingency)

Thank you and have a nice weekend and I hope that the site visit goes well on Monday.

Sincerely,
Dylan

Dylan, we would normally require PPE. This includes steel toe boots/ shoes, hard hat, safety glasses, hearing protection, and gloves. We can provide everything but the shoes. We will allow no steel toe boots/ shoes for the visit, but make sure everyone has shoes that are appropriate for the site. No heals, etc. There is not a lot of activity at the site so we are comfortable that everyone will be safe.

Thanks

Mike Finch

Re: ZA-1989-17683-PA2

Dear Mr. Bertoni, Ms. Webber, and Ms. Mailian,

I have been in detailed communication with PCEC about the West Pico Drill Site. I am acting as representative for Richard Weiner and Dr. Rae Drazin, officers of NASE, the organization that is party to the 2001 Settlement Agreement with the City and the operators, as well as acting as a citizen of Los Angeles in my own right.

PCEC and I have identified exactly the same list of projects that require retroactive review. We have also had substantial conversations about solutions to other outstanding issues and problems. I am confident that a consensus or near consensus solution is readily within reach. Getting to those solutions requires a full and proper review of the 25 unapproved projects and would be supported by a joint meeting of myself and PCEC's representative Mike Finch with the Chief ZA and the Director or Assistant Director, as I proposed last week.

Meanwhile, I believe it would be helpful to review a few short passages from LAMC 13.01 that are relevant to this case, to make sure we have all looked at the code requirements that speak to this case.

13.01.H & I:

Do 2 new well projects, 12 redrilled well projects, and 10 well conversion projects executed between 2000 and 2020 require ZA review and approval?

The answer is clearly yes.

There should not be any confusion about whether the Code has changed during the time period in question. It has not.

Please note that LAMC 13.01.H was last amended on October 10, 2000, and LAMC 13.01.I was last amended on July 1, 2000.

> **H. Drilling Site Requirements**. Any person desiring to drill, deepen or maintain an oil well in an oil drilling district that has been established by ordinance, or to drill or deepen and subsequently maintain an oil well in the M3 Zone within 500 feet of a more restrictive zone shall file an application in the Department of City Planning on a form provided by the Department, requesting a determination of the conditions under which the operations may be conducted. **(Para. Amended by Ord. No. 173,492, Eff. 10/10/00.)**
>
> **I. Permits. (Amended by Ord. No. 173,268, Eff. 7/1/00, Oper. 7/1/00.)** No person shall drill, deepen or maintain an oil well or convert an oil well from one class to the other and no permits shall be issued for that use, until a determination has been made by the Zoning Administrator or Area Planning Commission pursuant to the procedure prescribed in Subsection H of this section.

13.01.E.2.b:

If the processing equipment on the block located at 9151 W Pico is not part of a single unified and integrated Controlled Drill Site under review by terms of the Settlement Agreement, then what is the site located at 9151 W Pico and how would it not be illegal under the LAMC?

A single Controlled Drill Site was approved by ZA-1965-17683 in 1965. That site stretched over two City blocks, but it was one integrated Controlled Drill Site, as per the LAMC.

Planning now seems to be saying it is not a single Controlled Drill Site. That produces some serious problems that stretch from the LAMC to CEQA. I will stick to the LAMC here.

LAMC 13.01.E.2.b sets out rules for establishing a Controlled Drill Site:

> 2. **Urbanized Areas** – Each oil drilling district established in an urbanized area shall he subject to the following conditions:
>
> (a) Each district shall be not less than 40 acres in area, including all streets, ways and alleys within the boundaries thereof.
>
> (b) **(Amended by Ord. No. 173,268, Eff. 7/1/00, Oper. 7/1/00.)** Not more than one controlled drill site shall be permitted for each 40 acres in any district and that site shall not be larger than two acres when used to develop a district approximating the minimum size; provided, however, that where the site is to be used for the development of larger oil drilling districts or where the Zoning Administrator requires that more than one oil drilling district be developed from one controlled drilling site, the site may be increased, at the discretion of the Zoning Administrator when concurred in by the Board of Fire Commissioners, by not more than two acres for each 40 acres included in the district or districts.

The restriction to no more than one controlled drill site for each 40 acres in a drilling district has been part of the LAMC since 1945. The West Pico Drill Site was established in Drilling District U-131. The "mother case," ZA-1965-17683, states that U-131 is a 70 acre district. Only one Controlled Drill Site is allowed. Only one Controlled Drill Site has been approved.

The definition of a Controlled Drill Site has remained essentially the same since 1945, too. LAMC 13.01.B says:

> **B. Definitions** – For the purpose of this section the following words and phrases are defined:
>
> **"Controlled Drilling Site"** shall mean that particular location within an oil drilling district in an "**Urbanized Area**" upon which surface operations for the drilling, deepening or operation of an oil well or any incidental operation are permitted under the terms of this section, subject to the conditions prescribed by written determination by the Zoning Administrator. **(Amended by Ord. No. 173,268, Eff. 7/1/00, Oper. 7/1/00.)**

The phrase "any incidental operation" covers all related processing activities, and this is reflected in the "mother case" from 1965 that established the Controlled Drill Site.

LAMC 13.01.E.2.d & g further elucidate the way "drilling and production operations" are covered together by LAMC 13.01, requiring approvals as per 13.01.H (and also 13.01.I), all making clear that properly approved Controlled Drill Sites are the only entities on which these activities are allowed:

> (d) **(Amended by Ord. No. 173,268, Eff. 7/1/00, Oper. 7/1/00.)** Each applicant, requesting a determination by the Zoning Administrator prescribing the conditions controlling drilling and

production operations, as provided in Subsection H of this section, must have proprietary or contractual authority to drill for oil under the surface of at least 75 percent of the property in the district to be explored.

(g) **(Amended by Ord. No. 173,268, Eff. 7/1/00, Oper. 7/1/00.)** Each applicant, requesting a determination by a Zoning Administrator prescribing the conditions controlling drilling and production operations, as provided in Subsection H of this section, shall post in the Office of Zoning Administration a satisfactory corporate surety bond (to be approved by the City Attorney and duplicates to be furnished to him or her) in the sum of $5,000 in favor of the City of Los Angeles, conditioned upon the performance by the applicant of all of the conditions, provisions, restrictions and requirements of this section, and all additional conditions, restrictions or requirements determined and prescribed by a Zoning Administrator. No extension of time that may be granted by a Zoning Administrator or any change or specifications or requirements that may be approved or required by him or her or by any other officer or department of the City or any other alteration, modification of waiver affecting any of the obligations of the grantee made by any City authority or by any other power or authority whatsoever shall be deemed to exonerate either the grantee or the surety on any bond posted pursuant to this section.

If the processing operations located at 9151 W Pico (where the microturbines were installed) are not part of the Controlled Drill Site under review now, then what is that second site?

And what basis is there in the code for oil and gas processing operations at that second site?

It cannot be a second Controlled Drill Site, because a second such site is prohibited by Code and there has been no approval for a second site. But there is no other kind of allowed land use to permit those processing operations, except for the provisions of LAMC 13.01 for Controlled Drill Sites.

If Planning insists that the processing operations at 9151 W Pico are not part of the Controlled Drill Site under review, then Planning is erasing the legal basis for those operations.

The processing operations at 9151 W Pico include oil/gas/water separation of the slurry pumped up from the wells, the redirection of the produced water back to injection wells, and the redirection of the oil and gas to other processing equipment preparatory to sending the oil and gas off the site via pipelines. Without those processing activities, the wells located at 9101 W Pico cannot operate. Thus, if Planning does not treat the two parcels as part of a single integrated unit approved under LAMC 13.01.E.2.b and LAMC 13.01.H, then it will be pulling the plug on both halves because of Planning's own errors.

The obvious solution is to treat the West Pico Drill Site as an integrated unit, as per the LAMC, and clean up the approval problems and errors that have unfortunately proliferated since the 2000 determination.

Fixing the problems would be relatively easy if we could look at them together.

Edber, per our conversation here is our thoughts on the items we discussed.

PCEC was recently contacted by a member of the public and several issues and outstanding questions have been brought to our attention, including (1) whether the wells that have been drilled, re-drilled, and/or converted since the 2000 ZA approval required further ZA approval under LAMC 13.01H and 13.01I; (2) whether activities such as drilling, re-drilling, and/or converting wells underwent adequate CEQA review as part of the EIR process for the 2000 ZA approval; and (3) whether Condition #1 of the 1965 ZA 17683 and Condition #B-49 of the 2000 ZAD 17683 need to be modified to reflect that onsite generation of power is occurring on the production site.

With regard to the first issue, after reviewing our well files, and the 2000 ZA determination, it is clear that certain wells have been drilled, re-drilled and converted since that approval – see "Well List" below. In light of LAMC 13.01H and 13.01I, a question has surfaced regarding whether these well activities required further authorization or approval by the ZA. We have not seen any approvals by the ZA and our conclusion is that applications were likely never submitted to the City. We believe this was because of Condition 72 of the 2000 ZAD 17683 determination which states in part *"Without prior written approval from the Zoning Administrator, no more than the existing 69 wells may be drilled, operated or maintained at the site and these wells shall be located at their current surface locations."* This condition suggests that the 2000 ZA approval covered a total of 69 wells and, provided the facility did not exceed the 69 wells, no further ZA approvals for drilling and redrilling were required. However, it appears the facility may not have had 69 existing wells at the time of the determination. This may have been a misunderstanding during the determination between well "slots" vs actual wells. In any event, a question now exists regarding whether the wells that have been drilled, re-drilled, and/or converted since the 2000 ZA approval required further ZA review and approval pursuant to LAMC 13.01H and 13.01I.

A follow along question concerns the scope of environmental review done for the 2000 approval and whether the review covered specific well activities. It's been suggested that as part of the 2000 approval (drill site modernization project) the activity of drilling, redrilling, and converting wells may not have been covered as part of the EIR process. Rather, the 2000 approval covered only construction of the perimeter walls and a permanent derrick, not drilling or well conversions, because apparently these activities were not part of the project description. If this is accurate, a question now exists regarding the adequacy of the currently proposed Categorical Exemption, and whether additional environmental review should be conducted to cover not only past well activities, but also those that are likely to occur in the future.

The last item is the installation of the microturbine. PCEC identified the installation of the microturbine in its February 2020 application to the City. This installation occurred in 2018 and PCEC obtained a SCAQMD permit, LA building permit, and a LA DWP permit. The 1965 ZA 17683 case Condition #1 included a provision, among others, requiring the project to comply with LAMC 13.01F(b)43.

13.01F(b)43 provides:

That drilling, pumping and other power operations shall at all times be carried on only by electrical power and that such power shall not be generated on the controlled drilling site or in the district.

In addition, 2000 ZAD 17683*Condition B-49* provides:

All Electric Power. All drilling and reworking operations at the site shall at all times be carried on only by electric power and such power shall not be generated on the controlled drilling site or in the district.

The 2000 ZAD 17683 Condition B-49 seems to suggest that power generation cannot happen at the controlled drill site or in the district for drilling and reworking operations, therefore the implication would be that this condition would not be applicable to the production operations.

The facility has two separate power meters. One is dedicated to the drill site and the other the production site. The microturbine is dedicated to the production site only. A question now exists whether Condition #1 of the 1965 ZA 17683 and Condition #B-49 of the 2000 ZAD 17683 need to be modified to reflect that onsite generation of power is occurring on the production site.

PCEC is working with historical documents and realize the City may have more insight. We are asking if the wells drilled, re-drilled, and converted since 2000 required a permit under 13.01H and 1301I? Also, did activities such as drilling, re-drilling, and/or converting wells undergo adequate CEQA review as part of the EIR process for the 2000 ZA approval, or is further review now required? Finally, does Condition #1 of the 1965 ZA 17683 and condition #B-49 of the 2000 ZAD 17683 need to be modified to reflect that onsite generation of power is occurring on the production site. If the answers to any of these questions is yes, then we would like to meet to discuss and decide how to address and reconcile these issues as part of the current process. We look forward to any guidance you can give us.

Thank you

Well List

New Drills

Dear Ms. Mailian, Mr. Bertoni, and Ms. Webber

Please see the attached letter concerning ZA-1989-17683-PA2 & ENV-2020-1328-CE, the Review of the West Pico Drill Site.

The letter describes 25 unapproved major projects at the site since 2000: 2 new wells, 12 re-drilled wells, 10 well conversions, and the microturbine installation. I have discussed the documentation substantiating this with PCEC, the site operator, and we have discussed ways to solve problems.

I propose:

1) That these projects need retroactive review now, in the current review.

2) That a telephone or zoom meeting with you and PCEC could prove helpful. I would participate as representative for Richard Weiner, Dr. Rae Drazin, and NASE, as well as an interested party in my own right.

The letter also walks through the requirements of the LAMC, conditional use approvals on the site, the Settlement Agreement, CEQA, and ZA Memo 133 to establish that a proper review is necessary and the current review is the time to do it.

There is a path forward for a productive solution.

Yours

Michael Salman

Re: ZA-1989-17683-PA2; ENV-2020-1328-CE

Dear Director Bertoni, Assistant Director Webber, and Chief ZA Mailian,

I am in receipt of the Public Hearing notice for this case, which states that a Categorical Exemption from CEQA requirements is being granted.

Since my last correspondence, I have completed my review of the CalGEM well DATA files for all 60 wells that have existed at the West Pico Drill Site (3 have been plugged, so today there are 57 open wells). I have also in the past two weeks had extensive conversations with the site operator, PCEC, about those records. Here is what is in the records:

Since the 2000 ZA determination in ZA-1989-17683-PAD -- which did not approve any well operations covered by LAMC 13.01.H and LAMC 13.01.I, and did not approve microturbines or remove the prohibition against electric generation anywhere on either half of the Controlled Drill Site as well as anywhere in the Oil Drilling District – there have been at least 25 major projects executed without required review by the ZA and without required clearance under CEQA.

Here is a list:

- **2 new wells have been drilled** (WP58, WP59)
- **12 re-drilling projects completed** (OW8 twice, PW9, WP10, WP11, WP18, WP21, WP34, WP41, WP45, RW2, HW10)
- **10 wells have been converted between producers and injectors, or vice versa** (WP11, WP22 twice, WP26, WP29, SW7, WP42 twice, WP44, HW10)
- **5 200KW microturbines were installed, contrary to express prohibition, counting as one project because installed at one time as a 1 Megawatt group (Capstone 1000 unit)**

None of these projects were ever reviewed or approved by the ZA, despite the clear requirements of LAMC 13.01.H and 13.01.I and the requirements of the conditional use approvals governing the site. None of these projects received environmental clearance, as required by CEQA.

CalGEM records that document all of the well projects are readily available online in the DATA files for each well, accessible via CalGEM's Well Search database. The records include applications for permits, permits, and finely detailed daily work histories that are submitted after project completion.

These records have a high degree of reliability, accuracy, and completeness because CalGEM does inspections and levies fines on operators for violations, including failure to submit required reports.

OPNGAS must know how to access these publicly available records. I would be happy to show Planning Department staff how to access and identify the records, and can do so in a one hour Zoom-based tutorial for free as a public service.

PCEC and I have looked at the same set of records, examined the problems, and discussed ways to solve the problems.

Retroactive ZA review of these projects, with proper CEQA review and a proper updating of mitigation measures is the clear path to a consensus or near-consensus solution.

I propose that the Chief ZA and perhaps the Director's office host a meeting with PCEC and myself (as representative for Richard Weiner, Dr. Rae Drazin, and NASE), to discuss a path forward.

The last new well approved by the ZA was approved in 1979. The 1969 approval to expand the well cellar approved only the cellar, not wells to fill the cellar's capacity. After the expansion of the well cellar, the operator returned to the ZA to request approvals for increments of new wells throughout the 1970's because the law has been clear since February 1945: new wells, re-drilled wells, and conversion of wells requires ZA approval before commencing the activity. Any unutilized approval for wells from before 2000 would have elapsed and expired long ago. Condition 1 of the 1965 "mother case" set an expiration clock of 90 days for drilling approvals, and LAMC 12.25 has long set a 3 year expiration clock for ZA approvals in general if another time limit does not apply. The 2000 approval covered only the construction of perimeter walls and a permanent derrick, not well drilling or well conversions, which were not part of the proposed project.

Several of the well re-drilling projects and well conversions were done in 2000 and 2005-06, at the same time that ZA-1989-17683-PAD and ZA-1989-17683-PA1, respectively, were open cases on the ZA's desk. In neither case were any re-drilling or conversion projects proposed or part of the ZA's review. In both instances the ZA apparently knew nothing about these projects because there were no compliance inspections and no trained experts advising the ZA on how to see what was under their noses. Furthermore, the ZA in the 2000 case did not know how many wells existed at the site, could not distinguish between a well cellar and a well, and no one caught these and other errors.

LAMC 13.01.H and 13.01.I make it clear that all new wells, re-drilled wells, and well conversions require ZA approval. There is no exemption for a failure to submit an application, nor an exemption because the City did not pay attention for decades.

Likewise, CEQA does not provide an exemption for the failure to apply to the local lead agency for legally required approvals that trigger the need for environmental clearance.

Non-compliance does not give an operator or the City a get-out-of-jail-free card. ZA approval under 13.01 and the terms of conditional use approvals are still required, and proper implementation of CEQA is still required.

LAMC 13.01 and all of the conditional use approvals for the site require compliance. These are legal requirements to protect public health and safety, not mere suggestions to ignore at whim.

Condition 77 of the 2000 approval provides that the "Zoning Administrator may impose additional conditions or require corrective measures to be taken if he finds, after actual observation or experience with drilling one or more of the wells in the district, that additional conditions are necessary." This is exactly the same language contained in LAMC 13.01.E.2.i, except for the code's better gender equality: "Zoning Administrator may impose additional

conditions or require corrective measures to be taken if he or she finds, after actual observation or experience with drilling one or more of the wells in the district, that additional conditions are necessary."

Finding No 6 of the 2000 approval states:

"Considering the solidly developed residential lots . . . northerly of the subject site and the close proximity of the densely developed residential section and adjacent built-up commercial area, ***all features of oil drilling, well maintenance and production must continue to be strictly controlled."***

The 1965 "mother case," which still applies to the processing half of the drill site, uses the same fundamental language: ***"all features of oil drilling and production must be strictly controlled."*** This language appears in all of the "mother cases" that established drill sites in the 1950s and 1960s, and it is a promise to the public that City officials have reiterated on other occasions, too.

Condition 78 of the 2000 approval set a procedure to hold a "Review of Conditions" two years after the completion of the project authorized by the 2000 approval. That review would include ZA contact with "all monitoring agencies," which included DOGGR (now CalGEM) and SCAQMD as well as City agencies. The review would "evaluate the neighborhood impacts of project operations and the efficacy of mitigation measures." Non-compliance with State law, State regulations, City law, and ZA assigned conditions would obviously be pertinent to an evaluation of the efficacy of mitigation measures. Condition 78 also reiterated the power of the ZA to "impose corrective conditions if warranted."

After the 1999 EIR and 2000 ZA approval were successfully challenged in court, the City entered into a Settlement Agreement in 2001 that revised some mitigation measures, added new mitigation measures, and also added new elements to the Mitigation Monitoring and Reporting Program. State law is clear that these changes needed to be written into an addendum to the 1999 EIR and into a new or supplemental ZA approval for the site, but Planning failed to take these steps despite clear knowledge that they were required by law.

Here, for example, is a discussion of the State law from a different EIR processed by the Los Angeles Department of City Planning:

> Section 21081.6 of the Public Resources Code and Section 15097 of the CEQA Guidelines require adoption of a Mitigation Monitoring or Reporting Program (MMRP) for all projects for which an Environmental Impact Report (EIR) or Mitigated Negative Declaration (MND) has been prepared. This requirement was originally mandated by Assembly Bill (AB) 3180 which was enacted on January 1, 1989 to ensure the implementation of all mitigation measures adopted through the California Environmental Quality Act (CEQA) process. Specifically, Section 21081.6 of the Public Resources Code states that "…the agency shall adopt a reporting or monitoring program for the changes made to the project or conditions of project approval, adopted in order to mitigate or avoid significant effects on the environment…[and that the program]…shall be designed to ensure compliance during project implementation."

The 2001 Settlement Agreement, to which the City was a principal party, made changes to the conditions of project approval that included both mitigation measures and mitigation monitoring and reporting requirements. The City failed to incorporate these into the final EIR and the ZA

approval, and then the City failed to implement at least one of the critical measures required by the Settlement Agreement – namely, the recurring Five Year Reviews of Conditions.

Item 4.b of the Settlement Agreement revised Condition 78 of the 2000 ZA approval by expanding the scope of the two-year post-project review to include the results of an air quality and "Risk Assessment" study that would examine all air emissions from the "facility," and not just the new project approved by the original 2000 ZA approval. ***And then item 4.b also required the holding of regular Five Year Reviews after the two-year post-project review, "pursuant to the procedure described in Condition No. 78 and the Zoning Administrator will conduct a Review of Conditions as prescribed in Condition No. 78."***

Please remember that Condition 78 mandated a check with "all monitoring agencies," an evaluation of the "efficacy of mitigation measures," and the "imposition of corrective conditions if warranted."

Today the OPNGAS (the Petroleum Administrator) is one of the "monitoring agencies," and checking with all the monitoring agencies is exactly the kind of comprehensive compliance inspection that Uduak Ntuk supervised at the Rancho Park Drill Site in 2017.

LAMC 13.01, CEQA, ZA Memo 133, the ZA conditional use approvals from 1965 and 2000 (and all those in between), and the Settlement Agreement all require compliance. There is no loophole for the City to say it has no responsibility and no authority to review major executed projects because they were not proposed. The 2019 Court of Appeals ruling upholding ZA Memo 133 clearly turned on the Court's detailed discussion of these duties and powers embedded in CEQA and the LAMC.

City law and State law is not a bright digital billboard lit up to encourage non-compliance.

What that means is that 1) the City needs to review the unapproved projects, 2) such a review must go through the CEQA process, 3) a Categorical Exemption is expressly forbidden by ZA Memo 133 and by the fact that mitigation measures always adhere to drilling approvals, 4) ergo, at least an Initial Study and an MND need to be produced before this case can go to hearing.

If the City tries to say, "but this is just a Review of Compliance, not a review of any projects," then that is proof that the City is pretending not to see violations (by the City as well as the site operators) that have been in open broad daylight, and proven beyond the shadow of a doubt. This would make a mockery of City and State law, and far from ending the case would only make it worse.

There is no escape from the need to review these projects properly. So why not start now?

Yours

Michael Salman

ZA-1989-17683-PA2: Review of West Pico Drill Site

Michael Salman <salman@history.ucla.edu> Thu, Jun 11, 2020 at 5:42 PM
To: Estineh Mailian <estineh.mailian@lacity.org>
Cc: rae@md-advocate.net, Rabbi Yonah Bookstein <rabbiyonah@gmail.com>, krystalnavar@soronc.org, Edber Macedo <edber.macedo@lacity.org>, Vanessa Soto <vanessa.soto@lacity.org>, Dylan Sittig <dylan.sittig@lacity.org>

Dear Ms. Mailian,

Thank you for your email response of June 8.

I have taken a couple of days before replying because I have had several telephone conferences with PCEC this week, following on an initial long conversation with PCEC VP Phil Brown last week.

Your description of the general process in and after the public hearing is standard, except of course for the circumstances of the pandemic that require any hearing now to be conducted remotely.

I was glad to hear from you that Planning is arranging a site visit. As you know, I strongly recommend that the Petroleum Administrator (or their designated staff representative) be included in the site visit. They are the City's resident subject matter expert, with expertise about oil operations that is different from and wider than the specialized fire code related expertise of LAFD inspectors. LADBS has not had specialists in this subject area for a very long time, and being able to recognize different pieces of equipment, proper configurations, and proper operating condition is critical to checking compliance with City rules and ZA conditions.

The Petroleum Administrator is also tasked by the Administrative Code (19.48.i) to "coordinate all matters respecting or concerning the exploration for, or production of, Petroleum within the City," so the Petroleum Administrator is at the center of inter-agency coordination.

As you also know, I have been pleading to please have the Petroleum Administrator conduct an inspection before the Review of Compliance goes to hearing so that the full scope of the Review can be estimated so as to enable proper implementation of CEQA.

Yesterday I received a copy of the Notice of Public Hearing for the Review of Compliance, and was startled to see that a Categorical Exemption to environmental review has been proposed. I must respond to that. It is expressly in conflict with ZA Memo 133, which sets Planning's own procedures for handling CEQA in oil cases.

You have seen the indisputable evidence that new wells were drilled in 2005-06 and 2010, without application to the ZA, without review by the ZA, without CEQA clearance, and without ZA approval. Likewise, at least one well was re-drilled in 2004, similarly without application or approval. A full review of CalGEM records may indicate more such projects.

The Planning Department's own "Chronology of Cases" (copy attached) shows the last new well was approved in 1979. LAMC 12.25 sets a three year expiration date on discretionary approvals, and Condition 1 of the 1965 "mother case" applied LAMC 13.01.F.33 which sets a 90 day use it or lose it requirement to commence drilling.

LAMC 13.01.H and 13.01.I set clear requirements for discretionary approvals to drill or re-drill wells. ZA Memo 133 speaks to this issue, too.

Here is what ZA Memo 133 says on page 6 about CEQA process for new wells, redrilled wells, deepened wells, and wells converted between producer and injector (AKA class A and class B):

> An application to drill, re-drill, deepen, or convert a well is not eligible for a categorical exemption and shall require an Initial Study or an EIR as described in section V.A.2. All

ZA Memo 133 lays out the environmental review procedure for such well projects on pages 7-8:

> For any project that does not qualify for a categorical exemption, including any project to drill, redrill, or convert a well, an Initial Study must be completed.
>
> The Initial Study must be prepared by an environmental consultant with the qualifications and experience required in this Memorandum. The Zoning Administrator may require the applicant to provide any additional documents, information or technical studies or reports necessary to complete the environmental review of the project, including requiring the applicant to hire an independent contractor to prepare or peer review technical studies or reports. The Initial Study shall comply with Section 15063 of the CEQA Guidelines and be prepared using Appendix G to the CEQA Guidelines and any City issued procedures or guidelines.

If an ND or MND is issued, the Zoning Administrator shall publish a Notice of Intent to Adopt an ND or MND pursuant to CEQA Guidelines Section 15073, prepare the ND or MND findings (and the Mitigation Monitoring Program for a MND) and process the application pursuant to Section IV. The Public Hearing notice sent in section V.B. will include a statement that the City has published a Notice of Intent to Adopt an ND or MND and include a link to the City's website where the Notice of Intent is published. The Notice of Intent to Adopt an ND or MND shall be published on the City's website in English and Spanish.

An Initial Study by a qualified environmental consultant is clearly required, and of course must be publicly accessible.

Since drilling and redrilling are always mitigated by conditions, an ND cannot be appropriate. Because consideration of potential new or modified conditions is at play for new projects (new wells, redrilling of wells, and the microturbines) that were never part of the project studied in the 1999 EIR, an MND is necessary. And an MND is necessary to consider revised conditions in response to the other episodes of non-compliance at the drill site.

The Public Hearing notice needs to have a link to the Notice of Intent to adopt the appropriate clearance document, and that clearance document should be reviewable by all parties before the case goes to hearing.

CEQA requires that environmental information needs to be provided to the public, both for the opportunity to comment on the environmental review and also to enable informed discussion of the underlying case. If it is not provided until after the hearing, that hinders public participation.

I have had several extended discussions now with PCEC about the permitting and approval history of the Controlled Drill Site and the well drilling history. Our discussions have included a deep dive into the documents, including the CalGEM document record, the record of ZA approvals from 1965 to the present, and LAMC 13.01.

I cannot speak for PCEC and must underscore that I am only speaking for myself, Richard Weiner, and Dr. Rae Drazin. I can say that I believe PCEC and I have looked at a common set of facts and a common set of documents.

In this Review of Compliance, there is already definitive evidence that wells have been drilled and others have been redrilled without the application, reviews, and approvals required by LAMC 13.01 and CEQA. Therefore this Review must address those instances of non-compliance (and any others). A Review of well drilling in 2020 has procedures to follow set out in ZA Memo 133, but those procedures are not being followed.

ZA Memo 133 was promulgated in 2016 in settlement of a lawsuit over the City's pattern and practice of implementing CEQA improperly in oil cases, especially by granting Categorical Exemptions when and where they were clearly inappropriate and contradicted by the setting of conditions to mitigate environmental impact. The City remained entangled in a costly appeal for three years after the settlement, which ended in 2019 with the Court of Appeals sustaining the legitimacy of ZA Memo 133.

Why would the City turn around, one year after the 2019 Court of Appeals ruling, to contravene ZA Memo 133 in a case already replete with City failures to follow CEQA properly dating back to the failure to complete the 1999 EIR with an addendum after the 2001 Settlement? What is the outcome and the message if Planning ignores its knowledge that there are unreviewed and unapproved drilling projects that have been completed at the site? Pretending that Planning does not know that the drilling projects and microturbines are there does not make the issue go away, but makes the problems bigger. Why not take the straightest and clearest path to resolve problems, fix errors, and properly implement CEQA in the most economical way?

This is a case that I believe can be resolved by consensus or near consensus, but going so far outside the bounds of proper procedure would be a major setback.

Please reconsider the path Planning is taking on this case.

Yours

Michael Salman

BEVERLY HILLS OIL FIELD
PICO DRILL SITE
9165 WEST PICO BOULEVARD

ZA Case No.	Date	Purpose
17683	August 17, 1965	Controlled drill site U-131 - 70 acres/3 exploratory oil wells/ enclosed structure resembling high rise buildings/one well only. C2 zoned lots between Doheny and Oakhurst.
17683	October 1, 1965	Plans approved for landscaping wells, etc.
17683	October 7, 1965	Plans approved for derrick structure.
17683	October 15, 1965	Plans approved for equipment and control buildings.
17683	March 10, 1966	Authority granted for drilling of remaining two exploratory wells as permitted on August 17, 1965.
18200	May 27, 1966	Controlled drill site - U-132 (93 acres)/two exploratory wells and three production wells.
18201	June 10, 1966	Surface operations/drilling of 11 production wells - U-131/one well for every five acres (i.e., 14 wells permitted).
18200	August 18, 1966	Authority granted for two production wells as permitted on May 27, 1966.
18200	August 26, 1966	Correction letter/August 18, 1966/ three production wells permitted not two.
18471	October 31, 1966	Controlled drill site - U-133 - 92 acres/two exploratory wells and three production wells.
18484	November 3, 1966	Surface operations/drilling of 13 production wells - U-132 (see ZA 18200).

18623	January 17, 1967	Controlled drill site - U-150 (149 acres)/seven production wells.
17683	April 20, 1967	Well cellar expansion for 22 wells/plans approved for two parallel rows.
17683	May 16, 1967	Modification of Condition No. 5 - wells to be located at least 50 feet from Doheny Drive curb line/derrick no closer than 20 feet from Doheny Drive property line.
18893	July 28, 1967	Expansion of drill site to three adjacent C2 zoned lots to west - drill site now located between Doheny and Cardiff.
18191	August 14, 1967	Authorized three subsurface production wells on 103 acre site in Beverly Hills.
19189	March 14, 1968	One additional production well/ Beverly Hills - see ZA 18191.
19279	April 4, 1968	One additional production well - Beverly Hills - see ZA 18191 and ZA 19189.
19278	April 5, 1968	22 production wells - U-150 - see ZA 18623.
19279	April 23, 1968	Correction letter - corrected to reference ZA 18191.
19320	May 13, 1968	Two additional production wells/ Beverly Hills - see ZA 18191, ZA 19189 and ZA 19279.
17683	March 4, 1969	Plan approval for new well cellar for 20 water injection wells/expansion of well cellar for 49 wells (see ZA 17683 for 22 wells) - 69 wells existing??
20015	October 28, 1969	One additional production well - Beverly Hills - see ZA 18191, ZA 19189, ZA 19279 and ZA 19320.
17683	December 21, 1970	Conversion of 20 water injection wells to production wells (see plan approval dated March 4, 1969).

20529	May 6, 1971	One additional injection wells - Beverly Hills/one additional production well - see ZA 18191, ZA 19189, ZA 19279, ZA 19320 and ZA 20015.
20637	August 19, 1971	On e additional oil well - Beverly Hills (13 total).
20679	October 8, 1971	Five additional wells - U-131/two additional wells U-132 (see ZA 17683 and ZA 18200). Reduce 29 wells to 22 wells - U-150 (see ZA 18623 and ZA 19278).
20677	October 12, 1971	Five injection wells - U-131.
20678	October 15, 1971	Two injection wells - U-132.
20869	March 13, 1972	Additional oil well - Beverly Hills and use of well for injection purposes.
17683 19278 20677	May 14, 1973	Oil well permit/Fire Department
20677	August 14, 1973	Oil well permit/Fire Department
17683	August 27, 1973	Modification of Condition No. 16 to retain drilling structure for 5 years to December 31, 1978.
20815	January 11, 1972	One additional production well - U-131.
20842	February 18, 1972	One additional production well - Beverly Hills.
20989	July 11, 1972	One additional production well - U-131.
21209	May 29, 1973	One additional production well - Beverly Hills.
17683	February 22, 1979	Drilling permit/Fire Department
CUZ 79-102	May 10, 1979	Temporary core hole - U-131.
ZV 79-137-0	June 29, 1979	One additional production well - Beverly Hills.
17683	January 5, 1984	Retention oil derrick to December 31, 1986.

17683	June 14, 1984	Approval of plot plans for relocation of seven flow lines.
17683	June 19, 1984	Inspection of site; no violation of conditions.
17683	June 9, 1988	City Attorney letter requests investigation of complaints.
17683	June 2, 1988	Building and Safety letter citing potential violations.
17683	June 28, 1988	Building and Safety letter - Mrs. Elizabeth Mortoner - violations.
17683	July 20, 1988	Councilman Zev Yaroslavsky requests investigation of violation.
17683	July 28, 1988	Letter to Councilman Yaroslavsky - confirms investigation.
17683	August 10, 1988	Letter from Building and Safety - Clarification of status of "Portable Derricks".
17683	August 25, 1988	Letter to Building and Safety - "Portable" or "Temporary" Derricks not controlled.
17683	September 19, 1988	Councilman Yarosalvsky and City Attorney request further investigation of complaints - Answer prepared dated October 14, 1988.
17683	January 6, 1989	Further inquiry from Councilman Yaroslavsky.
17683	March 17, 1989	Formal request from Councilman Yaroslavsky for hearing and consideration of new conditions of methods and operation.
17683	July 6, 1989	Public hearing set for July 6, 1989; deficient public hearing notice; rescheduled.
17683	August 10, 1989	Public hearing held - decision with new conditions issued on September 12, 1989.

17683 BZA 4121	December 9, 1989	Appeal hearing before Board of Zoning Appeals cancelled at request of City Attorney.
17683 BZA 4121	January 2, 1990	Board of Zoning Appeals hearing - Deleted Condition No. 5 - requirement for enclosing structure.

OFFICE OF ZONING ADMINISTRATION

MEMORANDUM

ZA MEMORANDUM NO. 133

September 19, 2016

TO: Office of Zoning Administration
Development Services Centers
Department of Building and Safety
Department of Public Works – Bureau of Engineering
Los Angeles Fire Department
Los Angeles Department of Water and Power

FROM: Linn K. Wyatt
Chief Zoning Administrator

SUBJECT: **APPLICATION AND PROCESSING REQUIREMENTS, INCLUDING CEQA REVIEW, FOR OIL AND GAS APPROVALS PURSUANT TO LOS ANGELES MUNICIPAL CODE SECTION 13.01-H.**

This Memorandum supersedes ZA Memorandum No. 94, dated December 12, 1994, and ZA Memorandum No. 94A, dated March 24, 2000.

This Memorandum is intended to establish a comprehensive set of procedures and policies for the acceptance and processing of applications for oil drilling approvals pursuant to Los Angeles Municipal Code (LAMC) Section 13.01-H and to establish City guidelines for the California Environmental Quality Act (CEQA) review of Section 13.01-H oil drilling applications.

I. Background

The LAMC requires a formal application and a filing fee in conjunction with a request for a determination of conditions for the conduct of oil drilling pursuant to LAMC Section 13.01-H. Other than the requirement for an application and payment of a filing fee, the LAMC contains no express procedural requirements for the determination of conditions under Section 13.01-H for an original approval or for a modification or clarification to a previously approved determination of conditions.

Z.A. Memoranda Nos. 94 and 94A

Historically, as described in ZA Memoranda Nos. 94 and 94A, applicants were permitted to apply for modifications to the original conditions for oil drilling approvals through the use of a more limited review process (similar to a plan approval under LAMC Section 12.24-L and M).

The use of the process outlined in Memoranda Nos. 94 and 94A is no longer permitted for any Section 13.01-H application, including those submitted as a determination of conditions, modification of condition, request for clarification, or related approval. All applicants seeking an approval under Section 13.01-H must follow the application procedures outlined in this Memorandum. All applications seeking any approval under Section 13.01-H will be processed by the City, including the Office of the Zoning Administrator, pursuant to this Memorandum.

Existing Approvals with Modification Procedures

In addition to the above historical process, there are existing active approvals which include conditions establishing a process for subsequent modifications or condition review. An example of one condition reads substantially as follows:

> *Drilling operations for the first X wells identified in the grant clause of the instant determination shall be completed within 36 months from the effective date of this determination. The drilling for the following X wells as hereby authorized shall be subject to a review of plans by the Zoning Administrator, without a public hearing, for the purpose of updating the record with the well identification and path.*

Another condition reads substantially as follows:

> *Review of Conditions. Two years following completion of construction… the applicant shall submit a Plan Approval application for reviewing the effectiveness of these conditions. … The applicant shall submit a 500-foot radius map with accompanying labels for owners and occupants. The Zoning Administrator may set the matter for public hearing if warranted.*

Both of these conditions include processes that are inconsistent with the processes established in this Memorandum. The first condition is inconsistent because it allows for modifications without a public hearing. The second condition is inconsistent because it allows the Zoning Administrator to not set a public hearing for a Plan Approval and implies the notice radius is 500 feet.

To the extent that any existing condition or grant in an existing approval gives the Zoning Administrator discretion in the process to be followed for a modification or condition review, the procedures in this Memorandum shall be followed, in accordance with the findings in Section II and the purpose statements in Section III.

To the extent that any existing condition or grant in an existing approval mandates a procedure that is inconsistent with this Memorandum, the Zoning Administrator shall consider whether a Plan Approval process shall be initiated by the City to revise any conditions to protect the public health, safety and welfare, including any condition establishing a process inconsistent with the purpose of this Memorandum. On the other hand, if an existing condition or provision is not modified through a Plan Approval, then the process outlined in the existing approval shall be followed.

Nothing in this Memorandum is intended to expand the authority the City has to initiate a Plan Approval.

II. Findings

In issuing this Memorandum, the Zoning Administrator makes the following findings:

A. In adopting the California Environmental Quality Act[1], the Legislature declared:

> It is the intent of the Legislature that all agencies of the state government which regulate activities of private individuals, corporations, and public agencies which are found to affect the quality of the environment, shall regulate such activities so that major consideration is given to preventing environmental damage, while providing a decent home and satisfying living environment for every Californian. (Public Resources Code Section 21000(g).

B. The CEQA Guidelines provide that CEQA's basic goal of protecting the environment has two purposes:

(1) avoiding, reducing, or preventing environmental damage where possible by requiring alternatives or mitigation measures; and

(2) providing information to decision-makers and the public concerning the environmental effects of proposed and approved actions. (CEQA guidelines 15002(a).)

C. One oft-repeated purpose of the CEQA Guidelines is to provide for public participation, including as set forth in Section 15201:

> Public participation is an essential part of the CEQA process. Each public agency should include provisions in its CEQA procedure for wide public involvement, formal and informal, consistent with its existing activities and procedures, in order to receive and evaluate public reactions to environmental issue related to the agency's activities. Such procedure should include, wherever possible,

[1] Public Resources Code, Sections 21000, *et seq*.

making environmental information available in electronic format on the Internet, on the web site maintained and utilized by the public agency.

D. Although CEQA does not require formal hearings at any state of the environmental review process, section 15202 provides that:

...

(b) If an agency provides a public hearing on its decision to carry out or approve a project, the agency should include environmental review as one of the subjects for the hearing.

(c) A public hearing on the environmental impact of a project should usually be held when the lead agency determines it would facilitate the purposes and goals of CEQA to do so. The hearing may be held in conjunction with and as part of normal planning activities.

...

(f) A public agency may include, in its implementing procedures, procedures for the conducting of public hearings pursuant to this section. The procedures may adopt existing notice and hearing requirements of the public agency for regularly conducted legislative, planning, and other activities.

E. Applications for oil and gas projects under LAMC Section 13.01-H have the potential to create unique risks and hazards to have the potential for significant and immediate impacts on the health, safety, and welfare of the residents in and around the project site through increased noise, odor, dust, traffic, and other disturbances, as well as the potential to significantly impact the City's air, water, soil, biological quality, geology, water, stormwater and wastewater infrastructure, transportation, emergency response plans and other aesthetic values and community resources.

F. People living and working within the land use and environmental impact range of oil and gas operations and activities have a substantial interest in participating in a public hearing on 13.01-H approvals.

G. Section 13.01-H provides authority for the Zoning Administrator to condition, approve or deny a Section 13.01-H application under the City's police powers to protect public health, safety and welfare and to issue and implement reasonable procedures to process Section 13.01-H applications consistent with the requirements for due process.

III. Purpose and Intent of Memorandum

This Memorandum is issued with the following intent:

- Ensure that the City complies with all legal requirements of CEQA in approving Section 13.01-H projects;
- Provide all parties that may be impacted by a project subject to a Section 13.01-H application an opportunity to participate in a public hearing;
- Meet the intent of CEQA in the review and approval of CEQA findings and determinations, to provide adequate public participation;
- Ensure that staff has time to adequately consider and respond to, if necessary, evidence submitted on a Section 13.01-H application and its related environmental findings (including the CEQA Guideline Section 15300.2 exceptions) prior to the issuance of any decision;
- Provide decision-makers and City Staff, and the public with the information and data needed for adequate decision-making under CEQA and Section 13.01-H;
- Ensure that Section 13.01-H applications are processed efficiently;
- Ensure that applicants, staff, and the public can rely on a consistent practice in reviewing Section 13.01-H applications;
- Provide for transparent disclosure and participation process; and
- Ensure that the city's processing and approvals pursuant to 13.01-H will not result in adverse effects to public health, safety, and welfare

IV. Application Requirements

The original case number shall be used for the plan approval request. Before an application may be deemed complete, the applicant must submit:

1) A completed "Land Use Application For Oil & Gas Project Conditional Approval" (CP Form CP-7834) with all required attachments, as specified in the application and the Instructions (CP Form CP-7833.)
2) A completed Environmental Assessment Form for Oil and Gas Projects (EAF-O, CP-7832), with all required attachments.
3) The filing fee pursuant to LAMC Section 19.01.

V. Processing Section 13.01-H Applications

A. CEQA Review

The following review procedures are intended to provide guidelines to implement CEQA on all Section 13.01-H applications. Nothing in this Memorandum or the guidelines provided herein are intended to conflict with CEQA. To the extent that these guidelines are silent or ambiguous, the Zoning Administrator shall fall back on the requirements and intent of CEQA. To the extent that these guidelines impermissibly conflict with CEQA, the provisions of CEQA control. Nothing in these Guidelines is intended to conflict with the Permit Streamlining Act, Gov't Code Section Government Code § 65920 et seq.

1. Preliminary Review for Exemptions

No categorical exemption forms will be processed for consideration or issued at the Planning Department Development Services. The applicant shall submit a complete EAF-O form with their application, which shall be reviewed by the Zoning Administrator. The Zoning Administrator will conduct a preliminary review to determine whether the application qualifies for an exemption from environmental review pursuant to CEQA. The Zoning Administrator may require the applicant to provide additional supporting materials from the applicant to support the use of a categorical exemption.

An application to drill, re-drill, deepen, or convert a well is not eligible for a categorical exemption and shall require an Initial Study or an EIR as described in section V.A.2. All other projects may be reviewed to determine if the project is exempt under any applicable categorical exemption in CEQA Guidelines Section 15300-15333 or any City Guidelines (adopted pursuant to CEQA). If a project is determined not to fall into any categorical exemption based on the project description, an Initial Study shall be prepared pursuant to section V.A.2. If the project falls within a categorical exemption, the Zoning Administrator shall determine if, based upon the whole of the record, any exception to any exemption under CEQA Guidelines, Section 15300.2, applies to the project, including, but not limited to the following:

> Cumulative Impact. All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant.
>
> Significant Effect. A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.

If the project is determined to be categorically exempt (CE) and no exceptions apply, the Zoning Administrator shall do all of the following:

- Give the public hearing notice required in section V.B., including a notice of an intent to adopt a categorical exemption to all property owners and occupants within a 1,500-foot radius of the project site's outer boundary, and provide for a 35-day comment period on the project, prior to approval. The public hearing may be held during the comment period. The hearing notice (with the notice of intent to adopt a CE) must be provided in English and Spanish.

- If after the 35-day comment period, or any time prior to making a decision on the project, the Zoning Administrator determines that substantial evidence does not support the use of the exemption, including from the existence of an exception in Section 15300.2, the Zoning Administrator shall require an Initial Study to be prepared consistent with the procedures outlined herein.

- Alternatively, if the Zoning Administrator finds after the 35-day comment period, or any time prior to making a decision on the project, that additional information and analysis is required to determine if the categorical exemption is supported with substantial evidence, and the applicant desires the City to use a categorical exemption rather than a prepare an Initial Study, the Zoning Administrator may require the applicant to submit additional information or documents and/or technical studies or reports, including requiring the applicant to hire independent consultants to prepare any necessary technical studies or reports or peer review any prepared studies or reports. If after reviewing any additional documents, reports or studies, required by the Zoning Administrator, it is determined that a categorical exemption is not supported by substantial evidence, an Initial Study shall be prepared.

- If the use of the categorical exemption is supported by substantial evidence in the record at the time of the decision, the Zoning Administrator shall ensure the record contains a memorandum or narrative substantiating the use of the categorical exemption, including explaining how substantial evidence in the administrative record supports the use of the exemption, and that the Zoning Administrator considered whether any exception to an exemption under CEQA Guidelines Section 15300.2 is applicable, including providing where necessary an explanation or evidence to demonstrate that any comments submitted on the intent to adopt the Categorical Exemption do not provide substantial evidence that an exception applies or the exemption does not apply.

2. Initial Study Determination

For any project that does not qualify for a categorical exemption, including any project to drill, redrill, or convert a well, an Initial Study must be completed.

Nothing in this subsection is intended to require the preparation of an Initial Study, when a preliminary review of the project demonstrates an EIR is clearly required, pursuant to CEQA Guidelines Section 15060(d).

The Initial Study must be prepared by an environmental consultant with the qualifications and experience required in this Memorandum. The Zoning Administrator may require the applicant to provide any additional documents, information or technical studies or reports necessary to complete the environmental review of the project, including requiring the applicant to hire an independent contractor to prepare or peer review technical studies or reports. The Initial Study shall comply with Section 15063 of the CEQA Guidelines and be prepared using Appendix G to the CEQA Guidelines and any City issued procedures or guidelines.

If the Initial Study shows both of the following Health Impact Assessment Criteria apply, the Zoning Administrator shall also require a Health Impact Assessment (HIA), as defined in Subsection V.A.5., before preparing the environmental clearance for the project:

- one or more of the air or hazards impact thresholds on Appendix G identified as III(a), III(b), III(d), VIII(a),VIII(b), VIII(c),or VIII(g) are found to be "less than significant impact with mitigation"; and
- the project is within 1,500 feet of any sensitive receptors, as defined by SCAQMD.

After the Initial Study is completed (and the HIA, if necessary), the Zoning Administrator will determine whether the proposed environmental clearance for the proposed project is a Negative Declaration (ND) or a Mitigated Negative Declaration (MND) or whether an EIR is required pursuant to sections 15065 or 15064 of the CEQA Guidelines.

If the Initial Study demonstrates that all of the impact areas will have no impact or less than significant impact, the Zoning Administrator may prepare a ND. (Note: if the Health Impact Assessment Criteria apply, a ND could not be prepared because the Initial Study identified significant impact requiring mitigation.)

If the Initial Study (and the HIA, if required) demonstrates that the project will not result in a significant impact with mitigation imposed, the Zoning Administrator may prepare a MND.

If the Initial Study (and the HIA, if required) demonstrates that the project may result in a significant impact to the environment that cannot be mitigated to less than significant, the Zoning Administrator shall require the preparation of an EIR. In determining whether an EIR is required, the Zoning Administrator shall review and consider all of the following CEQA Guidelines, without limitation to any other applicable requirements of CEQA:

- 15064 (guidelines on determining significant impacts),
- 15064.4 (guidelines on determining greenhouse gas impacts),
- 15064.5 (guidelines on determining cultural and archaeological impacts), and
- 15065 (guidelines requiring consideration of Mandatory Findings of Significance, including subsection (a)(4): "The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.")

If an ND or MND is issued, the Zoning Administrator shall publish a Notice of Intent to Adopt an ND or MND pursuant to CEQA Guidelines Section 15073, prepare the ND or MND findings (and the Mitigation Monitoring Program for a MND) and process the application pursuant to Section IV. The Public Hearing notice sent in section V.B. will include a statement that the City has published a Notice of Intent to Adopt an ND or MND and include a link to the City's website where the Notice of Intent is published. The Notice of Intent to Adopt an ND or MND shall be published on the City's website in English and Spanish.

If the Initial Study demonstrates the project requires an Environmental Impact Report (EIR), the Zoning Administrator shall follow the procedures in section V.A.3.

3. Environmental Impact Report

If an EIR is to be prepared on a project, in addition to any other requirements of CEQA, the City will require all of the following:

- Provide the Notice of Preparation to all property owners and occupants within a 1,500-foot radius of the project site's outer boundary; and
- Prepare a Health Impact Assessment, as defined in section V.A.5., if not already prepared, and provide a relevant summary of the Health Impact Assessment in the EIR where appropriate to inform the required analysis. The Health Impact Assessment shall be considered in any certification of the EIR and the approval, conditional approval, or denial of the Section 13.01-H application.

An environmental consultant with qualifications and experience provided in section V.A.4 must prepare the EIR. The EIR must be prepared and certified in compliance with CEQA, including but not limited, CEQA Guideline Sections 15080-15097, 15120-15155.

4. Environmental Consultant Qualifications

The City shall ensure that any environmental consultant that is preparing an Initial Study, MND, ND, or an EIR on a 13.01-H project has the following qualifications and experience:

- The Project Manager has at least seven (7) years' experience preparing CEQA documents.
- The Project Manager has prepared and/or reviewed at least five (5) EIRs for projects involving oil and gas drilling or production.
- The consultant or consultant team, including any subcontractors, have demonstrated training, knowledge, and experience in the following topic areas as they specifically relate to oil and gas projects: environmental health, public health, hazardous materials, air quality, GHG emissions, water quality, geology, noise, traffic, aesthetics, and risk and safety issues.
- In the case of EIRs or MNDs requiring Health Impact Assessments, the consultant team, including any subcontractors, has at least five (5) years' experience in preparing Health Impact Assessments. The consultant who prepares the HIA shall be familiar with accepted HIA process and content including, but not limited to, the "Minimum Elements and Practice Standards for Health Impact Assessment," Version 3.

The City shall ensure that all environmental consultants have copies of this Memorandum prior to preparation of any Initial Study, ND, MND or EIR.

5. Health Impact Assessment (HIA)

A HIA is defined as follows:

> A study of the project for the surrounding vicinity identifying pollution and population indicators, such as, but not limited to, those analyzed in the

California Communities Environmental Health Screening Tool; the number of people affected by the project; short term or permanent impacts caused by the project; likelihood that impacts will occur; and recommended mitigation measures.

Any HIA required under these procedures shall be used to inform whether an EIR is required and whether to approve, condition, or deny the application under Section 13.01-H.

B. Public Participation

The Zoning Administrator will hold a public hearing on all Section 13.01 applications prior to project approval.

Notice of this public hearing must be sent to all property owners and occupants within a 1,500-foot radius of the project site's outer boundary, in English and Spanish. For projects being approved with a CE, ND or MND, the Notice of Intent to Adopt a CE, ND or MND may be combined with the public hearing notice.

C. Final Determination

Notices of final decisions will be issued to the applicant, all residents abutting the project site, and all individuals who request such notice.

All Zoning Administrator Section 13.01-H Determinations may be appealed to the Area Planning Commission. The Area Planning Commission decision is final. All CEQA determinations by the Zoning Administrator or the Area Planning Commission are subject to appeal to the City Council pursuant to Public Resources Code Section 21151(c).

Nothing in this Memorandum is intended to limit the Zoning Administrator's express and inherent authority to administer LAMC Section 13.01-H.

Dear Chief Zoning Administrator Mailian,

I hope that you and your family are doing well under these challenging circumstances.

I am writing to let you know that our Pico Robertson Coalition on Health and Safety — a group of leading rabbis and community members in Pico Robertson — strongly share Professor Salman's concern and agree with the argument he made. Our safety depends upon an immediate and comprehensive inspection being conducted by the Petroleum Administrator, and **before the Review of Compliance is brought to a public hearing**. Only by doing the inspection first can a proper CEQA review be defined.
Our neighborhood should not have to live with more unnecessary risks from bypassing the protections of the State's CEQA law.

Thank you for your continuing attention to this case.

Peace and blessings,

Rabbi Yonah Bookstein
Pico Robertson Health and Safety Coalition

Dear Chief Zoning Administrator Mailian

RE: ZA-1989-17683-PA2. Need for a comprehensive compliance inspection by the Petroleum Administrator before the West Pico Drill Site Review of Compliance goes to Public Hearing.

As you may recall from our correspondence on November 13, 2019, we are board members of Neighbors for a Safe Environment (NASE), which in 2001 entered into a binding Settlement Agreement with the operating oil company of the West Pico Drill Site, the City of Los Angeles, and the City Council. NASE continues to have standing as a party to that Settlement Agreement, and one of us, Dr. Drazin, also has standing as a party to the Settlement Agreement as an individual.

The Settlement Agreement was approved by vote of City Council on June 12, 2001. Mr. Feuer was the CD5 Council Member at the time and he voted to approve the Settlement Agreement. Indeed, Mr. Feuer introduced the motion to approve the Settlement Agreement. Mr. Feuer is today the City Attorney.

A copy of the Settlement Agreement, Council's vote to approve it, the underlying ZA determination of April 5, 2000 in ZA-1989-17683-PAD, and additional related documents can all be found here, filed in the Council Files record for CF 00-1842: http://clkrep.lacity.org/onlinedocs/2000/00-1842.PDF

We are writing to reiterate our November 13, 2019 request that the Department of City Planning please ensure that there is a comprehensive compliance inspection of the West Pico Drill Site completed by the Petroleum Administrator before the Review of Compliance case goes to Public Hearing.

We agree with Professor Salman's analysis of the critical need for a comprehensive compliance inspection as a predicate for implementing CEQA in this case. This is a matter of the greatest concern to us.

Very truly yours,

Dr. Rae E.. Drazin, President, and Richard S. Weiner, Secretary, NASE

Dear Chief ZA Mailian

Please see the attached letter (copy of text pasted below) and the accompanying attached documents, which concern the need for a comprehensive compliance inspection led by the Petroleum Administrator in order to perform an adequate environmental clearance under CEQA for the upcoming Review of Compliance and Conditions at the West Pico Drill Site in ZA-1989-17683-PA2.

Please feel free to contact me at any time.

Michael Salman

*

Dear Chief ZA Mailian,

I hope that you and all of the DCP staff are healthy, well, and staying safe in this difficult time.

I am writing to express grave concern about the process through which the upcoming Review of Compliance and Conditions at the West Pico Drill Site seems to be heading toward Public Hearing without first having the Petroleum Administrator conduct or lead a comprehensive compliance inspection of the drill site.

Moving the case forward to Public Hearing without first securing and making public a comprehensive compliance inspection report from the Petroleum Administrator would be a damaging mistake, for at least three major reasons:

1. Without a comprehensive compliance inspection by a professional subject matter expert, of the type and style led by former Petroleum Administrator Uduak Ntuk in March-April 2017 for the Rancho Park Drill Site, the ZA in this case would be flying blind into the Public Hearing without critical knowledge of compliance at the site. The public would also be deprived of this critical information.
2. If the Petroleum Administrator is consulted for a report later in the Review process, after the Public Hearing, that would raise due process issues for members of the public and for the site operator, neither of whom would have an opportunity to respond to what would likely be the most critical document in the review process.
3. **Last, the failure to conduct a professional and independent comprehensive compliance inspection before taking the case to Public Hearing would undermine the CEQA process in this case, because the scope of review for an Initial Study and/or an MND or EIR in this case (as required by ZA Memo 133) can only be set by first surveying the scope of compliance issues and mitigation measures that need to be reviewed in the CEQA process.**

As you may know, since November 2019 I have worked closely with Richard Weiner and Dr Rae Drazin of NASE, parties to the 2001 Settlement Agreement with the City and the site operator that modified mitigation measures from the 1999 EIR and 2000 ZA determination. I have also worked closely with Rabbi Yonah Bookstein since that time. The City's failure to conduct 5 Year Reviews of Compliance on an ongoing cycle as per the Settlement Agreement is a matter that I brought to their attention, and then presented to the SORO Neighborhood Council as their representative.

The office of the Chief ZA and the Director of Planning have already received requests from Mr. Weiner, Dr. Drazin, and the SORO NC that plead for the ZA or DCP to have the Petroleum Administrator conduct or lead a comprehensive compliance inspection before the ZA takes the Review of Compliance to Public Hearing.

The authority to direct the Petroleum Administrator to conduct such an inspection and produce a report is clearly established in the City Administrative Code, Section 19.48.a, which defines the very first of the Petroleum Administrator's prescribed "duties" as the duty "[t]o examine and render a report and recommendation concerning matters related directly or indirectly to the exploration for, or production of, Petroleum within the City of Los Angeles, which may be referred to the Board by any department, bureau or office of the City, and obtain requested technical advice."

I believe the correspondence you have received from Mr. Weiner, Dr. Drazin, and the SORO NC describes that legal basis and explains how due process and due diligence necessitates a comprehensive compliance inspection before this case goes to Public Hearing.

In this letter I will focus on the third major reason I listed above: The City's need to perform duties under CEQA and to consider mitigation measures through the CEQA process.

How can Planning do an Initial Study or any other subsequent draft analysis required by CEQA (e.g., an MND or an EIR) without knowing the scope of the project? The scope of the project for this review is a function of non-compliance and the need for new/modified conditions, which can only be fully determined if there is an inspection of the drill site conducted or led by the Petroleum Administrator.

It is important to distinguish between the 1999 EIR and the case today. They are not the same case and not about the same project, although they concern the same drill site. In fact, they are categorically different cases. Their scope is not the same.

What the 1999 EIR examined

- The 1999 EIR studied a project proposed by the applicant that was, primarily, a set of new mitigation measures to reduce environmental impacts that had been the cause of complaints for decades.
- The project reviewed in the 1999 EIR was comprised, primarily, of a proposal to install taller perimeter walls around the half of the Controlled Drill Site that is located at 9101 W Pico Blvd where the well heads are located, and installing a permanent sound-proofed electric derrick at that location that would eliminate the use of diesel engines in drilling and workover operations (which had always been prohibited since the 1965 "mother case" applied LAMC 13.01.F.43 as part of Condition #1, but were nonetheless used in non-compliance). The 1999 EIR studied the project that was proposed at that time, and the proposal included substantial description of that project.

What the 1999 EIR did NOT examine

- **The 1999 EIR did not examine half of the Controlled Drill Site.** The 1999 EIR did not look at the other half of the controlled drill site, located at 9151 W Pico Blvd, where oil and gas processing equipment and other supporting equipment is installed and operated. Both locations together make up the Controlled Drill Site as approved to open by the ZA in 1965 and expanded with the approval of the ZA 1967. But the proposed project reviewed in the 1999 EIR did not include any new construction at the processing half of the Controlled Drill Site.

- **The 1999 EIR did not examine new wells drilled in 2005-06 and 2010 without application to the ZA or CEQA clearance, nor did it examine the drilling of any new wells because none were proposed at that time.** The new wells drilled in 2005-06 and 2010, which were drilled illegally without application to the ZA (required by LAMC 13.01.H and LAMC 13.01.I) and thereby also without CEQA clearance.
    - **CalGEM records prove the wells were drilled.** See attached CalGEM records for West Pico Well #s 58 and 59, which include the DOGGR permit records and work history records for the drilling of those wells. These are the Well DATA files posted on CalGEM's Well Finder online system. The individual files are compiled in reverse chronological order, so the newest record is on top and the oldest on the bottom. Hence if you read the files from the bottom up you will see the origins of these wells that were drilled in 2005-06 and 2010: the applications for DOGGR permits to drill new wells, the DOGGR permits that were issued, and the work history reports on the actual drilling of the new wells.
    - **For both wells, the operator checked a box for DOGGR declaring that no CEQA documentation of any type was required by the local lead agency.** , That was false in 2005-06 and 2010 as well as false today. See page 41 of the pdf for Well 58 and page 56 of the pdf for Well 59 for these improper declarations.
    - **The ZA case file for the drill site proves there was never an application, ZA review, ZA approval, or CEQA clearance for these Wells.** See the attached Planning Department “Chronology of Zoning Cases” for the drill site, which indicates that the last new well application considered by the ZA was processed in 1979. I have reviewed the case file for ZA 17683 in City Records, which contains cases from 1965 to the present.
        - Please also note that the Planning Department “Chronology of Zoning Cases” indicates some, but not all, of the long history of compliance problems, nuisance, health and safety risks, and accidents at the drill site, which have been recurrent, decade by decade, since its opening.
    - **The operator claims in public presentation to shareholders that it has drilled 12 new wells since 2003.** See the attached public statement by PCEC’s offshoot, the Pacific Coast Royalty Trust, an SEC regulated entity that trades on the NYSE, claiming that 12 new wells have been drilled at the site since 2003 (I believe this is inaccurate, but it might imprecisely refer to several instances of re-drilling existing wells, which also required applications to the ZA for approval and CEQA clearance, as per LAMC 13.01.H and 13.01.I, and also were not part of the project proposal reviewed by the 1999 EIR).
- **The 1999 EIR did not examine the five 200 KW Microturbine electric generators (1 Megawatt total) installed in 2018, contrary to express prohibition by ZA-assigned conditions and without application to the ZA.** Microturbines were not part of the project proposal examined in the 1999 EIR. They have never been proposed to the ZA for review and for CEQA clearance. And they are expressly prohibited by Condition 49 of the 2000 ZA determination and Condition 1 of the 1965 Mother Case (which applied LAMC 13.01.F.43), which both prohibit electric generation for the Controlled Drill Site not only on the drill site but also in the much larger oil drilling district.
    - **LADBS and SCAQMD permit records prove the microtubines were installed.** I believe you already have access to these records, but can furnish them on request.
    - **The operator’s application for this review acknowledges that the microturbines were installed,** but argues they are not prohibited because the ZA determination in 2000 did not apply to the “production facility” half of the Controlled Drill Site**.** This claim overlooks the prohibition in Condition 1 of the 1965 “mother case” (cf LAMC 13.01.F.43) that still applies to the “production facility” half of the Controlled Drill Site, and it overlooks the prohibition against generating electricity anywhere in the Oil Drilling District to supply power to any part of the Controlled Drill Site which is mandated in both Condition 1 of the 1965 “mother case” and Condition 49 of the 2000 ZA determination.
    - **The installation of major new equipment has always required ZA approval, and the installation of equipment that is prohibited by ZA condition would obviously require a request to modify conditions – but no such application to the ZA was ever made.**

Errors in the final approval of the 1999 EIR that must be rectified now

- **Final changes to mitigation measures were not added to the EIR by addendum or supplement.** There was never an addendum or supplement to the 1999 EIR to incorporate changes in mitigation conditions imposed by the ZA in the 2000 determination and the City’s Settlement Agreement in 2001.
- **MMRP never completed.** The MMRP required by State law was thus never completed and at least one critical element of monitoring and reporting - the recurring 5 Year Reviews of Conditions and Compliance mandated by the Settlement Agreement - was never performed.

Developments since the 1999 EIR and 2000 ZA determination show that several of the critical mitigation measures assigned in that case have failed or proven to be inadequate and should be superseded by more effective measures that are available today

- **There is a known record of non-compliance with the Settlement Agreement and the 2000 ZA determination.** These include but are not limited to failure to hold 5 year reviews, failure to control odors (testified to by Council Member Koretz who said at the Council Committee meeting on October 15, 2019 that in the vicinity near the drill

site "You can smell the oil. You can taste the oil."), failure to monitor odors, LAFD violations in 2017 and 2018 for failure to clean up spilled or leaked petroleum, and so on.

- **The drilling of new wells and installation of prohibited microturbines, all without required ZA approval and CEQA clearance, constitutes egregious non-compliance with City code and the requirements of past ZA grants** - these unapproved and un-reviewed projects necessitate a review of the whole Controlled Drill Sites. The projects themselves need to be evaluated via the CEQA process. New conditions – especially annual compliance inspections - must be added to ensure compliance in the future, and the need for these new conditions must be evaluated within the CEQA process.
- **Since the 1999 EIR, commercially available permanent emissions monitoring equipment has become economical and proven effective** - thus there is a new and better mitigation measure available today to address odor and emission control. That needs to be considered and evaluated for the whole Controlled Drill Site via the CEQA process.
- **In the years before 1999, the City had lapsed into not appointing a Petroleum Administrator and had no expertise in-house to monitor compliance, but the Office of the Petroleum Administrator has been revived since 2016** - thus there is a new and better mitigation and mitigation monitoring & reporting measure available today, namely annual comprehensive compliance inspections conducted or led by the Petroleum Administrator. That needs to be evaluated for the whole Controlled Drill Site via the CEQA process.

Consequently, CEQA requires a fresh "hard look" at the adequacy of existing mitigation measures across the entire Controlled Drill Site (not just the half at play in the 1999 EIR and 2000 ZA determination) and the need for new mitigation measures, which need to be considered in light of today's science and technology and best practices (not those that existed at the time of the 1999 EIR).

CEQA also requires an environmental study of more than three new physical projects that were executed without ZA review or CEQA clearance, and were starkly beyond the scope of the 1999 EIR: 1) new well drilled in 2005-06, 2) new well drilled in 2010, 3) microturbines installed in 2018, and also, at least, 4) an as yet undetermined number of wells re-drilled since 2003 (at least one well has been re-drilled, which I know from reviewing CalGEM records for an initial sample of approximately 10% of the wells at the drill site).

What a CEQA clearance for this current case must examine, and how it differs from the 1999 EIR

- **This is a Review of Compliance, not a review of a proposed new project like the 1999 EIR.**
- **The initial study for the CEQA process, no less any environmental clearance studies and draft documents (MND or EIR), cannot be performed until Planning knows the scope of what must be studied or at least has some sense of the scope.**
- **The PA application does not and cannot define that scope.** The operator's application for this Review is obviously insufficient for launching an initial study under CEQA. The operator is not proposing a new project, but is being asked to testify to the site's history of compliance. Unlike a project proposal to build something new, that should not be the basis for identifying the scope of study under CEQA. For example, the operator's application does not even mention the wells that were drilled in 2005-06 and 2010, no less that the operator claims elsewhere that it has drilled 12 new wells at the site since 2003. The application is also grossly deficient in supplying information on how (or whether) operators have complied with ZA conditions for odor control, odor monitoring, and video and audio monitoring of the site. The application itself is another instance of non-compliance.
- **We already know from review of public documents that there is substantial and serious noncompliance on multiple counts.**
- **We don't know, and the ZA and Planning Department cannot know, what other violations might exist that would be visible only via an on-site professional inspection.** In his March-April 2017 inspection of the Rancho Park Drill Site, then Petroleum Administrator Uduak Ntuk uncovered more than a dozen problems of non-compliance with City code and ZA assigned conditions that could not have been identified without an on-site inspection - on top of the ten or so compliance problems and violations that were discovered before the inspection through review of public documents.
- **The subject of the current review is thus vastly and categorically different from the 1999 EIR. It concerns a new and different project – multiple projects, in fact - that requires a fresh "hard look" under CEQA.**
- **Planning cannot estimate the full scope of non-compliance – and thus cannot estimate the scope of what must assessed under CEQA - without a comprehensive compliance inspection.**

One additional point about how the ZA would be blinded if the ZA goes into a Public Hearing without first securing a Comprehensive Compliance Inspection.

When West Pico Well #58 was being drilled in 2005-06, the two-year post-construction Review of Compliance was on the ZA's desk. But the ZA did not know a well was being drilled at that very time. Why not? Because no general compliance inspections have ever been done by the City, and from the mid-1990s until 2016 the City failed to live up to its Administrative Code requirement to have a Petroleum Administrator.

Since 2016 the City has revived the office of the Petroleum Administrator, precisely because expertise is needed and because compliance cannot be monitored without it.

But the Office of the Petroleum Administrator does no good if it is not used by the Offices of the City that are given the power in Administrative Code 19.48.a to task the Petroleum Administrator with a direction to inspect and report on technical issues, such as compliance.

Without a Comprehensive Compliance Inspection that actually inspects the physical site as well as all of the permitting and approval records, it is impossible to see how the CEQA process could be handled correctly in this case, and it is impossible to see how the case could be brought to Public Hearing in a defensible way.

The City's recent past experiences with the AllenCo Drill Site, the Jefferson Drill Site ZA cases and subsequent lawsuit, the litigation that led to the promulgation of ZA Memo 133 on CEQA implementation, and the example and precedent set by former Petroleum Administrator Uduak Ntuk's March-April 2017 inspection of the Rancho Park Drill Site all point to the correct way forward in this case.

Rigorous implementation of CEQA and due diligence in processing cases are wise and necessary.

This case does not need to be rushed. Taking the time to process this case correctly will not prevent a project from going forward, nor will it impede operations at the drill site or hurt the economy, nor will rushing protect the public. Rushing definitely does not help the public in any way, shape, or form, especially during a pandemic.

Rushing is lose-lose. Rushing stands to entangle everyone in the awful and costly process of undoing compounded errors. Rushing stands to leave the public exposed to unnecessary risks from a drill site that has been a source of trouble for decades. Rushing stands to create irregularity rather than consistent regulation. Irregularity does no one any good.

Taking the time to process the case correctly is win-win, for all involved.

Please secure a Comprehensive Compliance Inspection of the West Pico Drill Site in order to implement the requirements of CEQA properly before taking the case to Public Hearing.

Yours

Michael Salman

Dear Mr. McCollum:

SAFETY SYSTEMS AND ENVIRONMENTAL LEASE INSPECTION, WEST PICO DRILL SITE, BEVERLY HILLS FIELD

On November 28 and 29, 2018, Division of Oil, Gas, and Geothermal Resources (DOGGR) engineers, Stacy Sor and Max Chavez-Segura, witnessed tests of the safety systems and conducted an environmental lease inspection of wells and facilities at Pacific Coast Energy Company LP, West Pico drill site in the Beverly Hills field.

Tested safety systems responded as designed. No violations were observed during the lease inspection.

If you have any questions, please contact Ellen Plaza Moser at (714) 816-6847 or ellen.moser@conservation.ca.gov.

Thank you for your cooperation.

Sincerely,

Digitally signed

WELL SUMMARY REPORT

API NO. **037-26615**

Operator	Well				
BreitBurn Energy Company	**WP-58**				
Field	County	Sec.	T.	R.	B.&M.
Beverly Hills East	**Los Angeles**	**30**	**1S**	**14W**	**S.B.**

Location (Give surface location from property or section corner, street center line)
From the intersection of the center lines of Pico Blvd. & Oakhurst, 75' 9" North & 112' 6" East

Elevation of ground above sea level
171'

California Coordinates (if known): **Northing: 202,370.44', Easting: 1,882,022.08' (NAD27 Lambert Zone 5)**

Was the well directionally drilled? ☒ Yes ☐ No If yes, show coordinates at total depth. **124' South & 3648' East (See dir. survey)**

Commenced drilling (date)
12-14-05

Completed drilling (date)
1-10-06

Total depth: (1st hole) **8815'** (2nd) (3rd)

Depth measurements taken from top of:
☐ Derrick Floor ☐ Rotary Table ☒ Kelly Bushing

Which is **16'** feet above ground

Commenced production/injection (date)
1-13-06

Present effective depth **8746'**

Production mode: ☐ Flowing ☒ Pumping ☐ Gas lift

Junk
None

Name of production/injection zone(s)
Hauser

GEOLOGICAL MARKERS	DEPTH
Hauser H104	**6,895' MD**
Hauser H200	**7,079' MD**
Hauser H300	**7,590' MD**
Pi	**8,765' MD**

Formation and age at total depth
Miocene Hauser

Base of fresh water
600'

	Clean Oil (bbl per day)	API Gravity (clean oil)	Percent Water (including emulsion)	Gas (Mcf per day)	Tubing Pressure	Casing Pressure
Initial Production	375	17	56%	294	140 psi	450 psi
Production After 30 days	180		49%	213	90 psi	30 psi

CASING AND CEMENTING RECORD (Present Hole)

Size of Casing (API)	Top of Casing	Depth of Shoe	Weight of Casing	Grade and Type of Casing	New (N) or Used (U)	Size of Hole Drilled	Number of Sacks or Cubic Feet of Cement	Depth of Cementing (if through perforations)	Top(s) of Cement in Annulus
10-3/4"	Surf.	878'	40.5#	n/a	New	14-3/4"	506cf	n/a	Surf
7"	Surf.	8600'	26#	N-80	New	9-7/8"	1041cf	n/a	3540' (Theoretical)
5"	6798'	8747'	18#	L-80	New	6"	n/a	n/a	n/a

PERFORATED CASING (Size, top, bottom, perforated intervals, size and spacing of perforations, and method.)

5" liner slotted with 2"x0.030", 48R, 6"C slots 6863'-8699'.

Logs/surveys run? ☒ Yes ☐ No If yes, list type(s) and depth(s).
1-4-06 (8768'-6852'), Schlumberger Platform Express
12-20-05 to 1-6-06 (5000'-8815'), Petrolog mud log

In compliance with Sec. 3215, Division 3, of the *Public Resources Code*, the information given herewith is a complete and correct record of the present condition of the well and all work done thereon, so far as can be determined from all available records.

HISTORY OF OIL OR GAS WELL

Operator Breitburn Energy Company LLC Field East Beverly Hills County Los Angeles
Well WP58 Sec. 30 T. 1S R. 14W S.B. B.&M.
A.P.I. No. 037-26615 Name Chris Williamson (Person submitting report) Title Agent (President, Secretary, or Agent)
Date 3/18/2006 (Month, day, year)
Signature Chris Williamson
Address 515 S. Flower St., Suite 4800 Los Angeles, CA 90071 Telephone Number (213) 225-5900

History must be complete in all detail. Use this form to report all operations during drilling and testing of the well or during redrilling or altering the casing, plugging, or abandonment, with the dates thereof. Include such items as hole size, formation test details, amounts of cement used, top and bottom of plugs, perforation details, sidetracked junk, bailing tests, and initial production data.

Casing:	10-3/4", 40.5# , stc 8rd casing cemented surface to 878'.
	7", 26#, N-80 csg from surface to 8600', cemented with 1041cf. Estimated TOC at 3540' (theoretical).
	5", 18#, L-80 Hydril 511 liner landed at 8747', top at 6798'. ECP at 8730'.
Plugs:	None
Perforations:	5" slotted w/2"x0.030",48R,6"C slots 6863'-8699'.
Junk:	None

Drill and Complete - WP-58

Date:	Operations:	Wt. / Vis / FL
Drilling Operations		
12/12/2005	Prepped to move rig to WP-58. Installed south cellar beams. Moved rig to WP-58. Tightened quill to 32K, and all clamps on quill. Cleared all tbg and rod equipment from rig floor and derrick. Serviced rig. Changed out guide sheave on hydraulic tugger line. Inspected and tighten bolts in mast.	
12/13/2005	PU BOPE and removed x-over flange. Installed hammer unions on new suction hoses. Tack welded collars on 1st 3 jts 10-3/4" csg. Cut and revamped grading above WP-58 to install and weld 20" riser. Welded on flow line. Installed suctions, and fill line. Installed new lines on super suckers. Cleaned south cellar. Continued inspecting and tightening bolts in derrick.	
12/14/2005	Welded on flow line, and fitted to flow line for choke. Welded shoe on 10-3/4" csg. Welded shaker frame and step. PU, MU 2jts 5" HWDP. Conditioned mud. Cleaned out conductor to 53'. MU 7" magnet on 2jts 5" HWDP. RIH w/ 7" magnet, made several runs, recovered 1/2 of 5gal bucket small pieces metal, 1-1/4" shackle, bolts & nuts. PU 12jts 5" HWDP from bay, stood back in derrick. PU, MU Sperry directional tools. Drilled 53'-58', unable to make hole. RIH w/7" magnet, made several runs, recovered 5gal bucket small pieces metal, 9" valve wheel, 6" API ring, bolts and nuts.	8.5 / 45 / n/a

DIVISION OF OIL, GAS
GEOTHERMAL RESOURC

12/15/2005	Serviced EDM tower and lubricated rig. Made several runs w/7" magnet, recovered 5gal bucket full of metal. Ran 11-1/2" junk basket, no recovery. Ran used 12-1/4"bit w/junk sub, drilled 58'-68'. POH, recovered small pieces metal in junk sub. RIH w/14-3/4" H.O. w/6' extended BN. Opened to 14-3/4" 53'-60'. POH. Made several runs w/14" & 7" magnet, no metal, clean runs. POH, LD tools. PU BHA, drilled 9-7/8" hole 68'-78'. MU MWD tools, drilled 9-7/8" hole 78'-118'. RU sheaves to run Scientific gyro. Drilled and surveyed w/Scientific gyro 118'-653'. Circulated hole clean. POH to shoe. W/O mud bins.	8.5 / 39 / n/a
12/16/2005	W/O cutting bins. RIH w/9-7/8" bit and BHA to 653'. Drilled 653'-878'. Ran gyro to verify/coordinated direction. POH. RD gyro equipment. MU 14-3/4" bull nosed hole opener and RIH to 72'. Opened hole, circ hole clean. Wiped hole 878' to HO & RIH to 878'. Tight spot @350'. Circ hole clean. Trip, POH, break and LD HO. HSM & RU csg equipment. PU & RIH w/10-3/4" csg. Rig circ equipment & circ csg while RD csg equipment. W/O cementers.	9.5 / 35 / n/a
12/17/2005	HSM & RU cement equipment. Circ w/rig pump while RU. Test lines to 2500psi, pump 30bbls H2O & 18bbls mud clean. Mix and pump 66bbls (lead) cement @4.5bpm. Mix & pump 24bbls (tail) cement @4bpm, max pressure 350psi. NOTE: All lead cmt @12.5ppg & tail @14.5ppg. Cmt properties as per program, pumped 1bbl over theoretical. Did not bump plug (float would not hole) CIP @08:30, shut well in (cement to surface). RD cementers, W/O cmt. Loaded out csg equipment & cleaned cellar). Slacked off on csg. Removed cmt head, cut & removed conductor. Rough cut 10-3/4" csg & set out same. Installed wellhead & weld same. Tested weld to 3000psi (OK). Good, hard cmt around 10-3/4" csg. Set in & NU BOPE. Revamp flow line & kill line w/welder. Changed out pipe rams to 5" DP & function tested BOPE. Set test plug & tested blind rams and choke lines to 1000psi. Notified DOGGR & bled pressure & removed test plug. Made up BHA w/directional tools. NOTE: PU jars & new stab.	9.5 / 35 / n/a
12/18/2005	Tested BOPE (pipe & annular) to 1500psi. DOGGER witnessed & approved test. Continued MU BHA, scribe MWD & oriented mud mtr. PU jars & RIH w/HWDP, tag cmt @855' (did not see float). Installed rotating head rubber and lubricator. Clean out cmt to 865' (shoe), drilled out shoe. Drilled 9-7/8" hole 865'-1045'. Cleaned rubber from vac lines for cuttings (plugged). Cont dir drlg 1045'-1228'. Circ hole clean. RU & run gyro to correct surveys. Wipe hole 1228'-865'. RIH to 1228'. Cont dir drlg 1228'-1825'.	9.1 / 39 / n/a
12/19/2005	Dir drilled 1825'-2070'. Circ hole clean. Deviation survey surface to 2037'. Circ hole clean while RD gyro equipment. POH to shoe (865'). Repair rig (weld crack in cent line & repair hose to #1 pump). RIH to 1789', break circ and cont RIH to 2039'. Break circ & safety ream to 2070'. Dir drilled 2070'-2793' (survey every 60') NOTE: Some surveys still hot. Changed out grease fitting a& service swivel packing. Cont dir drlg 2793'-3545'.	9.3 / 41 / 5.6
12/20/2005	Dir drilled to 3608'. Circ clean. Wiper trip to shoe (tight 3355'-2039'). Circ @shoe. Ship 80bbls mud to storage. Serviced EDM tower. Trip in hole, stopped @1966'. Spot ream & circ to 3608'. Dir drilled 3608'-4238'. Wipe hole 4238'-3167' (tight hole to 3545'). RIH, spot reamed @3608' & 3648'. RIH to 4000'.	9.4 / 39 / 5.4
12/21/2005	Cont RIH to 4150'. Safety reamed & circ to 4238'. Dir drilled 4238'-4616'. Circ & cond mud for wiper trip. Wipe hole to 3000'. RIH (tight spot @3587'). Safety reamed and circ 4555'-4616'. Serviced EDM rig. Dir drilled 4616'-4933'. Circ & cond mud for wiper trip. Wipe hole 4933'-2010' (tight 4860'-4933'). Break circ & safety reamed 4875'-4933'. Started drilling.	9.3 / 38 / 5.2
12/22/2005	Dir drilled 4933'-4953'. Tripped (looking for DP wash out). Wash out @3608', jt #47. LD bad jt & RIH to 4953'. Dir drilled 4953'-5500'. Circ & cond for trip. POH (tight 4900'-4600'). Break out and LD MWD & dir tools, break bit. PU new MM & MU MWD & new BHA.	9.3 / 41 / 5.4
12/23/2005	Cont MU BHA. Scribe MM & MWD. RIH to shoe, test MWD. Serviced rig & repaired hydraulic leak on top drive. RIH to 4500' (break circ @2000', 3000', & spot reamed @3500'). Spot reamed 4500'-5500'. Circ bottoms up. Dir drilled 5500'-5937'. Circ & unplugged vac line for super sucker. Wiped hole 5937'-5400' (no problems). Dir drilled 5937'-6098'.	9.3 / 40 / 5.4
12/24/2005	Dir drilled 6098'-6410'. Cond mud & circ bottoms up. Wiped hole 5716'-6410' (tight spot 6350'-5900'). Circ out gas. Dir drilled 6410'-6696'. Circ bottoms up & cond mud. POH (back ream 6696'-6346').	9.4 / 37 / 5.2
12/25/2005	Cont POH to BHA. Serviced EDM tower & rig. POH & changed MM to 1.1 bend & changed stab to 9.5". RIH, fill pipe & break circ every 1500' (spot reamed when necessary). Reamed 6190'-6696'. Drilled tangent (maintained less than 2 degrees) 6696'-6888'. Circulate.	9.4 / 37 / 5.2
12/26/2005	POH to dir tools. LD all dir tools. MU NBHO, & C/O BHA as above. Trip in hole to shoe. Rig repairs, replaced motor on centrifuge. RIH w/ C/O assembly (fill pipe & break circ every 1000'). Circ bottoms up @3500' & 5500'. Reamed & C/O w/HO & stab 5500'-6886'. Circ & cond mud for csg. Trip out for csg.	9.5 / 39 / 5.2

RECEIVED

MAR 23 2006

DIVISION OF OIL, GAS
GEOTHERMAL RESOURC

12/27/2005	POH & LD stab & HO. Removed wear bushing. HSM w/csg crew & RU csg equipment. PU & RIH w/7"26# csg as per program. Broke circ @865', 1500', & 2700'. Cont RIH w/csg (broke circ @ 3500', 4400', 5500'). Cont RIH w/csg to TD (6878'). NOTE: Jts 4,5,&6 from surface Baker locked. Break circ & reciprocated pipe @6878' (no fluid loss). Up wt 220k, down wt 130k. Circ & reciprocated pipe.	9.5 / 39 / 5.2
12/28/2005	Circ & reciprocated pipe while RU csg cementers. HSM. Csg stuck (full circ), work csg trying to free up (no success). Pulled 400K (string wt 178K). Tried to rotate w/rotary table. RU cementers (25' above rotary). Started cmt job. Mixed & pumped 10bbls H2O, pressure tested lines, pumped 36bbls mud clean flush, 10bbls H2O. Mixed & pumed 152bbls lead slurry, 40bbls tail slurry. Dropped plug & displaced cmt to float collar w/260bbls H2O. Bumped plug w/1600psi. Cont pressure to 2100psi, checked float (OK). CIP @1300hrs 12/27/05. NOTE: Full circ throughout job, no reciprocation). RD cementers, make rough cut on csg above rotary. Rig csg fill tool, long links, & elevators. Load out csg equipment. ND BOPE and PU wellhead (make rough cut on csg). Set BOPE down & secure. LD cut csg and ND and set out BOPE. Make final cut on csg & dress for tbg head. Install tbg head & test to 3000psi (good). Secure well. Serviced EDM tower & rig components. Prep to move rig and skid rig to north cellar. Removed south skid beam (prep to skid rig to east end of north cellar)	9.5 / 39 / 5.2
12/29/2005	Moved rig to WP16. RU & LD V-door ext. ND wellhead and install BOPE> RU to LD HWDP. RIH w/HWDP & jars. POH, LD same (38jts HWDP & jars). Removed rotating rubber & RIH w/71stds 5" DP (4486'). Land DP in wellhead on donut. ND & set out BOPE, secure well. PU V-door ext & prep for move. Skid rig down north cellar across from WP58. Install skid beams and move to south cellar. Prepare to skid rig to WP58	9.5 / 39 / 5.2
12/30/2005	RU ext beams for rig. Cleaned mud pits. Loaded out 5" HWDP. Unloaded 3-1/2" DP. Moved rig to WP58. RU V-door ext. NU BOPE. Removed studs from gate to clear and install riser. Finished installing BOPE. Changed pipe rams to 3-1/2". Cleaned pits and sand trap. Filled pits w/water, flushed out charge pump lines.	
12/31/2005	Unloaded 3-1/2" DP. Revamped kill line. Pumped out south cellar. Revamped & welded flowline. Unloaded 4-3/4" DC's & 3-1/2" HWDP. Tested BOPE, tested blind rams, csg, choke & check valve to 1000psi for 15mins, good. Measured 4-3/4" DC's. PU, stood back 30jts 3-1/2" HWDP. Rabbited in hole. PU, stood back 6jts 4-3/4" DC's. Rabbited in hole. Removed thread protectors on 3-1/2" DP. PU, RIH w/112jts 3-1/2" DP. Rabbited in hole. POH w/3-1/2" DP, stood back in derrick.	
1/1/2006	PU, RIH w/3-1/2" X95 DP. Rabbited in hole. Changed out drive sub on top drive. Cont PU, RIH w/148jts 3-1/2" X95 DP. Rabbited in hole. POH w/3-1/2" X95 DP. Notified DOGGR, Mel Saw waved BOPE test. Serviced top drive and EDM tower, lubricated rig. MU MWD tools. Tested tools & install rotating rubber. RIH, tagged cmt at 6737'. Cleaned out cmt, float collar at 6770', and shoe at 6852'.	8.4 / 36 / n/a
1/2/2006	Drilled out shoe at 6852'. Cleaned out to 6886'. Pulled to shoe W/O mud logger. Surveyed & dir drilled 6" hole 6886'-7250'. Circ & cond KCl/Clarizan fluid. Wiped hole, pulled 25/45K over to 7000', free to shoe. Surveyed & dir drilled 6" hole 7250'-7500'. Swivel packing leaking. Pulled to shoe. Replaced & repaired swivel packing, tested ok. RIH survey & dir drilled 6" hole 7500'-7531'.	8.4 / 35 / n/a
1/3/2006	Surveyed & dir drilled 6" hole 7531'-7866'. Circ & cond KCl/Clarizan fluid. Wiped hole, pulled 20/40K to 7000', free to shoe. RIH survey & dir drilled 6" hole 7866'-8126'. Circ & cond KCl/Clarizan fluid. Wiped hole, pulled 20/50K to 7000', free to shoe. RIH, surveyed & dir drilled 6" hole 8126'-8251'. Troubleshoot noise, check pumps, ok. Changed transducer on stand pipe. Surveyed & dir drilled 6" hole 8251'-8282'.	8.6 / 36 / n/a
1/4/2006	Surveyed & dir drilled 6" hole to 8314'. Wiped hole, pulled 30/60K to 7000', free to shoe. Serviced EDM tower, greased rack, lubed rig. RIH to 8314'. Surveyed & dir drilled 6" hole 8314'-8565'. Cond & circ bottoms up. Wiped hole, pulled 30/60K to 7000', free to shoe. Serviced EDM tower, greased rack, lubed rig. Broke out to replace saver sub, quill clamps would not fit. Sent in new saver sub to be turn down. MU new saver sub. RIH to 8565'. Surveyed & dir drilled 6" hole 8565'-8750'.	8.6 / 36 / n/a
1/5/2006	Surveyed & dir drilled 6" hole 8750'-8815' (TD). Lost 150bbls. Pulled to shoe, pulled 30/60K over. Built KCl/Clarizan volume. Circ, took 66bbls to get circ. RIH to 8785'. POH (pulled 30/60K to 7000', free to shoe). Serviced EDM tower, lubed rig. Cont POH. RU Schlumberger to run PEX logs. HSM w/Schlumberger and rig crew. Tested tools. RIH w/Schlumberger PEX tool pusher logs	8.6 / 38 / n/a
1/6/2006	RIH w/Schlumberger PEX tool pusher tools. Removed rotating rubber. RIH w/Schlumberger loggers. MU side entry sub. Pumped wire line down pipe, latched tools and tested. RIH w/Schlumberger, logged 8776'-6852'. POH, removed side entry sub. POH w/Schlumberger wireline, LD tools and sheaves. RD loggers. POH, LD Schlumberger PEX tool pusher log tools. MU, RIH w/6" BHA drill assembly.	8.6 / 35 / n/a

1/7/2006	RIH w/ 6" BHA drill assembly. Loaded out excess 3-1/2" DP. RIH w/6" BHA drill assembly to 8763'. POH w/ 6" BHA. Unload & measure 2-7/8" tbg and 5" L-80 Hydril 511 liner. LD 6" BHA. RU B&L Tongs. Serviced EDM tower. HSM w/B&L, Chancellor oil tool, Hydril, and rig crew. PU, RIH w/51jts 5" 18# L-80 Hydril 511 flush liner w/5" slotted packoff assy + 4-3/8"OD ECP on bottom of liner. PU, RIH w/2-7/8" Hydril 511 inner tbg string (61jts + 6" stinger on bottom). PU, MU Chancellor 5"x 7" Hydril liner hanger + 5"x 7" top packer. REPORT ON PROPOSED CHANGE OF WELL DESIGNATION

Cypress, California
December 21, 2005

Chris Williamson
BREITBURN ENERGY CO. LP
515 South Flower St., Suite 4800
Los Angeles, CA 90071

Your request, dated **12/7/2005**, proposing to change the designation of well(s) in Sec. **30**, T. **1**S, **14**W, SB B. & M., **Beverly Hills** Field, **Los Angeles** County, District 1, has been received.

The proposed change in designation, in accordance with Section 3203, Public Resources Code, is authorized as follows:

"West Pico" 46 API No. **037-26615** shall be known hereafter as **"West Pico" 58**.

Re: **Well Name Change** - West Pico 46 to the West Pico 58
API #037-20615, Sec. 30-T1S-R14W

Please find the enclosed **DOG Form OG16** for a well name change. BreitBurn Energy requests the well,"West Pico" 46 API #037-20615, be changed to "West Pico" 58. Please review our request and approve at your earliest convenience. If you have any questions, please feel free to contact me at (213) 255-5900, extension 206.

Sincerely,

Chris Williamson
Vice President of Operations

PERMIT TO CONDUCT WELL OPERATIONS

Production Well

Chris Williamson
BREITBURN ENERGY COMPANY
515 South Flower St., Suite 4800
LOS ANGELES CA 90071

Cypress, California
November 16, 2005

Your proposal to **drill** well **"West Pico" 46**, A.P.I. No. **037-26615**, Section **30**, T. **1S**, R. **14W**, **S.B.** B. & M., **Beverly Hills** Field, **East** area, **Miocene(Hauser)** pool, **Los Angeles** County, dated **11/4/2005**, received **11/8/2005** has been examined in conjunction with records filed in this office.

THE PROPOSAL IS APPROVED PROVIDED:

1. Blowout prevention equipment with hydraulic controls, equivalent to this Division's Class **IIIB3M** requirements, or better, shall be installed and maintained in operating condition.
2. Drilling fluid of a quality and in sufficient quantity to control all subsurface conditions in order to prevent blowouts shall be used while redrilling.
3. All oil, gas or freshwater sands behind the **7"** casing shall be protected by either lifting cement or by multiple stage cementing.
4. A directional survey shall be made and filed with this Division.
5. This Division shall be consulted and a Supplementary Notice may be required before making any changes in the proposed program.
6. **THIS DIVISION SHALL BE NOTIFIED TO:**
   a. Witness a test of the installed blowout prevention equipment prior to drilling out of the **10-3/4"** casing.
   b. Witness a production water shutoff test within **60** days after the well is placed on production.

NOTE:

1. The base of the fresh water is above **500'**.
2. A crew drill may be required at the time of the blowout prevention equipment test and/or inspection.

In compliance with Section 3203, Division 3, Public Resources Code, notice is hereby given that it is our intention to commence drilling well West Pico #46, well type Oil, API No. 037-20615 (Assigned by Division)

Sec. 30, T. 1S, R. 14W, SBB.&M., East Beverly Hills Field, Los Angeles County.

Legal description of mineral-right lease, consisting of _____ acres (attach map or plat to scale), is as follows:

Do mineral and surface leases coincide? Yes ☒ No ☐. If answer is no, attach legal description of both surface and mineral leases, and map or plat to scale.

Location of well _____ feet _____ (Direction) along section ☐ / property ☐ (Check one) line and _____ feet _____ (Direction)

at right angles to said line from the _____ corner of section ☐ / property ☐ (Check one) _____ or

From the intersection of the center lines of Pico Blvd. and Oakhurst, 75' 9" north of the center line of Oakhurst, thence 112'6" east at 90o angle. Section 30-T1S/R14W SBB&M.

Is this a critical well according to the definition on the next page of this form? Yes ☒ No ☐

If well is to be directionally drilled, show proposed coordinates (from surface location) and true vertical depth at total drilled depth: 116 feet south (Direction) and 3568 feet east (Direction) Estimated true vertical depth 6437. Elevation of ground above sea level 171 feet. All depth measurements taken from top of kelly bushing (Derrick Floor, Rotary Table, or Kelly Bushing) that is 16 feet above ground.

PROPOSED CASING PROGRAM

SIZE OF CASING INCHES API	WEIGHT	GRADE AND TYPE	TOP	BOTTOM	CEMENTING DEPTHS	CALCULATED FILL BEHIND CASING (Linear Feet)
10-3/4"	40.5#	J-55	Surface	856'	856'	856'
7	26#	N80	Surface	6840'	6840'	~3000'
4-1/2"	10.5	K55	6740	8984	NA	NA

(A complete drilling program is preferred and may be submitted in lieu of the above program.)

Intended zone(s) of completion Hauser = ~1000 psi (Name, depth, and expected pressure) Estimated total depth 8984' (Feet)

It is understood that if changes to this plan become necessary, we are to notify you immediately.

CRITICAL WELL

As defined in the California Administrative Code, Title 14, Section 1720 (a), "Critical well" means a well within:

(1) 300 feet of the following:
  (A) Any building intended for human occupancy that is not necessary to the operation of the well; or
  (B) Any airport runway.
(2) 100 feet of the following:
  (A) Any dedicated public street, highway, or nearest rail of an operating railway that is in general use;
  (B) Any navigable body of water or watercourse perennially covered by water;
  (C) Any public recreational facility such as a golf course, amusement park, picnic ground, campground, or any other area of periodic high-density population; or
  (D) Any officially recognized wildlife preserve.

Exceptions or additions to this definition may be established by the supervisor upon his own judgment or upon written request of an operator. This written request shall contain justification for such an exception.

Date: 11/4/2005

BREITBURN ENERGY COMPANY, LLC

WEST PICO – EAST BEVERLY HILLS
SUMMARY DRILLING PROGRAM

WEST PICO #46 HORIZONTAL

Section 30-T1S/R14W, SBB&M
Los Angeles, CA
GL Elev.: 171'

Surface to 856' (851' TVD) – 14-3/4" Hole:

A. Directionally drill 9-7/8" pilot hole to 10-3/4" casing point at ~856' (per attached Sperry Plan #6 dated 11/2/05). Open hole up from 9-7/8" to 14-3/4" with fixed, bullnose reamer.

B. Surface Casing: 856' – 10-3/4", 40.5#, J-55, STC.

C. Cement 10-3/4" Surface Casing: Sufficient slurry to fill to surface. [10-3/4" guide shoe, 10-3/4" insert valve, centralizers at 10' above shoe, 1st, 2nd, 4th, and last collar below surface].

D. Nipple up Class III, 5M BOP (min) on 11" 3M x 10-3/4" SOW casing head and install Type B hole monitoring equipment (fill up line above BOP). Before drilling out surface casing, test all BOPE - test to be witnessed and approved by CDOGGR representative.

Intermediate Hole Section - 856' to 6840' (6087' TVD) – 9-7/8" Hole:

A. Drilling:

1. Directionally drill 9-7/8" hole to 6840'.

2. Wipe hole as conditions dictate.

3. Electric Logs: none to be run on intermediate casing point.

B. Intermediate Casing (7" at 6840'):

Casing Design: 7", 26#, N80, LTC-Buttress [type design]

Sec	Length	Interval	Wt.	Grade	Thrd
2	5500'	0- 5500'	26.0	N-80	LTC
1	1340'	5500-6840'	26.0	N-80	Butt

C. Cement 7" Production Casing:

Cement 7" casing with annular volume to fill to 500' (minimum) above the top of any hydrocarbon bearing zone. Slurry design to be determined.

D. Land 7" casing in slips with tension. N/D BOPE.

E. Install 11" 3M x 7-1/16" 5M tubing spool and test seal. NU BOPE and retest system for CDOGGR representative.

Production Hole Section - 6840' to 8984' (6437' TVD) – 6" Hole:

A. Drilling:

1. Directionally drill 6" hole to 8984'.

2. Wipe hole as conditions dictate.

3. Electric Logs: Platform Express (Induction, Density/Neutron, GR, caliper) on drillpipe.

B. Production Liner (4-1/2" at 8984'):

Casing Design: 4-1/2", 10.5#, K55, LTC [type design] – slotted (to be determined)

Drilling Fluids:

Spud mud, fresh water gel system, will be employed on surface hole section. An LSND water base mud system to be utilized for intermediate hole section. A 3% KCl Xanvis to be employed for the production hole. Recommended mud properties as follows:

Depth (TVD)	Type	Weight	Visc	F/L
0'- 1600'	Gel System	8.4-9.0	45-55	n/c
1600'- 6840'	LSND WBM	9.0-9.5	35-45	6-10
6840'- 8984'	3% KCl Xanvis	8.6-8.9	30-35	10-12

[*Mud weights are a reference, use mud weight as required for hole stability and to maintain well control.*]

All data is in Feet (US) unless otherwise stated. Directions and coordinates are relative to Grid North.
Vertical depths are relative to Well. Northings and Eastings are relative to Well.
Global Northings and Eastings are relative to NAD27 California State Planes, Zone V.

The Dogleg Severity is in Degrees per 100 feet (US).
Vertical Section is from Well and calculated along an Azimuth of 91.869° (Grid).

Based upon Minimum Curvature type calculations, at a Measured Depth of 8983.59ft.,
The Bottom Hole Displacement is 3569.81ft., in the Direction of 91.869° (Grid).

Proposal Report for West Pico - WP-807 - Plan 6 (02-Nov-05)

North Reference Sheet for West Pico - WP-807

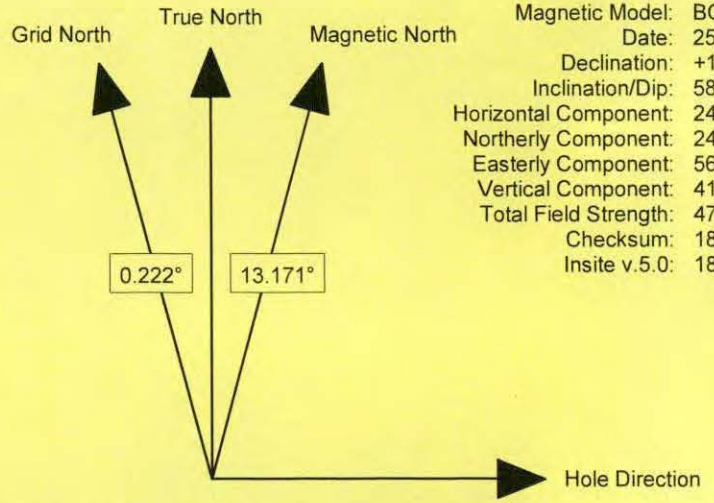
Coordinate System is NAD27 California State Planes, Zone V, US Foot
Source: Snyder, J.P., 1987, Map Projections - A Working Manual

Datum is North American Datum of 1927 (US48, AK, HI, and Canada)

Spheroid is Clarke - 1866
Equatorial Radius: 6378206.400m.
Polar Radius: 6356583.800m.
Inverse Flattening: 294.978698213901

Projection method is Lambert Conformal Conic Projection
Central Meridian is -118.000°
Longitude Origin: -118.000°
Latitude Origin: 33.500°
False Easting: 609600.00m
False Northing: 0.00m
Scale Reduction: 1.00000000

Grid Coordinates of Well: 202370.44 N, 1882022.08 E
Geographical Coordinates of Well: 34.05545817° N, 118.38948611° W
Surface Elevation of Well: 187.00ft
Grid Convergence at Surface is -0.222°
Magnetic Convergence at Surface is -13.393° (25 October, 2005)



Magnetic Model:	BGGM2004
Date:	25-Oct-05
Declination:	+13.171
Inclination/Dip:	58.909
Horizontal Component:	24752 nT
Northerly Component:	24100 nT
Easterly Component:	5640 nT
Vertical Component:	41045 nT
Total Field Strength:	47930 nT
Checksum:	1826196
Insite v.5.0:	1826196

Grid North is 0.222° West of True North (Grid Convergence)
Magnetic North is 13.171° East of True North (Magnetic Declination)
Magnetic North is 13.393° East of Grid North (Magnetic Convergence)

To convert a True Direction to a Grid Direction, Add 0.222 degrees
To convert a Magnetic Direction to a True Direction, Add 13.171 degrees
To convert a Magnetic Direction to a Grid Direction, Add 13.393 degrees

Dear Mr. McCollum:

SAFETY SYSTEMS AND ENVIRONMENTAL LEASE INSPECTION, WEST PICO DRILL SITE, BEVERLY HILLS FIELD

On November 28 and 29, 2018, Division of Oil, Gas, and Geothermal Resources (DOGGR) engineers, Stacy Sor and Max Chavez-Segura, witnessed tests of the safety systems and conducted an environmental lease inspection of wells and facilities at Pacific Coast Energy Company LP, West Pico drill site in the Beverly Hills field.

Tested safety systems responded as designed. No violations were observed during the lease inspection.

If you have any questions, please contact Ellen Plaza Moser at (714) 816-6847 or ellen.moser@conservation.ca.gov.

Thank you for your cooperation.

Sincerely,

Digitally signed

HISTORY OF OIL OR GAS WELL

Operator BreitBurn Energy Company, LP Field Beverly Hills County Los Angeles

Well "West Pico" 59 Sec. 30 T. 1S R. 14W S.B. B.&M.

A.P.I. No. 037-27133 Name Brad Pierce (Person submitting report) Title Agent (President, Secretary, or Agent)

Date 6/1/2011 (Month, day, year)

Signature Brad R. Pierce

Address 515 S. Flower St., Suite 4800 Los Angeles, CA 90071 Telephone Number (213) 225-5900

History must be complete in all detail. Use this form to report all operations during drilling and testing of the well or during redrilling or altering the casing, plugging, or abandonment, with the dates thereof. Include such items as hole size, formation test details, amounts of cement used, top and bottom of plugs, perforation details, sidetracked junk, bailing tests, and initial production data.

Date	Rework (perforate)
5/2/2011	Held safety meeting with crew and serviced rig. Rigged up and put well on vapor recovery. Installed V-door and extension. Nipple down production tree. Pulled and stood back original cylinder. Pulled rods and 2-1/4" plunger, all rods looked good. Nipple up and function tested BOPE. Pulled and stood back casing shuck and started pulling tubing. Secure well. End of tour.
5/3/2011	Held safety meeting with crew and serviced rig. Completed pulling tubing and pump. Laid down pump and gas anchor, found 4' of fine sand in gas anchor. Picked up and ran 5", 18# 1/8" under drift scraper. Below 2-7/8" bumper sub and original 2-7/8" A-95 and 8rd tubing. Tagged fill at 8,396', bottom at 8,468'. Pulled scraper above 5" liner. Secured well. End of tour.
5/4/2011	Held safety meeting with crew and serviced rig. Lowered scraper to 8,398', rigged up hoses and mud pump. Circulated well clean with 320 bbls of lease water. Recovered small amount of scale and about 10 bbls of oil. Pulled scraper and tubing to 600'. Secured well. End of tour.
5/5/2011	Held safety meeting with crew and serviced rig. Pulled kill string and laid down scraper. Installed cross-over spool and shot flange on top of BOP. Held safety meeting prior to rigging up perforators. Rigged up Tiger wireline to perforate with 2-3/8" 6SPF, 60 DEG, SDP-3375-311NT3 25 gram Hero guns as per program. Perforated the following intervals per program: 7,768' – 7,773', 7,799' – 7,805', 7,911' – 7,917', 7,926' – 7,929', 7,990' – 7,998', 8,071' – 8,077', 8,108' – 8,112', 8,159' – 8,165', 8,211' – 8,225', 8,277' – 8,284', and 8,295' – 8,303'. Rigged down Tiger wireline. Picked up and ran 5", 18# scraper to 600'. Secured well. End of tour.
5/6/2011	Held safety meeting with crew and serviced rig. Completed running tubing and 5", 18# scraper. Tagged fill at 8,380', 18' higher than 2 days before. No restrictions. Pulled tubing and scraper to 600'. Secured well. End of tour.
5/9/2011	Held safety meeting with crew and serviced rig. Pulled tubing and laid down scraper. Ran in hole with 45% cut collar below original tubing and tagged fill at 8,380'. Filled casing with 260 bbls of lease water. Recovered about 20 barrels of oil. Cleaned out fine sand and small amount of scale to bottom at 8,439'. Circulated hole clean and started pulling tubing. Secured well. End of tour.
5/10/2011	Held safety meeting with crew and serviced rig. Completed pulling original tubing. Installed circulating head on top of BOP. Picked up and ran 5" acid wash cups below original 2-7/8" A-95 and 8rd tubing to 6,600' above 5" liner. Secured well. End of tour.
5/11/2011	Held safety meeting with crew and serviced rig. Lowered and set 5" wash cups at 7,760'. Rigged up MTS acidizing services pumping equipment. Held safety meeting with MTS and BreitBurn crew. Mixed and pumped acid as per program. Washed perforations from 7,760' to 8,307' using McGraw wash cups. Displaced tubing with 45 bbls of 5% NH4CL water and dumped remaining 5% NH4CL water down casing – no pressure. Rigged down and released MTS pump services. Dropped knock out bar to drain tubing. Pulled tubing and cups above liner at 6,500'. Secured well. End of tour.
5/12/2011	Held safety meeting with crew and serviced rig. Pulled tubing and McGraw wash cups. Laid down and released wash cups. Removed circulating head. Picked up and ran replacement 2-1/2" x 2-1/4" Black Gold. Pumped water below original A-95 and 8rd 2-7/8" tubing. Installed and landed casing shuck with pump intake at 8,231'. Secured well. End of tour.
5/13/2011	Held safety meeting with crew and serviced rig. Installed skid beams and moved rig to WP59 south cellar from WP26. Found well not pumping due to pump sticking. Nipple down production tree and stroked pump with rig for 2 hours – good pump action. Nipple up production tree and return to production. End of tour.
5/16/2011	Held safety meeting with crew and serviced rig. Installed skid beams and moved rig to WP-59 south cellar. Found well not pumping due to pump sticking. Nipple down production tree and stroked pump with rig for 2 hours – good pump action. Nipple up production tree and return to production. End of tour.

REC'D JUN 02 2011 67

5/17/2011	Held safety meeting with crew and serviced rig. Well pump continued sticking. Nipple down production tree. Stroked pump with rig for 2 hours, good pump action. Nipple up production tree. Return to production. Rigged down. Prepared rig for move. End of tour.

Printed on recycled paper.

PERMIT TO CONDUCT WELL OPERATIONS

CRITICAL WELL

Brad Pierce, Agent
BREITBURN ENERGY COMPANY L. P.
515 S. Flower St., Suite 4800
Los Angeles, CA 90071

Cypress, California
April 20, 2011

Your proposal to **rework (perforate)** well **"West Pico" 59**, A.P.I. No. **037-27133**, Section **30**, T. **1S**, R. **14W**, **S.B.** B. & M., **Beverly Hills** Field, **East** area, **Hauser** pool, **Los Angeles** County, dated **04/18/2011**, received **04/17/2011** has been examined in conjunction with records filed in this office.

THE PROPOSAL IS APPROVED PROVIDED:

1. Blowout prevention equipment, as defined by this Division's publication No. M07, shall be installed and maintained in operating condition and meet the following minimum requirements:
   a. Class **II2M**, with hydraulic controls, for **downhole** operations.
   b. A **II2M lubricator** or **pack off**, for perforating operations.
2. Hole fluid of a quality and in sufficient quantity to control all subsurface conditions in order to prevent blowouts shall be used.
3. No program changes are made without prior Division approval.
4. **THIS DIVISION SHALL BE NOTIFIED TO:**
   a. Inspect the installed blowout prevention equipment prior to commencing downhole operations.
   b. Witness a production water shutoff test within **60** days after the well is placed on production.

NOTE:

1. A crew drill may be required at the time of the blowout prevention equipment inspection.
2. The Division routinely monitors monthly well production data and if anomalous water production is indicated, remedial action will be ordered.

NOTICE OF INTENTION TO REWORK / REDRILL WELL

Detailed instructions can be found at: www.conservation.ca.gov/dog/

In compliance with Section 3203, Division 3, Public Resources Code, notice is hereby given that it is our intention to rework ☒ / redrill ☐ (Check one) well "West Pico" #59, API No. 037-27133,

Sec. 30, T. 1S, R. 14W, SB B.&M., Beverly Hills Field, Los Angeles County.

The complete casing record of the well (present hole), including plugs and perforations, is as follows: (Attach wellbore schematics diagram also.)

Please see Attachment #1. Also, see attached wellbore schematics of the present condition and proposed condition.

The total depth is: 8,460 feet. The effective depth is: 8,397 feet.

Present completion zone(s): Hauser (Name). Anticipated completion zone(s): Hauser (Name).

Present zone pressure: 500 psi. Anticipated/existing new zone pressure: 500 psi

Is this a critical well as defined in the California Code of Regulations, Title 14, Section 1720(a) (see next page)? Yes☒ No☐

For redrilling or deepening only, is a California Environmental Quality Act (CEQA) document required by a local agency? Yes☐ No☒ If yes, see next page.

The proposed work is as follows: (A complete program is preferred and may be attached.)

Please see attached complete program.

If well is to be redrilled or deepened, show proposed coordinates (from surface location) and true vertical depth at total depth: ____ feet ____ (Direction) and ____ feet ____ (Direction) Estimated true vertical depth: ____

Will the Field and/or Area change? Yes☐ No☐ If yes, specify New Field: ____ New Area: ____

The Division must be notified immediately of changes to the proposed operations. Failure to provide a true and accurate representation of the well and proposed operations may cause rescission of the permit.

Address: 515 South Flower Street, Suite 4800		City/State: Los Angeles / CA	Zip Code: 90071
Name of Person Filing Notice: Brad Pierce	Telephone Number: (213) 225-5900 ext. 258	Signature: Brad R Pierce	Date: 4/18/2011
Individual to contact for technical questions: Brad Pierce	Telephone Number: (213) 225-5900 ext. 258	E-Mail Address: bpierce@breitburn.com	

This notice and an indemnity or cash bond must be filed, and approval given, before the workover begins. (See the reverse side for bonding information.) If operations have not commenced within one year of the Division's receipt of the notice, this notice will be considered cancelled.

64

INFORMATION FOR COMPLIANCE WITH THE CALIFORNIA ENVIRONMENTAL QUALITY ACT OF 1970 (CEQA)

If an environmental document has been prepared by the lead agency, submit a copy of the ***Notice of Determination*** or ***Notice of Exemption*** with this notice. Please note that a CEQA determination by a local jurisdiction, if required, must be complete, or the Division may not issue a permit.

CRITICAL WELL DEFINITION

As defined in the California Code of Regulations, Title 14, Section 1720 (a), "Critical well" means a well within:

(1) 300 feet of the following:
  (A) Any building intended for human occupancy that is not necessary to the operation of the well; or
  (B) Any airport runway.
(2) 100 feet of the following:
  (A) Any dedicated public street, highway or the nearest rail of an operating railway that is in general use;
  (B) Any navigable body of water or watercourse perennially covered by water;
  (C) Any public recreational facility such as a golf course, amusement park, picnic ground, campground or any other area of periodic high-density population; or
  (D) Any officially recognized wildlife preserve.

WELL OPERATIONS REQUIRING BONDING

1. Drilling, redrilling, or deepening any well.
2. Milling out or removing a casing or liner.
3. Running and cementing casing or tubing.
4. Running and cementing liners and inner liners.
5. Perforating casing in a previously unperforated interval for production, injection, testing, observation, or cementing purposes.
6. Drilling out any type of permanent plug.
7. Reentering an abandoned well having no bond.

This form may be printed from the DOGGR website at www.conservation.ca.gov/dog/

Notice of Intention to Rework/Redrill Well:

Attachment #1:

Company: BreitBurn Energy Company, LP
Field: Beverly Hills
Lease: West Pico
Well: #59
API#: 037-27133
Date: 4/18/2011

The complete casing record of the well (present hole), including plugs and perforations, is as follows:

Casing:

- 20" conductor cemented at 52' to surface.
- 10-3/4", 40.5#, J-55 BTC casing set at 998'. Cemented with lead slurry of 139 sacks of Class G cemen (461 cf, 12.5 ppg, 2.09 cf/sk) and tail slurry of 135 sacks of Class G cement (191 cf, 14.5 ppg, 1.56 cf/sk) Circulate 2 bbls of cement to surface.
- 7", 26#, N-80, BTC casing set at 6,939' with 8-5/8", 32#, K-55 Flush Max from 117' to surface . Cementec with slurry of 800 sacks of Class G cement (1326 cf, 13.5 ppg, 1.66 cf/sk). TOC = 4,000' (CBL shows gooc cement up to 4,000').
- 5", 18#, L-80 Hydril 511 flush max liner, set at 8,441' (float collar = 8,397'). TOL = 6,667'. Cemented witl slurry of 740 sacks of Class G cement (1,225 cf, 13.5 ppg, 1.66 cf/sk). TOC = 7,208' (CBL shows gooc cement up to 7,208').

Perforations:

- Run #1 - 5: TCP guns 3-1/8" diameter, 6 shots per foot, total of 59' perforated. Intervals: 8,165' - 8,182 (17'), 8,112' - 8,127' (15'), 8,040' - 8,057' (17'), 7,917' - 7,922' (5'), 7,900' - 7,905' (5').

GENERAL NOTES AND REQUIREMENTS

WARNING: West Pico does not have an H_2S issue, yet it is important to beware of the potenti l of hydrogen sulfide gas (H_2S) and its inherent dangers while performing well work and to ake the appropriate safeguards for dealing with H_2S gas.

WARNING: Some chemicals specified in this program have toxic properties. The Wellwork Super isor and the personnel who will be working with this program should be familiar with the inhe ent dangers of the chemicals and appropriate safeguards to prevent accidental injury. Pl ase refer to your MSDS for proper precautions regarding:

- HCl (hydrochloric acid)
- HF (hydrofluoric acid)
- NH4Cl (ammonium chloride)
- Lease oil

NOTE: Before performing job, discuss potential concerns, job procedures, equipment, and scheduling with Engineering, Wellwork Supervisor, and Rig Supervisor.

NOTE: A Safety Meeting shall be held at the job site prior to commencing work with Breitl urn Supervisor, all involved contract personnel, and appropriate BreitBurn personnel to dis uss job details. This meeting shall be documented. Some of the topics to discuss ar as follows:

- BOP Drills
- Perforating Safety
- Lock Out – Tag Out

NOTE: A safety meeting shall be held at the job site prior to commencing perforating opera ons with BreitBurn supervisor, all involved contract personnel, and appropriate Breit urn personnel to discuss job details and review perforating service company Perforating S fety Checklist.

NOTE: If there are any questions concerning the procedure, contact Dan Fouts @ 925-528-5 131 (mobile) or 213.225.0251 (office).

PROCEDURE:

1. Install 5000 psi BOPE with 2-7/8" pipe rams. Test BOPE to 3000 psi.

2. POOH rods, pump, and tubing.

3. Pick up bit and positive casing scraper for 5", 18#, N-80 casing. Trip scraper to PBTD @ 8[illegible]97'. Circulate hole clean. Notify engineering of tag and clean out depths. (Casing volume = 286 b[illegible]ls). POOH and lay down bit and scraper.

4. MI Tiger Wireline. Hold safety meeting prior to rigging up perforators. RU Tiger Wireline to perfo[illegible]ate with 3-3/8" 6SPF 60 DEG SDP-3375-311NT3 25 gram HERO guns. Correlate to Weathe[illegible]ord Induction / Neutron / Denisty / Gamma log dated 16-Dec-2010. Reference Schlumberger SCMT log dated 22-Dec-2010. Note 5" liner top @ 6667'. Perforate the following intervals:

Zone	TOP perf	BTM perf	Interval
H0	7768	7773	5
H0	7799	7805	6
H1	7911	7917	6
H1	7926	7929	3
H1	7990	7998	8
H2	8071	8077	6
H2	8108	8112	4
H2	8159	8165	6
H2	8211	8225	14
H2	8277	8284	7
H2	8296	8303	7
H3	8358	8362	4
H3	8380	8388	8
Totals			**84**

5. RDMO Tiger Wireline.

6. MIRU McGraw Tool. Hold safety meeting. Make up triple opposed cup wash tool wth 30' cup spa[illegible]cing for 5", 18#, N-80 casing. Wash tool includes, internal bypass, fluid bypass (slide valve), one Mc[illegible]raw acid control valve, a manual bar-drop knockout, and a back pressure flow valve. Fluid bypass sh[illegible]ould be open while running tool in hole to allow fluid to bypass cups. The acid control valve should be the type that is actuated by pump pressure above tubing hydrostatic (not tubing/annulus differential). RIH. Test cups once past liner top @ 6667'.

7. MIRU MTS Acidizing services pumping equipment wlth acid as follows (mixtures at specification for 160° F):
   - 3360 gallons 15% HCL containing: 3% Misol, 0.4% AI-205, 1% ISA-100, 0.3% SW-61
   - 5720 gallons 13.5%-1.5% HCL/HF containing 2% Misol, 0.4% AI-205, 0.3% ISA-100
   - 6200 gallons 5% NH4Cl

8. Hold safety meeting. Connect MTS Stimulation Services pump truck to work string. Pressure test surface lines to 2500 psi with kill fluid for 5 minutes. Fill casing annulus with kill fluid, install 0-50[illegible] psi pressure gauge on casing annulus, and monitor casing pressure during acid treatment.
   - Properly mix acid mixtures and 5% NH_4CL solution in transports prior to pumping
   - All pumping should be attempted at maximum pump rate up to 2 BPM
   - Do not exceeding 2500 psi surface pressure
   - Pump all fluids (15% Hcl, 13.5%-1.5% HCL/HF, and then 5% NH4Cl) per each set pri[illegible]r to moving cups

9. Pump acid as per following schedule:

cup set #	top cup	bottom cup	net	perf set #	top perf	bottom perf	net	tbg vol gals	15% HCl gals	HF acid gals	5% H4Cl gals
	pickle tubing				7700			1872	500	0	2000

				15	8380	8388	8				
			143'				143'	gals	3360	5720	5200
	TOTALS							bbls	80	136	148

10. Fully displace tubing with 5% NH4Cl water. Dump remaining 5% NH4Cl water down tubing ann ilus. POOH standing tubing. RDMO MTS and McGraw.

11. RIH tubing pump and 2-7/8" N80 6.5# Hydril A95 x 2-7/8" N80 6.5# EUE 8rd tubing. Set pump t: il @ 8300' +/-. Nipple down BOPE .

12. Nipple up rod rigging. RIH tapered Weatheford T66 rod string as per Black Gold design. St oke pump with rig.

13. Connect HRP unit, flowline, etc.

14. Skid rig.

Well "West Pico" 59 Sec. 30 T. 1S R. 14W S.B. B.&M.

A.P.I. No. 037-27133 Name Brad Pierce (Person submitting report) Title Agent (President, Secretary, or Agent)

Date 3/1/2011 (Month, day, year)

Signature Brad R Pierce

Address 515 S. Flower St., Suite 4800 Los Angeles, CA 90071 Telephone Number (213) 225-5900

History must be complete in all detail. Use this form to report all operations during drilling and testing of the well or during redrilling or altering the casing, plugging, or abandonment, with the dates thereof. Include such items as hole size, formation test details, amounts of cement used, top and bottom of plugs, perforation details, sidetracked junk, bailing tests, and initial production data.

Date	Drill
11/7/2010	Tore out and moved mud pump, discharge pumping. Cut grading over well #59 for pitcher nipple. Skid rig west to access east side of court yard. Clear east side of court yard. Spot trailers, sack mud, and miscellaneous equipment. Off-load skid beams and load out miscellaneous equipment to ship to Sawtelle and continue spotting sack mud. Unload V-door extension. Skid rig west to line up to well #59. Set and pin skid beams. Spot mud pump suction manifold and run accumulator lines. Transfer KCL fluid from pits to west tank. Service rig and equipment. Prepare mud room and mud tanks for cleaning. Organize equipment and materials on east side of court yard.
11/8/2010	Install rails to roll BOPE to south side of rig. Skid rig over WP-59. Using welders, revamp suction lines and installed 20" conductor and flowline. Tighten flowline flanges and installed flow sensor. Pump remaining KCL fluid from mud pits and shipped spud mud from storage to mud pits. Ready rig for drilling. Ship spud mud from storage tank to mud pits. Made up 9-7/8" bit. Back scuttled on one joint heavyweight drill pipe. Ran in hole and check for any possible junk at bottom of 20" conductor at 52'.
11/9/2010	Continued working with welders while rigging up. Measured caliper and pick up two 6-3/4" drill collars. Made up 9-7/8" bit and ran in hole with same (tag down at 59'). Kelly bushing measured (20" conductor set at 60' ground level). Wash and drill down from 59' to 65' (tagged down). Bit will not drill, may be on metal. Run #1: ran in hole with 10-1/2" magnet (no recovery). Run #2: ran in hole and circulate. Run #3: ran in hole with I-beams, slight dent on one side (outside edge). Run #4: ran in hole with 10-1/2" magnet recovered nuts and bolts. Run #5: reverse circulate sub, no recovery. Run #6: ran in hole with 7" magnet, recovered nuts, bolts, and miscellaneous metal. Made up drill assembly, 9-7/8" bit and drill collars. Ran in hole to 64'. Rotary drill 9-7/8" hole from 64' to 126' with full returns. Pulled out of hole to inspect 9-7/8" bit – good. Ran in hole to 126'. Rotary drill 9-7/8" hole from 126' to 200' with full returns. Pulled out of hole to pick up directional gyro tools.
11/10/2010	Held safety meeting. Picked up and made up directional tools and 9-7/8" bit. Held safety meeting with gyro crew. Rig up and calibrate tools. Made up directional tools and bottom hole assembly. Ran in hole to 200' and survey. Made up gyro tools and survey at 196'. Directional drill 9-7/8" hole from 200' to 292' with full returns. Survey at 261'. Empty cuttings bin. Service super sucker. Directional drill 9-7/8" hole from 292' to 415' with full returns. Survey at 353'. Held safety meeting with crew. Directional drill 9-7/8" hole from 415' to 1,000' with survey at 415', 474', 598', 722', 845'. Pump sweep circulate bottoms up from 1,000'. Pulled out of hole with directional tools and laid down. Mud motor change out, crossover on top of jars. Pick up and made up 14-3/4" bullnose hole opener with bottom hole assembly stabs at nipple down, 30' and 60'.
11/11/2010	Change two liners in #1 pump and repair trip tank pump. Service rig. Made up 14-3/4" bullnose hole opener assembly. Open 9-7/8" hole to 14-3/4" hole to 103' with full returns. Made up 14-3/4" stabilizer and one drill collar. Open 9-7/8" hole to 14-3/4" hole from 103' to 1,002' with full returns. Circulate bottoms up and pump nut shell sweep. Made wiper trip to conductor shoe and back to bottom (no tight spots at all). Circulate and condition mud with Omni pol. Pulled out of hole with 14-3/4" bullnose hole opener and laid down same (no tight spots). Clean and clear rig floor; laid down bails. Held safety meeting and rig up B&L casers to run 10-3/4" casing.
11/12/2010	Rig up B&L casers. Run 24 joints (1,001') of 10-3/4", 40.5#, J-55 BTC casing to 998' (shoe) with insert at 932'. Made up cement head, circulating hose and fill pipe. Circulate with full returns (rig down, load out B&L casers and clear support bay for BJ cementers). Circulate with full returns (Rig up BJ cementers, held safety meeting, and mix pre-flush). Cement 10-3/4" casing as follows: 20 bbls of mud clean chemical wash, 30 bbls of fresh water, lead cement of 400 cf of type III with 35% SF + additives mixed at 12.5 ppg. Tail cement in with 350 cf of Class G cement with 35% SF mixed at 14.5 ppg. Drop plug and displaced with 93 bbls mud. Bump plug with 300 psi over flowing casing pressure. Float held, cement in place at 16:00. Had full circulation throughout cementing job. Circulated 2 bbls of cement to surface – okay. Wait on cement. Rig down cementers. Ready conductor to be cut. Rig up welders. Assist welders, cut out and laid down conductor. Cut 10-3/4" casing and laid down. Clean well bay. Set in weld on well head and weld after cooling time of well head test to 1,500 psi for 15 minutes. Set in tubing spool and nipple up same. Set in riser spool and nipple up same. Set in riser adapter. Set in riser and start nipple up of Class III 3M BOPE.
11/13/2010	Continue to nipple up class III 3M BOPE. Build choke and riser lines. Run accumulator and remote control lines. Function test stack. Install pump suction plumbing, modify pitcher nipple and flowline. Held safety meeting with testers. Test BOP, choke manifold, floor valves, and mud cross – 250 psi low to 2,500 psi high for 15 minutes. Pull test plug and install wear bushing. Lay down test joint. Lay down 6-3/4" drill collars. Pick up and made up 9-7/8" bit directional assembly and ran in hole to 891'. Start testing class III 3M BOPE for DOGGR.

53 REC'D MAR 03 2011

11/14/2010	Test BOP for DOGGR, approved by Kathleen Andrews of the DOGGR. Spot and rig up gyro wireline truck and hydrocrane. Clean out cement stringers from 891' to insert at 932'. Circulate clabbered mud. Drill plug insert and hard cement to 992'. Circulate change shaker screens and shaker screen rubbers. Drill cement and guide shoe at 998'. Directional drill to 1,110' with full returns. Run gyro survey and measure while drilling survey at 1,098'. Directional drill 9-7/8" hole to 1,169' with full returns. Run gyro survey and measure while drilling survey at 1,161'. Directional drill to 1,231' with full returns. Run gyro survey and measure while drilling survey at 1,227'. Directional drill to 1,357' with full returns. Run gyro survey and measure while drilling survey at 1,353' (last scientific gyro survey released at 2200 hrs). Directional drill from 1,357' to 1,729' with full returns. Circulate bottoms up. Made wiper trip to shoe. Work on mud pump #1, swab change bay #2. Service rig and top drive. Work on mud pump #1, swab change bay #2. Ran in hole from hoe and directional drill from 1,729' to 1,824' with full returns.
11/15/2010	Circulate and clear flowline. Directional drill 9-7/8" hole from 1,824' to 2,420' with full returns. Circulate bottoms up for wiper trip. Wipe hole from 2,420' to 975'. Service rig and top drive. Work on mud pump #1, clean out swab and liner. Ran in hole to 2,233'. Safety ream from 2,233' to 2,420'. Circulate hole till clean. Directional drill 9-7/8" hole from 2,420' to 2,680' with full returns.
11/16/2010	Directional drill 9-7/8" hole from 2,680' to 2,800' with full returns. Circulate bottoms up. Pulled out of hole for bit and pipe swap. Handle bottom hole assembly, drain and inspect mud motor, break out. Service rack, top drive and equipment. Made up new bit, bottom hole assembly and shallow test measure while drilling directional tools – okay. Ran in ole with new directional tools to 1,799' and fill drill pipe (survey at 1,792'). Directional drill 9-7/8" hole from 2,800' to 3,350' with full returns.
11/17/2010	Held safety meeting with crew. Directional drill 9-7/8" hole from 3,363' to 3,518' with full returns. Circulate hole clean. Wipe hole from 3,518' to 982' (shoe) free. Service rig and top drive. Ran in hole to 2,431'. Fill drill pipe and break circulation. Ran in hole to 3,177'. Fill drill pipe and break circulation, and unplug flowline. Ran in hole to 3,395'. Safety ream from 3,395' to drilled total depth at 3,518'. Circulate hole clean. Directional drill 9-7/8" hole from 3,518' to 4,245' with full returns.
11/18/2010	Continued directional drilling 9-7/8" hole from 4,245' to 4,276' (module washed #2 mud pump). Circulate bottoms up. Pulled out of hole with drill pipe, drill collars, and heavyweight drill pipe to shoe (1,000'). Tight at 4,022' – 3,771' (25k – 35k overpull). Work on #2 mud pump (change out module). Ran in hole with drill pipe to 2,500'. Filled drill pipe. Break circulation and circulate bottoms up at 2,500'. Ran in hole from 2,500'. Wash and ream from 2,980' – 3,015', 3,118' – 3,178', 3,205' – 3,265', 3,575' – 3,590', 3,782' – 3,841'. Continued to run in hole from 3,841' to 4,276'. Mixed and pump sweep and circulate bottoms up. Directional drill 9-7/8" hole from 4,276' to 4,680' with full returns.
11/19/2010	Directional drilling 9-7/8" hole to 4,838' with full returns. Circulate for wiper trip. Pulled out of hole to 3,500' (no problems). Add drill pipe below heavyweight drill pipe and run in hole to 4,760'. Pump high viscosity sweep. Safety ream to 4,838'. Circulate bottoms up. Directional drill 9-7/8" hole from 4,838' to 5,282' with full returns. Mixed and pumped viscosity sweep to pull out of hole to surface. Pulled out of hole from 5,281' to change out bit and mud motor (no problems).
11/20/2010	Continued to pull out of hole to bit break and lay down bit and mud motor. Service rig and equipment. Break and change out 6-5/8" Reg x 4" Fh saver sub on top drive. Made up new mud motor and bit #4. Install new measure while drilling probe. Run in hole with bottom hole assembly (fill pipe and test measure while drilling at 1,010'). Continued to run in hole to 2,500'. Fill pipe and circulate bottoms up. Continued to run in hole and fill pipe. Circulate bottoms up at 3,750'. Run in hole to 5,225'. Fill pipe and mix sweep. Circulate sweep around, safety ream from 5,225' to 5,281'. Directional drill 9-7/8" hole from 5,281' to 5,800' with full returns.
11/21/2010	Continued directional drilling 9-7/8" hole to 5,847' with full returns. Circulate and condition hole clean. Pulled out of hole to 4,970', add drill pipe to string. Ran in hole to 5,790'. Circulate sweep around safety ream from 5,790' to 5,847'. Directional drill 9-7/8" hole from 5,847' to 5,974' with full returns. Replace valve and seat #2 mud pump (reciprocate pipe). Continued directional drilling 9-7/8" hole from 5,974' to 6,220' with full returns. Mixed and pumped sweep. Circulate bottoms up for wiper trip. Wipe hole to 10-3/4" shoe, 25k – 35k overpull from 5,880' – 5,865' and 5,820' – 5,795'. Serviced rig and top drive.
11/22/2010	Continued to service rig and equipment. Measured rabbit and pick up 28 joints of 4" full hole drill pipe. Ran in hole to 2,500' and filled pipe. Continue to run in hole to 3,750'. Fill drill pipe. Break circulation and condition mud; circulate bottoms up. Ran in hole to 5,000', when gear box on "C" motor went bad. Rig up swedge and circulate hole. Pull "C" motor and gear box. Rig power at 80% = 350k Max pull. Reciprocate pipe to ensure free. Continue to run in hole from 5,000' to 6,170'. Fill drill pipe. Break circulation and safety ream from 6,170' to 6,220'. Circulate and condition mud bottoms up. Directional drill 9-7/8" hole from 6,220' to 6,778' with full returns.
11/23/2010	Continued to directional drill 9-7/8" hole from 6,778' to 6,903'. Circulate bottoms up. Pulled out of hole to 6,590' (pulled tight). Circulation and back ream out to 6,150'. Continued pulled out of hole to shoe (1,000'). Rig repairs (install gear box and "C" motor). Pulled out of hole from 921' to top of tools (133'). Trip in hole with directional tools and heavyweight drill pipe. Trip in hole from 133' to 845'. Change oil in new gearbox. Trip in hole from 133' to 845'. Change oil in new gearbox. Trip in hole to 2,500' and fill pipe, and continued to trip in hole to 3,731'. Repair leaking 2" nipple on stand pipe. Filled pipe and circulate bottoms up (thick mud). Trip in hole to 5,280'. Circulate bottoms up (thick mud / 504 units trip gas). Crew change. Service rig and equipment. Continue to trip in hole.
11/24/2010	Continued trip in hole (tight at 6,660'). Ream out continued trip in hole to 6,845'. Safety ream to 6,903'. Circulate bottoms up (1,400 units gas). Directional drill 9-7/8" hole from 6,903' to 7,405' (7" casing total depth). Mix and pump high viscosity LCM pill around until clean. Pulled out of hole (tight 40-50k over) from reaming assembly. Back ream intermittent tight spots from 7,195' to 6,690'. Pulled out of hole from reaming assembly. Lay down directional tools and pull wear bushing. Made up 9-3/4" bullnose hole opener, 9-3/4" new bit stab, one 5-3/4" SDC, 9-3/4" stab, one 5-3/4" SDC, cross-over, cross-over, jars, cross-over, 19 joints of 4" heavyweight drill pipe. Trip in hole with stiff reaming assembly to 997' (shoe). Service rig and equipment. Continue to run in hole with 9-3/4" bullnose hole opener stiff reaming assembly.
11/25/2010	Continued to run in hole to 5,783' (tight). Fill drill pipe and circulate bottoms up at 5,300' and 3,250'. Ream and wash out from 5,783' to 5,900'. Circulate bottoms up 1,200 units gas. Continued to run in hole to 5,973', ream to 6,031'. Continued to run in hole to 6,099', ream and wash down to 6,602'. Continued to run in hole to 6,860', wash and ream to 7,405' (casing total depth). Circulate hole clean. Wipe hole – tight at 7,370'. Back ream intermittent tight hole from 7,370' to 6,900'. Continued to wipe hole to 5,720', normal drag – no back reaming. Ream in hole to drilled total depth of 7,405' (7" casing point). Circulate and condition hole for running 7" casing. Attempt to wipe hole – tight hole from 7,400' to 6,727', pulled ~ 50k over. Wipe hole to shoe (back ream tight spot at 6,430').

REC'D MAR 03 2011

11/26/2010	Service rig and equipment. Run in hole with drill pipe to 6,400' (fill pipe at 3,000' and 5,000'). Wash and ream out tight spots from 6,400' to 7,400'. Circulate hole clean, spot torque ease. Pulled out of hole drill pipe (spotting tight spots), 25-50k overpull up to 6,400'. Mixed and pumped dry job. Continued to pull out of hole form 7" casing. Lay down stabilizers and bullnose hole opener. Stand back 5-3/4" SDC's and clear floor. Held safety meeting. Rig up to run casing. Made dummy run with 8-5/8" mandrel joint and landing joint rack, 3 joints in derrick. Made up stab-in circulating tool and pick up 22' bails and 7" elevators. Made up float shoe, 2 joints of 7", 26#, N-80 BTC casing and float collar. Continue running 7", 26#, N-80 BTC casing.
11/27/2010	Continued to pick up and run in hole with 163 joints of 7", 26#, N-80 BTC casing using fill-up tool to 6,940' where casing became stuck after making a connection. Circulate and work stuck casing (pulling 380k max power with rig). Could not work free. Released equipment and rearrange equipment in service bay for cement trucks while circulating. Circulate and work stuck casing pulling to 380k with no movement. Isolate pill pit, bring on 70 bbls of lease crude oil from BreitBurn production facility. Spot 60 bbls of crude oil in open hole from 7,000' to 5,700'. Displace 1 bbls of crude oil per hour. Work pipe to 300k and held 250k between displacement intervals.
11/28/2010	Continued to work casing at 375k and circulate lease crude across tuck interval with no success. Rig repairs lost all power (BreitBurn mechanic made repairs), 80% power. Held safety meeting with cementers and rig crew. Finish rigging up and test pumps and lines to 4,000 psi. Mix and pump 40 bbls mud clean, 20 bbls of water followed by 236 bbls of cement slurry (13.5 ppg = 1,326 cf with 1.66 yield). Drop bottom plug and displace cement with 262 bbls of water. Bump plug with 1,430 psi. 600 psi over float collar plug. Open bleeder (float holding). Cement in place at 11:00 am on 11/28/2010. Rig out cementers. Wait on cement. While waiting on cement, clean and clear pipe bay, load out cement equipment, and clean rig floor. Rig down cement head and casing bails. Transfer mud from mud pits. Held safety meeting with crew. Ship mud out and clean mud pits. Held safety meeting with hands and casing crew. Rig up equipment back off 7" casing. Backed off approximately 18 joints. Laid down top 3 joints of 7" casing. Picked up and made up 8-5/8" casing and run in hole. Tag and attempt to screw into 7" casing, made 3 turns and torque up to 4,000#. Looks as if 7" is cross threading where backed off. Backed out and cross thread and unscrewed at crossover (8-5/8" to 7"). Made up 7" spear and run in hole to 119'. Spear 7" casing. Set spear pull 4k over string weight. Backed off 7" casing (free). Pulled out of hole with spear and 13 joints of 7" casing; laid down same.
11/29/2010	Trip out of hole with 13 joints of 7" casing (collar on the bottom of last joint, threads damaged) from 676'. Pulled fluid from work bay troughs and cellars. Service rig while waiting on casing collar with starting lip. Made up lipped casing collar with starting lip and run 13 joints of 7", 26#, N-80 and 3 joints of 8-5/8", 32#, K-55 Flush Max BTC casing. Screw onto 7" casing stub at 676'. Mix KCL fluid and rig down B&L casers. Rig up to pressure test casing and test casing to 1,500 psi for 15 minutes (good test). Held safety meeting with crew and third party hands. Attempt to set 8-5/8" casing slips. Pulled 100k+ on casing when casing pin pulled out at ~884'. Rig up casing crew. Pulled out of hole with 3 joints of 8-5/8" casing and 15 joints of 7" casing with box on bottom. Wait on Central Fishing hand. Pick up and make up casing cutter (SLM). Run in hole to 917' to make mechanical cut for casing bowl tie-back patch. Locate collar at 931.14', pulled up 9' and made mechanical. Cut at 922.14'. Pulled out of hole with 7" casing cutter and laid down same.
11/30/2010	Pulled out of hole with 7" casing. Laid down same 7" casing stub at 918'. Made up and trip in hole with polish mill. Dress casing stub in preparation for casing tie-back patch installation. Pulled out of hole and laid down dressing mill. Service rig and equipment. Picked up 1 joint of 8-5/8" casing. Changed damaged casing collar, laid down casing. Made up tie-back casing patch, cross-over, 7" and 8-5/8" casing, and screw casing patch onto 7" casing stub at 918'. Pull test casing patch to 60k and pressure test to 1,500 psi for 15 minutes. Both tests were okay. Drop casing slips through BOP stack and set casing slips with 50k lbs. Rig down B&L casers equipment. Pick up 4-ways remove kill and choke line, remove dresser sleeve and pitcher nipple. Break bolts on well head and pick up stack. Rig up welder and cut 8-5/8" casing and dress casing. Prepare well head and set in pack off. Pressure test to 1,500 psi for 10 minutes (good test). Set down stack and nipple up stack. Test blind rams to 1,500 psi for 15 minutes (good). Installed wear bushing. Repair leak on IBOP control ram on top drive. Lay down 2 joints of 8-5/8" casing. Ran in hole with 5-3/4" drill collars and 19 joints of 4" heavyweight drill pipe and jars. Pulled out of hole with 4" heavyweight drill pipe, 5-3/4" drill collars and jars. Lay down same.
12/1/2010	Lay down and load out 5-3/4" drill collars and 6-1/4" jars. Made up steerable bottom hole assembly and pick up 3-1/2" heavyweight drill pipe. Shallow test measure while drilling tools and continue to pick up 3-1/2" heavyweight drill pipe. Service rig and equipment. Test BOPE for DOGGR, test witnessed and approved by Nazeeh of DOGGR. Tri p in hole with 3-1/2" drill pipe to 4,000'. Made up inside safety valve. Fill pipe and retest BOPE test for DOGGR. BOP test not passed by DOGGR agent Ellen Moser due to lack of dual valve assembly on wellhead on 3" choke side. Wait on valve for choke line (repair IBOP on top drive). Clean pit area and rig floor. Pulled out of hole from 3,232' and change out mud motor and bit. Ran in hole with 4-3/4" outside diameter 4:5 lobe 6.3 stage mud motor and Reed-Hyc 7" pilot bit.
12/2/2010	Held safety meeting with crew. Run in hole from 124' to 1,273' and fill hole. Service rig and top drive. Repair top drive with BreitBurn electrician. Run in hole from 1,273' to 3,232'. Held safety meeting with crew. Assist mechanic with repairs to top drive IBOP. Install valve on choke side of BOP. Rebuild pop-off on pump #1. Change paddle and seat on 3" valve on pump #1. Wait on DOGGR for BOPE test, while waiting made pre-test of BOPE (tested good – unload and strap 5" liner 1,968.75'). Cleaned rig floor. Greased rack and track from top drive. Test BOPE for DOGGR, witnessed by Nazeeh and John Huff (test good). Ran in hole from 3,232' to 6,774'. Tag cement at 6,774' (71' above insert collar at 6,845'). Drill cement from 6,774' to insert collar at 6,845'. Shoe track and shoe at 6,939'.
12/3/2010	Continue drilling cement and guide shoe at 6,939'. Roll hole over to Cross-Anvis 3% KCL drilling fluid. Clean out cement stringers and ream from 6,939' to 7,405'. Directional drill with 4-3/4" x 7" SRWD to 7,475'. Circulate gas cut mud (3,048uts circulated down to 900uts before drilling ahead). Directional drill with 4-3/4" x 7" SRWD hole from 7,475' to 7,814' with full returns (hole taking 5-10 bbls/hr). Circulate hole from trip to shoe. Pulled out of hole from 7,814' to 6,878' (casing shoe). Service rig and top drive, clean rig floor. Run in hole, tight spots at 6,945'. Ream from 6,945' to 7,436'. Circulate out gas cut mud (2,400uts down to 1,005uts). Continued to ream from 7,436' to 7,563'. Run in hole to 7,751' and safety ream from 7,751' to 7,814'. Circulate bottoms up (gas 2,300 units circulated down to 300uts). Directional drill with 4-3/4" x 7" ream while drilling from 7,814' to 8,065' with full returns.
12/4/2010	Directional drill 7" hole with 4-3/4" x 7" SWRD to 8,245' with full returns. Wipe hole to shoe, 30k-50k over normal drag from 8,195' to 8,070'. Diminishing to normal drag by 7,690'. Service rig and top drive. Trip in hole to 8,196' (spot ream tight hole from 7,510' to 7,570'). Attempt to circulate and safety ream – no returns. Pulled out of hole (near identical drag as 1st trip), some light swabbing. Attempt to circulate at 7,695' – no returns. Pulled out of hole, normal drag at 7,405'. Circulate with full returns at 7,260'. Pulled out of hole to shoe at 6,939'. Build mud volume. Circulate and condition mud at 6,945'. Ran in hole from 6,945'. Tight spot at 7,230' – 7,242'. Ran in hole from 7,242' to 7,476'. Circulate bottoms up and circulate gas cut mud 2,800uts. Ream from 7,476' to 7,560'. Continued to run in hole to 8,060'. Safety ream tight spot 8,060', packed off. Pulled up to 7,940'. Reamed back to 8,215'. Lost circulation at 8,215'. Pulled up to 7,940'. Attempt to regain circulation. Mixed LCM in pill pit. Pulled out of hole to 6,847' (92' above shoe), normal drag no swabbing. Build mud volume and mix LCM.

REC'D MAR 03 2011

12/5/2010	Trip in hole. Ream out tight spot at 8,180'. Wash and ream to bottom (lost returns at 8,215'). Pumped 66 bbls of LCM slug and displaced slug out of drill pipe (10 ppb magma fiber). Pulled out of hole to shoe (drill pipe pulling wet and hole standing full). Circulate gas cut mud (1100u peak) and build mud volume. Flow check (okay) and pulled out of hole for rotary assembly. Pulled out of hole and laid down directional tools. Rack out directional tools, unload sack mud and load out cuttings bin. Build volume and mix LCM. Made up rotary assembly: 7" ream while drilling bit sub, float sub, one 4-3/4" SDC, 6-1/8" stabilizer, one 4-3/4" drill collar, 6-1/8" stabilizer, jars, 23 joints of 3-1/2" heavyweight drill pipe. Ran in hole to 6,111'. Filled pipe and ran in hole to 7,119' (tag). Ream from 7,119' to 7,159' and lost circulation at 7,159'. Pulled up to 7,097'. Spot LCM pill, 15 bbls of 20 lbs per bbl magma fiber. Pulled out of hole from 7,997' to 6,911'. Circulated out gas cut mud. Ran in hole from 6,911' to 7,159' and lost circulation at 7,159'. Pumped 15 bbls of LCM pill. Pulled out of hole to shoe (flow check) and build volume. Mixed LCM and weight up to 9.0 ppg.
12/6/2010	Build volume, mud weight to 9.2 ppg and mix heavy LCM. Wash in hole from shoe to 7,065' with full returns. Spot ream to 7,336' – packing off some loosing approximately 25 bbls/hr mud. Circulate gas cut mud (2,700u). Wash and ream from 7,336' to 7,346', wash to 7,356'. Ream to 7,410' – packing off and continued to wash down. Circulate, mud losses are better only 5 to 10 bbls/hr. Large amounts of cuttings in returns. Wash down from 7,474' to 7,726' with full returns. Continued to ream and back-ream hole down to 8,190'. Washed and reamed tight spot from 8,190' to 8,195' and lost returns again. Back ream through tight spot. Worked tight hole from 8,195' to 8,100', pulling 120K over with no returns (lost 100+ bbls of mud). Pulled out of hole from 8,195' to shoe to build mud volume and mix LCM.
12/7/2010	Build volume and mix LCM. "A" rack motor inoperable. Assist BreitBurn mechanic remove "A" rack motor. Build volume and mix LCM. Assist BreitBurn mechanic on replacing "A" rack motor (8 hrs). Troubleshoot #1 mud pump. Service rig and top drive. Ran in hole and washed down from 6,911' to 7,236'. Wash and ream from 7,236' to 7,283' (free). Circulate gas cut mud 2,100u. Ran in hole and washed down from 7,283' to 7,400'. Circulate hole clean. Ran in hole and spot ream from 7,400' to 7,611'. Hole packed off some. Cleared and spot reamed 7,611' to 7,663'. Circulate bottoms up with full returns. Ran in hole and spot ream from 7,663' to 7,977' with full returns. Circulate bottoms up with full returns. Ran in hole and spot ream from 7,977' to 8,165' with full returns.
12/8/2010	Continued to wash and ream in hole to 8,190' (packed off, losing fluid – approximately 45 bbls). Pulled out of hole to 8,130'. Attempt to regain circulation (30 bbls). Pulled out of hole to 7,950' (no circulation), 35 bbls lost. Pulled out of hole to 7,350' (regained partial circulation). Pulled out of hole to 7,200' and regained full circulation. Pumped 25 ppg of LCM pill. Pulled out of hole to shoe at 6,939'. Service rig and equipment. Ran in hole to 7,230' (tagged bridge). Wash and ream through to 7,300'. Continued to run in hole to 8,175'. Filled drill pipe and circulate bottoms up at 7.5 bpm. Cleaned out to 8,193', lost circulation at 8,193' – losing mud. Pumped 40 bbls of 45 ppb LCM pill and chased to bottom (cleaned out to 8,222' while pumping pill). Pulled out of hole tight spots at 7,946', 40K over and at 7,800', 40K over. Back ream from 7,615' to 7,600' and continue to shoe at 6,939'. Let 40 bbls of 45 ppb. Sit and build volume. Mix LCM pill. Ran in hole from shoe. Tight spot at 7,300'. Wash through and continue to run in hole to 8,165'. Break circulation. Lost circulation 75% regained, 100% circulated. Pumped 45 bbls of 45 ppb pill. Washed from 8,165' to 8,222'. Spotted pill. Pulled out of hole from 8,222'. Tight at 8,200', 30K over. Tight at 7,385', 45K over. Continued to pull out of hole to shoe at 6,939' (condition mud and mix LCM). Ran in hole from shoe. Tight spot at 7,925'. Washed from 7,925' to 7,977'. Ran in hole and wash reamed from 8,175' to 8,222'. Lost 100% circulation and pumped 70 bbls of LCM pill. Pulled out of hole from 8,222' to shoe. Tight at 7,300', 40K over pull. Build volume and mixed LCM pill (lost 152 bbls).
12/9/2010	Build volume and rebuild LCM pill. Ran in hole and tag down at 7,365' (wash and ream to 7,375'). Continued to run in hole to 8,195' (no more tight spots). Wash and ream from 8,195' to 8,245' with no returns. Drill 7" ream while drilling hole from 8,245' to 8,257' with no returns. Pumped 50 bbls of LCM pill (45 ppb) and spot on bottom at 8,257'. Pulled out of hole to shoe 6,939'. Tight spot from 7,650' to 7,600'. Build volume (mud weight 9.5 ppg with viscosity of 46). Continued to pull out of hole to bit and laid down same. Pick up tubing tongs and air slips. Picked up 2-7/8" tubing (16 joints of 2-7/8" tubing – 504.21'). Lay down tubing tongs and air slips. Ran in hole with 16 joints of 2-7/8" tubing on drill pipe. Ran in hole to 7,400' and washed to 7,542' – lost circulation (lost 15 bbls). Pulled out of hole to shoe (no tight spots). Service rig and top drive. Clean charge pump area and monitor well (loss of 8 bbls). Circulate to shoe and lost 7 bbls of mud. Ran in hole from shoe to 7,375' tag. Washed to 7,419'. Continued to run in hole to 7,480', kelly up wash down to 7,540'. Continue to run in hole to 7,700' at report time.
12/10/2010	Continued to run in hole from 7,700' to 8,115'. Filled pipe and break circulation. Washed and reamed from 8,115' to 8,177'. Continued to circulate (full returns) at 8,177' (reciprocate pipe) while rigging up cementers. Held safety meeting. Washed tubing string down from 8,177' to 8,240' (lost returns at 8,215'). Rig cementers to drill pipe. Test pump and lines to 2,500 psi. Mix and pump 10 bbls of 10% calcium chloride water, pump 5 bbls of water. Mix and pump 20 bbls of sodium silicate water and pump 10 bbls of water. Mix and pump 21 bbls (123 cf) or 300 liner ft of cement with LCM additives. Displaced with 7 bbls of water and 66 bbls of mud at 7 bpm with 1,350 psi. Cement in place at 11:45 am. Rig out cementers. Pulled out of hole with drill pipe to 6,939' (shoe). Circulate out drill pipe until clean. Build volume in pits while waiting on cement. Pulled out of hole with 2-7/8" tubing on drill pipe. Laid down 8 joints of 2-7/8" tubing (bent). Service rig and top drive. Change oil in gear end "A" motor. Made up 7" ream while drilling tool and drilling bottom hole assembly. Run in hole to 3,399' and 6,911', filled pipe. Continued to run in hole, tight spot at 7,410'. Wash to 7,474', continue to run in hole.
12/11/2010	Ream to wash to 8,043' with full returns. Tag cement at 8,043'. Circulate one and half bottoms up. Wash and ream through cement stringers from 8,043' to 8,215', lost returns at 8,215'. Drill firm cement to 8,227'. Pulled out of hole to 7,380' (9-7/8" hole) and mix LCM pill. Trip in hole to 8,225'. Pump and displace 80 ppb LCM slug. Pulled out of hole to shoe, initially partial returns when pumping slug, then lost circulation. Drill pipe pulled wet and hole stayed full during trip to shoe. Mixed LCM pill, build volume, and assist BreitBurn mechanic. Made IBOP repairs and replace top drive gripper dies. Trip in hole to pump LCM pill. Ran in hole 8,222', 50% circulate and pump LCM pill (80 bbls of 80 ppb). Pulled out of hole to shoe. Build volume and mix LCM pill of 80 bbls of 80 ppb. Ran in hole to 7,500', tight spot. Wash to 7,538' and continue to run in hole to 8,165'. Wash and ream to 8,257'. Drill from 8,257' to 8,259'. Lost circulation pump (80 bbls of 80 ppb pill). Pulled out of hole to shoe. Build volume and mix LCM 80 bbls 80 ppb. Service rig and top drive. Pulled out of hole for pumping cement plug #2 for loss circulation zone.
12/12/2010	Continue to pull out of hole for cement plug #2. Rack back rotary assembly. Picked up 15 joints (472.7') of 2-7/8" tubing and trip in hole with 80 joints of 3-1/2" drill pipe and 4" drill pipe to 8,176'. Circulate gas cut mud, spot, and rig up BJ cementers. Wash to 8,259', set back one stand (70-90% returns). Circulate with open ended 2-7/8" tubing at 8,239' with full returns (wait on BJ supervisor from 16:30 – 17:15). Ran in hole to 8,259'. Mixed and pumped 10 bbls of water, test lines to 2,500 psi. Pumped 10 bbls calcium chloride, 5 bbls of water spacer, 4.5 bbls sodium meta-silicate, and 10 bbls water spacer. Mixed and pumped 20 bbls of 13.6 ppg cement slurry, 7.2 bbls water spacer. Displaced with 70 bbls mud (cement in place at 19:10). Had full returns during cementing operations. Pulled out of hole from 8,259' to 7,610'. Circulate pipe clean. Closed annular BOP and down squeeze at 1 bmp from 100 psi up to 500 psi where down squeezed total of 7.3 bbls of cement. Hole standing full. Pulled out of hole to shoe to work on rig ("C" motor on rack out). Assist BreitBurn mechanic to pull and fix "C" motor bad bearing. Also, change out snail on charge pump. Assist Petrol Solids with repairs to shaker.

50 REC'D MAR 03 2011

12/13/2010 Assist BreitBurn mechanic to pull and fix "C" motor bad bearing. Repair IBOP and test to 500 psi (okay). Circulate condition mud. Pulled out of hole from shoe and laid down 2-7/8" tubing tail (pipe spinners broke down). Lost power to rack motors – ground fault on "B" motor. Also, clean out seal on "C" motor (function test good). Continue to run in hole from 3,824' to 4,897', fill pipe (rig will not go up or down, called BreitBurn electrician and mechanic). Assist electrician and mechanic troubleshoot electrical problem. Continued to run in hole from 4,897' to 6,158', and 6,911' filled pipe. Run in hole to 7,726', little tight. Wash and ream from 7,726' to 7,852'. Circulate out gas cut mud (2,600 uts).

12/14/2010 Continue to circulate out gas cut mud (2,600 uts). Tag firm cement at 7,852'. Drill firm to medium hard cement to 8,170' with full returns. Drill from 8,170' with 10% cement returns to 8,245' and loss circulation. Pump 50 bbls of 70 ppb LCM pill. Continue to drill ahead from 8,245' with 75% returns. Returns almost to full to 8,270'. Drill from 8,270' to 8,350' with full returns. Circulate bottoms up at 8,350' as per mud logger / geologist.

12/15/2010 Circulate for mud loggers / geologist. Rotary drill ahead as directed by geologist from 8,350' to 8,416' with 70% returns. Rotary drill ahead as directed by geologist to 8,460' with 95% returns. Circulate for mud logger / geologist. Wipe hole to shoe at 6,939' (no tight hole). Repair #1 pump. Trip in hole. Safety ream bottom 60', circulate and condition mud. Lost 700 psi SPP, check surface equipment, and drop carbide. Pulled out of hole to surface (no tight hole). Found missing nozzle in bit was caused due to pressure drop. Service rig and top drive. Ran in hole 7" ream while drilling tool. Circulate and condition hole for e-logs. Spot LCM pill on bottom.

12/16/2010 Circulate gas cut mud (2,300 uts). Spot 90 ppb LCM pill into open hole. Drop rabbit. Pulled out of hole for drill pipe conveyed e-logs (2-1/8" rabbit 4" drill pipe, 1-13/16" rabbit, 3-1/2" drill pipe). Work on IBOP linkage. Made up Weatherford drill pipe conveyed logging tools. Trip in hole with logging tools to 2,756'. Test logging tools and circulate. Service rig (crew change). Ran in hole to shoe. Filled pipe and test log tools (good test). Continued to run in hole to 8,435'. Wash and circulate down to 8,450'. Circulate out gas cut mud (2,350uts). Continue to wash and circulate down to 8,460' (total depth). Pulled out of hole to 8,360'. Pump deployment dart and deploy log tools, 85' tools with gamma ray, neutron, density, induction, caliper, logs). Log from 8,445' to 6,500'. Continued to pull out of hole to down load logging tools.

12/17/2010 Lay down logging tools, process logs, and rig out loggers. Service rig and equipment. Trip in hole with clean out assembly 6-1/8" bit, N/B stab with float, one SDC, stab one drill collar, stab jars, 23 joints of heavyweight drill pipe, 80 joints of 3-1/2" drill pipe, cross-over, 4" drill pipe to surface. Clean out bridge from 8,445' to 8,450'. Ream to bottom at 8,460'. Circulate and condition mud, build volume. Circulate at 6 bpm to ensure hole is stable for cementing. No losses. Pumped 80 bbls of 80 ppb magma-fiber pill. Pulled out of hole for 5" liner. Lay down stabs and bit. Held safety meeting with casers and crew. Pick up and rigged up casers. Found 6 bad joints of flush max and lay aside. Picked up 46 joints (1,747') of 5", 18#, L-80 Hydril 511 flush joint liner. Start to run in hole with 5", 18#, L-80 Hydril liner. Picked up liner hanger where top of liner will be at 6,685' (liner lap 258.44').

12/18/2010 Change bails, rig down, and load out B&L casers. Made up liner hanger assembly and stand back top drive – cement head. Trip in hole with 46 joints of 5", 18#, L-80 Hydril 511 liner on 4" drill pipe. Filled pipe each 10 stands to 8,441'. Made up top drive with cement head. Liner got stuck at 8,441' (~19' off bottom) and attempt to circulate through liner. Work 5" liner (max pull 275k / 130k over normal drag). Pressure up to 1,600 psi and up-plugged liner. Circulate out gas cut mud. Circulate and attempt to work 5" liner free at 8,441'. Circulate gas cut mud at 4 bbls/min (2,500 uts) and work pipe. Continue to circulate gas cut mud at 4 bbls/min and work 5" liner 275k / 130k over normal drag. Spot 250 gal CFR in mud system and continue to try to free liner with full returns.

12/19/2010 Circulate with full returns at 8,441' (shoe). Drop ball and set liner hanger slips at 2,200 psi. Shear ball seat at 2,800 psi and unscrew from liner. Rack back one drill pipe single and made up cement head. Circulate while rigging up BJ cementers. Held safety meeting. BJ cementers pumped 20 bbls of mud clean and 20 bbls of water. Lead cement of 760 cf (312 sacks / 135 bbls) of Class G cement with lost circulation additives (8 lb/sk Kolite) cement mixed at 12.0 ppg. Displaced using 106 bbls of lease water, plug did not bump. Full circulation during cement operations. Float held okay. Cement in place at 11:50 on 12/19/2010 (traces of pre-flush at bottoms up while changing well over to lease water). Test liner top packer 1,000 psi for 5 minutes – okay. Circulate and change well over to lease water. Rig down cementers and rack back cement head. Pulled out of hole with 4" drill pipe and liner tools. Lay down liner tools and cement heads. Ran in hole with 3-1/2" drill pipe heavyweight drill pipe and 4-3/4" drill collars. Pulled out of hole and laid down 3-1/2" drill pipe heavyweight drill pipe and 4-3/4" drill collars. Service rig and top drive. Clean out sand trap and ready pits to be cleaned by third party cleaners.

Completion

12/20/2010 Clean mud pits, pit rooms and transfer mud to east tank. Pull and haul KCL / Polymer fluid from east tank while tripping in with 7" casing scraper. Clean mud pits while trip in hole with 6-1/8" bit and 7" casing scraper (tag at 6,667' – top of liner). Pulled out of hole from 6,667' with 6-1/8" bit and scraper. Lay down same. Off load truck of 2-3/8", 47#, N-80 EUE tubing. Laid out and strap (1,931'). Rig up tubing equipment on rig floor. Service rig, top drive and rack. Picked up and made up 4-1/8" bit and 5" scraper on 2-3/8" tubing. Ran in hole to 1,931' with 4" drill pipe.

12/21/2010 Trip in hole with 4-1/8" bit and 5" casing scraper on 64 joints of 2-3/8" tubing and 4" drill pipe tagging at 8,392' (4' high of float). Mixed 5% KCL with lease water and roll hole over with same. Pulled out of hole with 4-1/8" bit and scraper for CBL/USIT log. Rig up Schlumberger. Ran in hole with CBL/USIT logs. Tag at 8,392' (PBTD). Logging tool not functioning. Pulled out of hole to surface. Troubleshoot logging tools. Laid down and swap out with back up log tools (CBL/USIT). Ran in hole with Schlumberger back-up CBL/USIT logs.

12/22/2010 Run Schlumberger CBL/SCMT log from 8,390' to 2,500' with top of cement at 7,208'. Rig down Schlumberger. Wait on orders. Spot and rig up Tiger Wireline. Monitor well. Ran in hole with perf guns on wireline. Correlate to perf at 8,198' – 8,200', 4 spf (no fire). Pulled out of hole with perf gun, change out firing head. Ran in hole with perf guns on wireline, correlate to perf at 8,198' – 8,200' (4 spf). Pulled out of hole with perf gun. Rig down Tiger wireline. Attempt to inject into perf holes (air in fluid). Picked up and made up 4-1/8" bit on 5" scraper. Attempt to establish injection rate pressure up to 500 psi at 16 bpm. Bled down to 300 psi quickly then held steady at 100 psi. Unable to establish injection rate without possibly breaking down formation.

12/23/2010 Trip in hole with casing scraper to 6,900' and pull out of hole to top of liner. Shut in well and establish injection rate of 0.16 bpm at 400 psi, well bled down and held 100 psi. Bleed off pressure and open well. Wait on orders. Pulled out of hole with casing scraper for TCP guns (unload and measure 2-7/8" completion tubing). Strap, unload and pick up TCP guns/unload and measure 2-7/8" completion tubing. Pick up 3-1/8" TCP guns (total of 303' of TCP guns and blank pipe). Top shot to be at 7,900' and bottom shot at 8,182'. Trip in hole with TCP guns. Shut down due to top drive "F" motor out at 6,560'. Notified mechanic. Assist mechanic in removing the "F" motor. Removed "F" motor and bypass. Continued to run in hole with TCP assembly to 8,199'. Rig up wireline and run in hole to correlate using open hole log. Tools stopped at 3,400' still in 4" drill pipe. Run in hole and pump logging tools down hole. Run in hole and start to correlate gamma ray / RA marker with open hole E-logs.

REC'D MAR 03 2011

12/24/2010	Run in with wireline for perf correlation. Pull wireline and rig down wireline truck. Made (16') correction to TCP guns to correlate with Gamma log. Drop and pump ball, pressured up to 2,800 psi when drill pipe banged and jumped up. Well flowed approximately 11 – 12 bbls of fluid then went static. Monitor well (-1/4 bbls of fluid loss in 5 min). Pulled out of hole, laid down and load out TCP guns (firing head intact, firing head inoperable – therefore no TCP guns fired). Trip in hole with 4" drill pipe to just above liner top (204 joints). Begin to pull out of hole and lay down 4" drill pipe on to trailer. Lay down total of 110 joints and secure onto trailer. Continue to pull out of hole and lay down 4" drill pipe.
12/25/2010	Lay down 4" drill pipe and pull wear bushing. Change bales and rig up to pick up 2-7/8" tubing. Rabbit and pick up 2-7/8", 6.5#, N-80 8rd tubing completion / work string with no go to 6,574' (212 joints). Rig up and pump 57 bbls of 0.5% KCL down tubing (1-1/2 tubing volume). Pulled out of hole standing back 2-7/8" completion / work string. Blew 2 half inch lines on top drive. Tracing down / bypass hydraulic lines to top drive. Both mechanics notified.
12/26/2010	Continue pulling out of hole with 2-7/8" completion / work string (load 4" drill pipe on trailer to haul to Sawtelle). Picked up 22 joints of 2-7/8" tubing and stood back in derrick (load 4" drill pipe on trailer to haul to Sawtelle). Pick up TCP guns and trip in hole with 2-3/8" and 2-7/8" tubing (spot and rig up wireline truck). Held safety meeting and rig up to run wireline correlation log. Pump down wireline RA / Gamma ray correlation log and correlate to open hole e-logs guns on depth. Make 9' correction (pull up hole 9'). Dropped ball and pumped down hole, pressure up to 2,800 psi. Felt jerk on tubing string same as last time. Pulled out of hole standing back all tubing keeping the hole full. Pulled out of hole with tubing and guns. Break off firing head (firing head had debris with flour sand in head). No shots fired. Spoke to Baker about running guns on wireline. Lay down 3-1/8" TCP perf guns. Spoke to Larry from Baker, they ran a simulation to run guns on wireline, looked to be okay. Made up 5" scraper on 2-3/8" and 2-7/8" tubing. Will run in hole to 8,182'. Trip in hole with 5" scraper.
12/27/2010	Continue to trip in hole with 5" scraper to 8,204' – no sand fill at holes at 8,198' to 8,200'. Circulate hole clean (4) casing volumes. Take samples of fluid checking for sand, some minor sand in fluid samples. Pulled out of hole and laid down 5" casing scraper. Rigged up Baker Atlas. Installed / tested lubricator and diverter. Ran in hole and correlate cased hole collar log to perf strip log using liner top and short joint. Perf with 3-1/8" perf guns at 6 spf at 60 degree phase, perf the following: Run #1: from 8,165' to 8,182' (17'), Run #2: from 8,112' to 8,127' (15'), Run #3: from 8,040' to 8,057' (17'), Run #4: from 7,917' to 7,922' (5'), Run #5: from 7,900' to 7,905' (5'). Total of 59' perforated, all shots fired. Fluid level dropped approximately 100' after shooting per intervals. Rig down Baker wireline unit. Monitor well (no flow). Tally and pick up 2-7/8" flush joint completion string, and stand back. Fill well.
12/28/2010	Stood back 2-7/8" HYD tubing. Made up gas anchor, rod pump barrel and two joints of HYD A-95 tubing and hydrotest assembly to 2,500 psi. Run 34 joints of 2-7/8" HYD A-95 6.5# tubing hydrotesting to 2,500 psi. Made up 5-1/2" No-go and HYD / 8rd cross-over. Run 212 joints of 2-7/8" 6.5# N-80 tubing to bottom gas anchor 7,872', 7,807' (pump intake). No go at 6,635', hydrotesting to 2,500 psi. Rig down and load out hydrotester. Made up and land tubing hanger / casing shuck into tubing spool. Nipple down Class III 3M BOPE. Rig up to run rods. Pick up TWE plunger to 6 1-1/2" K-Bars, start to pick up new sucker rods. Picked up 2-1/4 x 60 plunger. 6 1-1/2" x 20 K-bars, 40 – 3/4", 142 – 7/8", 75 – 1" new sucker rods. Space, sub-up, and clamp off rods. Rig down rod equipment and prepare well to bring on to production.
12/29/2010	Installed hydraulic lines to cylinder pump and install flow lines (rigging down and hauling out drilling equipment). Pull HRP, re-space rod pump, and install HRP. Test hydraulic pump and production equipment – okay. Slide rig to north cellar and dismantle skid beams. Final Report – Kenai will start one crew daytime operation.

REC'D MAR 03 2011

NATURAL RESOURCES AGENCY OF CALIFORNIA
DEPARTMENT OF CONSERVATION
DIVISION OF OIL, GAS, AND GEOTHERMAL RESOURCES

No. P 110-0882

SUPPLEMENTARY NOTICE

Detailed instructions can be found at: www.conservation.ca.gov/dog/

A notice to the Division of Oil, Gas, and Geothermal Resources, dated 12/22/2010, stating the intentic ı to

Drill (Drill, Rework, Abandon) well West Pico #59, API No. 037-27133,

Sec. 30, T. 1S, R. 14W, SB B.&M., Beverly Hills Field, Los Angeles County

should be amended because of changed conditions.

The complete casing record of the well (present hole), including plugs and perforations, is as follows: (Attach we bore schematics diagram also.)
Please see Attachment #1 and current wellbore schematics.

The total depth is: 8,460 feet. The effective depth is: 8,441 feet.

Present completion zone(s): N/A (Name). Anticipated completion zone(s): Hauser (Name).

Present zone pressure: N/A psi. Anticipated/existing new zone pressure: 1,000 psi.

We now propose: (A complete program is preferred and may be attached.)
Please see attached complete program.

If well is to be redrilled or deepened, show proposed coordinates (from surface location) and true vertical depth at total depth: _____ feet _____ (Direction) and _____ feet _____ (Direction) Estimated true vertical depth: _____

Will the Field and/or Area change? Yes☐ No☒ If yes, specify New Field: _____ New Area: _____

The Division must be notified immediately of changes to the proposed operations. Failure to provide a true and accurate representation of the well and proposed operations may cause rescission of the permit.

Name of Operator			
BreitBurn Energy Company, LP			
Address: 515 South Flower Street, Suite 4800		City/State: Los Angeles / CA	Zip Code: 90071
Name of Person Filing Notice: Brad Pierce	Telephone Number: 213-225-5900 ext. 258	Signature: for Brad Pierce	Date: 12/22/2010
Individual to contact for technical questions: Brad Pierce	Telephone Number: 213-225-5900 ext. 258	E-Mail Address: bpierce@breitburn.com	

This notice must be filed, and approval given, before the operations begin. If operations have not commenced within or ı year of the Division's receipt of this supplementary notice, this notice will be considered cancelled.

OG123 (1/09)

CRITICAL WELL DEFINITION

As defined in the California Code of Regulations, Title 14, Section 1720 (a), "Critical well" means a well within

(1) 300 feet of the following:
  (A) Any building intended for human occupancy that is not necessary to the operation of the well; or
  (B) Any airport runway.
(2) 100 feet of the following:
  (A) Any dedicated public street, highway or the nearest rail of an operating railway that is in general use;
  (B) Any navigable body of water or watercourse perennially covered by water;
  (C) Any public recreational facility such as a golf course, amusement park, picnic ground, campground or any other area of periodic high-density population; or
  (D) Any officially recognized wildlife preserve.

WELL OPERATIONS REQUIRING BONDING

1. Drilling, redrilling, or deepening any well.
2. Milling out or removing a casing or liner.
3. Running and cementing casing or tubing.
4. Running and cementing liners and inner liners.
5. Perforating casing in a previously unperforated interval for production, injection, testing, observation, or cementing purposes.
6. Drilling out any type of permanent plug.
7. Reentering an abandoned well having no bond.

This form may be printed from the DOGGR website at www.conservation.ca.gov/dog/

Supplementary Notice:

Attachment #1:

Company: BreitBurn Energy Company, LP
Field: Beverly Hills
Lease: West Pico
Well: #59
API#: 037-27133
Date: 12/22/2010

The complete casing record of the well (present hole), including plugs and perforations, is as follows:

Casing:

- 20" conductor cemented at 52' to surface.
- 10-3/4", 40.5#, J-55 BTC casing set at 998'. Cemented with lead slurry of 139 sacks of Class G cemen (461 cf, 12.5 ppg, 2.09 cf/sk) and tail slurry of 135 sacks of Class G cement (191 cf, 14.5 ppg, 1.56 cf/sk) Circulate 2 bbls of cement to surface.
- 7", 26#, N-80, BTC casing set at 6,939' with 8-5/8", 32#, K-55 Flush Max from 117' to surface . Cementec with slurry of 800 sacks of Class G cement (1326 cf, 13.5 ppg, 1.66 cf/sk). TOC = 4,000' (CBL shows gooc cement up to 4,000').
- 5", 18#, L-80 Hydril 511 flush max liner, set at 8,441'. TOL = 6,667'. Cemented with slurry of 740 sacks o Class G cement (1,225 cf, 13.5 ppg, 1.66 cf/sk). TOC = 7,208' (CBL shows good cement up to 7,208').

GENERAL NOTES AND REQUIREMENTS

WARNING: **West Pico does not have an H_2S issue, yet it is important to beware of the potentia l of hydrogen sulfide gas (H_2S) and its inherent dangers while performing well work ind to take the appropriate safeguards for dealing with H_2S gas.**

WARNING: **Some chemicals specified in this program have toxic properties. The Wellw ork Supervisor and the personnel who will be working with this program should be familiar with the inherent dangers of the chemicals and appropriate safeguard: to prevent accidental injury. Please refer to your MSDS for proper precauti ns regarding:**

- **5% KCL water**

NOTE: **Before performing job, discuss potential concerns, job procedures, equipment, ind scheduling with Engineering, Wellwork Supervisor, and Rig Supervisor.**

NOTE: **A Safety Meeting shall be held at the job site prior to commencing work v ith BreitBurn Supervisor, all involved contract personnel, and appropriate BreitB irn personnel to discuss job details. This meeting shall be documented. Some of the topics to discuss are as follows:**

- **BOP Drills**
- **Perforating Safety**
- **Lock Out – Tag Out**

NOTE: **A safety meeting shall be held at the job site prior to commencing perfora ing operations with BreitBurn supervisor, all involved contract personnel, ind appropriate Breitburn personnel to discuss job details and review perforating ser ice company Perforating Safety Checklist.**

NOTE: **If there are any questions concerning the procedure, contact Dan Fouts @ 925-! 28-9131 (mobile) or 213.225.0251 (office).**

PROCEDURE:

1. Install 5000 psi BOPE with 2-7/8" pipe rams. Test BOPE to 3000 psi.

2. Pick up bit and positive casing scraper for 7", 26#, N-80 on 2-7/8" tbg. Clean out to TOL @ 6667'. POOH and lay down bit and scraper.

3. Pick up bit and positive casing scraper for 5", 18#, N-80 on 2-7/8" tbg. Clean/drill out to 8380' (Note: PBTD = FC = @ 8397') Circulate hole clean. Turn hole over to 5% KCl. (Casing volume = 286 bbls). POOH and lay down bit and scraper.

NOTE: Contact Breitburn engineering with TOC immediately after bond logging and prior to RDMO Schlumberger.

4. MIRU Schlumberger Wireline. RIH USIT with inline wheeled centralizers and attempt to free-fall to bottom. Log from PBTD across 5" liner top @ 6667' to TOC inside 7" casing. POOH. RDMO Schlumberger.

5. IF USIT can not free-fall to bottom, POOH and rig down Schlumberger. Pick up drill pipe and tubing with wireline re-entry guide, mule shoe, bell collar, or similar on bottom. RIH to +/- 5000' (hole angle <50 degrees). Install Schlumberger pump-in sub.

6. RU Schlumberger 1-11/16" SCMT. RIH to 2500'. Engage pump as per Schlumberger recommendation bpm and pump down tool to +/- 5000'. Log from PBTD across 5" liner top @ 6667' to TOC inside 7" casing. POOH. RDMO Schlumberger.

7. Contact John Huff @ DOGGR to discuss bond log and determine need for liner lap tests. Conduct positive and negative liner lap tests as required.

8. Pick up 2-7/8" 6.5# N80 EUE 8rd x 2-3/8" 4.7# N80 EUE 8rd tubing.

---

9. MIRU Tiger Wireline. Correlate to Schlumberger SCMT log dated 22-Dec-2010. Shoot 2 @ 4spf @ 8198'-8200'. RDMO Tiger Wireline.

10. Fill hole with 5% KCl water. Pressure up against perfs to maximum of 500 psi at ¼ bpm or minimal pump rate. If pressure bleeds, repeat. Establish injection rate if possible. If pressure does not bleed off, call isolation good and proceed to step 15.

11. RIH tubing-set drillable cement retainer for 5" 18# casing on 2-3/8" x 2-7/8" tbg. Set retainer @ 8150' +/-. Verify injection rate. Sting tubing out of retainer. Pressure up to 1000 psi. Bleed off pressure.

12. MIRU cementing company (TBD) to pump 10 bbls standard cement as per Drill Tek recommendation. (NOTE: Have cementing company be prepared to pump additional 10 bbls.) Pump cement to tail. Sting into retainer. Pump 3-5 bbls cement. Begin hesitating. Pump cement at ½-1 bbl increments seeking lock up. If cement does not lock up, over displace cement with 5-10 bbls of KCL water and repeat this step. POOH standing back tubing.

13. RIH bit/mill and drill out retainer and cement. Note depths.

14. Repeat pressure test as per Step 10 (with tubing in hole) and Steps 11-13 if necessary. PO OH standing back tubing.

NOTE: Prior to running TCP guns, review with the rig crew and other operati ns personnel the Baker-Hughes TCP Manual "TCP Explosives Safety Policies : nd Procedures" dated August 2003.

15. MIRU Baker Atlas. Prep to run tubing conveyed perforating guns on 2-3/8" x 2-7/8" tubin . Run TCP guns from as follows from bottom to top:
    a. 282' – 3-1/8" EHC Predator XP TCP guns
    b. 10' gun spacer
    c. Firing head
    d. Diverter sub
    e. 2 joints 2-3/8" tubing
    f. RA Marker collar
    g. 2-3/8" x 2-7/8" tubing to surface

16. RIH with Baker Atlas wireline through tubing GR/CCL and correlate to Weatherford open hc le logs dated 12/17/2010. Pump down tools as required with 5% KCl. Space out TCP guns tc perforate interval 7900'-8182' (total TCP gun length = 282', total perfs = 59') as follows:

Table #1: Proposed Perforations

Zone	TOP perf	BTM perf	Interval
H1	7900	7905	5
H1	7917	7922	5
H2	8040	8057	17
H2	8112	8127	15
H2	8165	8182	17
Totals			**59**

17. Nipple down BOPE and Nipple up wellhead and connect lines to production. Install Ba ker Atlas wellhead recording device to verify that TCP guns fire. Drop 5/8" ball and pressure u to detonate TCP guns.

18. POOH standing back tubing. Lay down and inspect TCP guns to verify all shots fired. RD MO Baker.

19. RIH tubing pump (as per Black Gold) and 2-7/8" N80 6.5# Hydril 895 x 2-7/8" N80 6.5# E UE 8rd tubing. Nipple down BOPE .

20. Nipple up rod rigging. RIH rods as per Black Gold. Install HRP cylinder.

21. Connect HRP unit, flowline, etc.

22. Skid rig to WP 20.

REPORT ON OPERATIONS

CRITICAL WELL

Cypress, California
April 28, 2011

Brad Pierce, Agent
BREITBURN ENERGY CO. L.P.
515 S. Flower Street, Suite 4800
Los Angeles, CA 90071

Your operations at well **"West pico" 59,** A.P.I. No. **037-27133**, Section **30**, T. **1**S, R. **14**W, S.B. B & M., **Beverly Hills** Field, **Los Angeles** County, were witnessed on **12/01/10**. **Nazee Heda,** representative of the supervisor, was present from **2400** to **0300.** There was also present **Mark Stevenson, Rig Kenai** .

The operations were performed for the purpose of testing the blowout prevention equipment and installation.

DECISION: APPROVAL

DEFICIENCIES: None.

DEFICIENCIES NOTES AND CORRECTED:
1. Need dual control valves on the choke line next to the wellhead.

UNCORRECTABLE DEFICIENCIES: None

CONTRACTOR: **Kenai**

Los Angeles, CA 90071

Your operations at well **"West pico" 59,** A.P.I. No. **037-27133**, Section **30**, T. **1S**, R. **14W**, S.B. B & M., **Beverly Hills** Field, **Los Angeles** County, were witnessed on **11/14/2010**. **Kathleen Andrews,** representative of the supervisor, was present from **0430** to **0800.** There was also present **Mike Feaster, Company Super** .

The operations were performed for the purpose of testing the blowout prevention equipment and installation.

DECISION: APPROVAL

DEFICIENCIES: None.

DEFICIENCIES NOTES AND CORRECTED:
1. No notice of intent to drill form at drill site.
2. Accumulator working pressure was adjusted from 2700 psi to 3000psi.
3. Fifth nitrogen cylinder brought to accumulator to increase gallons of emergency backup system working fluid.

UNCORRECTABLE DEFICIENCIES: None

Los Angeles, CA 90071

Cypress, California
July 08, 2010

Your proposal to **drill** well **"West Pico" 59**, A.P.I. No. **037-27133**, Section **30**, T. **1S**, R. **14W**, **S.B.** B. & M., **Beverly Hills** Field, **East** area, **Repetto and Hauser** pools, **Los Angeles** County, dated **6/14/2010**, received **7/7/2010** has been examined in conjunction with records filed in this office.

THE PROPOSAL IS APPROVED PROVIDED:

1. Blowout prevention equipment with hydraulic controls, equivalent to this Division's Class **IIIB3M** requirements, or better, shall be installed and maintained during **drilling** operations.
2. Drilling fluid of a quality and in sufficient quantity to control all subsurface conditions in order to prevent blowouts shall be used.
3. Sufficient material to control lost circulation of drilling fluid shall be available for immediate use at the well site.
4. A directional survey shall be made and filed with this Division within 15 days of completion of drilling.
5. **A Supplementary Notice shall be filed with this Division prior to completion of the well.**
6. This Division shall be consulted and a Supplementary Notice may be required before making any changes in the proposed program.
7. **THIS DIVISION SHALL BE NOTIFIED TO:**
   a. Witness a test of the installed blowout equipment prior to drilling out cement in the shoe of the **10 3/4"** casing.
   b. Witness a test of the installed blowout equipment prior to drilling out cement in the shoe of the **7"** casing.

NOTE:

1. A crew drill may be required at the time of the blowout prevention equipment test.
2. The base of the freshwater sands is at **500'+/-**.

NOTICE OF INTENTION TO DRILL NEW WELL

Detailed instructions can be found at: www.conservation.ca.gov/dog/

In compliance with Section 3203, Division 3, Public Resources Code, notice is hereby given that it is our intention to drill well "West Pico #59, well type Oil, API No. 037-27133 (Assigned by Division)

Sec. 30, T.1S, R. 14W, SB B.&M., Beverly Hills Field, Los Angeles County.

Legal description of mineral-right lease, consisting of 1.1 acres (attach map or plat to scale), is as follows:
Tract 6380 - Lots 884, 885, 886, and 887; as per attached plat.

Do mineral and surface leases coincide? Yes☒ No☐. If answer is no, attach legal description of both surface and mineral leases, and map or plat to scale.

Location of well 19.45 feet North (Direction) along section ☐ / property ☒ (Check one) line and 108.97 feet East (Direction)

at right angles to said line from the centerline of Oakhurst corner of section ☐ / property ☒ (Check one) Sec 30,T1S/R14W SBBM and

Lat./Long. in decimal degrees, to six decimal places, NAD 83 format: Latitude: 34.055468 Longitude: -118.390414

If well is to be directionally drilled, show proposed coordinates (from surface location) and true vertical depth at total depth:
44.54 feet North (Direction) and 3,541.95 feet East (Direction). Estimated true vertical depth 6,527'. Elevation of ground above sea level 171 feet. All depth measurements taken from top of RKB (Derrick Floor, Rotary Table, or Kelly Bushing) that is 16 feet above ground.

Is this a critical well as defined in the California Code of Regulations, Title 14, Section 1720(a) (see next page)? Yes☒ No☐

Is a California Environmental Quality Act (CEQA) document required by a local agency? Yes☐ No☒ If yes, see next page.

CRITICAL WELL DEFINITION

As defined in the California Code of Regulations, Title 14, Section 1720 (a), "Critical well" means a well within:

(1) 300 feet of the following:
  (A) Any building intended for human occupancy that is not necessary to the operation of the well; or
  (B) Any airport runway.
(2) 100 feet of the following:
  (A) Any dedicated public street, highway or the nearest rail of an operating railway that is in general use;
  (B) Any navigable body of water or watercourse perennially covered by water;
  (C) Any public recreational facility such as a golf course, amusement park, picnic ground, campground or any other area of periodic high-density population; or
  (D) Any officially recognized wildlife preserve.

This form may be printed from the DOGGR website at www.conservation.ca.gov/dog/

BreitBurn Energy Company, LP
West Pico #59 (Grass Roots Well)
Sec. 30–T1S/R14W SBB&M
Los Angeles County, CA
Drilling Program

Pre-Spud

- **Secure all necessary permits.**
- **All field personnel to have complete understanding of quiet work environment conditions and all working restrictions of the Pico Drill Site.**
- Skid rig over as necessary to retrieve all 5" DP- **all pipe to be rabbited prior to use**.
- LD excess 5" DP (keep enough 5" along with BHA to reach 9-7/8" hole depth of 7,313').
- Skid over 808 slot (WP 59)
- Prefab riser for surface hole
- Install the accessory rig equipment
    1. flowline (welded)
    2. connect all PVT devises
    3. fill mud pits with water (verify flow paths)
    4. check cameras working on rig floor and in mud room
    5. verify gas buster is clear of all debris (ie cement)
    6. RU super sucker, service, verify its ability to perform (check in-take lines)
    7. Make sure all bumper hoses running to the rig pumps are not rubbing on subbase or equivalent metals
    8. Verify storage tanks are ready for drilling sequence
- Notify Soli-Bond of start up of drilling operations
- Rig crews to have understanding in well control and BOPE operations

Drilling Operations

1. Directionally drill 14-3/4" surface hole to ~1000' MD (950' TVD).

    a. Install prefab riser with fill-up line and valve in cellar to drain conductor after surface cement job.
    b. MU 9-7/8" bit IADC 1-1-7 on Sperry Steerable BHA **(PU 3 7" DC's and HWDP – all BHA to be rabbited prior to use).** *Scientific Gyro will be needed to steer well.*
    c. Drill surface hole to fit casing (depth of fixed 14-3/4" reamer cleanout +4' up on floor) following Sperry's Plan #7, no wiper trips required on surface hole unless hole conditions dictate.
    d. MU 14-3/4" extended (5') bullnose fixed reamer on BHA to open 9-7/8" hole to 14-3/4" f/ surface to ~851'.
    e. Condition hole for 10-3/4" casing.
    f. Run & cement (**see Detailed Cement Program by Bud Frederick**) 10-3/4", 40.5#, J55, STC casing to surface (have plenty of sugar on site for potential cement returns). Perform planned top job.
    g. WOC
    h. Install 10-3/4" x 13-5/8" 3M SOW head & test weld to ~500 psi.

    Drilling Fluid properties:

Interval	Mud Weight	PV	YP	Fluid Loss	% LGS
14-3/4" Hole	8.6	15-25	15-25	<nc	<6%

BreitBurn Energy Company, LP
West Pico #59 (Grass Roots Well)
Sec. 30–T1S/R14W SBB&M
Los Angeles County, CA
Drilling Program

2. Install 13-5/8" Class III (3M) BOPE.

   a. Install a 13-5/8" DOG Class III (3M) SRRA BOPE.
   b. Install test plug and test rams, choke & kill lines to 1000 psi; annular preventer to 1000 psi. Notify the Cypress CDOGGR office at (714) 816-6847 for witnessing test. Install wearbushing.

3. Directionally drill 9-7/8" hole to 6,700' (4,912' TVD). Mudlogger to be installed above Repetto.

   a. Re-run 9-7/8" IADC 1-1-7 bit on Sperry Steerable BHA & RIH. *Scientific Gyro will be needed to ~2000'+ due to wellbore interference.*
   b. Directionally drill 9-7/8" hole per the Sperry Well Plan #7.

      - Wipe hole as drilling conditions warrant or every 24 hrs, whichever comes first
      - Keep pipe moving at all times!
      - **Always use pipe spinners in/out of hole!**
      - **There will be required trips to reposition DC's, HWDP & DP in order to drill the curve**

   c. Take MWD surveys every 30' while drilling curve and in slide mode. Survey every 60' while drilling in rotary mode.
   d. Drill to intermediate casing point TD (to fit 7" casing).

      Drilling Fluid properties:

Interval	Mud Weight	PV	YP	Fluid Loss	% LGS
9-7/8" Hole	8.6-9.3	15-25	15-25	<8	<6%

      - Ensure pH (6.5-7.0) is kept in acetic state in order to stabilize wellbore
      - Discuss the use of lubricants with drilling engineer prior to treatment
      - Increases in mud weight must be cleared through the drilling engineer prior to implementation, mud weight to be kept as low as practical
      - Pre-treat drilling fluid with lost circulation material prior to drilling into Repetto and Hauser zones

   e. Condition hole for 7" casing with **Reaming BHA**. POOH. **Pull wearbushing prior to running 7" casing.**

      Reaming BHA = 9-3/4" extended (5') bullnose hole opener on DP with DC's, HWDP & jars spaced out

4. Run 7", 26#, N80, Buttress casing as follows:
   Casing Design:

Sec	Length	IntervalSize	Wt.	Grade	Thrd	
1	6,700'	0' – 6,700'	7"	26.0	N-80	Butt

BreitBurn Energy Company, LP
West Pico #59 (Grass Roots Well)
Sec. 30–T1S/R14W SBB&M
Los Angeles County, CA
Drilling Program

Note: Watch running speed to avoid excessive surge pressure (use circulating fill-up tool).

a. Float guide shoe
b. 2 joints of casing
c. Float collar
d. Casing to reach 3-5' above rotary table (add flag joints if needed)
e. Install centralizers as follows: Semi-Ridged Centralizers every joint to 6,700'; regular centralizers every other joint to 1400'
f. Baker-lock the shoe track and **joints 4,5 &6 below rotary table**
g. Make-up Torque required for casing:
   Buttress
   Special Torque for jts 4, 5 & 6 & Last 3 jts xxx lbs

Note: If lost circulation occurred while drilling the open hole, a stage collar may be implemented for a 2-stage cement job.

5. Prior to cementing, circulate a minimum 150% of the hole volume. Reduce YP to <10. Reciprocate casing while circulating and cementing.

6. Cement 7" casing w/ ~ 2000 ft3 cement w/ casing 3-5' off bottom. **Detailed Cementing Program by Bud Frederick**:

   a. Clear pump and lines with water.
   b. Drop top plug & displace with 3% KCl Xanvis Drill-in Fluid to float collar.
   c. Bump plug with 500 psi and check floats.
   d. Monitor annulus for gas migration.

7. Remove BOPE. Cut and dress the 7" casing stub. Install a 13-5/8" (3M) X 11" (3M) tubing head with secondary seal. Test seal to 1500 psi with the 7" x 10-3/4" annulus valve open.

8. Secure wellbore and skid rig to where 5" DP may be stored or trucked off.

9. Run all 5" DP in storage wellbore. Skid rig back to WP #59.

10. Nipple-up 13-5/8" Class III (3M) BOPE **(DSA required from 11" 3M to 13-5/8" 3M)**

    a. Install a 13-5/8" DOG Class III (3M) SRRA BOPE. Test Blind rams to 1000 psi.
    b. Test rams, choke & kill lines to 1000 psi; annular preventer to 1000 psi. Notify the Cypress CDOGGR office at (714) 816-6847 for witnessing test. Install wearbushing.
    c. PU sufficient 3-1/2" DP along with BHA to reach 6" hole TD.

11. Directionally drill 6-1/8" hole to 8,399' (6,527' TVD).

    a. MU 6-1/8" PDC bit on DP & Sperry Steerable BHA **(all 3-1/2" DP & 30, 3-1/2" HWDP; 6, 4-3/4" DC's to be rabbited prior to use)**. Final drill string design to be determined based on torque/drag modeling.

BreitBurn Energy Company, LP
West Pico #59 (Grass Roots Well)
Sec. 30–T1S/R14W SBB&M
Los Angeles County, CA
Drilling Program

b. Directionally drill 6-1/8" hole per the Sperry Well Plan #7 to TD at 8,399' MD / 6,527' (TVD).

- Wipe hole as drilling conditions warrant or every 24 hrs, whichever comes first
- Keep pipe moving at all times!
- **Always use pipe spinners in/ out of hole!**

c. Take MWD surveys every 30' while in slide mode. Survey every 60' while drilling in rotary mode.
d. Drill to anticipated liner TD casing point (~8399' MD).

Drilling Fluid properties: **3% KCl X-anvis Fluid**

Interval	Mud Weight	Visc	Chlorides
6-1/8" Hole	8.6	36-42 sec	15000 ppm

e. Condition hole for e-logs and 5" liner by running reaming BHA. POOH.

Reaming BHA = 6-1/8" extended (5') bullnose hole opener on 3-1/2" DP with BHA above.

12. Wire-line e-logs or DP Conveyed Logging – Option. Run e-logs as directed.

Logs	Depths
Induction-Density-Neutron-Microlog-GR	f/ 8,399' to 6,700'

RD loggers.

13. RIH w/ reaming 6-1/8" BHA. Condition hole for 5" liner with reaming BHA. POOH (re-rabbit DP).

14. PU & run 5", 18#, L-80, Hydril 511 flush liner f/ 8,399' to ~ TOL 6,400' with circulating shoe on bottom and hydraulic set liner hanger on top.

15. Run 5", 18#, L-80, Hyd-511 as follows:
Casing Design:

Sec	Length	Interval	Size	Wt.	Grade	Thrd
1	2,000'	6,400' – 8,399'	5"	18.0	L-80	Hyd-511

Note: Be sure Hydril Rep present with lifting nubs to witness procedure

a. PU & run inner 2-3/8" FJ tubing string inside 5" liner – spaced out to sting into circulating shoe.
b. RIH on 3-1/2" DP to TD.

16. RU cementers and cement 5" liner in place w/ approx. ~175 ft3 f/ 8,399' to ~ TOL at 6,400' w/ casing 3-5' off bottom per **Detailed Cementing Program by Bud Frederick**:

e. Drop top plug & displace with lease water.
f. Bump plug with 500 psi and check floats.
c. Set hydraulic liner hanger.
d. Release off of liner hanger and circulate excess cement off of liner top.

North Reference Sheet for West Pico - _WP-59 (Slot 808) - Wellbore #1

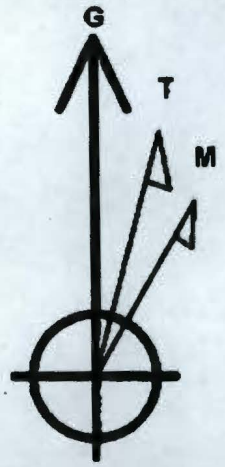
All data is in US Feet unless otherwise stated. Directions and Coordinates are relative to Grid North Reference.
Vertical Depths are relative to Well @ 187.00ft (Original Well Elev). Northing and Easting are relative to _WP-59 (Slot 808)

Coordinate System is US State Plane 1927 (Exact solution), California V 405 using datum NAD 1927 (NADCON CONUS), ellipsoid Clarke 1866
Projection method is Lambert Conformal Conic (2 parallel)
Central Meridian is -118.0000000°, Longitude Origin:0.0000000°, Latitude Origin:35.4666667°
False Easting: 2,000,000.00ft, False Northing: 0.00ft, Scale Reduction: 0.99999528

Grid Coordinates of Well: 202,370.46 ft N, 1,882,017.05 ft E
Geographical Coordinates of Well: 34° 03' 19.65" N, 118° 23' 22.21" W
Grid Convergence at Surface is: -0.22°

Based upon Minimum Curvature type calculations, at a Measured Depth of 8,398.93ft
the Bottom Hole Displacement is 3,542.23ft in the Direction of 89.26° (Grid).

Magnetic Convergence at surface is: -12.98° (10 March 2010, , IGRF2010)



Magnetic Model:	IGRF2010
Date:	10-Mar-10
Declination:	12.76°
Inclination/Dip:	58.86°
Field Strength:	47566

Grid North is 0.22° West of True North (Grid Convergence)
Magnetic North is 12.76° East of True North (Magnetic Declination)
Magnetic North is 12.98° East of Grid North (Magnetic Convergence)

To convert a True Direction to a Grid Direction, Add 0.22°
To convert a Magnetic Direction to a True Direction, Add 12.76° East
To convert a Magnetic Direction to a Grid Direction, Add 12.98°

018/021

BEVERLY HILLS OIL FIELD
PICO DRILL SITE
9165 WEST PICO BOULEVARD

ZA Case No.	Date	Purpose
17683	August 17, 1965	Controlled drill site U-131 - 70 acres/3 exploratory oil wells/ enclosed structure resembling high rise buildings/one well only. C2 zoned lots between Doheny and Oakhurst.
17683	October 1, 1965	Plans approved for landscaping wells, etc.
17683	October 7, 1965	Plans approved for derrick structure.
17683	October 15, 1965	Plans approved for equipment and control buildings.
17683	March 10, 1966	Authority granted for drilling of remaining two exploratory wells as permitted on August 17, 1965.
18200	May 27, 1966	Controlled drill site - U-132 (93 acres)/two exploratory wells and three production wells.
18201	June 10, 1966	Surface operations/drilling of 11 production wells - U-131/one well for every five acres (i.e., 14 wells permitted).
18200	August 18, 1966	Authority granted for two production wells as permitted on May 27, 1966.
18200	August 26, 1966	Correction letter/August 18, 1966/ three production wells permitted not two.
18471	October 31, 1966	Controlled drill site - U-133 - 92 acres/two exploratory wells and three production wells.
18484	November 3, 1966	Surface operations/drilling of 13 production wells - U-132 (see ZA 18200).

18623	January 17, 1967	Controlled drill site - U-150 (149 acres)/seven production wells.
17683	April 20, 1967	Well cellar expansion for 22 wells/plans approved for two parallel rows.
17683	May 16, 1967	Modification of Condition No. 5 - wells to be located at least 50 feet from Doheny Drive curb line/derrick no closer than 20 feet from Doheny Drive property line.
18893	July 28, 1967	Expansion of drill site to three adjacent C2 zoned lots to west - drill site now located between Doheny and Cardiff.
18191	August 14, 1967	Authorized three subsurface production wells on 103 acre site in Beverly Hills.
19189	March 14, 1968	One additional production well/ Beverly Hills - see ZA 18191.
19279	April 4, 1968	One additional production well - Beverly Hills - see ZA 18191 and ZA 19189.
19278	April 5, 1968	22 production wells - U-150 - see ZA 18623.
19279	April 23, 1968	Correction letter - corrected to reference ZA 18191.
19320	May 13, 1968	Two additional production wells/ Beverly Hills - see ZA 18191, ZA 19189 and ZA 19279.
17683	March 4, 1969	Plan approval for new well cellar for 20 water injection wells/expansion of well cellar for 49 wells (see ZA 17683 for 22 wells) - 69 wells existing??
20015	October 28, 1969	One additional production well - Beverly Hills - see ZA 18191, ZA 19189, ZA 19279 and ZA 19320.
17683	December 21, 1970	Conversion of 20 water injection wells to production wells (see plan approval dated March 4, 1969).

20529	May 6, 1971	One additional injection wells - Beverly Hills/one additional production well - see ZA 18191, ZA 19189, ZA 19279, ZA 19320 and ZA 20015.
20637	August 19, 1971	On e additional oil well - Beverly Hills (13 total).
20679	October 8, 1971	Five additional wells - U-131/two additional wells U-132 (see ZA 17683 and ZA 18200). Reduce 29 wells to 22 wells - U-150 (see ZA 18623 and ZA 19278).
20677	October 12, 1971	Five injection wells - U-131.
20678	October 15, 1971	Two injection wells - U-132.
20869	March 13, 1972	Additional oil well - Beverly Hills and use of well for injection purposes.
17683 19278 20677	May 14, 1973	Oil well permit/Fire Department
20677	August 14, 1973	Oil well permit/Fire Department
17683	August 27, 1973	Modification of Condition No. 16 to retain drilling structure for 5 years to December 31, 1978.
20815	January 11, 1972	One additional production well - U-131.
20842	February 18, 1972	One additional production well - Beverly Hills.
20989	July 11, 1972	One additional production well - U-131.
21209	May 29, 1973	One additional production well - Beverly Hills.
17683	February 22, 1979	Drilling permit/Fire Department
CUZ 79-102	May 10, 1979	Temporary core hole - U-131.
ZV 79-137-0	June 29, 1979	One additional production well - Beverly Hills.
17683	January 5, 1984	Retention oil derrick to December 31, 1986.

17683	June 14, 1984	Approval of plot plans for relocation of seven flow lines.
17683	June 19, 1984	Inspection of site; no violation of conditions.
17683	June 9, 1988	City Attorney letter requests investigation of complaints.
17683	June 2, 1988	Building and Safety letter citing potential violations.
17683	June 28, 1988	Building and Safety letter - Mrs. Elizabeth Mortoner - violations.
17683	July 20, 1988	Councilman Zev Yaroslavsky requests investigation of violation.
17683	July 28, 1988	Letter to Councilman Yaroslavsky - confirms investigation.
17683	August 10, 1988	Letter from Building and Safety - Clarification of status of "Portable Derricks".
17683	August 25, 1988	Letter to Building and Safety - "Portable" or "Temporary" Derricks not controlled.
17683	September 19, 1988	Councilman Yarosalvsky and City Attorney request further investigation of complaints - Answer prepared dated October 14, 1988.
17683	January 6, 1989	Further inquiry from Councilman Yaroslavsky.
17683	March 17, 1989	Formal request from Councilman Yaroslavsky for hearing and consideration of new conditions of methods and operation.
17683	July 6, 1989	Public hearing set for July 6, 1989; deficient public hearing notice; rescheduled.
17683	August 10, 1989	Public hearing held - decision with new conditions issued on September 12, 1989.

17683 BZA 4121	December 9, 1989	Appeal hearing before Board of Zoning Appeals cancelled at request of City Attorney.
17683 BZA 4121	January 2, 1990	Board of Zoning Appeals hearing - Deleted Condition No. 5 - requirement for enclosing structure.

Properties Overview

Santa Maria Basin

The Santa Maria Basin consists primarily of oil reserves and prospects in multiple geologic horizons and is one of California's largest producing oil regions. Conventional production from PCEC's Orcutt properties is derived from the Monterey, Point Sal and SX Sand formations, which are characterized by long-lived reserves. In addition, the Diatomite and Careaga formations, located at depths less than 900 feet below the surface, provide access to unconventional oil reserves. The portion of the underlying properties located in the Orcutt oilfield consists of 4,482 gross (3,608 net) acres.

Orcutt Conventional

The Orcutt oilfield was discovered in 1901 and has produced continuously since that time. Initial production from the Orcutt oilfield came from the Monterey and Point Sal formations, which are located at depths between 1,700 and 2,700 feet below the surface. The Monterey formation in the Orcutt oilfield is a fractured dolomitic shale that is highly productive. The Point Sal formation is a shallow marine deposited turbidite sandstone that is also highly productive. Oil recovery from these formations is enhanced by waterflood injection. Cumulative production from the Monterey and Point Sal is approximately 180 MMBoe. Beginning in 2005 the SX formation underlying PCEC's Orcutt properties was developed. The SX formation is a silty sandstone at a depth of 1,300 feet below the surface. Cumulative production from the SX formation since 2005 is approximately 0.8 MMBoe. A waterflood was initiated for the SX formation in 2009 to maintain reservoir pressure. The producing wells are all artificially lifted with rod pumps and electric submersible pumps. There are currently 125 Monterey, Point Sal and SX formation producing wells, and 58 waterflood injection wells on PCEC's conventional Orcutt properties. PCEC has operated its Orcutt properties for over seven years. PCEC operates 100% of these assets and has an average working interest of approximately 95%.

Orcutt Diatomite

The Diatomite is a massive silica-rich rock composed of the shells of single-cell organisms that were abundant during certain geologic periods. A Diatomite formation has very high porosity (up to 70%) but very low permeability, meaning fluids will not flow through the rock. Enhanced recovery techniques are used to produce oil from a Diatomite formation. In the 1990s, companies in California began to develop the Diatomite formation utilizing cyclic steam injection to enable oil recovery. These Diatomite formations have very high oil content but are unable to flow oil to a well bore without the cyclic steam injection. The recovery process in the Diatomite consists of injecting steam into each well, letting the steam soak for one to two days, and then producing the well by flowing the hot oil and water to surface. The process is sometimes enhanced by pumping the oil and water for one to four weeks, until the well is ready to be steamed again.

The Diatomite formation in the Orcutt oilfield is a shallow zone that lies approximately 100 to 900 feet below the surface. PCEC began cyclic steam development in 2005 and was producing 49 Diatomite wells using the process described above as of December 31, 2011. PCEC began a project expansion in 2011 to increase the total Diatomite project to 96 wells.

PCEC has targeted the Diatomite formation at depths greater than 400 feet below the surface for development, the area of which covers 750 acres within PCEC's Orcutt properties. PCEC has developed approximately 30 acres to date, and produced over 420 MBoe from the Diatomite oilfield.

Careaga formation

Overlying the Diatomite formation in the Orcutt oilfield is the Careaga sandstone reservoir. The Careaga outcrops at the surface in some locations and extends to depths of 90 to 160 feet below the surface. This reservoir contains very heavy oil (11 degree API) that can flow to the surface through seeps. PCEC is collecting the Careaga oil that flows to the surface in containers utilizing a French drain system to gather the oil. PCEC is producing approximately 130 Bbls/d

of the Careaga oil that is pumped from the containers and sold with the rest of its crude oil production. Cumulative production from the Careaga formation is approximately 200 MBoe.

Los Angeles Basin

Similar to the Santa Maria Basin, the Los Angeles Basin is characterized by its mature oilfields with long production histories that have produced more than nine billion Bbls of oil since its discovery in 1892. The Underlying Properties in the Los Angeles Basin consist of the West Pico, Sawtelle and East Coyote properties. These properties are characterized by their long-lived reserves with well established, predictable production profiles and low decline rates. The portion of the Underlying Properties located in the Los Angeles Basin consists of 2,107 gross (1,049 net) acres after giving effect to the East Coyote and Sawtelle Reversion. Prior to the East Coyote and Sawtelle Reversion the portion of the Underlying Properties located in the Los Angeles Basin consisted of 500 net acres.

West Pico

The West Pico Unit was developed from an urban drilling and production site and came on production in 1966. In 2000, PCEC undertook a modernization of its facility and installed a permanently enclosed, electric, soundproof drilling and workover rig that allows for uninterrupted drilling and workover operations despite its close proximity to residential neighborhoods. Production from the West Pico Unit comes from sandstone reservoirs ranging in depths between 4,000 and 7,000 feet below the surface. Oil recovery is enhanced by waterflood injection. Cumulative production from the West Pico Unit is approximately 70 MMBoe. The producing wells in the West Pico Unit are all artificially lifted with rod pumps and electric submersible pumps. There are currently 37 producing wells and 6 waterflood injection wells in the West Pico Unit. Twelve new wells have been drilled from this location since 2003. PCEC has the potential to drill up to 15 additional wells in the West Pico Unit.

West Pico also includes three wells held by the Stocker JV, a joint venture between PCEC and PXP. In accordance with the contractual arrangements with PXP, PXP operates these three wells that were drilled from its facility to three lease line locations between PXP's and PCEC's production units. These wells are equally owned by PCEC and PXP, and PCEC receives the production attributable to its properties.

Sawtelle

PCEC's Sawtelle property is similarly situated in an urban environment. The Sawtelle oilfield was discovered in 1965 and is currently the deepest producing oilfield in the Los Angeles Basin with well depths up to 11,500 feet below the surface. Production at PCEC's Sawtelle property comes from sandstone reservoirs in three separate pools ranging in depth between 7,500 and 11,500 feet below the surface. Oil recovery is enhanced by waterflood injection in two of the three pools. Cumulative production from the Sawtelle property is approximately 19 MMBoe. The producing wells are all artificially lifted with hydraulic pumps, and electric submersible pumps. There are currently 11 producing wells and three waterflood injection wells in PCEC's Sawtelle property.

East Coyote

The East Coyote oilfield was discovered in 1909. Production at PCEC's East Coyote property comes from three sandstone formations ranging in depth from 2,000 to 6,000 feet below the surface. Cumulative production from PCEC's East Coyote property is approximately 106 MMBoe. The producing wells are all artificially lifted with rod pumps and electric submersible pumps. There are currently 46 producing wells, and 14 waterflood injection wells in PCEC's East Coyote property.

Dear Ms. Mailian, Mr. Bertoni, and Ms. Webber,

Please see the attached letter of grave concern about the need for an inspection of the West Pico Drill Site as a predicate to begin proper implementation of CEQA in the Review of Compliance, ZA-1989-17683-PA2.

There is still time to get this right, which would be to everyone's benefit.

Yours

Michael Salman

To Dir DCP & ZA on CEQA & Review of Compliance ZA-1989-17683-PA2 6-5-20.pdf

Re: ZA-1989-17683-PA2; ENV-2020-1328-EAF

Dear Director Bertoni, Assistant Director Webber, and Chief ZA Mailian,

I am writing out of grave and urgent concern that the Review of Compliance of the West Pico Drill Site is being unduly rushed in a way that will poorly serve everyone – the public, the operating oil company, the City, and the Planning Department itself.

Moving the case forward without first having the Petroleum Administrator perform or lead a comprehensive compliance inspection of the drill site would be profoundly wrong on many levels. It would undermine the validity of any preliminary environmental clearance because it would be the poster child for NOT taking the "hard look" that CEQA requires. Not only would there not be a "hard look" at the project under review as required by CEQA, but there would not even be a credible effort to try to ascertain the scope of the project that needs to be reviewed under CEQA.

The Petroleum Administrator could require that the site operator hire and pay for a professional third party site inspection by a qualified firm to be approved by the Petroleum Administrator, according to specifications approved by the Petroleum Administrator, with the final inspection report to be reviewed and approved with discretion by the Petroleum Administrator. There are other ways for the cost of a quality professional inspection to fall to the site operator, rather than to the City. But the City ultimately has a responsibility here.

This Review is a case that can be resolved by consensus or near consensus solution, if it is handled correctly, with due diligence, and without undue haste. The recent Rancho Park case was resolved with the community, the Council District, and the site operator joining in unison. Rancho Park began with an inspection by the Petroleum Administrator, and that inspection laid the groundwork for a common recognition of problems and then the creation of a consensus on how to resolve them.

The Rancho Park case proved the value of doing an inspection first. It concluded with no litigation, unlike the Jefferson case. And the model established at Rancho Park is a perfect fit for West Pico, where the record of violations, noncompliance, and City failures are more profound. It is all too easy to see how a mishandled West Pico case would end up in court, with the CEQA issues at the core of it all. That should not be allowed to happen.

I would be making this argument to do an inspection, to do CEQA right, and handle this Review of Compliance by the book under any circumstances, because regularity in administration is central to the rule of law, and it is central to good regulation that keeps people safer and allows proper economic activity.

But we are not living in just any circumstances. There is a pandemic. There is an economic emergency. There is a civil rights emergency and a state of civil unrest and there has literally been a state of emergency. There is a crisis of the rule of law. This is no time to rush a Review of Compliance case. Rushing will be injurious to all parties. Taking the time to handle the case correctly will save time, money, and aggravation. Taking due time in this will not hold up a development project. There is no legitimate downside to taking the time to handle this case correctly.

I have previously communicated most but not all of this message to Chief ZA Mailian. Today I am adding more information and I am adding Director Bertoni and Assistant Director Webber to my communication because this issue also involves the fundamental autonomy of the DCP and its longer record of implementing CEQA in oil cases.

I know from direct written correspondence from CD5 in March that CD5 has been trying to rush this Review of Conditions case forward without due diligence. I know from direct written correspondence from CD5 that CD5 has made deliberate choices NOT to request a compliance inspection of the site. There have not been logical or rational explanations from CD5 for these actions. In fact, CD5's responses have been self-contradictory.

I bring this up here only to focus light on the question of institutional autonomy for the DCP. If CEQA is violated again in this case (and I will show below that the West Pico Drill Site case starts with 20 years of CEQA violations even before the environmental clearance begins in this current review), it will mainly be the DCP entangled in the matter for years. CD5 will change leadership during the mess.

1) CEQA Problems are Inherent in this Case: Please do not Multiply Them

By rushing the Review of Compliance forward without first having the Petroleum Administrator conduct or lead or contract out a comprehensive compliance inspection, the Planning Department will be committing major errors in its duty to implement CEQA. Those errors would be piled on top of numerous already existing errors and violations of CEQA dating back to the 1999 EIR and the 2000 determination (ZA-1989-17683-PAD).

This Review of Compliance is not about the proposed project that was studied by the EIR in 1999. It is a distinctly different case about a different project, which can only be subjected to environmental review once its scope can be estimated. There is nothing in the PA Application that helps to define the scope of the project that must be reviewed. A full estimate of that scope can only be developed by a professional comprehensive compliance inspection that goes on site and also reviews all permitting and approval records, as the Petroleum Administrator did at Rancho Park in 2017.

It is not a matter of speculation to suggest that the scope of the project under review now is distinctly different from that studied in the 1999 EIR. It is a hard fact.

Although no one can claim to try to define or know or study the full scope of the current project without a comprehensive compliance inspection, it is proven beyond a shadow of a doubt by public record documents that there have been multiple projects executed at the West Pico Drill Site since the 1999 EIR and 2000 ZA approval that were not part of the project proposal reviewed in 1999 and 2000.

Two new wells have been drilled, old wells re-drilled, and microturbines installed, all without applications to the ZA required by the LAMC and by ZA assigned conditions (including conditions that expressly prohibit electric generation on site and in the larger Oil Drilling District). All of these projects required environmental clearance under CEQA. They all required ZA approval. None were reviewed. None were approved. None were part of the proposal reviewed by the 1999 EIR.

Ergo, the current Review is a Review of a project that is NOT the same as that reviewed in the 1999 EIR. A fresh environmental clearance is needed. We know that already.

But the situation with regard to CEQA is worse than that.

Problems with CEQA in this case go back to the 1999 EIR and the 2000 determination. The required CEQA process back then was never completed, leaving that case out of compliance with CEQA. The June

2001 Settlement Agreement changed the mitigation measures assigned to that project and the Controlled Drill Site, and it changed the Mitigation Monitoring and Reporting Program (MMRP) that was part of the EIR and required by CEQA. State law required that the EIR needed to be updated, but it was not updated. Nor were the new mitigation measures written into an updated ZA determination, nor was an updated MMRP produced. All of this violated State law and has not been corrected to this day.

Some of the mitigation measures and MMRP elements were performed, but others were not.

One of the most important new mitigation measures and MMRP elements mandated by the 2001 Settlement Agreement was that there shall be ZA Reviews of Compliance every five years, commencing five years after the two-year post-construction checkup review that was required by Condition 78 of the 2000 determination. The two-year checkup review was conducted in 2005-06 (ZA-1989-17683-PA1). No Five Year Review was held in 2010-11 or 2015-16 or ever, until now.

These are not the only lingering errors from the 1999 EIR and 2000 determination. There are others. But this is enough for now to show how the City begins this Review of Compliance from a starting point of being out of compliance with CEQA.

In 2016, the City settled a lawsuit about the general pattern and practice of not implementing CEQA properly in oil cases. As a result, ZA Memo 133 created new guidelines for the implementation of CEQA in oil cases in the City. In 2019, the California Court of Appeals vigorously and loudly upheld the validity of ZA Memo 133. But just a year later a complex case with major CEQA issues is being rushed forward without due diligence, without a "hard look," without an attempt to even become aware of the scope of the project and hence also without an attempt to become aware of the potential scope of mitigation measures that need to be considered within the CEQA process.

Please do not do this. It is not necessary. It would be bad for everyone: the public, the site operator, the DCP, the City, and CD5 even if they do not understand it.

Those are not the only non-compliance issues. There are several more, at least. All contribute to defining the scope of the current project for which CEQA requires a review, and they all point to the need for new or revised mitigation measures that also must be considered within the CEQA process.

There have been two LAFD Notices of Violation, in 2017 and 2018, for leaving spilled or leaked petroleum exposed on cellars or the ground or other surfaces. Those violations of the Fire Code are also violations of Conditions 46, 47, 57, and 61 of the 2000 determination (ZA-1989-17683-PAD).

Those same four Conditions (46, 47, 57, and 61) are at issue in odor complaints from members of the community. Odor at the site has also been addressed by Council Member Koretz in first-person testimony at a meeting of the City Council's ECCEJ Committee on October 15, 2019, where he said: "You can smell the oil. You can taste the oil."

PCEC's self-reported "findings" in its PA application includes only one record of a daily walk-through inspection for odors required by Condition 61 of the 2000 determination. That record dates from late December 2019, days before the PA Application was originally due. Twenty years of records are at issue, but a record from one day in late December 2019 when the PA Application was due a few days later is all that is in the PA Application. PCEC did not submit the application until two months later, but still did not submit any additional daily odor inspection records, not even from the intervening two months.

PCEC's self-reported "findings" contains the following statements about Conditions 47 and 57 governing, respectively, disposal of waste oil and cleanliness of oil production equipment around wells so as to

prevent odors, emissions, etc. Please note that PCEC's statement is contradicted by the LAFD Notices of Violation for repeatedly not cleaning up spilled or leaked oil:

Condition B-47

Waste Disposal. All waste substances, including drilling muds or waste oil, produced or used in connection with oil drilling operations or oil production shall be retained in water-tight receptors from which they may be piped or hauled for reuse, recycling or sent for terminal disposal in a dumping area specifically approved for such disposal by the Los Angeles Regional Water Quality Control Board or any other responsible agency.

Compliance

The only waste oil product generated on site is oily sand. The sand is hauled to Anterra Energy Services, Inc. located in Oxnard California.

Condition B-57

Odor Control. The following odor control measures are imposed:

a) All sampling pans or trays, open drains, pits or sumps shall be kept clean and without any significant oil or sludge accumulation.
b) When future replacements are made to applicable equipment, bellow valves and seal-less pumps shall be utilized if appropriate and feasible for said equipment.
c) Any vacuum truck operations conducted on the site shall utilize vapor control equipment.

Compliance

This mitigation measure is implemented and has been complied with.

The PA Application for this case is incomplete and inadequate, in terms of what is required by Condition 78 of the 2000 determination. It is incomplete and inadequate also because it says nothing about the drilling of wells, and fails to adequately address the prohibition of microturbines. The only way to recognize just how incomplete it is would be to have the Petroleum Administrator conduct or lead or contract out a comprehensive compliance inspection of the type performed at Rancho Park in 2017. Short of that, the DCP will not know what to ask for in the PA Application and it will not know how to even estimate the scope of the project for review under CEQA. The inspection is needed for the operator, too, so that the operator can know what they need to address in the PA Application.

The alternative to doing this right is to have an already bad mess become a royal mess, under the worst of circumstances.

What follows in part 2 of this letter is an itemization of some of the major violations, with documentation; in part 3, a list of major new mitigation measures and corrective actions that are needed to make things right and bring the site up to date with best practices; and then in part 4 a return to the essential need to begin this process with an inspection and a proper CEQA process.

2) Documented Evidence of Compliance Problems

As you are aware, multiple compliance problems have already been documented by cross-checking the West Pico Drill Site's Planning Department case files against the 2001 Settlement Agreement and public documents available online from CalGEM, LADBS, LAFD, and SCAQMD.

These compliance problems include, but are not limited to:

- **Failure to hold required Five Year Reviews.** Five Year Reviews were not held in 2010-11 and 2015-16, as required by the 2001 Settlement Agreement, and have never been held until now.
- **Installation of microturbines without ZA reviews when expressly prohibited by ZA-assigned conditions.** Five 200 Kilowatt microturbine electric generators (1 Megawatt total) were installed in 2018-19 with no application to or approval from the ZA, despite the express prohibition of electric generation on site or anywhere in the larger Oil Drilling District that is mandated in ZA Condition 49 of the 2000 determination in ZA-1989-17683-PAD and in ZA Condition 1 (applying LAMC 13.01.F.43) in the 1965 "mother case" ZA-1965-17683. Condition 1 of the 1965 "mother case" still applies to the half of the Controlled Drill Site that houses the microturbines. Condition 49 of the 2000 determination applies, too, because it prohibits electric generation for the Controlled Drill Site both on the site and also anywhere in the Oil Drilling District (that the 2000 determination split the unified whole Controlled Drill Site in half to rewrite conditions that sometimes applied to both halves was one more of multiple errors that need to be cleaned up). The operator acknowledges in its current PA Application for this review that it installed one microturbine, but it erroneously claims that microturbines are not prohibited, and the SCAQMD permit records for the drill site show that five 200 Kilowatt microturbines were installed.
    - SCAQMD permit records are here, under the "Equipment List" tab: https://xappprod.aqmd.gov/find//facility/AQMDsearch?facilityID=98158
- **Drilling of two new wells without ZA approvals required by LAMC 13.01.** Two new oil wells, West Pico Well #58 (API # 03726615) and Well #59 (API # 03727133), were drilled in 2005-06 and 2010, respectively, without application to or approval from the ZA, despite the express requirements of LAMC 13.01.H and 13.01.I for such approval.
    - LAMC 13.01:
        - **H. Drilling Site Requirements**. Any person desiring to drill, deepen or maintain an oil well in an oil drilling district that has been established by ordinance, or to drill or deepen and subsequently maintain an oil well in the M3 Zone within 500 feet of a more restrictive zone shall file an application in the Department of City Planning on a form provided by the Department, requesting a determination of the conditions under which the operations may be conducted. (Para. Amended by Ord. No. 173,492, Eff. 10/10/00.)
        - **I. Permits**. (Amended by Ord. No. 173,268, Eff. 7/1/00, Oper. 7/1/00.) No person shall drill, deepen or maintain an oil well or convert an oil well from one class to the other and no permits shall be issued for that use, until a determination has been made by the Zoning Administrator or Area Planning Commission pursuant to the procedure prescribed in Subsection H of this section.

- CalGEM permit applications, permits, and work history records prove the wells were drilled. Documents available here, organized in reverse chronological order: https://secure.conservation.ca.gov/WellRecord/037/03726615/03726615_2019-04-17_DATA.pdf and https://secure.conservation.ca.gov/WellRecord/037/03727133/03727133_2018-12-07_DATA.pdf)
- The last new well approved by a ZA was approved by the ZA in 1979, with a tight expiration date to utilize the approval or have it expire.
- No more than 60 wells have ever existed on the site. No more than 58 wells have been approved by the ZA. A well cellar with larger capacity has been approved, but a well cellar is not a well, and wells require specific approval as per LAMC 13.01.
- The 2000 determination expressly did not approve any new wells.
- There were no ZA approvals for the wells drilled in 2005-06 and 2010.
- The ZA who wrote the March 2006 determination on the two-year checkup Review did not know a new well was drilled while the Review case was on his desk because there was no application and no site inspection by a qualified professional.

- **Re-drilling of at least one existing well without ZA approvals required by LAMC 13.01.** At least one existing oil well (identified from a spot check of 10% of CalGEM's well records for the drill site), HW Well #10 (API # 03721994) was re-drilled in 2004, without application to or approval from the ZA, despite the express requirements of LAMC 13.01.H and 13.01.I for such approval. I have reviewed CalGEM records for only approximately 10% of the wells at the site.
  - CalGEM permit applications, permits, and work history records prove the well was re-drilled. Documents available here, organized in reverse chronological order: https://secure.conservation.ca.gov/WellRecord/037/03721994/03721994_DATA_2014-08-25.pdf)
  - There are no ZA approvals for these projects.
- **Operator claims that 12 new wells have been drilled at the site since 2003.** PCEC's offshoot, the Pacific Coast Royalty Trust, an SEC regulated entity that trades on the NYSE, claims that "Twelve new wells have been drilled from this location since 2003." This appears to be an inaccurate statement, but it might imprecisely refer to the re-drilling of existing wells as well as the drilling of two new wells. A full review of CalGEM permit and work history records for all 59 wells that have existed at the drill site will reveal the actual total number of drilling projects since the last time the ZA approved a drilling project, which appears to have been June 29, 1979, when the ZA approved the drilling of one new well in ZV-79-137-0.
  - Document available here**: https://royt.q4web.com/trust-overview/properties-overview/default.aspx**
- **All projects undertaken without ZA review also, per force, violated CEQA since Planning is the lead agency for CEQA reviews of projects at the drill site.** Each of these projects, including at least one re-drilled well, two newly drilled wells, and the installation of five 200 Kilowatt microturbines required environmental clearance under CEQA, but the operator skirted CEQA review by not applying to the ZA for approval, and the operator wrongly told DOGGR (old name

of CalGEM) that the local lead agency did not require any CEQA documents or clearance for drilling new wells.

- **Repeated LAFD Notices of Violation for leaving spilled or leaked Petroleum on surfaces, which also violated of Conditions 46 ("Avoidance of Nuisance"), 47 ("Waste Disposal"), 57 ("Odor Control"), and 61 ("Leak Detection and Odor Control") of the 2000 determination in ZA-1989-17683-PAD and Condition 1 (applying LAMC 13.01.F.18 and F.37) of the 1965 "mother case" ZA-1965-17683.** The LAFD resumed doing long lapsed annual inspections of drill sites to monitor compliance with the Fire Code in or about 2017. In September 2017 and October 2018, the LAFD issued Notices of "Fire/Life Safety Violation" at the West Pico Drill Site for the violation of "L.A.M.C. 57.5706.3.2.2 Discharge and Combustible Materials on Ground." In 2017, the citation specified "You are hereby ordered to remove any waste petroleum, petroleum refuse or waste matter from the surface of the ground, and walls of the cellars." In 2018, the citation specified "You are hereby ordered to remove any waste petroleum, petroleum refuse or waste matter from the surface of the ground, around or near any oil well, derrick, pump, cellar, tank, oil pump, or combustible structure." These specifications are not quotations of the code, so they would seem to be possible descriptions of places where LAFD found spilled or leaked petroleum.
    - Copies of LAFD Notices of Violation are attached to this letter**.**
- **Odor Problems as reported in first person testimony of Council Member Paul Koretz in City Council Committee on October 15, 2019.** Numerous neighbors have complained of petroleum odors around the drill site over the past several years, but Council Member Paul Koretz's personal testimony presented at the City Council's Energy, Climate Change and Environmental Justice Committee's meeting of October 15, 2019 stands out as recorded testimony by an Officer of the City. ***Mr. Koretz said, "You can smell the oil. You can taste the oil."***
    - Transcript of the committee meeting: https://lacity.granicus.com/TranscriptViewer.php?view_id=46&clip_id=19441
    - Audio recording of the committee meeting, with Mr. Koretz's testimony at the 2 hour 23 minute mark: https://lacity.granicus.com/MediaPlayer.php?view_id=46&clip_id=19441).
- **Spilled or leaked petroleum that is not cleaned up could cause odor problems, so the hard documented evidence of petroleum leaks or spills that were not cleaned up further substantiates the personal testimony of Council Member Paul Koretz and complaints from neighbors of the drill site.**
- **The Planning Department Case File on the drill site documents decades of complaints about odors from the drill site, from the 1960s to the present, which have been repeatedly noted and several times affirmed by Reviewing ZAs.** There is a long history of non-compliance and nuisance that has never been satisfactorily addressed.

3) Need for New/Revised Conditions, ZA Findings, and ZA Orders to Monitor and Enforce Compliance, and to Protect the Environment, Public Health, and Public Safety

There is a clear and long history of non-compliance and nuisance at the West Pico Drill Site (and across other drill sites in the City), which indicates the need for stronger enforcement mechanisms and stronger protections for the environment, public health, and public safety.

We request that the ZA to adopt the following new and modified Conditions of Use, Findings, and Orders to protect public health, safety, and the environment, and ensure future compliance with City law at the West Pico Drill Site.

- **New Condition: Require Annual Compliance Inspections Led by Petroleum Administrator:** Annual Compliance Inspection to be led by the Office of the Petroleum Administrator to ascertain compliance with City Code and ZA-assigned conditions. Copies of the inspection report shall be delivered to the ZA and CD5 Council Office. This condition shall stay in force until such time as the City enacts an ordinance requiring Annual Compliance Inspections of all drill sites in the City.
    - **Rationale:** Annual Inspections led by the Office of the Petroleum Administrator are critical to monitoring and enforcing compliance with City Code and ZA-assigned conditions. The City has never performed regular general compliance inspections. As a consequence operators at several drill sites, including West Pico, have ignored ZA conditions and ignored City law requiring applications and approvals for new projects. This is a systemic problem known to the City since at least 2014, but the City has so far failed to fix it. Without regular inspections and enforcement, City Code and ZA-assigned conditions are meaningless. County Public Health and the Petroleum Administrator have recommended that there should be annual inspections. Annual inspections are an essential best practice, and a simple common sense necessity.
    - **Legal and Administrative Viability:** The need for compliance inspections was one of the reasons City Council and the Mayor revived the dormant Office of the Petroleum Administrator in 2016. Since 1958, City Administrative Code 19.48.a has given Officers, Offices, and Departments and Bureaus of the City the power to call upon the Petroleum Administrator to investigate and report on any matter related to oil and gas production in the City. In several cases, the ZA has ordered that operators must be inspected by other agencies, including even State agencies over which the City has no control. For example, Condition 40 of the 2000 determination for West Pico required the operator to arrange for regular inspections by the LAFD (a City agency) and DOGGR (the former name of the State's agency that oversees wells and drilling operations). Similar provisions were included in the 2017 determination on the Jefferson Drill Site. Thus the ZA can require that inspections led by the Petroleum Administrator must be arranged by the site operator.
    - **Economic Viability:** There are several ways that an inspection led by the Petroleum Administrator can be made cost neutral to the City until such time as City Council might pass an Annual Compliance Inspection Ordinance of Oil Drill Sites. An inspection by the Petroleum Administrator could be funded by making the inspection part of an annual Plan Approval process. OR an inspection led by the Petroleum Administrator could be funded by requiring the drill site operator to hire a professional engineering or environmental firm to produce an annual compliance report, with the firm to be approved by the Petroleum Administrator and the report to be reviewed and approved by the Petroleum Administrator with the power to order corrections to the report.
- **New Condition: Require Permanent 24/7 Emissions Monitoring:** Installation and continuous operation of 24/7 Emissions Monitoring using up-to-date equipment that records data and has a central alarm connection to an office that is staffed 24/7. The monitoring system equipment must be approved by the Office of the Petroleum Administrator, either by listing the system on

a pre-approved list or by review of individual application. Emissions data shall be reported quarterly to the Office of the Petroleum Administrator and the ZA, and both offices shall promptly forward copies of the quarterly data to the CD5 Council Office. This Condition will sunset if and when the City enacts an ordinance that requires 24/7 permanent emissions monitoring at all drill sites.

  - **Rationale:** Emissions Monitoring will produce long term and continuous data about emissions, so as to document whether there are intermittent or long term emission problems that need rectification, AND it is also a safety alarm system that will spot the emergence of a problem (e.g., gas leaks and other emissions due to accidents or maintenance problems) instantly at the moment of emergence. The data record will also be evidence demonstrating compliance or non-compliance problems. Requiring Emissions Monitoring at drill sites throughout the City has been recommended by former Petroleum Administrator Uduak Ntuk (now Supervisor of CalGEM), LA County Public Health, and several City Council Members who have introduced and passed motions in Council calling for action on Emissions Monitoring. But the City has taken no steps toward requiring Emissions Monitoring at drill sites.

  - **Existing Conditions Should Already Require Emissions Monitoring:** Condition 46 of the 2000 determination already mandates that proven technological improvements that reduce nuisance, odors, emissions, etc, shall be employed. Condition 1 of the 1965 "mother case" approving the Controlled Drill Site contained this same provision by applying LAMC 13.01.18. Condition 61 of the 2000 determination mandates ineffective measures of "Leak Detection and Odor Control," and does not require public reporting of records; this has proven to be inadequate.

- **Modify Condition 78: Require Recurring Five Year Reviews of Compliance and Conditions by the ZA, as Mandated by the City's 2001 Settlement Agreement:** Amend Condition 78 of the 2000 ZA determination to include the terms of the Settlement Agreement that require recurring Five Year Reviews of Conditions.

  - **Rationale:** This will help prevent the requirement from being ignored again in the future. Required reviews were not performed in 2010-11 and 2015-16.

  - **Required by State Law as Part of the CEQA Process:** The 2001 Settlement Agreement ended a lawsuit over the implementation of CEQA and mandated new/revised mitigation measures and also a new/revised mitigation monitoring and reporting program (MMRP). State law required (and still requires) that the final approval of a project with mitigation measures and MMRP that have been modified from those itemized in an EIR or MND must produce an Addendum or other revision of the EIR or MND, and an Addendum or other revision of the MMRP associated with that environmental clearance. No such Addendum or other revision to the 1999 EIR or 2000 ZA determination was ever made, and the Five Year Reviews were never performed.

- **Finding & Order: Find that the 5 Microturbines Installed in 2018 were Installed Contrary to Express Prohibition; and Order that Within 6 Months they Must Either be Removed or Made the Subject of a Full Application for ZA Review, Including Review Under CEQA. Failure to Comply Shall Prompt Revocation Proceedings Under LAMC 12.27.1.**

  - **Rationale:** Condition 49 of the 2000 determination prohibits electric generation in the drilling district, as did Condition 1 of the 1965 "mother case." The microturbines were

installed in the "production facility" half of the Controlled Drill Site, located at 9151 W Pico Blvd. Although the 2000 determination applies only to the portion of the drill site housing the well heads located at 9101 W Pico Blvd, it still prohibits the generation of electricity anywhere in the Oil Drilling District to provide power to the portion of the site containing the wells, well pumps, and derrick. The 5 microturbines have a generating capacity of 1 Megawatt, and the only part of the Controlled Drill Site using that much power is the section containing the well pumps. In addition, the 1965 "mother case" applies to the entire Controlled Drill Site, including the so-called "production facility" located at 9151 W Pico Blvd. The expansion in size of the "production facility" at 9151 W Pico was approved in 1967 (ZA 18893) as an "extension of the controlled drill site" approved in the 1965 mother case, and all of the conditions assigned in the mother case were expressly carried over to this new portion of the drill site.

- **Finding & Order: Find that Wells Drilled or Re-Drilled since 2003 were Drilled Without Application and ZA Approval Required by LAMC 13.01.H And 13.01.I; and Order that Within 6 Months All Such Wells Must be Made the Subject of a Full Application for ZA Review, Including Review Under CEQA. Failure to Comply Shall Prompt Revocation Proceedings Under LAMC 12.27.1.**
    - **Rationale:** PCEC's offshoot, the Pacific Coast Royalty Trust, publicly claims to investors that PCEC has drilled 12 new wells at the site since 2003. The claim of 12 new wells does not seem likely to be accurate, based on State records of well permits and drilling work history publicly available from CalGEM. Those records show that two new wells have been drilled since 2003, but there have also been projects that re-drilled existing wells.
    - **Required by City and State (CEQA) Laws**: LAMC 13.01.H and 13.01.I clearly require approval by the ZA for well drilling operations. Well drilling also requires CEQA clearance by the Department of City Planning, which is the lead agency for CEQA on these cases in LA City – therefore compliance with State law is at issue, too.

4) Concerns about Process and Thoroughness in this Review

In February 2020, SORO NC wrote to Chief ZA Mailian to request that the Petroleum Administrator be tasked to conduct a comprehensive compliance inspection and report the results before this Review of Compliance is sent forward to Public Hearing. SORO NC has not received a response, and it appears the Review case is moving forward without a comprehensive compliance inspection.

I remain concerned that, without a comprehensive compliance inspection before the Public Hearing, the ZA and the public will deprived of necessary and critical information. And I remain concerned that any later report from the Petroleum Administrator to the ZA after the Public Hearing would impinge on the due process rights of all parties.

The fatal problem that the lack of an inspection poses for CEQA is an even greater problems. The scope of the required CEQA review must in large part be determined by the extent and nature of non-compliance, and the Planning Department cannot claim to know what that scope is if it does not obtain a comprehensive compliance inspection first.

The evidence presented above demonstrates that in addition to non-compliance with specific mitigation measures imposed by ZA conditions, the operator of the site has conducted multiple major projects without ZA review and therefore without CEQA clearance.

It is also evident that the 1999 EIR and 2000 ZA determination contained multiple errors, including but not limited to a failure to update the EIR and the ZA determination after the 2001 Settlement Agreement mandated additional mitigation measures as well as a modified Mitigation Monitoring and Reporting Program (MMRP). Such an update was and is required by State law.

CEQA's legal protections are already compromised and afflicted in this case, going back to 2001. In addition, there were multiple new projects constructed without CEQA clearance that were never part of the project proposal reviewed in the 1999 EIR

A fresh and new and proper environmental review is needed in this case. The nature of the case (non-compliance and projects undertaken without application) necessitates a comprehensive compliance inspection as the predicate to define the scope of review under CEQA.

Please do not hesitate to contact me if you have any questions about this letter.

Yours,

Michael Salman

Dear Chief Zoning Administrator Mailian,

I am writing to endorse the request of my colleague, Rabbi Yonah Bookstein together with Dr. Rae Drazin, Richard Weiner from NASE and Professor Michael Salman, that you please have a compliance inspection performed at the West Pico Drill Site before the ZA Review of that site goes to hearing in July.

Proceeding with the Zoning hearing without an inspection would be unfair, unsafe, and would also undermine the protections of the California Environmental Quality Act (CEQA).

Our safety depends upon an immediate and comprehensive inspection being conducted by the Petroleum Administrator, and before the Review of Compliance is brought to a public hearing.

Thank you for your consideration,

Elazar Muskin, Senior Rabbi

Hi Estineh,

I hope you and your family are well. I wanted to reach out as a concerned resident of the South Robertson area, expressing my personal views, which are not necessarily reflected by the rest of the SORO NC Land Use Committee or General Board.

I urge you to ensure a Comprehensive Compliance Inspection report is produced prior to the Public Hearing for the West Pico Drill Site. I see no reason why the Public Hearing should not wait to be held until after the Petroleum Administrator can inspect the site. Just as a construction project is not permitted to proceed to the next phase of construction without an inspection to review the project's conformance to codes, this Public Hearing should not be permitted to be held without, first, an inspection to review compliance and site conditions.

Thank you for considering my request.

Best,

Krystal Návar

Dear Mr Irving

Please find attached a set of LAFD Annual Oil Well Operating Permits for the West Pico Drill Site, discussed in my submission for ZA-1989-17683-PA2 sent to you by email today.

These permits are organized by oil well, with each file named for the common name of the well (e.g., WP 59, WP 58, etc). The permits span from 2005 to 2020 and were obtained from the City Office of Finance by CPRA request.

A spreadsheet prepared by the City Office of Finance listing all of the permits is also included.

Given that at least 22 of these permits have been illegal, invalid, and void for years, and given that there is a strong argument that all Annual Operating Permits have been void since the effective date of the 2000 ZA approval, it is essential that these records be considered in this review.

It is troubling that these records were not included heretofore, but it is not surprising because the City does not do inspections or even cross-check its own records. That is how and why such illegal permits get issued in the first place:

- the ZA did not check (or understand) what was on the site or in prior records during the 2000 case,
- the LAFD does not check for ZA approvals when all well drilling and conversions require ZA approvals per LAMC 13.01.I and the Fire Code requires compliance with "with all regulations, laws, or ordinances,"
- and then the ZA does not check the validity of City permits issued on wells that did not have ZA approval.

It is a circle of negligence contrary to City law (and State law because it violates CEQA), contrary to public policy, and contrary to public interest.

Sorry this must be put in such pointed language, but it is necessary.

Yours

Michael Salman

FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

Delivered 01:38 PM 12/21/2011
FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "*Partnership*") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

Delivered 01:38 PM 12/21/2011
FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

Pacific Coast Energy Company LP

Dear Mr Irving

Please find attached a set of LAFD Annual Oil Well Operating Permits for the West Pico Drill Site, discussed in my submission for ZA-1989-17683-PA2 sent to you by email today.

These permits are organized by oil well, with each file named for the common name of the well (e.g., WP 59, WP 58, etc). The permits span from 2005 to 2020 and were obtained from the City Office of Finance by CPRA request.

A spreadsheet prepared by the City Office of Finance listing all of the permits is also included.

Given that at least 22 of these permits have been illegal, invalid, and void for years, and given that there is a strong argument that all Annual Operating Permits have been void since the effective date of the 2000 ZA approval, it is essential that these records be considered in this review.

It is troubling that these records were not included heretofore, but it is not surprising because the City does not do inspections or even cross-check its own records. That is how and why such illegal permits get issued in the first place:

- the ZA did not check (or understand) what was on the site or in prior records during the 2000 case,
- the LAFD does not check for ZA approvals when all well drilling and conversions require ZA approvals per LAMC 13.01.I and the Fire Code requires compliance with "with all regulations, laws, or ordinances,"
- and then the ZA does not check the validity of City permits issued on wells that did not have ZA approval.

It is a circle of negligence contrary to City law (and State law because it violates CEQA), contrary to public policy, and contrary to public interest.

Sorry this must be put in such pointed language, but it is necessary.

Yours

Michael Salman

FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

FILED 01:38 PM 12/21/2011
SRV 111321572 - 3816394 FILE

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.

CERTIFICATE OF AMENDMENT
TO
CERTIFICATE OF LIMITED PARTNERSHIP
OF
BREITBURN ENERGY COMPANY L.P.

Pursuant to Section 17-202 of the Delaware Revised Uniform Limited Partnership Act, as amended, it is hereby certified that:

1. The name of the limited partnership (the "***Partnership***") is BreitBurn Energy Company L.P.

2. The Certificate of Limited Partnership of the Partnership is hereby amended by deleting paragraph 1 and inserting in lieu thereof a new paragraph 1 to read as follows:

1. The name of the limited partnership is:

Pacific Coast Energy Company LP

3. This Certificate of Amendment shall be effective as of 7:00 a.m., EST, December 31, 2011.

IN WITNESS WHEREOF, the undersigned has executed this Certificate of Amendment to Certificate of Limited Partnership on this 20th day of December, 2011.
