Attention Clerk and whomever is your direct supervisor...

Improvements are needed urgently to address the issue of homeless encampments. Merely relocating them to another corner does not solve the problem; it merely shifts it elsewhere. The safety concerns of our senior citizens are paramount, and the current situation renders sidewalks unsafe for passage.

The accumulation of trash and displays of aggressive behavior have reached unacceptable levels. It's concerning how frequently the city dispatches cleanup crews to address the streets between Valley Lake Street and Alvarado, zip code 90057. Today's events highlight the issue once again, as the encampment has now shifted from the corner of Alvarado and Valley to Valley and Lake St.

The presence of these encampments poses a direct threat to our community's safety, especially for our children. The sidewalk should be a sanctuary for pedestrians, not a hazard. Immediate action is imperative to remove these encampments from our neighborhood.

We implore the authorities to take action before any harm befalls our children or senior citizens. It's unacceptable to wait for an incident to occur before addressing this issue. We urge the enforcement of municipal code Section 41.18, which restricts activities such as sitting, lying, sleeping, and storing personal property in the public right-of-way. It's essential to safeguard the well-being of our community.

After all funds it seems as our elected councilmembers are not capable of solving the problems the city of Los Angeles has with the homeless and their aggressive behavior.

The homeless problem is been used just a flag to get millions of dollars and to use that as a political Platform
