**Comments for Public Posting:** I am a college student and I want to live in a place like the Livable Communities Initiative imagines. I grew up in Los Angeles — Koreatown — and my whole family is still there. When I graduate I want to be able to afford to live in LA. Like my friends in other major cities, I want an apartment that is close to my job and my community. I don't want to have to use a car everyday. I want to be able to walk, ride a bike, or take a bus or tram to work. The LCI would make that possible. I urge you to vote to study this plan. The young people of Los Angeles deserve it. Thank you.

**Comments for Public Posting:** Long time resident of Los Angeles, I fully FULLY support the LCI. We've dragged our feet as a city on both housing and traffic and LCI addresses both at once. We should definitely have a network of dense, mixed use, 15 minute city-style streets in LA with affordable housing for those who wish to live car and traffic light. Let's pass it!! ??

**Comments for Public Posting:** I support and want to live in an LCI community because I have kids who are graduating college and can't afford to live in their hometown! I want to live in an affordable, walkable, economically, ethnically, and racially diverse community. I want to live in a place where people live and work and go to school -- not one where huge single family homes are built on lots zoned for multiple units and stand empty! I support the LCI because I want LA to be its best version of itself -- filled with thriving communities and invested neighbors who care for one another.

**Comments for Public Posting:** I am a home owner in South LA in Marqueece Harris-Dawson district. I am worried about the affordability and also improvements in my neighborhood. There is a liquor store on the corner of my street and would love to improve this to a green grocer. This would better suit my neighborhood. We could have access to better quality foods and beverages plus cut down on transportation given that people could walk or ride a bike to access this store. The LCI has been instrumental in trying to support the black-owned businesses from displacement while adding housing. They have also looked to improve the area to more vibrant walkable community.

**Comments for Public Posting:** The LCI project is very important to Los Angeles housing shortage. It is Important as it offers a community that I and many others, maybe you, would enjoy living in for life. The plan to include trees will be valuable in reduce summer heat in Los Angeles and offer carbon absorption over time. Please pass this project.

**Comments for Public Posting:** I support the Livable Communities Initiative as a holistic and equitable solution to our housing, mobility and climate crises, and call on the city council to pass motion 21-1230-S2 to help implement the LCI vision, outlined in program 131 in L.A.'s Housing Element. Not only will it help create more housing, which LA desperately needs, it will also help make our streets safer. My husband was killed while crossing Lincoln Blvd. inside a crosswalk with a white walk signal. Streets need to be engineered to increase the safety of pedestrians and bicyclists. I urge you to pass the initiative and implement measures to help prevent other families from suffering the loss of a loved one.

**Comments for Public Posting:** To meet the goals of the Housing Element, much less the Element's moderate and low income goals, we must innovate. LCI is an innovative approach that will incentivize and streamline the creation of critically needed housing on high-resource commercial corridors in a way that will improve our neighborhoods. I hope you agree that this is exactly the sort of new idea that the Council must be seriously considering. Elaine L Studio City resident Constituent of Nithya Ramen, formerly a constituent of Paul Krekorian.

**Comments for Public Posting:** I support the Livable Communities Initiative and call on the city council to pass motion 21-1230-S2 to help implement the LCI vision, outlined in program 131 in L.A.'s Housing Element. Our housing crisis and climate crisis are affecting low-income people and communities of color the worst in our city. I currently live in South Los Angeles which experiences some of the worst air pollution in the city because of gas-fueled vehicles on the 110 freeway and we are on the frontlines of environmental injustice. We are also experiencing gentrification because of the city's failure to build more affordable housing. We have a tremendous opportunity to make Los Angeles more accessible for everyone. That begins by building more affordable, mixed-income communities and investing in transit infrastructure that centers people, not cars. Please support this motion to create a more equitable, sustainable, and livable Los Angeles.
