Comments for Public Posting: Signed the letter for approval without D as a homeowner of 40 years and a native Angeleno I believe in affordable housing however D will destroy part of our architectural history and ignore those of us who have invested our lives in our property. We will disappear as a community. And you also need us as a vital part of that community. We also deserve protection.

Comments for Public Posting: PLEASE help us to maintain our beautiful, historical neighborhood. We have lived in Hancock Park for over 40 years. My husband and I have worked extremely hard... living in HP has always been a dream of ours. PLEASE take into consideration the many residents who continue to contribute to this wonderful neighborhood and have diligently maintained these extraordinary properties. Thank you.

Comments for Public Posting: I am writing to protect single-family neighborhoods throughout Los Angeles and in support of Draft #3 of the CHIP/Housing Element Rezoning ordinance without the included the Exhibit D “options” (Council File 21-1230-S5) that would open up single-family neighborhoods to needless development. The Planning Department, in its report, clearly states that they have identified enough opportunities throughout our city to rezone to meet the State’s mandate for housing without the need to rezone our single-family areas. Here are some facts to consider. 1. The Department of City Planning has already acknowledged that rezoning single-family neighborhoods is not necessary to achieve the housing goals CHIP set out to reach. 2. State law already allows a duplex and two ADUs on each and every residential property. Single-family zones do and will continue to contribute to the housing inventory with thousands of ADUs. 3. Allowing apartments in single-family neighborhoods will not right the wrongs that in the past prevented people from buying homes. Instead, it keeps more people as renters. People need the opportunity to buy affordable homes so they can build generational wealth. Ending single-family zones will take away upward economic mobility from current and future generations of Angelenos. 4. Draft # 3 without Exhibit D options already includes a comprehensive plan for adding housing in all our high resource areas on our commercial corridors. If planned correctly new, vibrant neighborhoods can be created in each of our communities that include new affordable single-family homes for sale along corridors that abut existing single-family neighborhoods. We must help families, who have lost hope of owning their own home, achieve that goal. You are deciding on an existential issue affecting hundreds of thousands of Angelenos. I ask you to respect the diversity of housing which makes Los Angeles the remarkable city that it is. Please vote to Approve Draft #3 as recommended by the City Planning Commission, without the options contained In Exhibit D. Respectfully, George Hornig 400 S Hudson Ave, Los Angeles, CA 90020

Comments for Public Posting: I request you approve Draft #3 of CHIP without the seven "options" in Exhibit D that open up single-family neighborhoods. Anything that upzones our neighborhoods should happen with our input through Community Plans and not this way without community involvement. This has to be an open and transparent process and Planning clearly states they can meet their state obligation without opening up single-family neighborhoods. Respectfully, Jeffrey Kalban AIA

I ask you to respect the diversity of housing which makes Los Angeles the remarkable city that it is. Please vote to Approve Draft #3 as recommended by the City Planning Commission, without the options contained In Exhibit D. Respectfully, Brian Tabak, M.D. 180 S. McCadden Place Hancock Park Los Angeles, CA 90004 _____ Background Information on CHIP 1. CHIP rezones portions of the city to meet state requirements to allow the creation of much needed housing. 2. Groups across the city have worked to identify underdeveloped

land along commercial corridors in ALL Opportunity Zones where more than enough housing can be built without disrupting or destroying single-family neighborhoods. 3. RSO multi-family and Historic Districts and HPOZ neighborhoods are already protected in Draft # 3. 4. State law already allows a duplex and two ADUs on each and every residential property. Single-family zones are contributing to the housing inventory with thousands of ADUs. 5. Exhibit D includes seven (7) options that target single-family neighborhoods for rezoning. Exhibit D was slipped into Draft #3 without public hearing or comments. 6. The Department of City Planning acknowledged in Draft #3 of the CHIP that single-family neighborhoods did not need to be rezoned for the City to reach its goal of providing enough locations to build and affirming fair housing goals. 7. The Department of City Planning did not recommend adopting Exhibit D. 8. Yet, preservation of our single-family neighborhoods remains at serious risk following the City Planning Commission approving Draft #3 CHIP/Housing Element Rezoning ordinance (CHIP) without removing Exhibit D. They simply punted the issue to PLUM, the last step before CHIP reaches the City Council for approval. 9. What PLUM recommends will hold significant sway in the Council and might well be how the Council votes. 10. Be aware the opposition has been mobilized. We need to deliver BIG NUMBERS of emails all in support of protecting our neighborhoods.

Council File No: 21-1230-S5

Comments for Public Posting: I am writing to protect single-family neighborhoods throughout Los Angeles and in support of Draft #3 of the CHIP/Housing Element Rezoning ordinance without the included the Exhibit D “options” (Council File 21-1230-S5) that would open up single-family neighborhoods to needless development. The Planning Department, in its report, clearly states that they have identified enough opportunities throughout our city to rezone to meet the State’s mandate for housing without the need to rezone our single-family areas. Here are some facts to consider. 1. The Department of City Planning has already acknowledged that rezoning single-family neighborhoods is not necessary to achieve the housing goals CHIP set out to reach. 2. State law already allows a duplex and two ADUs on each and every residential property. Single-family zones do and will continue to contribute to the housing inventory with thousands of ADUs. 3. Allowing apartments in single-family neighborhoods will not right the wrongs that in the past prevented people from buying homes. Instead, it keeps more people as renters. People need the opportunity to buy affordable homes so they can build generational wealth. Ending single-family zones will take away upward economic mobility from current and future generations of Angelenos. 4. Draft # 3 without Exhibit D options already includes a comprehensive plan for adding housing in all our high resource areas on our commercial corridors. If planned correctly new, vibrant neighborhoods can be created in each of our communities that include new affordable single-family homes for sale along corridors that abut existing single-family neighborhoods. We must help families, who have lost hope of owning their own home, achieve that goal. You are deciding on an existential issue affecting hundreds of thousands of Angelenos. I ask you to respect the diversity of housing which makes Los Angeles the remarkable city that it is. Please vote to Approve Draft #3 as recommended by the City Planning Commission, without the options contained In Exhibit D. Respectfully, Michele Bahremand 826 South Bronson Avenue Los Angeles, California 90005 Wilshire Park HPOZ
