**Comments for Public Posting:** I am seriously concerned about the new General Plan for the expansion of multi-family housing in exclusively single family housing neighborhoods. This is not right to build 3-4-5 story apartment buildings in the center of a 1-2 story neighborhood of single family dwellings. We don't have the utilities, parking or even enough police and fire department support now. The impact of increasing our resident numbers as has been published is just plain wrong. If this goes any further, you are going to have even more Californians leaving this state. Please reconsider and find another alternative.
