**Comments for Public Posting:** It is cruel and inhumane to force out our unhoused neighbors who have nowhere else to go. Omicron is more transmissible than almost any virus in history. Displacing unhoused people right now is helping spread the virus, among people who are far less likely to be fully protected by the vaccine. We have to put public health before politics to end this pandemic. That includes protecting our most vulnerable neighbors. Stop Enforcing LAMC 41.18.
