Comments for Public Posting: I am a resident of Tujunga and fully support CF#22-0121, Illegal Dumping / Enforcement and Prosecution Program Establishment / Resources, and believe in investing in the installation and upkeep of monitoring systems, including cameras, at locations that are frequently the site of illegal dumping. The frequent practice of illegal dumping is hazardous to our environment and promotes further crime and endless frustration in our communities. We need to be able to document these events in order to hold offenders accountable and stop them from continuing this irresponsible and harmful practice.

Comments for Public Posting: Please, please, please consider installing surveillance cameras along La Tuna Canyon and Big Tujunga Canyon roads. These thoroughfares have become unsightly dumping grounds for people too lazy or cheap to go to the dump. This is our neighborhood! We love this unique beautiful rural and natural area. We have many neighbors who routinely clean up these messes, but it has truly gotten out of hand. This is ruining our quality of life and character of our neighborhood. I urge you to please install surveillance cameras, so that these criminals can be identified and brought to justice. Thank you so much for your consideration.
