Comments for Public Posting: Hi, good afternoon I hope everyone is doing great. I really need your help, our street lights have been out for more than a week now on our block. There are homeless people who created encampments across the street and they are stealing power from the light pole. Now the entire block has no streetlights for a while now. It is dangerous at night. I have reported the damaged street lights to 311, and non emergency LAPD. And nothing has been done so far. I'm unsure of what else to do but reach out to my city council. I have also reported the encampment with 311, they did remove it twice, but as soon as they are done cleaning, the homeless tweakers come right back and set up again. I have put in another request for clean up of encampment. What can we do to ensure the street lights are functioning on our block? Please let me know. The homeless people across the street are at 650 E Martin Luther King Jr Blvd Los Angeles, CA 90011. They are stealing light from the pole, and collect so much trash. They take up 4 parking spaces with their trash. And other encampments and RV's on their side of the street are stealing light from poles as well. There is no parking rule on that street so they have had their parked RV's sitting there for months without movement. Thank you for your time and help on this matter.
