Laguna Hills CA, 92653	Project Manager: Derrick Willis	01/09/19 14:59

Notes and Definitions

S-04	The surrogate recovery for this sample is outside of established control limits due to possible sample matrix effect.
S-01	The surrogate recovery for this sample is not available due to sample dilution required from high analyte concentration and/or matrix interference's.
R-07	Reporting limit for this compound(s) has been raised to account for dilution necessary due to high levels of interfering compound(s) and/or matrix affect.
QR-04	The pecent recovery and/or RPD was outside acceptance criteria. Results accepted based upon percent recovery results in duplicate QC sample and the CCV and CCB results.
M-02	Multiple analysis yielded poor internal standard and/or surrogate recoveries due to matrix effect. Results reported are from the most complete recovery of internal standards, however, recoveries were not within the acceptable limits of the method.
5035R	5035 sample integrity was compromised and unusable. Analysis was performed from additional soil sampled.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

Joann,
Please run B5-1 for STLC lead. Depending on results, we may need to run a TCLP as well.
Thanks
Derrick

Derrick,

Please find attached the final report and invoice for the following:

Project: **Holland Street**
Project Number: **2047.17.01**

If I can provide any additional information, please let me know.

We appreciate your business!

Best regards,
Joann

Shipping Alert:
Please note that SunStar Laboratories will be observing the upcoming Christmas and New Year's holidays on December 24th, 25th, and January 1st . We will be closed on Monday and Tuesday for Christmas Eve and Christmas day as well as Tuesday, New Year's Day. In addition, GSO will not have scheduled service on these days. If you have any short hold

samples arriving near or during these days, please contact your Project Manager in advance to ensure all holding times are met for your samples.

We appreciate your business and hope that you have a wonderful and safe holiday!

Notes and Definitions

TO-14	TO-15 analysis of sample was not performed due to high concentration of analyte(s). Sample was analyzed utilizing method TO-14 and reporting limit has been adjusted accordingly.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

Re: Technical Memorandum of Asbestos Containing Material, Lead-Based Paint, and Hazardous Materials Survey
Sunset Property – 1911 Sunset Boulevard
Los Angeles, California

Dear Mr. Wactor:

In response to your request, Northgate Environmental Management, Inc. (Northgate) has coordinated with Evista to conduct a Limited Asbestos and Lead Inspection and a Hazardous Materials Inventory for Wactor & Wick LLP on behalf of your client Holland Partner Group, at the Sunset Property located at 1911 to 1931 Sunset Boulevard in Los Angeles, California (the Site). The Site consists of approximately 0.95 acres of land developed with two single-story commercial structures with surface parking. The Site is identified as Assessor's Parcel Numbers 5404-001-007, -008, and -034 in Los Angeles County.

The eastern portion of the Site is developed with an approximate 18,429-square foot commercial structure occupied by a restaurant located at 1911 Sunset Boulevard. This structure is slab-on-grade construction that includes a partial basement beneath the northwestern portion of the building. The interior of the structure includes several dining areas, restrooms, a kitchen, and storage areas.

Northgate has prepared this Technical Memorandum to summarize the results of the asbestos containing material (ACM) and lead-based paint (LBP) survey and the hazardous materials inventory conducted for the restaurant structure at the Site.

LIMITED ASBESTOS AND LEAD INSPECTION

Evista conducted an ACM and LBP at the restaurant building on January 14, 2019 located at 1911 Sunset Boulevard on the eastern portion of the Site. The survey included the collection and analysis of over 100 samples for ACM and 139 areas that were tested for LBP. The results indicated that ACMs are present in floor tile and mastic, floor leveling compound, wallboards,

and plaster throughout the restaurant and are assumed to be present in the stucco and roofing material. LBP was also detected throughout the structure in the lobby walls, the east dining room walls, the kitchen floor, and the bathroom walls. Evista concluded that ACMs and LBP are present in building materials in this structure, which should be handled in accordance with local and state regulations. Evista also concluded that given the survey limitations, a more comprehensive pre-demolition survey should be conducted to the determine the presence and quantities of ACM and LBP for demolition and proper disposal; however, approximate quantities of ACM were provided.

HAZARDOUS MATERIALS INVENTORY

Evista conducted a hazardous materials inventory at the restaurant building on January 14, 2019 located at 1911 Sunset Boulevard on the eastern portion of the Site. The inventory indicated that hazardous materials present in the structure included fluorescent light tubes, thermostats, electrical panels, range top fire suppression systems, fluorescent lighting fixtures with ballasts, battery powered exit signs, refrigerators/freezers, battery powered emergency exit signs, beverage fountains, and the heating, ventilation, and air conditioning system. Evista recommended that all potential hazardous substances be further investigated via analytical means or by researching material documentation to establish if the material is hazardous or subject to disposal restrictions. If the material is hazardous, it should be properly removed prior to disturbance of the building by renovation or demolition related activities.

CLOSING

If you should have any questions or require any additional information, please do not hesitate to call me at 949.375.7004.

Sincerely,
Northgate Environmental Management, Inc.

RE: Limited Asbestos and Lead Inspection
Taix Restaurant
1911 Sunset Boulevard
Los Angeles, California 90026

Dear Mr. Willis:

Evista Industries, Inc., performed a limited asbestos and lead survey and assessment at the above referenced property on January 3 and 14, 2019. This report demonstrates the complete results of our survey and inspection. We appreciate the opportunity to provide you with our services. Please feel free to contact us to discuss any portion of this report. We look forward to providing you with environmental services in the future.

Sincerely,

Chris Blake
Director of Consulting
CAC No. 01-3027
LRC-I/A, PM, PD No. 6283

www.evista-ehs.com I 888 775 7738 p
2901 W. Coast Highway, Ste. 350, Newport Beach, CA 92663 I 949 783 3353 f

A. Introduction

Evista Industries, Inc., (Evista) collected bulk samples from suspect asbestos-containing and lead-based paint in order to determine the presence (if any) of asbestos and/or lead content within the subject property. As an established limitation to this service, Evista was allowed limited access to the property and therefore all areas of the property could not be surveyed. It should also be noted that property was occupied at the time of the survey and therefore in some areas destructive sampling was not feasible. The survey was conducted by Chris Blake, an (Environmental Protection Agency) accredited building inspector and State of California and DOSH (Division of Occupational Safety and Health) Certified Asbestos Consultant, as well as a State of California Department of Public Health (CDPH) licensed Lead-Related Construction Inspector/Assessor.

The result of the sampling and subsequent analysis determined that the following suspect asbestos-containing materials collected and analyzed do contain asbestos fibers:

- Multi-layered Vinyl Floor Tile and Mastic
- Floor Leveling Compound
- Red 9”x 9” Vinyl Floor Tile and Mastic
- Black 9”x 9” Vinyl Floor Tile and Mastic
- Wallboard
- Plaster
- Stucco (Assumed)
- Roofing Material (Assumed)

The result of the sampling and subsequent analysis determined that the following suspect asbestos-containing materials collected and analyzed do not contain asbestos fibers:

- Carpet Glue
- Acoustic Ceiling Material
- 12” Acoustic Ceiling Tile and Mastic
- 12” Acoustic Ceiling Tile with Pinholes and Fissures and Mastic
- Vinyl Base Cove with Glue
- TSI Pipe Insulation

Occupational Safety and Health Administration (OSHA) Federal, State (CALDOSH) and local regulatory agencies mandated that ACM regardless of quantity shall be handled (e.g. removal, repair, etc.) by Asbestos trained and qualified individual or Contractors. These identified ACMs should be removed by State licensed Asbestos Abatement Contractors prior to any demolition or construction activities, if these ACMs would be disturbed or impacted.

The lead-based inspection and XRF analysis has determined that the following suspect lead-containing paint contain lead in excess of 1.0 mg/cm^2:

- Interior Brown Wood Wall (Lobby Entry)
- Interior Brown Wood Door (Lobby Entry)
- Interior White Plaster Walls (East Dining Room)
- Interior White Ceramic Walls (Kitchen)
- Interior Brown Wood Door Casing (Kitchen)
- Interior Pink Ceramic Walls (Kitchen Bathroom)

www.evista-ehs.com I 888 775 7738 p
2901 W. Coast Highway, Ste. 350, Newport Beach, CA 92663 I 949 783 3353 f

- Exterior Building Components

Lead-Based Paint (LBP)*:* paint or other surface coating that contains lead equal to or in excess of 1.0 mg/cm^2 lead per surface area, 0.5% by weight, or 5,000 ppm.

B. Field Survey and Analytical Method

Evista's CAL DOSH Certified Asbestos Consultant performed the sampling activity in compliance with existing regulations. The survey included a visual inspection of accessible interior and exterior areas of the subject property. Adequate quantities of material to be sampled, about 1/2 square inch, were obtained from suspect asbestos containing materials and placed inside a sterile airtight bag and sealed. All and each sample was then labeled with a Evista unique identification number for proper identification of each and every collected sample. Each sample was then logged on the Evista chain of custody sheet. Each sample container was then placed inside a larger sterile airtight bag.

(It is possible at times that the laboratory had their own chain of custody, and the receipt of the samples submitted would be indicated on their own (other laboratory) forms).

The following briefly describes the standard laboratory procedures utilized in the identification of the mineral asbestos in a bulk sample, which is done by microscopic analysis. Each and all laboratory testing was conducted in compliance with the EPA Interim Method for Determination of Asbestos in Bulk Samples (EPA-600/M4-20-020) per CFR 40 763. The samples were visually examined for homogeneity, and non-homogeneous samples were ground to ensure homogeneity. The microscopic slides were prepared from each sample using a refractive index liquid such as triacetin and ethyl cinnamate having a refractive index of 1.550; 1-bromonaphthalene and 1-Iodonaphthalene having a refractive index of 1.680; or, hydrogenated terthenyl and 1-bromonaphthalene having a refractive index of 1.605. Each slide was then examined for the presence of asbestos utilizing Polarized Light Microscopy (PLM) and Dispersion Staining techniques.

The percentage of asbestos on each sample was estimated microscopically by visual examination of fibers greater than 5 microns in length and with an aspect ratio of 3:1 or greater. The identity of asbestos fibers was confirmed with appropriate refractive index liquids, and the application of dispersion staining and other techniques.).

Sampling of painted/coated surfaces with suspect Lead-Based Paint was completed using an X-Ray Fluorescence Analyzer (XRF) (serial #93236). The California Department of Public Health currently defines LBP as paint with lead levels equal to or exceeding 1.0 milligram per square centimeter (mg/cm^2) or 0.5 percent (%) by weight (0.7 mg/cm^2 in Los Angeles County). However, the California Occupational Safety and Health Administration regulates paint with lead levels equal to or exceeding 0.1 mg/cm^2 or by 0.06 percent (%) by weight.

Calibration readings were taken at the beginning and the end of the inspection. Validation checks were taken against a known standard (test blocks) to verify that the instrument was functioning properly. Validation check procedures followed those outlined in the PCS for the Niton XLp-300A model. The test block has a lead level of 1.02 mg/cm^2. The instrument is considered to be working properly when the calibration check limits are measured between 0.8 and 1.2 mg/cm^2. Please see attachment for calibration check measurements and XRF readings.

XRF sampling was performed in accordance with the procedures outlined in the Performance Characteristics Sheets (PCS) provided by the manufacturer (Niton) of the instrument.

The procedures followed during the inspection are based on the highest industry standards used for residential or commercial properties which can be found in the United States Department of Housing and Urban Development (HUD) "Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing" (June 1995, revised 1997), and Section 403 of the "Toxic Substances Control Act."

www.evista-ehs.com I 888 775 7738 p
2901 W. Coast Highway, Ste. 350, Newport Beach, CA 92663 I 949 783 3353 f

Additional painted/coated surfaces not listed in this report may be discovered and encountered and must be presumed to be lead-containing until sample collection and subsequent analysis prove otherwise.

All samples collected were submitted to LA Testing, 5431 Industrial Drive, Huntington Beach, CA 92649. LA Testing is a NVLAP approved laboratory (NVLAP #101384) for asbestos in accordance with existing applicable Federal, State and local regulations.

C. Survey Results

Asbestos survey results are shown in Attachment section.

[1] Determination made based on condition of material(s) at time of survey without consideration for whether or not material(s) would be rendered friable based on removal method.

[2] See Regulatory Requirements section below for definition/additional information.

[3] Material quantities provided are estimates. Actual abatement quantities must be field verified by an abatement contractor prior to removal.

Additional materials not listed in this report may be discovered and encountered during the course of the project and must be presumed to be asbestos-containing material (ACM) until sample collection and subsequent analysis prove otherwise.

Additional painted/coated surfaces not listed in this report may be discovered and encountered during the course of the project and must be presumed to be lead-based until sample collection and subsequent analysis prove otherwise.

D. Regulatory Requirements

Asbestos: Current applicable Federal, State and Local statutes specifies work practice requirements for demolition and/or renovation activities, and the associated disturbance of asbestos-containing material, as well as the storage and disposal of asbestos-containing waste material. Proper notification, removal techniques for asbestos-containing material, clean-up procedures and waste storage and disposal requirements are mandated in connection with renovation or demolition activities. This survey was performed in compliance with requirements of the Asbestos Hazard Emergency Response Act (AHERA) 40 CFR 763, Cal/OSHA Asbestos Construction Standard Title 8 CCR 1529, The Bay Area Air Quality Management District (BAAQMD) Rule 11-02, as well as the National Emissions Standards for Hazardous Air Pollutants (NESHAP) 40 CFR 61 Subpart M.

It is Federal, State and Local agency requirements to maintain proof of compliance (asbestos handling records) and disposal of asbestos (waste chain of custody) by owner. Asbestos responsibility and ownership are forever. An EPA/State of California certified and approved Asbestos Abatement Contractor and Hazardous Waste Hauler must perform the asbestos abatement and decontamination, and transport (haulers) to a State approved landfill

Lead-Based Paint (LBP)*:* paint or other surface coating that contains lead equal to or in excess of 1.0 mg/cm^2 lead per surface area (0.7 mg/cm^2 in Los Angeles County), 0.5% by weight, or 5,000 ppm. LBP removal and disposal must be performed in accordance with CDPH regulations in residential or public buildings and the US Department of Housing and

www.evista-ehs.com I 888 775 7738 p
2901 W. Coast Highway, Ste. 350, Newport Beach, CA 92663 I 949 783 3353 f

Urban Development (HUD) and 2010 Toxic Substances Control Act (TSCA) Renovation, Repair and Painting Rule (RRP) in pre-1978 target housing and child-occupied facilities. DOSH or Cal/OSHA requirements must also be followed where employees may be occupationally exposed to lead.

Lead-Containing Paint (LCP): paint or other surface coating containing less than 1.0 mg/cm^2 lead per surface area (0.7 mg/cm^2 in Los Angeles County), 0.5% by weight, or 5,000 ppm. LCP removal and disposal must be performed in accordance with DOSH or Cal/OSHA regulations and can be handled by a licensed general contractor who has prepared a DOSH or Cal/OSHA lead compliance plan/program for the protection of its workers in accordance with Title 8 Section 1532.1 of the California Code of Regulations (CCRs). Waste characterization to determine proper disposal is governed by Title 22 of CCRs.

E. Conclusions and Recommendations

Based on the survey results, it is the professional opinion of Evista that some of the materials surveyed and sampled do contain asbestos containing materials (ACM), which should be handled in accordance with applicable local and state regulations (which include SCAQMD Rule 1403 and Cal/OSHA Asbestos Construction Standard Title 8 CCR 1529) Accordingly, Evista recommends that a Cal-DOSH registered and State licensed asbestos contractor perform the removal of the asbestos containing materials if they will be impacted during demolition or renovation In addition, lead-based paint (LBP) was detected on surfaces tested and should be handled in accordance with CDPH regulations in residential or public buildings and the US Department of Housing and Urban Development (HUD) and 2010 Toxic Substances Control Act (TSCA) Renovation, Repair and Painting Rule (RRP) in pre-1978 target housing and child-occupied facilities. DOSH or Cal/OSHA requirements must also be followed where employees may be occupationally exposed to lead. Due to the survey limitations, Evista recommends that a comprehensive, pre-demolition survey be conducted on the subject property for ACM & LBP to determine their presence and the quantities for demolition and proper disposal.

Inspection Limitation

This limited survey was conducted in conformance with EPA Guidelines. Evista utilizes established practices and techniques in accordance with regulatory standards while performing this survey. Evista cannot be responsible for changing conditions that may alter relative exposure risk or for future changes in accepted methodology. Evista does not guarantee either expressed or implied that all asbestos materials were sampled during this survey. Evista was retained only to perform the limited asbestos and lead survey on materials requested by the Client and the findings shall only be applicable to the sample taken, the sample locations and the time that the sample(s) was/were collected. Evista shall not be held responsible for deficiencies, commissions, and all other particulars related to the limited sampling conducted at the subject property. Evista subcontracted with LA Testing to perform the asbestos analysis. Every reasonable effort has been made to assure correctness. If an Asbestos/Lead Abatement Contractor or other Demolition/Construction Contractor is employed, such contractor should bring any discrepancies found in this report as it relates to current site conditions or newly discovered site conditions to the immediate attention of Evista. This report should not be used solely for asbestos/lead abatement bidding purposes. Contractor bidding for abatement related to the findings of this report should field verify material quantities and locations during the bidding process.

or Other Approved Signatory

EMSL maintains liability limited to cost of analysis. The above analyses were performed in general compliance with Appendix E to Subpart E of 40 CFR (previously EPA 600/M4-82-020 "Interim Method"), but augmented with procedures outlined in the 1993 ("final") version of the method. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. Interpretation and use of test results are the responsibility of the client. All samples received in acceptable condition unless otherwise noted. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST or any agency of the federal government. EMSL recommends gravimetric reduction for all non-friable organically bound materials prior to analysis. Estimation of uncertainty is available on request.

Samples analyzed by LA Testing Huntington Beach, CA NVLAP Lab Code 101384-0, CA ELAP 1406

HAZARDOUS MATERIAL INVENTORY REPORT

Project Number/Name: 19-8794-TAIX RESTAURANT
Address: 1911 Sunset Boulevard
Los Angeles, California 90026

Inspection Date(s): 01/14/2019

INTRODUCTION

Evista Industries, Inc. (Evista) performed a limited Hazardous Material Inventory at the above-mentioned property. This report provides an explanation of our findings according to our site visit on the referenced date. The materials and items provided in this report are intended only as list of visually observed potential Hazardous materials. These items may require special handling or be subject to specific waste disposal regulations. Items included in the inventory were limited to those that would be remain part of the tenant space. Products, merchandise and tenant contents were included in the inventory. In consideration of the inherent limitations of this inspection, it shall be known that further determination via laboratory analysis or other by other means may be necessary to determine the actual Hazardous Waste status of each item. As an established limitation to this service, Evista was allowed limited access time to the property and therefore all areas of the property could not be surveyed.

The following items provide the general parameters and scope of this report:

- Inspection by: Chris Blake, Environmental Hygienist, HAZWOPER Certified
- Scope of inspection area(s): Interior and Exterior

FIELD SURVEY

Evista's technician conducted a visual assessment from all accessible area(s) with the subject spaces referenced above. Suspect materials and items were visually inspected in order to ascertain the potential to contain hazardous or regulated materials.

HAZARDOUS MATERIAL INVENTORY

40 – fluorescent light tubes (possibly mercury containing)	20 – fluorescent lighting fixtures with ballasts - (possibly possible PCB containing)	HVAC system (possibly CFC (i.e. Freon) containing)
3 – HVAC Thermostat (possibly mercury containing)	12 – Battery Powered Exit Signs (possibly lead/heavy metal containing)	14 – Battery Powered Emergency Lighting Fixtures (possibly lead/heavy metal containing)
Electrical Panels (possibly lead/heavy metal containing)	2 – Refrigerator/Freezer (possibly CFC (i.e. Freon) containing)	2 – beverage fountains (possibly CFC (i.e. Freon) containing)
4 – Range top Fire Suppression System (possibly Halon containing)	--	--

RECOMMENDATIONS

Evista recommends that all potential hazardous substances within the items / components listed above be further investigated via analytical means or by researching material documentation (if available) to establish if the material is hazardous or is subject to disposal restrictions. If the material is determined to be hazardous, or assumed to be so, then it

www.evista-ehs.com I 888 775 7738 p
2901 W. Coast Highway, Ste. 350, Newport Beach, CA 92663 I 949 783 3353 f

should be properly removed prior to disturbance by renovation or demolition related activities in accordance with California Code of Regulations Title 22, 66261-66265, Health and Safety Code 25189.5 and all additional pertinent environmental and OSHA regulations.

LIMITATIONS

Evista makes no representation or warranty that any recommendation will result in the complete elimination of the hazardous material(s) any area(s) described in this report. Evista cannot be responsible for changing conditions that may alter relative exposure risk or for future changes in accepted methodology. Evista does not guarantee either expressed or implied that all hazardous material(s) were identified during this survey. Evista was retained only to perform a visual inventory of accessible material(s) within the scope of work. The findings shall only be applicable to the location(s) and at the time that the observations were made. In some cases, hidden or indistinguishable material(s) may not have been visible. Finally, Evista shall not be held responsible for the deficiencies or omissions of others in relation to the services contracted herein.

Sincerely,

Chris Blake

Re: Technical Memorandum of Asbestos Containing Material, Lead-Based Paint, and Hazardous Materials Survey
Sunset Property – 1931 Sunset Boulevard
Los Angeles, California

Dear Mr. Wactor:

In response to your request, Northgate Environmental Management, Inc. (Northgate) has coordinated with Evista to conduct a Limited Asbestos and Lead Inspection and a Hazardous Materials Inventory for Wactor & Wick LLP on behalf of your client Holland Partner Group, at the Sunset Property located at 1911 to 1931 Sunset Boulevard in Los Angeles, California (the Site). The Site consists of approximately 0.95 acres of land developed with two single-story commercial structures with surface parking. The Site is identified as Assessor's Parcel Numbers 5404-001-007, -008, and -034 in Los Angeles County.

The southwestern portion of the Site is developed with an approximate 4,000 square-foot single-story slab-on-grade commercial structure located at 1931 Sunset Boulevard. This building is occupied by a medical office. The interior of the medical office includes a lobby, multiple exam rooms, offices, restrooms, a kitchen, storage areas, and a break room.

Northgate has prepared this Technical Memorandum to summarize the results of the asbestos containing material (ACM) and lead-based paint (LBP) survey and the hazardous materials inventory conducted for the medical office structure at the Site.

LIMITED ASBESTOS AND LEAD INSPECTIONS

Evista conducted an ACM and LBP survey at the medical building on February 11, 2019 located at 1931 Sunset Boulevard on the southwestern portion of the Site. The survey included the collection and analysis samples for ACM and 70 areas that were tested for LBP. The results indicated that ACMs are present in wallboard, acoustic ceiling material, and window putty throughout the building and are assumed to be present in the ductwork and roofing material.

LBP was not detected in the structure. Evista concluded that ACMs are present in building materials in this structure, which should be handled in accordance with local and state regulations. Evista also concluded that given the survey limitations, a more comprehensive pre-demolition survey should be conducted to the determine the presence and quantities of ACM and LBP for demolition and proper disposal however, approximate quantities of ACM were provided.

HAZARDOUS MATERIALS INVENTORIES

Evista conducted a hazardous materials inventory at the medical building on February 11, 2019 located at 1931 Sunset Boulevard on the southwestern portion of the Site. The inventory indicated that hazardous materials present in the structure included fluorescent light tubes, fluorescent lighting fixtures with ballasts, and the heating, ventilation, and air conditioning system. Evista recommended that all potential hazardous substances be further investigated via analytical means or by researching material documentation to establish if the material is hazardous or subject to disposal restrictions. If the material is hazardous, it should be properly removed prior to disturbance of the building by renovation or demolition related activities.

CLOSING

If you should have any questions or require any additional information, please do not hesitate to call me at 949.375.7004.

Sincerely,
Northgate Environmental Management, Inc.

RE: Limited Asbestos and Lead Inspection
Park Sunset Medical Building
1931 Sunset Boulevard
Los Angeles, California 90026

Dear Mr. Willis:

Evista Industries, Inc., performed a limited asbestos and lead survey and assessment at the above referenced property on February 11, 2019. This report demonstrates the complete results of our survey and inspection. We appreciate the opportunity to provide you with our services. Please feel free to contact us to discuss any portion of this report. We look forward to providing you with environmental services in the future.

Sincerely,

Chris Blake
Director of Consulting
CAC No. 01-3027

A. Introduction

Evista Industries, Inc., (Evista) collected bulk samples from suspect asbestos-containing and lead-based paint in order to determine the presence (if any) of asbestos and/or lead content within the subject property. As an established limitation to this service, Evista was allowed limited access to the property and therefore all areas of the property could not be surveyed. It should also be noted that property was occupied at the time of the survey and therefore in some areas destructive sampling was not feasible. The survey was conducted by Chris Blake, an (Environmental Protection Agency) accredited building inspector and State of California and DOSH (Division of Occupational Safety and Health) Certified Asbestos Consultant, as well as a State of California Department of Public Health (CDPH) licensed Lead-Related Construction Inspector/Assessor.

The result of the sampling and subsequent analysis determined that the following suspect asbestos-containing materials collected and analyzed do contain asbestos fibers:

- Wallboard
- Acoustic Ceiling Material
- Window Putty
- Ductwork (Assumed)
- Roofing Material (Assumed)

Occupational Safety and Health Administration (OSHA) Federal, State (CALDOSH) and local regulatory agencies mandated that ACM regardless of quantity shall be handled (e.g. removal, repair, etc.) by Asbestos trained and qualified individual or Contractors. These identified ACMs should be removed by State licensed Asbestos Abatement Contractors prior to any demolition or construction activities, if these ACMs would be disturbed or impacted.

The lead-based inspection and XRF analysis has determined that none of the representative suspect lead-containing paint surfaces tested yielded lead levels above 1.0 mg/cm^2.

Lead-Based Paint (LBP)*:* paint or other surface coating that contains lead equal to or in excess of 1.0 mg/cm^2 lead per surface area, 0.5% by weight, or 5,000 ppm.

B. Field Survey and Analytical Method

Evista's CAL DOSH Certified Asbestos Consultant performed the sampling activity in compliance with existing regulations. The survey included a visual inspection of accessible areas within the interior and exterior of the subject property. Adequate quantities of material to be sampled, about 1/2 square inch, were obtained from suspect asbestos containing materials and placed inside a sterile airtight bag and sealed. All and each sample was then labeled with a Evista unique identification number for proper identification of each and every collected sample. Each sample was then logged on the Evista chain of custody sheet. Each sample container was then placed inside a larger sterile airtight bag.

(It is possible at times that the laboratory had their own chain of custody, and the receipt of the samples submitted would be indicated on their own (other laboratory) forms).

The following briefly describes the standard laboratory procedures utilized in the identification of the mineral asbestos in a bulk sample, which is done by microscopic analysis. Each and all laboratory testing was conducted in compliance with the EPA Interim Method for Determination of Asbestos in Bulk Samples (EPA-600/M4-20-020) per CFR 40 763. The samples were visually examined for homogeneity, and non-homogeneous samples were ground to ensure homogeneity. The microscopic slides were prepared from each sample using a refractive index liquid such as triacetin and ethyl cinnamate having a refractive index of 1.550; 1-bromonaphthalene and 1-Iodonaphthalene having a refractive index of

www.evista-ehs.com I 888 775 7738 p
2901 W. Coast Highway, Ste. 350, Newport Beach, CA 92663 I 949 783 3353 f

1.680; or, hydrogenated terthenyl and 1-bromonaphthalene having a refractive index of 1.605. Each slide was then examined for the presence of asbestos utilizing Polarized Light Microscopy (PLM) and Dispersion Staining techniques.

The percentage of asbestos on each sample was estimated microscopically by visual examination of fibers greater than 5 microns in length and with an aspect ratio of 3:1 or greater. The identity of asbestos fibers was confirmed with appropriate refractive index liquids, and the application of dispersion staining and other techniques.).

Sampling of painted/coated surfaces with suspect Lead-Based Paint was completed using an X-Ray Fluorescence Analyzer (XRF) (serial #93236). The California Department of Public Health currently defines LBP as paint with lead levels equal to or exceeding 1.0 milligram per square centimeter (mg/cm^2) or 0.5 percent (%) by weight (0.7 mg/cm^2 in Los Angeles County). However, the California Occupational Safety and Health Administration regulates paint with lead levels equal to or exceeding 0.1 mg/cm^2 or by 0.06 percent (%) by weight.

Calibration readings were taken at the beginning and the end of the inspection. Validation checks were taken against a known standard (test blocks) to verify that the instrument was functioning properly. Validation check procedures followed those outlined in the PCS for the Niton XLp-300A model. The test block has a lead level of 1.02 mg/cm^2. The instrument is considered to be working properly when the calibration check limits are measured between 0.8 and 1.2 mg/cm^2. Please see attachment for calibration check measurements and XRF readings.

XRF sampling was performed in accordance with the procedures outlined in the Performance Characteristics Sheets (PCS) provided by the manufacturer (Niton) of the instrument.

The procedures followed during the inspection are based on the highest industry standards used for residential or commercial properties which can be found in the United States Department of Housing and Urban Development (HUD) "Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing" (June 1995, revised 1997), and Section 403 of the "Toxic Substances Control Act."

Additional painted/coated surfaces not listed in this report may be discovered and encountered and must be presumed to be lead-containing until sample collection and subsequent analysis prove otherwise.

All samples collected were submitted to LA Testing, 5431 Industrial Drive, Huntington Beach, CA 92649. LA Testing is a NVLAP approved laboratory (NVLAP #101384) for asbestos in accordance with existing applicable Federal, State and local regulations.

C. Survey Results

Asbestos survey results are shown in Attachment section.

Sample(S) Location(S)	Material(S)	Asbestos Content[2]	Condition	Friable/Non-Friable[1]	Estimated Quantity[3]
Interior Walls and Ceilings Throughout	*Wallboard*	*<1% Chrysotile*	*Good*	*Non-Friable*	*6,000 SF*
Office/Room Hot Water Heater Closet Ceiling	**Acoustic Ceiling Material**	**4% Chrysotile**	**Good**	**Friable**	**12 SF**
Exterior Windows	*Window Putty*	*<1% Chrysotile*	*Good*	*Non-Friable*	*8 Windows*
Interior Attic Throughout	**Ductwork**	**Assumed**	**Good**	**Non-Friable**	**500 LF**
Exterior Roof Throughout	**Roofing Material**	**Assumed**	**Good**	**Non-Friable**	**4,000 SF**

[1] Determination made based on condition of material(s) at time of survey without consideration for whether or not material(s) would be rendered friable based on removal method.

[2] See Regulatory Requirements section below for definition/additional information.

[3] Material quantities provided are estimates. Actual abatement quantities must be field verified by an abatement contractor prior to removal.

Additional materials not listed in this report may be discovered and encountered during the course of the project and must be presumed to be asbestos-containing material (ACM) until sample collection and subsequent analysis prove otherwise.

The following table summarizes the component, substrate, location, condition, color, and result of painted materials and surfaces that were tested for lead:

Additional painted/coated surfaces not listed in this report may be discovered and encountered during the course of the project and must be presumed to be lead-based until sample collection and subsequent analysis prove otherwise.

D. Regulatory Requirements

Asbestos: Current applicable Federal, State and Local statutes specifies work practice requirements for demolition and/or renovation activities, and the associated disturbance of asbestos-containing material, as well as the storage and disposal of asbestos-containing waste material. Proper notification, removal techniques for asbestos-containing material, clean-up procedures and waste storage and disposal requirements are mandated in connection with renovation or demolition activities. This survey was performed in compliance with requirements of the Asbestos Hazard Emergency Response Act (AHERA) 40 CFR 763, Cal/OSHA Asbestos Construction Standard Title 8 CCR 1529, The Bay Area Air Quality Management District (BAAQMD) Rule 11-02, as well as the National Emissions Standards for Hazardous Air Pollutants (NESHAP) 40 CFR 61 Subpart M.

It is Federal, State and Local agency requirements to maintain proof of compliance (asbestos handling records) and disposal of asbestos (waste chain of custody) by owner. Asbestos responsibility and ownership are forever. An EPA/State of California certified and approved Asbestos Abatement Contractor and Hazardous Waste Hauler must perform the asbestos abatement and decontamination, and transport (haulers) to a State approved landfill

Lead-Based Paint (LBP)*:* paint or other surface coating that contains lead equal to or in excess of 1.0 mg/cm^2 lead per surface area (0.7 mg/cm^2 in Los Angeles County), 0.5% by weight, or 5,000 ppm. LBP removal and disposal must be performed in accordance with CDPH regulations in residential or public buildings and the US Department of Housing and Urban Development (HUD) and 2010 Toxic Substances Control Act (TSCA) Renovation, Repair and Painting Rule (RRP) in pre-1978 target housing and child-occupied facilities. DOSH or Cal/OSHA requirements must also be followed where employees may be occupationally exposed to lead.

Lead-Containing Paint (LCP): paint or other surface coating containing less than 1.0 mg/cm^2 lead per surface area (0.7 mg/cm^2 in Los Angeles County), 0.5% by weight, or 5,000 ppm. LCP removal and disposal must be performed in accordance with DOSH or Cal/OSHA regulations and can be handled by a licensed general contractor who has prepared a DOSH or Cal/OSHA lead compliance plan/program for the protection of its workers in accordance with Title 8 Section 1532.1 of the California Code of Regulations (CCRs). Waste characterization to determine proper disposal is governed by Title 22 of CCRs.

E. Conclusions and Recommendations

Based on the survey results, it is the professional opinion of Evista that some of the materials surveyed and sampled do contain asbestos containing materials (ACM), which should be handled in accordance with applicable local and state regulations (which include SCAQMD Rule 1403 and Cal/OSHA Asbestos Construction Standard Title 8 CCR 1529) Accordingly, Evista recommends that a Cal-DOSH registered and State licensed asbestos contractor perform the removal of the asbestos containing materials if they will be impacted during demolition or renovation. In addition, lead-containing paint (LBP) was detected on surfaces tested and should be handled in accordance with DOSH or Cal/OSHA regulations. DOSH or Cal/OSHA requirements must also be followed where employees may be occupationally exposed to lead. Due to the survey limitations, Evista recommends that a comprehensive, pre-demolition survey be conducted on the subject property for ACM & LBP to determine their presence and the quantities for demolition and proper disposal.

www.evista-ehs.com I 888 775 7738 p
2901 W. Coast Highway, Ste. 350, Newport Beach, CA 92663 I 949 783 3353 f

Inspection Limitation

This limited survey was conducted in conformance with EPA Guidelines. Evista utilizes established practices and techniques in accordance with regulatory standards while performing this survey. Evista cannot be responsible for changing conditions that may alter relative exposure risk or for future changes in accepted methodology. Evista does not guarantee either expressed or implied that all asbestos materials were sampled during this survey. Evista was retained only to perform the limited asbestos and lead survey on materials requested by the Client and the findings shall only be applicable to the sample taken, the sample locations and the time that the sample(s) was/were collected. Evista shall not be held responsible for deficiencies, commissions, and all other particulars related to the limited sampling conducted at the subject property. Evista subcontracted with LA Testing to perform the asbestos analysis. Every reasonable effort has been made to assure correctness. If an Asbestos/Lead Abatement Contractor or other Demolition/Construction Contractor is employed, such contractor should bring any discrepancies found in this report as it relates to current site conditions or newly discovered site conditions to the immediate attention of Evista. This report should not be used solely for asbestos/lead abatement bidding purposes. Contractor bidding for abatement related to the findings of this report should field verify material quantities and locations during the bidding process.

If you have any questions, please feel free to contact me at (800) 214-9959.

EMSL maintains liability limited to cost of analysis. The above analyses were performed in general compliance with Appendix E to Subpart E of 40 CFR (previously EPA 600/M4-82-020 "Interim Method"), but augmented with procedures outlined in the 1993 ("final") version of the method. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. Interpretation and use of test results are the responsibility of the client. All samples received in acceptable condition unless otherwise noted. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST or any agency of the federal government. EMSL recommends gravimetric reduction for all non-friable organically bound materials prior to analysis. Estimation of uncertainty is available on request.

HAZARDOUS MATERIAL INVENTORY REPORT

Project Number/Name: 19-8794-PARK SUNSET MEDICAL BUILDING
Address: 1931 Sunset Boulevard
Los Angeles, California 90026

Inspection Date(s): 02/11/2019

INTRODUCTION

Evista Industries, Inc. (Evista) performed a limited Hazardous Material Inventory at the above-mentioned property. This report provides an explanation of our findings according to our site visit on the referenced date. The materials and items provided in this report are intended only as list of visually observed potential Hazardous materials. These items may require special handling or be subject to specific waste disposal regulations. Items included in the inventory were limited to those that would be remain part of the tenant space. Products, merchandise and tenant contents were included in the inventory. In consideration of the inherent limitations of this inspection, it shall be known that further determination via laboratory analysis or other by other means may be necessary to determine the actual Hazardous Waste status of each item. As an established limitation to this service, Evista was allowed limited access time to the property and therefore all areas of the property could not be surveyed.

The following items provide the general parameters and scope of this report:

- Inspection by: Chris Blake, Environmental Hygienist, HAZWOPER Certified
- Scope of inspection area(s): Interior and Exterior

FIELD SURVEY

Evista's technician conducted a visual assessment from all accessible area(s) with the subject spaces referenced above. Suspect materials and items were visually inspected in order to ascertain the potential to contain hazardous or regulated materials.

HAZARDOUS MATERIAL INVENTORY

8 –fluorescent light tubes (possibly mercury containing)	4 –fluorescent lighting fixtures with ballasts - (possibly possible PCB containing)	HVAC system (possibly CFC (i.e. Freon) containing)

RECOMMENDATIONS

Evista recommends that all potential hazardous substances within the items / components listed above be further investigated via analytical means or by researching material documentation (if available) to establish if the material is hazardous or is subject to disposal restrictions. If the material is determined to be hazardous, or assumed to be so, then it should be properly removed prior to disturbance by renovation or demolition related activities in accordance with California Code of Regulations Title 22, 66261-66265, Health and Safety Code 25189.5 and all additional pertinent environmental and OSHA regulations.

4030 Birch St # 105 Newport Beach, CA 92660 I 949 783 3353 f

LIMITATIONS

Evista makes no representation or warranty that any recommendation will result in the complete elimination of the hazardous material(s) any area(s) described in this report. Evista cannot be responsible for changing conditions that may alter relative exposure risk or for future changes in accepted methodology. Evista does not guarantee either expressed or implied that all hazardous material(s) were identified during this survey. Evista was retained only to perform a visual inventory of accessible material(s) within the scope of work. The findings shall only be applicable to the location(s) and at the time that the observations were made. In some cases, hidden or indistinguishable material(s) may not have been visible. Finally, Evista shall not be held responsible for the deficiencies or omissions of others in relation to the services contracted herein.

Sincerely,

Chris Blake

EXECUTIVE SUMMARY

The Project as proposed involves demolition and new construction. Two existing buildings on the Project Site are proposed to be demolished, the existing Taix Restaurant building and 1931 W. Sunset Boulevard, a one-story medical office building constructed in 1959.

1931 W. Sunset Boulevard is not currently designated under any national, state, or local landmark program and was not identified in SurveyLA or listed in the BERD. A records search was requested from the SCCIC and the results are appended to this report. 1931 W. Sunset Boulevard was evaluated as a potential historical resource as part of the environmental review of the proposed Project on the site in compliance with CEQA. GPA evaluated the property and recommends that 1931 W. Sunset Boulevard does not appear to be eligible for listing in the National or California Registers, or for designation as a Los Angeles Historic-Cultural Monument (HCM) due to a lack of significance. Additionally, it does not appear to contribute to a potential historic district. The recommended Status Code for the property is 6Z, ineligible for designation at the national, state, and local levels through survey evaluation. Therefore, it is not a historical resource subject to CEQA.

The existing Taix Restaurant was designated as an HCM and as part of that designation, three features that should be preserved were identified by City Council as conveying the significance of the restaurant and justifying its designation as an HCM as well as its eligibility for inclusion in the California Register.

The project team analyzed impact of the Project on the historical resource and determined that demolition would not significantly impact the Taix Restaurant because it would not materially impair the physical characteristics determined to convey its historical significance by the lead agency that justify its designation as an HCM and eligibility for inclusion in the California Register. The restaurant's location and setting, feeling and association would remain intact. The physical features that were identified as characterizing the property will be retained and reincorporated into the new construction. Therefore, the demolition would not result in material impairment as defined in 14 CCR § 15064.5(b)(2)(C), or, therefore, cause a substantial adverse change in significance of the historical resource as it was designated by the lead agency.

The potential for the new construction to indirectly or visually impair the significance of adjacent historical resources was also analyzed in this report. GPA concludes that the demolition would have no impact on the three historical resources in the Study Area, and that the new construction would have no significant impact on the historical resources in the Study Area. Although a new visual element would be introduced within their broader setting, it would not result in a substantial adverse change in their significance.

Therefore, the proposed Project would not cause a significant impact on any identified historical resources on or near the Project site in a manner that would materially impair the characteristics that quality them as a historical resource.

1. INTRODUCTION

1.1 Purpose

The purpose of this report is to evaluate the potential impacts that the proposed redevelopment of Taix French Restaurant with a new mixed-use building would have on historical resources. The proposed redevelopment t would enable the continuation of Taix French Restaurant as a legacy business, which the City of Los Angeles has recognized as a historical resource. This report analyzes whether the proposed project (Project) would impact historical resources as defined by the California Environmental Quality Act (CEQA). The City of Los Angeles (City) is processing the CEQA review as a Sustainable Communities Environmental Assessment (SCEA).

A primary objective of the Project is to enable the continuation of Taix French Restaurant at its current location. Taix French Restaurant was founded in 1927 in downtown Los Angeles by the Taix family and has been continuously operated by the family since that time. In 1962, the restaurant was moved to its current location. Over the years, the restaurant has undergone repeated changes, including its location and alterations and additions to its building, architecture, décor, dining format, service style, and menu. Yet, despite these numerous changes, the Taix French Restaurant has maintained its identity and significance as a beloved Los Angeles institution.

Due to the passage of time and changes in the economics of the restaurant and banqueting industry, as well as shifting public taste and preferences, the Taix family has concluded that the revenues of the restaurant can no longer support the overhead associated with its current property. The over-sized building, aged and outdated infrastructure, and other social challenges compel changes to the restaurant's current physical premises if Taix French Restaurant is to continue operating successfully. Already stressed by declining business conditions and the COVID-19 pandemic, the family has indicated that they would be forced to permanently close Taix French Restaurant due to the financial hardship of continuing operations in the current building.[1]

The Project Site is located near the intersection of Sunset Boulevard, Reservoir Street, and Glendale Boulevard in the Silver Lake - Echo Park - Elysian Valley Community Plan Area (CPA) in the City of Los Angeles. The Project Site (see **Figure 1** below) encompasses three parcels (APNs 5404-001-034, 5404-001-007, and 5404-001-008). The Project Site includes a large building constructed over a period of several decades, with the earliest portions dating to1929, that currently houses Taix French Restaurant, and a smaller commercial/office building constructed in 1959. The proposed Project would involve demolition of both existing buildings and construction of a new, six-story mixed-use development that would incorporate a new restaurant space for Taix French Restaurant.

[1] See September 22, 2020, letter from Michael Taix to the City of Los Angeles Cultural Heritage Commission (**Appendix A**).

Figure 1: Project Site. Base image courtesy of LA County GIS.

1.2 Study Area

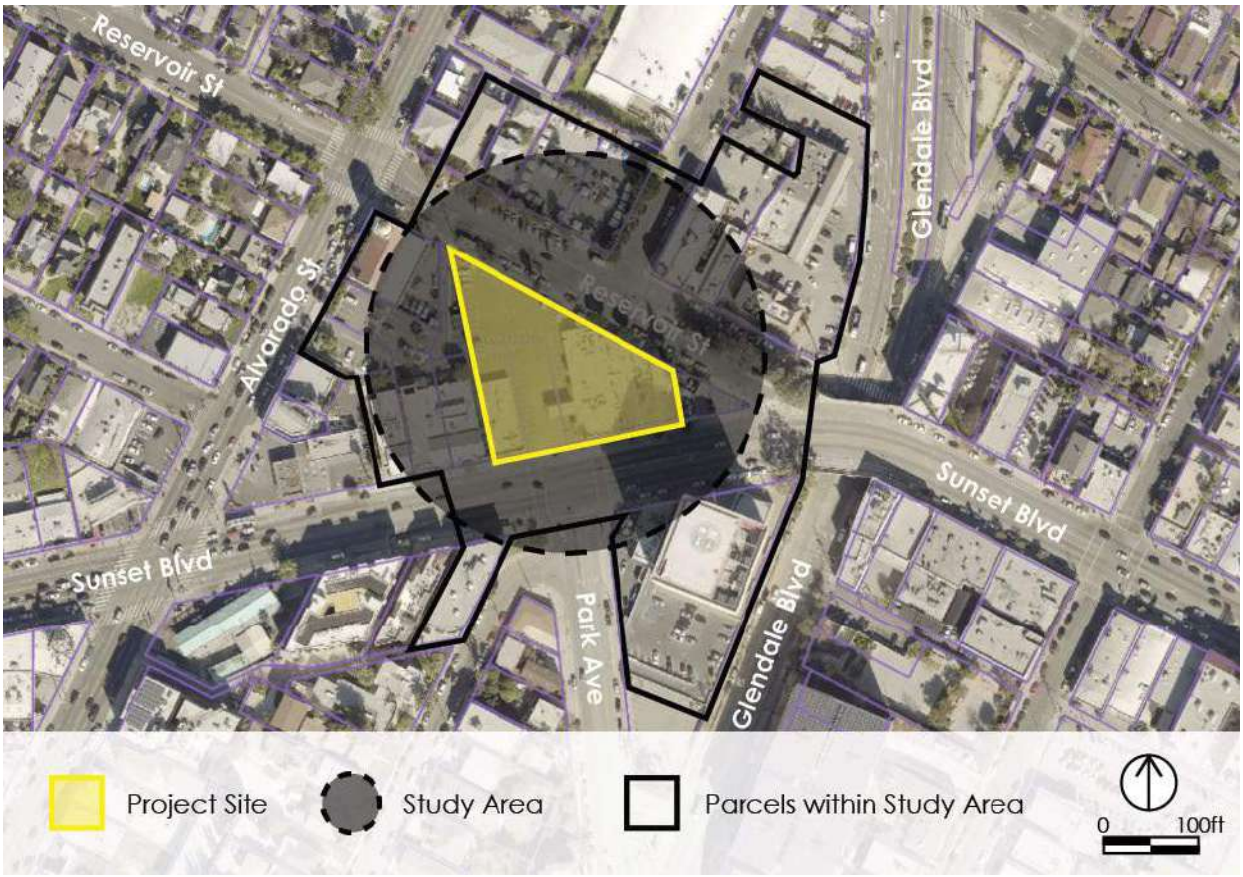

Figure 2: Project Site and Study Area. Base image courtesy of LA County GIS.

GPA conducted a field inspection of the Project site and vicinity to determine the scope of the study. There are two buildings currently on the Project site: 1911 W. Sunset Boulevard and 1931 W. Sunset Boulevard. The building at 1911 W. Sunset Boulevard was constructed in phases beginning in 1927 and currently houses the Taix French Restaurant, which was recently designated as a Los Angeles Historic-Cultural Monument. The building at 1931 W. Sunset Boulevard was constructed in 1959. It is not currently designated at the national, state, or local level and was not identified in SurveyLA. However, because it is over 45 years of age, it was surveyed and evaluated as a potential historical resource for the purposes of CEQA.

Figure 2). This Study Area was established to account for potential impacts on historical resources in the vicinity. Parcels beyond this Study Area were not included because the Project would have no potential to directly or indirectly impact the buildings on these distant parcels or their surrounding setting. The buildings and streets immediately surrounding the Project site create a geographic and visual separation between the parcels beyond the Study Area and the Project site. The Project site therefore cannot be reasonably considered part of the environmental setting of historical resources beyond the Study Area due to this intervening space.

1.3 Methodology

In preparing this report, GPA performed the following tasks:

1. Reviewed existing information to determine if there are any listed or previously surveyed historical resources within the Study Area. The following sources were consulted:

    - Requested a records search from the South Central Coastal Information Center (SCCIC) to determine whether or not the Study Area contains any properties that are currently listed under national, state, or local landmark or historic district programs and whether or not it contains properties that have been previously identified or evaluated as potential historical resources. This involved a review of the California Historic Resources Inventory System (CHRIS), which includes data on properties listed and determined eligible for listing in the National Register of Historic Places, listed and determined eligible for listing in the California Register of Historical Resources, California Registered Historical Landmarks, Points of Historical Interest, as well as properties that have been evaluated in historic resources surveys and other planning activities (see **Appendix B** for the records search results).

    - Consulted the Built Environment Resources Directory (BERD) to determine whether the Study Area contains any properties currently listed under local, state, or national programs as an individual resource or part of a historic district, or that have been previously identified or evaluated as a historical resource. The BERD, maintained by the State Office of Historic Preservation, includes information on cultural and historical resources reviewed for eligibility to the National Register of Historic Places and the California Historical Landmarks programs through federal and state environmental compliance laws, and resources nominated under federal and state registration programs. It replaces the California Historic Resources Inventory System (CHRIS). While the BERD may not include all mapped data on historical or cultural resources filed with the SCCIC, it includes information on previously evaluated properties. One property, 1927 Reservoir Street, was identified as being previously evaluated and determined eligible as part of the Section 106 process. A copy of correspondence from the State Historic Preservation Officer (SHPO) associated with the determination was requested to supplement the SCCIC Records Search. The letter indicates that the building was determined eligible under Criterion A for its association with the religious and scholarly development of the Echo Park community (see **Appendix C** for copy of the SHPO letter).

    - Consulted the Los Angeles Historic Resources Inventory website, HistoricPlacesLA.org, to determine if the Study Area contains any properties designated as Los Angeles Historic-Cultural Monuments (HCM) or are located within a designated Historic Preservation Overlay Zone (HPOZ).

    - Consulted the findings of SurveyLA, the citywide historic resources survey of Los Angeles, to determine if any properties on the Project site or within study area were identified as potential historical resources. Two properties were identified. One property, the Citibank building at 1910 W. Sunset Boulevard was identified as

appearing eligible for national, state, and local landmark designation. One property, the Glendale-Sunset Public Stairway, was identified as appearing eligible for local landmark designation.

- Reviewed zoning information to determine whether the Study Area is located within a Plan Overlay. Two parcels within the Study Area are located within the Echo Park Community Design Overlay (CDO); however, the proposed Project will be entirely outside the boundaries of the CDO.
- Reviewed the Council File (21-0119) associated with the recent HCM designation of Taix French Restaurant, including agendas, meeting minutes, staff reports, nomination materials, consultant reports, and correspondence.

The results of this research and descriptions of the historical resources within the Study Area can be found in Section 3.2.

2. Determined that one existing building on the Project site should be evaluated as a potential historical resource. The building at 1931 W. Sunset Boulevard was not identified by SurveyLA, but is now over 45 years of age, which is the industry standard for the evaluation of properties as potential historical resources.
3. Conducted a field inspection of the Project site, during which GPA assessed the general condition and physical integrity of the building at 1931 W. Sunset Boulevard. Digital photographs of the building exterior were taken during the field inspection.
4. Conducted research into the history of 1931 W. Sunset Boulevard. Sources referenced included building permit records, city directories, historic aerial photographs, prior survey data, newspaper archives, Sanborn Fire Insurance maps, and the *Los Angeles Times* newspaper archives, available through the Los Angeles Public Library.
5. Consulted the Context/Theme/Property Type (CTP) eligibility standards formulated for the *Los Angeles Citywide Historic Context Statement* (*LACHCS*) to identify the appropriate CTPs under which to evaluate the building at 1931 W. Sunset Boulevard.
6. Reviewed and analyzed ordinances, statutes, regulations, bulletins, and technical materials relating to national, state, and local historic preservation designations, and assessment processes and programs to evaluate the significance and integrity of the building at 1931 W. Sunset Boulevard as a potential historical resource.
7. Reviewed and analyzed the conceptual plans and related documents to determine if the Project would have an impact on the identified historical resources as defined by CEQA (see Appendix D for the Conceptual Plans).

1.4 Qualifications of Preparers

GPA Consulting was responsible for the preparation of this report. All GPA Consulting historians fulfill the qualifications for a historic preservation professional outlined in Title 36 of the Code of Federal Regulations, Part 61. Résumés are available upon request.

2. REGULATORY FRAMEWORK

Generally, a lead agency must consider a property a historical resource under CEQA if it is eligible for listing in the California Register of Historical Resources (California Register). The California Register is modeled after the National Register of Historic Places (National Register). Furthermore, a property is presumed to be historically significant if it is listed in a local register of historical resources or has been identified as historically significant in a historic resources survey (provided certain statutory criteria and requirements are satisfied) unless a preponderance of evidence demonstrates that the property is not historically or culturally significant.[2] A lead agency may also treat a resource as historic if it meets statutory requirements and substantial evidence supports the conclusion. The National Register, California Register, and City local designation programs are discussed below.

2.1 National Register of Historic Places

The National Register is "an authoritative guide to be used by federal, state, and local governments, private groups, and citizens to identify the nation's cultural resources and to indicate what properties should be considered for protection from destruction or impairment."[3]

2.1.1 Criteria

To be eligible for listing in the National Register, a property must be at least 50 years of age (unless the property is of "exceptional importance") and possess significance in American history and culture, architecture, or archaeology. A property of potential significance must meet one or more of the following four established criteria:[4]

A. Associated with events that have made a significant contribution to the broad patterns of our history; or

B. Associated with the lives of persons significant in our past; or

C. Embody the distinctive characteristics of a type, period, or method of construction or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or

D. Yield, or may be likely to yield, information important in prehistory or history.

2.1.2 Context

To be eligible for listing in the National Register, a property must be significant within a historic context. "National Register Bulletin 15" states that the significance of a historic property can be judged only when it is evaluated within its historic context. Historic contexts are "those patterns, themes, or trends in history by which a specific…property or site is understood and its meaning…is

[2] Public Resources Code §5024.1 and 14 California Code of Regulations §4850 & §15064.5(a)(2).
[3] Title 36 Code of Federal Regulations Part 60.2.
[4] Title 36 Code of Federal Regulations Part 60.4.

made clear."[5] A property must represent an important aspect of the area's history or prehistory and possess the requisite integrity to qualify for the National Register.

2.1.3 Integrity

In addition to possessing significance within a historic context, to be eligible for listing in the National Register a property must have integrity. Integrity is defined in "National Register Bulletin 15" as "the ability of a property to convey its significance."[6] Within the concept of integrity, the National Register recognizes the following seven aspects or qualities that in various combinations define integrity: feeling, association, workmanship, location, design, setting, and materials. Integrity is based on significance: why, where, and when a property is important. Thus, the significance of the property must be fully established before the integrity is analyzed.

2.2 California Register of Historical Resources

In 1992, Governor Wilson signed Assembly Bill 2881 into law establishing the California Register. The California Register is an authoritative guide used by state and local agencies, private groups, and citizens to identify historical resources and to indicate what properties are to be protected, to the extent prudent and feasible, from substantial adverse impacts.[7]

The California Register consists of properties that are listed automatically as well as those that must be nominated through an application and public hearing process. The California Register automatically includes the following:

- California properties listed in the National Register and those formally Determined Eligible for the National Register;
- State Historical Landmarks from No. 0770 onward; and
- Those California Points of Historical Interest that have been evaluated by the State Office of Historic Preservation (SOHP) and have been recommended to the State Historical Resources Commission for inclusion on the California Register.[8]

Criteria and Integrity

For those properties not automatically listed, the criteria for eligibility of listing in the California Register are based upon National Register criteria, but are identified as 1-4 instead of A-D. To be eligible for listing in the California Register, a property generally must be at least 50 years of age and must possess significance at the local, state, or national level, under one or more of the following four criteria:

[5] Patrick Andrus and Rebecca Shrimpton, eds., *How to Apply the National Register Criteria for Evaluation,* (US Department of the Interior, National Park Service, Cultural Resources:1997), 7-8, accessed November 2021, https://www.nps.gov/subjects/nationalregister/upload/NRB-15_web508.pdf.
[6] Ibid., 44-45.
[7] Public Resources Code §5024.1 (a).
[8] Public Resources Code §5024.1 (d).

1. It is associated with events that have made a significant contribution to the broad patterns of local or regional history, or the cultural heritage of California or the United States; or
2. It is associated with the lives of persons important to local, California, or national history; or
3. It embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values; or
4. It has yielded, or has the potential to yield, information important in the prehistory or history of the local area, California, or the nation.

Properties eligible for listing in the California Register may include buildings, sites, structures, objects, and historic districts. It is possible that properties may not retain sufficient integrity to meet the criteria for listing in the National Register, but they may still be eligible for listing in the California Register. An altered property may still have sufficient integrity for the California Register if it maintains the potential to yield significant scientific or historical information or specific data. [9]

A property less than 50 years of age may be eligible if it can be demonstrated that sufficient time has passed to understand its historical importance.[10]

The California Register may also include properties identified during historic resource surveys. However, the survey must meet all of the following criteria:[11]

1. The survey has been or will be included in the State Historic Resources Inventory;
2. The survey and the survey documentation were prepared in accordance with office [SOHP] procedures and requirements;
3. The resource is evaluated and determined by the office [SOHP] to have a significance rating of Category 1 to 5 on a DPR Form 523; and
4. If the survey is five or more years old at the time of its nomination for inclusion in the California Register, the survey is updated to identify historical resources that have become eligible or ineligible due to changed circumstances or further documentation and those that have been demolished or altered in a manner that substantially diminishes the significance of the resource.

OHP Survey Methodology

The evaluation instructions and classification system prescribed by the Office of Historic Preservation (OHP) in its *Instructions for Recording Historical Resources* provide a Status Code for use in classifying potential historical resources. In 2003, the Status Codes were revised to address the California Register. These Status Codes are used statewide in the preparation of historical resource surveys and evaluation reports. The first code is a number that indicates the general category of evaluation. The second code is a letter that indicates whether the property is separately eligible (S), eligible as part of

[9] Title 14 California Code of Regulations §4852 (c).
[10] Title 14 California Code of Regulations §4852 (d) (2).
[11] Public Resources Code §5024.1.

a district (D), or both (B). There is sometimes a third code that describes some of the circumstances or conditions of the evaluation. The general evaluation categories are as follows:

1. Listed in the National Register or the California Register.
2. Determined eligible for listing in the National Register or the California Register.
3. Appears eligible for listing in the National Register or the California Register through survey evaluation.
4. Appears eligible for listing in the National Register or the California Register through other evaluation.
5. Recognized as historically significant by local government.
6. Not eligible for listing or designation as specified.
7. Not evaluated or needs re-evaluation.

The specific Status Codes referred to in this report are as follows:

2D2 Contributor to a district determined eligible for NR by consensus through Section 106 process. Listed in CR.

3S Appears eligible for NR as an individual property through survey evaluation.

3CS Appears eligible for CR as an individual property through survey evaluation.

5S3 Appears to individually eligible for local listing or designation through survey evaluation.

5S1 Individual property that is listed or designated locally

6Z Found ineligible for NR, CR or Local designation through survey evaluation.

7N1 Needs to be reevaluated – may become eligible for NR w/restoration or when meets other specific conditions

2.3 Los Angeles Cultural Heritage Ordinance

The Los Angeles City Council adopted the Cultural Heritage Ordinance in 1962 and amended it in 2018 (Sections 22.171 et seq. of the Administrative Code). The Ordinance created a Cultural Heritage Commission and criteria for designating Historic-Cultural Monuments (HCM). The Commission is comprised of five citizens, appointed by the Mayor, who have exhibited knowledge of Los Angeles history, culture and architecture. A monument is any site, building, or structure of particular historic or cultural significance to the City of Los Angeles and may be designated if it meets at least one of the following criteria:

- The proposed HCM is identified with important events of national, state, or local history, or exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city or community or community; or
- The proposed HCM is associated with the lives of historic personages important to national, state, city, or local history;

- The proposed HCM embodies the distinctive characteristics of a style, type, period, or method of construction; or represents; or represents a notable work of a master, designer, builder, or architect whose individual genius influenced his or her age.[12]

Unlike the National and California Registers, the Ordinance makes no mention of concepts such as physical integrity or period of significance. Moreover, properties do not have to reach a minimum age requirement, such as 50 years, to be designated as HCMs.

[12] Los Angeles Administrative Code Section 22.171.7.

3. ENVIRONMENTAL SETTING

3.1 Brief History of the Area

The following history of Echo Park is excepted from the SurveyLA Survey Report for the Silver Lake - Echo Park - Elysian Valley CPA prepared by GPA Consulting in 2014:[13]

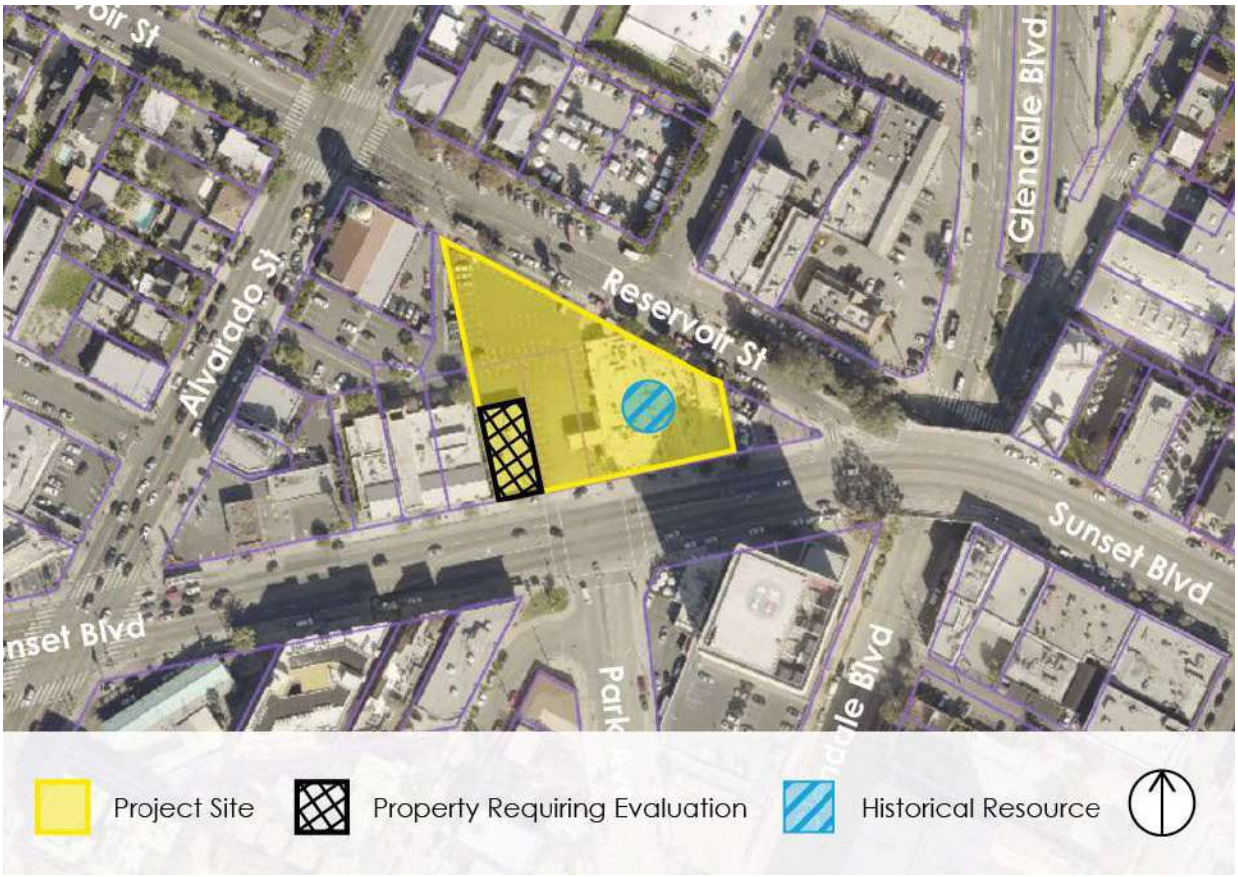
> Echo Park was initially developed by real estate developer Thomas Kelley and other investors. They purchased 70 acres of land, including what is now Echo Park Lake, and named it the Montana Tract. The first lots were put up for sale in 1887. The availability of public transportation made the area easily accessible from downtown Los Angeles and encouraged residential development. In 1886, the Ostrich Farm Railway (later to become Sunset Boulevard) was laid out. It ran through the middle of what became the Washington Heights Tract, created the next year. Two other tracts making up what is now Echo Park are the Echo Park Tract, subdivided in 1903, and the Lake Side Tract, also subdivided in 1903. The community of Echo Park thrived in the late 19th century due to the oil industry. In 1892, a major oil field was discovered south of what is now Temple Street in the southernmost portion of the CPA. Ties to the early film industry also encouraged development. The Edendale area of Echo Park became home to a number of early film studios, which were established along Glendale Boulevard in the 1910s. Early studios included Disney (HCM #163), Talmadge (later ABC), and Mack Sennett's Keystone Studios (HCM #256), which produced the comedy "Keystone Cops." The area was also frequently used for filming on location; for example, the Laurel and Hardy film "The Music Box" was filmed in the area.
>
> Development continued in the first decade of the 20th century with the subdivision of tracts such as Sunset Boulevard Heights, northeast of what is now Sunset Boulevard and Echo Park Avenue. The area began to develop in earnest in the 1920s, a period when the city at large experienced a development boom. Due to the hillside terrain, the area is home to numerous public stairways (including one where "The Music Box" was filmed), which were first constructed of wood and later replaced with concrete stairs. The presence of the Pacific Electric Red Car line along Sunset Boulevard encouraged commercial development along the street in the 1910s and 1920s. There are individual commercial buildings along Sunset Boulevard that reflect the influence of the streetcar system on the development of Los Angeles. A small collection of buildings on Sunset Boulevard near the intersection of Innes Avenue is unique in that it combines commercial and residential uses in building forms that respond to the hilly topography. Two of these resources are bungalow courts with commercial storefronts facing Sunset Boulevard and residential units lining a central stairway. The irregular topography generally made the area unsuitable for large-scale institutional development. The two notable exceptions to this rule are Angelus Temple and Queen of Angels Hospital. Angelus Temple is located north of Echo Park and is the home of the International Church of the Foursquare Gospel. The church was founded by

[13] GPA Consulting, *Historic Resources Survey Report: Silver Lake-Echo Park-Elysian Valley Community Plan Area* (Los Angeles: Office of Historic Resources, 2014), 7-8.

evangelist Aimee Semple McPherson and opened in 1923. It had a capacity of 5,300. McPherson was a renowned evangelist and was famous for her theatrical sermons; the Church of the Foursquare Gospel was incredibly popular and remains in existence to this day. Angelus Temple was designated a National Historic Landmark in 1992. Queen of Angels Hospital is located north of the present-day Hollywood Freeway was founded by the Franciscan Sisters of the Sacred Heart in 1925. The sisters raised the money to build the hospital and it quickly grew to be one of the largest hospitals in the region. The building was completed in 1927 and expanded in 1933 and 1937. It is now the home of a Christian ministry called The Dream Center. Echo Park Lake began as a reservoir that captured run-off water from the Los Angeles River. It was known as Reservoir #4 and was created in 1870 as part of the original water system for Los Angeles. Thomas Kelley and other investors purchased the reservoir and surrounding land, but after years of legal battles to claim water rights to the reservoir, they eventually donated the land around the reservoir to the city for use as a park.

One of the city's earliest municipal parks, Echo Park's first phase of development occurred between 1892 and 1895 (Echo Park is HCM #836). It was later expanded south to Temple Street with open space, and tennis and croquet courts. The Echo Park Recreation Center (now the Bellevue Recreation Center) was constructed in 1925 and designed by Allied Architects; a library was built three years later (demolished in 1974). A new boathouse was constructed in 1932 to replace an earlier one. Much of the southern portion of the park was affected when the Hollywood Freeway was constructed through the area in the latter half of the 1940s; the freeway eliminated many of the amenities that once existed there, including a fountain, sports field, and walking paths. The Echo Park neighborhood became a haven for intellectuals and radicals beginning in the late 1920s. Numerous politicians and journalists, both mainstream and radical, lived in Echo Park because of its proximity to downtown Los Angeles. Prominent individuals who resided in the area included the author, editor, and lawyer Carey McWilliams and newspaper columnist and Los Angeles City Council member Estelle Lawton Lindsey. Phillip Dike and Paul Landacre were two of many artists who lived in Echo Park. Dike was a distinguished water colorist as well as an artist at Walt Disney Studios. Landacre was one of the most important printmakers of the modern era. His fascination with printmaking developed in the late 1920s when he met the bookshop and gallery owner Jake Zeitlin, who also lived in the neighborhood. Landacre's house was designated HCM #839 in 2006.

3.2 History and Description of the Project Site



The Project Site is located at the intersection of Reservoir Street, Glendale Boulevard, and Sunset Boulevard. With the introduction of streetcar service along Sunset Boulevard, the route emerged in the early twentieth century as a commercial corridor in Echo Park. On the 1906 Sanborn Map, the area is sparsely developed with small houses. Two small houses, an ancillary building, and a small building labeled as the Echo Park Methodist Sunday School are depicted on the Project Site. Through the 1920s and 1930s, density in the area increased and more buildings were constructed on what is now the Project Site, but by 1950, it had all been demolished, leaving just surface parking and the building that would become the second home of Taix. By the 1970s, the Project Site resembled its existing condition, with two buildings, 1911 and 1931 W. Sunset Boulevard, and the rest used for surface parking (see **Figure 4** through **Figure 7**).

Taix was recently designated as an HCM and is therefore a historical resource for the purposes of CEQA. See **Section 3.2.1** for prior identification and evaluations of the restaurant as well as a summary of the HCM nomination, designation process, and City Council findings.

The building at 1931 W. Sunset Boulevard was constructed in 1959. It was not identified in SurveyLA and was not listed in the BERD; however, because it is over 45 years of age, it requires evaluation to determine whether or not it is a historical resource for the purposes of CEQA. See **Section 3.2.2** for a history and description of the building and **Section 4** for the evaluation of significance.

3.2.1 Taix French Restaurant

Prior Identification and Evaluation[14]

2014 – SurveyLA

As part of the 2014 SurveyLA survey for the Silver Lake – Echo Park – Elysian Valley CPA, Taix was identified as appearing eligible for designation as a local landmark as the long-term location of the Taix Restaurant under the Commercial Identity context. The survey findings noted that the restaurant may not meet the eligibility thresholds for National Register or California Register listing.[15]

January 16, 2019 – Preliminary Assessment Report (Historic Resources Group)

Historic Resources Group (HRG) was retained by the Los Angeles Conservancy to prepare a Preliminary Assessment Report that was completed in January 2019. Addressing the nature of Taix Restaurant as resource significant as a legacy business rather than for its architectural type, style or design, HRG's report stated that "evaluating properties that are significant for their use is difficult, and the guidelines and eligibility standards are relatively subjective in comparison to the established thresholds for evaluating other types of significance." The HRG analysis concluded that the Taix Restaurant appeared to be eligible for designation as an HCM under Criterion 1 as an important commercial institution in the Echo Park community as well as the long-term home of the second-generation Taix Restaurant under the theme of Commercial Identity. HRG found that the restaurant retained sufficient integrity to convey that significance.

October 2019 – Historic Resource Assessment (Kathryn McGee)

Consultant Kathryn McGee's was retained by the property owner to prepare a Historic Resource Assessment report that was completed in February 2019 and subsequently revised in October 2019. The report included a detailed description and history of the building, as well as a summary of alterations to the interior and exterior since its construction, including major renovations in the late 1960s and late 1990s. Ms. McGee concluded that the Taix Restaurant appeared to be eligible at the local level of significance under Criterion A/1/1 as a long-term legacy business associated with one of the City's pioneering French families and for its contribution to the commercial history of Los Angeles as a destination, restaurant, and gathering place with a period of significance of 1962-1980. The report found that the restaurant retained sufficient integrity for listing as a local HCM and in the California Register but did not retain sufficient integrity for listing in the National Register. Ms. McGee's report did not address the Project as currently proposed by the property owner, which is the focus of this report.

[14] Unless otherwise noted, the following information is summarized from material included in the full Council File for this property, 21-0119, at https://cityclerk.lacity.org/lacityclerkconnect/index.cfm?fa=ccfi.viewrecord&cfnumber=21-0119.
[15] "Taix," HistoricPlacesLA, accessed November 2021, http://historicplacesla.org/reports/926892e8-a6e9-4af9-8df8-d0a65b7010f7.

Historic-Cultural Monument Designation

August 24, 2020 – HCM Nomination (Charles Fisher, Silver Lake Heritage Trust)

On August 24, 2020, an HCM Nomination was filed by the Silver Lake Heritage Trust and prepared by Charles Fisher. The nomination argued that the Taix French Restaurant was eligible for listing as an HCM under Criterion 1 as a legacy business that evokes the history of a former French enclave, "Frenchtown," its association with the Taix Family, and the historic second venue of the restaurant. The nomination also argued that Taix was eligible under Criterion 3 as a good example of the rare use of the French Normandy style in commercial architecture.

October 15, 2020 – First Cultural Heritage Commission Hearing

Planning staff in the Office of Historic Resources (OHR) prepared a recommendation report (staff report) for the initial Cultural Heritage Commission (CHC) hearing on October 15, 2021. Staff recommended that the CHC take the nomination under formal consideration, and the CHC voted unanimously to do so.

November 17, 2020 – Supplemental Information from Applicant (Daniel D. Paul)

Daniel D. Paul prepared a supplemental analysis of the Taix Restaurant interior. Mr. Paul argued that the continental dining interior conveyed the significance of the restaurant under Criterion 1 as a highly intact postwar expression of European theming in United States restaurant culture, and that the interior itself was eligible under Criterion 3.

December 17, 2020 – Second Cultural Heritage Commission Hearing

Planning staff in the OHR prepared a recommendation report for the second CHC hearing on January 17, 2021. Staff recommended that the CHC declare Taix Restaurant an HCM and adopt the following findings under Criteria 1 and 3, respectively:

- Taix French Restaurant "exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city or community" as the long-time location of Taix French Restaurant, a business that bears a significant association with the commercial identity of Los Angeles, and as a highly intact post-World War II expression of European theming in United States restaurant culture.

- Taix French Restaurant "embodies the distinctive characteristics of a style, type, period, or method of construction" as an excellent and highly intact example of a continental themed restaurant.

After public hearing and discussion, including testimony and evidence from the owner of Taix Restaurant regarding the owner's need for a new facility to continue its legacy business, the CHC rejected Staff's recommendation regarding Criterion 3, finding that neither the architecture of the restaurant nor interior spaces or features were significant. The Commission voted to recommend designation only under Criterion 1. The CHC expressed a desire to support the continuation of the legacy business, but did not discuss or evaluate the Taix family's specific plans for the Project. The CHC amended the findings in the recommendation report to include Criterion 1 only, and voted to recommend that City Council consider and declare Taix Restaurant an HCM and adopt the amended findings.

May 4, 2021 – City Council Planning and Land Use Committee Meeting

The City Council Planning and Land Use Committee (PLUM) considered and corrected the findings recommended by CHC staff to conform to the deliberations and findings of the CHC in the administrative record. The PLUM Committee recommended to approve the inclusion of Taix French Restaurant on the list of HCMs based on the Committee's findings and adopt the findings of CHC as amended by the PLUM Committee.

June 2, 2021 – City Council Hearing

On June 2, 2021, City Council adopted the findings below, as amended by the PLUM Committee, and voted to designate the Taix French Restaurant as an HCM. The City Council action on these findings was finalized on June 4, 2021.

> Section 22.171.10(f) of the City's Cultural Heritage Ordinance authorizes the City Council to approve or disapprove, in whole or part, the designation of a Historic-Cultural Monument, including any site, building or structure. The City Council finds and determines that the subject site and the Taix Restaurant are significant under Criterion 1 only. The Council finds that the Taix Restaurant building (and its interior and exterior architecture and decor) are not architecturally or historically significant: provided, however, that the City Council identifies the following physical features of the Taix Restaurant that should be preserved in order to convey the restaurant's historic significance and justify its designation as a Historic-Cultural Monument, as well as its eligibility for inclusion in the California Register of Historical Resources: (i) The red and white east-facing Taix billboard sign along Reservoir Street; (ii) the vertical red and white 'Cocktails' sign along Sunset Boulevard: and (iii) the restaurant's original cherry wood bar top.

January 18, 2022 – City Council Planning and Land Use Management Committee Hearing January 26, 2022 – City Council Hearing

Due to errors in conducting the PLUM Committee's remote COVID-19 hearing protocol, certain persons were not called upon to speak at the May 18, 2021 PLUM Committee hearing. Accordingly, the PLUM Committee rescinded its prior action and conducted a subsequent de novo hearing on January 18, 2022. After concluding its hearing, the PLUM Committee recommended that the findings of the CHC, as amended to include supplemental findings in the communication from the CD 13 Office dated December 6, 2021, be adopted as the findings of the Council and that Taix French Restaurant be designated a Historic-Cultural Monument. On January 26, 2022, the City Council voted to adopt the recommendations of the PLUM Committee.

The Emerging Field of Legacy Businesses as Historical Resources

As the field of historic preservation evolves, preservation experts and communities around the country have begun to address "heritage" or "legacy" businesses as historical resources, and to recognize the unique issues that pertain to the continuation and preservation of such resources.

In 2015, the National Trust for Historic Preservation recognized that the preservation of legacy businesses represents a desire to preserve "intangible elements of culture and community that these businesses have created over time" and that the topic presents unique preservation issues.[16]

San Francisco Heritage reported that current economic conditions and other factors have caused "alarming loss of heritage businesses, nonprofits, and other arts and culture institutions." In its September 2014 report regarding strategies for conserving cultural heritage assets, San Francisco Heritage observed that "[t]raditionally focused on architecture and monuments, the field of historic preservation in the United States has in recent years begun to respond to calls from organized communities to develop new tools for identifying and protecting intangible social and cultural resources."[17]

Recognizing that legacy businesses are often considered important elements of communities for intangible reasons that have more to do with the relationship of the business to the community than their physical attributes, the Heritage Report stated that "[d]espite their effectiveness in conserving architectural resources, traditional historic preservation protections are often ill-suited to address the challenges facing cultural heritage assets."[18] The report further states that "historic designation is not always feasible or appropriate, nor does it protect against rent increases, evictions, challenges with leadership succession, and other factors that threaten longtime institutions."[19] Significantly, the Heritage Report recognized that, depending on goals and motivations, in some circumstances it may be appropriate to "prioritize continuation of traditional uses over the protection of the buildings that house them."[20] Accordingly, the Heritage Report recommended the adoption of new strategies to enable the stabilization and preservation of legacy businesses, including providing economic incentives, providing a standard definition of "cultural heritage assets," adopting financial, zoning and process-driven incentives to encourage their conservation, and assisting with capital investment to address expensive capital improvement, seismic safety, and ADA accessibility issues.[21]

As discussed above, HRG's 2019 Resource Assessment regarding Taix Restaurant also acknowledged recognized the unique issues involved in evaluating the historic significance of legacy businesses and conceded that "evaluating properties that are significant for their use is difficult, and the guidelines and eligibility standards are relatively subjective in comparison to the established thresholds for evaluating other types of significance…" and that "the reasons belying their significance are typically rooted in tradition, culture, and other intangible qualities."

For all these reasons, the analysis of legacy businesses as historic resources and how best to support their preservation requires a more nuanced analysis than typically associated with traditional historic preservation approaches. As San Francisco Heritage concluded, "in some circumstances it may be

appropriate to "prioritize continuation of traditional uses over protection of the buildings that house them."[22]

Taix French Restaurant as a Legacy Business

The Taix Restaurant's demonstrated ability to change while successfully retaining its identity is consistent with its history and evolution as a legacy business. Taix French Restaurant has remained in business for nearly a century, and has been required to repeatedly adapt and evolve in order to continue. Despite changes to the restaurant's location, building, dining format, service style, menu and decor over the years, the Taix family has successfully maintained the continuity of the restaurant and its significance as a Los Angeles beloved institution. It has twice been recognized by the City of Los Angeles for its intangible contributions to the City's culture and community. For example, on the occasion of the restaurant's 60th anniversary in, the Los Angeles City Council issued a resolution finding that "Whereas Circumstances, Time and Places Have Changed During The Past Six Decades, But The Warmth, Camaraderie and Simply Good Food and Service Remain the Same. The Spirit of the Brothers – Les Frères – Lives."

Similarly, in a 1963 review entitled "Original Bargain Duplicated," the *Los Angeles Times* recognized the continuing identity of the already beloved institution despite its relocation from downtown to its current location and its change in décor and dining format:

> It is…somewhat, décor-wise, a far cry from the original Taix down on Commercial St. – tufted leather booths, carpeting, tablecloths, and attractive waitresses rather than 80-year-old waiters. Incidentally, the old Taix is still in business, hasn't yet been bulldozed as a lot of people seem to think. Anyway, at the so-called "new Taix," you get the same generous tureen of excellent vegetable soup, salad with the same garlicy dressing, huge serving of pot roast with large portions of tomato-infested zucchini, creamed au gratin potatoes, sherbet, and coffee—all for $2.25. It is not exactly a gourmet repast. But, you can't beat the price. What's more, they have a red mountain wine for 90 cents a half bottle (by Louis Martinez) that needs no apologies. And the cocktail lounge is exceptionally attractive. For an economical dine-out treat for the family or to take out a girlfriend on the night before payday, this is one of the town's better bargains.[23]

[22] Ibid., 17.
[23] "Original Bargain Duplicated," *Los Angeles Times,* November 3, 1963, B94.

3.2.2 1931 W. Sunset Boulevard

Figure 8: 1931 W Sunset Boulevard, view looking north. GPA Consulting, November 2021.

Description

The building at 1931 W. Sunset Boulevard is a one-story concrete block building that was constructed in 1959 with a common, mid-century modern features. It has a rectangular plan and flat roof. Portions of the exterior are clad in brick veneer. The primary elevation faces south toward Sunset Boulevard and abuts the sidewalk. The south elevation is visually divided into two bays. The west bay consists of a concrete block wall with a decorative screen. Above the screen there are two flat signs: a round sign with a logo that reads, "MEDICAL AESTHETIC SKINOVATIONS," and a smaller rectangular sign below it that reads, "MEDSPA & WELLNESS." The east bay is clad in brick veneer with a short parapet wall that extends above the roofline. A shallow metal canopy spans the length of the bay. Above the canopy there is signage consisting of individual block letters that read "PARK SUNSET PROFESSIONAL BUILDING," and "1931." Beneath the canopy, three entrances are recessed within a single entryway. There is a single fully glazed door on the east and west walls of the entryway, and a pair of fully glazed doors on the north wall. The recessed entrance is enclosed by a metal security gate. East of the entrance there is a pair of fixed aluminum-frame windows with interior metal security bars.

The east elevation faces the Taix and the surface parking lot. The brick veneer of the façade wraps around the corner of the east elevation, but the remainder is a concrete block wall. Openings on the east elevation consist of five square windows and three doors obscured by metal security bars. The north elevation is also a concrete block wall with four square windows obscured by metal security bars. Above the windows there is a painted sign that reads, "PARK SUNSET MEDICAL BUILDING." The west elevation abuts the Edendale Branch Library and is not visible.

Construction History

The building at 1931 W. Sunset Boulevard was constructed in 1959 for Irving Friedman for use as a medical and dental building. The permit indicated concrete block construction, a wood and steel roof structure, and composition roofing. The original permit filed in June 1959 listed the architect as the firm of Tharaldson & Wright and the engineer as William C. Taylor. The original permit was revised in October 1959 and the engineer changed to L.M. Nerenbaum. No contractor was listed on either permit.

In 1962, a permit was filed for a 4-foot by 5-foot illuminated projecting sign. In 1999, a permit was filed for a 2-foot by 14-foot illuminated box sign.

Security bars were installed over the doors and windows at an unknown date. No other major alterations were observed, and no additional permits were located in the Department of Building and Safety's Building Records searching by address, legal description, and assessor number.

The architectural firm Tharaldson & Wright was a partnership between Byron J. Tharaldson and Raymond S. Wright established in 1958. Byron J. Tharaldson was born in Norway and educated at the University of Minnesota, North Dakota State, and the Chicago Art Institute. Before locating to Los Angeles, Tharaldson worked in Chicago.[24] Research did not reveal biographical information about Wright or other examples of the firms' work.

Research indicates that L.M. Nerenbuam had a firm, L.M. Nerenbaum and Associates, Inc., and that the firm was responsible for the construction of a housing tract in Baldwin Hills consisting of seventy-three homes.[25]

Ownership and Tenant History

The owner at the time of construction is listed on the 1959 permit as Irving Friedman. By 1962, the builder is listed on permits as Fred Startz. There are no other permits on file until 1999. Research did not reveal any additional definitive information about Friedman or Startz. A search for the Park Sunset Professional Building yielded no results. City Directory listings and tenant research are summarized in the table below.

Table 1: Tenant History

Sheldon M. Ziff	1961-1964	Born in Los Angeles. Attorney, part of Workers Compensation Appeals Board of the State of California.

3.3 Previously Identified Historical Resources in the Study Area

There are three historical resources in the Study Area (see **Figure 9** and **Table 2**). Two are previously surveyed historical resources in the Study Area that were identified as eligible for national, state, and/or local landmark designation during the 2014 Silver Lake – Echo Park – Elysian Valley survey. There is one historical resource that is listed in the BERD with a 2D2 status code, indicating that it was determined eligible for listing in the National Register by the SHPO and subsequently listed on the California Register as a contributor to a historic district. The records search confirmed that there were no additional historical resources in the Study Area.

In order to provide a conservative analysis of the Project's potential impacts, this report does not refute any findings regarding the eligibility of these properties.

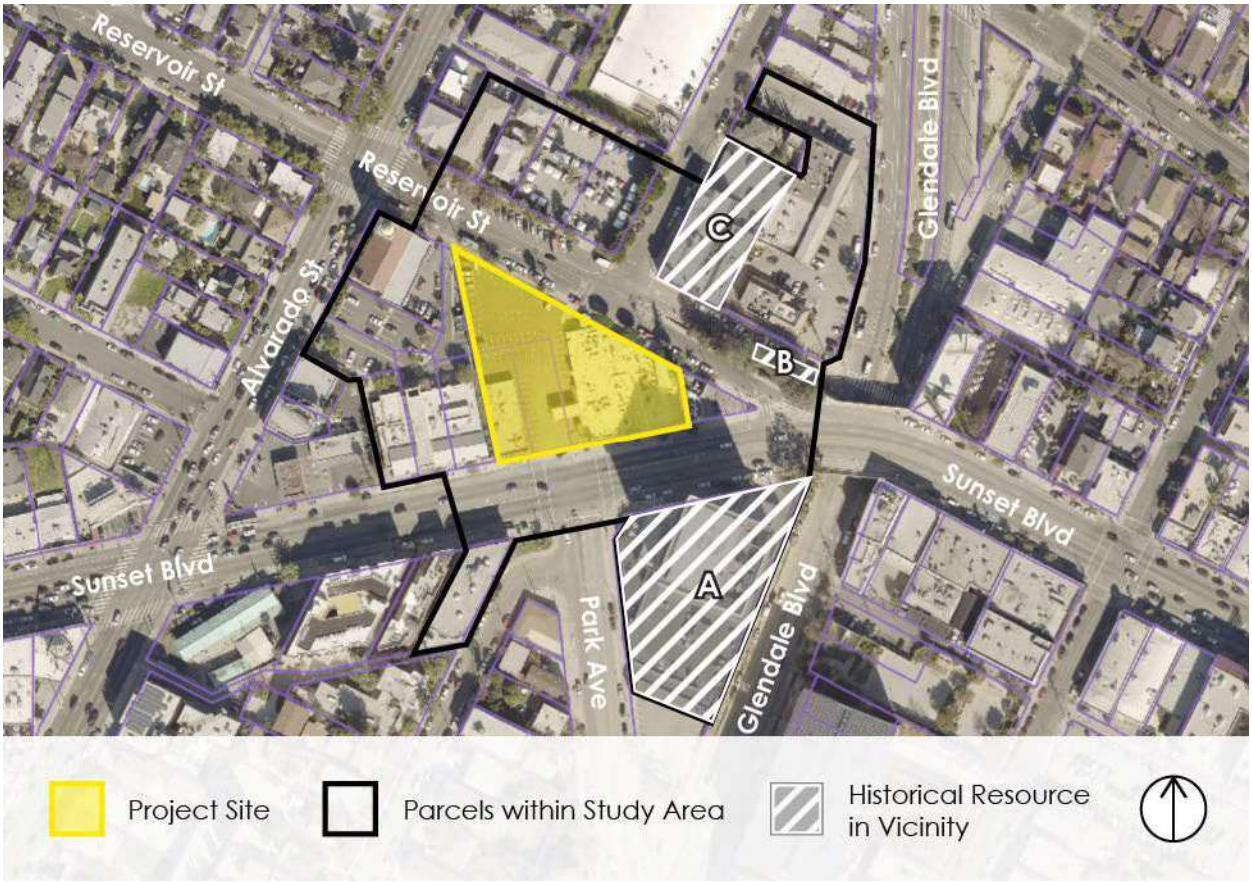

Figure 9: Previously identified Historical Resources in the Study Area. Base image courtesy of LA County GIS.

A. Citibank, 1910 W. Sunset Boulevard

The Citibank building at 1910 W. Sunset Boulevard is located southeast of the Project Site. This eight-story bank and commercial office building was built in 1965 and designed in the Brutalist style by Heusel Homolka + Associates. It was identified in the 2014 Silver Lake – Echo Park – Elysian Valley survey as appearing eligible for listing in the National Register and California Register and local designation as an excellent example of the Brutalist style rare for the area.[29]

Context: Architecture and Engineering, 1850-1980
Sub-Context: L.A. Modernism, 1910-1980
Theme: Late Modern, 1966-1990

B. Glendale-Sunset Public Stairway

This public stairway provides pedestrian access to the streets above and below the Sunset-Glendale Viaduct. The structure was identified in the 2014 Silver Lake – Echo Park – Elysian Valley survey as appearing eligible for local designation only as an excellent example of an early public stairway in Echo Park unique to hillside residential developments in Los Angeles. The survey findings noted that the stair may not meet significance thresholds for National Register or California Register eligibility.[30]

Context: Residential Development and Suburbanization, 1850-1980
Theme: Streetcar Suburbanization, 1888-1933
Sub-Theme: Suburban Planning and Development, 1888-1933

C. 1927 W. Reservoir Street

This 1928 religious building was not identified in the 2014 Silver Lake – Echo Park – Elysian Valley Survey in 2014. However, it is listed in the BERD with a 2D2 status code dating from 2009. This status code indicates that the building was determined eligible for listing in the National Register as a contributor to a historic district during the Section 106 review process and subsequently listed in the California Register as part of a historic district.

The SCCIC records search results produced survey forms for the property at 1927 W. Reservoir Street, known as the Alvarado Church of Christ or Golden West Christian Church (the survey forms are included in **Appendix B**). The property was recorded and evaluated in 1999 by Judith Marvin of Foothill Resources, Ltd. The 1999 form indicated that the property may become eligible for the NRHP under Criterion A for its association with the development of the neighborhood and Criterion C as an example of a Gothic Revival church, but only if its physical integrity were restored. A status code of 4S7 was assigned. The 4S7 status code was pre-2003, when an updated and simplified set of status codes were adopted, and is equivalent to a 7N1 (needs to be reevaluated – may become eligible for NR w/restoration or when meets other specific conditions).

In 2012, an update form was prepared by K.A. Crawford of Michael Brandman Associates. The form indicated that the property retained a good level of integrity, but concluded that it did not appear to

[29] "Citibank," HistoricPlacesLA, accessed November 2021, http://historicplacesla.org/reports/2e02f7ea-5155-4c80-a8cb-4bdbaee8f240.
[30] "Glendale-Sunset Public Stairway," HistoricPlacesLA, accessed November 2021, http://historicplacesla.org/reports/83007bf1-e29d-4fda-b1c7-35e60a194d5f.

meet any of the NRHP criteria for significance. A status code was not recorded on the survey form, but the conclusions would be equivalent to a status code of 6Z (found ineligible for NR, CR or Local designation through survey evaluation). The 2012 evaluation was for a Federal Communications Commission (FCC) cell tower project and was therefore submitted to SHPO for concurrence as part of the Section 106 process. A copy of the SHPO correspondence was obtained for this report and indicates that the building was determined individually eligible for listing in the National Register at the local level of significance under Criterion A for its association with the religious and scholarly development of the Echo Park community. As such, the 2D2 status code appears to be an error, as there is no district associated with the determination. A status code of 2S2 would be correct. The letter is included as **Appendix C**.

While the discrepancy between the survey forms in the records search results and the concurrence letter is unclear, GPA has treated 1927 W. Reservoir Street as a historical resource for this report.

4. PROPERTIES EVALUATED AS POTENTIAL HISTORICAL RESOURCES

4.1 1931 W. Sunset Boulevard

Although 1931 W. Sunset Boulevard does not appear to be a historical resource, GPA took a conservative approach and evaluated the property using the criteria for listing in the National Register, California Register, and for designation as an HCM.

The potential significance of the property at 1931 W. Sunset Boulevard must be evaluated within its historic context(s). Historic contexts are those patterns or trends in history by which a specific property is understood. The contexts, themes, and sub-themes from the Los Angeles Citywide Historic Context Statement (LACHCS) identified as relevant in judging the significance of the subject property include Neighborhood Commercial Development, 1880-1980 under Criterion A/1/1 and Medical Building Types under Criterion C/3/3.

Evaluation

National Register of Historic Places

Criterion A

To be eligible for listing in the National Register under Criterion A, a property must have a direct association with events that have made a significant contribution to the broad patterns of our history.

The Neighborhood Commercial Development theme within the Commercial Development context examines patterns of small-scale commercial development geared toward nearby residents, such as the subject property. This development generally took place along streetcar routes and arterial streets in neighborhoods outside of downtown Los Angeles in the first decades of the twentieth century. Although the subject property is located on Sunset Boulevard, a streetcar route through Echo Park, it post-dates the period of significance for Streetcar Commercial Development, which ends 1934. The subject property is postwar infill along a commercial corridor that was already well established more than two decades prior to its construction.

During the postwar period, the most notable neighborhood commercial development was occurring in the suburbs, particularly in the San Fernando Valley, as shopping centers emerged with an emphasis on parking and convenience,[31] which is not reflected in the subject property. Therefore, 1931 W. Sunset Boulevard is not associated with significant trends in Commercial Development.

Within the sub-context of Public and Private Health and Medicine, the theme relevant to Criterion A is Public Healthcare/Social Medicine. Because the subject property is a private practice, it is not associated with this theme. Additionally, research did not reveal an association with healthcare or

[31] David Prosser, "Commercial Development, 1859-1980, Neighborhood Commercial Development, 1880-1980," *Los Angeles Citywide Historic Context Statement* (City of Los Angeles Office of Historic Resources, August 2017) 19-38.

medicine within the context of African American, Jewish, Asian American or LGBTQ+ history, or the history of Women's Rights in Los Angeles. Therefore, 1931 W. Sunset Boulevard is not associated with significant trends in Public and Private Health and Medicine.

Research did not reveal any association with other events or trends; therefore, 1931 W. Sunset Boulevard does not appear to be eligible for listing in the National Register under Criterion A.

Criterion B

To be eligible for listing in the National Register under Criterion B, a property must be associated with lives of persons significant in our past. The property was constructed for Irving Friedman and was later owned by Fred Startz. Other individuals identified as being associated with the property include doctors Stanley Arbiter, Leonard B. Beller, and Howard Cowan, optometrist Denver Rickey and attorney Sheldon M. Ziff, who had their offices or practices in the subject property. Research revealed little information about these individuals, and no evidence to suggest that they would be considered significant personages within their respective fields. Therefore, 1931 W. Sunset Boulevard does not appear to be eligible for listing in the National Register under Criterion B.

Criterion C

To be eligible for listing under Criterion C, a property must embody the distinctive characteristics of a type, period, or method of construction, represent the work of a master, possess high artistic values, or represent a significant and distinguishable entity whose components may lack individual distinction.

Although the building possesses features that are indicative of its period of construction, including the horizontal canopy and concrete block screen, it is a typical example of the era that does not embody any particular architectural style. However, as a medical building, the subject property was evaluated as an example of its type under the theme of Medical Building Types within the sub-context of Public and Private Health and Medicine. The eligibility standards for this theme are included in Table 3.[32]

Table 3: Medical Building Types, 1850-1980
Context: Public and Private Institutional Development, 1850-1980
Theme: Public and Private Health and Medicine, 1850-1980
Sub-theme: Medical Building Types, 1850-1980
Associated Property Type: Institutional
Eligibility Standards
• Is an early, rare, or unusual example of a medical/healthcare building type in Los • Angeles
• Retains association with a medical institution
• Was constructed during the period of significance
Character-Defining/Associative Features
• Retains most of the essential character-defining features of its type

[32] A narrative for this theme has not yet been developed; however, the eligibility requirements are on file and available upon request from the Los Angeles City Planning Department Office of Historic Resources.

Table 3: Medical Building Types, 1850-1980
Integrity Considerations
• Should retain integrity of Location, Feeling, Design and Association from the period of significance
• Some materials may have been removed or altered
• For local HCM may have been moved for preservation purposes

Resources significant under this theme include hospitals, clinics, sanitoria, and other medical buildings, such as doctors' offices that are early, rare, or unusual examples of their type. The subject building is an unremarkable postwar medical building and there is no evidence to suggest that it is early, rare, unusual, or otherwise significant or influential.

The building was designed by the firm of Tharaldson & Wright with L.M. Nerenbaum as the engineer but research revealed little information about these individuals or their careers. This lack of information indicates they would not be considered masters within their respective fields, and with its utilitarian design and typical features, the subject building is unlikely to be an important example within a body of work.

The possession of high artistic values refers to a building's articulation of a particular concept of design so fully that it expresses an aesthetic ideal. A property eligible under this aspect of Criterion C would need to possess ornamentation and detail to lend it high artistic value, which is not the case for the subject building.

The last component of Criterion C, representing a significant and distinguishable entity whose components may lack individual distinction, is the most applicable to districts. The subject property does not appear likely to contribute to a potential historic district, due to the lack of a cohesive grouping of intact properties in the area. The surrounding buildings have various uses and differ widely in construction date, size, scale, and massing. Development is interspersed with surface parking, creating gaps along the streetwall, and when combined with the width, topography, and curved alignment of the streets at this location, there is no visual interrelationship between the buildings in the vicinity. As a result, the properties in the area are not visually, historically, or geographically unified, and do not constitute a potential historic district.

Therefore, 1931 W. Sunset Boulevard does not appear to be eligible for listing in the National Register under Criterion C.

Criterion D

Criterion D generally applies to archaeological resources, but may apply to a built resource in instances where a resource may contain important information about such topics as construction techniques or human activity. In any case, the resource must be the principal source of information. This is unlikely to be true for the subject property. Therefore, 1931 W. Sunset Boulevard does not appear to be eligible for listing in the National Register under Criterion D.

California Register of Historical Resources

As the eligibility requirements for the California Register mirror those of the National Register, the property does not appear to be eligible for listing in the California Register for the same reasons discussed above.

Los Angeles Historic-Cultural Monument

As the Los Angeles HCM designation criteria mirror those of then National and California Registers, the property does not appear to be eligible for listing as an HCM for the same reasons discussed above.

Integrity

To be eligible for listing in the National Register, California Register and for designation as an HCM, properties must retain their physical integrity from the period in which they gained significance. In the case of architecturally significant properties, the period of significance is normally the date of construction. For historically significant properties, the length of the historic associations usually measures the period of significance. As 1931 S. Sunset Boulevard is not significant under any of the national, state, or local criteria, the integrity of the building does not require examination.

Conclusion

GPA concludes that 1931 W. Sunset Boulevard does not appear to be eligible for listing in the National or California Registers, or for designation as an LA HCM due to a lack of significance. Additionally, it does not appear to contribute to a potential historic district. The recommended Status Code for the property is 6Z, ineligible for designation at the national, state, and local levels through survey evaluation. Therefore, the property is not a historical resource for the purposes of CEQA.

5. PROJECT IMPACTS

5.1 Thresholds for Impacts on Historical Resources

The State CEQA Guidelines set the standard for determining the significance of impacts to historical resources in Title 14 California Code of Regulations Section 15064.5(b), which states:

> A project with an effect that may cause a substantial adverse change in the significance of an historical resource is a project that may have a significant effect on the environment.

Title 14 California Code of Regulations Section 15064.5(b)(1) further clarifies "substantial adverse change" as follows:

> Substantial adverse change in the significance of an historical resource means physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of an historical resource would be materially impaired.

Title 14 California Code of Regulations Section 15064.5(b)(2) in turn explains that a historical resource is "materially impaired" when a project:

> Demolishes or materially alters in an adverse manner those physical characteristics of an historical resource that convey its historical significance and that justify its eligibility for inclusion in the California Register of Historical Resources as determined by a lead agency for purposes of CEQA.

As such, the test for determining whether or not a proposed project will have a significant impact on an identified historical resource is whether or not the project will alter in an adverse manner the integrity of the historical resource such that it would no longer be eligible for listing in the California Register. In the case of the subject property, the historical resource identified by the City Council as lead agency in its final action of January 26, 2022 designating Taix French Restaurant as a historic cultural monument is the restaurant as a continuing legacy business, and not the physical building; the physical features that were identified as conveying the restaurant's historical significance by the lead agency are the two exterior signs and the interior bar.

5.2 Project Description

Based on conceptual plans dated August 26, 2020, prepared by Togawa Smith Martin, Inc., Architects, the Applicant proposes to demolish the two existing buildings on the site and redevelop the lot with two mixed-use buildings arranged around a central paseo.

Figure 13: Conceptual rendering of proposed Project, view looking north from Park Avenue. TSM Architects, Inc., August 26, 2020.

The buildings would be a maximum of six stories in height and would consist of multiple, visually distinct volumes with varied setbacks and features. The general scale, massing, and arrangement of features on the buildings would reference existing building stock in the area, including flat roofs, verticality, articulated ground floors, horizontal ornamentation including cornices and string courses, stacked fenestration, exterior balconies, and a combination of arched and rectangular openings. The two buildings would be connected on the upper floors by a series of exterior walkways spanning over the centralized paseo at the northeast end of the Project Site. The central paseo between the two proposed buildings would run generally north-south from Sunset Boulevard before angling northeast to connect with Reservoir Street. Other proposed project features include a paseo at the southwest corner connecting to the adjacent Edendale Branch library, murals, and a rooftop deck on the west building for residential use. The proposed driveway for parking access would be aligned with the existing driveway and a traffic signal at Park Avenue.

Figure 14: Conceptual rendering of proposed Project, view looking north through central paseo. TSM Architects, Inc., August 26, 2020.

The building on the west side of the parcel would be the larger of the two. It would have an irregular plan that conforms to the lot lines and would include parking and retail space on the ground floor with studio to three-bedroom housing units on the upper floors.

The building on the east side of the parcel would be the smaller of the two. It would have an irregular plan that conforms to the lot lines and would include retail space on the ground floor with one- and two-bedroom housing units on the upper floors.

The ground floor would also include a dedicated space for a proposed new version of the legacy business, Taix French Restaurant. The design team worked closely with the Taix family to develop a project that paid homage to the historic character of the restaurant by incorporating not only the three physical features identified by the City Council, but also the intangible qualities of Taix's first and second locations that have made it a popular gathering place and contribute to its feeling of a legacy restaurant. Over the course of the restaurant's history, many of the physical features of the existing building had been updated and altered over time to fit the needs of a changing business and clientele, and the Taix family always tried to make the restaurant feel more nostalgic in character -- even when installing new features. Because these changes were made gradually over time, there is no one distinct period of Taix features and décor that could be replicated or restored as part of the proposed project. As a result, the physical building's interior and exterior design is not authentically historically significant and was therefore determined not to contribute to the significance of the restaurant as a historic entity.

The design of the new restaurant exterior includes references to the original Taix location in downtown Los Angeles, while the design of the interior incorporates familiar spaces, features, and characteristics that would allow for a continuation of the intangible quality, legacy and feeling of Taix French

Restaurant. The scale of the dining spaces, cocktail bar, and secondary "speakeasy" space would replicate the intimate atmosphere of the existing interior in conjunction with visually familiar features such as pressed tin ceilings, burgundy banquettes (booths), wall sconces, smoked glass mirrors, and pink and gold wallpaper. In addition, completion of the Project would create a more economically viable future for Taix, enabling the restaurant to stay in business. Unnecessary extra space and overhead would be eliminated by the smaller and more cost-efficient size commensurate with the restaurant's current needs, as well as the new back-of-house infrastructure including kitchen facilities and storage.

Per the City Council's direction, the significant physical features that were identified as conveying to the restaurant's significance such as the Taix billboard, red and white cocktails sign, and the cherry wood bar top would all be carefully preserved and reincorporated into the restaurant's new design. The Taix billboard would be reinstalled at the sixth floor of the east elevation facing generally east toward Reservoir Street, similar to its current location and orientation. The vertical red and white "Cocktails" sign would be reinstalled on the southwest corner of the eastern building facing Sunset Boulevard, similar to its current location and orientation. Lastly, the original cherry wood bar top would be installed in the cocktail bar in the new restaurant space. The exterior of the new restaurant (see **Figure 15**) incorporates many of the design features from Taix's original location in downtown Los Angeles, including the pedestrian friendly storefronts, the clearstory windows, columns, awnings, and outdoor seating.

Figure 15: Conceptual rendering of proposed Project, view looking east toward Taix Restaurant and outdoor dining space from central paseo. TSM Architects, Inc., August 26, 2020.

Figure 16: Conceptual rendering of proposed Project, view looking north in Taix Restaurant bar. Design concept includes sconces and metal ceilings and incorporation of cherry wood bar top at right. TSM Architects, Inc., August 26, 2020.

Figure 17: Conceptual rendering of proposed Project, view looking northeast at Taix Restaurant hostess desk. Design concept includes sconces, metal ceilings, smoked glass mirrors, and burgundy circular and U-shaped booths. TSM Architects, Inc., August 26, 2020.

5.3 Analysis of Project Impacts

The proposed Project involves demolition and new construction that have the potential to impact the historical resource, Taix Restaurant on the Project site. Additionally, there are three historical resources that were previously identified within the project vicinity that could have the potential to be indirectly impacted through the introduction of the proposed Project; the Citibank Building (1910W. Sunset Blvd.), the Glendale-Sunset Public Stairway (located on Reservoir Street east of Glendale and Sunset Blvd,), and Alvarado Church of Christ, Golden West (located on Reservoir Street & 1310 Liberty Street). The following discussion analyzes the potential impacts of the Project on Taix Restaurant and other identified historical resources within the Project's vicinity that could be caused by the demolition of the existing buildings and the introduction of two new buildings on the Project site.

A Project may cause a substantial adverse change in the significance of a historical resource through the physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings, ***such that the significance of the resource is materially impaired*** [emphasis added]. The significance of a historical resource is materially impaired when a project:

> Demolishes or materially alters in an adverse manner those physical characteristics of a historical resource that convey its historical significance and that justify its eligibility for inclusion in the California Register of Historical Resources as determined by a lead agency for purposes of CEQA.[33]

Analysis of Potential Impacts from the Project on Historical Resources on the Site (Taix Restaurant)

The historical resource on the site is the Taix Restaurant. The Los Angeles City Council is the entity of the lead agency authorized by Section 22.171.10(f) of the City's Cultural Heritage Ordinance to ultimately approve or disapprove the designation of HCMs. The City of Los Angeles is also a Certified Local Government under the Federal Preservation Program Partnership charged with protecting and designating a community's historic resources in accordance with State and local laws. The City Council designated the Taix Restaurant based on its continuity as a legacy business and separate from the existing building and its site as an HCM (see **Historic-Cultural Monument Designation** in **Section 3.2.1**) and identified three physical characteristics that convey its historical significance and justify its designation as an HCM and eligibility for inclusion in the California Register:

(i) The red and white east-facing Taix billboard sign along Reservoir Street;

(ii) The vertical red and white 'Cocktails' sign along Sunset Boulevard; and

(iii) The restaurant's original cherry wood bar top.

Analysis of Potential Physical Impacts Caused by Proposed Demolition Activities on Taix Restaurant

The proposed Project would involve demolition of the existing building that had been occupied by the Taix Restaurant, which was identified by City Council as a historical resource; however, the Council noted that the physical building interior and exterior have no architectural or historical significance. Rather, the historical resource is the legacy of the Taix Restaurant as an entity and its long-time

[33] 14 CCR § 15064.5(b)(2)(C).

presence in the community. As discussed earlier, a primary objective of the Project is to provide new facilities that enable the continuation of the Taix Restaurant as a legacy business, in its current location, in a format determined by the Taix family and with new restaurant infrastructure to support the restaurant's ongoing economic viability, and thus provide for the continuation of the historic resource.

In addition, as part of the HCM nomination, the Council identified the three distinct physical characteristics listed above to be preserved and reincorporated into the new construction. As mentioned in the Project Description, these three features would be preserved and reincorporated into the new construction of the Project. Accordingly, the Project, would not demolish or materially impair the physical characteristics that were identified as conveying the restaurant's significance and justifying its designation as an HCM and eligibility for inclusion in the California Register, it would not result in material impairment as defined in 14 CCR § 15064.5(b)(2)(C) or cause a substantial adverse change in the significance of the historical resource as it was designated by the lead agency. The Taix Restaurant would continue to be identified as a legacy restaurant in its current location and setting and the reincorporated design features would continue to convey its significance as an HCM.

Because the three identified physical features could have the potential to be damaged during Project construction, this report includes recommended measures to protect these features during demolition of the non-significant features, removal and storage of the significant features, and reinstallation of the significant features in their new locations as part of the proposed Project. See **Section 5.4** for recommended measures to protect these significant features.

Analysis of Potential Indirect/Visual Impacts Caused by Proposed New Construction on Taix Restaurant

The proposed Project would involve new construction on the site, including construction of two new multi-use buildings and a new ground floor space for the Taix French Restaurant.

The new construction would introduce a building with a larger massing and residential uses to the setting of the restaurant; however, City Council designated the historical resource as the restaurant and its site, excluding the existing building. As such, setting was not identified as a relevant or necessary aspect of the property's historic significance. The location, feeling, and association will be preserved, as well as the three physical features that were identified as conveying its historic significance; therefore, the change in setting would not reduce the significance of the restaurant and the three physical features to the level that it would no longer qualify for listing as an HCM.

The Project would support the continuation of the Taix Restaurant as a legacy business. The restaurant would continue to exist and operate in the same location, and the three physical characteristics listed above would be preserved and reincorporated into the design of the buildings. The Taix billboard would be reinstalled at the north end of the east-facing wall of the more easterly building (see **Figure 18** and **Figure 19**). The sign in its proposed location would continue to be oriented toward motorists traveling down Sunset Boulevard. Although the new location would be higher than its existing location, it would have increased visibility behind the large billboard on the adjacent property and other infrastructure including power poles and streetlights. The red and white 'Cocktails' sign would be reinstalled at the southwest corner of the more easterly building near the entrance of the proposed new Taix restaurant space, with its narrow edge projecting toward the paseo (see **Figure**

20 and Figure 21). Although the sign would not face Sunset Boulevard in its proposed new location, it would still be oriented toward foot traffic near the entrance of the restaurant. Lastly, the original cherry wood bar top would be installed in a new bar space (see Figure 22 and Figure 23). The new construction would not obscure or visually impact the public's ability to view these features in any way.

Figure 23: Conceptual rendering of proposed Project, view looking north in bar. TSM Architects, Inc., August 26, 2020.

Analysis of Potential Impacts on Historical Resources in the Study Area

There are three historical resources that were previously identified within the project vicinity that could have the potential to be indirectly impacted through the introduction of the proposed Project; the Citibank Building (1910W. Sunset Blvd.), the Glendale-Sunset Public Stairway (located on Reservoir Street east of Glendale and Sunset Blvd,), and Alvarado Church of Christ, Golden West (located on Reservoir Street & 1310 Liberty Street). This section analyzes the potential for the project to cause an impact on these three historical resources within the Study Area.

Analysis of Potential Physical Impacts Caused by Proposed Demolition Activities on Adjacent Historical Resources

A Project may cause a substantial adverse change in the significance of a historical resource through the physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings, such that the significance of the resource is materially impaired. The proposed project would include the demolition of the existing one-story Taix Restaurant building and adjacent one-story commercial building located at 1931 W. Sunset Blvd. The proposed Project is physically separated from the three historical resources in the Study Area by Sunset Boulevard, W. Reservoir Street, or Reservoir Street. Because of this separation, the proposed Project would not result in the demolition, destruction, relocation, or alteration of the resources.

The demolition of the existing Taix building and the commercial building would not physically alter, relocate, or demolish any of the characteristics that qualify any of the three historical resources mentioned above, and therefore would have no direct or physical impact or material impairment on the historical resources identified outside the Project site but within in the Study Area.

Analysis of Potential Indirect/Visual Impacts Caused by Proposed New Construction on Adjacent Historical Resources

Although the proposed Project would not physically impact any of the adjacent historical resources identified within the Study Area, the new construction would introduce a new visual feature in the immediate surrounding of each historical resource. This analysis considers whether the integrity of setting of the historical resources in the Study Area would be so diminished by the Project that they

would no longer qualify as historical resources under national, state, and/or local landmark or historic district programs.

The Citibank building was identified as potentially eligible for listing in the federal, state, and local registers as an excellent example of Brutalist architecture in the area under Criterion C/3/3. The integrity considerations for this context/theme/property type (CTP) acknowledge that the broader setting for a property like this may have changed. They indicate that a property should retain integrity of location, design, materials and workmanship. Integrity of setting is not essential to conveying significance under this CTP. The integrity considerations state that setting may have changed, including surrounding buildings and land uses, acknowledging that commercial corridors like Sunset Boulevard redevelop over time. The Project would not affect the physical integrity of the building, its location, or its immediate setting. Although the Project would introduce a new visual feature in the broader setting of the resource, the integrity of setting is expected to change and has changed since the building was constructed in 1965. As such, the Project would not materially impair those characteristics that justify the building's eligibility for listing in the National Register, California Register, or as an HCM and would have no significant impact on the historical resource.

The Glendale-Sunset Public Stairway was identified as potentially eligible for listing as an HCM as an excellent example of an early public stairway in Echo Park associated with Streetcar Suburbanization under Criteria A/1/1 and C/3/3. The integrity considerations for this CTP indicate that a property should retain integrity of location, design, feeling, materials, and association. Integrity of setting is not essential to conveying significance under this CTP. The Project would not affect the physical integrity of the stair or its location. Although the Project would introduce a new visual feature in the broader setting of the resource, the stair is almost entirely visually separated from the Project Site by the difference in grade between W. Reservoir Street and Sunset Boulevard, the width of Reservoir street, and the existing building at 1901 W. Sunset Boulevard. The stair's immediate setting and relationship to the configuration of streets at this intersection would remain intact and continue to convey the stair's historic and continued function. The Project would not materially impair those characteristics that justify the structure's eligibility for listing as an HCM and would have no significant impact on the historical resource.

The building at 1927 W. Reservoir Street was determined eligible for listing in the National Register as part of the Section 106 process and subsequently listed on the California Register. A copy of the SHPO correspondence was obtained for this report and indicates that the building was determined individually eligible for listing in the National Register at the local level of significance under Criterion A for its association with the religious and scholarly development of the Echo Park community. The SCCIC records search results, including prior evaluations of 1927 W. Reservoir Street are in **Appendix B**, and the SHPO Correspondence is included in **Appendix C**.

Historical resources, regardless of area of significance, must retain the essential physical features that enable them to convey their historic identity. Ideally, they retain some of each aspect of integrity and would continue to be recognizable to a historical contemporary. The Project would not affect the physical integrity of the religious building, its location, or its immediate setting. Although the Project would introduce a new visual feature in the broader setting of the resource, the integrity of setting has changed since the building was constructed in 1928, including the construction of an addition to the building in 1952 and the continued development of the surrounding area that was present when the building was evaluated in 2009. As such, the Project would not materially impair those characteristics

that justify the building's eligibility for listing in the National Register or California Register, and would have no significant impact on the historical resource.

5.4 Recommendations to Protect Significant Features of the Historical Resource During Construction

If not properly removed and protected during construction, the three identified physical features that contribute to the significance of Taix Restaurant have the potential to be damaged during implementation of the proposed Project. Therefore, GPA has included the following recommendations to ensure these features are protected during demolition, removal, construction, and reinstallation as the proposed Project design evolves from conceptual plans to construction documents.

- Prior to the development of final construction plans, the applicant shall ensure a historic preservation professional meeting the qualifications for architectural history or historic architecture outlined in Title 36 of the Code of Federal Regulations, Part 61 has reviewed and confirmed:
    - The three physical features (billboard, cocktails sign, and cherry wood bar) are clearly and properly identified on the demolition plans;
    - The demolition plans include detailed notes for careful removal and protection of the three physical features.
    - The construction plans include detailed drawings for reinstallation of the features in a manner that would not damage or destroy them or put them at risk of damage in the future.

- The applicant shall identify an appropriate climate-controlled and locked storage location for the three physical features (billboard, cocktails sign, and cherry wood bar) during construction that will prevent damage, vandalism, or theft. The applicant shall also identify an appropriate method to safely transport the features to this location. The location and transportation information shall be provided to a historic preservation professional meeting the qualifications for architectural history or historic architecture outlined in Title 36 of the Code of Federal Regulations, Part 61 to review and confirm.

- The applicant shall conduct a training for the construction team to ensure all workers that will be on the site are aware of the physical features, their significance, and their need for protection.

- Prior to the commencement of demolition of the buildings on the site, the applicant shall retain a qualified contractor or practitioner experienced with historic buildings and historic building elements to carefully remove the three physical features (billboard, cocktails sign, and cherry wood bar) from their existing locations prior to construction of the proposed Project.

- Following the completion of the proposed construction, the applicant shall retain a qualified contractor or practitioner experienced with historic buildings and historic building elements to install the three physical features (billboard, cocktails sign, and cherry wood bar) in their proposed new locations in a manner that does not damage or destroy the features or put them at risk of damage in the future.

6. CONCLUSIONS

The Project as proposed involves demolition and new construction. Two existing buildings on the Project Site are proposed to be demolished, the existing Taix Restaurant building and 1931 W. Sunset Boulevard, a one-story medical office building constructed in 1959.

1931 W. Sunset Boulevard is not currently designated under any national, state, or local landmark program and was not identified in SurveyLA or listed in the BERD. A records search was requested from the SCCIC and the results are included as Appendix B. 1931 W. Sunset Boulevard was evaluated as a potential historical resource as part of the environmental review of the proposed Project on the site in compliance with CEQA. GPA evaluated the property and recommends that 1931 W. Sunset Boulevard does not appear to be eligible for listing in the National or California Registers, or for designation as an HCM due to a lack of significance. Additionally, it does not appear to contribute to a potential historic district. The recommended Status Code for the property is 6Z, ineligible for designation at the national, state, and local levels through survey evaluation. Therefore, it is not a historical resource subject to CEQA.

The existing Taix Restaurant was nominated as an HCM and as part of that nomination three features were identified as contributing to the significance of the historical resource that should be preserved.

The project team analyzed impact of the Project on the historical resource and determined that demolition would not significantly impact the Taix Restaurant because it would not materially impair the physical characteristics determined to convey its historical significance by the lead agency that justify its designation as an HCM and eligibility for inclusion in the California Register. The restaurant's location and setting, feeling and association would remain intact. The physical features that were identified as characterizing the property will be retained and reincorporated into the new construction. Therefore, the demolition would not result in material impairment as defined in 14 CCR § 15064.5(b)(2)(C), or, therefore, cause a substantial adverse change in significance of the historical resource as it was designated by the lead agency. The potential for the new construction to indirectly or visually impair the significance of adjacent historical resources was also analyzed in this report.

GPA concludes that the demolition would have no impact on the three historical resources in the Study Area, and that the new construction would have no significant impact on the historical resources in the Study Area. Although a new visual element would be introduced within their broader setting, it would not result in a substantial adverse change in their significance.

Therefore, the proposed Project would not cause a significant impact on any identified historical resources on or near the Project site in a manner that would materially impair the characteristics that quality them as a historical resource.

TAIX

September 22, 2020

Cultural Heritage Commission
City of Los Angeles
200 North Spring Street
Los Angeles, CA 90012

Re: Historic-Cultural Monument Nomination - Taix French Restaurant; 1911 W. Sunset Blvd.

Honorable Members of the Cultural Heritage Commission:

My family and I are so gratified by the community's interest in helping us continue the legacy of the Taix Restaurant. I am writing to introduce the Cultural Heritage Commission to my family's plan to preserve the Taix Restaurant and to ask that you support it.

My family created the Taix French Restaurant, and through our cooking and hospitality, have made it something dear to the hearts of Angelinos for now close to one hundred years. Our entrepreneurship and perseverance has stewarded and preserved Taix through the Great Depression, through World II, several recessions, the federal government's condemnation of our original downtown location, urban decline, numerous remodelings, and periodic changes in public taste. Well before the current pandemic, it became clear to us that Taix cannot continue in its current format and premises, and so – to enable us to continue our business – we created the plan described below.

Preserving the legacy of the Taix Restaurant is not a matter of bricks and mortar. It is a matter of restaurant economics and changing public tastes to which we must respond. Though we acknowledge the well-meaning intentions of the Silver Lake Heritage Trust and the Los Angeles Conservancy, preserving Taix is not something that can be accomplished with the tools of architectural history or by designating it as a City Historic-Cultural Monument. Indeed, well-meaning intentions can have negative and unintended consequences which could put an end to the Taix Restaurant if the City does not act with careful consideration.

The City of Los Angeles has recognized Taix for its importance as a legacy business before (*see* Exhibit A), and we have no objection to our restaurants site being recognized as a Historic-Cultural Monument if it is done properly and in a manner that allows us to evolve so that we can preserve and continue our business. And so, we ask that in considering the application before it, the Commission support our plan, and – if the Commission does nothing else – it observe the primary dictate of the Hippocratic Oath: "Do No Harm."

Accordingly, for the reasons discussed in more detail below, on behalf of our family I respectfully request, that if the Commission chooses to recommend that Taix French Restaurant

be added to the City's list of Historic-Cultural Monuments, the Commission recommend that the designation pertain to the site of the restaurant (and not the existing building) and that the Commission find that:

1. The Taix French Restaurant exemplifies significant contributions to the broad cultural, economic or social history of the City and state of California;

2. The primary significance of Taix French Restaurant as a historic-cultural resource is as a commercial use and legacy business that has been dear to the hearts Angelinos for almost 100 years despite many changes in its location, premises, décor, format, and menu;

3. Preservation of the Taix French Restaurant as a historic-cultural resource requires that it be able to respond to economic and social challenges that compel changes in its current physical premises;

4. The Taix family preservation plan will enable the continuation of Taix French Restaurant at its present site, and includes character-defining interior and exterior features that will continue to convey the historical significance of the restaurant and justify the inclusion of its site on the City's list of Historic-Cultural Monuments.

A. Taix's Present Circumstances

a. Taix's Cultural Significance is not in Current Building

The cultural significance of the Taix Restaurant is most assuredly not the building in which it is located or our tenant improvements, and the application filed by Silver Lake Heritage does not contend that it is:

> *"Taix French Restaurant is significant as one of the oldest and most enduring businesses in Los Angeles. The dining establishment has remained in continuous operation between 1927 and the present in its two locations, and remains one of the city's most iconic and beloved local businesses, as well as one of the last vestiges of historic Frenchtown."*

The Historic Resource Group's accompanying report concedes considering how to address Taix as a legacy business resource is complex because *"evaluating properties that are **significant for their use** is difficult, and the guidelines and eligibility standards are relatively subjective in comparison to the established thresholds for evaluating other types of significance."* HRB goes on to recognize that long-lived businesses often have a social – "intangible" – importance rather than a physical or architectural significance:

"In Los Angeles and elsewhere, well-established and long-lived businesses take on important social qualities and often, over time, they organically mature into iconic and revered cultural institutions. Their endurance becomes ingrained into a community's collective memory and plays an integral role in defining a community's sense of cultural and commercial identity. Businesses such as these "have the power to bring people together, provide a sense of continuity with the past, and lend [cities] a rich and layered identity" that is rooted in aspects of their history. ***Though the reasons belying their significance are typically rooted in tradition, culture, and other intangible qualities, these businesses are important because they build a very tangible bridge linking the present with the past."***

b. Taix Cannot Continue In Its Present Building and Format

The truth is that Taix cannot continue in its present building and format. Indeed, while some may find that our premises evoke a certain nostalgia, Taix's over-sized and aged building and infrastructure – and the property taxes, operational, staffing, maintenance and insurance costs associated with them – as well as changing public tastes, would have led to Taix's closure had our family not adopted the preservation plan that we are asking your Commission to support. Put simply, Taix is no longer profitable and its premises are a white elephant.

Even before the COVD-19 public health emergency, our facilities (particularly our extensive banquet facilities) were significantly under-patronized due to increased competition and changing public habits. We no longer need, and cannot afford, a large parking lot, when more and more of our patrons are using Uber and Lyft. Organizations that used to meet in our banquet rooms weekly or monthly are now far and few between, and most no longer exist. We are now long-past the point where Taix's operating revenue is able to support this unnecessary overhead.

Maintaining and insuring our aged-infrastructure consumes a major portion of our reduced revenue. Even if we could snap our fingers and down-size the restaurant and our property, millions of dollars would be required to accomplish the build-out we require and provide capital to restart the business – millions of dollars which the non-existent profits of the restaurant cannot provide. Needless to say, the public's affection and civic recognition cannot provide those dollars either.

In 2018, we realized that in order to continue Taix, the best course for us would be to sell the property to a user that would help us continue at our current site, in a new 'right-sized' format, with new infrastructure. We carefully examined over a dozen developers, and we ultimately decided to move forward with Holland Partner Group, to whom we sold the property in the summer of 2019. HPG has a history of building quality and thoughtful developments throughout Los Angeles and Southern California. Their vision of what this corner of Echo Park could be, with placemaking and the additional energy housing provides, were aligned with the

ideas we had to renew and continue Taix. And together, we began planning the next "new Taix."

Moreover, the structure of our transaction with HPG saved us. Although the restaurant is no longer profitable, HPG has enabled us to stay open by relieving us of the burden of mortgage debt, property taxes and insurance, and by giving us free rent. The last few months of the COVID 19 public health emergency have further reinforced the long term need to adjust our business plans. Sales have significantly dropped, and even at zero rent, the cost of operating the restaurant is not nearly being covered. The easy thing to do for us is give up, but we are not doing that.

B. Taix Has Continually Changed Since Its Founding

Those who may believe it is necessary to 'freeze' Taix in time in order to preserve are not sufficiently acquainted with our actual history, and do not understand what our restaurant is as a cultural resource. As entrepreneurs, our family business has had to adapt over and over again in order to survive. Indeed, in 1962, aware that the federal government would soon 'condemn' our original downtown premises, my grandfather took the risky step of moving what was already a City institution to 'new' premises in Echo Park and – on top of that – he changed the restaurant's format from family-style dining to entrée menu service. But, notwithstanding the dramatic changes in locale, décor, menu and service that took place, the public recognized that grandad had preserved what was essential in "Taix." As the LA Times reported:

Original Bargain Duplicated[1]

The family and I finally got around to trying what some people call "The new Taix." It is at 1911 Sunset Boulevard, just east of Alvarado Street, and its true name is Les Freres Taix. It is the old Botwin's Café and is somewhat décor-dash wise, a far cry from the original Taix down on Commercial Street – tufted leather booths, carpeting, table cloths, and attractive waitresses rather than 80-year-old waiters. Incidentally, the original Taix is still in business, hasn't yet been bulldozed as a lot of people seem to think. Anyway, at the so-called "new Taix" you get the same generous tureen of excellent vegetable soup, salad with the same garlicy dressing, huge serving of pot roast with large portions of tomato-infested zucchini, creamed au gratin potatoes, sherbet, and coffee – all for $2.25. It is not exactly a gourmet repast. But, you can't beat the price. What's more, they have a red Mountain Wine for 90 cents a half bottle (by Louis Martini) that needs no apologies. And the cocktail lounge is exceptionally attractive. For an economical dine-out treat for the family, or to takeout the girl friend on the night before payday, this in one of the town's better bargains.

[1] Los Angeles Times, Sunday, November 3, 1963.

Moreover, the changes did not stop in 1962. We have never stood still; no service business can afford to do so. In 1969, we undertook a major renovation that included adding banquet rooms, a wine shop and cellar, the porte cochere, a parking lot, a new bar and the cocktail lounge. The 1970s brought a more continental menu and saw the onset of neighborhood blight. In the 1980s, continental cuisine began to fall out of public favor. We changed our menu, began a room-by-room remodeling to impart an older look to our restaurant, and closed our wine shop. That process continued into the 1990's and 2000's, when we added many older-looking features such as tin ceilings, patinaed mirrored walls, more brick wainscoting, antique-style light fixtures, changed booth layouts and covering, and wood paneling. Little today is left from the 1969 renovation – but our family's legacy business continues to be recognized by the public.

C. Our Preservation Plan

There are four key components of our family's preservation plan for Taix: (1) remain at our site; (2) off-load overhead that the restaurant can no longer support; (3) move into right-sized premises with new infrastructure; and (4) retain our identity while responding to current public tastes and preferences. Our sale to HPG has enabled us to accomplish the first two objectives. The other two components of our plan are discussed in more detail below.

a. Right-Sized Premises with New Infrastructure

As explained earlier, it is not economically feasible to continue to operate in our current premises. Therefore, every plan we have considered requires that Taix be reborn into a smaller, approximately 5,000 square foot footprint with new kitchen, storage, and HVAC facilities. Retaining our aged existing building, and its inefficient and outmoded layout, would be fundamentally incompatible with this objective.

Working with HPG, we developed a plan to renew Taix into a new right-sized restaurant facility. Because the conventional preservation approach often involves some recognition of a building's existing edifice, our initial plan proposed fronting the new building with our current faux-Normandy Sunset Boulevard elevation. *See* Exhibit B. But frankly, that plan pleased no one: not City Planners who wanted to see us activate our stagnant Sunset Boulevard and make it pedestrian friendly; not local stakeholders who told us that retaining what they considered a kitschy, rather tired 'screen set' would be an empty gesture that added nothing to the community; and not preservation voices who are uncomfortable with the idea of new construction. We were asked to think instead about the importance of our site in relation to surrounding properties and the street grid, and how redevelopment of our site could benefit the community over the decades to come. So together with HPG, we went back to the drawing board.

b. Taix In its New Context

Together with HPG, over the next year we engaged with a "design council" of local stakeholders brought together by Councilmember O'Farrell. Through a series of design iterations (*see* Exhibit C) we were ultimately asked to create a pedestrian paseo through the Project from Reservoir and Liberty Streets to Sunset Boulevard that would provide a visual corridor through to Park Avenue and Echo Park to the south.

The resultant transit and pedestrian-friendly development provides 5,500 square feet of new restaurant space for Taix to continue in its current location and footprint, an additional 7,500 square feet of ground floor retail space that will activate the paseo and Sunset Boulevard, and 166 residential units (including 24 units reserved for very low income households).

A second pedestrian paseo will connect the main Project paseo to the Edendale Branch Library (whose parking and primary entrance is from Alvarado Street) transforming our property into the "hub" of the neighborhood – with Taix at its very center. Our shared property line with the library will include four "walk-up" units and a large scale mural.

Our schematic designs have been shared with the Echo Park Improvement Association and the Echo Park Neighborhood Council, who ultimately asked us to finish it with architecture that would be "of Echo Park, and for Echo Park."

With this direction, the design team explored the Echo Park neighborhood, looking to strong examples of early 20th century architecture nearby. The traditional architecture, with pronounced top, middle and bottom horizontal separations, unique storefront street frontages, fire escape balconies and selective uses of arched windows were common themes that the team embraced in the Taix design. Further, given the architectural period of inspiration, pictures of the original Taix building in downtown LA offered direction as well. *See* Exhibit D. With the black framed storefront and red canopies overhead, the new Taix design now provides a distinct nod to the original home of the restaurant. *See* Exhibit E.

c. The "New Taix"

At the center of all this will be the "New Taix" – right -sized , designed to respond to current public tastes, planned with efficiency in mind, and finished in an aesthetic that will provide a familiar experience to our long time patrons. Those patrons will be greeted with an adaptation of the storefront that graced our original downtown premises flanked by our existing "Cocktails" sign. The "New Taix" will remain on its existing site, along Sunset, with its footprint occupying approximately the same position as our bar lounge today.

Therefore, when we reopen, our patrons will find us just where we were...

The new Taix will be comprised of approximately 5,500 square feet broken into multiple interior rooms, with an adjoining 1,500 square foot outdoor dining patio along the Project's new pedestrian paseo that will connect Sunset Boulevard to Reservoir Street. *See* Exhibit F. Our new indoor/outdoor format will respond to the public's desire to enjoy the popular California outdoor dining experience so much in demand while sheltering diners from the hubbub of traffic along Sunset. *See* Exhibit G. The outdoor patio will be directly integrated into the restaurant's interior via operable window-door assemblies that will allow light into Taix's interior, and allow our interior space to seamlessly flow into the outdoor environment.

Inside, we will retain Taix's feel and sense of place by reusing our beloved Cherrywood bar top, along with our trademark patinaed mirrors lining the wall behind the bar. *See* Exhibit H Much of the restaurant's ceiling will be covered with a faux-tin ceiling tile similar in style to that found in our dining rooms today. The bar room walls will be lined with half a dozen booths, with the center of the bar room housing tables that can be moved and adjusted as the occasion demands.

Further back in the restaurant, there will be a darker and more intimate space for another dozen horseshoe, Pullman and circular booths like we have today. This space is conceived to embrace the darker "speak-easy" experience many of our current patrons enjoy. Patinaed mirror treatment along the walls and the faux tin tiles on the ceiling provide the depth of material to accent the plush booth benches that wrap the perimeter of this room.

Beyond this space, a small private dining room can be accessed designed for more intimate parties of approximately a dozen guests, with the restrooms and operations office further down the corridor. The kitchen, back of house and associated storage will be positioned in the center of our space with a backdoor that leads directly to an off-street loading zone and a secure and ventilated commercial trash room.

D. Conclusion

As the City Council Resolution presented to us on the occasion of our 60th anniversary noted,

"WHEREAS CIRCUMSTANCES, TIME AND PLACES HAVE CHANGED DURING THE PAST SIX DECADES, BUT THE WARMTH, CAMARADERIE AND SIMPLY GOOD FOOD AND SERVICE REMAIN THE SAME. THE SPIRIT OF THE BROTHERS –LES FRERES –LIVES"

In the spirit of the City Council's Resolution, and for all of the foregoing reasons, we ask that if your Commission chooses to recommend that Taix French Restaurant be added to the City's list of Historic-Cultural Monuments, the Commission recommend that the designation pertain to the site of the restaurant and that the Commission adopt the findings set forth on the first page of this letter.

Thank you for supporting our efforts to preserve the Taix French Restaurant,

Mike Taix

cc: Councilmember Mitch O'Farrell
Lambert Giessinger, Office of Historic Resources

TAIX

City of Los Angeles State of California

RESOLUTION

Les Freres Taix

WHEREAS, MEMBERS OF THE TAIX FAMILY CAME FROM THE FRENCH ALPS TO LOS ANGELES MORE THAN A CENTURY AGO, BRINGING A WORK ETHIC AND CULINARY TALENTS THAT WOULD GRACE AND SATISFY THE PALATES OF A GROWING CITY, AND

WHEREAS, THE TAIX BROTHERS – LES FRERES TAIX – PLUNGED INTO LIFE IN THEIR NEW ENVIRONMENT, COMMITTING THEIR SKILLS TO WHATEVER ENTREPRENEURIAL ENTERPRISE WAS NECESSARY TO SURVIVE, OFTEN TIMES DIFFERENT FROM THEIR TRAINING AS BAKERS, AND

WHEREAS, THOSE VERSATILE YEARS – DURING WHICH PARTNERSHIPS WERE FORMED, LANDS AND PROPERTIES WERE ACQUIRED AND SHUFFLED AND FAMILY MEMBERS SEPARATED – FOCUSED IN ON 1927 WHEN THE SON OF ONE OF THE PIONEERING BROTHERS, MARIUS TAIX JR., TOOK OVER MANAGEMENT OF A RESTAURANT IN DOWNTOWN LOS ANGELES NEARBY THE THEN-NEW LOS ANGELES CITY HALL, AND

WHEREAS, THE DYNAMICS OF TIME AND GROWTH, HOWEVER, LEFT NO ROOM FOR THE RESTAURANT THAT FOR 33 YEARS WAS TO BE POPULAR WITH CIVIC CENTER HABITUES, AND THE RESTAURANT WAS FORCED TO MOVE, AND

WHEREAS, MARIUS TAIX JR., AND HIS SONS PIERRE AND RAYMOND, ALONG WITH PARTNERS LOUIS BANGUARD AND JOHN NARP, DID NOT MOVE FAR, ACQUIRING PROPERTY ON SUNSET BOULEVARD NEAR ALVARADO STREET, TO CONTINUE THE TRADITION OF LE FRERES TAIX, A RESTAURANT OF SUPERLATIVE CUISINE, UNMATCHABLE HOSPITALITY AND GRACIOUS CORDIALITY, AND

WHEREAS, LES FRERES TAIX THIS YEAR CELEBRATES ITS 60TH ANNIVERSARY AS A LOS ANGELES TRADITION WITH RAYMOND TAIX AS THE PATRIARCH RESTAURANTEUR, AND MICHAEL TAIX AND JON BRUNO MANAGING WITH THE SAME GUSTO THAT FIRST BROUGHT THE RESTAURANT TO THE ATTENTION OF A PATRONAGE THAT APPRECIATED CLASS AND STYLE, AND

WHEREAS, CIRCUMSTANCES, TIME AND PLACES HAVE CHANGED DURING THE PAST SIX DECADES, BUT THE WARMTH, CAMARADERIE AND SIMPLY GOOD FOOD AND SERVICE REMAIN THE SAME, THE SPIRIT OF THE BROTHERS – LE FRERES – LIVES.

NOW, THEREFORE, BE IT RESOLVED that BY ADOPTION OF THIS RESOLUTION, THE LOS ANGELES CITY COUNCIL CONGRATULATES LES FRERES TAIX ON ITS 60 ANNIVERSARY AS ONE OF THE PREMIER RESTAURANTS IN LOS ANGELES AND ON THE WEST COAST.

PRESENTED BY

Councilman 4th District

I HEREBY CERTIFY that the foregoing resolution was adopted by the Council of the City of Los Angeles at its meeting this August 14, 1987.

President of the Council

SECONDED BY

Councilman 13th District

ATTEST

City Clerk

Exhibit A – City Council Resolution

Exhibit B Summer 2019 - Initial Taix development designs envisioned removing and reinstalling the Sunset fronting elevation of the existing structure. Significant updates would be required to ensure code compliance, fire-life safety requirements and structural needs. The general response from community stakeholders favored removing the elevation to provide greater public space and more connectivity between the multiple street frontages of the site.

Exhibit C Spring 2020 – The submitted Taix development designs reimagined the use of the site by creating a publicly accessible pedestrian paseo connecting Sunset Blvd to Reservoir St. creating an off-street opportunity for Taix to include outdoor dining in the process. Community stakeholders generally supported the approach, but asked that the architecture be improved.

Exhibit D 1920's-1950's – The original Taix in downtown Los Angeles served as architectural inspiration to create a more traditional aesthetic that would be fitting with the neighboring buildings so central to the Echo Park identity. The strong horizontal lines between commercial ground floor, middle floors, and the top are prevalent in this more traditional design. Storefronts with different glazing assemblies not reaching full floor to ceiling and covered by canopies become focal elements.

Exhibit D 1920's-1950's – The original Taix in downtown Los Angeles served as architectural inspiration to create a more traditional aesthetic that would be fitting with the neighboring buildings so central to the Echo Park identity. Fire escape balconies, more ornate windowsills and headers are prevalent in this more traditional design.

Exhibit E Summer 2020 – The updated Taix design takes inspiration from the original Taix building from downtown, as well as the other Echo Park buildings from the same era of early 1900's architecture. The more traditional aesthetic has strong vertical lines with the white pilasters but also provides for horizontal breaks between top, middle, bottom portions of the building. The public paseo has been enlarged from the previous version creating greater connectivity through the site.

Exhibit E Summer 2020 – View from Park Ave and Sunset Blvd.

Exhibit E Summer 2020 – Looking West down Sunset Blvd. Original Taix signage retained in place overlooking The Sunset/Reservoir intersection.

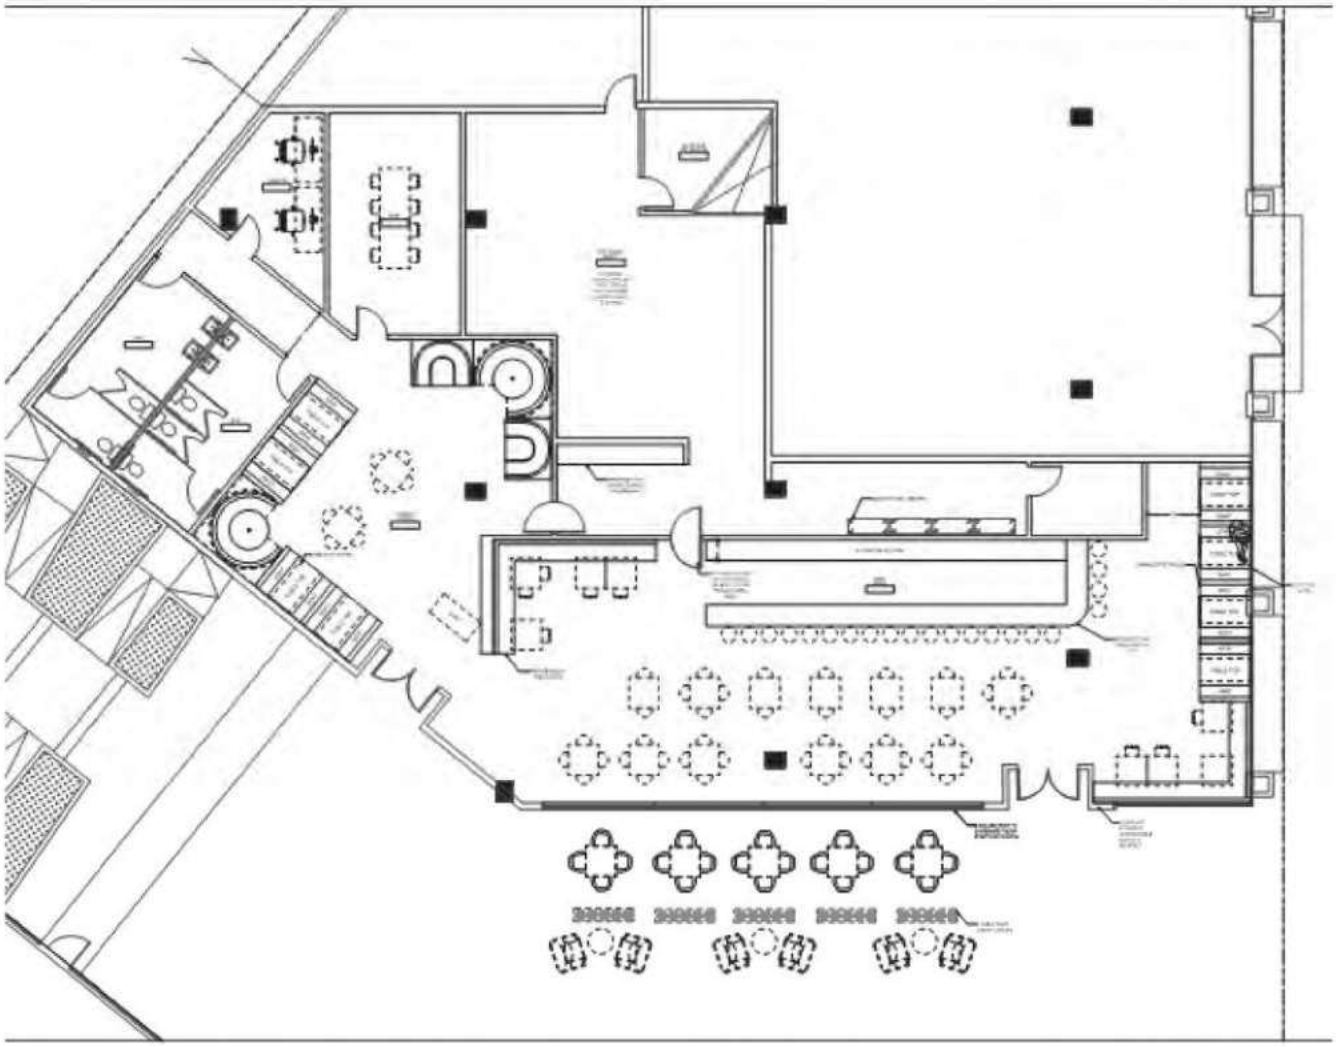

Exhibit F Summer 2020 – Interior space plan for new Taix restaurant. Sunset Blvd is plan Right, Reservoir St. is plan Left with the public paseo and outdoor dining at the base of the plan. Patrons can enter from one of two entrances off the paseo into the bar room or to the hostess desk, a small private dining room and right-sized kitchen utilize the upper portion of the plan.

Exhibit G Summer 2020 – Along the main pedestrian paseo, storefronts with different glazing assemblies not reaching full floor to ceiling and covered by canopies become strong elements reminiscent of an earlier period. The 5,500 SF Taix restaurant space has ample outdoor seating, accessed via operable window-door assemblies, connecting the interior barroom and outdoor paseo seamlessly.

Exhibit H Summer 2020 – The 5,500 sf Taix restaurant includes multiple rooms, with the bar room being located on the prominent Sunset/Paseo corner, similarly located to its current location on the site. The new Taix bar reuses the existing wood Cherry bar top and relies on similar design cues and finish material choices of the existing restaurant to maintain the sense of place and experience that patrons have come to love. Operable window-door assemblies create a seamless transition into the outdoor dining space from the bar area.

TAIX

Exhibit H Summer 2020 – The 5,500 sf Taix restaurant includes multiple rooms, with the bar room being located on the prominent Sunset/Paseo corner, similarly located to its current location on the site. The operable window-door assemblies create a seamless transition into the outdoor dining space on the paseo into the bar area. The ability to have outdoor seating, off the busy street frontage of Sunset Blvd has become all the more critical in today's environment.

*P3a. Description: Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries).
The Alvarado Church of Christ is a rectangular one-story brick structure with a flat roof and semi-subterranean basement. As originally designed, the church was to be a multi-story Gothic Revival structure with a tower. Before its completion, however, the decision was made to halt construction, and the finished church is truncated and more industrial in appearance than originally intended. The building has three bays on the main, or south, facade, and six bays along the east and west facades, separated by projecting piers. The church is built of unreinforced brick in a common bond pattern, but was recently seismic-retrofitted with metal tie rods and reinforcing plates. The church features Gothic arched stained-glass multi-light windows in the front five bays, with regularly spaced rectangular double-hung sash windows with brick relieving arches in the rear classroom bay. All windows have cast concrete sills. Primary entrance is through double frame doors with three recessed panels (clad in plywood in recent years) and bronze panic bars. The doors are placed diagonally from each other at the southwest corner of the building and feature fixed-pane Gothic arched transoms. A granite cornerstone, with the date 1928, is set into the southwest corner pier. The foundation is concrete, with a concrete basement level and discontinuous brick water table formed by the window sills. Structurally, the church appears to be in original condition except for the seismic retrofitting by cementing in of the original central front window and four of the other windows, and the replacement of some double-hung sash windows with jalousie windows.

Period of Significance 1928-present **Property Type** Church **Applicable Criteria** N/A
(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.) The Alvarado Church of Christ was started on Alvarado Street in 1909, in the rapidly expanding northern section of the original city of Los Angeles. The Echo Park area experienced a population boom in the 1920s and 1930s, as the working class neighborhood was developed. Envisioned as the headquarters of the Church of Christ, a competition for the name of the new church was conducted all over California and the name Golden West Christian Church selected. Originally designed as a multi-story Gothic Revival building with a tower, the church was never completed and construction halted at the first story (Samuel Boch, personal communication 1999). The building was designed by H. E. Cavanan of the Metropolitan Drafting Studios, of whom nothing more is known. A search through city directories for the 1920s and 1930s revealed no listings in either name, so perhaps they were from another area and were designers for the Church of Christ. The church has served its local parishioners, both as a place of worship and as a school, since its construction and remains an important element in the changing Echo Park neighborhood, serving peoples of varying ethnicities. Although its integrity has been compromised by the seismic retrofitting, the church may become eligible for the NRHP under Criterion A and Criterion C, if its architectural integrity is restored. Under Criterion A, it was important in the history of the Church of Christ, intended to be the state headquarters. It was constructed at a time when Los Angeles was developing suburban working class neighborhoods surrounding its urban core, and played an important role in the religious and scholarly development of the rapidly expanding neighborhood. Under Criterion C, although it was never completed, it is one of only two religious buildings in the same style (Hlava 1987).

The subject property is a two-story with basement, rectangular shaped, asymmetrical, Gothic Revival style, church building located on a sloping lot in a mixed commercial and residential neighborhood in the Echo Park section of the City of Los Angeles. The building contains 7,430 square feet of space and has a concrete foundation, brick exterior and a flat roof with a raised section on the corners of the building. The building has an arched entrance with a pair of single wood doors with a tri-part transom over the entrance. An additional entrance with the same design is present on the west façade at the corner of the building. Large wood framed multilite windows with Gothic arches are present across the front façade and part of the west façade. The back half of the west façade contains smaller arched windows in rows on both floors. The same window design is used across the north wall. A large cross has been included into the brick work on the front façade and a large standing cross is present on the east edge of the roof. The building appears to be in good condition with no major exterior alterations.

The Echo Park (originally named Edendale) area of Los Angeles is a small community founded in the late 19th century by Thomas Kelly, a carriage maker turned real estate developer. The Los Angeles film industry was centered in Echo Park prior to its permanent move to Hollywood just prior to World War I. Mack Sennett's studio was in the area until the end of the silent era of filmmaking. Many notable silent films with Charlie Chaplin, Laurel and Hardy and Our Gang were filmed in the neighborhood. Prior to World War II, the area was a middle class neighborhood known as "Red Hill" for the large number of political activists who resided there. The area has long had a reputation for creative, underground, independent and unusual residents. After World War II and the rise of "white flight," the neighborhood composition changed to a mixture of Hispanic, Asian, and African Americans settled in the area, bringing more diversity to the Echo Park area. The subject property, the Golden West Christian Church, occupies the c. 1928 building. The original occupants of the church are unknown but the church has served the community for over 80 years. No original building permits were located for the church construction but various permits have been filed for tenant improvements and general maintenance issues. In 1952, the church built an elementary school on the property which still operates as the Golden West Christian School. The church building is in good condition with no major alterations noted.

Integrity Statement

In regard to the seven aspects of integrity – location, design, setting, materials, workmanship, feeling and association – the c.1928 Gothic Revival style church building on this property has retained its original location. The building has not been moved. The setting, feeling, and association have not remained intact as the urban area surrounding the structure has changed. The design, materials and workmanship have retained their original appearance. The integrity level is good and the condition of the building is good.

National Register of Historic Places Eligibility Evaluation

The property was assessed under National Register of Historic Places **Criterion A** for its potential significance as part of any historic trends or events that may have made a significant contribution to the broad patterns of our history. The building was constructed as part of the overall continuing commercial and residential development of the Echo Park area which began in the 1890s and continues to the present time. There is no significant trend or event associated with the property. **Therefore, the property does not appear to meet the criteria for significance under Criterion A: Event.**

The property was assessed under National Register of Historic Places **Criterion B** for its potential significance and association with a person of importance in national history. There is no evidence to suggest that any of the persons associated with the construction or development of the building were considered important in the history of the property or nation. None of the persons associated with the property appear to be historically significant at the level necessary to meet the criteria for National Register of Historic Places. **Therefore, the property does not appear to meet the criteria for significance under Criterion B: Person.**

The property was assessed under National Register of Historic Places **Criterion C** for its potential significance as a property which embodies the distinctive characteristics of a type, period, method of construction or style of Gothic Revival architecture, represents the work of a master architect, builder or craftsman, possesses high artistic values, or represents a significant or distinguishable entity whose components lack individual distinction. The building's style does not rise to a level of significance to qualify for the National Register of Historic Places. The building is a limited example of the Gothic Revival style. The building is not a good example of the work of a master architect or craftsman as the no persons associated with the design or construction were identified. Therefore, the building cannot be considered to represent the work of a master architect, builder or craftsman. **Therefore, the property does not appear to meet the criteria for significance under Criterion C: Architecture as a good example of Gothic Revival style architecture.**

The property was assessed under National Register of Historic Places **Criterion D** for its potential significance and its ability to convey information. The property does not yield, or may not be likely to yield, information important in prehistory or history. In order for buildings, structures, or objects to be significant under Criterion D, they need to "be, or must have been, the principal source of information." This is not the case with this property. **Therefore, the property does not appear to meet the criteria for significance under Criterion D: Information Potential.**

In summary, the property does not appear to qualify for the National Register of Historic Places under any of the above criteria. Therefore, the building is not considered to be an historic resource for the purposes of the NHPA. The property was not accessed for eligibility under the California Register or local Los Angeles Register eligibility.

Integrity Statement

In regard to the seven aspects of integrity – location, design, setting, materials, workmanship, feeling and association – the c.1928 Gothic Revival style church building on this property has retained its original location. The building has not been moved. The setting, feeling, and association have not remained intact as the urban area surrounding the structure has changed. The design, materials and workmanship have retained their original appearance. The integrity level is good and the condition of the building is good.

National Register of Historic Places Eligibility Evaluation

The property was assessed under National Register of Historic Places **Criterion A** for its potential significance as part of any historic trends or events that may have made a significant contribution to the broad patterns of our history. The building was constructed as part of the overall continuing commercial and residential development of the Echo Park area which began in the 1890s and continues to the present time. There is no significant trend or event associated with the property. **Therefore, the property does not appear to meet the criteria for significance under Criterion A: Event.**

The property was assessed under National Register of Historic Places **Criterion B** for its potential significance and association with a person of importance in national history. There is no evidence to suggest that any of the persons associated with the construction or development of the building were considered important in the history of the property or nation. None of the persons associated with the property appear to be historically significant at the level necessary to meet the criteria for National Register of Historic Places. **Therefore, the property does not appear to meet the criteria for significance under Criterion B: Person.**

The property was assessed under National Register of Historic Places **Criterion C** for its potential significance as a property which embodies the distinctive characteristics of a type, period, method of construction or style of Gothic Revival architecture, represents the work of a master architect, builder or craftsman, possesses high artistic values, or represents a significant or distinguishable entity whose components lack individual distinction. The building's style does not rise to a level of significance to qualify for the National Register of Historic Places. The building is a limited example of the Gothic Revival style. The building is not a good example of the work of a master architect or craftsman as the no persons associated with the design or construction were identified. Therefore, the building cannot be considered to represent the work of a master architect, builder or craftsman. **Therefore, the property does not appear to meet the criteria for significance under Criterion C: Architecture as a good example of Gothic Revival style architecture.**

The property was assessed under National Register of Historic Places **Criterion D** for its potential significance and its ability to convey information. The property does not yield, or may not be likely to yield, information important in prehistory or history. In order for buildings, structures, or objects to be significant under Criterion D, they need to "be, or must have been, the principal source of information." This is not the case with this property. **Therefore, the property does not appear to meet the criteria for significance under Criterion D: Information Potential.**

In summary, the property does not appear to qualify for the National Register of Historic Places under any of the above criteria. Therefore, the building is not considered to be an historic resource for the purposes of the NHPA. The property was not accessed for eligibility under the California Register or local Los Angeles Register eligibility.

Dear FCC Applicant:

As of March 1, 2008, Section 106 submissions for the FCC will not be accepted unless this cover letter is filled out and attached.

FCC091116M

Project Name: SV00336A (LA330/A-330-00)
Project Address: 1310 1/2 Liberty Street, Los Angeles, CA 90026

Based on the information provided in the FCC Form 620 and 621 please check if any of the following is applicable to your FCC undertaking:

☒	There are buildings or structures over 45 years of age within the direct/indirect area of potential effect (APE) for the project.
☐	There is an archaeological site located within the direct APE for your project.
☐	Based on research conducted by a qualified archaeologist, the proposed project area is considered moderately to highly sensitive for archaeology.

If all of the above boxes are blank, your finding for this undertaking will be no historic properties affected.

The project archaeologist acknowledges that a record search has been conducted at the appropriate California Historic Resources Information System Information Center (IC) and that the above information is true.

Archaeologist's Signature Wayne H. Bonner Date 11/13/2009

Due to the large number of FCC submittals in California, I am no longer able to provide comment on FCC projects that do not involve one of the parameters listed in the table above. Pursuant to Stipulation VII.B.2 of the *Nationwide Programmatic Agreement for Review of Effects on Historic Properties for Certain Undertakings Approved by the Federal Communications Commission* as quoted below, **your Section 106 responsibilities are therefore complete.**

> If the SHPO/THPO does not provide written notice to the Applicant that it agrees or disagrees with the Applicant's determination of no Historic Properties affected within 30 days following receipt of a complete Submission Packet, it is deemed that no Historic Properties exist within the APE or the Undertaking will have no effect on Historic Properties. The Section 106 process is then complete and the Applicant may proceed with the project, unless further processing for reasons other than Section 106 is required.

This letter pertains only to FCC projects being submitted to the SHPO for comment.

Please note that for the projects where no comments are issued, the projects will not be logged into our database and my staff will have no ability to track them.

Sincerely,

milford wayne donaldson

Milford Wayne Donaldson, FAIA
State Historic Preservation Officer

****

☐ **SHPO CONCURS WITH ELIGIBILITY DETERMINATION**
PROPERTY ADDRESS:

☐ Not eligible:

☐ Loss of integrity due to:

☐ Listed

X Eligible under Criteria A because: The candidate is a 1928 brick church significant for its role in the history of the religious and scholarly development of the adjacent Echo Park community.

X SHPO CONCURS WITH RECOMMENDED FINDING OF NO EFFECT BECAUSE:

New fiber conduit will be installed on the candidate's exterior and across the roof. Additional equipment cabinets will be installed on the same roof. Telco and electrical trenching will not be required for this upgrade.

The records search indicates that five cultural resource surveys have been conducted within the project's ½ mile APE. One National Register property, the Angelus Temple, is located 400 feet south of the candidate and two NR eligible properties, Echo Park and the Golden West Christian Church (candidate building) are in the direct APE and 500 feet south of the project area respectively.

As proposed, this project will not affect historic properties as none of the proposed additions will be a permanent part of the building's historic fabric.

P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

The building at 1931 W. Sunset Boulevard is a one-story concrete block building that was constructed in 1959 with a common, mid-century modern features. It has a rectangular plan and flat roof. Portions of the exterior are clad in brick veneer. The primary elevation faces south toward Sunset Boulevard and abuts the sidewalk. The south elevation is visually divided into two bays. The west bay consists of a concrete block wall with a decorative screen. Above the screen there are two flat signs: a round sign with a logo that reads, "MEDICAL AESTHETIC SKINOVATIONS," and a smaller rectangular sign below it that reads, "MEDSPA & WELLNESS." The east bay is clad in brick veneer with a short parapet wall that extends above the roofline. A shallow metal canopy spans the length of the bay. Above the canopy there is signage consisting of individual block letters that read "PARK SUNSET PROFESSIONAL BUILDING," and "1931." Beneath the canopy, three entrances are recessed within a single entryway. There is a single fully glazed door on the east and west walls of the entryway, and a pair of fully glazed doors on the north wall. The recessed entrance is enclosed by a metal security gate. East of the entrance there is a pair of fixed aluminum-frame windows with interior metal security bars. (See Continuation Sheet)

Period of Significance 1880-1990; 1850-1980 **Property Type** Commercial **Applicable Criteria** N/A
National Register of Historic Places

Criterion A

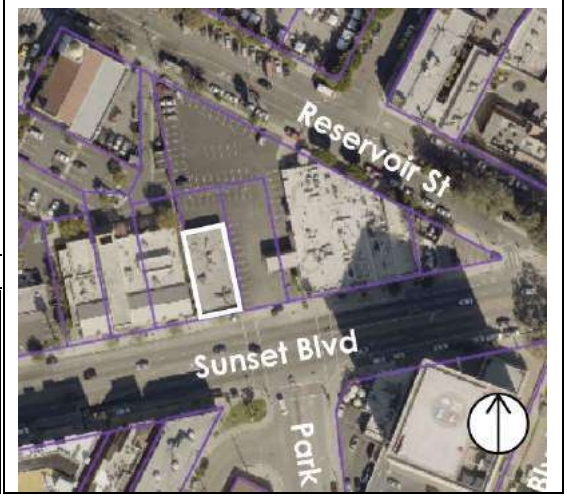
To be eligible for listing in the National Register under Criterion A, a property must have a direct association with events that have made a significant contribution to the broad patterns of our history.

The Neighborhood Commercial Development theme within the Commercial Development context examines patterns of small-scale commercial development geared toward nearby residents, such as the subject property. This development generally took place along streetcar routes and arterial streets in neighborhoods outside of downtown Los Angeles in the first decades of the twentieth century. Although the subject property is located on Sunset Boulevard, a streetcar route through Echo Park, it post-dates the period of significance for Streetcar Commercial Development, which ends 1934. The subject property is postwar infill along a commercial corridor that was already well established more than two decades prior to its construction. (See Continuation Sheet)

B11. Additional Resource Attributes: (List attributes and codes) _____
***B12. References:**
See Continuation Sheet

B13. Remarks: None

(Sketch Map with north arrow required.)



***B14. Evaluator:** Amanda Duane, GPA Consulting
***Date of Evaluation:** 11/15/2021

(This space reserved for official comments.)

P3a. Description (Continued from Page 1):

The east elevation faces the Taix and the surface parking lot. The brick veneer of the façade wraps around the corner of the east elevation, but the remainder is a concrete block wall. Openings on the east elevation consist of five square windows and three doors obscured by metal security bars. The north elevation is also a concrete block wall with four square windows obscured by metal security bars. Above the windows there is a painted sign that reads, "PARK SUNSET MEDICAL BUILDING." The west elevation abuts the Edendale Branch Library and is not visible.

***B10. Significance (Continued from Page 2):**

During the postwar period, the most notable neighborhood commercial development was occurring in the suburbs, particularly in the San Fernando Valley, as shopping centers emerged with an emphasis on parking and convenience (Prosser, 19-38) which is not reflected in the subject property. Therefore, 1931 W. Sunset Boulevard is not associated with significant trends in Commercial Development.

Within the sub-context of Public and Private Health and Medicine, the theme relevant to Criterion A is Public Healthcare/Social Medicine. Because the subject property is a private practice, it is not associated with this theme. Additionally, research did not reveal an association with healthcare or medicine within the context of African American, Jewish, Asian American or LGBTQ+ history, or the history of Women's Rights in Los Angeles. Therefore, 1931 W. Sunset Boulevard is not associated with significant trends in Public and Private Health and Medicine.

Research did not reveal any association with other events or trends; therefore, 1931 W. Sunset Boulevard does not appear to be eligible for listing in the National Register under Criterion A.

Criterion B

To be eligible for listing in the National Register under Criterion B, a property must be associated with lives of persons significant in our past. The property was constructed for Irving Friedman and was later owned by Fred Startz. Other individuals identified as being associated with the property include doctors Stanley Arbiter, Leonard B. Beller, and Howard Cowan, optometrist Denver Rickey and attorney Sheldon M. Ziff, who had their offices or practices in the subject property. Research revealed little information about these individuals, and no evidence to suggest that they would be considered significant personages within their respective fields. Therefore, 1931 W. Sunset Boulevard does not appear to be eligible for listing in the National Register under Criterion B.

Criterion C

To be eligible for listing under Criterion C, a property must embody the distinctive characteristics of a type, period, or method of construction, represent the work of a master, possess high artistic values, or represent a significant and distinguishable entity whose components may lack individual distinction.

Although the building possesses features that are indicative of its period of construction, including the horizontal canopy and concrete block screen, it is a typical example of the era that does not embody any particular architectural style. However, as a medical building, the subject property was evaluated as an example of its type under the theme of Medical Building Types within the sub-context of Public and Private Health and Medicine. The eligibility standards for this theme are included in the table below.

Medical Building Types, 1850-1980
Context: Public and Private Institutional Development, 1850-1980
Theme: Public and Private Health and Medicine, 1850-1980
Sub-theme: Medical Building Types, 1850-1980
Associated Property Type: Institutional
Eligibility Standards
• Is an early, rare, or unusual example of a medical/healthcare building type in Los Angeles • Retains association with a medical institution • Was constructed during the period of significance
Character-Defining/Associative Features
• Retains most of the essential character-defining features of its type
Integrity Considerations
• Should retain integrity of Location, Feeling, Design and Association from the period of significance

Medical Building Types, 1850-1980
• Some materials may have been removed or altered • For local HCM may have been moved for preservation purposes

Resources significant under this theme include hospitals, clinics, sanitoria, and other medical buildings, such as doctors' offices that are early, rare, or unusual examples of their type. The subject building is an unremarkable postwar medical building and there is no evidence to suggest that it is early, rare, unusual, or otherwise significant or influential.

The building was designed by the firm of Tharaldson & Wright with L.M. Nerenbaum as the engineer but research revealed little information about these individuals or their careers. This lack of information indicates they would not be considered masters within their respective fields, and with its utilitarian design and typical features, the subject building is unlikely to be an important example within a body of work.

The possession of high artistic values refers to a building's articulation of a particular concept of design so fully that it expresses an aesthetic ideal. A property eligible under this aspect of Criterion C would need to possess ornamentation and detail to lend it high artistic value, which is not the case for the subject building.

The last component of Criterion C, representing a significant and distinguishable entity whose components may lack individual distinction, is the most applicable to districts. The subject property does not appear likely to contribute to a potential historic district, due to the lack of a cohesive grouping of intact properties in the area. The surrounding buildings have various uses and differ widely in construction date, size, scale, and massing. Development is interspersed with surface parking, creating gaps along the streetwall, and when combined with the width, topography, and curved alignment of the streets at this location, there is no visual interrelationship between the buildings in the vicinity. As a result, the properties in the area are not visually, historically, or geographically unified, and do not constitute a potential historic district.

Therefore, 1931 W. Sunset Boulevard does not appear to be eligible for listing in the National Register under Criterion C.

Criterion D

Criterion D generally applies to archaeological resources, but may apply to a built resource in instances where a resource may contain important information about such topics as construction techniques or human activity. In any case, the resource must be the principal source of information. This is unlikely to be true for the subject property. Therefore, 1931 W. Sunset Boulevard does not appear to be eligible for listing in the National Register under Criterion D.

California Register of Historical Resources

As the eligibility requirements for the California Register mirror those of the National Register, the property does not appear to be eligible for listing in the California Register for the same reasons discussed above.

Los Angeles Historic-Cultural Monument

As the Los Angeles HCM designation criteria mirror those of then National and California Registers, the property does not appear to be eligible for listing as an HCM for the same reasons discussed above.

Integrity
To be eligible for listing in the National Register, California Register and for designation as an HCM, properties must retain their physical integrity from the period in which they gained significance. In the case of architecturally significant properties, the period of significance is normally the date of construction. For historically significant properties, the length of the historic associations usually measures the period of significance. As 1931 S. Sunset Boulevard is not significant under any of the national, state, or local criteria, the integrity of the building does not require examination.

Conclusion

GPA concludes that 1931 W. Sunset Boulevard does not appear to be eligible for listing in the National or California Registers, or for designation as an LA HCM due to a lack of significance. Additionally, it does not appear to contribute to a potential historic district. The recommended Status Code for the property is 6Z, ineligible for designation at the national, state, and local levels through survey evaluation. Therefore, the property is not a historical resource for the purposes of CEQA.

Subject: Report of Geotechnical Investigation
Proposed Mixed-Use Apartment Development
Taix – Sunset Site
1911 to 1931 W. Sunset Boulevard
Los Angeles, California
GPI Project No. 2914.I

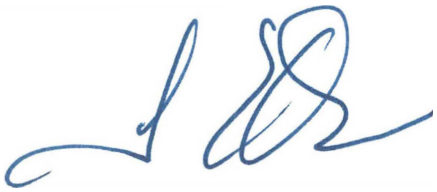
Dear Mr. Stone:

Transmitted herewith is our report of geotechnical investigation for the subject project. The report presents our evaluation of the foundation conditions at the site and recommendations for design and construction.

We are providing this report in an electronic format. Further copies of the report can be provided when required for City submittal.

We appreciate the opportunity of offering our services on this project and look forward to seeing the project through its successful completion. Feel free to call us if you have any questions regarding our report or need further assistance.

Very truly yours,
Geotechnical Professionals Inc.



James E. Harris, G.E.
Principal

1.0 INTRODUCTION

1.1 GENERAL

This report presents the results of a geotechnical investigation performed by Geotechnical Professionals Inc. (GPI) for the proposed mixed-use apartment development located at 1911 to 1931 W. Sunset Boulevard in Los Angeles, California. The site location is shown on the Site Location Map, Figure 1.

1.2 PROJECT DESCRIPTION

The proposed project will consist of a 7-story building including 1 level of below grade parking. The upper 5 stories will be apartment buildings and the ground floor will include a lobby, retail space, and parking. The building covers a footprint of approximately 32,100 square feet (sf) at the lower level parking and a footprint of approximately 36,000 sf at the ground level. At ground level, a portion of the existing restaurant and a retail space will be located within the building site at ground level. Above the retail portion, the building extends 6 levels. The below-grade portion of the building extends to near the property lines on W. Reservoir Street, the adjacent property to the west, and a portion of W. Sunset Boulevard.

The approximate proposed site configurations at street level and subterranean level (P1) are shown on the Site Plans, Figures 2 and 3, respectively. A building section is presented on Figure 4.

Based on information provided by the Project Structural Engineer, either spread footings with a slab-on-grade or a mat foundation will be used to support the building. The structure will be constructed of two levels of a concrete podium underlying 5 levels of a wood frame structure. Detailed structural loads are not known at this time. Based on our experience with similar projects, we anticipate that the maximum column loads will be on the on the order of 200 to 300 kips. If a mat foundation is to be used, we anticipated a bearing pressure ranging from approximately 300 to 600 pounds per square foot (psf). We anticipate that the foundations will be approximately 13 to 16 feet below existing site grades, based on the finish floor depths provided on the project architects plans.

Our recommendations are based upon the above structural and finish grade information. We should be notified if the actual loads and/or grades differ or change during the project design to either confirm or modify our recommendations. Also, when the project shoring and foundation plans become available, we should be provided with a copy for review and comment.

1.3 PURPOSE OF INVESTIGATION

The primary purpose of this investigation and report is to provide an evaluation of the existing geotechnical conditions at the site as they relate to the design and construction of the proposed development. More specifically, this investigation was aimed at providing geotechnical recommendations for earthwork and design of foundations.

2.0 SCOPE OF WORK

Our scope of work for this field investigation consisted of a review of published information, subsurface exploration, laboratory testing, geologic evaluations, engineering analyses, and preparation of this report.

Our field investigation consisted of three exploratory borings. The borings were drilled to depths of 41 to 71 feet below the existing grades. A description of field procedures and logs of borings are presented in Appendix A. The approximate locations of the subsurface explorations are shown on the Site Plans, Figures 2 and 3.

Laboratory soil tests were performed on selected representative samples as an aid in soil classification and to evaluate the engineering properties of the soils. The geotechnical laboratory testing program included determination of moisture content and dry density, direct shear, expansion potential, and soil corrosivity. Laboratory testing procedures and results are summarized in Appendix B.

HDR performed corrosivity testing on select soil samples provided by GPI under subcontract to GPI. Their test results and report are presented in Appendix B.

Engineering evaluations were performed to provide earthwork criteria, foundation, wall-below-grade, and slab design parameters, preliminary pavement sections, and assessment of seismic hazards. The results of our evaluations are presented in the remainder of the report.

3.0 GEOLOGY

3.1 GEOLOGIC SETTING/REGIONAL GEOLOGY

The project site is located in a geomorphic area termed the Los Angeles Basin, a generally low-lying coastal plain that stretches from the Santa Monica and San Gabriel Mountains northerly of the site, to the Pacific Ocean south and southeast of the site. The basin is underlain by a structural trough which has been filled with primarily Tertiary age marine sedimentary rocks, and locally by Pleistocene and Recent non-marine alluvial deposits. On a more regional basis, the site area is within the Peninsular Ranges Geomorphic Province, a province that stretches from the Los Angeles area to the tip of Baja California, characterized by northwest trending mountain ranges and elongate valleys, as well as northwest trending active faults, including the Newport-Inglewood fault southwest of the site.

Locally, the project site is located within the Elysian Park Hills, a series of low-moderate relief hills underlain by Late Tertiary marine sedimentary rocks assigned variously as the Puente formation by Lamar (1970), and others, and more recently an un-named shale by Dibblee (1991). The site area has been mapped by both Lamar and Dibblee within the south flowing drainage that continues to Echo Park Lake, and is shown as being underlain by recent alluvial deposits. Our borings on the site, as well as an adjacent site immediately to the south encountered bedrock at the ground surface. Either the site was graded at an earlier date and the alluvium removed, or the site area was interpreted improperly due to a lack of subsurface data. In either case, the site is underlain by bedrock and potential issues related to unconsolidated alluvium, such as liquefaction potential, are not a geologic hazard at the site. The local geologic conditions are shown on the enclosed Site Geology Map, Figure 5.

3.2 GEOLOGIC CONDITIONS

As explained above, bedrock was encountered essentially at ground surface so our geologic data from the site is not consistent with the geologic maps of Lamar (1970) and Dibblee (1991). Although the orientation of bedding was not measured in the small diameter borings, bedding was measured in a cut slope across W. Reservoir Street as discussed in our geotechnical report for the adjacent site (GPI, 2019). The measured bedding strikes slightly northwesterly and dips at low inclinations (13 to 16 degrees) to the west-southwest. As such, walls facing southwest and west may expose an out-of-slope bedding component.

4.0 SITE CONDITIONS

4.1 SURFACE CONDITIONS

The subject site is about 1.1 acre in plan, and bounded by W. Reservoir Street to the northeast, a two-story public library building and parking lot to the west, W. Sunset Boulevard to the south, and a single-story restaurant and large billboard to the west. The restaurant building and billboard is directly adjacent to the property line. The library building is about 10 feet from the property line.

The existing site is occupied by asphalt paving, a smaller single-story retail building, and the existing Taix Restaurant. The pavement at our boring locations consisted of 3 to 4 inches of asphalt concrete. There is no underlying aggregate base at the locations of 2 borings and 1.5 inches of sand over 5 inches of concrete pavement in the southern boring. The pavement is in fair to poor condition. Ground surface elevations across the existing parking lot vary from about +421 feet at the north corner to approximately +414 feet at the southern portion of the site along Sunset Boulevard based on a design survey by KPFF.

4.2 SUBSURFACE SOIL CONDITIONS

Our field investigation disclosed a subsurface profile consisting of minor amounts of undocumented fill soils overlying sedimentary bedrock. Detailed descriptions of the conditions encountered are shown on the Logs of Borings in Appendix A.

We encountered shallow undocumented fill soils to depths of approximately 5 feet or less in our exploratory borings. The fill soils consisted of silts and clays. Moisture contents of the fills were observed to generally be moist. Documentation regarding the placement of the fill soils is not available.

The underlying natural materials encountered consist of shale bedrock. The shale is very stiff to hard and very moist to wet. The bedrock materials anticipated to occur below the mat foundation exhibit very low compressibility and high strength characteristics.

4.3 GROUNDWATER AND CAVING

Groundwater was encountered in one of our borings at depths of 29 and 32 feet immediately after drilling. Historical high groundwater is not well defined in this area by the State of California (CGS, 1998) but the nearest historic high groundwater contours show a depth of 20 feet below existing grades. Based on the above information, a design groundwater depth of 20 feet below existing grade along Reservoir Street or Elev. +401 feet is appropriate for this project.

Caving was not noted in the small diameter borings performed, and is not expected to be a constraint during construction.

5.0 CONCLUSIONS AND RECOMMENDATIONS

5.1 OVERVIEW

Based on the results of our investigation, it is our opinion that from a geotechnical viewpoint it is feasible to develop the site as proposed. The proposed structure can be supported on a spread footings with a slab-on-grade or a mat foundation provided the geotechnical constraints discussed below are mitigated. The most significant geotechnical issues that will affect the design and construction of the proposed structure are as follows:

- The planned excavation for the subterranean parking levels will remove the undocumented fills and low density upper soils across the site. Details are presented in the "Earthwork" sections of this report.

- Based on groundwater encountered in the explorations at the site and directly across the street, as well as the nearest historical high groundwater depths, a design groundwater elevation of +401 feet (20 feet below existing grade along Reservoir Street) is appropriate for the project. We anticipate that the lower level of the subterranean parking will be water-proofed and designed to resist the hydrostatic pressures imposed by the design groundwater level if the lower level extend below this elevation. Detailed recommendations are given in the "Subsurface Drainage" section of this report.

- Based on limited site access, shoring will be required during excavation of the basement level. Shoring may consist of steel soldier piles placed in drilled holes and backfilled with concrete. Driven or vibrated soldier piles may not be a feasible as alternative than drilling due to the bedrock strength at depths greater than 15 feet below grade. Based on the planned depth of the excavation, the shoring will not likely need to be tied-back using earth anchors or require rakers.

- Shale is expected to be exposed in the sidewalls of the excavation for the shoring. As discussed in the geology section of this report, the bedding is expected to be dipping to the west-southwest, resulting in a small component of adversely oriented bedding. Excavations for the shoring should be observed by a GPI Geologist to determine if significant out of slope bedding is present. Our recommended lateral pressures will need to be modified if adverse bedding exists that would impose a greater lateral pressure than those provided herein for the west and southwest facing walls.

- Chemical testing of the near surface soils has been performed by HDR, and the results are presented in Appendix B. The site soils are severely corrosive to buried metal elements. If corrosion recommendations are required, a corrosion engineer such as HDR should be consulted.

Our recommendations related to the geotechnical aspects of the development of the site are presented in the subsequent sections of this report.

5.2 SEISMIC DESIGN

5.2.1 General

The site is located in a seismically active area typical of Southern California and is likely to be subjected to strong ground shaking due to earthquakes on nearby faults.

We assume the seismic design of the proposed development will be in accordance with the Los Angeles Building Code (CLABC), 2017 edition. For the 2017 CLABC, a Soil Class C may be used. The seismic code values can be obtained directly from the tables in the building code using the above values and appropriate SEAOC/OSHPD web site (seismicmaps.org). The Project Structural Engineer should determine the seismic design method.

5.2.2 Strong Ground Motion Potential

During the life of the project, the site will likely be subject to strong ground motions due to earthquakes on nearby faults. Based on the SEAOC/OSHPD website (seismicmaps.org), the site could be subjected to a peak ground acceleration (PGA_M) of 1.01g for a magnitude 6.7 earthquake. This acceleration has been computed using the mapped Maximum Considered Geometric Mean peak ground acceleration from ASCE 7-10 (ASCE, 2010) and a site coefficient (F_{PGA}) based on Site Class. The predominant earthquake magnitude was determined using a 2-percent probability of exceedance in a 50-year period, or an average return period of 2,475 years. The structural design will need to incorporate measures to mitigate the effects of strong ground motion.

5.2.3 Potential for Ground Rupture

There are no known active faults crossing or projecting through the site. The site is not located in an Alquist-Priolo Earthquake Fault Zone. Therefore, ground rupture due to faulting is considered unlikely at this site.

5.2.4 Liquefaction

Liquefaction is a phenomenon in which saturated cohesionless soils undergo a temporary loss of strength during severe ground shaking and acquire a degree of mobility sufficient to permit ground deformation. In extreme cases, the soil particles can become suspended in groundwater, resulting in the soil deposit becoming mobile and fluid-like. Liquefaction is generally considered to occur primarily in loose to medium dense deposits of saturated sandy soils. Thus, three conditions are required for liquefaction to occur: (1) a sandy soil of loose to medium density; (2) saturated conditions; and (3) rapid, large strain, cyclic loading, normally provided by earthquake motions.

The site is located within an area mapped as having a potential for soil liquefaction, as defined by the Seismic Hazards Mapping Act (Act). As defined by the Act, characteristics of the site require investigation for the potential hazard and, if a hazard exists, that its effects be mitigated. Specifically, the site is mapped within the Seismic Hazards Zone, Hollywood Quadrangle (CGS, 1999). Inclusion of a site on the hazard map does not mean that a hazard actually exists at the site. It simply means that the characteristics of the site (shallow groundwater and alluvial soil deposits) require investigation of the hazard.

As discussed in the Section 3.2, “Geologic Conditions”, of this report, alluvium at the site does not exist or has been removed during past grading. Sedimentary bedrock (shale) was encountered at depths of 5 feet or less below the existing grade. Historic high ground water is at a depth of 20 feet below existing grade. The hard shale encountered below historic groundwater is not susceptible to liquefaction.

5.2.5 Seismic Ground Subsidence

Seismic ground subsidence (not related to liquefaction induced settlements), occurs when loose, granular (sandy) soils above the groundwater are densified during strong earthquake shaking. Earthquake-induced seismic subsidence during a strong earthquake is not anticipated to adversely affect the planned project because of the planned subterranean construction and very stiff to hard or dense to very dense soils/bedrock below the planned foundations.

5.3 SUBSURFACE DRAINAGE

For the long-term operation of the building, the prevalent approach for similar projects is to waterproof and design the lower slabs and the basement walls to resist hydrostatic pressure. The reasons for this approach involve reducing exposure to environmental issues resulting in permanently pumping the groundwater. The design of the subterranean level to resist hydrostatic pressure would require a thorough waterproofing installation and a mat foundation to counteract buoyancy.

A wall backdrain system will be required for the basement walls at the base of the portion of the wall not designed to resist hydrostatic pressure. That is, if the walls are designed to resist hydrostatic pressure up to Elev. +401 feet (20 feet below grade), a perimeter drain should be installed just above this depth to collect groundwater infiltrating into the backfill from above. If a drain is not installed, all of the walls-below-grade should be designed to resist hydrostatic pressure extending up to the ground surface. Since shoring is anticipated, a rock pocket placed behind the shoring lagging may be used with the water being collected at the design groundwater level and directed to a suitable outlet.

Recommendations are presented in other sections of this report regarding the design of the spread footings with slab-on-grade, mat foundation and basement walls to resist hydrostatic pressures.

5.4 EARTHWORK

The earthwork anticipated at the project site will consist of demolition of existing improvements and pavements, clearing and grubbing, excavation for the subterranean parking, excavation of undocumented fills not removed by the excavation, subgrade preparation, and the placement and compaction of fill.

5.4.1 Clearing and Grubbing

Prior to grading, performing excavations, or constructing the proposed improvements, the areas to be developed should be stripped of vegetation and cleared of existing structures, debris, and pavements. Buried obstructions, such as footings, abandoned utilities, and tree roots should be removed from areas to be developed. Deleterious material generated during the clearing operation, including organic topsoil, should be removed from the site. If approved by the owner and regulatory agency, inert demolition debris, such as concrete and asphalt may be crushed for reuse in engineered fills outside the planned building areas in accordance with the criteria presented in the "Materials for Fill" section of this report.

If cesspools or septic systems are encountered during grading, they should be removed in their entirety. The resulting excavation should be backfilled as recommended in the "Subgrade Preparation" and "Placement and Compaction of Fill" sections of this report. As an alternative, cesspools can be backfilled with lean sand-cement slurry in accordance with City of Los Angeles Information Bulletin 2014-121. At the conclusion of the clearing operations, a representative of GPI should observe and accept the site prior to further grading.

5.4.2 Excavations

Excavations at this site will include the subterranean parking excavation, removals of undocumented fills not removed by the excavation, footing excavations, and trenching for new utility lines.

The City of Los Angeles does not permit supporting new fills, pavements or foundations on undocumented fills. Prior to placing fills or construction of the building or pavements, undocumented fills within the proposed building area and under future pavements or fills should be removed and replaced as properly compacted fill. Based on the project plans, the fill soils within the building limits are expected to be removed during the planned excavation for the subterranean parking levels. Some undocumented fill soils may remain outside the building footprint after the basement excavation is completed. Remaining undocumented fill should be overexcavated and replaced with compacted fill as outlined below.

For minor at-grade supported structures, such as screen walls, canopies, or short retaining walls, the existing fills should be removed and the footings should be underlain by competent bedrock or properly compacted fill. For pavement and hardscape outside the building, the soils within 2 feet of the existing or finished grade, whichever is lower, should be overexcavated and replaced with properly compacted fill. Localized deeper excavations

may be required. The actual depths of removals should be determined in the field during grading by a representative of GPI. Existing grades refer to the grades at our exploration locations.

Where space is available, the base of the overexcavation should extend laterally at least 5 feet beyond the footings for the at-grade structures. The Project Surveyor should accurately stake the corners of the areas to be overexcavated in the field.
Groundwater was encountered in one of our borings at depths of 29 and 32 feet below existing grade. Historical groundwater levels in the site vicinity appear to occur at a depth of 20 feet deep. The potential for wet soils and, possibly seepage, should be considered when planning the excavations required for foundations, vaults, and elevator equipment.

The sedimentary bedrock encountered in our explorations at the basement level are near or well above optimum moisture content. The earthwork contractor should evaluate the moisture content of the existing wet soils derived from the sedimentary bedrock when planning the required earthwork and soil export.

Where not removed by the aforementioned excavations, existing undocumented utility trench backfill remaining below new foundation areas should be removed and replaced as properly compacted fill. This is especially important for deeper fills such as existing sewers and storm drains. For planning purposes, removals over the utilities should extend to within 1-foot of the top of the pipe. The removal should extend laterally 1-foot beyond both sides of the pipe. The actual limits of removal will be confirmed in the field. We recommend that known utilities be shown on the grading plan.

Temporary construction excavations may be made vertically without shoring to a depth of 5 feet below the adjacent grade. For cuts up to 12 feet, the slopes should be properly shored or sloped back to at least 1:1 (horizontal to vertical) or flatter. For cuts up to 25 feet, the slopes should be properly shored or sloped back to at least 1½:1 or flatter. The inclination is measured from the top to toe of slope, and we do not recommend incorporating a vertical cut at the base of the slope. The exposed slope face should be kept moist (but not saturated) during construction to reduce local sloughing. Surcharge loads should not be permitted within a horizontal distance equal to the height of cut from the top of the excavation or 5 feet from the top of the slopes, whichever is greater, unless the cut is properly shored. Excavations that extend below an imaginary plane inclined at 45 degrees below the edge of the adjacent existing site facilities should be properly shored to maintain support of adjacent elements. Excavations and shoring systems should meet the minimum requirements given in the most current State of California Occupational Safety and Health Standards.

As discussed in the “Geology” section, the bedding in the bedrock is dipping. The anticipated excavations facing southwest and west are expected to expose shallow adverse bedding resulting in the need to design for out of slope bedding plane surcharging. As discussed in the “Retaining Structures and Shoring” section of this report, our recommended earth pressures for the northeast and east side of the excavation have been increased to take into account some contribution from adverse bedding. During the excavation, our geologist should observe the sidewalls for evidence of adverse bedding.

5.4.3 Subgrade Preparation

After removals are complete and prior to placing fills or constructing of proposed at-grade structures, the subgrade soils should be scarified to a depth of 8 inches, moisture-conditioned, and compacted to dry densities equal to at least 90 percent of the maximum dry density (95 percent for granular soils), determined in accordance with ASTM D 1557. In areas where very moist to wet soils are encountered, scarification of the subgrade may be omitted when permitted by a representative of GPI.

We recommend that the subgrade consisting of the shale below the proposed floor slab be left undisturbed in order to minimize the potential for swell.

In areas to receive pavements (outside of the structure), the top 12 inches below the pavement base should be scarified, moisture-conditioned, and compacted to a minimum of 95 percent (90 percent for cohesive soils) of the maximum dry density.

5.4.4 Material for Fill

Soils available from on-site excavations, less debris or organic matter, will be suitable for re-use in fills with the exception of fills behind retaining walls or directly beneath exterior flatwork. Retaining wall backfill and soils within 1-foot of finished grade for exterior hardscape and flatwork should consist of on-site or imported granular (containing no more than 40 percent fines – portion passing the No. 200 sieve) and relatively non-expansive (Expansion Index of 20 or less) soils.

Imported fill material should be predominately granular (containing no more than 40 percent fines - portion passing No. 200 sieve) and non-expansive (E.I. of 20 or less). Import or on-site materials used in compacted fills should not contain particles larger than 6 inches in diameter. GPI should be provided with a sample (at least 50 pounds) and notified of the location of soils proposed for import at least 72 hours in advance of importing. Each proposed import source should be sampled, tested and accepted for use prior to delivery of the soils to the site. Soils imported prior to acceptance by GPI may be rejected if not suitable.

In backfill areas where mechanical compaction of soil backfill is impractical due to space constraints, sand-cement slurry may be substituted for compacted backfill. The slurry should contain at least one sack of cement per cubic yard and have a maximum slump of 5 inches. When set, such a mix typically has the consistency of compacted soil. The use of sand cement slurry should comply with the appropriate City of Los Angeles Information Bulletin.

From a geotechnical engineering standpoint, asphalt concrete or portland cement concrete can be incorporated into fills placed outside the building areas provided that they are crushed to the consistency of aggregate base and thoroughly blended with enough soil to form a well-graded mixture (typically a 3:1 soil to debris ratio). Such material should not be placed within landscape areas. Approval from the owner and LADBS should be obtained prior to use of the inert materials.

In areas where open-graded gravel, such as pea gravel or ¾-inch crush rock, is placed, the gravel should be separated from the on-site soils with a suitable non-woven filter fabric, such as Mirafi 140N. The purpose of the filter fabric is to reduce the potential for soil particles to migrate into the void spacing of the gravel.

5.4.5 Placement and Compaction of Fills

Fill soils should be placed in horizontal lifts, moisture-conditioned, and mechanically compacted to densities equal to at least 90 percent of the maximum dry density, determined in accordance with ASTM D1557. Imported granular fill should be compacted to a relative compaction of at least 95 percent. The optimum lift thickness will depend on the compaction equipment used and can best be determined in the field. The following uncompacted lift thickness can be used as preliminary guidelines.

Plate compactors	4-6 inches
Small vibratory or static rollers (5-ton±) or track equipment	6-8 inches
Heavy loaders or vibratory rollers	8-12 inches

The maximum lift thickness should not be greater than 12 inches and each lift should be thoroughly compacted and accepted prior to subsequent lifts.

Fills consisting of the on-site silts derived from the bedrock should be placed at a moisture content of 1 to 3 percent over the optimum moisture content in order to achieve the required compaction and reduce the potential for future swelling. Imported granular fills should be placed at a moisture content of 0 to 2 percent over the optimum moisture content.

Once moisture conditioned and properly compacted, the exposed soils should not be allowed to dry out prior to covering. If exposed soils are allowed to dry out, processing and moisture conditioning will be required. A representative of GPI should confirm the moisture content of the subgrade soils immediately prior to placement of concrete or additional fill.

During backfill of excavations, the fill should be properly benched into the construction slopes as it is placed in lifts.

5.4.6 Shrinkage and Subsidence

Shrinkage is the loss of soil volume caused by compaction of fills to a higher density than before grading. Subsidence is the settlement of in-place subgrade soils caused by loads generated by large earthmoving equipment. Neither shrinkage nor subsidence is anticipated to be a major factor on the project because of the significant soil export. Actual shrinkage and subsidence will depend on the types of earthmoving equipment used and should be verified during grading.

5.4.7 Trench/Wall Backfill

Utility trench and wall backfill, consisting of the on-site materials (trenches only) or imported sand, should be mechanically compacted in lifts. Lift thickness should not exceed those values given in the "Compacted Fill" section of this report. Moisture conditioning of the on-

site soils will be required prior to re-use as backfill. Jetting or flooding of backfill materials should not be permitted. GPI should observe and test trench and wall backfills as they are placed.

In backfill areas where mechanical compaction of soil backfill is impractical due to space constraints, sand-cement slurry may be substituted for compacted backfill. The slurry should contain one sack of cement per cubic yard and have a maximum slump of 5 inches. Within building areas, the slurry should contain two sacks of cement per cubic yard.

5.4.8 Observation and Testing

A representative of GPI should observe excavations, subgrade preparation, and fill placement activities. Sufficient in-place field density tests should be performed during fill placement and in-place compaction to evaluate the overall compaction of the soils. Soils that do not meet minimum compaction requirements should be reworked and tested prior to placement of additional fill.

5.5 FOUNDATIONS

5.5.1 Foundation Type

The anticipated column loads can be supported on conventional spread footings or a mat foundation founded on the bedrock. We have provided recommendations for both type of foundations.

Footings for at-grade structures, such as screen walls or small retaining walls, should be supported on properly compacted fill or competent bedrock.

Depending on the finished floor level as compared to design groundwater level (Elev. +401 feet), buoyant forces should be considered for the mat foundation that extends below the water.

5.5.2 Mat Foundation

The proposed structure may be supported on a mat bearing on the undisturbed bedrock occurring at depths of approximately 5 feet or less below existing grades. Based on information provided by the project team, we understand that the base of the mat will be established at depths of approximately 13 to 16 feet below existing site grades.

For design of the mat foundation using a spring constant or modulus of subgrade reaction (k-value), a value of 200 pounds per cubic inch (pounds per square inch per inch of deflection) may be assumed for the bedrock and a 1-foot square loaded area. For the larger area of the mat foundation, we recommend that a reduced k-value of 50 pci be used for design.

The mat will be irregularly shaped with the longest width and length of approximately 450 feet and 500 feet in plan dimension. Based our experience with similar projects, the bearing pressure across the mat will vary from approximately 300 psf to 600 psf. The allowable bearing capacity of the mat is far greater than the anticipated design pressures.

Based on an average mat pressure of 450 psf, we estimate that the ground surface under the center portions of the loaded area having the above dimensions and the aforementioned applied pressure will settle approximately ½ inches. The outside edge of this area under the same loading conditions is expected to settle approximately ¼-inch. The outside corner of this area under the same loading conditions is expected to settle less than ¼-inch.

The static settlements assume a uniformly applied pressure and do not include the effects (stiffness) of the mat. The actual settlement of the mat will depend on the stiffness of the mat and its ability to distribute the loads. The majority of the settlements will occur as the loads are applied.

5.5.3 Spread Footings

Spread footings for the building should be supported on competent bedrock. Footings adjacent to basement walls should be deepened in order to avoid surcharging the wall. Footings should be deepened to below the 1:1 project from the bottom of the adjacent basement wall.

Footings for at-grade structures, such as screen or retaining walls, should be supported on properly compacted fill or competent bedrock.

Allowable Bearing Pressures

Based on the shear strength and elastic settlement characteristics of the on-site soils, a static allowable net bearing pressure of up to 5,000 pounds per square foot (psf) may be used for both continuous footings and/or isolated column footings. A static allowable net bearing pressure of up to 2,000 pounds per square foot (psf) may be used for both continuous footings and isolated column footings for minor structures supported at-grade on properly compacted fill.

The actual bearing pressure used may be less, such that economics and structural loads will determine the minimum width for footings as discussed below. These bearing pressures are for dead-plus-live loads, and may be increased one-third for short-term, transient, wind and seismic loading. The maximum edge pressures induced by eccentric loading or overturning moments should not be allowed to exceed these recommended values.

The actual bearing pressure used may be less, such that economics and structural loads will determine the minimum width for footings as discussed below. The maximum edge pressures induced by eccentric loading or overturning moments should not be allowed to exceed these recommended values.

Minimum Footing Width and Embedment

The following minimum footing widths and embedments are recommended for the corresponding allowable bearing pressures.

STATIC BEARING PRESSURE (psf)	MINIMUM FOOTING WIDTH (inches)	MINIMUM FOOTING* EMBEDMENT (inches)
Building Foundations on Bedrock		
5,000	72	24
4,000	60	24
3,500	48	24
3,000	36	24
2,000	24	24
Minor At-Grade Structures on Engineered Fill or Competent Fill		
2,000	24	18
1,500	18	18
1,000	15	15

* Depth to bottom of footing below lowest adjacent finish grade.

A minimum footing width and depth of 24 inches should be used even if the actual bearing pressure is less than 2,000 psf for the building footings. A minimum footing width and depth of 15 inches should be used even if the actual bearing pressure is less than 1,000 psf for minor structures.

Estimated Settlements

For the anticipated loads for buildings supported on competent bedrock, static settlement is expected to be less than 1-inch. Maximum differential static settlements between similarly loaded footings are expected to be less than ½-inch across a distance of 40 feet.

For the anticipated loads for minor structures supported on 2 feet of compacted fill, static settlement is expected to be less than ½-inch. Maximum differential static settlements are expected to be less than ¼-inch across a distance of 40 feet.

The above estimates are based on the assumption that the recommended earthwork will be performed and that the footings will be sized in accordance with our recommendations.

5.5.4 Lateral Load Resistance

Soil resistance to lateral loads will be provided by a combination of frictional resistance between the bottom of footings and underlying soils and by passive soil pressures acting against the embedded sides of the footings. For frictional resistance, a coefficient of friction of 0.30 may be used for design. In addition, an allowable lateral bearing pressure equal to an equivalent fluid weight of 300 pounds per cubic foot may be used, provided the footings are poured tight against the compacted fill or undisturbed natural soils. These values may be used in combination without reduction.

5.5.5 Foundation Concrete

Based on laboratory testing by HDR (Appendix B) soluble sulfate contents of the on-site soils were found to be 426 mg/kg (0.043 percent by weight). Based on the test results, foundation concrete should conform to the requirements outlined by ACI 318, Section 4.3 and the 2017 CLABC for negligible sulfate content.

5.5.6 Foundation Inspection

Prior to placement of concrete and steel, a representative of GPI should observe and approve foundation excavations.

5.6 RETAINING STRUCTURES AND SHORING

Basement walls, cantilever retaining walls, and temporary shoring are planned for the site. The following recommendations are provided for walls up to 15 feet tall and shoring that does not extend more than 20 feet in height. We recommend that conventionally backfilled walls be backfilled with sandy (granular) soils.

5.6.1 Basement and Retaining Walls

Active pressure may be used in the design of the subterranean walls if the total movement of the wall is sufficient to mobilize the active pressure (yielding at least ½-inch laterally in 10 feet of wall height). For cantilever walls with level, drained backfill comprised of granular soils, the magnitude of active pressures is equivalent to the pressures imposed by a fluid weighing 35 pounds per cubic foot (pcf). For cantilever walls retaining level, drained undisturbed native bedrock, the magnitude of active pressures is equivalent to the pressures imposed by a fluid weighing 40 pounds per cubic foot (pcf). For unrestrained walls supporting the northeast and east excavations (southwest and west facing cuts) with adverse bedding, the walls should be designed for an equivalent fluid pressure of 65 pcf.

At-rest pressures should be used for restrained walls that remain rigid enough to be essentially non-yielding. At-rest pressures imposed by a fluid weighing 56 pounds per cubic foot should be used for drained, existing native bedrock. For walls supporting the northeast and east excavations (southwest and west facing cut), the basement walls should be designed for an at-rest pressure of 83 pcf.

To account for seismic loads, an additional lateral earth pressure equal to 26 pcf (equivalent fluid pressure distribution) should be added to the above active pressure. If the wall is designed using the above at-rest pressure, the at-rest pressure with the seismic load may be limited to the value of active pressure with seismic load.

For undrained backfill, we recommend the above lateral pressures be increased by a hydrostatic pressure equivalent to a fluid with a density of 40 pounds per cubic foot. These undrained pressure increases reflect the potential for groundwater to rise or for infiltration of surface water. The City requires the design groundwater depth to be consistent with the

historical high determined by the State of California. For this project, the design groundwater elevation is +401 feet below existing grades if subsurface drains are installed at that level. If subsurface drains are eliminated, the hydrostatic pressure should be taken from the ground surface.

Walls subject to surcharge loads should be designed for an additional uniform lateral pressure equal to one-third and one-half the anticipated surcharge pressure for unrestrained and restrained walls, respectively. In addition to the recommended earth pressure, the upper 10 feet of the walls adjacent to the streets should be designed to resist a uniform lateral pressure of 100 pounds per square foot, acting as a result of an assumed 300 pound per square foot surcharge behind the shoring due to normal street traffic. If traffic is kept at least 10 feet from the walls, the traffic surcharge may be neglected.

Construction equipment, such as cranes, concrete trucks, or loaders supported on the ground adjacent to the walls can impose lateral surcharge loads if they are supported adjacent to the basement walls (or shoring). Therefore, surcharge effects from such equipment will need to be evaluated on a case-by-case basis and, if needed, the walls locally reinforced to support the surcharge from such loads.

The recommended pressures are based on the assumption that the supported earth will be fully drained, preventing the build-up of hydrostatic pressures. For traditional backfilled retaining walls, a drain consisting of perforated pipe and gravel wrapped in filter fabric should be used. One cubic foot of rock should be used for each lineal foot of pipe. The fabric (non-woven filter fabric, Mirafi 140N or equivalent) should be lapped at the top. We prefer pipe and gravel drains to weep holes to avoid potential for constant flow of surface water in front of the wall. For retaining walls constructed adjacent to temporary shoring, a composite geotextile drain may be used with a manifold-type collection drain at the design groundwater level. In addition, “rock-pockets” should be installed at the design groundwater level with a collection pipe extending from the “rock-pocket” to the collection system. A representative of GPI should observe and approve wall drains prior to placement of wall backfill.

As a minimum, if the walls below grade are drained, we recommend that they be damp-proofed to reduce the adverse effects of moisture intrusion into the structure. As added protection, the walls below grade should be water-proofed.

The Structural Engineer should specify the use of select, granular wall backfill on the plans for walls that are to be conventionally backfilled. Wall footings should be designed as discussed in the "Foundations" section.

5.6.2 Temporary Shoring

Where there is not sufficient space for sloped embankments, such as along the property limits, shoring will be required. Based on current plans, cantilever shoring is anticipated along all sides of the project site. One method of shoring would consist of steel soldier piles placed in drilled holes, backfilled with concrete, and wood lagging. Tie-back anchors are not anticipated for the shoring with anticipated heights of less than 15 feet.

The shoring contractor should evaluate the subsurface conditions when planning the installation methods. Because of the hard layers of shale at depths of approximately 15 to 20 feet below existing grade, driven or vibrated soldier piles may not be a feasible and an economical alternative to drilled holes. The presence of hard shale should be considered when evaluating the alternatives for soldier piles.

A GPI Geologist should observe the bottom of excavation sidewalls to assess the presence of adverse bedding.

For cantilever shoring with level backfill consisting of the on-site soils, the magnitude of active pressure is equivalent to the pressures imposed by a fluid weighing 40 pounds per cubic foot (pcf). For northeast and east basement wall, the magnitude of active pressure equivalent to the pressures imposed by a fluid weighing 63 pounds per cubic foot (pcf) should be used to account for the likely presence of adverse bedding. It should be noted that the provided lateral earth pressures assume a fully drained condition and do not include hydrostatic pressures.

Shoring subject to surcharge loads should be designed for an additional uniform lateral pressure equal to one-third and one-half the anticipated surcharge pressure for unrestrained and restrained walls, respectively. Surcharge loads may include the adjacent buildings and the billboard foundation. In addition to the recommended earth pressure, the upper 10 feet of the shoring adjacent to streets should be designed to resist a uniform lateral pressure of 100 pounds per square foot, acting as a result of an assumed 300 pound per square foot surcharge behind the shoring due to normal street traffic. If traffic is kept at least 10 feet from the shoring, the traffic surcharge may be neglected.

For design of soldier piles spaced at least two diameters on centers, the allowable lateral bearing value (passive value) of the soils below the excavation may be taken to be 600 pounds per square foot at the excavated surface, up to a maximum of 6,000 psf. To develop the full lateral value, provisions should be made to assure firm contact between the soldier piles and the undisturbed soils. The concrete placed in the soldier pile excavation below the excavated level may be a lean mix, but it should be of adequate strength to transfer the imposed loads to the surrounding soils. While not anticipated due to hard bedrock conditions, if the soldier piles are driven or vibrated into place, the design width of the soldier piles (effective pile diameter) used in calculations should be equal to the actual width of the flange of the soldier piles.

While not anticipated to be feasible, driving of soldier piles to improve production or minimize ground vibration should only allow predrilling down to the design elevation of the excavation bottom provided that a continuous flight auger is utilized to enable reversing the auger to minimize the removal of soil during the process. If soil is removed during the predrilling process, the resulting void should be backfilled with 1½ sack sand-cement slurry. The diameter of the auger used for predrilling should not exceed 80 percent of the maximum depth of the soldier pile beam section.

The frictional resistance between the soldier piles and the retained earth may be used in resisting the downward component of the anchor load. The coefficient of friction between the soldier pile and the retained earth may be taken as 0.35. This value is based on the assumption that uniform full bearing will be developed between the steel soldier beam and

the lean-mix concrete and between the lean mix concrete and the retained earth. In addition, provided the portion of the soldier piles below the excavated level is backfilled with structural concrete, the soldier piles below the excavated level may be used to resist downward loads. The frictional resistance between the concrete soldier piles and the soils below the excavated level may be taken as equal to 500 pounds per square foot.

Continuous lagging will be required between the soldier piles. Careful installation of the lagging will be necessary to achieve bearing against the retained earth. We recommend that the voids between the lagging and retained earth be backfilled with a lean-mix sand-cement slurry prior to continuing the excavation deeper. The soldier piles should be designed for the full anticipated lateral pressure. However, the pressure on the lagging will be less because of arching of the soils between piles. We recommend that the lagging be designed for the recommended earth pressure but limited to a maximum value of 400 pounds per square foot, provided the soldier beam spacing is 8 feet or less.

It is difficult to accurately predict the amount of deflection of the shored embankment. It should be realized, however, that some deflection will occur. Adjacent to city right-of-way, the shoring should be designed to limit deflection to 1-inch. If greater deflection occurs during construction, additional bracing may be necessary. In areas where less deflection is desired, such as adjacent to existing settlement sensitive improvements, the shoring should be designed for higher lateral earth pressures. We recommend limiting the lateral deflection of shoring adjacent to any buildings to ½-inch.

While not anticipated at this project, driven/vibrated soldier piles should be limited to areas beyond 20 feet from existing buildings, and to a greater distance where adjacent structures appear to be sensitive to vibration or settlement. Ground vibrations could be monitored when driving/vibrating soldier piles adjacent to sensitive structures. A seismograph should be used to measure peak particle velocities (PPV) at the ground surface of the structures of concern. We suggest a maximum allowable PPV of 0.5 inches per second be used as a threshold value unless a lower value is required by the adjacent property owners. Measures should be taken to reduce vibrations if PPV limits are exceeded. Such measures could include altering the predrilling methods or changing to the installation of the soldier piles in a drilled and grouted hole.

We recommend performing a detailed survey of the improvements to be supported above the planned shoring prior to and during the shoring installation. The survey should include topographic data and a video account of the condition of the existing improvements, including cracks or signs of distress. During construction, the monitoring should consist of periodic surveying of the lateral and vertical locations of the tops of the soldier piles. We suggest weekly readings during the excavation and for the first three weeks after achieving the bottom of the excavation. After that time, the readings should be performed every other week until the completion of the basement walls.

5.7 CONCRETE FLOOR SLABS

Although not anticipated for the subterranean parking level, a moisture vapor retarder should be placed under slabs that are to be covered with moisture-sensitive floor coverings (parquet, vinyl, tile, etc.). Polyolefin in 15-mil thickness should be covered by a layer of clean sand (less than 5 percent by weight passing the No. 200 sieve) having a minimum

thickness of 2 inches. Based on our explorations and laboratory testing, the soils at the site are not suitable for this purpose. The function of the sand layer is to protect the vapor retarder during construction and to aid in the uniform curing of the concrete. This layer should be nominally compacted using light equipment. The sand placed over the vapor retarder should only be slightly moist. If the sand gets wet (for example as a result of rainfall or excessive moistening) it must be allowed to dry prior to placing concrete. Care should be taken to avoid infiltration of water into the sand layer after placement of the concrete slab, such as at slab cut-outs and other exposures.

It should be noted that the material used as a vapor retarder is only one of several factors affecting the prevention of moisture accumulation under floor coverings. Other factors include maintaining a low water-cement ratio for the concrete used for the floor slab, effective sealing of joints and edges (particularly at pipe penetrations) as well as excess moisture in the concrete. The manufacturer of the floor coverings should be consulted for establishing acceptable criteria for the condition of the floor surface prior to placing moisture-sensitive floor coverings.

5.8 CORROSION

Soil corrosivity testing was performed by HDR under subcontract to GPI. The corrosivity test results are presented in Appendix B. The on-site soils should be considered severely corrosive to buried metals. If additional corrosion consultation is required, a corrosion engineer such as HDR should be consulted.

5.9 EXTERIOR CONCRETE AND MASONRY FLATWORK

Exterior concrete and masonry flatwork should be supported on imported non-expansive compacted fill. The use of clayey soils or soils derived from the on-site shales within the upper 24 inches of exterior flatwork subgrade is not recommended. Prior to placement of concrete, the subgrade should be prepared as recommended in “Subgrade Preparation” section.

5.10 STORMWATER INFILTRATION

In accordance with the requirements of the City of Los Angeles, stormwater infiltration in soils retained by basements or retaining walls is not permitted. To achieve this requirement, infiltration below the bottom of the finish floor or adjacent to basement walls would be required. The materials occurring at this depth consist of fine-grained bedrock, not suitable for infiltration. Therefore, we recommend that stormwater infiltration at the site be avoided.

5.11 PAVED AREAS

Preliminary pavement design has been based on an assumed R-value of 10. The California Division of Highways Design Method was used for design of the recommended preliminary pavement sections. These recommendations are based on the assumption that the pavement subgrades will consist of the existing soils. The subgrade soil conditions will need to be confirmed at the conclusion of rough grading.

PAVEMENT AREA	TRAFFIC INDEX	SECTION THICKNESS (inches)	
		ASPHALT/PORTLAND CONCRETE	AGGREGATE BASE COURSE
Asphalt Concrete			
Automobile Parking	4.0	3.0	6
Automobile Drives	5.0	3.0	9
Truck Drives	6.0	3.5	13
Portland Cement Concrete			
Automobile Parking	4.0	6.5	4
Automobile Drives	5.0	6.5	4
Truck Drives	6.0	7.0	4

The pavement subgrade underlying the aggregate base should be properly prepared and compacted in accordance with the recommendations outlined under "Subgrade Preparation".

The pavement base course should be compacted to at least 95 percent of the maximum dry density (ASTM D 1557). Aggregate base should conform to the requirements of Section 26 of the California Department of Transportation Standard Specifications for Class II aggregate base (three-quarter-inch maximum) or Section 200-2 of the Standard Specifications for Public Works Construction (Green Book) for untreated base materials (except Processed Miscellaneous Base).

The above recommendations are based on the assumption that the base course will be properly drained. The design of paved areas should incorporate measures to prevent moisture build-up within the base course and subgrade, which can otherwise lead to premature pavement failure. For example, curbing adjacent to landscaped areas should be deep enough to act as a barrier to infiltration of irrigation water into the adjacent base course.

5.12 SURFACE DRAINAGE

Positive surface gradients should be provided adjacent to structures so as to direct surface water run-off and roof drainage away from foundations and slabs toward suitable discharge facilities. Long-term ponding of surface water should not be allowed on pavements or adjacent to buildings.

5.13 GEOTECHNICAL OBSERVATION AND TESTING

We recommend that a representative of GPI observe earthwork and shoring installation during construction to confirm that the recommendations provided in our report are applicable during construction. The earthwork activities include grading, compaction of fills, subgrade preparation, pavement construction and foundation excavations. If conditions are different than expected, we should be afforded the opportunity to provide an alternate recommendation based on the actual conditions encountered.

6.0 LIMITATIONS

This report, exploration logs, and other materials resulting from GPI's efforts were prepared exclusively for use by Holland Acquisition Co., LLC and their consultants in designing the proposed development. The report is not intended to be suitable for reuse on extensions or modifications of the project or for use on project other than the currently proposed development as it may not contain sufficient or appropriate information for such uses.

Soil deposits may vary in type, strength, and many other important properties between points of exploration due to non-uniformity of the geologic formations or to man-made cut and fill operations. While we cannot evaluate the consistency of the properties of materials in areas not explored, the conclusions drawn in this report are based on the assumption that the data obtained in the field and laboratory are reasonably representative of field conditions and are conducive to interpolation and extrapolation.

Furthermore, our recommendations were developed with the assumption that a proper level of field observation and construction review will be provided by GPI during grading, excavation, and foundation construction. If field conditions during construction appear to be different than is indicated in this report, we should be notified immediately so that we may assess the impact of such conditions on our recommendations. If others perform construction phase services, the client and new geotechnical firm must accept full responsibility for all geotechnical aspects of the project, including this report.

Our investigation and evaluations were performed using generally accepted engineering approaches and principles available at this time and the degree of care and skill ordinarily exercised under similar circumstances by reputable geotechnical engineers practicing in this area. No other representation, either expressed or implied, is included or intended in our report.

Respectfully submitted,

APPENDIX A

APPENDIX A

EXPLORATORY BORINGS

The subsurface conditions at the site were investigated by drilling and sampling three exploratory borings. The borings were advanced to depths of 41 to 71 feet below the existing ground surface. The exploration locations are shown on the Site Plans, Figures 2 and 3.

The borings were drilled using truck-mounted hollow-stem auger equipment. Relatively undisturbed samples were obtained using a brass-ring lined sampler (ASTM D 3550). The brass-rings have an inside diameter of 2.42 inches. The ring samples were driven into the soil by a 140-pound hammer dropping 30 inches. The number of blows needed to drive the sampler into the soil was recorded as the penetration resistance.

At selected locations, disturbed samples were obtained using a split-spoon sampler by means of the Standard Penetration Test (SPT, ASTM D 6066). The spoon sampler was driven into the soil by a 140-pound hammer dropping 30 inches, employing two turns of rope around the cathead. After an initial seating drive of 6 inches, the number of blows needed to drive the sampler into the soil a depth of 12 inches was recorded as the penetration resistance. These values are the raw uncorrected blowcounts.

The field exploration for the investigation was performed under the continuous technical supervision of GPI's representative, who visually inspected the site, maintained detailed logs of the borings, classified the soils encountered, and obtained relatively undisturbed samples for examination and laboratory testing. The soils encountered in the boring were classified in the field and through further examination in the laboratory in accordance with the Unified Soils Classification System. Detailed logs of the borings are presented in Figures A-1 to A-3 in this appendix.

The boring and test pit locations were laid out in the field by measuring from existing features at the site. Upon completion, the borings were backfilled with the excavated soil cuttings. The ground surface elevations at the boring locations were estimated from a design survey plan prepared by KPFF and should be considered approximate.

LABORATORY TESTS

INTRODUCTION

Representative undisturbed soil samples, tube samples and bulk samples were carefully packaged in the field and sealed to prevent moisture loss. The samples were then transported to our Cypress office for examination and testing assignments. Laboratory tests were performed on selected representative samples as an aid in classifying the soils and to evaluate the physical properties of the soils affecting foundation design and construction procedures. Detailed descriptions of the laboratory tests are presented below under the appropriate test headings. Test results are presented in the figures that follow.

MOISTURE CONTENT AND DRY DENSITY

Moisture content and dry density were determined from a number of the ring samples from the borings. The samples were first trimmed to obtain volume and wet weight and then were dried in accordance with ASTM D 2216. After drying, the weight of each sample was measured, and moisture content and dry density were calculated. Moisture content and dry density values are presented on the boring logs in Appendix A.

DIRECT SHEAR

Direct shear tests were performed on undisturbed samples in accordance with ASTM D 3080. The test specimens were placed in the shear machine, and a normal load comparable to the in-situ overburden stress was applied. The samples were inundated, allowed to consolidate, and then were sheared to failure. The tests were repeated on additional test specimens under increased normal loads. Shear stress and sample deformation were monitored throughout the tests. The results of the direct shear tests are presented in Figures B-1 and B-2.

EXPANSION INDEX

An expansion test was performed in accordance with ASTM D 4829 on a sample to assess the expansion potential of the on-site soils. The results of the test are summarized below.

BORING N0.	DEPTH (ft)	SOIL DESCRIPTION	EXPANSION INDEX
B-2	0 - 5	Silt (ML)	90

CORROSIVITY

Soil corrosivity testing was performed by HDR on a soil sample provided by GPI. The test results and corrosion protection recommendations are summarized in this Appendix.

WATER USE CALCULATION TABLE

1. EXECUTIVE SUMMARY

1.1. PROJECT DESCRIPTION

The project consists of a new, one hundred seventy (170) unit multi-family complex located at 1911 Sunset Blvd. in Los Angeles, California. The project includes (13) studio, (13) Jr. one-bedroom, (100) one-bedroom, (36) two-bedroom, (4) three-bedroom units, and (4) town homes with 13,000 sf of commercial area over two (2) levels of subterranean garage on Levels P1 & P2. The project is generally described in the architectural set drawing package provided to the Consultant as prepared by TSM Architects and dated June 18, 2020. The report sets forth the energy and water performance requirements for the project and the simulation process utilized, the simulation results, systems, and equipment modeled to achieve the performance results. The systems and equipment modeled have been selected to meet the minimum energy requirements committed under the project's entitlement requirements and related programs and codes.

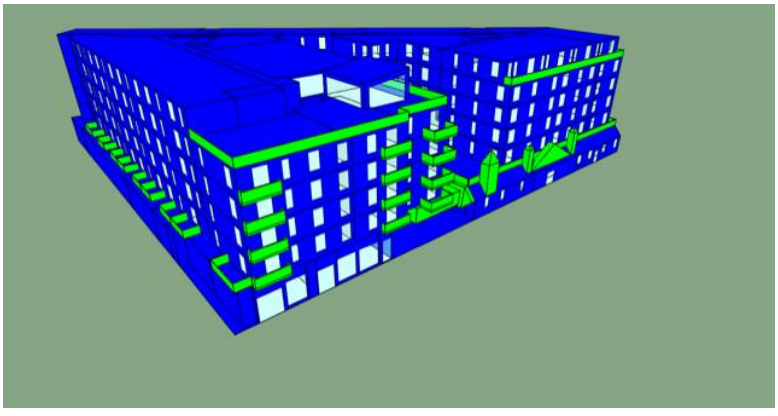
1.2. PROJECT TARGETS

The project has identified the following energy targets to ensure compliance with funding and code requirements:

- **21155.1 CEQA exemption for transit priority project subsection**: The buildings in the transit priority project are 15 percent more energy efficiency than required by Chapter 6 of the Title 24 of the California Code of Regulations and the buildings and landscaping are designed to achieve 25 percent less water usage than the average household in the region. The project design exceeds both objectives above.

1.3. ENERGY SIMULATION PROCESS

The CBECC Com software platform was selected for demonstrating energy performance under the 2016 Building Energy Efficiency Standards (2016 Title 24, Part 6). The software links CBECC-Com and EnergyPlus simulation engines for compliance runs and is approved by the California Energy Commission (CEC) for use under the 2016 Building Energy Efficiency Standards. The building geometry was modeled within IES VE based on the approved architectural bid set drawing package provided to the Consultant by the Client as prepared by TSM Architects and dated June 18, 2020. The energy model was developed under the Performance Method. Internal loads and schedules were specified in the model as dictated by the simulation protocol.



2. ENERGY EFFICIENCY

2.1. ENERGY EFFICIENCY MEASURES

The preliminary energy model for the building was developed basing our initial assumptions on the referenced project drawings and specifications and Prescriptive criteria outlined in 2016 Title 24, Part 6 Building Energy Efficiency Standards for high-rise residential buildings, when not defined. This prescriptive baseline is what the energy performance of the project will be ultimately compared against when we look at the percentage of time dependent value (TDV) energy savings over the Standard. The "Proposed Target" systems were used to generate the initial energy simulation results in full report in Appendices.

Building Envelope

- **External Wall (Wood framed) [U-factor]:** 0.065 (2x6, 16" O.C. R-21 cavity ins.)
- **External Wall (Metal framed) [U-factor]:** 0.149 (2x6, 16"O.C. R-19 cavity plus two layers of gypsum board on interior surface of wall)
- **External Wall (Concrete) [U-factor]:** 0.549 (140 lb/ft3 - 8in.)
- **Roof (Wood framed rafter) [U-factor]:** 0.034 (2x12 16" O.C. R-30 cavity ins.)
- **Roof (Wood framed rafter) [aged reflectance / aged emittance]:** 0.85 / 0.85 (must be CRRC Certified Cool Roofing)
- **Floor / Soffits (Wood Framed):** 0.091 (2x6 16" O.C. R-13 cavity ins.)

Envelope - Glazing

- **Window to Wall Ratio (WWR) [%]:** 21.5%
- **Fixed Window (NFRC) [U-factor / SHGC / Vis Trans]:** 0.28 / 0.22 / 0.71
- **Curtainwall or Storefront (NFRC) [U-factor / SHGC / Vis Trans]:** 0.41 / 0.22 / 0.50

Lighting

- **High-efficacy, LED lamp types for common areas:** Target lighting power density reduction in non-residential areas of 17.6% with LED lighting and T24 controls.

HVAC - Space Heating and Cooling

- **High-efficiency 16 SEER/HSPF=9.5 split system heat pumps for heating, ventilating, and air-conditioning (HVAC):** Split system heat pumps have one outdoor unit connected to one indoor fan coil units (FCU). Seasonal energy efficiency ratio (SEER) represents the "average" efficiency of HVAC equipment. By increasing this value over typical code-minimum efficiencies, the equipment provides the same amount of heating and cooling while using less electricity to operate it. Providing individual systems for each apartment allows the system to be powered from the tenant's electric meter, which tends to encourage more responsible use and lower energy consumption.

Domestic Water Heating

- **central hot water systems: Central** Gas water heaters have a 95% thermal efficiency and a 50% solar thermal fraction to achieve a 36.0% TDV energy savings versus baseline.
- **High-efficiency water fixtures:** Using water-efficient fixtures inherently uses less hot water, which reduces the amount of water being heated and overall energy consumption.

2.2. HVAC EQUIPMENT SIZING AND SELECTION

The residential heating and cooling loads were auto-sized per apartment unit and the HVAC systems were assigned based on assignments in the architectural bid set drawing package.

Table 1 - HVAC System selection and assignment

Space	Indoor Fan coil	Outdoor Heat Pump	Cooling				Heating		Fan	
			Net capacity (kBtuh)	Sensible capacity (kBtuh)	SEER	EER	Net Capacity (kBtuh)	HSPF	Supply air (cfm)	Fan power (HP)
Standard-Res Units	Performance Spec	Performance Spec	Auto-size	Auto-size	16.0	13.0	Auto-size	9.5	400/T	AS
Amenity	Performance Spec	Performance Spec	Auto-size	Auto-size	16.0	13.0	Auto-size	9.5	400/T	AS

NOTE:
All corridors all buildings are mechanically ventilated, and not directly conditioned.
All split system heat pumps are AHRI certified. Performance data retrieved from AHRI product rating certificate.
Occupancy density for all spaces were assumed to be equal to what is prescribed by code unless otherwise mentioned.

2.3. ENERGY EFFICIENCY UPDATES REQUIRED

The bullet points below are the updates that are required to be made to the model to achieve the compliance total.

- Update and Improve HVAC split system heat pumps performance to achieve SEER=16 & HSPF=9.5 or greater for all residential units as well as units serving amenity areas.
- Update and Improve window performance for residential units of U-factor=0.28 and SHGC=0.22 for all residential windows and NFRC certificates.
- Update and improve storefront window performance for retail and lobby and other areas with storefront glazing to U-factor=0.41 and SHGC=0.22 with CMA NFRC certificates.
- Update Metal framed wall assemblies to be a maximum U-factor=0.151 or less on exterior walls which is a Mandatory Measure in section 120.7 of Energy Code.

2.4. ENERGY SAVINGS SUMMARY

Once the energy simulation models were completed based on the Architectural Set drawings, a comparative analysis was done to determine the energy and water performance relative to the Project Energy Targets above.

The performance of the current proposed design energy model (in kBtu/ sq.ft TDV) anticipates using 17.3% less energy than Title 24-2016 energy code requirements for the building. Refer to the Building Energy Analysis Report below to see additional details about the result by each energy end-use.

3. WATER EFFICIENCY

3.1. WATER EFFICIENCY MEASURES

The water calculation table was developed based on the projected plumbing water fixtures that is anticipated per architectural plans. It was compared against the average regional water use in Gallons Per Capita Per Day of 131 gallons as stated in the Metropolitan Water District *Water Tomorrow Annual Report to the California State Legislature, Covering Fiscal Year July 2018 – June 2019*. This baseline is multiplied by 2.42 people per unit (170 units) to determine the average daily water use baseline per residential unit, which is 317 gallons per unit per day.

The projected water fixture flow rates based on City of LA Green Building requirements and water conservation ordinances will be met as shown below. Other elements are calculated using accepted industry practice such as for landscape irrigation areas of 3,413 sf potable water use was calculated with conservative figures using the LEED water calculator and derived a daily rate of 164 gallons. The plumbing fixture flow rates are as follows and are based on the 2020 City of Los Angeles GRN 16 form for maximum plumbing fixture flow rates:

- **Showerheads:** 1.8 GPM (gallons per minute)
- **Lavatory faucets:** 1.2 GPM
- **Kitchen faucets:** 1.5 GPM
- **Tank water closets (toilets):** 1.0 GPF (gallons per flush)
- **Clothes washers:** Energy Star certified, 5.1 WF (water factor)
- **Dishwashers:** Energy Star certified, 4 GPC (gallons per cycle)

3.2. WATER SAVINGS SUMMARY

Once the water table calculations were completed based on projected plumbing water fixture selections, a comparative analysis was done to determine the water consumption relative to the regional average household water use. The savings of the current proposed water plumbing fixtures calculations (in gallons) results in using 73.9% less water than the regional average household water use. Refer to Water Use Calculation Table.

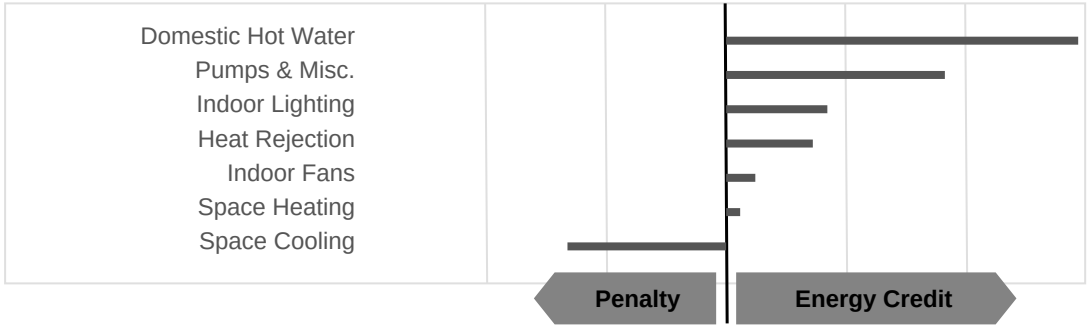
C. PRIORITY PLAN CHECK/ INSPECTION ITEMS (in order of highest to lowest TDV energy savings)

1st	Domestic Hot Water: Check mechanical
2nd	Pumps & Misc.: Check mechanical
3rd	Indoor Lighting: Check lighting
4th	Heat Rejection: Check envelope and mechanical
5th	Indoor Fans: Check envelope and mechanical
6th	Space Heating: Check envelope and mechanical
7th	Space Cooling: Check envelope and mechanical

Compliance Margin By Energy Component (from Table B column 4)



D. EXCEPTIONAL CONDITIONS

The aged solar reflectance and aged thermal emittance must be listed in the Cool Roof Rating Council database of certified products. For projects where initial reflectance is used, the initial reflectance must be listed, and the aged reflectance is calculated by the software program and used in the compliance model.

This project includes Domestic Hot Water in the analysis. Please verify that Domestic Hot Water is included in the design for the permitted scope of work.

E. HERS VERIFICATION

DOCUMENTATION AUTHOR'S DECLARATION STATEMENT	**§ 10-103**
I certify that this Certificate of Compliance documentation is accurate and complete.	
Documentation Author Name: Jason Lorcher Company: Green Dinosaur	Signature:
Address: 8695 Washington Blvd	Signature Date: 06/18/2020
City/State/Zip: Culver City CA 90232	CEA Identification (If applicable): NR16-15-20004
Phone: 2134553311	

RESPONSIBLE PERSON'S DECLARATION STATEMENT

I certify the following under penalty of perjury, under the laws of the State of California:

1	I hereby affirm that I am eligible under the provisions of Division 3 of the Business and Professions Code to sign this document as the person responsible for its preparation; and that I am licensed in the State of California as a civil engineer, mechanical engineer, electrical engineer, or I am a licensed architect.
2	I affirm that I am eligible under the provisions of Division 3 of the Business and Professions Code by section 5537.2 or 6737.3 to sign this document as the person responsible for its preparation; and that I am a licensed contractor performing this work.
3	I affirm that I am eligible under Division 3 of the Business and Professions Code to sign this document because it pertains to a structure or type of work described as exempt pursuant to Business and Professions Code Sections 5537, 5538 and 6737.1.

WATER USE CALCULATION TABLE

FULL REPORT ON FOLLOWING PAGES

6/24/2020
Echo Park - Taix Square

Water Use Calculation Table

Fixture Type	Flow Rate* (gpm or gpf)		Duration (min or # flush)		Daily Uses		Occupants		Gallons Per Day
Residential Water Use									
Showerheads	1.8	x	8	x	1	x	411	=	5918.4
Lavatory faucets	1.2	x	0.25	x	5	x	411	=	616.5
Kitchen faucets	1.5	x	4	x	1	x	411	=	2466.0
Tank water closets (M)	1.28	x	1	x	5	x	205	=	1312.0
Tank water closets (F)	1.28	x	1	x	5	x	206	=	1318.4
							Subtotal	=	11631.3
Clotheswashers (gal/person-day)**	5.1						**411**	=	2096.1
Dishwashers (gal/person-day)***	0.43						**411**	=	176.7
Potable Water Irrigation (daily) ****								=	164.0

Total Daily Baseline Water Use (BWU) in Gallons Per Day	=	**14068.1**
Average use per Household per Day = 14,068/170	=	**82.8**

Current Water Use per Multi-Family Household (MWD 2018/19 Annual Report Gallons Per Capita Per Day of 131 x estimate of 2.42 occupants per multi-family residential unit)	**317**
Water Use per Unit per Day (inc. appliances & irrigation)	**82.8**
Percent Reduction from MWD Baseline	**73.9%**

Assumptions

`- 170 units, 411 occupants ~2.42 occupants/unit According to the City of Los Angeles Department of City Planning, the most recent estimated household size for multi-family housing units in the City of Los Angeles area is 2.42 persons per unit. Source: Jack Tsao, Data Analyst II, Los Angeles Department of City Planning, July 31, 2019.

* Flow rates are the maximum allowed under City of Los Angeles Green Building Code (Form GRN 16).

** Clothes Washer assumed in each unit. Los Angeles Green Building Code requires Energy Star certified units. Typical Energy Star unit = 3.2 WF (Water Factor) = 5.08 gal per person per day.

*** Dishwasher assumed in each unit. Los Angeles Green Building Code required Energy Star certified units. Typical Energy Star unit = 4 GPC (Gallons per Cycle) = 0.43 per person per day.

****irrigation potable water was estimated by using LEED v4 at 3,413 sf and assumed to be native landscaping with a daily potable water gallons rate shown above (grey water expected to make up if additional irrigation is needed pending final landscaping designs.

Off-road Equipment -

Grading - Assumes 45,000 cy of exported soil with 25% soils swell

Demolition - Assumes 7,816 cubic yards of building material demolished @ 800 lb/CY and 25,000 sf of asphalt parking lot @ 6" demolished @ 900 lb/CY

Trips and VMT - Demolition assumes 8,510 CY of material, including 7,816 CY of building material and 694 CY of concrete and asphalt parking lot, all exported

Vehicle Trips - Crain & Associates trip generation estimates

Woodstoves - Developer information

Construction Off-road Equipment Mitigation - Assumes SCAQMD Rule 403 control efficiencies

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use - Developer information

Construction Phase - Developer information

Off-road Equipment -

Off-road Equipment -

Grading - Assumes 45,000 cy of exported soil with 25% soils swell

Demolition - Assumes 7,816 cubic yards of building material demolished @ 800 lb/CY and 25,000 sf of asphalt parking lot @ 6" demolished @ 900 lb/CY

Trips and VMT - Demolition assumes 8,510 CY of material, including 7,816 CY of building material and 694 CY of concrete and asphalt parking lot, all exported

Vehicle Trips - Crain & Associates trip generation estimates

Woodstoves - Developer information

Construction Off-road Equipment Mitigation - Assumes SCAQMD Rule 403 control efficiencies

Los Angeles-South Coast County, Winter

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Enclosed Parking with Elevator	220.00	Space	0.00	88,000.00	0
Apartments Mid Rise	170.00	Dwelling Unit	0.90	164,610.00	486
Strip Mall	13.00	1000sqft	0.11	13,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.2	**Precipitation Freq (Days)**	33
Climate Zone	11			**Operational Year**	2022
Utility Company	Los Angeles Department of Water & Power				
CO2 Intensity (lb/MWhr)	1227.89	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use - Developer information

Construction Phase - Developer information

Off-road Equipment -

Off-road Equipment -

Grading - Assumes 45,000 cy of exported soil with 25% soils swell

Demolition - Assumes 7,816 cubic yards of building material demolished @ 800 lb/CY and 25,000 sf of asphalt parking lot @ 6" demolished @ 900 lb/CY

Trips and VMT - Demolition assumes 8,510 CY of material, including 7,816 CY of building material and 694 CY of concrete and asphalt parking lot, all exported

Vehicle Trips - Crain & Associates trip generation estimates

Woodstoves - Developer information

Construction Off-road Equipment Mitigation - Assumes SCAQMD Rule 403 control efficiencies

INTRODUCTION

Crain & Associates has prepared this transportation impact study to assess the potential traffic impacts of the 1911 Sunset Boulevard mixed-use project (the "Project"), a proposed six-story residential mixed-use building. The proposed residential component of the Project would consist of up to 170 residential dwelling units. The proposed commercial component of the Project would consist of approximately up to 13,000 square feet of ground-floor commercial retail space. The Project site is presently occupied by an 18,000 square-foot quality restaurant and 4,085 square-foot medical office building. These existing uses would be removed in conjunction with development of the Project.

The Project is located along the north side of Sunset Boulevard, opposite Park Avenue at 1911-1931 W. Sunset Boulevard and 1910-2018 W. Reservoir Street, in the Silver Lake - Echo Park - Elysian Valley Community Plan area of the City of Los Angeles (the "site"). The site is generally bounded by Reservoir Street to the north, Sunset Boulevard to the south, a restaurant to the east, and a public library and church to the west. Project parking would be provided on-site on the ground level and two subterranean parking levels. All Project access/egress would be via the existing driveway that serves the site and functions as the north leg of the signalized intersection of Park Avenue & Sunset Boulevard. As part of the Project, the existing site driveway intersecting the south side of Reservoir Street, just west of Liberty Street, would be eliminated (it is currently non-functional). The location of the Project site is shown in Figure 1, Project Site Vicinity and Study Intersections.

This analysis was prepared in accordance with the assumptions, methodologies, and procedures outlined in the City of Los Angeles Department of Transportation ("LADOT")

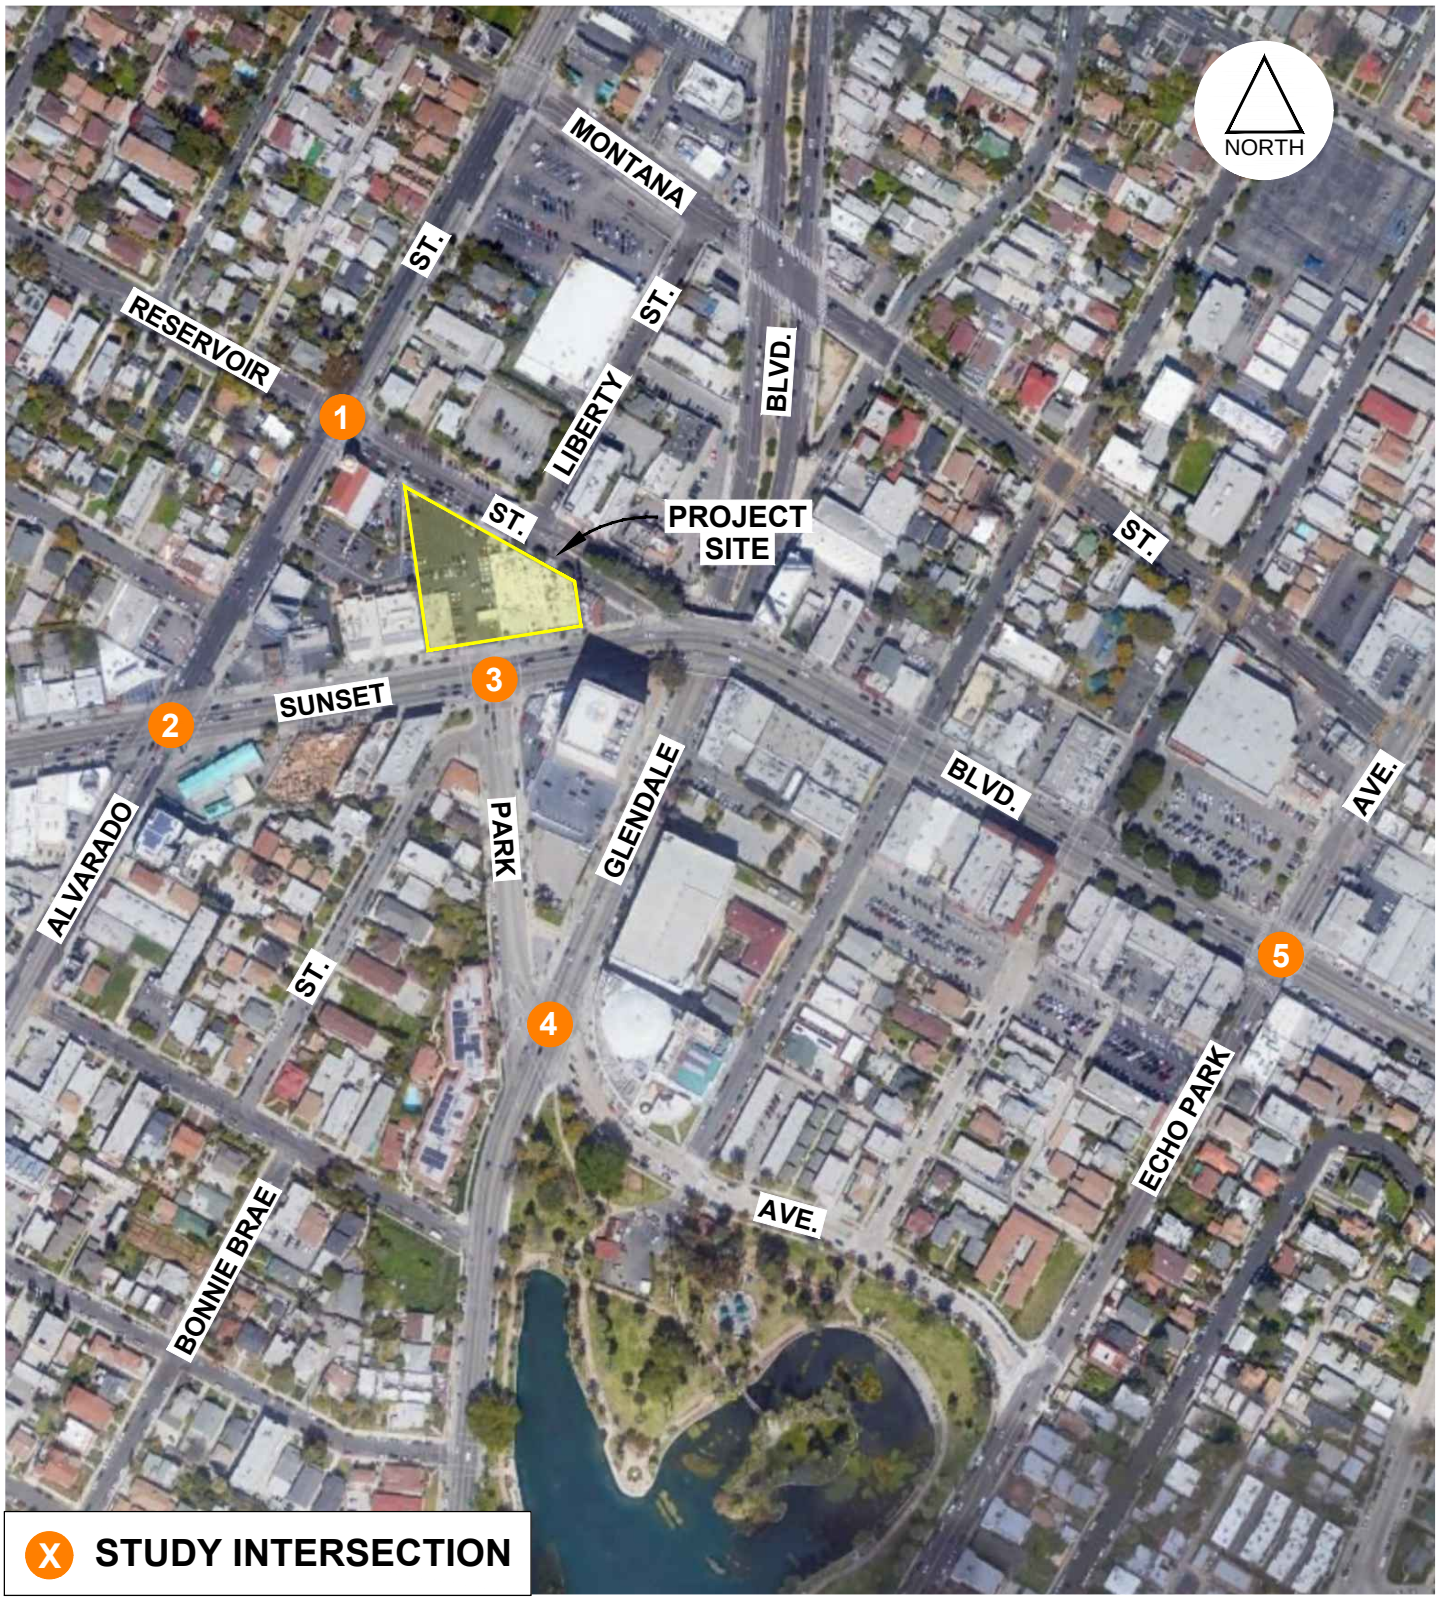

FIGURE 1

Transportation Impact Study Guidelines (December 2016). The analysis is also consistent with the guidelines in the Congestion Management Program (CMP) for Los Angeles County. The scope of work contained in this report was presented to and approved by the LADOT in a Transportation Impact Study Memorandum of Understanding (MOU), signed and approved on July 3, 2019 (Appendix D). The MOU outlined the preparation of a detailed analysis of existing (2019) and future (2023) traffic conditions, during the weekday AM and PM peak hours, at the five signalized intersections near the Project site expected to experience the most substantial Project-related traffic impacts. The Project study area contains the following five study intersections, which are also depicted in Figure 1:

Study Intersections

1. Alvarado Street & Reservoir Street
2. Alvarado Street & Sunset Boulevard
3. Park Avenue & Sunset Boulevard
4. Park Avenue & Glendale Boulevard
5. Echo Park Avenue & Sunset Boulevard

The following traffic conditions have been analyzed: Existing (2019) traffic volumes, Existing (2019) Plus Project traffic volumes, Future (2023) Without Project traffic volumes, and Future (2023) With Project traffic volumes. The analyses of future (2023) conditions included cumulative traffic attributable to ambient growth and related projects within the Project study area.

PROJECT DESCRIPTION

Under consideration is the 1911 Sunset Boulevard mixed-use project (the "Project") to be located on an approximately 1.01-acre parcel along the north side of Sunset Boulevard, opposite Park Avenue, in the Silver Lake - Echo Park - Elysian Valley Community Plan area of the City of Los Angeles (the "City"). The site is generally bounded by Reservoir Street to the north, Sunset Boulevard to the south, a restaurant to the east, and a public library and church to the west. The existing on-site uses consist of approximately 18,000 square feet of quality restaurant and 4,085 square feet of medical office building. The existing medical office building would be removed and the existing restaurant will have character-defining features preserved and reinstalled into a smaller version of the restaurant. The Project's proposed uses are divisible into two primary categories: residential and commercial retail. The residential component of the Project would consist of up to 170 residential dwelling units. The commercial component of the Project would consist of approximately up to 13,000 square feet of floor area on the ground level.

As shown in Figure 2, Conceptual Project Site Plan, the Project would provide on-site parking on the ground floor and within two subterranean parking levels. All Project access/egress would be via the existing driveway that serves the site and functions as the north leg of the signalized intersection of Park Avenue & Sunset Boulevard. As part of the Project, the existing site driveway intersecting the south side of Reservoir Street, just west of Liberty Street, would be eliminated (the driveway is currently non-functional).

Approximately 193 parking spaces would be provided within the two subterranean parking levels of the Project, primarily for the proposed residential uses. In addition, 27 parking spaces would be provided at the ground level, primarily for the proposed commercial retail uses. Therefore, the overall parking provided on-site would total 220

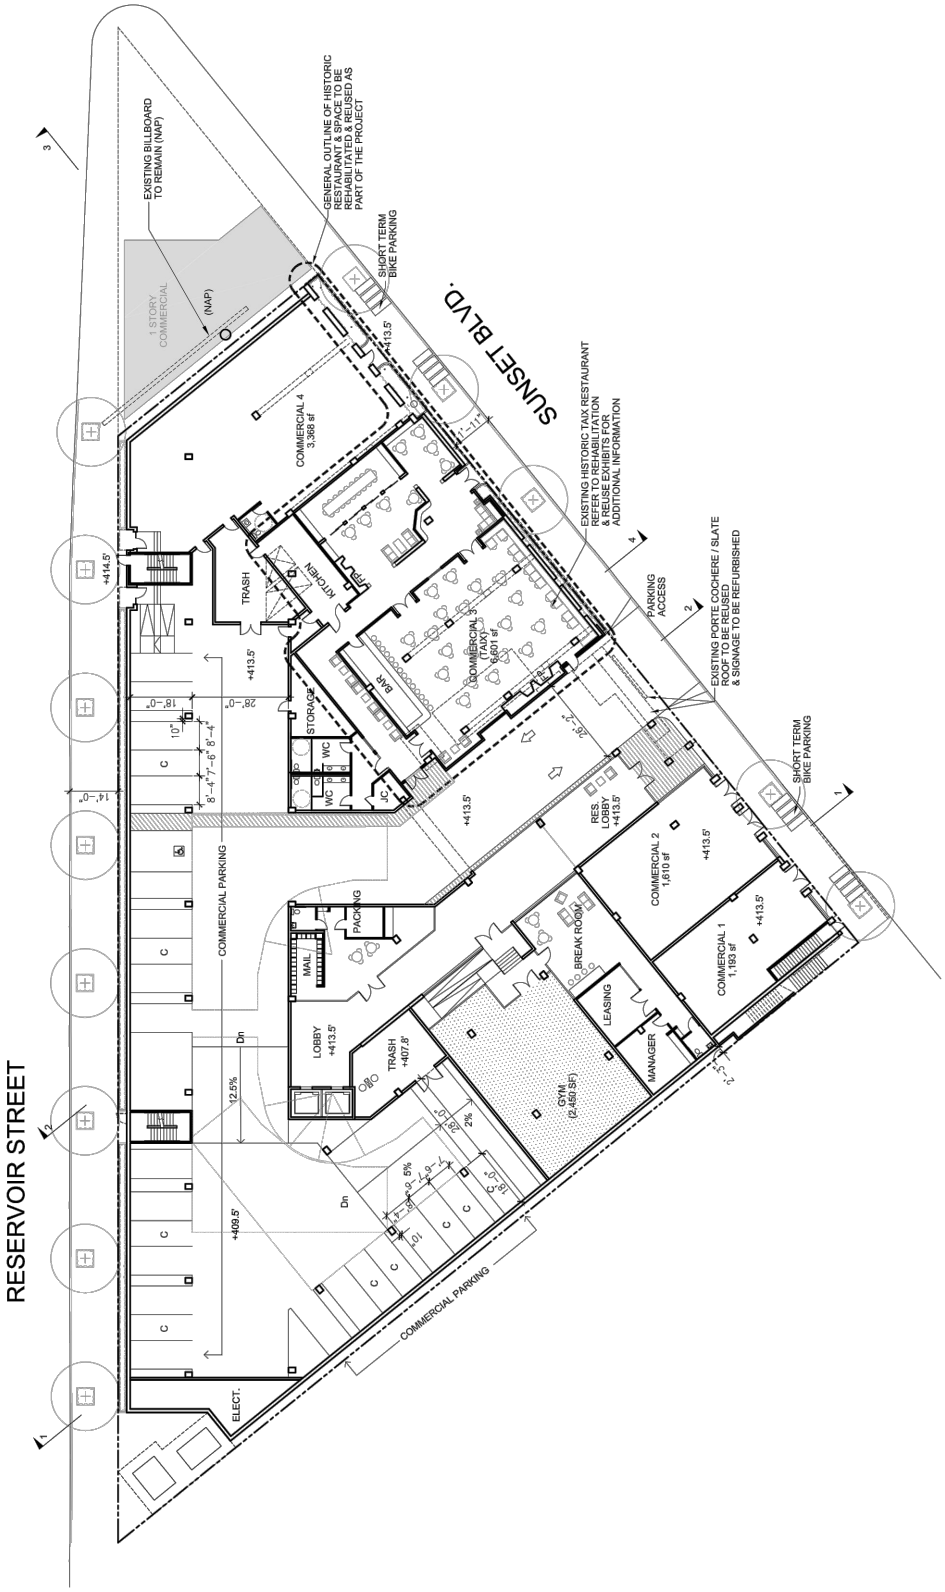

FIGURE 2

parking spaces. This parking supply would meet the requirements of the Los Angeles State Enterprise Zone and be consistent with Transit Oriented Communities (TOC) standards. Appropriate Americans with Disabilities Act (ADA) accessible parking would also be provided between the ground level and first subterranean parking level.

The Project would take measures to align with the City's Vision Zero Los Angeles Initiative. Vision Zero was launched by Executive Order Number 10 in August 2015 with the goals of reducing traffic fatalities by 20 percent by 2017 and eliminating all traffic fatalities citywide by 2025. Vision Zero specifically seeks to implement traffic safety treatments at intersections and along roadway segments to improve safety for pedestrians, bicyclists, and other vulnerable road users. Development projects proposed on a roadway identified as part of the City's High Injury Network (HIN) should be designed to enhance safety. The Project is located on a portion of Sunset Boulevard that is a HIN roadway.

Since the Project is located within the HIN, the Project would take measures to align with Vision Zero policies. The Project plans to provide 16 short-term and 116 long-term bicycle parking spaces, thereby incentivizing Project residents, employees, and patrons to travel via bicycle to/from the site. In line with Vision Zero policies, the Project team decided to limit the number of vehicular access points to a single driveway (which is already signalized as part of the intersection of Park Avenue & Sunset Boulevard). With neither Reservoir Street access nor multiple driveways on Sunset Boulevard, the number of Project vehicular turning conflict points with sidewalk users will be limited. Further, the Project will create a development with sidewalk-facing entrances and short-term bicycle parking spaces along the Project's Sunset Boulevard frontage, thus enriching the existing pedestrian/bicyclist experience and activating the block as a pedestrian/bicyclist-safe environment.

The Project would also embrace the objectives of the City of Los Angeles Mobility Plan 2035, which includes the goals and policies of the City of Los Angeles 2010 Bicycle Plan. The Mobility Plan 2035 aims to complete its proposed paths, protected cycle tracks, bicycle lanes, routes, and priority Neighborhood Enhanced Network roadway segments by 2035. The Project will not impede the Mobility Plan 2035 improvements which have already been realized, and the Project will support the implementation of future improvements, including the addition of Tier 1 protected bicycle lanes to Sunset Boulevard adjacent to the site. The Project site has been designed with consideration for the ultimate roadway and right-of-way dimensions for Sunset Boulevard and Reservoir Street, per the Mobility Plan 2035.

ENVIRONMENTAL SETTING

The Project is located at 1911-1931 W. Sunset Boulevard and 1910-2018 W. Reservoir Street. Situated within the Silver Lake - Echo Park - Elysian Valley Community Plan area of the City, the Project site is generally bounded by Reservoir Street to the north, Sunset Boulevard to the south, a restaurant to the east, and a public library and church to the west.

The Project site is surrounded by a diverse urban area comprised of commercial, office, medical, institutional, residential, office, school, and retail land uses. The Project site is located on Sunset Boulevard, which is a major commercial and retail corridor, with many amenities and services located within a short walking distance that will reduce vehicle trips and vehicle-miles-traveled. A major supermarket (Vons) is located less than one block away from the Project site at 1342 N. Alvarado Street, and two pharmacies (Rite-Aid and CVS) are located approximately two blocks away. The Project site is located one block from Echo Park Recreation Center, which will maximize the accessibility of recreation and park resources to the Project's residents. Logan Street Elementary School and Gabriella Charter School are located approximately two blocks from the Project site. The Edendale Branch of the Los Angeles Public Library is adjacent to the Project site on Sunset Boulevard. The Echo Park Senior Center is located approximately two blocks away.

The Project site and surrounding uses in the Silver Lake - Echo Park - Elysian Valley Community Plan area are well-served by Freeways, Boulevards, Avenues, and Collector Streets. Freeways are located around the Project site and provide convenient access to the larger, regional roadway network. In the Project study area, Glendale Boulevard is classified as a Boulevard II, per the City of Los Angeles Mobility Plan 2035. Sunset Boulevard is designated as an Avenue I in the Project vicinity, while Alvarado

Street is an Avenue II (south of Glendale Boulevard). Echo Park Avenue is classified as a Collector Street, as is Park Avenue (east of Glendale Boulevard). Park Avenue (between Sunset Boulevard and Glendale Boulevard) and Reservoir Street are standard Local Streets. The Project study area transportation facilities, depicted previously in Figure 1, are described below in more detail.

Existing Freeways

Regional access to the Project vicinity is provided via multiple freeways, including the Hollywood Freeway (U.S. Highway 101 [US-101]) and Golden State Freeway (Interstate 5 [I-5]). These freeways both have interchanges with the surface street network in the greater Project vicinity. The following paragraphs describe each of these freeways in more detail.

The Hollywood Freeway (US-101) is a north-south highway spanning the country's west coastline, beginning in the Seattle area of Washington State and terminating where it merges with the Golden State Freeway near the southeast corner of Downtown Los Angeles. Near the Project site, the Hollywood Freeway generally provides four mixed-flow lanes in each direction. The nearest northbound and southbound on- and off-ramps on the Hollywood Freeway are provided on Alvarado Street. These ramps are all approximately one-half mile southwest of the Project site.

The Golden State Freeway (I-5) is a prominent north-south interstate spanning from the United States' northern border with Canada to its southern border with Mexico. In the vicinity of the Project site, the I-5 Freeway interchanges with the Glendale Freeway (State Route 2 [SR-2]) and the Arroyo Seco Parkway (State Route 110 [SR-110]). Full northbound and southbound on- and off-ramps are provided via the Glendale Freeway, which extends north from Glendale Boulevard. These ramps are approximately 1.75 miles northeast of the Project site.

Existing Highways and Streets

Alvarado Street is a north-south roadway located approximately 300 feet west of the Project site. Near the Project site, Alvarado Street is designated as an Avenue II south of Glendale Boulevard, and a Local Street north of Glendale Boulevard. This roadway extends from its intersection with Hoover Street at the west edge of the Westlake community to its northerly terminus in near the Golden State Freeway/Glendale Freeway interchange. In the Project vicinity, this roadway is striped generally with two through travel lanes in each direction at all times. Three southbound and northbound through travel lanes are provided during the weekday AM and PM peak periods, respectively, via peak-period parking restrictions. Near the Project site, lanes typically feature widths between nine and ten feet. Within the Project vicinity, on-street parking is generally available along both sides of Alvarado Street during weekday off-peak periods and on weekends.

Echo Park Avenue is a north-south roadway located approximately one-quarter mile east of the Project site. Echo Park Avenue is designated a Collector Street from its southerly terminus at the Hollywood Freeway (via northbound on- and on-ramps) to Cerro Gordo Street, at which point it becomes a Local Street to its northerly terminus at Landa Street in north Echo Park. In the Project vicinity, this roadway generally features one travel lane in each direction, with left- and sometimes right-turn channelization at major intersections. Near the Project site, lanes typically feature widths between 10 and 16 feet. On-street parking is generally available along both sides of Echo Park Avenue.

Glendale Boulevard is a north-south roadway located approximately 200 feet east of the Project site. Near the Project site, Glendale Boulevard is designated as a Boulevard II south of Fargo Street, and an Avenue II north of Fargo Street. This roadway extends from its intersection with 1st Street, 2nd Street, and Lucas Avenue in the Westlake community to City of Glendale where it becomes Brand Boulevard. South of Park

Avenue, this roadway is generally striped with two travel lanes in each direction, separated by a double-yellow centerline, with on-street parking provided. Between Park Avenue and Sunset Boulevard, a similar roadway condition exists; however, the directions of travel are separated by a center two-way left-turn lane. North of Sunset Boulevard (which Glendale Boulevard does not intersect with due to a grade separation) to Allesandro Street/Effie Street, the roadway maintains a wide raised and landscaped median and generally provides three through travel lanes in each direction. In the Project vicinity, left- and sometimes right-turn channelization is provided at major intersections, and lanes typically feature widths between 10 and 13 feet. On-street parking is generally allowed along both sides of the roadway, with some peak-period restrictions.

Park Avenue is a short east-west roadway that intersects Sunset Boulevard opposite the Project site driveway. The roadway runs for just over one-quarter mile, between Sunset Boulevard and Echo Park Avenue. Park Avenue is designated a Collector Street east of Glendale Boulevard, and a Local Street west of Glendale Boulevard. In the Project vicinity, this roadway generally features one travel lane in each direction, with left- and right-turn channelization at major intersections. Near the Project site, the roadway typically features lane widths between 10 and 12 feet. On-street parking is available along both sides of Park Avenue.

Reservoir Street is an east-west Local Street that forms the northern boundary of the Project site. Reservoir Street is disjoint near its western terminus at Silver Lake Boulevard and extends for approximately 0.75 miles to its eastern termini at Sunset Boulevard and Glendale Boulevard (the roadway splits at Liberty Street and intersects both of these grade-separated roadways). In the Project vicinity, this roadway generally provides one through travel lane in each direction, with left-turn channelization at major

intersections. Lanes typically feature widths between 10 and 16 feet. On-street parking is generally allowed along both sides of the roadway.

Sunset Boulevard is an east-west Avenue I within the Project study area, and it forms the southern boundary of the Project site. This roadway extends its westerly terminus at Pacific Coast Highway (State Route 1 [SR-1]) in the Pacific Palisades to Chinatown, where it becomes Cesar E. Chavez Avenue. In the Project area, Sunset Boulevard generally features two through travel lanes in each direction, with left-turn channelization at major intersections. Bicycle lanes are also provided in both directions. Near the Project site, the roadway generally maintains lane widths of 10 to 11 feet. On-street parking is typically allowed along both sides of the roadway.

Existing (2019) Traffic Volumes

Traffic volumes for existing conditions were obtained from manual traffic counts conducted on June 4, 2019 at the study area intersections. In accordance with the LADOT *Transportation Impact Study Guidelines* (December 2016), all intersection traffic counts for this study were completed on a typical weekday during the morning and afternoon peak commute periods, which range from 7:00 AM to 10:00 AM and 3:00 PM to 6:00 PM, respectively. All intersection counts include the enhanced bicycle and pedestrian count summary information required by the latest LADOT guidelines.

Peak-hour volumes were determined individually for each intersection based on the highest-volume four consecutive 15-minute periods for all vehicular movements. The Existing (2019) AM and PM peak-hour volumes at the study intersections are illustrated in Figures 3(a) and 3(b), respectively. The intersection count data sheets are provided in Appendix A.

Information pertaining to intersection characteristics, such as geometrics, traffic signal operations, and on-street parking restrictions were obtained from field checks and City

engineering plans. The existing lane configurations and traffic control conditions for the study intersections are illustrated in Appendix B.

Existing Public Transportation

The roadways adjacent to the Project site are served by several bus lines managed by multiple transit operators that include the Los Angeles County Metropolitan Transportation Authority ("Metro") and LADOT DASH. The Project site's proximity to the Metro Westlake/Macarthur Park Station, approximately one and two-thirds miles southwest, provides opportunities to access other Metro rail services, Amtrak, Metrolink, and numerous bus routes served by Metro, LADOT, and other municipal bus operators. The bus lines within a "reasonable walking distance" (approximately one-quarter mile) of the Project site are shown in Figure 4 and described below. Pursuant to TOC Guidelines, Alvarado Street & Sunset Boulevard is considered a Major Transit Stop because it is an intersection of regular bus lines and a Rapid Bus line.

Metro

Lines 2 and 302 provide east-west service between Downtown Los Angeles, Echo Park, Silver Lake, Hollywood, West Hollywood, Beverly Hills, and Westwood. Lines 2 and 302 follow the same route, but Line 302 makes limited stops in the middle of the route, providing faster service. The nearest eastbound and westbound stops for Line 2 are located adjacent to the site, at the intersection of Park Avenue & Sunset Boulevard, while the nearest stops for Line 302 are located at the intersection of Alvarado Street & Sunset Boulevard. Line 2 operates daily with headways of approximately 5 to 15 minutes during the weekday AM and PM peak periods. Saturday, Sunday, and holiday service operates on headways of approximately 15 to 60 minutes. Line 302 operates during the weekday peak periods only, with headways of approximately 10 to 20 minutes.

FIGURE 4

Line 4 traverses east-west from West Los Angeles to Downtown Los Angeles via Santa Monica Boulevard and Sunset Boulevard. While most service on this route ends in West Los Angeles at the San Diego Freeway (I-405), coverage extends west to Downtown Santa Monica during the early morning, evening, and late-night periods. Near the Project site, Line 4 stops adjacent to the site, at the intersection of Park Avenue & Sunset Boulevard. Line 4 runs daily, with weekday AM and PM peak-period headways of approximately 8 to 15 minutes. Saturday service is provided roughly every 10 to 20 minutes. Buses run on Sundays and holidays with approximately 10- to 30-minute headways.

Line 92 runs north-south, serving Sylmar, Sun Valley, Burbank, Glendale, Echo Park, and Downtown Los Angeles. Near the Project site, Line 92 stops in both northbound and southbound directions near the intersection of Glendale Boulevard & Reservoir Street. Line 92 operates on weekday with headways of approximately 25 to 30 minutes during the AM and PM peak periods. Saturday service is provided roughly every 30 to 40 minutes, while Sunday and holiday service runs approximately every 35 to 45 minutes.

Line 200 travels north-south between Echo Park, Westlake, and Exposition Park, mostly along Alvarado Street and Hoover Street. Near the Project site, Line 200 stops in both northbound and southbound directions near the intersection of Alvarado Street & Sunset Boulevard. Line 200 operates daily, with weekday AM and PM peak-period headways of approximately 7 to 12 minutes. Saturday service is provided roughly every 10 to 20 minutes for most of the day, while Sunday and holiday service runs approximately every 10 to 25 minutes.

Line 603 provides north-south service, traveling between Los Angeles Trade Technical College south of Downtown Los Angeles, Westlake, Echo Park, Atwater Village, and Glendale. Near the Project Site, northbound and southbound buses

stop near the intersection of Alvarado Street & Sunset Boulevard. Line 603 operates daily, with weekday AM and PM peak-period headways of approximately 10 to 20 minutes. Saturday service is provided roughly every 15 to 25 minutes, while Sunday and holiday service runs approximately every 15 to 30 minutes.

Line 704 is a Metro Rapid Bus Line that provides east-west service between Union Station, Echo Park, Silver Lake, West Hollywood, Beverly Hills, Century City, Westwood, and Santa Monica. Line 704 is part of the greater Metro Rapid Program, which uses a bus signal priority system in combination with frequent stops limited to major intersections in order to minimize travel time. Near the Project site, Line 704 provides stops in both directions near the intersection of Alvarado Street & Sunset Boulevard. Line 704 provides access to the Vermont/Santa Monica Metro Rail Station and Union Station. Line 704 operates on weekdays with headways of approximately 8 to 15 minutes during the AM and PM peak periods. Saturday service is provided roughly every 18 to 30 minutes, while Sunday and holiday service runs approximately every 20 to 35 minutes.

LADOT

DASH Pico Union/Echo Park runs north-south between Pico Union and Echo Park, largely via Washington Boulevard, Union Avenue, 6th Street, 3rd Street, and Echo Park Avenue. In the Project vicinity, DASH Pico Union/Echo Park stops in both directions near the intersection of Echo Park Avenue & Sunset Boulevard. DASH Pico Union/Echo Park operates every day of the year, including holidays. On weekdays, the line operates with headways of approximately 10 to 14 minutes during the AM and PM peak periods. Saturday, Sunday, and holiday service is provided on headways of approximately 15 minutes.

As evidenced by the above information, the Project site and surrounding area are well served by public transit. When transfer opportunities are considered, the site is very

accessible to and from the greater Los Angeles region via public transit. Thus, it is expected that some of the person trips generated by the Project would utilize public transit as the primary travel mode instead of private vehicles.

Analysis of Existing (2019) Traffic Conditions

The five study intersections listed below were analyzed for existing traffic conditions. All of these intersections are signalized. They were selected in consultation with the LADOT for the analysis of potential Project traffic impacts. Per current LADOT policy, when determining which intersections should be included in the impact analysis for development projects, only signalized locations should be included. Unsignalized intersections should be evaluated solely to determine the need for the installation of a traffic signal or other traffic control devices, but will not be included in the impact analysis. The existing peak-hour traffic volumes for these intersections were discussed previously and presented in Figures 3(a) and 3(b). These volumes, along with information pertaining to intersection geometrics, traffic signal operations, and on-street parking restrictions were analyzed using established traffic engineering techniques.

1. Alvarado Street & Reservoir Street
2. Alvarado Street & Sunset Boulevard
3. Park Avenue & Sunset Boulevard
4. Park Avenue & Glendale Boulevard
5. Echo Park Avenue & Sunset Boulevard

The LADOT *Transportation Impact Study Guidelines* (December 2016) require the use of the Critical Movement Analysis (CMA) methodology to analyze signalized intersections for land use development projects. This methodology is based on procedures outlined in the Transportation Research Board Circular 212, Interim Materials on Highway Capacity. Using the CMA procedures, a determination can be made of the operating characteristics of an intersection in terms of the Level of Service

for different levels of traffic volume and other variables, such as critical signal phases and the number and type of traffic lanes.

The term “Level of Service” (LOS) describes the quality of traffic flow. LOS A through C are indicative of excellent-to-good traffic flow conditions. LOS D corresponds with fair conditions that may experience substantial delay during portions of the peak hours, but without excessive backups. LOS E represents poor conditions, with volumes at or near the capacity of the intersection and long lines of vehicles that may have to wait through several signal cycles. LOS F is characteristic of failure (i.e., the intersection is overloaded, vehicular movements may be restricted or prevented, and delays and queue lengths become increasingly longer).

A determination of the LOS at an intersection can be obtained through a summation of the critical movement volumes, on a per lane basis, at that intersection. Critical movement volumes are the highest total conflicting traffic volumes for each signal phase. Once the sum of the critical movement volumes has been obtained, the values in Table 1 can be used to determine the appropriate LOS.

Table 1
Critical Movement Volume Ranges*
For Determining Levels of Service (LOS)

	Maximum Sum of Critical Volumes (Vehicles/Hour)		
LOS	**Two Phases**	**Three Phases**	**Four or More Phases**
A	900	855	825
B	1,050	1,000	965
C	1,200	1,140	1,100
D	1,350	1,275	1,225
E	1,500	1,425	1,375
F	----------Not Applicable----------		

* For planning applications only.

Capacity is the total maximum hourly volume of vehicles in the intersection critical lanes that has a reasonable expectation of passing through the intersection under the prevailing roadway and traffic conditions. For planning purposes, the capacity for signalized intersections equates to the maximum critical movement value at LOS E, as indicated in Table 1.

The CMA volume-to-capacity (V/C) ratios used in this study were calculated by dividing the sum of the critical movement volumes by the appropriate capacity value for the type of signal control present or proposed at the subject intersections. A description of the different LOS and their corresponding V/C values is shown in Table 2.

Table 2
Level of Service (LOS)
As a Function of V/C Ratios

LOS	Range of V/C Ratios
A	0.000 - 0.600
B	0.601 - 0.700
C	0.701 - 0.800
D	0.801 - 0.900
E	0.901 - 1.000
F	≥ 1.001

Applying this analysis procedure, the V/C ratio and corresponding LOS can be calculated for each study intersection for Existing (2019) traffic conditions. These standard CMA calculations are also adjusted to account for signal enhancements not considered in the CMA methodology, including the effects of intersections currently operating under the City's Automated Traffic Surveillance and Control (ATSAC) system or the upgraded Adaptive Traffic Control System (ATCS). ATSAC/ATCS is a highly sophisticated computerized system that continually monitors traffic demand at signalized intersections within the system and modifies signal timing in real time to maximize capacity and decrease overall delay.

The ATSAC system has been recognized to increase intersection capacity by approximately seven percent. The upgrade to ATCS is able to increase capacity by an additional three percent, resulting in a total 10 percent increase in intersection capacity. Therefore, per LADOT policy, the standard V/C ratios were decreased by 0.070 where only the ATSAC system is in effect and by 0.100 where the combined ATSAC/ATCS is in effect. Per discussions with LADOT staff, three study intersections (Alvarado Street & Reservoir Street, Park Avenue & Sunset Boulevard, and Glendale Boulevard & Park Avenue) currently operate under only the ATSAC system, and there are no plans to upgrade to the combined ATSAC/ATCS system in the near future. The remaining two study intersections (Alvarado Street & Sunset Boulevard and Echo Park Avenue & Sunset Boulevard) presently operate under the combined ATSAC/ATCS system and will continue to do so under future (2023) conditions. Existing (2019) and Future (2023) ATSAC and ATCS conditions are displayed graphically for the study intersections in Appendix B.

The analyses of Existing (2019) AM and PM peak-hour conditions at the study intersections are summarized in Table 3. As shown in Table 3, all five study intersections currently operate at LOS B or better during both peak hours. All CMA/LOS calculations were performed using the standard LADOT LOS Worksheet. The CMA/LOS calculation worksheets for the five study intersections are included in Appendix C.

PROJECT TRAFFIC

The following section describes the methodology and procedures used to determine the trip generation, distribution, and assignment of traffic resulting from the Project. The Project's proposed uses are divisible into two primary categories: residential and commercial retail. The residential component of the Project would consist of up to 170 mid-rise multifamily dwelling units. The proposed commercial component of the Project would consist of approximately up to 13,000 square feet of ground-floor commercial space. The Project site is presently occupied by approximately 18,000 square feet of quality restaurant space and 4,085 square feet of medical office space, all of which is presently active. The existing medical office building would be removed and the existing restaurant will have character-defining features preserved and reinstalled into a smaller version of the restaurant. Project vehicular access/egress and parking are described at the end of this section.

Project Trip Generation

Per the approved Memorandum of Understanding (MOU) signed by LADOT staff on July 3, 2019 and included as Appendix D of this report, the Institute of Transportation Engineers (ITE) *Trip Generation Manual* (10th Edition, 2017) was used to develop the traffic characteristics of the Project's proposed uses. The trip generation equations and rates in the ITE manual are nationally recognized and are used as the basis for most transportation impact studies conducted in the City of Los Angeles and surrounding region. Information was obtained from the *Trip Generation Manual* for ITE Land Use Code (LUC) 221 – Multifamily Housing (Mid-Rise) and LUC 820 – Shopping Center. Table 4 presents the trip generation rates used to generate the daily and peak-hour traffic volumes for the proposed Project.

It should be noted that the initial existing use trip estimates contained in the MOU were developed using appropriate ITE trip rates for LUC 720 – Medical-Dental Office Building and LUC 931 – Quality Restaurant. However, through the collection of traffic volume data at the intersection of Park Avenue & Sunset Boulevard (which includes the existing site driveway as its north leg), empirical trip generation estimates for the combined existing uses were determined. Given that the empirical existing use trip estimates were more conservative than those developed via the ITE trip rates (as shown in the MOU in Appendix D), the empirical trip estimates were used in the Project impact analysis.

Table 4
Project Trip Generation Rates[1]

Multifamily Housing (Mid-Rise), ITE LUC 221 - General Urban/Suburban setting (trips per dwelling unit)	
Daily:	T = 5.44 (DU)
AM Peak Hour:	T = 0.36 (DU); IB = 26%, OB = 74%
PM Peak Hour:	T = 0.44 (DU); IB = 61%, OB = 39%
Shopping Center, ITE LUC 820 - General Urban/Suburban setting (trips per 1,000 square feet of gross floor area)	
Daily:	T = 37.75 (A)
AM Peak Hour:	T = 0.94 (A); IB = 62%, OB = 38%
PM Peak Hour:	T = 3.81 (A); IB = 48%, OB = 52%

Notes
[1] Source: Institute of Transportation Engineers (ITE) *Trip Generation Manual* (10th Edition, 2017).

By applying the trip rates provided in Table 4, baseline daily, AM peak-hour, and PM peak-hour trips were calculated for the proposed Project uses. As these rates do not account for such trip-reducing factors as internally captured trips, significant transit usage and/or walk trip potential, or pass-by trips, the baseline trips reflect a conservative condition. These trip-reducing factors are important considerations in determining the actual traffic-generating characteristics of a project and, therefore, adjustments were made to the proposed Project's baseline trip generation estimates.

Given the mix of proposed uses on the Project site, it is expected that there would be trip interactions between individual uses that would not require the use of a vehicle. It is generally recognized that residents, visitors, employees, and patrons of a site will utilize other on-site uses if they are conveniently located and/or provide useful services or amenities, with the level of interaction dependent upon the number of residents, visitors, employees, and patrons; service providers; accessibility; and other factors[1]. For the proposed Project, some of the residents, visitors, and employees would be expected to patronize the on-site commercial retail uses. Thus, a reduction in trips between the residential and commercial retail uses would be expected. Based on the mix of uses, an internal capture adjustment of 10 percent, based on the proposed Project's commercial retail land use baseline trips, has conservatively been assumed for the proposed Project. This internal capture adjustment has been approved by LADOT staff in an MOU signed on July 3, 2019 and included as Appendix D.

The use of public transportation is an important consideration in the evaluation of a project's trip-generating potential. As noted previously in the Existing Public Transportation section of this report, the Project is well served by bus and rail lines of multiple transit operators. These transit operators provide both local and regional routes that are readily accessible to Project residents, visitors, employees, and patrons. Significant transit use is not accounted for in the ITE *Trip Generation Manual* General Urban/Suburban setting trip rates and equations. Because the trip rates for the General Urban/Suburban setting do not consider significant transit connectivity, adjustments were made to the Project trip generation to account for transit usage associated with the proposed residential and commercial retail land uses. Based on the abundance of available transit options within a comfortable walking distance of the Project site (including Metro Rapid Bus service), a combined transit/walk adjustment of 15 percent

[1] Institute of Transportation Engineers (ITE) *Trip Generation Handbook* (3rd Edition, 2017).

has been assumed for the Project's proposed land uses. This transit/walk adjustment has been approved by LADOT staff in an MOU signed on July 3, 2019 and included as Appendix D.

Trip reduction factors for the Project also account for the presence of "pass-by" trips. As some motorists pass by the Project, the specific convenient facilities provided by the Project (or other factors) produce a stop at the site. Such activity is considered to be an interim stop along a trip which existed irrespective of the development of the Project, and therefore vehicles making these stops are not considered to be newly generated Project-related traffic. The LADOT has developed a series of recommended pass-by trip reduction percentages for various development types and sizes. In line with these guidelines, pass-by trip reductions were applied to the Project's commercial land uses (proposed commercial retail and existing quality restaurant). These pass-by trip adjustment factors have been approved by LADOT staff in an MOU signed on July 3, 2019 and included as Appendix D.

Based on the trip generation rates and aforementioned trip reduction factors, projections of the amount of traffic to be generated for the Project were derived. Table 5 summarizes the trip generation for the Project. As shown in Table 5, once completed and occupied, the Project is anticipated to generate a total of 670 net trips per day, with 60 net trips during the AM peak hour and 55 net trips during the PM peak hour. These peak-hour trips were distributed to analyze Project impacts at the five study intersections.

Per LADOT policy and as a conservative procedure, trip reductions for commercial use pass-by activity were not applied to the Project's driveways and appropriate site-adjacent intersections, since pass-by trips, while not new to the area roadways, would be included in the number of vehicles that enter and exit the site's driveways and appropriate site-adjacent intersection turning movements required for Project access

Table 5
Project Trip Generation Summary[1]

Notes:

1) ITE *Trip Generation Manual* (10th Edition, 2017) trip generation rates and equations applied for Land Use Codes 221 (Multifamily Housing [Mid-Rise]) and 820 (Shopping Center). Trip generation rates for the General Urban/Suburban setting were utilized due to the robust number of studies the trip rates are based on (versus limited data for the Dense Multi-Use Urban setting trip rates).
2) du = Dwelling units; ksf = Thousands of square feet of gross floor area.
3) 10 percent internal capture adjustment assumed. The internal capture adjustment is applied to the lower trip-generating component of the uses sharing trips with each other. For the proposed land uses, the shopping center is the lower-generating use; therefore, the internally captured trips are based on the baseline shopping center trip estimates and then balanced with the higher trip-generating residential use.
4) Consistent with current LADOT *Transportation Impact Study Guidelines* , a 15 percent transit/walk adjustment has been assumed for the proposed land uses (given that the Project is located within an approximate one-quarter mile walking distance of Metro rapid bus service, and such an adjustment is not already accounted for in the General Urban/Suburban setting baseline trip rates).
5) Based on Attachment D of the current LADOT *Transportation Impact Study Guidelines* , appropriate pass-by trip adjustments have been applied for the proposed commercial retail (Shopping Center) and existing quality restaurant land use categories.
6) Peak-hour trips were determined from the inbound and outbound turning movements observed for the site driveway north leg at the intersection of Park Avenue & Sunset Boulevard during the June 4, 2019 traffic counts. These trips were distributed proportionally between the two existing land uses, based on their relative ITE rate-based peak-hour trip generations. Daily traffic volumes were calculated by applying a daily-to-peak hour (AM + PM) trip-rate factor, based on the ITE rates above, to the combined AM + PM peak-hour volumes observed during the traffic counts.

and egress. The additional Project pass-by traffic volumes at the Project driveways and appropriate site-adjacent intersections were also calculated. These calculations indicate that approximately 162 net pass-by trips per day, with 4 net pass-by trips during the AM peak hour and 17 net pass-by trips during the PM peak hour, would access the Project driveway. These pass-by traffic volumes were added to the net traffic volumes in order to estimate Project transportation impacts at the site-adjacent study intersection of Park Avenue & Sunset Boulevard.

Project Trip Distribution and Assignment

Estimation of the geographic distribution of Project trips was the next step in the analytical process. The primary factors affecting the trip distribution patterns are the nature of the Project uses, existing traffic patterns, characteristics of the surrounding roadway system, geographic location of the Project site and its proximity to freeways and major travel routes, employment centers to which residents would likely be attracted, residential areas from which employees would likely be drawn, and the various regions generating visitors and patrons. The Project trip distribution patterns were developed for two aggregate land-use categories -- residential and commercial -- in order to reflect better the differences in trip directionality, origin/destination land uses, and Project access/egress between these categories.

Based on the abovementioned factors, the overall project trip distribution percentages were determined separately for the residential and commercial components of the Project, and are summarized in Table 6. The LADOT approved these trip distribution assumptions in an MOU signed on July 3, 2019 and included as Appendix D.

Table 6
Project Directional Trip Distribution Percentages

	Land Use	
Direction	**Residential**	**Commercial**
North	33%	20%
South	23%	30%
East	23%	15%
West	21%	35%
Total	100%	100%

The general distribution percentages shown in Table 6 were then disaggregated and assigned to specific routes and intersections that are expected to be used for Project access/egress. The estimated Project trip assignment percentages for the proposed residential and commercial uses at the study intersections were reviewed and approved by LADOT staff in an MOU signed on July 3, 2019 and included as Appendix D. The Project's proposed residential and commercial trip distribution percentages are presented in Figures 5(a) and 5(b), respectively.

Applying these inbound and outbound percentages to the proposed Project trip generation, the traffic volumes for the proposed Project were determined for the five study intersections. Given that the existing land use trip estimates were determined based on empirical observations, these existing use trips were distributed from the intersection of Park Avenue & Sunset Boulevard in proportion with the approved commercial land use trip distribution percentages. The existing land use AM and PM peak-hour traffic volumes are shown in Figures 6(a) and 6(b), respectively. As described previously and per LADOT policy, existing and proposed Project pass-by trips have been included only at the site-adjacent intersection of Park Avenue & Sunset Boulevard. Deducting existing use trips from the proposed Project trips, the net Project AM and PM peak-hour traffic volumes were calculated and are depicted in Figures 7(a) and 7(b), respectively.

Project Parking and Access

Parking for the Project would be provided in accordance with the requirements of the Los Angeles State Enterprise Zone and consistent with TOC standards. The Project would provide on-site parking on the ground floor and within two subterranean parking levels. All Project vehicular access/egress would be via the existing driveway that serves the site and functions as the north leg of the signalized intersection of Park Avenue & Sunset Boulevard. As part of the Project, the existing site driveway intersecting the south side of Reservoir Street, just west of Liberty Street, would be eliminated (the driveway is currently non-functional). The conceptual Project site plan was shown previously in Figure 2.

Based on the Project's proposed mix of uses, City parking regulations, and the Los Angeles City Bicycle Parking Ordinance, adequate parking would be provided for the Project. Approximately 193 parking spaces would be provided within the two subterranean parking levels of the Project, primarily for the proposed residential uses. In addition, 27 parking spaces would be provided at the ground level, primarily for the proposed commercial retail uses. Therefore, the overall parking provided on-site would total 220 parking spaces. This parking supply would meet the requirements of the Los Angeles State Enterprise Zone and be consistent with TOC standards. Appropriate Americans with Disabilities Act (ADA) accessible parking would also be provided between the ground level and first subterranean parking level. The Project would also provide 132 bicycle parking spaces (16 short-term and 116 long-term) to meet Municipal Code bicycle parking requirements. No off-site parking impacts are anticipated as a result of this Project.

EXISTING PLUS PROJECT TRAFFIC CONDITIONS

Based on the December 16, 2010 decision of the California Sixth District Court of Appeal in the *Sunnyvale West Neighborhood Association v. City of Sunnyvale City Council* case, an additional traffic impact analysis has been performed for the Project. In the *Sunnyvale* case, the Court of Appeal found, based on the facts of that case, the impacts of a project must be compared "against current, existing physical conditions." While the facts of the *Sunnyvale* case may be distinguishable from this case, in the interest of fullest disclosure an analysis of Existing (2019) Plus Project AM and PM peak-hour conditions was performed.

The Existing (2019) Plus Project traffic volumes were determined by superimposing the Project-only traffic volumes onto the Existing (2019) traffic volumes. The Existing (2019) Plus Project traffic volumes at the study intersections are shown in Figures 8(a) and 8(b) for the AM and PM peak hours, respectively. The analysis of Existing (2019) Plus Project traffic conditions at the study intersections was performed using the analysis procedures described previously in this report. The results of the analysis of Existing (2019) Plus Project traffic conditions at the study intersections are summarized in Table 8 of the following section and are discussed therein.

FUTURE TRAFFIC CONDITIONS

There are a number of other projects either under construction or planned for development in the surrounding area that may contribute future traffic to the study locations. For this reason, the analysis of future traffic conditions was expanded to include potential traffic volume increases expected to be generated by those other projects. In order to evaluate future traffic conditions in the Project area, an analysis of Existing (2019) traffic volumes was first conducted, as described previously. For the analysis of future conditions, an ambient traffic growth factor of 1.0 percent per year, compounded annually, was applied to these existing volumes at the five study intersections to develop future year (2023) baseline traffic volumes. Given that the Project is currently estimated to be fully constructed in mid to late 2022, 2023 was conservatively selected as the future study year when the Project would be occupied.

The inclusion of the annual growth factor generally accounts for area-wide traffic increases. To ensure a conservative estimate of cumulative traffic conditions, the traffic generated by "related projects" in the study area was also added to the future baseline traffic volumes. The total future volumes, including those due to related projects, formed the basis for the Future (2023) Without Project condition. Finally, the traffic expected to be generated by the Project was analyzed as an incremental addition to the Future (2023) Without Project condition, resulting in the Future (2023) With Project condition.

Ambient Traffic Growth

Based on an analysis of traffic growth projections for the Silver Lake - Echo Park - Elysian Valley Community Plan area, the LADOT recommended the application of an ambient traffic growth factor of 1.0 percent per year for future traffic growth. This growth factor was used to account for increases in traffic due to potential development projects

not yet proposed or outside the study area. Compounded annually, the ambient traffic growth factor was applied to the existing (2019) traffic volumes to develop the estimated baseline volumes for the future study year (2023).

Related Projects

In addition to the use of the ambient growth rate, listings of potential projects located in the surrounding area ("related projects") that might be developed or under construction within the study time frame were obtained from the LADOT and City of Los Angeles Department of City Planning. Recently published transportation impact studies and environmental reports for development projects in the area were also reviewed. Per a November 28, 2018 update to the related project selection criteria in the LADOT *Transportation Impact Study Guidelines*, related projects from these sources and within an approximate 0.5-mile radius of the Project site were included. Refinement of the information resulted in a total of six related projects in the surrounding area that could add traffic to the study intersections.

The locations of the related projects are shown in Figure 9, Related Project Location Map. The related project locations, descriptions, and trip generation estimates are summarized in Table 7. The number of trips expected to be generated by the related projects was obtained from information provided by public agencies, transportation impact analyses, and environmental reports, to the extent available. For related projects with incomplete trip generation and/or peak-hour directional (inbound/outbound) distribution information, estimates were determined by applying the appropriate trip rates and/or directional splits from the ITE *Trip Generation Manual* (10th Edition, 2017).

For the analysis of Future (2023) Without Project traffic conditions, each related project's generated trips were distributed and assigned to the study area circulation

system, using methodologies similar to those previously described for the Project trip distribution and assignment. Summing the individual related project traffic volume assignments, the total related project traffic volumes at the study intersections were calculated and are shown in Figures 10(a) and 10(b) for the AM and PM peak hours, respectively.

It should be noted that the inclusion of these related projects, as described, results in future (2023) traffic condition forecasts that are conservative for the purposes of impact analysis. As stated previously, the 1.0 percent ambient traffic growth factor, approved by the LADOT, accounts for the general traffic growth expected throughout the study area. The overlay of traffic volumes resulting from the six identified related projects represents a conservative projection of future traffic volumes. It is likely that some of the identified projects will not be approved or constructed as described. It is also probable that some of these projects will be delayed in their construction beyond the future (buildout) study year of the Project (2023). In addition, none of the mitigation measures proposed in the traffic analyses performed for these related projects have been assumed under future conditions. Therefore, the future condition of the study area roadway infrastructure has also been forecast conservatively.

Highway System Improvements

In order to better analyze future traffic conditions in the Project area, an investigation was conducted regarding relevant future transportation improvements to the roadway system infrastructure in the study area. No traffic improvements were identified as scheduled for implementation that would affect use of the existing street system.

The goals and policies of the City's 2010 Bicycle Plan (City of Los Angeles Department of Planning, adopted March 1, 2011) have been folded into the Mobility Plan 2035. It is a Mobility Plan objective to complete the proposed bicycle paths, protected cycle tracks,

bicycle lanes, routes, and priority Neighborhood Enhanced Network roadway segments by 2035. While some of these improvements have already been realized, the following improvements are scheduled for implementation within the Project study area:

- Sunset Boulevard will add Tier 1 protected bicycle lanes between Virgil Avenue/Hillhurst Avenue and Figueroa Street. Striped bicycle lanes are already provided on Sunset Boulevard in the vicinity of the Project site, but the implementation of physically separated lanes would represent a facility upgrade. Vehicular lanes may have to be reconfigured to accommodate the upgrade.
- Glendale Boulevard will add Tier 1 protected bicycle lanes between Fletcher Drive and 2nd Street/Lucas Avenue. In the vicinity of the Project, striped bicycle lanes were installed north of Reservoir Street in 2017, but the implementation of the aforementioned physically separated lanes would represent an upgrade north of Reservoir Street and new lanes south of Reservoir Street. Vehicular lanes will likely be reconfigured to accommodate these bicycle lanes.
- Alvarado Street will add Tier 2 bicycle lanes between Glendale Boulevard and Hoover Street. Vehicular lanes will likely be reconfigured to accommodate these bicycle lanes.

Per information provided by LADOT staff, none of the abovementioned bicycle infrastructure improvements are expected to be designed or constructed between now and the Project buildout year of 2023. As such, no changes to the future (2023) study intersection geometrics and/or traffic control conditions due to bicycle facility improvements have been assumed in this traffic impact analysis.

A review of the LADOT Transportation Capital Improvement Projects and Bureau of Engineering Street Improvement Master Schedule revealed no projects that could affect operations at any of the study intersection locations. Therefore, the existing and future intersection geometrics and traffic control conditions are assumed to be the same, as illustrated in Appendix B.

Analysis of Future (2023) Traffic Conditions

The analysis of future traffic conditions at the study intersections was performed using the same analysis procedures described previously in this report. As described in the previous section, all existing geometrics and/or traffic control conditions are assumed to prevail for the analysis of future area traffic conditions.

As described earlier, future (2023) baseline traffic volumes for the Without Project condition were determined by superimposing area-wide ambient traffic growth and the total related projects traffic volumes onto the existing (2019) traffic volumes. The Future (2023) Without Project traffic volumes are depicted in Figures 11(a) and 11(b) for the AM and PM peak hours, respectively.

Net project volumes [Figures 7(a) and 7(b)], as determined earlier, were then added to the Future (2023) Without Project traffic volumes to develop the Future (2023) With Project traffic volumes. The Future (2023) With Project volumes were then used to determine traffic impacts directly attributable to the Project. The Future (2023) With Project AM and PM peak-hour traffic volumes are shown in Figures 12(a) and 12(b), respectively.

The results of the analysis of existing and future traffic conditions at the study intersections are summarized in Table 8. As shown in Table 8, following the addition of Project-related traffic to Existing traffic conditions, all intersections would maintain the same LOS during both peak hours. All five study intersections would continue to operate at LOS B or better during both peak hours.

As shown, under Future (2023) Without Project conditions, traffic operations are expected to degrade slightly when compared with existing conditions due to the ambient and related project traffic volume growth. Under Future (2023) Without Project conditions, four study intersections would operate at LOS B or better during both peak

hours. The intersection of Alvarado Street & Sunset Boulevard would operate at LOS B during the AM peak hour and LOS C during the PM peak hour.

Under Future (2023) With Project conditions, following the addition of Project-related traffic to Future (2023) Without Project conditions, all intersections would maintain the same LOS during both peak hours. Under Future (2023) With Project conditions, all five study intersections would operate at LOS C or better during both peak hours. The CMA/LOS calculation worksheets are included in Appendix C.

Significant Traffic Impact Criteria

The LADOT defines a significant intersection traffic impact attributable to a project based on a "stepped scale," with intersections experiencing high V/C ratios being more sensitive to additional traffic than those operating with more available capacity. According to LADOT policy, a significant impact is identified as an increase in the V/C ratio, due to Project-related traffic under future buildout conditions, of 0.010 or more when the final (with Project) LOS is E or F, a V/C ratio increase of 0.020 or more when the final LOS is D, or an increase of 0.040 or more when the final LOS is C. No significant impacts are deemed to occur at LOS A or B, as these operating conditions exhibit sufficient surplus capacities to accommodate large traffic increases with little effect on traffic delays. These criteria are summarized below in Table 9.

Table 9
LADOT Criteria for Significant Intersection Traffic Impacts

LOS	Final V/C Ratio	Project-Related Increase in V/C Ratio
C	> 0.700 - 0.800	equal to or greater than 0.040
D	> 0.800 - 0.900	equal to or greater than 0.020
E, F	> 0.900	equal to or greater than 0.010

These LADOT criteria were applied for the five study intersections. Based on these criteria and as shown previously in Table 8, the Project would not significantly impact any of the study intersections during either peak hour.

Congestion Management Program (CMP) Impact Analysis

The traffic impact guidelines of the current 2010 CMP for Los Angeles County require analysis of all CMP arterial monitoring locations where a project could add a total of 50 or more trips during either peak hour. Additionally, all freeway monitoring locations are to be analyzed where a project could add 150 or more trips in either direction during the peak hours.

The nearest CMP arterial monitoring location to the Project site is the intersection of Alvarado Street & Sunset Boulevard (a study intersection, approximately 0.1 miles southwest of the Project site). Based on a review of the net Project traffic volumes [shown in Figures 7(a) and 7(b)], the Project is expected to contribute traffic volumes to this CMP monitoring intersection below the 50-trip threshold during the weekday AM and PM peak hours (17 trips during the AM peak hour and 20 trips during the PM peak hour). Further, it is expected that Project traffic volume contributions to more distant CMP arterial monitoring locations would be even lower, given that Project traffic would disperse across an increasing number of roadways when farther from the Project site. With Project traffic contributions well below the 50-trip threshold, no significant Project impacts to CMP arterial monitoring locations are forecast and no additional arterial intersection analysis is necessary.

In terms of CMP freeway monitoring segment analysis, a review of the Project's trip generation indicates that the Project would not generate more than 37 net directional (inbound or outbound) trips during either peak hour. Therefore, the Project would contribute well below the 150 directional-trip threshold to all CMP freeway monitoring

segments, no significant Project impacts to CMP freeway monitoring locations are forecast, and no additional freeway analysis is necessary.

The local CMP also requires that all projects consider potential transit impacts. As shown in Table 5, transit adjustments were applied to the proposed residential and existing commercial uses only, since existing use trip estimates were based on observed vehicle trips at the site driveway. Although it is expected that some users of the existing quality restaurant and medical office utilized transit to access the site, they have been excluded in order to provide a more conservative transit impact analysis.

The transit impact review was undertaken per the 2010 CMP guidelines. As shown in Table 5, the Project trip generation reflects a transit adjustment of 15 percent for the proposed residential and commercial uses, which amounts to 197 net vehicles reduced by transit per day, with 11 AM peak-hour and 17 PM peak-hour trips reduced. Per the 2010 CMP guidelines, person transit trips can be estimated by multiplying the transit vehicle trip reductions by a conversion factor of 1.4. Therefore, the number of proposed Project person transit trips would be approximately 276 daily person transit trips, with 15 AM peak-hour and 24 PM peak-hour person transit trips.

Given that the capacity of one standard bus is 40 riders, there are seven bus lines (including rapid service) within a reasonable walking distance of the Project site, and there are more bus lines slightly outside the reasonable walking distance, these daily and peak-hour levels of Project transit ridership are anticipated to have minimal impact on the surrounding transit network. Therefore, it is expected that the incremental additions of Project person transit trips would not have a significant impact on transit service in the study area.

Residential Street/Neighborhood Intrusion Impact Analysis

In order to address local residential neighborhood concerns, the LADOT requires the preparation of a residential street impact analysis if a development project meets certain conditions. These conditions include the proposed development project being non-residential and non-school in nature, with an anticipated significant traffic contribution to a congested arterial (with intersections operating at LOS E or F) in the presence of local residential street(s) that provide viable alternate route(s). The Project has proposed residential and commercial components, but the proposed commercial component measures only up to 13,000 square feet in floor area and generates minimal vehicle trips. Accounting for the removal of the existing commercial uses, the non-residential portion of the Project generates net negative vehicle trips during all analyzed time periods. Therefore, the Project is not expected to significantly impact local residential streets and no further analysis is required.

Vehicle-Miles-Traveled Analysis

Following the passage of Senate Bill 743 (SB 743), the State of California's Governor's Office of Planning and Research (OPR) was tasked with developing new guidelines for evaluating transportation impacts under the California Environmental Quality Act (CEQA). These guidelines were intended to shift the transportation performance metric from automobile delay and LOS to one that would promote the reduction of greenhouse gas emissions and the development of multimodal and diverse transportation networks. As a result, OPR determined that, under the proposed update to the CEQA guidelines, vehicle-miles-traveled (VMT) would be established as the primary metric for evaluating environmental and transportation impacts.

In response to the updates to the CEQA guidelines, the LADOT updated the City's *Transportation Assessment Guidelines* (TAG) in July 2019 to conform to the

requirements of SB 743. The TAG replaced the *Transportation Impact Study Guidelines* (December 2016) and shifted the performance metric for evaluating transportation impacts under CEQA from LOS to VMT for studies completed within the City. The TAG establishes thresholds to identify development projects that would cause substantial VMT.

Under the updated TAG, two forms of VMT are analyzed: (1) household VMT per capita and (2) work VMT per employee. The household VMT per capita is the home-based VMT produced by the residential component of a development project divided by the number of residents within the development. The work VMT per employee is the home-based work VMT attracted by the non-residential uses of a development project divided by the number of employees within the development. As outlined in the updated TAG, in order for a proposed development to have a less-than-significant VMT impact, two criteria must be met: (1) the development project's household VMT per capita must not exceed 15 percent below the average household VMT per capita, and (2) the development project's work VMT per employee must not exceed 15 percent below the average work VMT per employee. The thresholds corresponding to 15 percent below the average household VMT per capita and the average work VMT per capita were determined individually for each of the seven Area Planning Commission (APC) areas within the City and are shown in Table 10. The APC area in which a development project is located determines the appropriate thresholds that are to be applied.

Along with the updated TAG, LADOT developed the City of Los Angeles VMT Calculator Version 1.1 (the "VMT Calculator"), which calculates the daily vehicle trips, daily VMT, daily household VMT per capita, and daily work VMT per employee for development projects. The VMT Calculator utilizes average daily trip generation rates from the Institute of Transportation Engineers (ITE) *Trip Generation Manual* (9th Edition, 2012) and empirical trip generation data to determine the base daily trips associated

with a development project. The number of daily trips is further refined using data from the Environmental Protection Agency's Mixed-Use (MXD) Model and the City's Travel Demand Forecasting (TDF) Model.

Table 10
LADOT Thresholds for Significant VMT Impacts

Area Planning Commission	Daily Household VMT per Capita	Daily Work VMT per Employee
Central	6.0	7.6
East Los Angeles	7.2	12.7
Harbor	9.2	12.3
North Valley	9.2	15.0
South Los Angeles	6.0	11.6
South Valley	9.4	11.6
West Los Angeles	7.4	11.1

The VMT Calculator also determines population and employment estimates for a development project based on rates developed from U.S. Census data for the City of Los Angeles. The VMT Calculator then uses trip length information from the TDF Model, in combination with the daily trips and population/employment estimates, to calculate the development project's daily VMT, household VMT per capita, and work VMT per capita. The VMT Calculator also provides a menu of Transportation Demand Management (TDM) strategies that can be implemented for a development project, either as project features or mitigation measures, to reduce the daily vehicle trips and VMT of a development project. Further detail on the VMT Calculator can be found in the *City of Los Angeles VMT Calculator Documentation* (February 2019).

Although the Project transportation impact study MOU was approved based on the previous LADOT *Transportation Impact Study Guidelines* (December 2016) and therefore the Project is not required to perform a VMT analysis, a supplemental VMT

analysis has been performed per the new TAG in the event the Project does not receive its entitlements prior to July 1, 2020 (the State's official deadline for required VMT compliance for all development projects). The VMT Calculator was utilized to determine the daily vehicle trip generation of the Project. As shown in Appendix E, the Housing (Multi-Family) and Retail (General Retail) land use rates were applied to the corresponding Project uses. The Project proposes to incorporate a TDM strategy from the VMT Calculator as a Project feature: including bicycle parking per Municipal Code requirements. Using the aforementioned trip generation rates and Project feature TDM strategy, the VMT Calculator determined that the Project would generate the following baseline trip estimates: 1,126 daily vehicle trips and 6,472 daily VMT. The report outputs of the VMT Calculator have been included in Appendix E.

Based on the 6,472 daily VMT, the VMT Calculator determined that the Project would generate a daily household VMT per capita of 8.8 and a daily work VMT per employee of 7.3. Since the Project is located within the East Los Angeles APC area, the appropriate thresholds of significance with which to compare the Project's VMT estimates are 7.2 daily household VMT per capita and 12.7 daily work VMT per employee, as shown in Table 10. Therefore, the Project is expected to have a significant VMT impact based on its residential component only. Further TDM strategies will be evaluated in the following section to reduce this VMT impact to a less-than-significant level.

MITIGATION MEASURES

As indicated in the preceding transportation impact analysis, the proposed 1911 Sunset Boulevard mixed-use project is not expected to significantly impact any of the five study intersections, any CMP monitoring locations, public transit, or residential street facilities. Therefore, no transportation-related mitigation measures are required for the Project based on the analysis requirements of the approved transportation impact study MOU.

However, based on the supplemental VMT analysis, the Project is anticipated to have a significant impact based on its residential component (daily household VMT per capita). Thus, additional TDM strategies beyond the strategy included as a Project feature were explored to reduce the Project's daily household VMT per capita (8.8) below the East Los Angeles APC significance threshold for daily household VMT per capita (7.2). The Project proposes to: (1) reduce the Project parking supply from the City Municipal Code requirement of 300 parking spaces (per Municipal Code Section 12.21.A4) to 220 parking spaces, and (2) integrate unbundled parking as part of the development, thereby separating the cost of renting a residential dwelling unit from the cost to rent a parking space. Applying the reduced parking supply strategy and unbundled parking strategy (with an assumed monthly parking space cost of $150), the VMT Calculator determined that the Project would generate the following with-mitigation trip estimates: 894 daily vehicle trips and 5,130 daily VMT. The report outputs of the VMT Calculator have been included in Appendix E.

Based on the 5,130 daily VMT, the VMT Calculator determined that the Project would generate 6.3 daily household VMT per capita. This value falls below the East Los Angeles APC area threshold of significance of 7.2 daily household VMT per capita. Therefore, the provision of a reduced parking supply and unbundled parking would reduce the Project's daily household VMT per capita to a less-than-significant level.

TRAFFIC STUDY MEMORANDUM OF UNDERSTANDING (DATED MAY 28, 2019 AND SIGNED ON JULY 3, 2019)

LADOT

Transportation Impact Study Memorandum of Understanding (MOU)

This MOU acknowledges that the Transportation Impact Study for the following Project will be prepared in accordance with the latest version of LADOT's Transportation Impact Study Guidelines:

I. PROJECT INFORMATION

Project Name: 1911 Sunset Boulevard Mixed-Use Project

Project Address: 1911-1935 Sunset Boulevard, Los Angeles, CA 90026

Project Description: The proposed project consists of the construction of a six-story mid-rise residential mixed-use building, with up to 170 residential dwelling units and 13,000 square feet of ground-floor commercial uses, and the removal of all existing active on-site uses (approximately 18,000 square feet of quality restaurant and 4,000 square feet of medical office building uses). Primary access for the proposed residential and commercial uses will remain the same as for the existing uses: via a full-access driveway intersecting the north side of Sunset Boulevard, opposite Park Avenue, under traffic signal control. Project parking would be provided on two subterranean levels.

LADOT Project Case Number: _____ Project Site Plan attached? *(Required)* ■ Yes ☐ No

II. TRIP GENERATION

Geographic Distribution (Residential): N 33.00% S 23.00% E 23.00% W 21.00%

Geographic Distribution: N 20.00 % S 30.00 % E 15.00 % W 35.00 %
(Commercial)

Notes:

1) ITE *Trip Generation Manual* (10th Edition, 2017) trip generation rates and equations applied for Land Use Codes 221 (Multifamily Housing [Mid-Rise]), 720 (Medical-Dental Office Building), 820 (Shopping Center), and 931 (Quality Restaurant). Trip generation rates for the General Urban/Suburban setting were utilized due to the robust number of studies the trip rates are based on (versus limited data for the Dense Multi-Use Urban setting trip rates).
2) du = Dwelling units; ksf = Thousands of square feet of gross floor area.
3) Land Use Code 931 does not contain directional distribution percentages (inbound/outbound) for the AM peak hour of adjacent street traffic. Therefore, the directional distribution percentages for the AM peak hour of the generator have been assumed.
4) 10 percent internal capture adjustment assumed. The internal capture adjustment is applied to the lower trip-generating component of the uses sharing trips with each other. For the proposed land uses, the shopping center is the lower-generating use; therefore, the internally captured trips are based on the baseline shopping center trip estimates and then balanced with the higher trip-generating residential use. For the existing land uses, the medical office building is the lower-generating use; thus, the internally captured trips are based on the baseline medical office building trip estimates and then balanced with the higher trip-generating quality restaurant use.
5) Consistent with current LADOT *Transportation Impact Study Guidelines*, a 15 percent transit/walk adjustment has been assumed for the proposed and existing land uses (given that the Project is located within an approximate one-quarter mile walking distance of Metro rapid bus service, and such an adjustment is not already accounted for in the General Urban/Suburban setting baseline trip rates).
6) Based on Attachment D of the current LADOT *Transportation Impact Study Guidelines*, appropriate pass-by trip adjustments have been applied for the proposed commercial retail (Shopping Center) and existing quality restaurant land use categories.

ATTACHMENT 4

RELATED PROJECTS LIST

(The related projects list will be requested from LADOT when we submit the MOU package for review.)

ATTACHMENT 5

FREEWAY IMPACT ANALYSIS SCREENING

1911 SUNSET BOULEVARD MIXED-USE PROJECT
FREEWAY IMPACT ANALYSIS SCREENING

The following State of California Department of Transportation ("Caltrans") freeway impact analysis screening has been performed for the 1911 Sunset Boulevard mixed-use project (the "Project") as part of the Transportation Impact Study Memorandum of Understanding (MOU), per the criteria set forth in the October 2013 *Agreement Between City of Los Angeles and Caltrans District 7 on Freeway Impact Analysis Procedures* (the "Agreement") and the December 2015 *First Amendment to the Agreement between LADOT and Caltrans District 7 on Freeway Impact Analysis Procedures* (the "Amendment").

Agreement and Amendment Freeway Impact Analysis Screening Criteria

Per Section 3 of the Agreement and the Amendment, the "City will require Project applicants to work with Caltrans and prepare a Freeway Impact Analysis, utilizing Caltrans' "Guide for the Preparation of Traffic Impact Studies" ("TIS Guide"), for land use proposals that meet any of the following criteria:

- The project's peak hour trips would result in a 1-percent or more increase to the freeway mainline capacity of a freeway segment operating at level-of-service (LOS) E or F (based on an assumed capacity of 2,000 vehicles per hour per lane); or
- The project's peak hour trips would result in a 2-percent or more increase to the freeway mainline capacity of a freeway segment operating at LOS D (based on an assumed capacity of 2,000 vehicles per hour per lane); or
- The project's peak hour trips would result in a 1-percent or more increase to the capacity of a freeway off-ramp operating at LOS E or F (based on an assumed ramp capacity of 850 vehicles per hour per lane); or
- The project's peak hour trips would result in a 2-percent or more increase to the capacity of a freeway off-ramp operating at LOS D (based on an assumed ramp capacity of 850 vehicles per hour per lane)."

Project Traffic Volume Contributions to State Facilities

In order to estimate the Project's traffic volume contributions to the freeway mainline and off-ramp locations most likely to be impacted by Project-related traffic, the Project's trip generation was first determined. In order to develop the traffic characteristics of the Project, the latest and most up-to-date version of the Institute of Transportation Engineers (ITE) *Trip Generation Manual* (10th Edition, 2017) was used. The trip generation rates in the ITE manual are nationally recognized and are used as the basis for most traffic studies conducted in the City of Los Angeles and surrounding region. Attachment 3 of this Transportation Impact Study MOU presents the trip generation rates and summary for the Project's weekday daily, AM peak-hour,

and PM peak-hour traffic volumes. As shown, appropriate trip credits were applied to the baseline trip generation estimates to account for internally captured trips, use of public transportation, walk-trip potential, and pass-by trip activity.

Estimation of the geographic distribution of Project trips was the next step in the analytical process. Project trip distribution patterns were developed based on the Project uses, existing traffic patterns, characteristics of the surrounding roadway system, the geographic location of the Project site and its proximity to freeways and major travel routes, employment centers to which residents would likely be attracted, residential areas from which employees would likely be drawn, and the various regions generating visitors and patrons. Based on the abovementioned factors, the overall Project trip distribution percentages for the residential and commercial land use components were determined and are summarized in Attachment 2 of this Transportation Impact Study MOU.

The Project trip generation and trip distribution patterns were then used to determine the Project traffic volume contributions to State facilities in the vicinity of the Project site. Table 1 summarizes the anticipated Project traffic volume contributions to the freeway mainline and off-ramp locations most likely to be impacted by Project traffic.

Freeway Mainline Segment Impact Analysis Screening

In order to perform the freeway mainline segment impact analysis screening, an initial check was performed to see if the directional mainline segments most likely to be impacted by Project traffic would meet the trigger Project traffic volume contributions assuming the most constrained operations on each segment. This initial freeway mainline segment impact screening analysis is shown in Table 2. Per the Agreement, the trigger percentage is a 2 percent or more increase in traffic volumes for a mainline segment at LOS D or a 1 percent or more increase for a segment at LOS E/F. The volume increases are relative to an assumed mainline segment capacity of 2,000 vehicles per hour per lane, per the Agreement. Therefore, the 1 percent trigger percentage was applied assuming LOS E/F freeway mainline operations.

Comparing the traffic volume contributions required to trigger a freeway segment impact analysis at LOS E/F with the anticipated Project volume contributions at each location, the thresholds would not be triggered in either direction at any of the three freeway segment locations. Therefore, a freeway mainline segment impact analysis is not required.

Freeway Off-Ramp Impact Analysis Screening

In order to perform the freeway off-ramp impact analysis screening, an initial check was performed to see if the off-ramp location most likely to be impacted by Project traffic would meet the trigger traffic volume contributions assuming the most constrained operations for the off-ramp. This initial freeway off-ramp screening analysis is shown in Table 2. Per the Agreement, the trigger percentage is a 2 percent or more increase in traffic volumes for a freeway off-ramp

operating at LOS D or a 1 percent or more increase for an off-ramp at LOS E/F. These volume increases are relative to the assumed capacity of 850 vehicles per hour per lane, per the Agreement and Amendment. Therefore, the 1 percent trigger percentage was applied assuming LOS E/F freeway off-ramp operations.

Comparing the traffic volume contributions required to trigger a freeway off-ramp impact analysis at LOS E/F with the anticipated Project volume contributions at the location, the thresholds would not be triggered any of the three freeway off-ramp locations. Therefore, a freeway off-ramp impact analysis is not required.

PROJECT VMT ANALYSIS (WITH MITIGATION)

CITY OF LOS ANGELES VMT CALCULATOR Version 1.1

Project Information

Project: 1911 Sunset Boulevard Mixed-Use

Scenario: With Project (with mitigation)

Address: 1911 W SUNSET BLVD, 90026

Land Use Type	Value	Unit
Retail | General Retail	13.000	ksf
Housing | Multi-Family	170	D
Retail | General Retail	13	ks

☐ Click here to add a single custom land use type (will be included in the above list)

TDM Strategies

Select each section to show individual strategies

Use ☑ to denote if the TDM strategy is proposed part of the project or is a mitigation strategy

A Parking

Reduce Parking Supply
☐ Proposed Prj ☑ Mitigation
300 city code parking provision for the project site
220 actual parking provision for the project site

Unbundle Parking
☐ Proposed Prj ☑ Mitigation
150 monthly parking cost (dollar) for the project site

Parking Cash-Out
☐ Proposed Prj ☐ Mitigation
50 percent of employees eligible

Price Workplace Parking
☐ Proposed Prj ☐ Mitigation
6.00 daily parking charge (dollar)
100 percent of employees subject to priced parking

Residential Area Parking Permits
☐ Proposed Prj ☐ Mitigation
200 cost (dollar) of annual permit

B Transit

C Education & Encouragement

D Commute Trip Reductions

E Shared Mobility

F Bicycle Infrastructure

G Neighborhood Enhancement

Analysis Results

Proposed Project	With Mitigation
1,126 Daily Vehicle Trips	**894** Daily Vehicle Trips
6,472 Daily VMT	**5,130** Daily VMT
8.8 Household VMT per Capita	**6.3** Household VMT per Capita
7.3 Work VMT per Employee	**6.4** Work VMT per Employee

Significant VMT Impact?

Proposed Project	With Mitigation
Household: Yes Threshold = 7.2 15% Below APC	**Household: No** Threshold = 7.2 15% Below APC
Work: No Threshold = 12.7 15% Below APC	**Work: No** Threshold = 12.7 15% Below APC

FORM GEN. 160A (Rev. 1/82)

CITY OF LOS ANGELES

INTER-DEPARTMENTAL CORRESPONDENCE

1911 W Sunset Bl
DOT Case No. CEN 19-48428

Date: February 19, 2020

To: Debbie Lawrence, Senior City Planner
Department of City Planning

From: Wes Pringle, Transportation Engineer
Department of Transportation

Subject: **TRANSPORTATION ASSESSMENT FOR THE PROPOSED MIXED-USE PROJECT LOCATED AT 1911 WEST SUNSET BOULEVARD**

The Department of Transportation (DOT) has reviewed the transportation assessments prepared by Crain & Associates, dated September 10, 2019 and January 30, 2020, for the proposed mixed-use project located at 1911 West Sunset Boulevard in the East Los Angeles Area Planning Commission. In compliance with Senate Bill (SB) 743 and the California Environmental Quality Act (CEQA), a vehicle miles traveled (VMT) analysis is required to identify the project's ability to promote the reduction of green-house gas emissions, the access to diverse land uses, and the development of multi-modal networks. The significance of a project's impact in this regard is measured against the VMT thresholds established in DOT's Transportation Assessment Guidelines (TAG), as described below.

DISCUSSION AND FINDINGS

A. Project Description

The project proposes to construct a mixed-use development on the north side of Sunset Boulevard at 1911-1931 West Sunset Boulevard and 1910-2018 West Reservoir Street as illustrated in **Attachment A**. The development will include up to 170 residential dwelling units and up to 13,000 square feet of ground-floor commercial retail space. The project will remove the existing medical office and TAIX restaurant. However, features of TAIX will be preserved and installed into a smaller version of the restaurant in the new development. The project will provide 132 (16 short-term and 116 long-term) bicycle parking spaces and 220 (7 spaces on the ground floor for commercial retail uses and 193 spaces within two subterranean levels for residential uses) vehicle parking spaces. The existing driveway on Sunset Boulevard, which functions as the north leg of the signalized intersection of Park Avenue and Sunset Boulevard, will continue to provide access to the site. The project is expected to be completed by 2023.

B. CEQA Screening Threshold

Prior to accounting for trip reductions resulting from the application of Transportation Demand Management (TDM) Strategies, a trip generation analysis was conducted to determine if the project would exceed the net 250 daily vehicle trips screening threshold. Using the trip generation estimates based on formulas published by in the Institute of Transportation Engineers (ITE) Trip Generation Manual, 10th Edition, 2017, it was determined that the net daily vehicle trips generated by the project **does** exceed the net 250 daily vehicle trips threshold. A copy of the project trip generation table can be found in **Attachment B**.

C. Transportation Impacts

On July 30, 2019, pursuant to SB 743 and the recent changes to Section 15064.03 of the State's CEQA Guidelines, the City of Los Angeles adopted VMT as criteria in determining transportation impacts under CEQA. The new DOT TAG provide instructions on preparing transportation assessments for land use proposals and defines the significant impact thresholds.

The DOT VMT Calculator tool measures project impact in terms of Household VMT per Capita, and Work VMT per Employee. DOT identified distinct thresholds for significant VMT impacts for each of the seven Area Planning Commission (APC) areas in the City. For the East Los Angeles APC area, in which the project is located, the following thresholds have been established:

- Household VMT per Capita: 7.2
- Work VMT per employee: 12.7

As cited in the VMT Analysis report, prepared by the Crain and Associates, the project proposes to incorporate a TDM strategy of providing bicycle parking per the Los Angeles Municipal Code (LAMC) as a project feature. The proposed project is projected to have a Household VMT per capita of 8.8 and a Work VMT per employee of 7.3. Therefore, it is concluded that implementation of the Project would result in a significant Household VMT impact.

To mitigate this impact, the project proposes to implement the TDM strategies of reducing the parking supply and unbundling parking. By implementing these strategies, the Household VMT project is forecasted to be reduced to 6.3. A copy of the VMT Calculator summary report is provided as **Attachment C** to this report.

D. Access and Circulation

During preparation of the new CEQA guidelines, the State's Office of Planning and Research stressed that lead agencies can continue to apply traditional operational analysis requirements to inform land use decisions provided that such analyses were outside of the CEQA process. The authority for requiring non-CEQA transportation analysis and requiring improvements to address potential circulation deficiencies, lies in the City of Los Angeles' Site Plan Review authority as established in Section 16.05 of the LAMC. Therefore, DOT continues to require and review a project's site access, circulation, and operational plan to determine if any access enhancements, transit amenities, intersection improvements, traffic signal upgrades, neighborhood traffic calming, or other improvements are needed. In accordance with this authority, the project has completed a circulation analysis using a "level of service" screening methodology that indicates that the trips generated by the proposed development will not likely result in adverse circulation conditions at several locations. The Sunset Boulevard driveway, which is signalized, will continue to serve as the primary access to the project site. DOT has reviewed this analysis and determined that it adequately discloses operational concerns. A copy of the circulation analysis table that summarizes these potential deficiencies is provided as **Attachment D** to this report.

PROJECT REQUIREMENTS

A. CEQA Related Mitigation

To off-set the expected significant impacts identified in the project's transportation assessment study, DOT recommends that the applicant be required to implement the TDM strategies of reducing the parking supply and unbundling parking as mitigation measures.

Reducing the parking supply encourages alternative transportation choices by project residents and employees. Unbundling parking costs from property costs would require those who wish to purchase parking spaces to do so at an additional cost from the property cost. This removes the burden from those who do not wish to utilize a parking space. An assumption is made that the parking costs are passed through to the vehicle owners/drivers utilizing the parking spaces.

B. Non-CEQA-Related Requirements and Considerations

To comply with transportation and mobility goals and provisions of adopted City plans and ordinances, the applicant should be required to implement the following:

1. Parking Requirements

Parking for vehicles and long-term parking for bicycles will be provided onsite. The applicant should check with the Department of Building and Safety on the number of Code-required parking spaces needed for this project.

2. Highway Dedication and Street Widening Requirements

Per the new Mobility Element of the General Plan, **Sunset Boulevard**, an Avenue I, would require a 35-foot half-width roadway within a 50-foot half-width right-of-way and **Reservoir Street**, Local Street, would require an 18-foot half-width roadway within a 30-foot half-width right-of-way. The applicant should check with the Bureau of Engineering's Land Development Group to determine if there are any other applicable highway dedication, street widening and/or sidewalk requirements for this project.

3. Project Access and Circulation

The conceptual site plan for the project (see **Attachment A**) is acceptable to DOT. The driveway on Sunset Boulevard would continue to serve the project site. Review of this study does not constitute approval of the dimensions for any new proposed driveway. Review and approval of the driveway should be coordinated with DOT's Citywide Planning Coordination Section (201 North Figueroa Street, 5th Floor, Room 550, at 213-482-7024). In order to minimize and prevent last minute building design changes, the applicant should contact DOT for driveway width and internal circulation requirements prior to the commencement of building or parking layout design.

4. Worksite Traffic Control Requirements

DOT recommends that a construction work site traffic control plan be submitted to DOT's Citywide Temporary Traffic Control Section or Permit Plan Review Section for review and approval prior to the start of any construction work. Refer to http://ladot.lacity.org/what-we-do/plan-review to determine which section to coordinate review of the work site traffic control plan. The plan should show the location of any roadway or sidewalk closures, traffic detours, haul routes, hours of operation, protective devices, warning signs and access to abutting properties. DOT also recommends that all construction related truck traffic be restricted to off-peak hours to the extent feasible.

5. TDM Ordinance Requirements

The TDM Ordinance (LAMC 12.26 J) is currently being updated. The updated ordinance, which is currently progressing through the City's approval process, will:

- Expand the reach and application of TDM strategies to more land uses and neighborhoods,
- Rely on a broader range of strategies that can be updated to keep pace with technology, and
- Provide flexibility for developments and communities to choose strategies that work best for their neighborhood context.

Although not yet adopted, LADOT recommends that the applicant be subject to the terms of the proposed TDM Ordinance update expected in 2020. The updated ordinance is expected to be completed prior to the anticipated construction of this project, if approved.

6. Development Review Fees
Section 19.15 of the Los Angeles Municipal Code identifies specific fees for traffic study review, condition clearance, and permit issuance. The applicant shall comply with any applicable fees per this ordinance.

If you have any questions, please contact Eileen Hunt of my staff at (213) 972-8481.

Notes:

1) ITE *Trip Generation Manual* (10th Edition, 2017) trip generation rates and equations applied for Land Use Codes 221 (Multifamily Housing [Mid-Rise]) and 820 (Shopping Center). Trip generation rates for the General Urban/Suburban setting were utilized due to the robust number of studies the trip rates are based on (versus limited data for the Dense Multi-Use Urban setting trip rates).
2) du = Dwelling units; ksf = Thousands of square feet of gross floor area.
3) 10 percent internal capture adjustment assumed. The internal capture adjustment is applied to the lower trip-generating component of the uses sharing trips with each other. For the proposed land uses, the shopping center is the lower-generating use; therefore, the internally captured trips are based on the baseline shopping center trip estimates and then balanced with the higher trip-generating residential use.
4) Consistent with current LADOT *Transportation Impact Study Guidelines* , a 15 percent transit/walk adjustment has been assumed for the proposed land uses (given that the Project is located within an approximate one-quarter mile walking distance of Metro rapid bus service, and such an adjustment is not already accounted for in the General Urban/Suburban setting baseline trip rates).
5) Based on Attachment D of the current LADOT *Transportation Impact Study Guidelines* , appropriate pass-by trip adjustments have been applied for the proposed commercial retail (Shopping Center) and existing quality restaurant land use categories.
6) Peak-hour trips were determined from the inbound and outbound turning movements observed for the site driveway north leg at the intersection of Park Avenue & Sunset Boulevard during the June 4, 2019 traffic counts. These trips were distributed proportionally between the two existing land uses, based on their relative ITE rate-based peak-hour trip generations. Daily traffic volumes were calculated by applying a daily-to-peak hour (AM + PM) trip-rate factor, based on the ITE rates above, to the combined AM + PM peak-hour volumes observed during the traffic counts.

WILL SERVE

February 25, 2019

Mr. Thomas Warren
Holland Acquisitions, LLC
1111 Main Street, Suite 700
Vancouver, WA 98660

Dear Mr. Warren:

1911 West Sunset Boulevard

This is in response to your email dated 2/22/19, regarding electric service for the proposed project at the above address.

Electric service is available and will be provided in accordance with the Los Angeles Department of Water and Power Rules and Regulations. The estimated power requirement for this proposed project is part of the total load growth forecast for the City and has been taken into account in the planned growth of the power system.

If you have any questions regarding this matter, please call Mr. Loc Doan at (213) 367-8029.

Sincerely,

Jeff Bergman/LN

Jeffrey T. Bergman
District Engineer, Metro East Service Planning

Mr. Netburn:

Please provide ALL PARTIES included on this email with **advance written notice of any and all** meetings, hearings, and votes in any way related to the above-referenced proposed project and any related projects / entitlements / actions related to the above-referenced proposed project, including but not limited to Case #'s **CPC-2020-3140-CU-DB-MCUP-SPR** / **ENV-2020-3141-SCPE** and address(es) **1911-1931 West Sunset Boulevard & 1910-2018 West Reservoir Street Los Angeles, CA 90026**.

Thank you.

Hello,
There is a hearing officer hearing coming up on Wednesday at 11. Attached is the hearing notice. I am not a part of the scheduling for the ENV-2020-3141-SCPE, I will not know in advance of any hearings scheduled to go before the City Council PLUM Committee meeting, but I will add you to the interested parties list for both CPC-2020-3140 and ENV-2020-3141.

Thanks!

Can you also send me your addresses, as that is the only way the city clerk will be able to provide notice?

Thank you!

Mr. Netburn:

The city mailing us paper notices is not effective. Especially with an up and coming hearing scheduled to take place in 3 business days that no one received notice of, despite the numerous interested parties in the HCM case for this address. That is setting aside the current lawsuit taking place against the City and applicants as Real Parties.

The city clerk is more than able, as is the city planner for this case, to send interested parties **advance written notice of any and all** meetings, hearings, and votes in any way related to the above-referenced proposed project and any related projects / entitlements / actions related to the above-referenced proposed project via email.

If you are not the planner assigned to this case, please advise who is, so they can add our emails to the notification list.

Thank you.

Los Angeles City Council
200 North Spring Street
Los Angeles, CA 90012

***CF 21-0119* - Taix French Restaurant - SUPPORT FOR REDEVELOPMENT PROPOSAL**

Dear Councilmembers,

Abundant Housing LA is a pro-housing, nonprofit advocacy organization working to help solve Southern California's housing crisis. Our organization supports more housing at all levels of affordability and reforms to land use and zoning codes, which are needed in order to make housing more affordable, improve access to jobs and transit, promote greater environmental sustainability, and advance racial and economic equity.

We are writing in support of the proposed 170-unit mixed-use redevelopment project at the site of the Taix Restaurant in Echo Park, which includes 24 units that are set aside for lower-income households at an affordable rent. **Furthermore, we would like to express our support for the proposed compromise that would include the new structure at that address on the list of the city's Historic-Cultural Monuments, allowing redevelopment to move forward.**

The greater Los Angeles region is facing a severe housing shortage and affordability crisis, which is being made worse by a lack of new housing production. This is especially true in Echo Park, where restrictive zoning and high demand for housing have led to unaffordably high and fast-increasing rents.

While it is appropriate for the City to preserve buildings of profound historic or architectural significance, the current structure does not come close to meeting that standard by the Cultural Heritage Commission's own admission. Abundant Housing LA steadfastly opposes the abuse of historical designations; we are aware that residents who oppose new development frequently use the historical designations process as a way to prevent new housing from being built, regardless of whether or not the structure truly has historical significance. Cases like this, which involve structures whose claim to historic significance is questionable at best, harm the credibility of the entire Historic-Cultural Monuments program.

We also wish to highlight the fact that this project is being proposed under the City's Transit-Oriented Communities (TOC) program. With over 32,000 units proposed or permitted since TOC's inception, of which 20% are affordable to low-income renters, the program is delivering on its promise to provide affordable housing near transit and jobs.

TOC projects, like the one proposed at 1911-1929 West Sunset Boulevard, are helping Los Angeles improve housing affordability, environmental quality, and mass transit usage. We urge you to support this project by preventing abuse of the Historic-Cultural Monument designation. **Please allow this housing project to move forward.**

Sincerely,

Leonora Camner
Executive Director
Abundant Housing LA

Re: Item # 2: CPC-2020-3140-CU-DB-MCUB-SPR; ENV-2020-3141-SCPE Taix Restaurant, 1911 Sunset Blvd., LA 90026:

Dear LA City Planning Hearing Officer:

On behalf of the Hollywood Chamber of Commerce and over 800 member organizations who employ over 115,000 individuals, we want to convey our whole-hearted support for the 1911 Sunset Blvd. Mixed-Use Development that would preserve legacy family institution - TAIX French Restaurant - and develop much-needed housing stock in the region.

TAIX has been a beloved staple of Los Angeles for decades—it has survived the Great Depression, World War II, and several recessions. Without the thoughtful modernization efforts that the 1911 Sunset Blvd. Project brings, TAIX would not be able to save the jobs of their employees, revitalize operations or stay in business.

The 1911 Sunset Blvd. Project furthermore provides 166 new residential units, including 24 units reserved for very low-income households, to house more Angelenos in addition to boosting the local economy through its proposed ground floor retail space. We are also pleased to see the addition of a pedestrian paseo that will reinvigorate a pedestrian dead zone and activate a beloved community corridor.

For these reasons we urge you to help TAIX survive and support the actions requested at the March 16th, 2022 City Planning Officer Public Hearing to advance the 1911 Sunset Blvd. Project.

Thank you for your thoughtful consideration and support for the redevelopment project located at 1911 Sunset Blvd. If you have any questions, please contact the Hollywood Chamber of Commerce at econdevelopment@hollywoodchamber.net.

Sincerely,

Leron Gubler
President Emeritus, Hollywood Chamber of Commerce

March 13, 2022

To Whom It May Concern:

For the past 24 months, I have seen first-hand the drastic toll that the COVID-19 pandemic has taken on local small businesses and how it has increased our unhoused population. Since the onset of the COVID-19 pandemic, the State legislature has provided billions of dollars in economic relief to small businesses, landlords and tenants to help relieve financial hardships.

Similarly, the City of Los Angeles has moved to adopt similar initiatives to help Angelenos get back on their feet, protect their livelihoods and keep their businesses open.

For these reasons, I fully support the redevelopment at 1911 Sunset Boulevard—a timely project that will help save Taix, an iconic local restaurant, spur much-needed housing stock, and activate a beloved community corridor.

Taix has been a staple of the Echo Park community for decades, and without the thoughtful modernization efforts, Taix would not be able to revitalize operations and stay afloat. Taix deserves the City's support to ensure it can continue to operate for decades to come.

Not only will this project save Taix, but it will also create new residential units, including 24 affordable units reserved for very low-income households. As we continue to overcome the hardships of COVID-19, we cannot afford to delay any housing projects during a critical housing crisis and increase affordable housing units throughout the city. In addition, this project will also add commercial space that will create a reinvigorated, pedestrian-centric Echo Park neighborhood, which will ultimately boost the local economy.

I urge you to please support the redevelopment project at 1911 Sunset Boulevard to ensure we save a legacy business and continue to house our neighbors in need. If you have any questions, please don't hesitate to reach out to my staff Williams Lopez at Williams.Lopez@sen.ca.gov or (213) 483-9300.

Sincerely,

María Elena Durazo
State Senator, Twenty-Fourth District

To Whom It May Concern:

As a resident of Los Angeles, I have seen first-hand the drastic toll that COVID-19 has taken on local businesses and how it has sharply increased our unhoused population.

The City of Los Angeles must advance initiatives that will help Angelenos get back on their feet and protect their livelihoods.

This is why I support the redevelopment at 1911 Sunset Boulevard - a timely project that will help save Taix, an iconic local restaurant, spur much-needed housing stock, and activate a beloved community corridor.

Taix has been a staple of the Echo Park community for decades, and without the thoughtful modernization efforts, Taix would not be able to revitalize operations and stay afloat. Taix deserves the City's support to ensure it can continue to operate for decades to come.

Not only will this project save Taix, but it will also create new residential units, including affordable units reserved for very low-income households. We cannot afford to delay any housing project when we are in the midst of a critical housing crisis. This project will also add commercial space that will create a reinvigorated, pedestrian-centric Echo Park neighborhood hub, which will ultimately boost the local economy.

Please support the redevelopment project at 1911 Sunset Boulevard to ensure we save a legacy business and continue to house our neighbors in need!

Hi Oliver,

I'm emailing to inquire about the current plans for the Taix site at 1911 W. Sunset Blvd. I see on the Case Summary & Documents page that plans were submitted in May of 2020, have there been updated sets submitted to the City since?

Best,

Erik

Hi Oliver,

I'm following up on my previous email below to see if there are any updates on the proposed project at 1911 W. Sunset Blvd. Any information on the matter would be much appreciated.

Best,

Erik

Re: **California Public Records Act Request** re CPC-2020-3140-CU-DB-MCUP-SPR / ENV-2020-3141-SCPE

This request is made under the California Public Records Act pursuant to Government Code §6250, et seq which states in part **"...access to information concerning the conduct of the people's business is a fundamental and necessary right of every person in this state."**

Please provide copies of the following from the City (as "City" is defined below).
For ease of reference in this document, please refer to the following defined terms:

The "**City**" shall refer to the **City of Los Angeles**, its **City Council**, the **Mayor** and **all members of the City Council**, including **Councilmember Mitch O'Farrell**, his **Council District 13 office**, **Craig Bullock**, **staff** and **employees**, all **members**, **officials**, **employees**, **consultants** and **agents** of the **City commissions**, **boards**, **offices**, **departments**, **divisions**, the **City Attorney's office** and **any and all in-house and outside counsel for the City**.

"Project" or "site" shall refer to "**Taix**", "**Taix Restaurant**", "**Taix French Restaurant**", Environmental Case No. **ENV-2020-3141-SCPE**, **CPC-2020-3140-CU-DB-MCUP-SPR** and **1911-1931 West Sunset** Blvd. & **1910-2018 West Reservoir** St. Los Angeles, CA 90026.

"Developer" shall refer to **any principal**, **owner**, **employee**, **agent**, **consultant** or **attorney representing the owners or applicants of the TAIX site**, including but not limited to **Holland Partners Group, LLC**, **Ryan Guthry**, **Mike Taix**, **AC Martin**, **Jim Dixon**, **Loeb and Loeb**, **Allan Abshez**, **Kathryn McGee**, **GPA Consulting** and **any of their members**, **partners**, **employees**, **agents**, **Consultants** and/or **lobbyists**, and **all others**.

"Email" includes, but is not limited to, correspondence to or from any email account through which any City business is being conducted, including but not limited to email accounts assigned by the City's Information Technology Agency to City officials, employees or consultants, and consistent with City of San Jose v. Superior Court of Santa Clara County, **each and every personal email account outside the City's email system upon which any City business has been conducted**.

"Text messages" includes, but is not limited to, correspondence to or from any communications device of the City or a City official, employee or consultant's personal communications device over which text messages may have been sent or received and stored which are City business.

"Meeting Notes" includes, but is not limited to any personal handwritten or electronic notes maintained by any City employee, contractor, or agent, regardless of the ownership of the media.

"Exchanged between" shall mean the passing of a document from one person to another by any means of transmission or delivery.

"Document," as defined in Govt. Code § 6252(g), shall mean any handwriting, typewriting, printing, photostating, photographing, photocopying, transmitting by electronic mail, message texting or facsimile, and every other means of recording upon any tangible thing any form of communication or representation, including letters, words, pictures, sounds, or symbols, or combinations thereof, and any record thereby created, regardless of the manner in which the record has been stored.

Please note that Documents and Emails includes, but is not limited to, **correspondence to or from any email account through which any public business is conducted, including but not limited to personal or otherwise private email accounts belonging to government officials, employees or consultants**, pursuant to the California Supreme Court's decision in City of San Jose v. Superior Court (2017) 2 Cal.5th 608. This also includes text messages on any public or private device on which discussions about the Project and other public matters was discussed. Please ensure that you have secured and produced all such personal or otherwise private emails and texts. Therefore, we are also requesting that all relevant officials, employees and agents preserve intact under a litigation hold all such "personal" and official emails and text messages, and not to destroy, delete, allow to be automatically purged, or otherwise to engage in or permit spoliation of such evidence. To the extent that such emails or texts have been deleted, purged or otherwise spoliated, we demand that the holders of these devices immediately be informed that they must take all efforts to retrieve any deleted or otherwise purged emails and texts, and make all efforts to retrieve and preserve them. Please confirm that you will do so.

The public records requests include:

1. All documents beginning from January 1, 2019 through the date of your compliance with this request, which refer, relate to, or are any communications exchanged on the one hand between, among, including or with any member of the City and/or Department including but not limited to Department of City Planning ("DCP"), staff assigned to this Project, LADBS staff assigned to this Project, and on the other hand, the Developer (as defined on page 1), related to the Project and/or including but not limited to any and all emails, attachments to emails, text messages, staff reports, including drafts and documents in "working files," studies, photographs, memoranda and internal memoranda, agenda items, agenda statements, correspondence, SMS and/or MMS texts, notes, photos, and audio and/or video recordings.

2. All documents beginning from January 1, 2022 through the date of your compliance with this request, which refer, relate to, or are any communications exchanged on the one hand between, among, including or with any member of the City and/or Department including but not limited to DCP, staff assigned to this Project, LADBS staff assigned to this Project, and on the other hand, the Developer (as defined on page 1), related to the Project and/or including but not limited to any and all emails, attachments to emails, text messages, staff reports, including drafts and documents in "working files," studies, photographs, memoranda and internal memoranda, agenda items, agenda statements, correspondence, SMS and/or MMS texts, notes, photos, and audio and/or video recordings.

Please note that **communications between the City and the Developer, and/or their respective counsel, are not privileged and must be produced.** Citizens for Ceres v. Superior Court (2013) 217 Cal.App.4th 889, 922. Accordingly, you may not withhold from the Project's administrative record, delete or otherwise destroy or spoliate any documents exchanged between, among, to/from or including the City and the Developer or their respective counsel. If you disagree with this proposition, please promptly provide any legal grounds for your position that any documents exchanged between the City and Developer (both as broadly defined on page 1) are or could be privileged and not required to be included in the administrative record. Please also describe with specificity the categories of such documents you claim would be subject to any privilege or exemption to production.

We draw your attention to Government Code § 6253.1, which requires a public agency to assist the public in making a focused and effective request by: (1) identifying records and information responsive to the request; (2) describing the information technology and physical location of the records; and (3) providing suggestions for overcoming any practical basis for denying access to the records or information sought.

If you determine that any information is exempt from disclosure, we ask that you reconsider that determination in view of Proposition 59 which amended the State Constitution to require that all exemptions be "narrowly construed." Proposition 59 may modify or overturn authorities on which the City has relied in the past. Should you deny any part of this request, you are required to provide a written response describing the legal authority on which you rely.

Please be advised that Government Code § 6253(c) states in pertinent part that the agency "**shall promptly notify the person making the request of the determination and the reasons therefore**." (Emphasis added.) Section 6253(d) further states that **nothing in this chapter "shall be construed to permit an agency to delay or obstruct the inspection or copying of public records. The notification of denial of any request for records required by Section 6255 shall set forth the names and titles or positions of each person responsible for the denial."** (Emphasis added.)

Additionally, Government Code § 6255(a) states that the "agency shall justify withholding any record by demonstrating that the record in question is exempt under expressed provisions of this chapter or that on the facts of the particular case the public interest served by not disclosing the record clearly outweighs the public interest served by disclosure of the record." This provision makes clear that the agency is required to justify withholding any record with particularity as to "the record in question."

Please clearly state in writing pursuant to Section 6255(b): (1) if you are withholding any documents; (2) if you are redacting any documents; (3) what documents you are so withholding and/or redacting; and (4) the alleged legal bases for withholding and/or redacting as to the particular documents. It should also be noted that to the extent documents are being withheld, should those documents also contain material that is not subject to any applicable exemption to disclosure, then the disclosable portions of the documents must be segregated and produced.

Govt. Code § 6253.9(a) requires that the agency provide documents in their native format, when requested. Pursuant to that code section, please also provide the requested documents, including all applications, in their native and electronic format.

We request that you preserve intact all documents and computer communications and attachments thereto, including but not limited to all emails and computer files, wherever originated, received or copied, regarding the subject matter of the above- referenced cases, including archives thereof preserved on tape, hard drive, disc, or any other archival medium, and including also any printouts, blowbacks, or other reproduction of any such computer communications. Pursuant to, inter alia, Pub. Res. Code Section 21167.6(e), the documents requested herein must be retained – notwithstanding any contrary City document or email retention policies.

In light of COVID, and consistent with the remote/ electronic/telephonic protocols that have been imposed on the public by the City, we ask that as to any documents (should there be any) that are only in paper form, that **all such documents also be made available electronically**.

As required by Government Code § 6253, please respond to this request within ten days. Because we are emailing this request on March 18, 2022, please ensure that your response is provided to us by no later than March 28, 2022. Thank you.

Thank you.

CPC-2020-3140-CU-DB-MCUP-SPR: Taix Comments

1 message

Daniel Paul <danieldpaul@gmail.com> Wed, Mar 16, 2022 at 2:04 PM
To: oliver.netburn@lacity.org

Dear Mr. Netburn,

Thank You for the opportunity to speak today (City of City Planning Hearing, March 16, 2022, 11:20am) regarding item CPC-2020-3140-CU-DB-MCUP-SPR: Taix French Restaurant. You did a fantastic job overseeing the meeting. As I mentioned in my comments, I am one of the architectural historians that drafted the City of Los Angeles Historic Cultural Monument application for the property.

I wanted to add a couple items to my comments, for the record.

The firm that the applicant has hired: A.C. Martin and Associates, has designed nearly half of the downtown Los Angeles skyline. They are more than capable of designing a handsome, tall residential tower that could preserve: in part or in whole, Taix French Restaurant as it exists today. I also wanted to mention that just right across the street, there is a precedent for multi-story tower dating back to 1965: the 10-story California Federal Bank tower that itself is an Echo Park place-marker. It seems like there would be a potential for a real gateway element.

I understand Mr. Taix' concerns regarding his business, but even today, the primary point he brought up in that regard was not a lack of customers, but the under-utilized banquet rooms and the parking area- which the above option would be focused upon. Neither Charles Fisher nor I- the two architectural historians that worked upon the nomination, brought the banquet rooms up as a primary character defining feature. Though ideally their reuse would be nice to consider, if the demolition of the banquet rooms, plus their connected under-utilized kitchen, means the preservation of the rest of the building, in my opinion the community may well support this option.

Otherwise, so much about this project, and the City's support for it, feels disingenuous right now, and I think that is why so many today spoke up against it. Taix is still quite popular and busy. Barring an EIR which of course really is called for, please consider a push on the applicant to truly consider alternatives that preserve the present building. Akin to a community meeting hall, people go to Taix not just because it is a legacy business, but because it is within a space that feels authentic, warm and genuine. Any surviving Continental Dining interiors now exude these qualities and that is why they are beloved. I can't imagine that the residents of any new project adjacent to Taix would not wholly embrace this as their own; a reasonable French restaurant of character just outside their door. As much as the current space would become even more popular- banquet rooms or not, a new Taix in the new building will likely be ignored. Many involved must also sense this already, and that too feels disingenuous.

Thank You,

Daniel

Mr. Netburn:
This is a letter regarding case numbers CPC-2020-3140-CU-DB-MCUP-SPR and ENV-2020-3141-SCPE, scheduled for tomorrow's public hearing at 11:00am.
object to the proposed development. Consideration of this development as a SCPE is highly improper due to the many environmental impacts, including but not limited to the following:
1. Demolition of an historic resource:
The City of Los Angeles Cultural Heritage Commission ("CHC") determined that the Taix building met the criteria of the Cultural Heritage Ordinance and is a historic resource. Taix has been acknowledged in Survey LA and recognized twice by the City of Los Angeles as being a culturally historic resource. Further, the site is eligible for the State and National historic registry.
This fact alone prevents this proposal from moving forward as a SCPE.
Mitch O'Farrell in a live zoomed changed the existing laws of conservation and Historic nomination designations to "designate" only two exterior signs and a bar top. This is not what the designation measn and is in conflict with the laws of this City.
It is an unheard of and illegal use of the City's Cultural Heritage Ordinance, and the Secretary of the Interior's Standards for Rehabilitation and constitutes an unmitigable environmental impact.

The building itself IS the physical and complete historic resource.
It is absurd to think of saving JUST 2 signs and the bar top.
Currently in Los Angeles, there is no program or ordinance allowing the historic designation of a business.
This project with its huge size and its location as the hub to DTLA and on busy Sunset boulevard clearly has environmental impacts. These things Mitch is trying to circumvent for the project and not the community.

On 12/17/2020 the CHC made this point clearly.
But Councilmember O'Farrell goes against the legally required CEQA review for the proposed project.

Mitch O'Farrell's request seeks to entitle the proposed project by "skipping" (SCPE) the required environmental review which would be required for a project this size and location.

Demolition would constitute an unmitigatable environmental impact, this project does not meet the requirements of a SCPE and a full environmental impact report (EIR) is required by law.

Mitch O'Farrell's illegal move is crushing to an historic beloved landmark in our community. We have asked to have mixed use proposals preserving Taix. Demolition is completely illegal and a sad blow to a city whose history is eroding at the hands of the illegal moves by men like Mitch O'Farrell.

I ask that the LAWS be upheld and the greed stop in the name of preserving the history of Los Angeles. Please uphold what our conservation, citizens and lovers of Taix know to be true. This is a place where all walks of the community come to share food and company. These things are precious and our historic preservation is supposed to protect these beliefs.

Sincerely,

Annie Sperling

Mr. Netburn,

Please add me to the interested party list with the information
Provided below. If the City Clerk will be distributing any Hearing Notices,
Then I will be interested in those as well.

Thank you providing the public the opportunity to speak today.

I thought you did a fine job at moderating a respectful hearing.

Mr. Netburn:

Further to our previous email, and to correct the false statements made by the applicants in today's hearing, attached is a copy of the Petition filed in case LASC 21STCP02612, which is not a pure Brown Act case. As you can see, the applicants are named as Real Parties on the Petition.
We are in the process of expanding on the violations directly related to historical preservation by preparing our first Amended Petition and Complaint in the legal action.

Our Petition can be entered into the Administrative Record in case# CPC-2020-3140-CU-DB-MCUP-SPR / ENV-2020-3141-SCPE to include all of the exhibits in our Petition which also demonstrate substantial evidence of a historic resource exists.

We would like to also point out that everything SLHT has provided you with has been **substantially supported by evidence**. We do not believe the same can be said for the applicants.

Please make sure we are on the list of parties to receive notice via email. If USPS is absolutely required, please use the address on our Petition.

Thank you again.

~SLHT

Petitioners In Pro Per

SUPERIOR COURT OF THE STATE OF CALIFORNIA

FOR THE COUNTY OF LOS ANGELES

THE SILVER LAKE HERITAGE TRUST, a California nonprofit public benefit corporation and ANNIE SPERLING, an individual.

Petitioners/Plaintiffs,

vs.

CITY OF LOS ANGELES, a municipal corporation; the CITY OF LOS ANGELES CITY COUNCIL; and DOES 1 through 10, inclusive;

Respondents/Defendants.

HOLLAND PARTNER GROUP, LLC, a Limited Liability Company,

Real Party in Interest.

Case No. 21STCP02612

VERIFIED PETITION FOR WRIT OF MANDATE AND COMPLAINT FOR DECLARATORY AND INJUNCTIVE RELIEF

[Code Civ. Proc. §§ 1060, 1085, 1094.5; Govt. Code § 54950 et seq., Los Angeles City Administrative Code]

1. Violation of the Brown Act (Govt. Code § 54950, et seq.);

2. Violation of the Brown Act (Govt. Code § 54953, et seq.);

3. Violation of Procedural Due Process (U.S. Const. 14th Amendment; Cal. Const. Art. 1, § 7);

4. Violation of the Right to Free Speech and to Petition the Government for Redress of Grievances (U.S. Const. 1st Amendment; Cal. Const. Art. 1, §§ 2(a), 3(a) and (b)); Equal Protection of the Laws (U.S. Const. 14th Amendment; Cal. Const. Art. 1, § 7);

5. Violation of Los Angeles City Administrative Code

6. Violation of Los Angeles City Administrative Code

7. Declaratory Relief.

Petitioners/Plaintiffs, THE SILVER LAKE HERITAGE TRUST ("Petitioners") a California nonprofit public benefit corporation and ANNIE SPERLING, an individual, (collectively "Petitioners") seek a writ of mandate and a declaration of the rights and duties of the parties, and preliminary and permanent injunctive relief against Respondents/Defendants City of Los Angeles and the Los Angeles City Council (the "City" or "Respondents"), and alleges as follows:

INTRODUCTION & BACKGROUND

1. This lawsuit challenges the action taken by the Los Angeles City Council at its June 2, 2021 remotely held City Council meeting in which Councilmember Mitch O'Farrell and the City Council violated the State's open meetings law, the Ralph M. Brown Act (Govt. Code § 54950 et seq.; hereinafter "the Brown Act").

2. In August 2020, Petitioners were applicants to the submission of a Historic Cultural Monument ("HCM") application, nominating a local landmark known as Taix French Restaurant ("Taix"). Due to the voluminous nature of the document, Petitioners request the 604-page PDF be presented and included as **Exhibit A** using this link.

3. On December 17, 2020 the Los Angeles body known as the Cultural Heritage Commission ("CHC") (tasked with overseeing the designation and protection of local landmarks) voted unanimously in recommending the designation of the Taix building, located at 1911-1929 West Sunset Blvd; 1910-2018 West Reservoir St. as a Historic Cultural Monument. Petitioners request the audio recording of the December 17, 2020 CHC hearing posted by the City be included as **Exhibit B** using this link.

4. On January 26, 2021 the Department of City Planning submitted a letter to the Planning and Land Use Committee ("PLUM"), recommending Taix for inclusion in the list of Historic-Cultural Monuments. Attached hereto as **Exhibit C** is a true and correct copy of the January 26, 2021 recommendation letter.

5. On the evening of May 3, 2021 and only hours away from the following day's PLUM meeting, Councilmember Mitch O'Farrell's ("O'Farrell" or

"Councilmember O'Farrell") Planning Director Craig Bullock sent a letter to the PLUM Committee informing them of O'Farrell's desire to "modify and supplement the Cultural Heritage Commission's January 26, 2021 Final Letter of Determination". Attached hereto as **Exhibit D** is a true and correct copy of Craig Bullock's 3-page letter dated May 3, 2021.

6. On May 4, 2021 around 7:50 am Petitioners emailed Councilmember Mitch O'Farrell's office requesting a continuance of their case # CHC-2020-5524-HCM, which was listed as Item No. 10 on the May 4, 2021 PLUM meeting agenda. No response was received from O'Farrell's office. Attached hereto as **Exhibit E** is a true and correct copy of the May 4, 2021 PLUM 15-page agenda. Note Item No. 10 is silent as to any "Amendment" proposed.

7. On May 4, 2021 around 9:30 am other interested members of the community alerted Petitioners that Councilmember Mitch O'Farrell's Planning Director Craig Bullock sent a second letter to the PLUM Committee informing them of O'Farrell's amendment to his previous "Amendment". Attached hereto as **Exhibit F** is a true and correct copy of Craig Bullock's 3-page letter dated May 4, 2021.

8. On May 4, 2021 the PLUM meeting took place. Petitioners and many other members of the public had their virtual hands raised but were not called upon to speak. Including the ~~application~~ appellant to the motion that was on the agenda.

9. Between January 2021 and May 2021 Petitioners sent Councilmember Mitch O'Farrell and his Planning Director Craig Bullock numerous emails requesting a meeting. Petitioners requests for a meeting with their elected official went ignored.

10. On June 2, 2021 the Regular City Council meeting was held. Petitioners and many other members of the public had their virtual hands raised but were not called upon to speak. Attached hereto as **Exhibit G** is a true and correct copy of the June 2, 2021 City Council 25-page agenda. Note Item No. 3 is listed under "Items for which Public Hearings Have Been Held", falsely leading the City Council to believe the Councilmember O'Farrell's "Amendment" was brought to PLUM in compliance and in

conformance to legal requirements that would allow this Item to advance to the next stage in the approval process. O'Farrell's representation of Item No.3 was an abuse of process.

11. On June 3, 2021 after receiving no responses from Councilmember Mitch O'Farrell's office, Petitioners mailed a cure or correct letter to the Office of the City Clerk and the City attorney's office. Attached hereto as **Exhibit H** is a true and correct copy of Petitioners June 3, 2021 3-page cure or correct letter. No response from the City was received.

12. On June 25, 2021 Petitioners mailed via USPS a cure or correct letter to the Office of the City Clerk pursuant to Govt. Code § 54960.1(a). Petitioners received a return receipt confirming the City received Petitioners letter on June 29, 2021. Attached hereto as **Exhibit I** is a true and correct copy of Petitioners June 29, 2021 cure or correct letter mailed to the Office of the City Clerk and the attached return receipt. No response from the City was received.

13. Petitioners allege that the major controversy that exists between Respondents and members of the public continues to cause prejudice against Petitioners as Respondents continue to conduct open meetings in violation of the Brown Act and the United States and California Constitutions. Petitioners have no reason to believe O'Farrell and Respondents will cease from violating the Brown Act and the United States and California Constitutions absent judicial intervention as sought herein.

THE MAY 4, 2021 PLANNING AND LAND USE MANAGEMENT ("PLUM") COMMITTEE MEETING

A. INCORRECT INSTRUCTIONS PROVIDED BY THE CITY TO THE PUBLIC

14. At the time of the May 4, 2021 PLUM meeting, Petitioners can confirm the agenda posted by the City for the May 4, 2021 PLUM meeting is at the following link: (Also **Exhibit E** but does not provide list of associated documents): https://web.archive.org/web/20210504043834/https://lacity.primegov.com/Portal/Meeting?compiledMeetingDocumentFileId=7873

15. The May 4, 2021 PLUM meeting begins with a clerk stating:

> "Members of the public who would like to offer public comment on the items listed on the Agenda should call 1669-254-5252 and use meeting ID 1616446631 and then press the number sign. Press the number sign again when prompted for participant ID. Once admitted into the meeting press asterisk 6 to request to speak. During public comment city staff will call on members of the public by the last four digits of their phone number. By pressing asterisk 6, callers raise their virtual hand. Once the caller hears the last four digits of their phone number, they will need to press asterisk 6 to unmute themselves, and should be ready to speak. Once the caller is ready to speak, they must state their name and the item or items they are calling to speak on. Failure to do so will result in the call being muted and subsequently disconnected. Appellants and or their representatives and applicants will be allowed to speak for a total of 3 minutes per side unless otherwise noted by the chairman of this committee. Members of the public wishing to speak on 1 agenda item only shall have an opportunity to speak for 1 minute. Members of the public wishing to speak on more than 1 item shall state that and shall be allowed to speak for a total of 2 minutes. Failure to raise your hand to speak in a timely manner before the comment period for the item ends results in forfeiture of the opportunity to participate in public comment for the item."

16. Shortly thereafter (06:34 in audio/video), a member of the public is called on to speak. The caller uses his time to inform the Committee and the public that the instructions given by the City to press "star 6 to request to speak" were incorrect and instead, are "actually star 9". Without this caller correcting the City's misguided information, members of the public would have been left *further* deprived of their rights to speak on any matter before the committee.

B. NO NOTIFICATION OF MITCH O'FARRELL'S "AMENDMENT"

17. The evening of May 3, 2021, Petitioners (who were also the HCM applicants) were informed by members of the community that Councilmember Mitch O'Farrell had sent a letter to PLUM (**Exhibit D**) seeking approval to "modify and supplement the Cultural Heritage Commission's January 26, 2021 Final Letter of Determination". Neither Petitioners nor members of the public were given notice of the "Amendment".

18. The following day on May 4, 2021 (the morning of the PLUM meeting) Councilmember Mitch O'Farrell sent a second letter to PLUM, submitting an amendment to his "Amendment" (**Exhibit F**).

19. Petitioners (who were also the HCM applicants), were not notified by the City of either letter describing O'Farrell's "Amendment" which sought to demolish the Taix building he simultaneously claimed to support as a historic cultural monument.

C. THE CITY FAILED TO POST & INCLUDE MITCH O'FARRELL'S "AMENDMENT" ON THE AGENDA

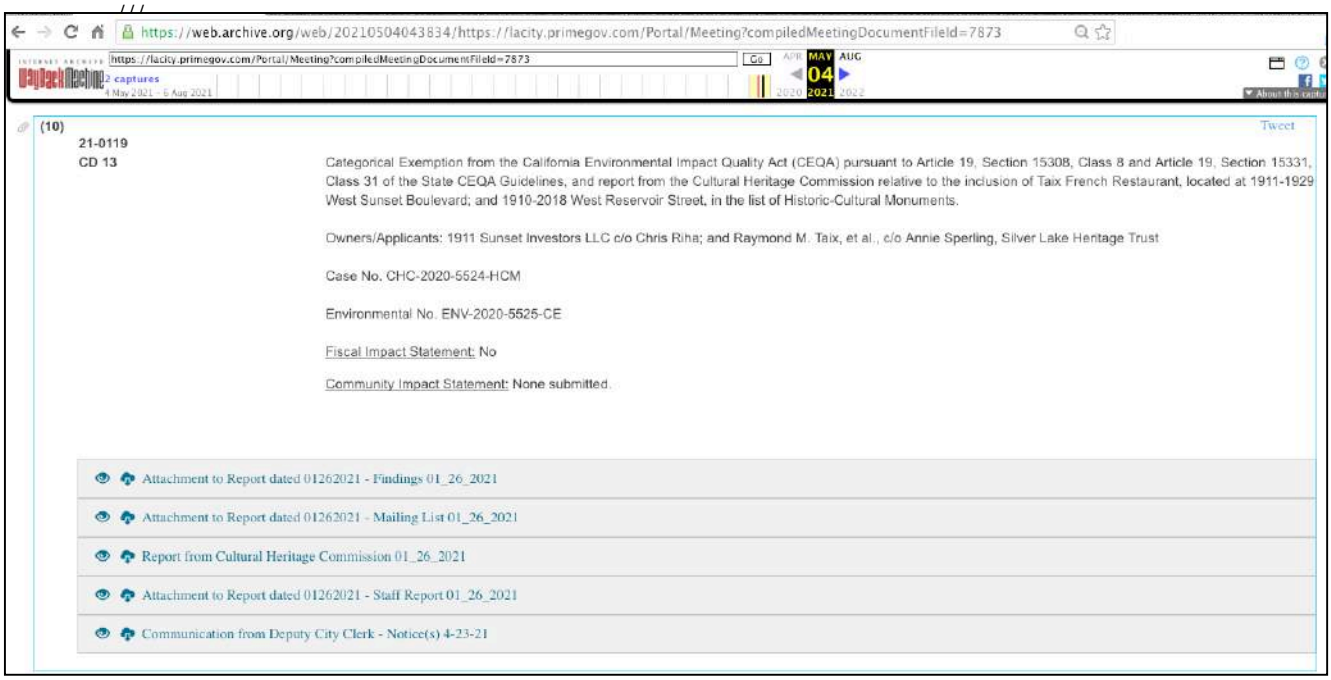
20. The Brown Act requires that **discussion items be placed on public agendas, as well as items, which may be the subject of an action, by the body. The purpose of describing each agenda item is to alert the public to topics under consideration so that members of the public may decide whether to monitor or participate in the meeting**. By the omission of a description of O'Farrell's "Amendment", a flawed agenda was produced; one that failed to inform the public of the action going before the Committee to be voted on.

21. Item No. 10 listed on the May 4, 2021 PLUM HTML agenda at that time is posted online as follows:

22. When a viewer arrives at this webpage, the agenda item appears as shown in the above screenshot. A viewer would not know to click within this description to find additional supporting documentation associated with the item to appear.

23. Item No. 10 listed on the May 4, 2021 PLUM HTML agenda after clicking inside the description is posted online as follows:

///



24. Only after clicking in a random area within the description of Item 10, would the viewer see the above list of 5 attachments associated with the item number (Item No. 10).

25. Attached hereto as **Exhibit J** is a true and correct copy of the attachment downloaded from the City website as seen with the above mentioned title "Attachment to Report dated 01262021 - Findings 01_26_2021.pdf".

26. Attached hereto as **Exhibit K** is a true and correct copy of the attachment downloaded from the City website as seen with the above mentioned title "Attachment to Report dated 01262021 - Mailing List 01_26_2021.pdf".

27. Attached hereto as **Exhibit L** is a true and correct copy of the attachment downloaded from the City website as seen with the above mentioned title "Report from Cultural Heritage Commission 01_26_2021".

28. Petitioners can confirm the document having the title "Report from Cultural Heritage Commission 01_26_2021.pdf" (604-page PDF) is a true and correct duplicate copy of **Exhibit A**.

29. Attached hereto as **Exhibit M** is a true and correct copy of the attachment downloaded from the City website as seen with the above mentioned title "Communication from Deputy City Clerk - Notice(s) 4-23-21.pdf"

30. The May 24, 2021 PLUM agenda **(Exhibit E)** and all five attachments fail to mention a single word or reference about Mitch O'Farrell's "Amendment".

31. In Hernandez v. Town of Apple Valley (2017), a town resident filed a lawsuit claiming he would have appeared at the meeting to express his opposition to the resolutions and MOU (Memorandum of Understanding) had the agenda described the actions to be taken. The court of appeal affirmed the Brown Act violation for failing to properly describe in the agenda specific actions to be taken at the town council's meeting concluding " "[t]his was troublesome as it is conceivable this was a major factor in the decision to send the matter to the electorate." The same circumstance is seen here. O'Farrell's "Amendment" itself is specifically what he sought approval for. No one would have known by looking at the May 24, 2021 PLUM agenda (**Exhibit E**) that anything other than the Cultural-Heritage Commission's *recommendation* was subject to approval, thus making it impossible for the public to make a decision as to whether they wanted to attend, and exercise their rights to provide comments on the proposed "Amendment" slipped in at the eleventh hour by Councilmember Mitch O'Farrell.

32. Left intact, the Cultural-Heritage Commission's recommendation for the Taix restaurant to be included as one of the City's Historic Cultural Monuments (also recognized by SurveyLA and multiple historians), the Taix building in its entirety would have been preserved as nominated in the HCM application and as supported by the City's Office of Historic Resources.

33. Mitch O'Farrell's "Amendment" sought to override the Cultural Heritage Commission, the Cultural Heritage Ordinance, the Office of Historic Resources, locally recognized historians, requests from his voters, and the City's own program enacted to acknowledge and preserve culturally significant buildings in the City, such as Taix.

34. Mitch O'Farrell's "Amendment", as seen in **Exhibit F**, claimed to support the Taix's historic cultural monument nomination, provided the building be demolished except for three accessories; its bar top and two signs. No such gutting of the CHC's recommendation was discussed before the CHC, nor was a proposed amendment as disastrous as this before members of the public.

35. In complete violation of the City's Cultural Heritage Ordinance, these three salvaged accessory items would become Mitch O'Farrell's version of "historic designation" of the Taix French Restaurant. **Unlike any historic designation in the City**, O'Farrell's actions put the City's entire preservation process at risk using no objective legal standards, setting a deadly precedent.

36. Failing to post this critical piece of information, which drastically modifies the foundation of the Petitioners nomination, serves two specific interests: 1. the developers who seek approval for their massively upzoned project facilitated by a relaxed environmental review which is available to those who "preserve" a historic resource, and 2. Mitch O'Farrell, who has collected an approximate $137,349.00 in lobbying funds from said developers.

37. Govt. Code Section 54954.2(a) requires the legislative body of the local agency to post an agenda containing a brief general description of each item of business to be transacted or discussed at the meeting, including items to be discussed in closed session. The City failed to comply.

D. THE CITY FAILED TO CALL ON MEMBERS OF THE PUBLIC WHO RAISED THEIR VIRTUAL HANDS AND WERE WAITING TO SPEAK

38. Members of the public who attended the remotely held meeting on May 4, 2021 called in with the only information they had available to them that time. Not only were they not called on to speak, but had they been given the opportunity, they would have had no knowledge of Councilmember O'Farrell's last-ditch "Amendment" and therefore, would not have been able to comment on it.

39. Several members of the public who called in and raised their virtual hands to speak on Item No. 10 - including the applicant and one of the historians who prepared the nomination - were not called on to speak.

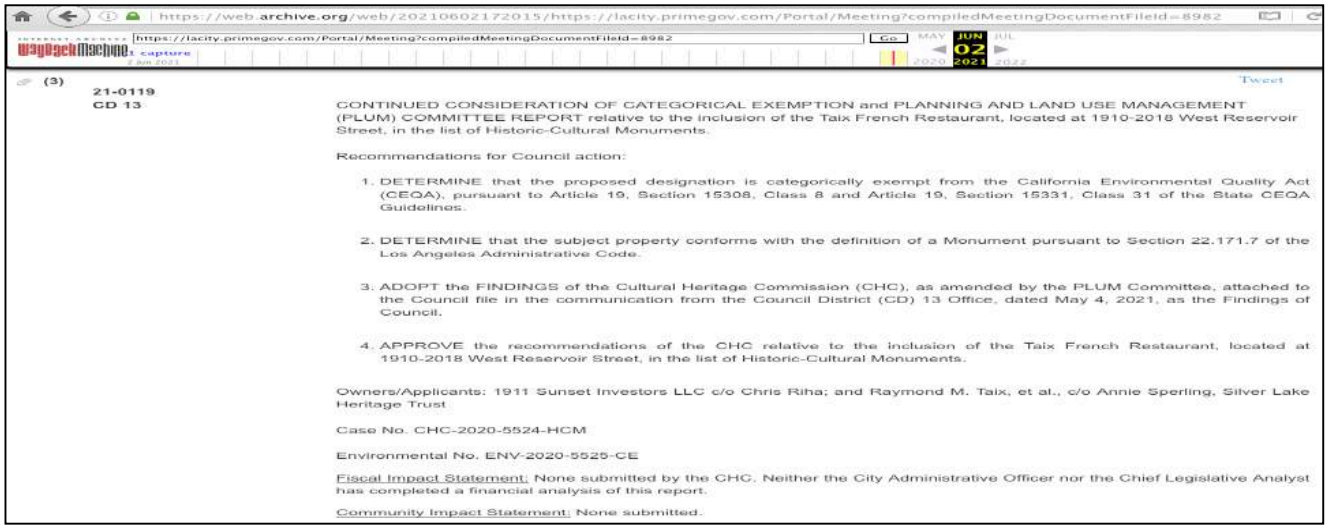
40. Govt. Code Section 54954.3 requires the City to call upon members of the public to directly address the legislative body on any item of interest to the public, before or during the legislative body's consideration of the item. The City failed to comply.

THE JUNE 2, 2021 CITY COUNCIL ACTION

A. AGENDA ISSUES

41. As of the time of the filing of this petition, Petitioners can confirm the video recorded and posted by the City of the June 2, 2021 City Council meeting is at the following link beginning at 32:15:
https://lacity.primegov.com/Portal/Meeting?compiledMeetingDocumentFileId=8982

42. Item No. 3 listed on the June 2, 2021 Regular City Council meeting HTML agenda at that time is posted online as follows (also hyperlinked):



https://web.archive.org/web/20210602172015/https://lacity.primegov.com/Portal/Meeting?compiledMeetingDocumentFileId=8982

CD 13

CONTINUED CONSIDERATION OF CATEGORICAL EXEMPTION and PLANNING AND LAND USE MANAGEMENT (PLUM) COMMITTEE REPORT relative to the inclusion of the Taix French Restaurant, located at 1910-2018 West Reservoir Street, in the list of Historic-Cultural Monuments.

Recommendations for Council action:

1. DETERMINE that the proposed designation is categorically exempt from the California Environmental Quality Act (CEQA), pursuant to Article 19, Section 15308, Class 8 and Article 19, Section 15331, Class 31 of the State CEQA Guidelines.
2. DETERMINE that the subject property conforms with the definition of a Monument pursuant to Section 22.171.7 of the Los Angeles Administrative Code.
3. ADOPT the FINDINGS of the Cultural Heritage Commission (CHC), as amended by the PLUM Committee, attached to the Council file in the communication from the Council District (CD) 13 Office, dated May 4, 2021, as the Findings of Council.
4. APPROVE the recommendations of the CHC relative to the inclusion of the Taix French Restaurant, located at 1910-2018 West Reservoir Street, in the list of Historic-Cultural Monuments.

Owners/Applicants: 1911 Sunset Investors LLC c/o Chris Riha; and Raymond M. Taix, et al., c/o Annie Sperling, Silver Lake Heritage Trust

Case No. CHC-2020-5524-HCM

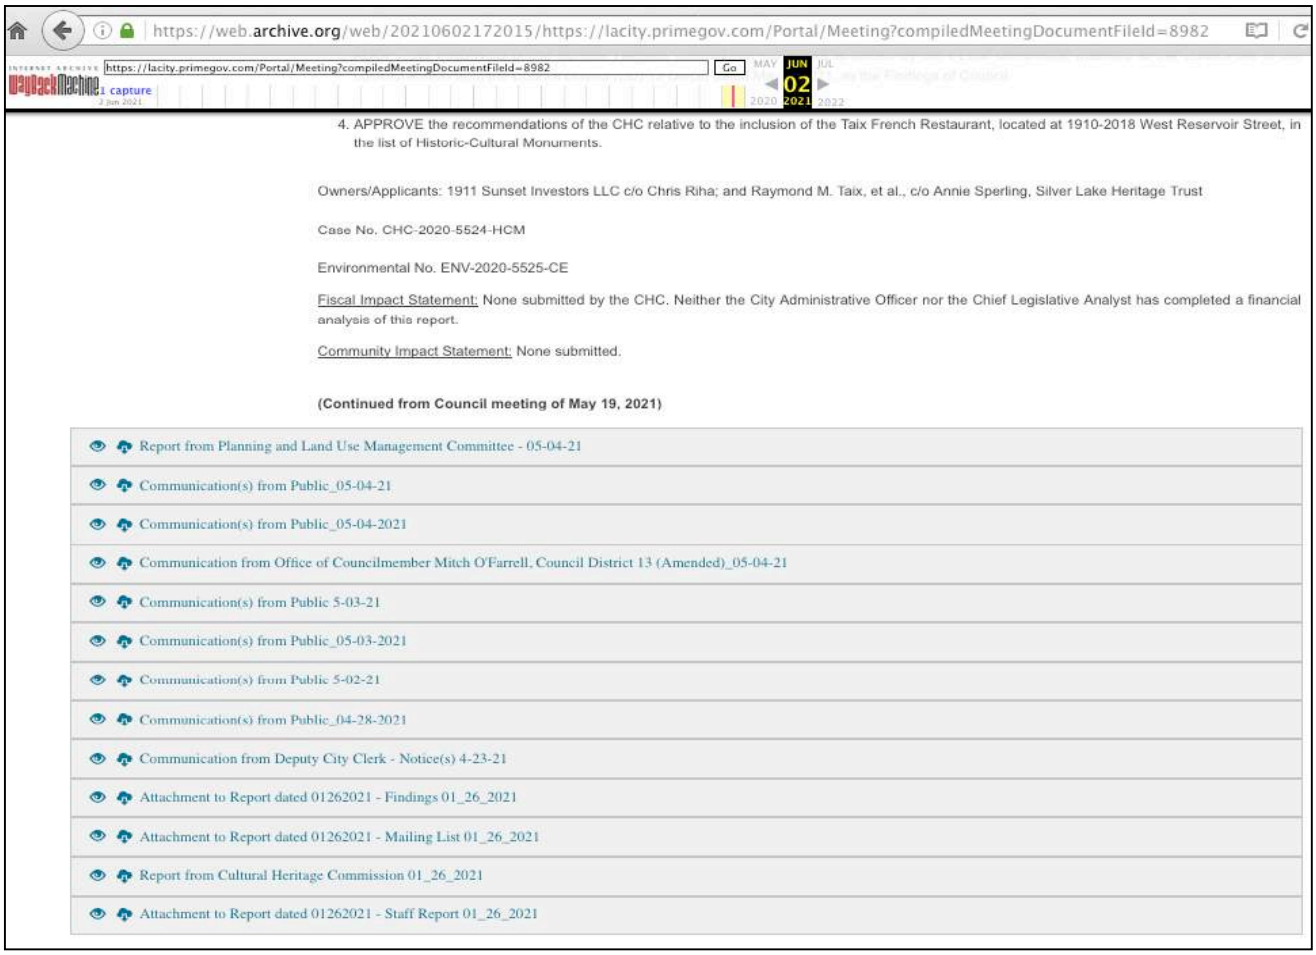
Environmental No. ENV-2020-5525-CE

Fiscal Impact Statement: None submitted by the CHC. Neither the City Administrative Officer nor the Chief Legislative Analyst has completed a financial analysis of this report.

Community Impact Statement: None submitted.

43. When a viewer arrives at this webpage, the agenda Item appears as shown in the above screenshot. A viewer would not know to click within this description to find additional supporting documentation associated with the Item to appear.

44. Item No. 3 listed on the June 2, 2021 Regular City Council meeting HTML agenda at that time after clicking inside the description is posted online as follows:



45. Only after clicking in a random area within the description of Item 3, the viewer would see the above list of 13 attachments associated with the item (Item No. 3).

46. The June 2, 2021 agenda leads a reader to believe that Councilmember Mitch O'Farrell's eleventh hour "Amendment" was made available to the public and open to public comment in compliance with the Brown Act at the PLUM meeting; which it was not.

47. Attached hereto as **Exhibit N** is a true and correct copy of the attachment downloaded from the City website as seen in the above screenshot having the above title "Report from Planning and Land Use Management Committee - 05-04-21.pdf".

48. Attached hereto as **Exhibit O** is a true and correct copy of the attachment

downloaded from the City website as seen in the above screenshot having the above title "Communication(s) from Public_05-04-21.pdf".

49. Attached hereto as **Exhibit P** is a true and correct copy of the attachment downloaded from the City website as seen in the above screenshot having the above title "Communication(s) from Public_05-04-21.pdf".

50. Petitioners can confirm the document having the title "Communication from Office of Councilmember Mitch O'Farrell, Council District 13 (Amended)_05-04-21.pdf" is a true and correct duplicate copy of **Exhibit F**.

51. Attached hereto as **Exhibit Q** is a true and correct copy of the attachment downloaded from the City website as seen in the above screenshot having the above title "Communication(s) from Public 5-03-21.pdf".

52. Attached hereto as **Exhibit R** is a true and correct copy of the attachment downloaded from the City website as seen in the above screenshot having the above title "Communication(s) from Public_05-03-2021.pdf".

53. Attached hereto as **Exhibit S** is a true and correct copy of the attachment downloaded from the City website as seen in the above screenshot having the above title "Communication(s) from Public 5-02-21.pdf".

54. Attached hereto as **Exhibit T** is a true and correct copy of the attachment downloaded from the City website as seen in the above screenshot having the above title "Communication(s) from Public_04-28-2021.pdf".

55. Attached hereto as **Exhibit U** is a true and correct copy of the attachment downloaded from the City website as seen in the above screenshot having the above title "Communication from Deputy City Clerk - Notice(s) 4-23-21.pdf".

56. Petitioners can confirm the document having the title "Attachment to Report dated 01262021 - Findings 01_26_2021.pdf" is a true and correct duplicate copy of **Exhibit J**.

57. Petitioners can confirm the document having the title "Attachment to Report dated 01262021 - Mailing List 01_26_2021.pdf" is a true and correct duplicate copy of **Exhibit K**.

58. Petitioners can confirm the document having the title "Report from Cultural Heritage Commission 01_26_2021.pdf is a true and correct duplicate copy of **Exhibit L**.

59. Petitioners can confirm the document having the title "Attachment to Report dated 01262021 - Staff Report 01_26_2021.pdf" is a true and correct duplicate copy of **Exhibit A (**submitted via digital link).

60. The June 2, 2021 Agenda implies the general public was afforded the ability to access and participate in the committee meeting that alleges to have adopted the findings of the Cultural Heritage Commission ("CHC") recommendation, "as amended by the PLUM Committee…"

61. The June 2, 2021 agenda incorrectly lists Item No. 3 under "Items for which Public Hearings Have Been Held". As previously stated by Petitioners, this is incorrect; the "Amendment" was not introduced or made available to the public in a timely manner, and was not agendized in compliance with the Brown Act, which requires that the public be sufficiently notified of the item seeking approval and be afforded the opportunity to exercise their speaking rights on the matter seeking approval.

62. The June 2, 2021 agenda states: "Some items on the agenda may be approved without any discussion, however, any item may be called "special" by a Councilmember. If an item is called "special" it will be "held" until the remainder of the items on the Council agenda have been acted on by the Council. An item may also be called "special" **if a member of the public has requested to speak on the item and a public hearing was not previously held."**

63. According to the June 2, 2021 agenda, the act of calling an item "special" indicates that public comment should be allowed, since the previous meeting had no notification of the "Amendment" and as seen and heard by Petitioners, Councilmember O'Farrell says he "would like to call item 3 "special" for comments" (00:34:56).

64. Calling an item "special" is not defined anywhere in the Los Angeles City Council Rules. However, history shows it is a long-standing City Council *tradition* that calling an item "special" indicates that there will be public comment allowed on that item. O'Farrell called Item No. 3 "Special" as seen at (00:34:56) in the video, then kept public comment on this Item closed, in violation of the Brown Act.

65. By calling the item "special", Mitch O'Farrell acknowledged the defective agenda, as it should have never been listed as an "Item for which a previous public hearing has been held". Instead of calling on members of the public who had called in and raised their virtual hands to speak on what O'Farrell knew was an incredibly controversial matter, Mitch O'Farrell spoke on his own behalf for approximately 6 minutes, robbing the public of their time.

B. THE CITY FAILED TO CALL ON MEMBERS OF THE PUBLIC WHO RAISED THEIR VIRTUAL HANDS AND WERE WAITING TO SPEAK

66. Petitioners and members of the public who attended the remotely held City Council meeting on June 2, 2021 called in waiting patiently to speak on Item No. 10, only to never be called on.

REGULATORY FRAMEWORK AT LOS ANGELES CITY COUNCIL

67. "The People of California do not yield their sovereignty to the agencies which serve them. The people, in delegating authority, do not give their public servants the right to decide what is good for the people to know and what is not good for them to know. The people insist on remaining informed so that they may retain control over the instruments they have created." Govt. Code § 54950.

68. California Constitution, Article 1, Section 3(b)(1), states: "The people have the right of access to information concerning the conduct of the people's business, and, therefore, the meetings of public bodies and the writings of public officials and agencies shall be open to public scrutiny."

69. In enacting the Brown Act, the California Legislature found and declared "the public commissions, boards and councils and the other public agencies in this State exist to **aid in the conduct of the people's business**." Govt. Code § 54950.

70. The Brown Act requires that discussion items be placed on public agendas, as well as items which may be the subject of an action by the body. The purpose of describing each agenda item is to alert the public to topics under consideration so that members of the public may decide whether to monitor or participate in the meeting.

71. The People of California have elevated the right to transparent government, accountable to the people, to a right protected by their State Constitution. California Constitution, Article 1, Section 3 (a), states: "[t]he people have the right to instruct their representatives, petition government for redress of grievances, and assemble freely to consult for the common good."

72. The only predictability and consistency we have in our City's legal system right now, is the plausible assumption the publics rights as constituents will be violated, by the very individuals they voted in to office.

73. Councilmember Mitch O'Farrell was well aware of the Petitioners and the public's position on Taix; he knew it was a hotly contested issue. Govt. Code Section 54954.3(c) requires O'Farrell and the rest of the City Council to not prohibit public criticism of the policies, procedures, programs, or services of the agency, or of the acts or omissions of the legislative body. Nothing in this subdivision shall confer any privilege or protection for expression beyond that otherwise provided by law. The Brown Act requires that the O'Farrell, and the rest of the City Council, "shall provide an opportunity for members of the public to directly address the legislative body on any item of interest to the public." (Gov. Code § 54954.3, subd. (a); see also Galbiso v. Orosi Public Utility Dist. (2008) 167 Cal.App.4th 1063, 1079–1080. This requirement remains mandatory during "teleconference meetings;" the legislative body "shall teleconference meetings in a manner that **protects the statutory and constitutional rights of the parties or the public** appearing before the legislative body of a local agency." (Gov. Code § 54953,

subd. (b)(3).) A teleconference meeting must "provide an opportunity for members of the public to address the legislative body directly pursuant to Section 54954.3." (Ibid.)

74. Councilmember Mitch O'Farrell and the City have failed to comply with these provisions; and they continue to do so.

75. An item of business approved in violation of the City Council's rules is a failure to proceed in accordance with law as authorized under City Charter, and any action taken pursuant to actions that violate the City Council's rules are null and void.

FIRST CAUSE OF ACTION

Violation of the Brown Act, Govt. Code § 54954.3(a)

(Rights to Public Comment)

76. Petitioner realleges and incorporates herein by reference the allegations of Paragraphs 1 through 75, inclusive, of this petition and complaint.

77. Govt. Code § 54954.4(c) sets forth the importance that the Legislature assigns to full and complete compliance with the Brown Act by stating: "The Legislature hereby finds and declares that complete, faithful, and uninterrupted compliance with the Ralph M. Brown Act (Chapter 9 (commencing with Section 54950) of Part 1 of Division 2 of Title 5 of the Govt. Code) is a matter of overriding public importance."

78. Govt. Code § 54954.3(a) imposes a mandatory duty upon the City to allow public comment on each and every item of business listed on a special meeting agenda issued under the authority of Govt. Code § 54956.

79. The wording of Govt. Code § 54954.3(a) expresses the Legislature's intent that public comment may only be denied at a regular meeting of the legislative body when an opportunity for public comment was afforded at a qualifying committee of the same legislative body.

80. There is no mention, in any publication made available to the public for the May 4, 2021 PLUM Agenda, of Councilmember O'Farrell's plan to significantly "amend" the Cultural-Heritage Commission's findings to the point of designating three accessories proposed to be removed from the building, prior to its demolition. On the

contrary, the May 4, 2021 agenda provides the CHC's findings and recommendation to proceed with approval of the nomination as recommended by the CHC.

81. As a direct and proximate cause of the actions of the City and its City Council, members of the public attending the City Council meeting in the only manner permitted via remotely were deprived of information concerning the constitutional and other legal infirmities of O'Farrell's "Amendment" to the CHC's recommendation, all in violation of Govt. Code § 54954.3(a).

82. As a direct and proximate cause of the actions of the City and its City Council, members of the public attending the City Council meeting in the only manner permitted via remotely were deprived of participating in the meeting for no other reason than the City not calling on them while they waited for their turn in violation of Govt. Code § 54954.3(a).

83. The City and City Council's actions in this matter are not "complete, faithful, or uninterrupted compliance" with the mandates of the Brown Act. The City and City Council have failed to proceed in the manner required by law.

SECOND CAUSE OF ACTION

Violation of the Brown Act, Govt. Code § 54954.3(c)

(Improper Prohibition of Public Criticism)

84. Petitioners reallege and incorporate herein by reference the allegations of Paragraphs 1 through 83, inclusive, of this petition and complaint.

85. Govt. Code § 54954.3(c) prevents a legislative body from prohibiting "public criticism of the policies, procedures, programs, or services of the agency, or the acts or omissions of the legislative body.

86. As described in this Petition and as described in greater detail in **Exhibit I,** Mitch O'Farrell's history of excluding members of the public has been a pattern of viewpoint discrimination and is again seen here in his violations of the Brown Act.

87. Petitioners are informed and believe, and based thereon alleges, that the purpose of the agenda omissions, lack of notice sent to Petitioners, failure of the City to

call on Petitioners and members of the public and the overall general manner in which Mitch O'Farrell treats his constituents is to effectively preclude public comment of specific controversial agenda items by speakers who are more likely to be critical of the him and actions of the City. O'Farrell's conduct is unbecoming actions of an elected official and an unreasonable content-based restriction on speech, which violates Government Code section § 54954.3(c) and the First Amendment.

THIRD CAUSE OF ACTION

Violation of the Right to Free Speech and to Petition the Government for Redress of Grievances – Refusal to Allow Members of the Public to Speak

(US Constitution Article 1)

88. Petitioners reallege and incorporate herein by reference the allegations of Paragraphs 1 through 87, inclusive, of this petition.

89. The First Amendment of the United States Constitution, and Article 1, sections 2(a), 3(a) and (b), prohibit government interference with the rights to free speech, assembly, association, and the right to petition the government for redress of grievances.

90. Petitioners, as homeowners, property owners, and representatives of resident stakeholders in the community, have a First Amendment right to attend and to speak at City Council and City Council Committee meetings in order to communicate their concerns and interests to government decision makers who were elected to make land use decisions with respect to major developments in Petitioners' community. Issues raised at said meetings are matters of public concern, and Petitioners have a First Amendment right to be heard on such issues.

91. By refusing to call upon and allow Petitioners to exercise their rights to speak and to be heard, both in the past, and continuing into the future, Respondents have deprived Petitioners of their First Amendment right to speech, assembly, association, and to petition the government for redress of grievances.

FOURTH CAUSE OF ACTION

Violation of the Right to Free Speech and to Petition the Government for Redress of Grievances – Refusal to Allow Members of the Public to Speak at Public Meetings

(US Constitution First and Fourteenth Amendment; California Constitution, Article 1)

92. Petitioners reallege and incorporate herein by reference the allegations of Paragraphs 1 through 91, inclusive, of this petition.

93. The First Amendment, and the Equal Protection Clause of the Fourteenth Amendment of the United States Constitution prohibits government discrimination based upon viewpoint and the exercise of fundamental rights.

94. Petitioners, and all members of the public, have a fundamental right to petition the government for redress of grievances, including the right to access the courts.

95. By refusing to call upon Petitioners and allow them to speak, both in the past, and continuing into the future, Respondents have deprived and continue to deprive Petitioners and other members of the public, of their Fourteenth Amendment right to equal protection of the laws.

96. Discrimination by a government policymaker such as Mitch O'Farrell constitutes discrimination against Petitioners because of the positions they have taken on matters of public concern in their communities and because they have been actively involved in voicing their concerns in the past. This discrimination on the part of Respondents is designed to discriminate and retaliate against Petitioners for exercising their fundamental rights and to chill Petitioners in the exercise of such fundamental rights.

97. Petitioners are entitled to a declaration that the City and its City Council, including City Council Councilmember Mitch O'Farrell, violated the Brown Act public speaking rights of Petitioners and all other persons similarly situated by actions they took at the June 2, 2021 meeting related to Item No. 3, and by their deprivation of the constitutionally - and statutorily - protected public participation rights of the persons who sought to speak.

98. Petitioners are entitled to the issuance of a writ of mandate invalidating the actions approving Mitch O'Farrell's "Amendment" adopted on June 2, 2021 by the City Council.

FIFTH CAUSE OF ACTION

Violation of Los Angeles Administrative Code Sec.22.171.10(d)(5)

99. Petitioners reallege and incorporate herein by reference the allegations of Paragraphs 1 through 98, inclusive, of this petition.

100. Los Angeles Administrative Code Section 22.171.10(d)(5) requires the City to mail a written notice at least ten days prior to the date of the hearing, to the applicant (Petitioners), the time, place and **purpose of the public hearing** on the proposed designation. The City failed to comply by providing no notice to the applicants (Petitioners). Had the City complied with this section, although it would not have cured the defect related to the City's failure to inform the public of the actual purpose of both the PLUM meeting and the City Council meeting, at the very least the applicants would have had sufficient knowledge of Mitch O'Farrell's "Amendment" and his intent to mutilate Petitioners HCM nomination. Instead, O'Farrell sought to slip it into City Council, hijacking Petitioners HCM nomination, disguising it as the original recommendation given by the Cultural Heritage Commission.

SIXTH CAUSE OF ACTION

Violation of Los Angeles Administrative Code Sec.22.171.10(f)

101. Petitioners reallege and incorporate herein by reference the allegations of Paragraphs 1 through 100, inclusive, of this petition.

102. Los Angeles Administrative Code Section 22.171.10(e) requires the City Council to approve or disapprove a proposed designation of a Monument within 90 days of the public hearing held before the Commission on the proposed designation. The City Council may unilaterally extend the 90-day time limit to act for a maximum of 15 days for good cause. With written consent of the owner, the time for the City Council to act may be extended by up to an additional 60 days. If the City Council does not act on the

application or initiation within the specified time limit, the application or initiation to designate a Monument shall be deemed to have been denied.

103. Nothing in the Council File demonstrates an extension was requested or granted. While Council File 21-0119 indicates: "Time Limit has been tolled pursuant to the Mayor's Public Order issued on 3/21/2020. (Original Time Limit: 3/17/21)", the Council File is silent as to when the tolling period ends. Petitioners are informed and believe leaving an open ended unknown period of time only further prejudices Petitioners and members of the public.

104. The Cultural-Heritage Commission hearing that approved Taix to be designated as a historical cultural monument took place on December 17, 2020. Nothing in the record reflects there was an extension granted, which lawfully extended the City Council's Time to Act.

SEVENTH CAUSE OF ACTION

Declaratory Relief

105. Petitioners reallege and incorporate herein by reference the allegations of Paragraphs 1 through 104, inclusive, of this petition.

106. Petitioners allege that the Respondents have deliberately failed and refused, and continue to deliberately to fail and refuse, to call upon members of the general public allowing them to speak at public meetings as required by the Brown Act and the United States and California Constitutions. Petitioners allege that this is done in order to discourage public participation at required hearings and to minimize opposition to projects favorable to City Council members and to discriminate and retaliate against Petitioners for their exercise of their fundamental rights to free speech, assembly, association, and to petition the government for redress of grievances. Petitioners allege that Respondents/Defendants, and all of them, have acted to chill Petitioners in the exercise of their fundamental rights, and to deprive Petitioners of liberty and/or property without due process of law.

107. O'Farrell's preference in applying legislation on a project-by-project prejudices Petitioners and deprives members of the public of their rights.

108. When Respondents proceed as they do in this manner, the entire public and the Courts are prejudiced because Petitioners have no other recourse to rectify the wrongs and attempt to eliminate the prejudice, other than to file lawsuits such as the instant lawsuit. The City failed to cure or correct its Brown Act violations upon notice of them. The public's interests were and are not served by the City's actions and inaction to cure, and Petitioners and the general public have been prejudiced thereby. Further, members of the public are burdened with the task of seeking judicial intervention in order to enforce laws they are well aware they are breaking on a daily basis. Councilmember O'Farrell has failed to serve his constituents as he was elected to do. He has instead been motivated and operates to serve his campaign contributors and developer friends, who have made it more than worth his while to keep Petitioners and other members of the public as far removed as they can, from participating in public matters of interest.

109. Petitioners seek a writ of mandate and injunctive relief, inter alia, compelling the Respondents, and all of them, to (1) void and nullify the June 2, 2021 City Council action on Item No. 3; and (2) acknowledge and call upon members of the public who have virtually raised their hands so as to allow full, complete, and unfettered participation by the public in compliance with the Brown Act and the United States and California Constitutions.

PARTIES

110. Petitioners are a California nonprofit public benefit corporation. Its members include residents, residential property owners and taxpayers in the City of Los Angeles who advocate for residential quality of life issues and challenge worsening environmental impacts such as increased traffic, land use and planning issues, preservation of historic and cultural resources, negative impacts on aesthetics and scenic vistas, increased burdens on public services and public safety, and unrestrained growth induced by placing oversized projects causing gentrification within the City.

111. Petitioners, as property owners and representatives of residents and property owners in the Los Angeles area have a liberty and/or property interest in land use, decisions regarding developments that occur in their neighborhoods, including the City's cultural heritage.

112. Petitioners are prejudiced by the City Council's violations of the Brown Act and have a substantial interest in ensuring that the City's decisions are in conformity with the requirements of law, and in having those requirements properly executed and the public duties of the City enforced. Petitioners are and will be adversely affected by impacts resulting from the City's capricious actions, and are aggrieved by the acts, decisions and omissions of the City as identified in this petition and complaint. Petitioners' are suing on their behalf and as applicable, on behalf of all persons who patiently waited after raising their virtual hands at the Los Angeles City Council meeting, and more broadly, including all those who seek to maintain the integrity of the City's democratic participation processes.

113. Respondent Los Angeles City Council is the elected governing body of the City, and is the body responsible for the decisions at issue herein.

114. Petitioners are ignorant of the (others) true names of respondents sued herein as DOES 1 through 10, inclusive, and therefore sues said respondents by those fictitious names. Petitioners' will amend the petition to allege their true names and capacities when the same have been ascertained. Petitioners' are informed and believe, and based thereon alleges, that each of these fictitiously named respondents is in some manner responsible for the wrongful conduct alleged in this petition. Petitioners' are informed and believe, and based thereon alleges, that these fictitiously named respondents were, at all times mentioned in this petition, the agents, servants, and employees of their co-respondents and were acting within their authority as such with the consent and permission of their co-respondents.

///

JURISDICTION AND VENUE

115. Jurisdiction over Respondents and each of them exists because each of the Respondents named in this litigation are present and operating within the jurisdictional limits of the County of Los Angeles.

116. Venue is proper because the acts and omissions complained of in this litigation took place remotely within this judicial district at the Los Angeles City Hall.

PRAYER FOR RELIEF

WHEREFORE, Petitioner prays for judgment as follows:

1. This Court issue a declaration that the City of Los Angeles and the Los Angeles City Council violated the Ralph M. Brown Act and the United States and California Constitutions by excluding members of the general public from speaking at the public meetings by:

a. Refusing to allow all interested persons to comment on Item No. 3 related to the questionable "amendment" made by Councilmember Mitch O'Farrell;

b. Adopting improper and unreasonable time limits on general public comment to the speakers who were called on and given the opportunity, including limiting each speaker to one minute, and by treating multiple-item speakers differently than single-item speakers, by forcing them to speak on all items in a single period at the beginning of the meeting, instead of during the consideration of the item of business they are commenting on;

c. Not calling on members of the public who are generally more critical of the City, for the improper purpose of prohibiting public criticism of the City and its unlawful actions;

d. Not calling on members of the public when the Councilmember and/or his staff had knowledge of the viewpoints held by many members of the public who do not agree with said Councilmember;

e. Failing to post material information to the May 4, 2021 PLUM agenda which subsequently incorrectly advanced the item to the June 2, 2021 City Council meeting for approval under false pretenses.

f. Misclassifying agenda Item No. 3 under "Items for which Public Hearings Have Been Held".

g. Calling Item No. 3 "Special", and by doing so, acknowledging the defect, opening the comment period for one lone speaker - Councilmember Mitch O'Farrell – who spoke on his own behalf, while continuing to misinform the public.

2. This Court issue a nullification of the action taken on Item No. 3 at the June 2, 2021 meeting, pursuant to Govt. Code § 54960.1;

3. This Court issue a permanent injunction and/or a peremptory writ of mandate prohibiting the City of Los Angeles and the Los Angeles City Council from:

a. Prohibiting interested persons who call in and who have followed the instructions on the agenda for public speaking, from commenting on any item of business listed on the posted agenda;

b. Implementing improper and unreasonably limits on public comment, including limiting each speaker to one minute per agenda item, and to three minutes per speaker, and by forcing multiple-item speakers to speak on all items in a single three-minute period, at the beginning of the meeting, instead of during the consideration of the item of business they are commenting on;

c. Discriminating against members of the public based upon their viewpoints on matters of public concern.

4. This Court find Councilmember Mitch O'Farrell guilty of a misdemeanor pursuant to Government. Code § 54959;

5. This Court issue a peremptory writ of mandate, without a hearing or further notice, immediately directing the actions adopted by the Los Angeles City Council at its June 2, 2021 meeting under Item No. 3 of the agenda are null and void; or, in the

DocuSign Envelope ID: B3423C34-8006-4D7D-905A-A84821ABE483

alternative, an order to show cause why the actions adopted by the Los Angeles City Council should not be declared null and void;

6. For attorneys' fees incurred in this action pursuant to Govt. Code Section 6259(d), 6259(e) and/or Code of Civil Procedure Section 1021.5;

7. For costs of suit; and

8. For such other and further relief as the Court may deem just and proper.

Los Angeles City Council
c/o Office of the City Clerk
City Hall, Room 395
Los Angeles, CA 90012

Attention: PLUM Committee

Dear Honorable Members:

TAIX FRENCH RESTAURANT; 1911-1929 WEST SUNSET BOULEVARD; 1910-2018 WEST RESERVOIR STREET; CHC-2020-5524-HCM; ENV-2020-5525-CE; CD-13

At its meeting of **December 17, 2020**, the Cultural Heritage Commission took the actions below to include Taix French Restaurant in the list of Historic-Cultural Monuments, subject to adoption by the City Council:

1. **Determined** that the proposed designation is categorically exempt from the California Environmental Quality Act (CEQA), pursuant to Article 19, Section 15308, Class 8 and Article 19, Section 15331, Class 31 of the State CEQA Guidelines;
2. **Determined** that the property conforms with the definition of a Monument pursuant to Section 22.171.7 of the Los Angeles Administrative Code;
3. **Recommended** that the City Council consider Taix French Restaurant for inclusion in the list of Historic-Cultural Monuments; and
4. **Adopted** the attached amended Findings of the Commission.

The Commission vote was as follows:

Moved:	Kanner
Seconded:	Milofsky
Ayes:	Barron, Kennard
Absent:	Buelna

Vote: 4 – 0

James K. Williams, Commission Executive Assistant II
Cultural Heritage Commission

The Cultural Heritage Commission would appreciate your inclusion of the subject property to the list of Historic-Cultural Monuments.

Time for Council to Act: The Commission action is hereby transmitted to the City Council for consideration. Pursuant to Section 22.171.10(f) of the Los Angeles Administrative Code, the Council may approve or disapprove in whole or in part an application or initiation for a proposed designation of a Monument. The Council shall act in 90-days of the public hearing held before the Commission on the proposed designation. The City Council may unilaterally extend the 90-day time limit to act for a maximum of 15 days for good cause. With written consent of the owner, the time for the City Council to act may be extended by up to an additional 60 days. If the Council does not act on the application or initiation within this specified time limit, the application or initiation to designate a Monument shall be deemed to have been denied.

Enclosure: Amended Findings of the Cultural Heritage Commission, Staff Report, Mailing List

TAIX FRENCH RESTAURANT
1911-1929 West Sunset Boulevard; 1910-2018 West Reservoir Street
CHC-2020-5524-HCM
ENV-2020-5525-CE

FINDINGS

(As Amended by the Cultural Heritage Commission on December 17, 2020)

- Taix French Restaurant "exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city or community" as the long-time location of Taix French Restaurant, a business that bears a significant association with the commercial identity of Los Angeles.

DISCUSSION OF FINDINGS

Taix French Restaurant meets one of the Historic-Cultural Monument criteria: the subject property "exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city or community" as the long-time location of Taix French Restaurant, a business that bears a significant association with the commercial identity of Los Angeles.

Los Angeles has a wide range of long-term businesses that have served residents, visitors, and tourists for decades and have made important contributions to the commercial history of Los Angeles. SurveyLA identifies several eligibility standards for evaluating properties for historic significance under the theme of "Commercial Identity, 1920-1980." These include evaluating whether a property "is associated with a business that made an important contribution to commercial growth and development in Los Angeles" and whether it "is the founding or the long-term location of a business significant in commercial history." The subject property has served as the location for Taix French Restaurant, a business established in 1927, for nearly 60 years. In Los Angeles and elsewhere, well-established and long-lived businesses, such as Taix French Restaurant, take on important social qualities and over time, they often organically mature into iconic and revered cultural institutions. Their endurance becomes ingrained into a neighborhood's collective memory and plays an integral role in defining a community's sense of cultural and commercial identity. Since 1962, Taix French Restaurant has remained in continuous operation at its location in Echo Park. Over the course of its nine decades in business, the restaurant has become known for serving country French dishes in its stylish, dimly lit dining rooms and a cocktail lounge. Its banquet rooms have often been used as gathering places for large parties, especially before and after games at nearby Dodger Stadium. Taix French Restaurant is considered a legacy business and a beloved community institution, earning it a reputation as one of Los Angeles' most iconic dining establishments.

Although the property has experienced some interior and exterior alterations since Taix relocated to the subject property in 1962, all changes are associated with the restaurant's growth over time and are compatible with the original continental dining design intent. Therefore, the subject property retains a high level of integrity of location, design, setting, materials, workmanship, feeling, and association to convey its significance.

CALIFORNIA ENVIRONMENTAL QUALITY ACT ("CEQA") FINDINGS

State of California CEQA Guidelines, Article 19, Section 15308, Class 8 "*consists of actions taken by regulatory agencies, as authorized by state or local ordinance, to assure the maintenance,*

restoration, enhancement, or protection of the environment where the regulatory process involves procedures for protection of the environment."

State of California CEQA Guidelines Article 19, Section 15331, Class 31 "*consists of projects limited to maintenance, repair, stabilization, rehabilitation, restoration, preservation, conservation or reconstruction of historical resources in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic buildings.*"

The designation of Taix French Restaurant as an Historic-Cultural Monument in accordance with Chapter 9, Article 1, of The City of Los Angeles Administrative Code ("LAAC") will ensure that future construction activities involving the subject property are regulated in accordance with Section 22.171.14 of the LAAC. The purpose of the designation is to prevent significant impacts to a Historic-Cultural Monument through the application of the standards set forth in the LAAC. Without the regulation imposed by way of the pending designation, the historic significance and integrity of the subject property could be lost through incompatible alterations and new construction and the demolition of an irreplaceable historic site/open space. The Secretary of the Interior's Standards for Rehabilitation are expressly incorporated into the LAAC and provide standards concerning the historically appropriate construction activities which will ensure the continued preservation of the subject property.

The City of Los Angeles has determined based on the whole of the administrative record, that substantial evidence supports that the Project is exempt from CEQA pursuant to CEQA Guidelines Section Article 19, Section 15308, Class 8 and Section 15331, Class 31, and none of the exceptions to a categorical exemption pursuant to CEQA Guidelines Section 15300.2 applies. The project was found to be exempt based on the following:

> The use of Categorical Exemption Class 8 in connection with the proposed designation is consistent with the goals of maintaining, restoring, enhancing, and protecting the environment through the imposition of regulations designed to prevent the degradation of Historic-Cultural Monuments.
>
> The use of Categorical Exemption Class 31 in connection with the proposed designation is consistent with the goals relating to the preservation, rehabilitation, restoration and reconstruction of historic buildings and sites in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties.

Categorical Exemption ENV-2020-5525-CE was prepared on November 13, 2020.

MITCH O'FARRELL
Councilmember
13th District

May 3, 2021

Chair Marqueece Harris-Dawson and Honorable Members of the
Planning & Land Use Management (PLUM) Committee
Los Angeles City Hall
200 N. Spring St., Room 395
Los Angeles, CA 90012

RE: Taix Historic Cultural Monument Designation (21-0119)

Dear Chair Harris-Dawson & Honorable Members of the PLUM Committee:

I am writing to convey Councilmember O'Farrell's support for the designation of the Taix site.

Taix restaurant has been operating in the City of Los Angeles since 1926 and its current location since 1962. The City has twice recognized the intangible elements of culture and community despite changes in the location, building, dining format, service style, menu and décor. It is a cultural resource that many Angelenos hold dear. It is for this reason that Taix should be designated.

This designation, however, should not be an impediment to Taix's ability to evolve, as it has done for nearly a century. As such, Councilmember O'Farrell seeks to modify and supplement the Cultural Heritage Commission's January 26, 2021 Final Letter of Determination that is found as an attachment to this letter.

Thank you for your consideration.

Craig Bullock
Planning Director
Thirteenth Council District

Attachment: Taix Modified and Supplemented Findings

CITY HALL 200 N. Spring Street Room 480 Los Angeles CA 90012 OFFICE: 213.473.7013 FAX: 213.473.7734

cd13.com

ATTACHMENT: TAIX MODIFIED AND SUPPLEMENTED FINDINGS

Council District Thirteen recommends that the City Council adopt the following findings, which modify and supplement the Cultural Heritage Commission's January 26, 2021 Final Letter of Determination, as follows:

On December 17, 2020, the City's Cultural Heritage Commission conducted a public hearing to consider the nomination of the site, where the Taix Restaurant is located, as a City of Los Angeles Historic-Cultural Monument, under Criterion 1 (identified with important events of national, state, or local history) and Criterion 3 (distinctive characteristics of a style, type, period or method of construction) of the City's Cultural Heritage Ordinance.

SurveyLA, the citywide historic resources survey, identified the Taix Restaurant as potentially "individually eligible for local listing or designation through survey evaluation," as "significant in the area of commerce as the founding or long-term location of a business that made a significant contribution to the commercial history of Los Angeles."

Taix French Restaurant has been twice recognized by the City of Los Angeles for theses intangible elements of culture and community despite repeated changes in its location, building, dining format, service style, menu and décor over the years – as a cultural resource that remains dear to the hearts of many Angelenos, consistent with the Criterion No. 1 related to the restaurant's "board cultural, economic, and social history".

After conducting its public hearing and considering the evidence in the administrative record, the Cultural Heritage Commission found that Taix Restaurant does not meet Criterion 3 of the Cultural Heritage Ordinance. The Commission found that the architectural quality of Taix Restaurant is negligible on the exterior and interior. The current Taix French Restaurant building is an amalgam of styles and additions to the building that existed at the property prior to Taix Restaurant's location there in 1962. The building is not an example of the French Normandy architectural style. The interior of the restaurant was reconfigured in 1969 and extensively remodeled in the late 1980's through the 2000's. The restaurant's continental-themed interior appointments, such as carpeted floors, drapery, acoustic drop ceilings, upholstered booths, chandeliers, large mirrored panels, and painted wall murals date from the last 25 years and are not historically significant

The Cultural Heritage Commission unanimously voted to limit its designation recommendation for Taix Restaurant to only significance under Criterion 1 ("exemplifies the broad cultural, economic or social history of the nation, state, city or community"), and expressed a desire to permit the owner to make necessary changes to Taix Restaurant to enable it to continue as a legacy business.

In order to continue over its nearly 100 years in business, Taix Restaurant has previously been required to adapt and repeatedly change. Yet despite the many changes, the Taix family has successfully maintained the continuity of the restaurant and its significance as a Los Angeles cultural institution. The Taix family has informed the City that the revenues of the restaurant can no longer support the overhead associated with its current property, over-sized building, and aged and outdated infrastructure. Accordingly, preservation of the Taix French Restaurant as a historic-cultural resource and legacy business requires that it be able to respond to economic and social challenges that compel changes in its current physical premises.

Section 22.171.10(f) of the City's Cultural Heritage Ordinance authorizes the City Council to approve or disapprove, in whole or part, the designation of a Historic-Cultural Monument, including any site, building or structure. The City Council finds and determines that the subject site and the Taix Restaurant are significant under Criterion 1 only. The Council finds that the Taix Restaurant building (and its interior and exterior architecture and décor) are not architecturally or historically significant.

Telecommunication Relay Services

Telephone communication is one of the most important forms of communication in society today. Due to advancements in technology, telephone devices have evolved with new services and capabilities. Individuals who are deaf and hard of hearing, and individuals with a speech disability are following these trends and are rapidly migrating to more advanced telecommunications methods, both for peer-to-peer and third-party telecommunications relay service (TRS) communications.

Telecommunications Relay Service is a telephone service that allows persons with hearing or speech disabilities to place and receive telephone calls. TRS is available in all 50 states, the District of Columbia, Puerto Rico and the U.S. territories for local and/or long distance calls. TRS providers - generally telephone companies - are compensated for the costs of providing TRS from either a state or a federal fund. There is no cost to the TRS user.

What forms of TRS are available?There are several forms of TRS, depending on the particular needs of the user and the equipment available: TRS includes: Text to Voice TIY-Based TRS; Speech-to-Speech Relay Service; Shared Non-English Language Relay Service; Captioned Telephone Relay Service; Internet Protocol Relay Service; and Video Relay Service. Please visit this site for detail descriptions, https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.

Don't hang up! Some people hang up on TRS calls because they think the CA is a telemarketer. If you hear, "Hello. This is the relay service .. . " when you pick up the phone, please don't hang up! You are about to talk, through a TRS provider, to a person who is deaf, hard-of-hearing, or has a speech disability.

For more information about FCC programs to promote access to telecommunications services for people with disabilities, visit theFCC's Disability Rights Office website.

MITCH O'FARRELL
Councilmember
13th District

May 4, 2021

Chair Marqueece Harris-Dawson and Honorable Members of the
Planning & Land Use Management Committee
200 N. Spring St., Room 395
Los Angeles, CA 90012

RE: Taix Historic Cultural Monument Designation (21-0119)

Dear Chair Harris-Dawson & Honorable Members of the PLUM Committee:

I am writing to convey Councilmember O'Farrell's support for the designation of the Taix site.

Taix Restaurant has been operating in the City of Los Angeles since 1926 and its current location since 1962. The City has twice recognized the intangible elements of culture and community despite changes in the location, building, dining format, service style, menu and décor. It is a cultural resource that many Angelenos hold dear. It is for this reason that Taix should be designated.

The designation, however, should not be an impediment to Taix's ability to evolve, as it has done for nearly a century. As such, Councilmember O'Farrell seeks to modify and supplement the Cultural Heritage Commission's January 26, 2021 Final Letter of Determination that is found as an attachment to this letter and has been modified from a previous submission.

Thank you for your consideration.

Craig Bullock
Planning Director
Thirteen Council District

Attachment: Taix 5/4/21 Modified Findings

ATTACHMENT: TAIX 5/4/21 MODIFIED FINDINGS (WITH ADDED LANGUAGE IN BOLD AND UNDERLINE)

The City Council adopts the following findings, which modify and supplement the Cultural Heritage Commission's January 26, 2021 Final Letter of Determination, as follows:

On December 17, 2020, the City's Cultural Heritage Commission conducted a public hearing to consider the nomination of the site, where the Taix Restaurant is located, as a City of Los Angeles Historic-Cultural Monument, under Criterion 1 (identified with important events of national, state, or local history) and Criterion 3 (distinctive characteristics of a style, type, period or method of construction) of the City's Cultural Heritage Ordinance.

SurveyLA, the citywide historic resources survey, identified the Taix Restaurant as potentially "individually eligible for local listing or designation through survey evaluation," as "significant in the area of commerce as the founding or long-term location of a business that made a significant contribution to the commercial history of Los Angeles."

Taix French Restaurant has been twice recognized by the City of Los Angeles for theses intangible elements of culture and community despite repeated changes in its location, building, dining format, service style, menu and décor over the years – as a cultural resource that remains dear to the hearts of many Angelenos, consistent with the Criterion No. 1 related to the restaurant's "board cultural, economic, and social history".

After conducting its public hearing and considering the evidence in the administrative record, the Cultural Heritage Commission found that Taix Restaurant does not meet Criterion 3 of the Cultural Heritage Ordinance. The Commission found that the architectural quality of Taix Restaurant is negligible on the exterior and interior. The current Taix French Restaurant building is an amalgam of styles and additions to the building that existed at the property prior to Taix Restaurant's location there in 1962. The building is not an example of the French Normandy architectural style. The interior of the restaurant was reconfigured in 1969 and extensively remodeled in the late 1980's through the 2000's. The restaurant's continental-themed interior appointments, such as carpeted floors, drapery, acoustic drop ceilings, upholstered booths, chandeliers, large mirrored panels, and painted wall murals date from the last 25 years and are not historically significant.

The Cultural Heritage Commission unanimously voted to limit its designation recommendation for Taix Restaurant to only significance under Criterion 1 ("exemplifies the broad cultural, economic or social history of the nation, state, city or community"), and expressed a desire to permit the owner to make necessary changes to Taix Restaurant to enable it to continue as a legacy business.

In order to continue over its nearly 100 years in business, Taix Restaurant has previously been required to adapt and repeatedly change. Yet despite the many changes, the Taix family has successfully maintained the continuity of the restaurant

and its significance as a Los Angeles cultural institution. The Taix family has informed the City that the revenues of the restaurant can no longer support the overhead associated with its current property, over-sized building, and aged and outdated infrastructure. Accordingly, preservation of the Taix French Restaurant as a historic-cultural resource and legacy business requires that it be able to respond to economic and social challenges that compel changes in its current physical premises.

Section 22.171.10(f) of the City's Cultural Heritage Ordinance authorizes the City Council to approve or disapprove, in whole or part, the designation of a Historic-Cultural Monument, including any site, building or structure. The City Council finds and determines that the subject site and the Taix Restaurant are significant under Criterion 1 only. The Council finds that the Taix Restaurant building (and its interior and exterior architecture and décor) are not architecturally or historically significant; **provided, however, that the City Council identifies the following physical features of the Taix Restaurant that should be preserved in order to convey the restaurant's historic significance and justify its designation as a Historic-Cultural Monument, as well as its eligibility for inclusion in the California Register of Historical Resources: (i) The red and white east-facing Taix billboard sign along Reservoir Street; (ii) the vertical red and white 'Cocktails' sign along Sunset Boulevard; and (iii) the restaurant's original cherry wood bar top.**

CITY COUNCIL MEETINGS ARE BROADCAST LIVE ON CABLE TELEVISION CHANNEL 35 AND ON THE INTERNET AT: HTTPS://CLERK.LACITY.ORG/CALENDAR. LIVE COUNCIL MEETINGS CAN ALSO BE HEARD AT: (213) 621-CITY (METRO), (818) 904-9450 (VALLEY), (310) 471-CITY (WESTSIDE) AND (310) 547-CITY (SAN PEDRO AREA)

Members of the public who wish to offer public comment to the Council should call 1 669 254 5252 and use Meeting ID No. 160 535 8466 and then press #. Press # again when prompted for participant ID. Once admitted into the meeting, press *9 to request to speak.

Requests for reasonable modification or accommodation from individuals with disabilities, consistent with the Americans with Disabilities Act can be made by contacting the City Clerk's Office at (213) 978-1133. For Telecommunication Relay Services for the hearing impaired, please see the information located on page 2 of this agenda.

Telecommunication Relay Services

Telephone communication is one of the most important forms of communication in society today. Due to advancements in technology, telephone devices have evolved with new services and capabilities. Individuals who are deaf and hard of hearing, and individuals with a speech disability are following these trends and are rapidly migrating to more advanced telecommunications methods, both for peer-to-peer and third-party telecommunications relay service (TRS) communications.

Telecommunications Relay Service is a telephone service that allows persons with hearing or speech disabilities to place and receive telephone calls. TRS is available in all 50 states, the District of Columbia, Puerto Rico and the U.S. territories for local and/or long distance calls. TRS providers - generally telephone companies - are compensated for the costs of providing TRS from either a state or a federal fund. There is no cost to the TRS user.

What forms of TRS are available?There are several forms of TRS, depending on the particular needs of the user and the equipment available: TRS includes: Text to Voice TIY-Based TRS; Speech-to-Speech Relay Service; Shared Non-English Language Relay Service; Captioned Telephone Relay Service; Internet Protocol Relay Service; and Video Relay Service. Please visit this site for detail descriptions, https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.

Don't hang up! Some people hang up on TRS calls because they think the CA is a telemarketer. If you hear, "Hello. This is the relay service .. . " when you pick up the phone, please don't hang up! You are about to talk, through a TRS provider, to a person who is deaf, hard-of-hearing, or has a speech disability.

For more information about FCC programs to promote access to telecommunications services for people with disabilities, visit the FCC's Disability Rights Office website.

SE OFRECE UN SERVICIO DE TRADUCCION AL ESPANOL EN TODAS LAS REUNIONES DEL CONSEJO MUNICIPAL

BASIC CITY COUNCIL MEETING RULES

AGENDAS - The City Council meets Tuesday, Wednesday and Friday at 10:00 A.M. The agendas for City Council meetings contain a brief general description of those items to be considered at the meetings. Council Agendas are available in the Office of the City Clerk, Council and Public Services Division, Room 395, City Hall, 200 North Spring Street, Los Angeles, CA 90012, and on the City's website at lacity.org; or lacouncilcalendar.com.

Ten (10) members of the Council constitute a quorum for the transaction of business. The Council may consider an item not listed on the agenda only if it is determined by a two-thirds (10) vote that the need for action arose after the posting of an Agenda. Some items on the agenda may be approved without any discussion, however, any item may be called "special" by a Councilmember. If an item is called "special" it will be "held" until the remainder of the items on the Council agenda have been acted on by the Council. An item may also be called "special" if a member of the public has requested to speak on the item and a public hearing was not previously held.

The City Clerk will announce the items to be considered by the Council, however items will be grouped. For example, all items for which required public hearings have not previously been held are listed in one section on the printed agenda. The Council President will ask if any Councilmember or member or the public wishes to speak on one or more of these items. If anyone wishes to speak on an item, it will be called "special". The remaining items in this section will be voted on by Council with one roll call vote.

PUBLIC INPUT AT CITY COUNCIL MEETINGS - An opportunity for the public to address the Council on agenda items for which public hearings have not been held will be provided at the time the item is considered or during the Multiple Agenda Item Comment period. Members of the public who wish to speak on items shall be allowed to speak for up to one minute per item up to a total of three minutes per meeting. The Council has determined that a cumulative total of 20 minutes is a reasonable minimum amount of time for the Multiple Agenda Item segment of each regular meeting.

The Council will also provide an opportunity for the public to speak on public interest items. Each speaker shall be limited to one minute of general public comment each regular meeting for a cumulative total of ten (10) minutes. The Council shall not discuss or take action relative to any general public comment.

If you wish to provide documents to the full Council for consideration on an item, please present the Sergeant-At-Arms with 35 copies. Otherwise, your materials will simply be added to the official record.

COUNCIL DISCUSSION AND TIME LIMITS - Councilmembers requesting to address the Council will be recognized by the Council President in the order requested. For any item, the Chairperson of the Committee, or the maker of the original motion, or the member calling a matter "special" shall have up to six (6) minutes to discuss the item. All other Councilmembers may speak up to three (3) minutes each on the matter. After all members desiring to speak on a question have had an opportunity to be heard once, the time for each Member desiring to speak again shall be limited to a maximum of three (3) minutes.

A motion calling the "previous question" may be introduced by any member during a Council debate. If adopted, this motion will terminate debate on a matter and the Chair will instruct the Clerk to call the roll on the matter.

VOTING AND DISPOSITION OF ITEMS - Most items require a majority vote of the entire membership of the Council (8 members). Items which have not been discussed in a Council Committee and have been placed directly on the agenda will require 10 votes to consider. Once considered, these items will normally require eight (8) affirmative votes to be adopted. Ordinances require a unanimous vote (at least 12 members must be present) in order to be adopted on first consideration. If an ordinance does not receive the necessary unanimous vote, it is laid over one calendar week. The

votes required for approval on second consideration vary and depend upon the type of ordinance, but a typical ordinance requires eight (8) affirmative votes upon second consideration.

NOTICE TO PAID REPRESENTATIVES - If you are compensated to monitor, attend, or speak at this meeting, City law may require you to register as a lobbyist and report your activity. See Los Angeles Municipal Code 48.01 et seq. More information is available at ethics.lacity.org/lobbying. For assistance, please contact the Ethics Commission at (213) 978-1960 or ethics.commission@lacity.org.

COUNCIL DISCUSSION AND TIME LIMITS - Councilmembers requesting to address the Council will be recognized by the Council President in the order requested. For any item, the Chairperson of the Committee, or the maker of the original motion, or the member calling a matter "special" shall have up to six (6) minutes to discuss the item. All other Councilmembers may speak up to three (3) minutes each on the matter. After all members desiring to speak on a question have had an opportunity to be heard once, the time for each Member desiring to speak again shall be limited to a maximum of three (3) minutes.

A motion calling the "previous question" may be introduced by any member during a Council debate. If adopted, this motion will terminate debate on a matter and the Chair will instruct the Clerk to call the roll on the matter.

VOTING AND DISPOSITION OF ITEMS - Most items require a majority vote of the entire membership of the Council (8 members). Items which have not been discussed in a Council Committee and have been placed directly on the agenda will require 10 votes to consider. Once considered, these items will normally require eight (8) affirmative votes to be adopted. Ordinances require a unanimous vote (at least 12 members must be present) in order to be adopted on first consideration. If an ordinance does not receive the necessary unanimous vote, it is laid over one calendar week. The votes required for approval on second consideration vary and depend upon the type of ordinance, but a typical ordinance requires eight (8) affirmative votes upon second consideration.

When debate on an item is completed, the Chair will instruct the Clerk to "call the roll". Every member present must vote for or against each item; abstentions are not permitted. The Clerk will announce the votes on each item. Any member of Council may move to "reconsider" any vote on any item on the agenda, except to adjourn, suspend the Rules, or where an intervening event has deprived the Council of jurisdiction, providing that said member originally voted on the prevailing side of the item. The motion to "reconsider" shall only be in order once during the meeting, and once during the next regular meeting. The member requesting reconsideration shall identify for all members present the agenda number, Council file number and subject matter previously voted upon. A motion to reconsider is not debatable and shall require an affirmative vote of eight (8) members of the Council.

When the Council has failed by sufficient votes to approve or reject an item, and has not lost jurisdiction over the matter, or has not caused it to be continued beyond the next regular meeting, the item is continued to the next regular meeting for the purpose of allowing the Council to again vote on the matter.

The City Council rules provide that all items adopted by the Council will not be presented to the Mayor, or other designated officer by the City Clerk until the adjournment of the regular Council meeting following the date of the Council action. A motion to send an item "forthwith" if adopted by ten (10) votes, suspends these rules and requires the City Clerk to forward the matter to the Mayor, or other officer, without delay.

When debate on an item is completed, the Chair will instruct the Clerk to "call the roll". Every member present must vote for or against each item; abstentions are not permitted. The Clerk will announce the votes on each item. Any member of Council may move to "reconsider" any vote on any item on the agenda, except to adjourn, suspend the Rules, or where an intervening event has deprived the Council of jurisdiction, providing that said member originally voted on the prevailing side of the item. The motion to "reconsider" shall only be in order once during the meeting, and once during the next regular meeting. The member requesting reconsideration shall identify for all members present the agenda number,

Council file number and subject matter previously voted upon. A motion to reconsider is not debatable and shall require an affirmative vote of eight (8) members of the Council.

When the Council has failed by sufficient votes to approve or reject an item, and has not lost jurisdiction over the matter, or has not caused it to be continued beyond the next regular meeting, the item is continued to the next regular meeting for the purpose of allowing the Council to again vote on the matter.

The City Council rules provide that all items adopted by the Council will not be presented to the Mayor, or other designated officer by the City Clerk until the adjournment of the regular Council meeting following the date of the Council action. A motion to send an item "forthwith" if adopted by ten (10) votes, suspends these rules and requires the City Clerk to forward the matter to the Mayor, or other officer, without delay.

RULE 16 MOTIONS - Council Rule No. 16, in part, allows a member to send an item directly to the Council without it having to go to a Council Committee first, by giving the City Clerk a motion (seconded by an additional member) during a Council session to be placed on the next regular available Council agenda.

APPROVE the following retention premium and advanced step hiring authority:

1. A two-level retention premium of 5.5 percent per year, for three years, for incumbent Electrical Service Managers, Transmission and Distribution Supervisors, Water Utility Superintendents, and Water Service Managers that are eligible for full retirement (i.e. 30 years of service and 55 years of age) with said premium to sunset three years after LADWP implementation as a means of affording the LADWP the ability to retain incumbents of the above classifications that are retirement-eligible for a period of time sufficient to retain and develop their potential replacements and serving as an incentive to attract retirement eligible supervisors early enough to lessen the impact of the overtime and/or double time earnings they would be forfeiting by joining the management ranks.
2. Minimum step placement to step four of the five step salary range as a means of resolving difficulties that the LADWP is experiencing in

attracting candidates with the requisite knowledge, skills and abilities to promote to the management level classifications with said minimum step placement offseting the loss of overtime compensation in relation to base salary and the length of time that it takes to reach the top of the salary range of the new position.

Fiscal Impact Statement: None submitted by the LADWP. Neither the City Adminsitrative Officer nor the Chief Legislative Analyst has completed a financial analysis of this report.

Community Impact Statement: None submitted.

CONTINUED CONSIDERATION OF MITIGATED NEGATIVE DECLARATION (MND), ADDENDUM, PLANNING AND LAND USE MANAGEMENT COMMITTEE REPORT, and ORDINANCE FIRST CONSIDERATION relative to a Conditional Use Permit Appeal and Zone Change for the properties located at 1523-1541 North Wilcox Avenue.

Recommendations for Council action, SUBJECT TO THE APPROVAL OF THE MAYOR:

1. FIND that, based on the independent judgment of the decision-maker, after consideration of the whole of the administrative record, the Project was assessed in MND No. ENV-2014-3707-MND-REC-1, adopted on September 10, 2015; and, pursuant to California Environmental Quality Act Guidelines 15162 and 15164, as supported by the Addendum dated October 2020 (ENV-2014-3707-MND-REC2), no major revisions are required to the MND; and, no subsequent Environmental Impact Report or negative declaration is required for approval of the Project.
2. ADOPT the FINDINGS of the Central Los Angeles Area Planning Commission (CLAAPC) as the Findings of Council.
3. RESOLVE TO DENY THE APPEAL filed by David Carrera, and THEREBY SUSTAIN the determination of the CLAAPC in approving a Conditional Use Permit to allow the sale and dispensing of a full line of alcoholic beverages for on-site consumption in conjunction with 1) a 5,125 square-foot ground floor restaurant and 840 square-foot outdoor

eating area; 2) 4,970 square-foot combined lobby and lobby bar; 3) 4,105 square-foot rooftop restaurant, bar, and lounge, and a 1,193 square-foot outdoor dining terrace; 4) 3,406 square-foot combined pool bar, pool bar lounge, and pool deck; and, 5) within controlled access cabinets in the guest rooms (mini bars); the ground floor restaurant and bar would have operating hours between 6:00 a.m. and 2:00 a.m. daily; the enclosed rooftop restaurant would have operating hours from 7:00 a.m. to 1:00 a.m. daily; and, the outdoor rooftop areas would operate between 7:00 a.m. and 12:00 a.m. daily; for the properties located at 1523-1541 North Wilcox Avenue, subject to the modified Conditions of Approval.

4. PRESENT and ADOPT the accompanying ORDINANCE, dated December 8, 2020, effectuating a Zone Change from (T)(Q)C4-2D to (Q)C2-2D, pursuant to Section 12.32 of the Los Angeles Municipal Code (LAMC), for the use and maintenance of a 190-room hotel with: 1) a 5,125 square-foot ground floor restaurant and 840 square-foot outdoor eating area; 2) 4,970 square-foot combined lobby and lobby bar; 3) 4,105 square-foot rooftop restaurant, bar, and lounge, and a 1,193 square-foot outdoor dining terrace; and, 4) a 3,406 square-foot combined pool bar, pool bar lounge, and pool deck; the ground floor restaurant and bar would have operating hours between 6:00 a.m. and 2:00 a.m. daily; the enclosed rooftop restaurant would have operating hours from 7:00 a.m. to 1:00 a.m. daily; the outdoor rooftop areas would operate between 7:00 a.m. and 12:00 a.m. daily; with live entertainment (including disc jockeys) and amplified music within the lobby bar, and live acoustic (non-amplified) music with up to three musicians and ambient music to complement the dining, bar, and/or lounge experience within the Project's ground floor restaurant and outdoor eating area; including a maximum of 24 special events annually; for the properties located at 1523-1541 North Wilcox Avenue, subject to the Conditions of Approval.

5. ADVISE the applicant, pursuant to LAMC Section 12.32 G:
...property shall not remain in a Q Qualified classification for more than six years unless during that time: (1) there is substantial physical development of the property to allow for one or more of the uses for which the Q Qualified classification was adopted; or (2) if no physical development is necessary, then the property is used for one or more of the purposes for which the Q Qualified classification was adopted... When these time limitations expire, the Q Qualified classification and the authority contained therein shall become null and void, the rezoning proceedings shall be terminated, and the property thereafter

may only be utilized for those purposes permitted prior to the commencement of such rezoning proceedings.

6. ADVISE the applicant that, pursuant to State Public Resources Code Section 21081.6, the City shall monitor or require evidence that mitigation conditions are implemented and maintained throughout the life of the project, and the City may require any necessary fees to cover the cost of such monitoring.

7. ADVISE the applicant that, pursuant to State Fish and Game Code Section 711.4, a Fish and Game Fee and/or Certificate of Fee Exemption is now required to be submitted to the County Clerk prior to or concurrent with the Environmental Notice of Determination filing.

CONTINUED CONSIDERATION OF CATEGORICAL EXEMPTION and PLANNING AND LAND USE MANAGEMENT (PLUM) COMMITTEE REPORT relative to the inclusion of the Taix French Restaurant, located at 1910-2018 West Reservoir Street, in the list of Historic-Cultural Monuments.

Recommendations for Council action:

1. DETERMINE that the proposed designation is categorically exempt from the California Environmental Quality Act (CEQA), pursuant to

Article 19, Section 15308, Class 8 and Article 19, Section 15331, Class 31 of the State CEQA Guidelines.

2. DETERMINE that the subject property conforms with the definition of a Monument pursuant to Section 22.171.7 of the Los Angeles Administrative Code.

3. ADOPT the FINDINGS of the Cultural Heritage Commission (CHC), as amended by the PLUM Committee, attached to the Council file in the communication from the Council District (CD) 13 Office, dated May 4, 2021, as the Findings of Council.

4. APPROVE the recommendations of the CHC relative to the inclusion of the Taix French Restaurant, located at 1910-2018 West Reservoir Street, in the list of Historic-Cultural Monuments.

CD 13 SUSTAINABLE COMMUNITIES PROJECT EXEMPTION (SCPE) and PLANNING AND LAND USE MANAGEMENT COMMITTEE REPORT relative to a SCPE request for the properties located at 1818-1824 North Cherokee Avenue.

Recommendations for Council action:

1. FIND, upon a review of the entire administrative record, including the SCPE Case No. ENV-2020-4649-SCPE, and all comments received, that:
   a. The proposed project qualifies as a transit priority project pursuant to Public Resources Code (PRC) Section 21155(b), which by definition means that the proposed project is consistent with the general use designations, density, building intensity, and applicable policies specified for the project area in the Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) prepared by the Southern California Association of Governments (SCAG) pursuant to PRC Section 21155(a); and contains more than 50 percent residential; provides a minimum net density greater than 20 units an acre; and is within one-half mile of a major transit stop or high-quality transit corridor included in a regional transportation plan per PRC Section 21155(b).

   b. All criteria in PRC Section 21155.1(a) and (b) are met, including environmental criteria, land use criteria; and, at least one criteria (affordable housing) in PRC Section 21155.1(c).

2. FIND that the proposed project qualifies as a transit priority project that is declared to be a Sustainable Communities Project and is therefore statutorily exempt from the California Environmental Quality Act, in accordance with PRC Section 21155.1; for a proposed project involving the demolition of an existing surface parking lot and the construction, use, and maintenance of a new, seven-story, 85-foot, 4 inches (at its highest), multi-family residential building consisting of 86 dwelling units, of which 21 units will be reserved for Very Low Income Households; the project includes 14 studio units, 54 one-bedroom units, and 18 two-bedroom units; a total of 9,649 square feet of open space; and, will provide 61 automobile parking spaces located within two subterranean levels; for the properties located at 1818-1824 North Cherokee Avenue.

CATEGORICAL EXEMPTION and PLANNING AND LAND USE MANAGEMENT COMMITTEE REPORT relative to a California Environmental Quality Act (CEQA) Appeal, Density Bonus, and Site Plan Review for the properties located at 418-430 North Alvarado Street.

Recommendations for Council action:

1. FIND, based on the whole of the administrative record, that the project is exempt from the CEQA, pursuant to CEQA Guidelines, Article 19, Sections 15332, Class 32, and there is no substantial evidence demonstrating that an exception to a categorical exemption pursuant to CEQA Guidelines, Section 15300.2 applies.

2. ADOPT the FINDINGS of the Los Angeles City Planning Commission (LACPC), as the Findings of Council.

3. RESOLVE TO DENY THE APPEAL filed by Margarita Lopez, Coalition For An Equitable Westlake/MacArthur Park (Representative: Claudia Medina, Law Office of Claudia Medina), and THEREBY SUSTAIN the determination of the Los Angeles City Planning Commission (LACPC) in approving a Categorical Exemption as the environmental clearance for the project, a 35 percent Density Bonus (DB) for a project reserving eleven percent of the base dwelling units or six units for Very-Low Income Households, in conjunction with Parking Option 1 and the following two Off-Menu Incentives: a) a 2.85:1 Floor Area Ratio (FAR) in lieu of the otherwise permitted 1.5:1 FAR for the C2- 1VL Zone; and, b) an increase in height and number of stories permitted, to allow a 69-foot, five-story building in lieu of a maximum 45-foot, three-story building for a mixed-use building in the

C2-1 VL Zone; and, approving a Site Plan Review for a project that creates or results in an increase of 50 or more net new dwelling units and/or guest rooms; for the demolition of an existing vacant private school, one single-family dwelling, and a duplex; and the construction, use, and maintenance of a new 73-unit, approximately 52,000 square foot mixed-use development including 500 square feet of ground-floor commercial space on approximately 19,197 square feet of land (21,517 square feet including alleys); the project will include a five-story building with two parking levels (including one subterranean level) that will provide a total of 81 parking spaces, and include six Very Low-Income units, for the properties located at 418-430 North Alvarado Street, subject to Conditions of Approval.

CONTINUED CONSIDERATION OF RESOLUTION (BUSCAINO – BONIN) and COMMUNICATION FROM THE CHIEF LEGISLATIVE ANALYST (CLA) relative to establishing the City's position in its 2021-22 State Legislative Program regarding Assembly Bill (AB) 816 (Chiu), which would require the California Department of Housing and Community Development and local governments of California to have their own local plans to reduce homelessness by 90 percent by December 31, 2029 and to establish a Homelessness Inspector General

who would ensure that each local government is following through on their plan based on their financial capability.

A. RESOLUTION (BUSCAINO – BONIN)

Recommendation for Council action, SUBJECT TO THE CONCURRENCE OF THE MAYOR:

ADOPT the accompanying RESOLUTION to include in the City's 2021-22 State Legislative Program SUPPORT for AB 816 (Chiu), which would require the California Department of Housing and Community Development and local governments of California to have their own local plans to reduce homelessness by 90 percent by December 31, 2029 and to establish a Homelessness Inspector General who would ensure that each local government is following through on their plan based on their financial capability.

B. COMMUNICATION FROM THE CLA

Recommendation for Council action, SUBJECT TO THE CONCURRENCE OF THE MAYOR:

ADOPT the revised RESOLUTION, attached to the CLA report dated May 24, 2021, to include in the City's 2021-22 State Legislative Program SUPPORT for AB 816 which would require the California Department of Housing and Community Development and local governments of California to have their own local plans to reduce homelessness by 90 percent by December 31, 2029 and to establish a Homelessness Inspector General who would ensure that each local government is following through on their plan based on their financial capability and SEEK AMENDMENT for the State to provide additional funding for homelessness prevention and housing creation.

Fiscal Impact Statement: None submitted by the CLA. The City Administrative Officer has not completed a financial analysis of this report.

Community Impact Statement: None submitted.

(Rules, Elections, and Intergovernmental Relations Committee waived consideration of the above matter)

(Continued from Council meeting of May 26, 2021)

(12) **20-1021-S4**

COMMUNICATIONS FROM THE CITY ADMINISTRATIVE OFFICER (CAO) relative to the Fifth Construction Projects Report (CPR) for Fiscal Year 2020-21.

Recommendations for Council action, SUBJECT TO THE APPROVAL OF THE MAYOR:

APPROVE the recommendations as found in the CAO report dated May 7, 2021, attached to the Council file, with the additional recommendations as contained in the addendum from the CAO dated May 20, 2021, attached to the Council file.

Fiscal Impact Statement: The CAO reports that transfers, appropriations, and expenditure authority totaling $15.42 million are recommended in said CAO report. Of this amount, $7.02 million is for transfers, appropriations, and expenditure authority for the BSS, $2.28 million for the Department of General Services (GSD), and $6.12 million is for other City funds. All transfers and appropriations are based on existing funds, reimbursements, or revenues. There is no immediate General Fund impact for operations and maintenance costs as a result of the CAO's recommendations (Attachment No. X of said CAO report).

In the Addendum, the CAO further states that transfers, appropriations, and expenditure authority totaling $1.85 million are recommended in said Addendum. Of this amount, $1.2 million is for transfers, appropriations, and expenditure authority for the CAO, $0.6 million for the GSD, and $50,000 is for the City Attorney. All transfers and appropriations are based on existing funds, reimbursements, or revenues. There is no immediate General Fund impact for operations and maintenance costs as a result of the CAO's recommendations.

Financial Policies Statement: The CAO reports that the actions recommended in said CAO report comply with the City's Financial Policies.

Debt Impact Statement: The CAO reports that the issuance of Municipal Improvement Corporation of Los Angeles (MICLA) debt is a General Fund obligation. The issuance of MICLA for the Asphalt Plant No. 1 acquisition and the Los Angeles Convention Center (LACC) Expansion Project's increased financial advisory services would cause the City to borrow approximately $6,225,000 at an approximate 5.5 percent interest rate over 20 years. The total estimated debt service for the projects is $10,419,000, including interest of approximately $4,194,000. During the life of the bonds, the estimated average annual debt service is $521,000 over 20 years. Actual interest rates may differ as rates are dependent on market

conditions at the time of issuance. The CAO cannot fully predict what interest rates will be in the future. In accordance with the City's Debt Management Policy, the City has an established debt ceiling to guide in evaluating the affordability for future debt. The debt ceiling for non-voted direct debt as a percentage of General Fund revenues is 6.0 percent. The revised 2020-21 non voter-approved debt ratio is 2.78 percent. The issuance of debt for these projects will not cause the City to exceed the six percent non voter-approved debt limit.

In the Addendum, the CAO further states that the issuance of MICLA debt is a General Fund obligation. The issuance of MICLA for the reauthorization of Municipal Facilities projects (Attachment A of said Addendum) and the LACC Expansion Project's increased legal services costs would cause the City to borrow approximately $40,465,875 at an approximate 5.5 percent interest rate over 20 years. The issuance of MICLA for the reauthorization of Bureau of Sanitation Clean Street Vehicles would cause the City to borrow approximately $2,360,835 at an approximate 5.5 percent interest rate over 10 years. The total estimated debt service for the Municipal Facilities projects and Clean Street Vehicles is $70,855,000, including interest of approximately $28,028,000. During the life of the bonds, the estimated average annual debt service is $3,699,000 over the first 10 years and $3,386,000 over the following 10 years. Actual interest rates may differ as rates are dependent on market conditions at the time of issuance. The CAO cannot fully predict what interest rates will be in the future. In accordance with the City's Debt Management Policy, the City has an established debt ceiling to guide in evaluating the affordability for future debt. The debt ceiling for non-voted direct debt as a percentage of General Fund revenues is 6.0 percent. The revised 2020-21 non voter-approved debt ratio is 2.78 percent. The issuance of debt for these projects will not cause the City to exceed the six percent non voter-approved debt limit.

Community Impact Statement: None submitted

3. TRANSFER $35,000 in Sewer Capital Funds from the Bureau of Engineering Fund No. 100/78, Account No. 001090, Overtime General to the Bureau of Engineering Fund No. 100/78, Account No. 001100, Hiring Hall Salaries.

(16) **21-0600**

CONSIDERATION OF MAYOR'S VETO MESSAGE, upon receipt, pursuant to Charter Section 315. City Council has five days, excluding Saturdays, Sundays, and legal holidays, upon receipt of the Mayor's veto to overcome such action of the Mayor relative to any item or items of the budget.

(The Mayor has until June 3, 2021 to submit his Veto Message to the City Council, pursuant to Charter Section 314.)

(17) **20-1444**

COMMUNICATION FROM THE BOARD OF PUBLIC WORKS (BPW) relative to Participant Agreement with the County of Los Angeles (County) for the acquisition of aerial imagery and associated products as a member of the countywide Los Angeles Region Imagery Acquisition Consortium (LARIAC) 6 Project.

Recommendations for Council action, SUBJECT TO THE APPROVAL OF THE MAYOR:

1. ADOPT the BPW report dated June 23, 2021, attached to the Council file, to AUTHORIZE the City Engineer, to execute a Participant Agreement with the County for the acquisition of aerial imagery and associated products as a member of the countywide LARIAC6 Project.
2. AUTHORIZE the City Engineer, or designee, to execute the Participant Agreement with the County on behalf of the City and to pay to the County $705,995 for the acquisition of imagery and associated products from the countywide LARIAC6 Project, associated with the Letter of Intent signed June 13, 2019 (Transmittal No. 1 of said BPW report).
3. APPROVE funding in the amount of $63,891 from Fund No. 100/78, Appropriation Unit No. 001090 for the Bureau of Engineering's (BOE) participation in the countywide LARIAC6 Project.
4. REQUEST the Controller to transfer the following amounts from the City departments and bureaus identified in said BPW report, totaling $705,995 from various departmental appropriation units to the new appropriation unit in the Engineering Special Services Fund No. 682/50, titled "LARIAC6 Project," to enable the BOE to make the full payment to the County for the LARIAC6 Project.

Dept. Name	Fund/Dept.	Appropriation Unit No.	Amount
Dept. of City Planning	588/68	003040	$48,888
Los Angeles Harbor Dept.	702/42	1000/699	48,888

5. REQUEST all the General Managers, or designees, of the various City departments and Public Works bureaus identified in Recommendation No. 4 above to complete the transfer of funds in coordination with the Controller.

Fiscal Impact Statement: None submitted by the BPW. Neither the City Administrative Officer nor the Chief Legislative Analyst has completed a financial analysis of this report.

Community Impact Statement: None submitted

(Information, Technology, and General Services Committee waived consideration of the above matter)

(18) **21-0002-S125**

COMMUNICATION FROM THE CHIEF LEGISLATIVE ANALYST (CLA) and RESOLUTION (DE LEÓN – CEDILLO – ET AL.) relative to establishing the City's position in its 2021-2022 Federal Legislative Program regarding administrative or legislative action which would support the international condemnation of the repression and violence being perpetrated by the Colombian government against civilians, and related matters.

Recommendation for Council action, SUBJECT TO THE CONCURRENCE OF THE MAYOR:

ADOPT the accompanying RESOLUTION to include in the City's 2021-2022 Federal Legislative Program SUPPORT for any administrative or legislative action which would: 1) support the international condemnation of the repression and violence being perpetrated by the Colombian government against civilians, 2) enforce the Leahy Laws to suspend aid to the Colombian government in the form of funding, arms, and crowd control equipment, and 3) guarantee freedom of movement and demonstration and equitable access to testing, health care, humanitarian aid, and vaccinations, until all perpetrators of human rights violations are brought to justice and violence against civilians ceases.

Fiscal Impact Statement: Neither the City Administrative Officer nor the CLA has completed a financial analysis of this report.

Community Impact Statement: None submitted.

(Rules, Elections, and Intergovernmental Relations Committee waived consideration of the above matter)

Items Called Special

Motions for Posting and Referral

Council Members' Requests for Excuse from Attendance at Council Meetings

Adjourning Motions

Council Adjournment

EXHAUSTION OF ADMINISTRATIVE REMEDIES - If you challenge a City action in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice, or in written correspondence delivered to the City Clerk at or prior to, the public hearing. Any written correspondence delivered to the City Clerk before the City Council's final action on a matter will become a part of the administrative record.

CODE OF CIVIL PROCEDURE SECTION 1094.5 - If a Council action is subject to judicial challenge pursuant to Code of Civil Procedure Section 1094.5, be advised that the time to file a lawsuit challenging a final action by the City Council is limited by Code of Civil Procedure Section 1094.6 which provides that the lawsuit must be filed no later than the 90th day following the date on which the Council's action becomes final.

Materials relative to items on this agenda can be obtained from the Office of the City Clerk's Council File Management System, at lacouncilfile.com by entering the Council File number listed immediately following the item number (e.g., 00-0000).

Re: Brown Act Cure and Correct Demand, and Cease and Desist Demand. May 04, 2021, 2021 Planning and Land Use Management Committee Meeting; Denial of the public's opportunity to speak on Agenda item number 10: Taix French Restaurant, 1911 Sunset Blvd, Los Angeles, CA 90026

This letter is to call your attention to what we believe was and will continue to be a substantial violation of a central provision of the Ralph M. Brown Act, one which may jeopardize the finality of any action taken by the Los Angeles City Council PLUM Committee.

The nature of the violation is as follows: In its meeting of **May 4, 2021, several members of the public, including Annie Sperling and Richard Schave, having followed instructions to call in, and raised their virtual hand, to address matters of public concern before the Committee, regarding Agenda Item 10, the Taix Restaurant,, were never allowed an opportunity to speak. Whereupon, a vote was taken by the Committee with no practical way for members of the general public to participate while complying with the general order to shelter in place.**

Pursuant to the governor's executive order N-25-20, a legislative body is "authorized to make public meetings accessible telephonically or otherwise electronically to all members of the public seeking to attend and to address the local legislative body... during the period in which state or local public officials impose or recommend measures to promote social distancing." N-33-20 mandates all individuals living in the State of California to stay

home or at their place of residence, except as to maintain continuity of operations of the federal critical infrastructures and additional sectors designated as critical to protect the health and well-being of all Californians. Whether or not the stay at home orders are still in place, it is still advisable for members of the public to socially distance and avoid indoor spaces.

The purpose behind the Brown Act is to guarantee the public's right to attend and participate in meetings of local legislative bodies. Given EO N-33-20 ordering the public to shelter in place but for certain exceptions that do not include attending City Council Planning and Land Use Committee meetings, the PLUM Committee would be in contravention of the express purpose of the Act if it does not provide a mechanism for the public to attend electronically or telephonically.

Moreover, Government Code Section 54954.3 provides that members of the public must be permitted to address the legislative body on any item of interest to the public before or during the body's consideration of that item, unless the item has already been considered at a previous meeting with an opportunity for comment, and subject to "reasonable regulations" to facilitate public comment, time limit per speaker to allow more people to speak.

With respect to interpreting these provisions of the Brown Act, note that Article I, section 3 of the California Constitution provides that "[a] statute, court rule, or other authority … shall be broadly construed if it furthers the people's right of access, and narrowly construed if it limits the right of access." Meetings of legislative bodies, such as city council meetings, are regarded under First Amendment framework as "limited public forums." See White v. City of Norwalk, 900 F.2d 1421, 1425 (1990). Speech in a "public forum," which includes public spaces such as sidewalks and parks that have traditionally been used for conduct protected by the First Amendment, can only be restricted if a high standard is met.

Generally speaking, the more public a venue is, the less latitude the government has to restrict speech. Also, generally speaking, restrictions that are content-neutral (i.e., not tied to a particular message) will generally be easier to uphold than restrictions based on a particular viewpoint, which are more often constitutionally suspect.

This general principle is codified to some extent in Section 54954.3 of the Brown Act, which provides that "[t]he legislative body of a local agency shall not prohibit public criticism of the policies, procedures, programs, or services of the agency, or of the acts or omissions of the legislative body." This particular provision might be particularly relevant where the spectator trying to speak at a meeting was a political opponent of the member of the body forbidding the spectator to speak.

In such circumstances, it might be reasonable to infer that the limitation on speech is not a content-neutral restriction but is instead a viewpoint-specific restriction on speech which could violate not only the Brown Act but also the First Amendment. Here, and at various other public meetings regarding planning and land use issues, members of the public -- including Ms. Sperling and Mr. Schave -- on one side of the issue of historic preservation

in the City of Los Angeles have been denied an opportunity to speak on these matters of public concern.

Such conduct by the PLUM Committee, denying members of the public an opportunity to be heard on matters before the Committee violates the Brown Act.

Pursuant to Government Code Section 54960.1, we demand that the Los Angeles City Council Planning and Land Use Committee cure and correct the illegally taken action as follows**: immediately provide telephonic or electronic public access to any and all meetings until the EO N-33-20 is lifted,including public comment by interested members of the public who complied with the instructions and raised their virtual hands during the meetings.**

As provided by Section 54960.1, you have 30 days from the receipt of this demand regarding the previous meeting to either cure or correct the challenged action or inform us of your decision not to do so. Prospectively, as we understand that the next Board of Supervisors meeting is set for Monday, March 23, 2020, we demand that telephonic or electronic public access be in place for that meeting and all further Board of Supervisors meetings that occur during the order to shelter in place.

As a direct and proximate cause of the actions of the City, members of the public, and the council members themselves as the decision makers, were deprived of information concerning the importance of the Taix French Restaurant.

The City's actions in this matter are not complete, faithful, or uninterrupted compliance with the mandates of the Brown Act. The City has failed to proceed in the manner required by law.

The City must cure and correct its violations of the Brown Act as specified in Government Code Section 54960.1, and cease and desist the systematic denial of public speaking rights at special meetings, pursuant to Government Code Section 54960.2.

Failure to cure or correct as demanded may leave us no recourse but to seek a judicial invalidation of any prior actions pursuant to Section 54960.1, in which case we would also ask the court to order you to pay court costs and reasonable attorney fees in this matter, pursuant to Section 54960.5.

Thank you for your attention to this important matter.

Re: Council File: **21-0119,** June 2, 2021 City Council Meeting, Agenda Item # 3, Taix French Restaurant, 1911 Sunset Blvd, Los Angeles, CA 90026, Historical-Cultural Monument case # CHC-2020-5524-HCM, "Amendment", **Notice of Brown Act Violation, Cure and Correct Demand, and Cease and Desist Demand**

To Whom it may concern:

On behalf of the Silver Lake Heritage Trust and the parties named herein (all who have requested they be included and have authorized the Silver Lake Heritage Trust to act on their behalf), we provide notice of the City's violation of the Ralph M. Brown Act (Gov.§§ 54950-54963, referred to as the "Brown Act") at its June 2, 2021 Los Angeles City Council meeting. The City violated the Brown Act by failing to allow the named parties and other members of the public the opportunity to address the City Council regarding the amendments made to the Historic-Cultural Monument (HCM) nomination recommendation for Taix French Restaurant.

This link directs to the June 2, 2021 video of the City Council meeting in question and will be used for all time references herein.

The nature of the violation is as follows:

In its meeting of June 2, 2021, City Council President Nury Martinez asked if there are any specials, at which time (35:00) Councilmember O'Farrell requests "to call item 3 Special for comments". Item 3 was Councilmember Mitch O' Farrell's amended version of the Cultural

Heritage Commission's recommendation intended to designate the Taix French Restaurant building as a Historic Cultural Monument. After voting on consent items 1 and items 4 through 8, the Council moved on to take "General Public Comment" (40:05). Although Councilmember O'Farrell did not open item number 3 for public comment, the public was informed they could speak for one minute on this item during the 30 minutes the Council decided was a reasonable amount of time for "General Public Comment". Members of the public who called in were muted as they waited for their turn to speak specifically on item number 3. When item number 3 was called (1:11:45) Councilmember O'Farrell spoke on his amendment for approximately 6 minutes. He allowed no comments from members of the public. Council President then called for the vote (1:18:10), as members of the public remained waiting in the queue, but were never called on. Members of the public who waited for their turn to speak include but are not limited to: Annie Sperling, Charles Fisher, C.C. de Vere, Carol Cetrone, Jen Getz, Doug Haines and Adrian Fine. Having followed the instructions to call in and raise their virtual hand to address matters of public concern before the City Council, they were never allowed an opportunity to speak. The vote was taken by the City Council with no means for members of the general public to participate.

Additionally:

The previously held PLUM hearing that took place on May 4, 2021 wherein the Taix item was heard (agenda item #10), was also held with multiple Brown Act Violations.

The Silver Lake Heritage Trust sent a Cure and Correct letter to the City Attorney's office on June 3, 2021 (See Attachment 1) requesting the violations that took place at the May 4, 2021 PLUM hearing be corrected. No acknowledgement or response from the City was received.
Neither hearing was conducted in a proper manner to allow public comment. Both votes were taken with no input from the public on Councilmember O'Farrell's amendment, the final version of which he submitted immediately before the PLUM hearing.

By ignoring the Brown Act Violations at its previously held May 4, 2021 PLUM hearing, the City leaves the public without **ANY** opportunity to speak on the Councilmember's eleventh hour **amendment**. The PLUM hearing was the first time the public was made aware of the **substantial change** Councilmember O'Farrell made. Because his amendment corrupted the original intent of the nomination and the recommendation made by the Cultural Heritage Commission, this greatly contested matter became even more contentious.

The Brown Act requires that legislative bodies, including the City Council, "shall provide an opportunity for members of the public to directly address the legislative body on any item of interest to the public." (Gov. Code § 54954.3, subd. (a); see also Galbiso v. Orosi Public Utility Dist. (2008) 167 Cal.App.4th 1063, 1079–1080 and Gov. Code § 54954.3, subd. (c) ["The legislative body of a local agency shall not prohibit public criticism of the policies, procedures, programs, or services of the agency, or of the acts or omissions of the legislative body"].) This requirement remains mandatory during "teleconference meetings;" the legislative body "shall

conduct teleconference meetings in a manner that **protects the statutory and constitutional rights of the parties or the public** appearing before the legislative body of a local agency." (Gov. Code § 54953, subd. (b)(3).) A teleconference meeting must "provide an opportunity for members of the public to address the legislative body directly pursuant to Section 54954.3." (Ibid.)

Government Code Section 54954.3 provides that members of the public must be permitted to address the legislative body on any item of interest to the public **before or during** the body's consideration of that item.

At **BOTH** public hearings, although members of the public had their virtual hands raised, they were not recognized or called upon to speak before or during the Council's consideration of item number 3.

With respect to interpreting the provisions of the Brown Act, note that Article I, section 3 of the California Constitution provides that "[a] statute, court rule, or other authority ... shall be broadly construed if it furthers the people's right of access, and narrowly construed if it limits the right of access." Meetings of legislative bodies, such as city council meetings, are regarded under First Amendment framework as "limited public forums." See White v. City of Norwalk, 900 F.2d 1421, 1425 (1990). Speech in a "public forum," which includes public spaces such as sidewalks and parks that have traditionally been used for conduct protected by the First Amendment, can only be restricted if a high standard is met.

Generally speaking, the more public a venue is, the less latitude the government has to restrict speech. Also, generally speaking, restrictions that are content-neutral (i.e., not tied to a particular message) will generally be easier to uphold than restrictions based on a particular viewpoint, which are more often constitutionally suspect. This general principle is codified to some extent in Section 54954.3 of the Brown Act, which provides that "[t]he legislative body of a local agency shall not prohibit public criticism of the policies, procedures, programs, or services of the agency, or of the acts or omissions of the legislative body."

Councilmember O'Farrell has a pattern and practice of silencing members of the community who don't agree with him (Beachwood Canyon Neighborhood Ass'n v. City of Los Angeles, B288964 (Cal. Ct. App. Dec. 4, 2019)). In this ruling, the court found O'Farrell to be in violation of the Brown Act; some of their findings include:

- "there was evidence of viewpoint discrimination in O'Farrell's statement that he did not want to admit people who would disagree with him to the HDRC meetings."

- "'Citizens have an enormous first amendment interest in directing speech about public issues to those who govern their city. It is doubtless partly for this reason that such meetings, once opened, have been regarded as public forums, albeit limited ones.'" (Ribakoff v. City of Long Beach (2018) 27 Cal.App.5th 150, 174, quoting White v. City of Norwalk (9th Cir. 1990) 900 F.2d 1421, 1425.)"

- "O'Farrell excluded them in retaliation for filing lawsuits against the City. The right to petition the government for redress of grievances is "one of 'the most precious of the liberties safeguarded by the Bill of Rights'" (BE & K Const. Co. v. N.L.R.B. (2002) 536 U.S. 516, 524), and "the First Amendment bars retaliation for protected speech." (Crawford-El v. Britton (1998). U.S. 574, 592.) Petitioners have therefore asserted valid claims for declaratory relief under the First Amendment."

- "The law is clear that a governmental entity may not bar citizen speech in either public or nonpublic forums based on the viewpoint of the speaker."

- ""Government action that suppresses protected speech in a discriminatory manner may violate both the First Amendment and the Equal Protection Clause. . . ."

- "… the City could not constitutionally exclude petitioners based on their viewpoint."

In such circumstances, it might be reasonable to infer that the limitation on speech is not a content-neutral restriction but is instead a viewpoint-specific restriction on speech which could **violate not only the Brown Act but also the First Amendment**. Here, at this City Council meeting and the preceding PLUM hearing, members of the public **were denied** the opportunity to speak on matters of public concern.

Councilmember O'Farrell was well aware of the contentiousness of this item and public opposition that arose at the discovery of his eleventh-hour amendment. O'Farrell's history of viewpoint discrimination and not wanting to hear from people who may disagree with him is evidenced again here, as seen in both the May 4, 2021 PLUM hearing and the June 2, 2021 City Council meeting.

The City's actions in this matter are not complete, faithful, or uninterrupted compliance with the mandates of the Brown Act. **The City has failed to proceed in the manner required by law**.

Therefore the PLUM Committee and the Los Angeles City Council, by denying members of the public an opportunity to be heard on matters before these bodies, **violates the Brown Act**.
We hereby demand, Pursuant to Government Code Section 54960.1, that the City of Los Angeles cure and correct its violations of the Brown Act and the illegally taken actions as follows:

1. Cease and desist your violations of the Brown Act by immediately rescinding the decisions that were made in both of the flawed hearings.

2. Provide for new hearings on the item pursuant to section 54954.3 of the Brown Act, including the allowance of thorough public comment by any and all interested members of the public who comply with the instructions and raise their virtual hands during the telephonic and/or electronic meetings.

3. Cease and desist the systematic denial of public speaking rights in all future meetings.

As provided by Section 54960.1, you have 30 days from the receipt of this demand regarding the City Council meeting to either cure or correct the challenged action or inform us of your decision not to do so.

Failure to cure or correct as demanded may leave us no recourse but to seek a judicial invalidation of any prior actions pursuant to Section 54960.1, in which case we would also ask the court to order you to pay court costs and reasonable attorney fees in this matter, pursuant to Government Code Section 54960.5.

Thank you for your attention to this important matter.

Re: Brown Act Cure and Correct Demand, and Cease and Desist Demand. May 04, 2021, 2021 Planning and Land Use Management Committee Meeting; Denial of the public's opportunity to speak on Agenda item number 10: Taix French Restaurant, 1911 Sunset Blvd, Los Angeles, CA 90026

This letter is to call your attention to what we believe was and will continue to be a substantial violation of a central provision of the Ralph M. Brown Act, one which may jeopardize the finality of any action taken by the Los Angeles City Council PLUM Committee.

The nature of the violation is as follows: In its meeting of **May 4, 2021, several members of the public, including Annie Sperling and Richard Schave, having followed instructions to call in, and raised their virtual hand, to address matters of public concern before the Committee, regarding Agenda Item 10, the Taix Restaurant,, were never allowed an opportunity to speak. Whereupon, a vote was taken by the Committee with no practical way for members of the general public to participate while complying with the general order to shelter in place.**

Pursuant to the governor's executive order N-25-20, a legislative body is "authorized to make public meetings accessible telephonically or otherwise electronically to all members of the public seeking to attend and to address the local legislative body... during the period in which state or local public officials impose or recommend measures to promote social distancing." N-33-20 mandates all individuals living in the State of California to stay

home or at their place of residence, except as to maintain continuity of operations of the federal critical infrastructures and additional sectors designated as critical to protect the health and well-being of all Californians. Whether or not the stay at home orders are still in place, it is still advisable for members of the public to socially distance and avoid indoor spaces.

The purpose behind the Brown Act is to guarantee the public's right to attend and participate in meetings of local legislative bodies. Given EO N-33-20 ordering the public to shelter in place but for certain exceptions that do not include attending City Council Planning and Land Use Committee meetings, the PLUM Committee would be in contravention of the express purpose of the Act if it does not provide a mechanism for the public to attend electronically or telephonically.

Moreover, Government Code Section 54954.3 provides that members of the public must be permitted to address the legislative body on any item of interest to the public before or during the body's consideration of that item, unless the item has already been considered at a previous meeting with an opportunity for comment, and subject to "reasonable regulations" to facilitate public comment, time limit per speaker to allow more people to speak.

With respect to interpreting these provisions of the Brown Act, note that Article I, section 3 of the California Constitution provides that "[a] statute, court rule, or other authority … shall be broadly construed if it furthers the people's right of access, and narrowly construed if it limits the right of access." Meetings of legislative bodies, such as city council meetings, are regarded under First Amendment framework as "limited public forums." See White v. City of Norwalk, 900 F.2d 1421, 1425 (1990). Speech in a "public forum," which includes public spaces such as sidewalks and parks that have traditionally been used for conduct protected by the First Amendment, can only be restricted if a high standard is met.

Generally speaking, the more public a venue is, the less latitude the government has to restrict speech. Also, generally speaking, restrictions that are content-neutral (i.e., not tied to a particular message) will generally be easier to uphold than restrictions based on a particular viewpoint, which are more often constitutionally suspect.

This general principle is codified to some extent in Section 54954.3 of the Brown Act, which provides that "[t]he legislative body of a local agency shall not prohibit public criticism of the policies, procedures, programs, or services of the agency, or of the acts or omissions of the legislative body." This particular provision might be particularly relevant where the spectator trying to speak at a meeting was a political opponent of the member of the body forbidding the spectator to speak.

In such circumstances, it might be reasonable to infer that the limitation on speech is not a content-neutral restriction but is instead a viewpoint-specific restriction on speech which could violate not only the Brown Act but also the First Amendment. Here, and at various other public meetings regarding planning and land use issues, members of the public -- including Ms. Sperling and Mr. Schave -- on one side of the issue of historic preservation

in the City of Los Angeles have been denied an opportunity to speak on these matters of public concern.

Such conduct by the PLUM Committee, denying members of the public an opportunity to be heard on matters before the Committee violates the Brown Act.

Pursuant to Government Code Section 54960.1, we demand that the Los Angeles City Council Planning and Land Use Committee cure and correct the illegally taken action as follows**: immediately provide telephonic or electronic public access to any and all meetings until the EO N-33-20 is lifted,including public comment by interested members of the public who complied with the instructions and raised their virtual hands during the meetings.**

As provided by Section 54960.1, you have 30 days from the receipt of this demand regarding the previous meeting to either cure or correct the challenged action or inform us of your decision not to do so. Prospectively, as we understand that the next Board of Supervisors meeting is set for Monday, March 23, 2020, we demand that telephonic or electronic public access be in place for that meeting and all further Board of Supervisors meetings that occur during the order to shelter in place.

As a direct and proximate cause of the actions of the City, members of the public, and the council members themselves as the decision makers, were deprived of information concerning the importance of the Taix French Restaurant.

The City's actions in this matter are not complete, faithful, or uninterrupted compliance with the mandates of the Brown Act. The City has failed to proceed in the manner required by law.

The City must cure and correct its violations of the Brown Act as specified in Government Code Section 54960.1, and cease and desist the systematic denial of public speaking rights at special meetings, pursuant to Government Code Section 54960.2.

Failure to cure or correct as demanded may leave us no recourse but to seek a judicial invalidation of any prior actions pursuant to Section 54960.1, in which case we would also ask the court to order you to pay court costs and reasonable attorney fees in this matter, pursuant to Section 54960.5.

Thank you for your attention to this important matter.

PUBLIC COMMENT

In conformity with the Governor's Executive Order N-29-20 (March 17, 2020) and due to concerns over COVID-19, the City Council meeting will be conducted entirely telephonically.

CITY COUNCIL MEETINGS ARE BROADCAST LIVE ON CABLE TELEVISION CHANNEL 35 AND ON THE INTERNET AT: HTTPS://CLERK.LACITY.ORG/CALENDAR. LIVE COUNCIL MEETINGS CAN ALSO BE HEARD AT: (213) 621-CITY (METRO), (818) 904-9450 (VALLEY), (310) 471-CITY (WESTSIDE) AND (310) 547-CITY (SAN PEDRO AREA)

Members of the public who wish to offer public comment to the Council should call 1 669 254 5252 and use Meeting ID No. 160 535 8466 and then press #. Press # again when prompted for participant ID. Once admitted into the meeting, press *9 to request to speak.

Requests for reasonable modification or accommodation from individuals with disabilities, consistent with the Americans with Disabilities Act can be made by contacting the City Clerk's Office at (213) 978-1133. For Telecommunication Relay Services for the hearing impaired, please see the information located on page 2 of this agenda.

Telecommunication Relay Services

Telephone communication is one of the most important forms of communication in society today. Due to advancements in technology, telephone devices have evolved with new services and capabilities. Individuals who are deaf and hard of hearing, and individuals with a speech disability are following these trends and are rapidly migrating to more advanced telecommunications methods, both for peer-to-peer and third-party telecommunications relay service (TRS) communications.

Telecommunications Relay Service is a telephone service that allows persons with hearing or speech disabilities to place and receive telephone calls. TRS is available in all 50 states, the District of Columbia, Puerto Rico and the U.S. territories for local and/or long distance calls. TRS providers - generally telephone companies - are compensated for the costs of providing TRS from either a state or a federal fund. There is no cost to the TRS user.

What forms of TRS are available?There are several forms of TRS, depending on the particular needs of the user and the equipment available: TRS includes: Text to Voice TIY-Based TRS; Speech-to-Speech Relay Service; Shared Non-English Language Relay Service; Captioned Telephone Relay Service; Internet Protocol Relay Service; and Video Relay Service. Please visit this site for detail descriptions, https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.

Don't hang up! Some people hang up on TRS calls because they think the CA is a telemarketer. If you hear, "Hello. This is the relay service .. . " when you pick up the phone, please don't hang up! You are about to talk, through a TRS provider, to a person who is deaf, hard-of-hearing, or has a speech disability.

For more information about FCC programs to promote access to telecommunications services for people with disabilities, visit the FCC's Disability Rights Office website.

BASIC CITY COUNCIL MEETING RULES

AGENDAS - The City Council meets Tuesday, Wednesday and Friday at 10:00 A.M. The agendas for City Council meetings contain a brief general description of those items to be considered at the meetings. Council Agendas are available in the Office of the City Clerk, Council and Public Services Division, Room 395, City Hall, 200 North Spring Street, Los Angeles, CA 90012, and on the City's website at lacity.org; or lacouncilcalendar.com.

Ten (10) members of the Council constitute a quorum for the transaction of business. The Council may consider an item not listed on the agenda only if it is determined by a two-thirds (10) vote that the need for action arose after the posting of an Agenda. Some items on the agenda may be approved without any discussion, however, any item may be called "special" by a Councilmember. If an item is called "special" it will be "held" until the remainder of the items on the Council agenda have been acted on by the Council. An item may also be called "special" if a member of the public has requested to speak on the item and a public hearing was not previously held.

The City Clerk will announce the items to be considered by the Council, however items will be grouped. For example, all items for which required public hearings have not previously been held are listed in one section on the printed agenda. The Council President will ask if any Councilmember or member or the public wishes to speak on one or more of these items. If anyone wishes to speak on an item, it will be called "special". The remaining items in this section will be voted on by Council with one roll call vote.

PUBLIC INPUT AT CITY COUNCIL MEETINGS - An opportunity for the public to address the Council on agenda items for which public hearings have not been held will be provided at the time the item is considered or during the Multiple Agenda Item Comment period. Members of the public who wish to speak on items shall be allowed to speak for up to one minute per item up to a total of three minutes per meeting. The Council has determined that a cumulative total of 20 minutes is a reasonable minimum amount of time for the Multiple Agenda Item segment of each regular meeting.

The Council will also provide an opportunity for the public to speak on public interest items. Each speaker shall be limited to one minute of general public comment each regular meeting for a cumulative total of ten (10) minutes. The Council shall not discuss or take action relative to any general public comment.

If you wish to provide documents to the full Council for consideration on an item, please present the Sergeant-At-Arms with 35 copies. Otherwise, your materials will simply be added to the official record.

COUNCIL DISCUSSION AND TIME LIMITS - Councilmembers requesting to address the Council will be recognized by the Council President in the order requested. For any item, the Chairperson of the Committee, or the maker of the original motion, or the member calling a matter "special" shall have up to six (6) minutes to discuss the item. All other Councilmembers may speak up to three (3) minutes each on the matter. After all members desiring to speak on a question have had an opportunity to be heard once, the time for each Member desiring to speak again shall be limited to a maximum of three (3) minutes.

A motion calling the "previous question" may be introduced by any member during a Council debate. If adopted, this motion will terminate debate on a matter and the Chair will instruct the Clerk to call the roll on the matter.

VOTING AND DISPOSITION OF ITEMS - Most items require a majority vote of the entire membership of the Council (8 members). Items which have not been discussed in a Council Committee and have been placed directly on the agenda will require 10 votes to consider. Once considered, these items will normally require eight (8) affirmative votes to be adopted. Ordinances require a unanimous vote (at least 12 members must be present) in order to be adopted on first consideration. If an ordinance does not receive the necessary unanimous vote, it is laid over one calendar week. The

votes required for approval on second consideration vary and depend upon the type of ordinance, but a typical ordinance requires eight (8) affirmative votes upon second consideration.

NOTICE TO PAID REPRESENTATIVES - If you are compensated to monitor, attend, or speak at this meeting, City law may require you to register as a lobbyist and report your activity. See Los Angeles Municipal Code 48.01 et seq. More information is available at ethics.lacity.org/lobbying. For assistance, please contact the Ethics Commission at (213) 978-1960 or ethics.commission@lacity.org.

COUNCIL DISCUSSION AND TIME LIMITS - Councilmembers requesting to address the Council will be recognized by the Council President in the order requested. For any item, the Chairperson of the Committee, or the maker of the original motion, or the member calling a matter "special" shall have up to six (6) minutes to discuss the item. All other Councilmembers may speak up to three (3) minutes each on the matter. After all members desiring to speak on a question have had an opportunity to be heard once, the time for each Member desiring to speak again shall be limited to a maximum of three (3) minutes.

A motion calling the "previous question" may be introduced by any member during a Council debate. If adopted, this motion will terminate debate on a matter and the Chair will instruct the Clerk to call the roll on the matter.

VOTING AND DISPOSITION OF ITEMS - Most items require a majority vote of the entire membership of the Council (8 members). Items which have not been discussed in a Council Committee and have been placed directly on the agenda will require 10 votes to consider. Once considered, these items will normally require eight (8) affirmative votes to be adopted. Ordinances require a unanimous vote (at least 12 members must be present) in order to be adopted on first consideration. If an ordinance does not receive the necessary unanimous vote, it is laid over one calendar week. The votes required for approval on second consideration vary and depend upon the type of ordinance, but a typical ordinance requires eight (8) affirmative votes upon second consideration.

When debate on an item is completed, the Chair will instruct the Clerk to "call the roll". Every member present must vote for or against each item; abstentions are not permitted. The Clerk will announce the votes on each item. Any member of Council may move to "reconsider" any vote on any item on the agenda, except to adjourn, suspend the Rules, or where an intervening event has deprived the Council of jurisdiction, providing that said member originally voted on the prevailing side of the item. The motion to "reconsider" shall only be in order once during the meeting, and once during the next regular meeting. The member requesting reconsideration shall identify for all members present the agenda number, Council file number and subject matter previously voted upon. A motion to reconsider is not debatable and shall require an affirmative vote of eight (8) members of the Council.

When the Council has failed by sufficient votes to approve or reject an item, and has not lost jurisdiction over the matter, or has not caused it to be continued beyond the next regular meeting, the item is continued to the next regular meeting for the purpose of allowing the Council to again vote on the matter.

The City Council rules provide that all items adopted by the Council will not be presented to the Mayor, or other designated officer by the City Clerk until the adjournment of the regular Council meeting following the date of the Council action. A motion to send an item "forthwith" if adopted by ten (10) votes, suspends these rules and requires the City Clerk to forward the matter to the Mayor, or other officer, without delay.

When debate on an item is completed, the Chair will instruct the Clerk to "call the roll". Every member present must vote for or against each item; abstentions are not permitted. The Clerk will announce the votes on each item. Any member of Council may move to "reconsider" any vote on any item on the agenda, except to adjourn, suspend the Rules, or where an intervening event has deprived the Council of jurisdiction, providing that said member originally voted on the prevailing side of the item. The motion to "reconsider" shall only be in order once during the meeting, and once during the next regular meeting. The member requesting reconsideration shall identify for all members present the agenda number,

Council file number and subject matter previously voted upon. A motion to reconsider is not debatable and shall require an affirmative vote of eight (8) members of the Council.

When the Council has failed by sufficient votes to approve or reject an item, and has not lost jurisdiction over the matter, or has not caused it to be continued beyond the next regular meeting, the item is continued to the next regular meeting for the purpose of allowing the Council to again vote on the matter.

The City Council rules provide that all items adopted by the Council will not be presented to the Mayor, or other designated officer by the City Clerk until the adjournment of the regular Council meeting following the date of the Council action. A motion to send an item "forthwith" if adopted by ten (10) votes, suspends these rules and requires the City Clerk to forward the matter to the Mayor, or other officer, without delay.

RULE 16 MOTIONS - Council Rule No. 16, in part, allows a member to send an item directly to the Council without it having to go to a Council Committee first, by giving the City Clerk a motion (seconded by an additional member) during a Council session to be placed on the next regular available Council agenda.

PERSONNEL, AUDITS, AND ANIMAL WELFARE COMMITTEE REPORT relative to approval of retention premiums and minimum step hiring for critical Los Angeles Department of Water and Power (LADWP) Classifications.

Recommendation for Council action:

APPROVE the following retention premium and advanced step hiring authority:

1. A two-level retention premium of 5.5 percent per year, for three years, for incumbent Electrical Service Managers, Transmission and Distribution Supervisors, Water Utility Superintendents, and Water Service Managers that are eligible for full retirement (i.e. 30 years of service and 55 years of age) with said premium to sunset three years after LADWP implementation as a means of affording the LADWP the ability to retain incumbents of the above classifications that are retirement-eligible for a period of time sufficient to retain and develop their potential replacements and serving as an incentive to attract retirement eligible supervisors early enough to lessen the impact of the overtime and/or double time earnings they would be forfeiting by joining the management ranks.
2. Minimum step placement to step four of the five step salary range as a means of resolving difficulties that the LADWP is experiencing in

attracting candidates with the requisite knowledge, skills and abilities to promote to the management level classifications with said minimum step placement offseting the loss of overtime compensation in relation to base salary and the length of time that it takes to reach the top of the salary range of the new position.

Fiscal Impact Statement: None submitted by the LADWP. Neither the City Adminsitrative Officer nor the Chief Legislative Analyst has completed a financial analysis of this report.

Community Impact Statement: None submitted.

CONTINUED CONSIDERATION OF MITIGATED NEGATIVE DECLARATION (MND), ADDENDUM, PLANNING AND LAND USE MANAGEMENT COMMITTEE REPORT, and ORDINANCE FIRST CONSIDERATION relative to a Conditional Use Permit Appeal and Zone Change for the properties located at 1523-1541 North Wilcox Avenue.

Recommendations for Council action, SUBJECT TO THE APPROVAL OF THE MAYOR:

1. FIND that, based on the independent judgment of the decision-maker, after consideration of the whole of the administrative record, the Project was assessed in MND No. ENV-2014-3707-MND-REC-1, adopted on September 10, 2015; and, pursuant to California Environmental Quality Act Guidelines 15162 and 15164, as supported by the Addendum dated October 2020 (ENV-2014-3707-MND-REC2), no major revisions are required to the MND; and, no subsequent Environmental Impact Report or negative declaration is required for approval of the Project.
2. ADOPT the FINDINGS of the Central Los Angeles Area Planning Commission (CLAAPC) as the Findings of Council.
3. RESOLVE TO DENY THE APPEAL filed by David Carrera, and THEREBY SUSTAIN the determination of the CLAAPC in approving a Conditional Use Permit to allow the sale and dispensing of a full line of alcoholic beverages for on-site consumption in conjunction with 1) a 5,125 square-foot ground floor restaurant and 840 square-foot outdoor

eating area; 2) 4,970 square-foot combined lobby and lobby bar; 3) 4,105 square-foot rooftop restaurant, bar, and lounge, and a 1,193 square-foot outdoor dining terrace; 4) 3,406 square-foot combined pool bar, pool bar lounge, and pool deck; and, 5) within controlled access cabinets in the guest rooms (mini bars); the ground floor restaurant and bar would have operating hours between 6:00 a.m. and 2:00 a.m. daily; the enclosed rooftop restaurant would have operating hours from 7:00 a.m. to 1:00 a.m. daily; and, the outdoor rooftop areas would operate between 7:00 a.m. and 12:00 a.m. daily; for the properties located at 1523-1541 North Wilcox Avenue, subject to the modified Conditions of Approval.

4. PRESENT and ADOPT the accompanying ORDINANCE, dated December 8, 2020, effectuating a Zone Change from (T)(Q)C4-2D to (Q)C2-2D, pursuant to Section 12.32 of the Los Angeles Municipal Code (LAMC), for the use and maintenance of a 190-room hotel with: 1) a 5,125 square-foot ground floor restaurant and 840 square-foot outdoor eating area; 2) 4,970 square-foot combined lobby and lobby bar; 3) 4,105 square-foot rooftop restaurant, bar, and lounge, and a 1,193 square-foot outdoor dining terrace; and, 4) a 3,406 square-foot combined pool bar, pool bar lounge, and pool deck; the ground floor restaurant and bar would have operating hours between 6:00 a.m. and 2:00 a.m. daily; the enclosed rooftop restaurant would have operating hours from 7:00 a.m. to 1:00 a.m. daily; the outdoor rooftop areas would operate between 7:00 a.m. and 12:00 a.m. daily; with live entertainment (including disc jockeys) and amplified music within the lobby bar, and live acoustic (non-amplified) music with up to three musicians and ambient music to complement the dining, bar, and/or lounge experience within the Project's ground floor restaurant and outdoor eating area; including a maximum of 24 special events annually; for the properties located at 1523-1541 North Wilcox Avenue, subject to the Conditions of Approval.

5. ADVISE the applicant, pursuant to LAMC Section 12.32 G:
...property shall not remain in a Q Qualified classification for more than six years unless during that time: (1) there is substantial physical development of the property to allow for one or more of the uses for which the Q Qualified classification was adopted; or (2) if no physical development is necessary, then the property is used for one or more of the purposes for which the Q Qualified classification was adopted... When these time limitations expire, the Q Qualified classification and the authority contained therein shall become null and void, the rezoning proceedings shall be terminated, and the property thereafter

may only be utilized for those purposes permitted prior to the commencement of such rezoning proceedings.

6. ADVISE the applicant that, pursuant to State Public Resources Code Section 21081.6, the City shall monitor or require evidence that mitigation conditions are implemented and maintained throughout the life of the project, and the City may require any necessary fees to cover the cost of such monitoring.

7. ADVISE the applicant that, pursuant to State Fish and Game Code Section 711.4, a Fish and Game Fee and/or Certificate of Fee Exemption is now required to be submitted to the County Clerk prior to or concurrent with the Environmental Notice of Determination filing.

CONTINUED CONSIDERATION OF CATEGORICAL EXEMPTION and PLANNING AND LAND USE MANAGEMENT (PLUM) COMMITTEE REPORT relative to the inclusion of the Taix French Restaurant, located at 1910-2018 West Reservoir Street, in the list of Historic-Cultural Monuments.

Recommendations for Council action:

1. DETERMINE that the proposed designation is categorically exempt from the California Environmental Quality Act (CEQA), pursuant to

Article 19, Section 15308, Class 8 and Article 19, Section 15331, Class 31 of the State CEQA Guidelines.

2. DETERMINE that the subject property conforms with the definition of a Monument pursuant to Section 22.171.7 of the Los Angeles Administrative Code.

3. ADOPT the FINDINGS of the Cultural Heritage Commission (CHC), as amended by the PLUM Committee, attached to the Council file in the communication from the Council District (CD) 13 Office, dated May 4, 2021, as the Findings of Council.

4. APPROVE the recommendations of the CHC relative to the inclusion of the Taix French Restaurant, located at 1910-2018 West Reservoir Street, in the list of Historic-Cultural Monuments.

CD 13 SUSTAINABLE COMMUNITIES PROJECT EXEMPTION (SCPE) and PLANNING AND LAND USE MANAGEMENT COMMITTEE REPORT relative to a SCPE request for the properties located at 1818-1824 North Cherokee Avenue.

Recommendations for Council action:

1. FIND, upon a review of the entire administrative record, including the SCPE Case No. ENV-2020-4649-SCPE, and all comments received, that:
   a. The proposed project qualifies as a transit priority project pursuant to Public Resources Code (PRC) Section 21155(b), which by definition means that the proposed project is consistent with the general use designations, density, building intensity, and applicable policies specified for the project area in the Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) prepared by the Southern California Association of Governments (SCAG) pursuant to PRC Section 21155(a); and contains more than 50 percent residential; provides a minimum net density greater than 20 units an acre; and is within one-half mile of a major transit stop or high-quality transit corridor included in a regional transportation plan per PRC Section 21155(b).

   b. All criteria in PRC Section 21155.1(a) and (b) are met, including environmental criteria, land use criteria; and, at least one criteria (affordable housing) in PRC Section 21155.1(c).

2. FIND that the proposed project qualifies as a transit priority project that is declared to be a Sustainable Communities Project and is therefore statutorily exempt from the California Environmental Quality Act, in accordance with PRC Section 21155.1; for a proposed project involving the demolition of an existing surface parking lot and the construction, use, and maintenance of a new, seven-story, 85-foot, 4 inches (at its highest), multi-family residential building consisting of 86 dwelling units, of which 21 units will be reserved for Very Low Income Households; the project includes 14 studio units, 54 one-bedroom units, and 18 two-bedroom units; a total of 9,649 square feet of open space; and, will provide 61 automobile parking spaces located within two subterranean levels; for the properties located at 1818-1824 North Cherokee Avenue.

CATEGORICAL EXEMPTION and PLANNING AND LAND USE MANAGEMENT COMMITTEE REPORT relative to a California Environmental Quality Act (CEQA) Appeal, Density Bonus, and Site Plan Review for the properties located at 418-430 North Alvarado Street.

Recommendations for Council action:

1. FIND, based on the whole of the administrative record, that the project is exempt from the CEQA, pursuant to CEQA Guidelines, Article 19, Sections 15332, Class 32, and there is no substantial evidence demonstrating that an exception to a categorical exemption pursuant to CEQA Guidelines, Section 15300.2 applies.

2. ADOPT the FINDINGS of the Los Angeles City Planning Commission (LACPC), as the Findings of Council.

3. RESOLVE TO DENY THE APPEAL filed by Margarita Lopez, Coalition For An Equitable Westlake/MacArthur Park (Representative: Claudia Medina, Law Office of Claudia Medina), and THEREBY SUSTAIN the determination of the Los Angeles City Planning Commission (LACPC) in approving a Categorical Exemption as the environmental clearance for the project, a 35 percent Density Bonus (DB) for a project reserving eleven percent of the base dwelling units or six units for Very-Low Income Households, in conjunction with Parking Option 1 and the following two Off-Menu Incentives: a) a 2.85:1 Floor Area Ratio (FAR) in lieu of the otherwise permitted 1.5:1 FAR for the C2- 1VL Zone; and, b) an increase in height and number of stories permitted, to allow a 69-foot, five-story building in lieu of a maximum 45-foot, three-story building for a mixed-use building in the

C2-1 VL Zone; and, approving a Site Plan Review for a project that creates or results in an increase of 50 or more net new dwelling units and/or guest rooms; for the demolition of an existing vacant private school, one single-family dwelling, and a duplex; and the construction, use, and maintenance of a new 73-unit, approximately 52,000 square foot mixed-use development including 500 square feet of ground-floor commercial space on approximately 19,197 square feet of land (21,517 square feet including alleys); the project will include a five-story building with two parking levels (including one subterranean level) that will provide a total of 81 parking spaces, and include six Very Low-Income units, for the properties located at 418-430 North Alvarado Street, subject to Conditions of Approval.

CONTINUED CONSIDERATION OF RESOLUTION (BUSCAINO – BONIN) and COMMUNICATION FROM THE CHIEF LEGISLATIVE ANALYST (CLA) relative to establishing the City's position in its 2021-22 State Legislative Program regarding Assembly Bill (AB) 816 (Chiu), which would require the California Department of Housing and Community Development and local governments of California to have their own local plans to reduce homelessness by 90 percent by December 31, 2029 and to establish a Homelessness Inspector General

who would ensure that each local government is following through on their plan based on their financial capability.

A. RESOLUTION (BUSCAINO – BONIN)

Recommendation for Council action, SUBJECT TO THE CONCURRENCE OF THE MAYOR:

ADOPT the accompanying RESOLUTION to include in the City's 2021-22 State Legislative Program SUPPORT for AB 816 (Chiu), which would require the California Department of Housing and Community Development and local governments of California to have their own local plans to reduce homelessness by 90 percent by December 31, 2029 and to establish a Homelessness Inspector General who would ensure that each local government is following through on their plan based on their financial capability.

B. COMMUNICATION FROM THE CLA

Recommendation for Council action, SUBJECT TO THE CONCURRENCE OF THE MAYOR:

ADOPT the revised RESOLUTION, attached to the CLA report dated May 24, 2021, to include in the City's 2021-22 State Legislative Program SUPPORT for AB 816 which would require the California Department of Housing and Community Development and local governments of California to have their own local plans to reduce homelessness by 90 percent by December 31, 2029 and to establish a Homelessness Inspector General who would ensure that each local government is following through on their plan based on their financial capability and SEEK AMENDMENT for the State to provide additional funding for homelessness prevention and housing creation.

Fiscal Impact Statement: None submitted by the CLA. The City Administrative Officer has not completed a financial analysis of this report.

Community Impact Statement: None submitted.

(Rules, Elections, and Intergovernmental Relations Committee waived consideration of the above matter)

(Continued from Council meeting of May 26, 2021)

(12) **20-1021-S4**

COMMUNICATIONS FROM THE CITY ADMINISTRATIVE OFFICER (CAO) relative to the Fifth Construction Projects Report (CPR) for Fiscal Year 2020-21.

Recommendations for Council action, SUBJECT TO THE APPROVAL OF THE MAYOR:

APPROVE the recommendations as found in the CAO report dated May 7, 2021, attached to the Council file, with the additional recommendations as contained in the addendum from the CAO dated May 20, 2021, attached to the Council file.

Fiscal Impact Statement: The CAO reports that transfers, appropriations, and expenditure authority totaling $15.42 million are recommended in said CAO report. Of this amount, $7.02 million is for transfers, appropriations, and expenditure authority for the BSS, $2.28 million for the Department of General Services (GSD), and $6.12 million is for other City funds. All transfers and appropriations are based on existing funds, reimbursements, or revenues. There is no immediate General Fund impact for operations and maintenance costs as a result of the CAO's recommendations (Attachment No. X of said CAO report).

In the Addendum, the CAO further states that transfers, appropriations, and expenditure authority totaling $1.85 million are recommended in said Addendum. Of this amount, $1.2 million is for transfers, appropriations, and expenditure authority for the CAO, $0.6 million for the GSD, and $50,000 is for the City Attorney. All transfers and appropriations are based on existing funds, reimbursements, or revenues. There is no immediate General Fund impact for operations and maintenance costs as a result of the CAO's recommendations.

Financial Policies Statement: The CAO reports that the actions recommended in said CAO report comply with the City's Financial Policies.

Debt Impact Statement: The CAO reports that the issuance of Municipal Improvement Corporation of Los Angeles (MICLA) debt is a General Fund obligation. The issuance of MICLA for the Asphalt Plant No. 1 acquisition and the Los Angeles Convention Center (LACC) Expansion Project's increased financial advisory services would cause the City to borrow approximately $6,225,000 at an approximate 5.5 percent interest rate over 20 years. The total estimated debt service for the projects is $10,419,000, including interest of approximately $4,194,000. During the life of the bonds, the estimated average annual debt service is $521,000 over 20 years. Actual interest rates may differ as rates are dependent on market

conditions at the time of issuance. The CAO cannot fully predict what interest rates will be in the future. In accordance with the City's Debt Management Policy, the City has an established debt ceiling to guide in evaluating the affordability for future debt. The debt ceiling for non-voted direct debt as a percentage of General Fund revenues is 6.0 percent. The revised 2020-21 non voter-approved debt ratio is 2.78 percent. The issuance of debt for these projects will not cause the City to exceed the six percent non voter-approved debt limit.

In the Addendum, the CAO further states that the issuance of MICLA debt is a General Fund obligation. The issuance of MICLA for the reauthorization of Municipal Facilities projects (Attachment A of said Addendum) and the LACC Expansion Project's increased legal services costs would cause the City to borrow approximately $40,465,875 at an approximate 5.5 percent interest rate over 20 years. The issuance of MICLA for the reauthorization of Bureau of Sanitation Clean Street Vehicles would cause the City to borrow approximately $2,360,835 at an approximate 5.5 percent interest rate over 10 years. The total estimated debt service for the Municipal Facilities projects and Clean Street Vehicles is $70,855,000, including interest of approximately $28,028,000. During the life of the bonds, the estimated average annual debt service is $3,699,000 over the first 10 years and $3,386,000 over the following 10 years. Actual interest rates may differ as rates are dependent on market conditions at the time of issuance. The CAO cannot fully predict what interest rates will be in the future. In accordance with the City's Debt Management Policy, the City has an established debt ceiling to guide in evaluating the affordability for future debt. The debt ceiling for non-voted direct debt as a percentage of General Fund revenues is 6.0 percent. The revised 2020-21 non voter-approved debt ratio is 2.78 percent. The issuance of debt for these projects will not cause the City to exceed the six percent non voter-approved debt limit.

Community Impact Statement: None submitted

(Information, Technology, and General Services and Budget and Finance Committees waived consideration of the above matter)

CD 10

MOTION (RIDLEY-THOMAS – BLUMENFIELD) relative to funding for services associated with COVID19 Food Distribution in Council District 10 provided by the Bureau of Street Services (BSS).

Recommendations for Council action, SUBJECT TO THE APPROVAL OF THE MAYOR:

1. TRANSFER and APPROPRIATE $5,819 in the AB1290 Fund No. 53P, Account No. 281210 (CD 10 Redevelopment Projects – Services) to the Subventions and Grants Fund No. 305/50, Revenue Source 4658 / 01 for services association with COVID19 Food Distribution in Council District 10 provided by the BSS(BSS Invoice Number 20210017-2021).
2. AUTHORIZE the BSS to make any corrections, clarifications or revisions to the above fund transfer instructions, including any new instructions, in order to effectuate the intent of this Motion, and including any corrections and changes to fund or account numbers; said corrections / clarifications / changes may be made orally, electronically or by any other means.

(14) **21-0010-S9**

MOTION (MARTINEZ – PRICE) relative to offer of reward for information leading to the identification, apprehension, and conviction of the person(s) responsible for shooting death of Roberto Garcia Esqueda on July 3, 1991.

Recommendation for Council action, SUBJECT TO THE APPROVAL OF THE MAYOR:

1. PROVIDE an offer of reward of $50,000 for information leading to the identification, apprehension, and conviction of the person(s) responsible for the shooting death of Roberto Garcia Esqueda on July 3, 1991.
2. FIND that the subject reward complies with the provisions to Chapter 12, Article 1, Division 19, of the Los Angeles Administrative Code.
3. DIRECT the City Clerk to publish the required notices and/or advertisements to effectuate this reward.

(15) **20-0600-S93**

MOTION (KREKORIAN – BLUMENFIELD) relative to supplemental funding to meet immediate payroll and contractual obligations.

Recommendations for Council action, SUBJECT TO THE APPROVAL OF THE MAYOR:

1. TRANSFER $10,562,236 from the Unappropriated Balance Fund No. 100/58, Account No. 580196, Reserve for Mid-Year Adjustments Account to the following funds and accounts:

Fund No./Department	Account No.	Amount
100/02, Aging	003040, Contractual Services	$2,300,000
100/14, City Clerk	001010, Salaries General	1,212,512
100/35, Emergency Management	001010, Salaries General	50,832
100/74, Board of Public Works	001010, Salaries General	700,001
100/78, Bureau of Engineering	001010, Salaries General	4,600,000
100/84, Bureau of Street Lighting	001010, Salaries General	1,698,891
		Total $10,562,236

2. TRANSFER $245,275 from the Capital Finance Administration Fund No. 100/53, Account No. 000342, MICLA 2012-B CP Real Property Refinancing to the Bureau of Street Lighting Fund No. 100/84, Account No. 001010, Salaries General.

3. TRANSFER $35,000 in Sewer Capital Funds from the Bureau of Engineering Fund No. 100/78, Account No. 001090, Overtime General to the Bureau of Engineering Fund No. 100/78, Account No. 001100, Hiring Hall Salaries.

(16) **21-0600**

CONSIDERATION OF MAYOR'S VETO MESSAGE, upon receipt, pursuant to Charter Section 315. City Council has five days, excluding Saturdays, Sundays, and legal holidays, upon receipt of the Mayor's veto to overcome such action of the Mayor relative to any item or items of the budget.

(The Mayor has until June 3, 2021 to submit his Veto Message to the City Council, pursuant to Charter Section 314.)

(17) **20-1444**

COMMUNICATION FROM THE BOARD OF PUBLIC WORKS (BPW) relative to Participant Agreement with the County of Los Angeles (County) for the acquisition of aerial imagery and associated products as a member of the countywide Los Angeles Region Imagery Acquisition Consortium (LARIAC) 6 Project.

Recommendations for Council action, SUBJECT TO THE APPROVAL OF THE MAYOR:

1. ADOPT the BPW report dated June 23, 2021, attached to the Council file, to AUTHORIZE the City Engineer, to execute a Participant Agreement with the County for the acquisition of aerial imagery and associated products as a member of the countywide LARIAC6 Project.
2. AUTHORIZE the City Engineer, or designee, to execute the Participant Agreement with the County on behalf of the City and to pay to the County $705,995 for the acquisition of imagery and associated products from the countywide LARIAC6 Project, associated with the Letter of Intent signed June 13, 2019 (Transmittal No. 1 of said BPW report).
3. APPROVE funding in the amount of $63,891 from Fund No. 100/78, Appropriation Unit No. 001090 for the Bureau of Engineering's (BOE) participation in the countywide LARIAC6 Project.
4. REQUEST the Controller to transfer the following amounts from the City departments and bureaus identified in said BPW report, totaling $705,995 from various departmental appropriation units to the new appropriation unit in the Engineering Special Services Fund No. 682/50, titled "LARIAC6 Project," to enable the BOE to make the full payment to the County for the LARIAC6 Project.

Dept. Name	Fund/Dept.	Appropriation Unit No.	Amount
Dept. of City Planning	588/68	003040	$48,888
Los Angeles Harbor Dept.	702/42	1000/699	48,888
Los Angeles Dept. of Building and Safety	48R/08	S530	138,776
Bureau of Sanitation	100/82	003040	48,888
Los Angeles Police Dept.	100/70	003040/90355	48,888
Bureau of Engineering	100/78	001090	63,891
Los Angeles Fire Dept.	100/38	03040	48,888
Los Angeles Dept. of Water and Power	51/98	5166	129,444
Los Angeles Dept. of Water and Power	01/98	5166	129,444
		TOTAL:	$705,995

5. REQUEST all the General Managers, or designees, of the various City departments and Public Works bureaus identified in Recommendation No. 4 above to complete the transfer of funds in coordination with the Controller.

Fiscal Impact Statement: None submitted by the BPW. Neither the City Administrative Officer nor the Chief Legislative Analyst has completed a financial analysis of this report.

Community Impact Statement: None submitted

(Information, Technology, and General Services Committee waived consideration of the above matter)

(18) **21-0002-S125**

COMMUNICATION FROM THE CHIEF LEGISLATIVE ANALYST (CLA) and RESOLUTION (DE LEÓN – CEDILLO – ET AL.) relative to establishing the City's position in its 2021-2022 Federal Legislative Program regarding administrative or legislative action which would support the international condemnation of the repression and violence being perpetrated by the Colombian government against civilians, and related matters.

Recommendation for Council action, SUBJECT TO THE CONCURRENCE OF THE MAYOR:

ADOPT the accompanying RESOLUTION to include in the City's 2021-2022 Federal Legislative Program SUPPORT for any administrative or legislative action which would: 1) support the international condemnation of the repression and violence being perpetrated by the Colombian government against civilians, 2) enforce the Leahy Laws to suspend aid to the Colombian government in the form of funding, arms, and crowd control equipment, and 3) guarantee freedom of movement and demonstration and equitable access to testing, health care, humanitarian aid, and vaccinations, until all perpetrators of human rights violations are brought to justice and violence against civilians ceases.

Fiscal Impact Statement: Neither the City Administrative Officer nor the CLA has completed a financial analysis of this report.

Community Impact Statement: None submitted.

(Rules, Elections, and Intergovernmental Relations Committee waived consideration of the above matter)

TAIX FRENCH RESTAURANT
1911-1929 West Sunset Boulevard; 1910-2018 West Reservoir Street
CHC-2020-5524-HCM
ENV-2020-5525-CE

FINDINGS

(As Amended by the Cultural Heritage Commission on December 17, 2020)

- Taix French Restaurant "exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city or community" as the long-time location of Taix French Restaurant, a business that bears a significant association with the commercial identity of Los Angeles.

DISCUSSION OF FINDINGS

Taix French Restaurant meets one of the Historic-Cultural Monument criteria: the subject property "exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city or community" as the long-time location of Taix French Restaurant, a business that bears a significant association with the commercial identity of Los Angeles.

Los Angeles has a wide range of long-term businesses that have served residents, visitors, and tourists for decades and have made important contributions to the commercial history of Los Angeles. SurveyLA identifies several eligibility standards for evaluating properties for historic significance under the theme of "Commercial Identity, 1920-1980." These include evaluating whether a property "is associated with a business that made an important contribution to commercial growth and development in Los Angeles" and whether it "is the founding or the long-term location of a business significant in commercial history." The subject property has served as the location for Taix French Restaurant, a business established in 1927, for nearly 60 years. In Los Angeles and elsewhere, well-established and long-lived businesses, such as Taix French Restaurant, take on important social qualities and over time, they often organically mature into iconic and revered cultural institutions. Their endurance becomes ingrained into a neighborhood's collective memory and plays an integral role in defining a community's sense of cultural and commercial identity. Since 1962, Taix French Restaurant has remained in continuous operation at its location in Echo Park. Over the course of its nine decades in business, the restaurant has become known for serving country French dishes in its stylish, dimly lit dining rooms and a cocktail lounge. Its banquet rooms have often been used as gathering places for large parties, especially before and after games at nearby Dodger Stadium. Taix French Restaurant is considered a legacy business and a beloved community institution, earning it a reputation as one of Los Angeles' most iconic dining establishments.

Although the property has experienced some interior and exterior alterations since Taix relocated to the subject property in 1962, all changes are associated with the restaurant's growth over time and are compatible with the original continental dining design intent. Therefore, the subject property retains a high level of integrity of location, design, setting, materials, workmanship, feeling, and association to convey its significance.

CALIFORNIA ENVIRONMENTAL QUALITY ACT ("CEQA") FINDINGS

State of California CEQA Guidelines, Article 19, Section 15308, Class 8 "*consists of actions taken by regulatory agencies, as authorized by state or local ordinance, to assure the maintenance*

restoration, enhancement, or protection of the environment where the regulatory process involves procedures for protection of the environment."

State of California CEQA Guidelines Article 19, Section 15331, Class 31 "*consists of projects limited to maintenance, repair, stabilization, rehabilitation, restoration, preservation, conservation or reconstruction of historical resources in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic buildings.*"

The designation of Taix French Restaurant as an Historic-Cultural Monument in accordance with Chapter 9, Article 1, of The City of Los Angeles Administrative Code ("LAAC") will ensure that future construction activities involving the subject property are regulated in accordance with Section 22.171.14 of the LAAC. The purpose of the designation is to prevent significant impacts to a Historic-Cultural Monument through the application of the standards set forth in the LAAC. Without the regulation imposed by way of the pending designation, the historic significance and integrity of the subject property could be lost through incompatible alterations and new construction and the demolition of an irreplaceable historic site/open space. The Secretary of the Interior's Standards for Rehabilitation are expressly incorporated into the LAAC and provide standards concerning the historically appropriate construction activities which will ensure the continued preservation of the subject property.

The City of Los Angeles has determined based on the whole of the administrative record, that substantial evidence supports that the Project is exempt from CEQA pursuant to CEQA Guidelines Section Article 19, Section 15308, Class 8 and Section 15331, Class 31, and none of the exceptions to a categorical exemption pursuant to CEQA Guidelines Section 15300.2 applies. The project was found to be exempt based on the following:

> The use of Categorical Exemption Class 8 in connection with the proposed designation is consistent with the goals of maintaining, restoring, enhancing, and protecting the environment through the imposition of regulations designed to prevent the degradation of Historic-Cultural Monuments.
>
> The use of Categorical Exemption Class 31 in connection with the proposed designation is consistent with the goals relating to the preservation, rehabilitation, restoration and reconstruction of historic buildings and sites in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties.

Categorical Exemption ENV-2020-5525-CE was prepared on November 13, 2020.

Attention: PLUM Committee

Dear Honorable Members:

TAIX FRENCH RESTAURANT; 1911-1929 WEST SUNSET BOULEVARD; 1910-2018 WEST RESERVOIR STREET; CHC-2020-5524-HCM; ENV-2020-5525-CE; CD-13

At its meeting of **December 17, 2020**, the Cultural Heritage Commission took the actions below to include Taix French Restaurant in the list of Historic-Cultural Monuments, subject to adoption by the City Council:

1. **Determined** that the proposed designation is categorically exempt from the California Environmental Quality Act (CEQA), pursuant to Article 19, Section 15308, Class 8 and Article 19, Section 15331, Class 31 of the State CEQA Guidelines;
2. **Determined** that the property conforms with the definition of a Monument pursuant to Section 22.171.7 of the Los Angeles Administrative Code;
3. **Recommended** that the City Council consider Taix French Restaurant for inclusion in the list of Historic-Cultural Monuments; and
4. **Adopted** the attached amended Findings of the Commission.

The Commission vote was as follows:

Moved:	Kanner
Seconded:	Milofsky
Ayes:	Barron, Kennard
Absent:	Buelna

Vote: 4 – 0

James K. Williams, Commission Executive Assistant II
Cultural Heritage Commission

The Cultural Heritage Commission would appreciate your inclusion of the subject property to the list of Historic-Cultural Monuments.

Time for Council to Act: The Commission action is hereby transmitted to the City Council for consideration. Pursuant to Section 22.171.10(f) of the Los Angeles Administrative Code, the Council may approve or disapprove in whole or in part an application or initiation for a proposed designation of a Monument. The Council shall act in 90-days of the public hearing held before the Commission on the proposed designation. The City Council may unilaterally extend the 90-day time limit to act for a maximum of 15 days for good cause. With written consent of the owner, the time for the City Council to act may be extended by up to an additional 60 days. If the Council does not act on the application or initiation within this specified time limit, the application or initiation to designate a Monument shall be deemed to have been denied.

CATEGORICAL EXEMPTION and PLANNING AND LAND USE MANAGEMENT (PLUM) COMMITTEE REPORT relative to the inclusion of the Taix French Restaurant, located at 1910-2018 West Reservoir Street, in the list of Historic-Cultural Monuments.

Recommendations for Council action:

1. DETERMINE that the proposed designation is categorically exempt from the California Environmental Quality Act (CEQA), pursuant to Article 19, Section 15308, Class 8 and Article 19, Section 15331, Class 31 of the State CEQA Guidelines.

2. DETERMINE that the subject property conforms with the definition of a Monument pursuant to Section 22.171.7 of the Los Angeles Administrative Code.

3. ADOPT the FINDINGS of the Cultural Heritage Commission (CHC), as amended by the PLUM Committee, attached to the Council file in the communication from the Council District (CD) 13 Office, dated May 4, 2021, as the Findings of Council.

4. APPROVE the recommendations of the CHC relative to the inclusion of the Taix French Restaurant, located at 1910-2018 West Reservoir Street, in the list of Historic-Cultural Monuments.

Owners/Applicants: 1911 Sunset Investors LLC c/o Chris Riha; and Raymond M. Taix, et al., c/o Annie Sperling, Silver Lake Heritage Trust

Case No. CHC-2020-5524-HCM

Environmental No. ENV-2020-5525-CE

Fiscal Impact Statement: None submitted by the CHC. Neither the City Administrative Officer nor the Chief Legislative Analyst has completed a financial analysis of this report.

Community Impact Statement: None submitted.

SUMMARY

At a regular meeting held on May 4, 2021, the PLUM Committee considered a CHC report relative to the inclusion of the Taix French Restaurant, located at 1910-2018 West Reservoir Street, in the list of Historic-Cultural Monuments. Staff from the Department of City Planning provided an overview of the matter. A Representative of CD 13 provided comments in support of the designation and read the proposed supplemental Findings into the record, as reflected in the communication from the CD 13 Office dated May 4, 2021. After an opportunity for public comment, and presentation by the Applicant's representative, the Committee recommended to approve the inclusion of the Taix French Restaurant in the list of Historic-Cultural Monuments; and, adopt the Findings as amended. This matter is now submitted to the Council for consideration.

Respectfully Submitted,

PLANNING AND LAND USE MANAGEMENT COMMITTEE

Taix is a special gathering place for the community. I cannot count the number of birthday parties, anniversaries, and special events I've attended there, and the number of good memories I've made there.

We are letting developers ravage this city and destroy everything that makes it special.

Do not let developers destroy Taix, and replace it with luxury apartments unaffordable to the community they are purporting to serve. Preserve it for the community and for future generations to enjoy.

Comments for Public Posting:	Please accept the landmark nomination for Taix Restaurant in full and do NOT alter it so that developers can ruin the integrity of both the building, the restaurant and the area at large. Taix is a piece of Los Angeles history and preserving it for future generations as it is now is incredibly important, particularly as we are nearing the end of this pandemic with restaurants, bars and other hospitality businesses opening up again.

Dear PLUM Committee and Councilman O'Farrell,

As Los Angeles historians and tour guides, who for the past 15 years have guided tens of thousands of Angelenos and visitors on excursions through historic neighborhoods and legacy businesses, we urge you to accept the landmark designation for Taix French Restaurant without restrictions.

Although the present owner of the business claims to be unable to make a profit from his home in Utah, there are many entrepreneurs who believe that Taix has enormous potential--as a thriving restaurant, bar, and event venue, with plenty of room to develop the property without demolishing the beloved and historic building.

Landmarking Taix does not prevent the business from growing and evolving. It simply recognizes that after 94 years of good will and good service, a business becomes something more than brick and plaster. There is room to build up while preserving Taix as a building and as a business--it just requires more imagination than it would to knock Taix down and start from scratch.

The community is counting on you to share our faith in Taix and in the creativity of the architect, developer and business owner. Landmark Taix without restrictions.

sincerely yours,
Kim Cooper & Richard Schave

To: Mitch O'Farrell and members of LA's PLUM Committee/VIA EMAIL

Re: Taix French Restaurant historic designation

As a customer of Taix French Restaurant for the past 40 years and an Echo Park resident, I urge the committee to follow the lead of the Cultural Heritage Commission and assign historic status to Taix French Restaurant, a beloved and important Echo Park cultural institution and landmark.

The building should be recognized and preserved as it is among the last of its kind in Los Angeles and has welcomed Angelenos from all walks of life for the past 70 years in this location and another 20+ years in its original location. It was an important local legacy business prior to the pandemic shutdown. Both of my children (now ages 31 and 27) had their first restaurant experience at Taix: I took them there for lunch in their car seats when they were only weeks old. We sat in a comfy booth and were welcomed by my favorite waiter, Bernard. Priceless memories. Years later when they became adults, my sons have also become dedicated Taix customers—I'm sure many others share these generational experiences.

The neon sign out front is a local landmark and should be recognized and designated historic along with the clinker brick front facade.

Let's not bulldoze all of LA's historic commercial architecture and low-rise streetscapes. Developers and their architects should be encouraged to save culturally important sites rather than incentivized to demolish them.

Thank you.

Hello Mr. Netburn,

RE: CPC-2020-3140-CU-DB-MCUP-SPR, the project at Taix Restaurant on 1911 W. Sunset Blvd., I see that you are the Project Officer.

Could you please send me a link to the Zoom meeting for March 16, at 11:00 a.m.?

I had taken a photo of the link, but the image didn't capture the full address.

Someone has pulled the Public Notice from the wall yesterday.

Thank you,
Mark McRae

To: Oliver Netburn <oliver.netburn@lacity.org>

Oliver,
Thank you for sending me the link. I have it in my schedule.

My main concern about the project is the lack of parking spaces for residents of the development. With 160 units, and probably two cars per unit, the request for half a space per unit is unacceptable. The neighborhood cannot absorb 100 additional cars onto the public streets.

I also do not think they should be allowed their requested height and density requests.

Thank you for your time.

Mark McRae <mcraemark@gmail.com> Wed, Mar 16, 2022 at 1:24 PM
To: Oliver Netburn <oliver.netburn@lacity.org>

Thank you for the hearing today. I am not sure why I was unable to unmute myself, but we tried.

As mentioned before my primary objection is the scarce number of parking spaces for residences. In an expensive development like this it would be likely that residents would have two cars each, so there would be a hundred cars spilling onto the already congested neighborhood.

My physical address is: Mark McRae 1414 N Coronado Street Los Angeles, CA 90026 213-422-7126

Oliver, one other thing please, Ryan Kelly spoke at the end of the hearing today. Might he be in the traffic department where I could send a concern about the timing of traffic signals at Sunset Blvd and Mohawk Street (in 90026). If so, could you send me his contact information.

Thank you,
Mark McRae

Cc: cetrone@silverlakeheritage.org

Mr. Netburn.

I appreciate you allowing me to read my entire letter at today's hearing.

For the administrative record, I have included a copy of my statement in written form below.

Also because it appears you were not provided all of the material documents relative to this case, for your review and for the administrative record,
I have attached the following:

• The applicants Historical Survey
• Report from Cultural Heritage Commission
• Link to 12/17/2020 audio of CHC hearing
• 2012 article when LA City Council approved a Motion to rename the intersection "Taix Square"
• Link to Change.org receiving 4,892 supporters
• SurveyLA ID: 926892e8-a6e9-4af9-8df8-d0a65b7010f7 (identifying TAIX as a "HISTORIC RESOURCE")
• LASC case#: 21STCP02612. Silverlake Heritage Trust et al., v City of Los Angeles and Holland Partner Group, LLC.

It is not legal to approve demolition of a historic resource. The DCP is **legally required** to treat any such resource as significant **unless the preponderance of evidence demonstrates that it is not historically or culturally significant." CCR 15064.5(3)**

The evidence that exists in the record demonstrates, on multiple accounts, historic significance.

Some corrections to the facts need to be made, as the applicants have misled the hearing officer:

First: The applicants have neglected to inform the Hearing officer that they have been sued over this case. As has the city. This case is in litigation.

Second: Applicants say they've worked with "community stakeholders" but does not say who these stakeholders are. "community stakeholders" have repeatedly opposed this project. One example is seen in the Change.org Petition which collected 4,892 supporters to designate the resource the historic cultural monument that it is. The cities Cultural Heritage Commission DID conclude the TAIX building is a historic resource.
The significant character-defining features are identified in previous reports concluded the Taix building does meet California Register eligibility requirements. This disqualifies applicants from pursuing a SCPE.
The applicants own historic survey from 2019 prepared by Kathryn McGee page 9 states: it is presumed to be historically or culturally significant. Therefore, the Taix Restaurant appears to qualify as an historical resource under CEQA.

Third: Applicants have omitted some key discussions that took place at the CHC hearing. One example is seen at 01:16:40 where CHC Commissioner Kennard states: "The argument that we only designate the site doesn't make sense to me. We have to either designate or not…. I'm not really persuaded by the business argument, um I think that the building itself meets the criteria, it's obviously a legacy building, so the business part of it is out of our expertise. You know if this owner can't make a go of it, potentially there's other owners that can come in and make a go of it… I think it's really not our decision. I think we need to look at the criteria does it
DCP Shannon @ 01:23:08:
"we need to go back to the criteria and whether this property meets the criteria for designation or not"
01:23:40 - "Future plans, it's sort of outside the purview of the Commission"

City's cultural heritage ordinance section 22.171.7.describes the criteria, one of which must be met in order to be designation.
"Legacy business" is not one of them. There is no process or program for a "legacy business" to be designated as a historic cultural monument.

Fourth: ECHO PARK NC does NOT support. LA Conservancy does NOT support this project

Fifth: This proposal does not qualify as a SCPE, as the project demolishes what has repeatedly determined as a historical resource.
In 2020 the LA City Council approved a motion to honor Taix French Restaurant by naming the intersection in front of the Echo Park restaurant “Taix Square”.

Sixth: There are multiple ways to incorporate a new approach to utilizing TAIX while still acknowledging its historical significance. The applicants have refused to do so in this regard, which tells the public they have no interest.

I would also like to add the number of vacancies that remain in the area. Housing is not an issue this community is in dire need of. The applicants have presented no evidence showing market rate housing is needed within this community, or even an alleged "14" "affordable" units.

We reserve the right to add objections and additional evidence into the Administrative Record in this case, and in Council File 20-0297.

Thank you again for allowing all speakers on the line today to exercise their rights to public comment.

I. INTRODUCTION AND EXECUTIVE SUMMARY

This historic resource assessment evaluates two parcels that include one commercial building, located at 1911 W. Sunset Boulevard (Assessor Parcel Number 5404-001-034), and a surface parking lot, located at 1929 W Sunset Boulevard (Assessor Parcel Number 5404-001-007). The properties are collectively referred to in this report as "subject property" or "Taix Restaurant." Located in the Silver Lake-Echo Park-Elysian Park Community Plan Area (CPA), the subject property has been owned and occupied by Taix Restaurant since 1962 and functions as an approximately 18,000 sq. ft. French restaurant and banqueting facility.

The Taix Restaurant was identified in Survey LA, the City of Los Angeles' recently completed citywide historic resource survey, as potentially "individually eligible for local listing or designation through survey evaluation" as a "long-standing commercial presence in a community." The SurveyLA record states:

> Taix French Restaurant has been located here since 1962. Established in 1927, the restaurant was originally located downtown in the Champ D'Or Hotel, which itself was founded in 1912 by the Taix family. However, it appears to meet local criteria only and may not meet significance thresholds for National Register or California Register eligibility.

This report confirms the prior finding of eligibility, concluding that the subject property is significant as a "legacy business" for association with its long-time owner-operator, Taix Restaurant. As discussed in detail in this document, Taix Restaurant is a French restaurant that was established in 1927 in downtown Los Angeles and moved to the subject property in 1962. Initially rebranded as Les Freres Taix, the restaurant dramatically changed the exterior and interior appearance of the building at the subject property through two phases of alterations: upon moving to the property in 1962 and again in 1968-1969 with a major remodel and expansion to the west. The restaurant generally appears now as it did in 1969, though changes were made to the interior with several remodeling projects implemented in the late 1980s through the 2000s.

The Taix family has concluded that continued operation of the restaurant in its current size and format is no longer economically viable. Due to changes in the restaurant and banqueting industry, the Taix restaurant and banquet business has significantly declined, and the banqueting and restaurant space is underutilized and cannot support staff and overhead (utility, capital, and maintenance costs). The kitchen is oversized and outdated, as are the restaurant's plumbing, electrical and utility systems. Accordingly, the Taix family has decided to sell the property to a new owner. The new owner is planning a mixed-use multi-family development. In connection with the sale of the property, the Taix family and the new owner are collaborating on a plan that would enable the continuation of the restaurant in its current location in a financially viable format and size, and with upgraded code-compliant restaurant infrastructure.

Preservation of legacy businesses, the long-time businesses that have become cultural touchstones in their respective communities, is an important and emerging area of study in the field of historic preservation. The National Trust for Historic Preservation recognizes that efforts to preserve legacy businesses represent a desire to preserve "intangible elements of culture and community that these businesses have created over time."[1] However, maintaining such resources in an economically viable format presents unique historic preservation challenges, especially when

[1] "Seven Tips for Protecting Legacy Businesses," National Trust for Historic Preservation, November 17, 2015, *https://savingplaces.org/stories/seven-tips-for-protecting-legacy-businesses#.XSObm3JYZPY*, accessed July 17, 2019.

considering those properties that are not necessarily significant for their architecture or physical design. This report includes a section on the preservation of legacy businesses and describes how other cities, such as San Francisco and Seattle, have recently begun pioneering efforts aimed at helping such businesses continue to operate and thrive.

The purpose of this report is to provide a thorough assessment of the subject property, with a history of construction, alterations, owners, and occupants. The subject property is evaluated against relevant historic contexts, especially the history of the Silver Lake-Echo Park-Elysian Park CPA and contexts for commercial identity in Los Angeles and the restaurant property type. This report confirms the SurveyLA finding that the Taix Restaurant appears significant as a legacy business and important local restaurant and cultural institution, with a period of significance beginning in 1962 and ending in 1980. This report also identifies the significant character-defining features of the Taix Restaurant from its period of significance, with the goal of informing a future development project at the subject property that retains significant character-defining features to the maximum extent feasible.

II. CONSULTANT QUALIFICATIONS

This report was prepared by Kathryn McGee with editorial assistance from Jenna Snow. Ms. McGee visited and photographed the subject property on November 26, 2018 and January 23, 2019.

Kathryn McGee
Ms. McGee is an architectural historian and historic preservation planner based in Los Angeles. With over eleven years of experience, she meets the Secretary of the Interior's Professional Qualification Standards in Architectural History. Ms. McGee launched an independent practice in 2015. She previously worked as a Senior Associate at historic preservation consulting firm, Chattel, Inc. Her educational background includes a Bachelor of Arts degree in architectural history from the University of California, Santa Barbara and a Master of Urban and Regional Planning degree from the University of California, Irvine. She has also completed the Summer Program in Historic Preservation at the University of Southern California and is a LEED Accredited Professional with specialty in Neighborhood Development. Her consulting work entails writing reports for purposes of environmental and local project review; preparation of historic resource assessments and surveys; preparation of technical reports for General Plan Updates; evaluation of properties seeking or complying with Mills Act Contracts; and consultation on adaptive reuse and federal Investment Tax Credit projects.

Jenna Snow
In January 2015, Jenna Snow launched an independent historic preservation consulting practice office in Los Angeles. With over fifteen years of professional experience, Ms. Snow has a strong and broad understanding of best historic preservation practice, including federal, state, and local regulations. She has worked on a wide range of projects on both the east and west coasts, as well as internationally. Ms. Snow holds a M.S. in Historic Preservation from Columbia University and a B.A. in Fine Arts focusing on architectural history from Brandeis University. She meets the Secretary of the Interior's Professional Qualifications Standards in Architectural History. Throughout her career, Ms. Snow has authored, co-authored, and/or served as project manager for nearly 100 historic preservation projects, including a wide variety of historic resource assessments, National Register nominations, and historic resources surveys. She regularly contributes to environmental impact reports, historic preservation certification applications, Section 106 reviews and other work associated with historic building rehabilitation and preservation planning. Ms. Snow has prepared multiple National Register nominations, including the Twohy Building in San José, CA; the Beverly Hills Women's Club in Beverly Hills, CA; the Sam and Alfreda Maloof Compound in Rancho Cucamonga, CA; the Boyle Hotel/Cummings Block in Los Angeles, CA; the West Los Angeles Veterans Affairs Historic District in Los Angeles, CA, and Temple Ohave Israel in Brownsville, PA. She has completed historic resources surveys, including coauthoring historic context statements in Hollywood, Whittier, CA, and South Los Angeles. Prior to her consulting work, Ms. Snow worked for the New York City Department of Design and Construction in New York, NY, the Freedom Trail Foundation in Boston, MA, and the Neighborhood Preservation Center in New York, NY.

III. METHODOLOGY

Project methodology involved research in a variety of databases and repositories, as described below.

SurveyLA: The City of Los Angeles recently completed a citywide historic resource survey; the Taix Restaurant was identified as an historical resource in the survey. The historic context statement prepared for the survey is referenced in this report.

Historic Property Data File: The California State Office of Historic Preservation (OHP) keeps statewide records on historic properties. Records for Los Angeles are indexed in the Los Angeles County Historic Property Data File (HPDF). There are no entries for the subject property, indicating it has not been previously identified, outside of SurveyLA.

Sanborn Maps: An historic Sanborn fire insurance map report for the subject property was ordered from Environmental Data Resources, Inc. Sanborn map coverage includes maps from 1906-1970 and is included in Attachment B.

Building Permits: Historic building permits are available online through the City of Los Angeles Department of Building and Safety website. All permits were reviewed, and relevant data is referenced in this report. A table of available permit data is attached in Appendix A.

Online Databases: Online databases were searched, including United States Federal Census, voter and death, and city directory records available on *Ancestry.com,* and *Los Angeles Times* and other newspaper articles available on *Newspapers.com*. Relevant information is referenced in this report.

Aerial Photographs: Historic aerial photographs were obtained through an online database of the University of California, Santa Barbara and in-person archival research at University of California, Los Angeles Air Photo Archive. Relevant photographs are included in Attachment B.

Books: The Taix Restaurant is mentioned in two books on the history of Los Angeles restaurants, George Geary's, *L.A.'s Legendary Restaurants,* published in 2016, and Josh Kun's *To Live and Dine in L.A.: Menus and the Making of a Modern City,* from the collection of the Los Angeles Public Library, published in 2015.

Historic Plans: The current owner provided copies of historic plans documenting alterations in the 1960s and 1990s, as well as invoices for work and other related documents, and several historic photographs. Relevant data is referenced in this report.

Owner Interview: An interview was conducted with current owner Michael Taix on January 23, 2019. The purpose of the interview was to understand the history of the restaurant and changes to the property over time. Relevant data is referenced in this report.

IV. REGULATORY SETTING

National Register

The National Register of Historic Places is "an authoritative guide to be used by federal, state, and local governments, private groups, and citizens to identify the nation's cultural resources and indicate what properties should be considered for protection from destruction or impairment,"[2] Administered by the National Park Service, the National Register is the nation's official list of historic and cultural resources worthy of preservation. Properties listed in the National Register include districts, sites, buildings, structures, and objects that are significant in American history, architecture, archaeology, engineering, and culture. Resources are eligible for the National Register if they meet one or more of the following criteria for significance:

A) are associated with events that have made a significant contribution to the broad patterns of our history; or
B) are associated with the lives of significant persons in our past; or
C) embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
D) have yielded or may be likely to yield, information important in history or prehistory.[3]

Once a resource has been determined to satisfy one of the above criteria, then it must be assessed for "integrity."[4] Integrity refers to the ability of a property to convey its significance. Evaluation of integrity is based on "an understanding of a property's physical features and how they relate to its significance." The National Register recognizes seven aspects or qualities of integrity: location, design, setting, materials, workmanship, feeling, and association. To retain integrity, a property must possess several, and usually most, of these aspects.

Relationship to this report: The Taix Restaurant is not listed in the National Register. For the reasons stated in this report, the subject property may meet National Register eligibility requirements, though it does not appear to retain sufficient integrity for listing in the National Register.

California Register

Based substantially on the National Register, the California Register is "an authoritative guide… used by state and local agencies, private groups, and citizens to identify the state's historical resources and to indicate what properties are to be protected."[5] For a property to be eligible for listing in the California Register, it must be found by the State Historical Resources Commission to be significant under at least one of the following four criteria:

1) is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage; or

[3] *National Register Bulletin #15, How to Apply the National Register Criteria for Evaluation*, National Park Service, 1990, revised 2002.

[4] *National Register Bulletin #15.*

[5] California Public Resources Code §5024.1(a), *http://codes.lp.findlaw.com/cacode/PRC/1/d5/1/2/s5024.1.*

2) is associated with the lives of persons important in our past; or
3) embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual or possesses high artistic values; or
4) has yielded, or may be likely to yield, information important in prehistory or history.

Also included in the California Register are properties which have been formally determined eligible for listing in or are listed in the National Register; are registered State Historical Landmark Number 770, and all consecutively numbered landmarks above Number 770; and Points of Historical Interest, which have been reviewed and recommended to the State Historical Resources Commission for listing.

Relationship to this report: The subject property is not listed in the California Register. As noted earlier, Survey LA found that the Taix Restaurant "appears to meet local criteria only and may not meet significance thresholds for National Register or California Register eligibility." For the reasons stated in this report, the Taix Restaurant may meet California Register eligibility requirements. Significant character-defining features are identified in this report.

California Environmental Quality Act (CEQA)

The California Environmental Quality Act (CEQA) was enacted in 1970 and offers protection for identified historical resources. In general, for purposes of CEQA and environmental review, an "historical resource" is that which has been determined eligible for listing in the California Register, or one that is designated at the local level. The term "historical resource" includes the following:

1. A resource listed in, or determined to be eligible by the State Historical Resources Commission for listing in the California Register of Historical Resources (Pub Res Code SS5024.1, Title 14 CCR, Section 4850 et seq).
2. A resource included in a local register of historical resources, as defined in Section 5020.1(k) of the Public Resources Code or identified as significant in an historical resource survey meeting the requirements Section 5024.1(g) of the Public Resources Code, shall be presumed to be historically or culturally significant. Public agencies must treat any such resource as significant unless the preponderance of evidence demonstrates that it is not historically or culturally significant.
3. Any object, building, structure, site, area, place, record, or manuscript which a lead agency determines to be historically significant or significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California may be considered to an historical resource, provided the lead agency's determination is supported by substantial evidence in light of the whole record.

Generally, a resource shall be considered by the lead agency to be "historically significant" if the resource meets the criteria for listing on the California Register (Pub Res Code SS5024.1, Title 14 CCR, Section 4852).

The fact that a resource is not listed in, or determined to be eligible for listing in the California Register of Historical Resources, not included in a local register of historical resources (pursuant to 5020.1 (k) of the Public Resources Code), or identified in an historical survey (meeting the criteria in Section 5024.1(g) of the Public Resources Code) does not

> preclude a lead agency from determining that the resource may be an historical resource as defined in Public Resources Code Sections 5020.1 (j) or 5024.1.

Relationship to this report: Because the Taix Restaurant was identified in SurveyLA, a local historic resource survey meeting the requirements Section 5024.1(g) of the Public Resources Code (SurveyLA), and for the reasons stated in this report, it is presumed to be historically or culturally significant. Therefore, the Taix Restaurant appears to qualify as an historical resource under CEQA.

City of Los Angeles

§22.171.7 of the Los Angeles Administrative Code defines criteria for designation of a Historic-Cultural Monument (HCM). For ease in applying local eligibility, the following numbers are assigned to the criteria, which align, to a large degree, with National and California Register criteria. Resources eligible for HCM designation are:

1) Historic structures or sites in which the broad cultural, economic or social history of the nation, state or community is reflected and exemplified; identified with important events in the main currents of national, state, or local history; or
2) Historic structures or sites identified with personages in the main currents of national, state or local history; or
3) Historic structures or sites which embody the distinguishing characteristics of an architectural type specimen, inherently valuable for a study of a period style or method of construction or a notable work of a master builder, designer, or architect whose individual genius influenced his age.

An HPOZ is defined as:

> a planning tool which recognizes the special qualities of areas of historic, cultural, or architectural significance. An HPOZ does not change the underlying zoning, rather it lays an added level of protection over a zone through local board oversight.[6]

The HPOZ criteria for evaluation state that structures, natural features, or sites within the involved area, or the area as a whole, shall meet one or more of the following:

A. Adds to the historic architectural qualities or historic associations for which a property is significant because it was present during the period of significance, and possess historic integrity reflecting its character at that time.
B. Owing to its unique location or singular physical characteristics, represents an established feature of the neighborhood, community, or City.
C. Retaining the structure would help preserve and protect an historic place or area of historic interest in the City.[7]

Relationship to this report: The Taix Restaurant was identified as eligible for listing as an HCM in SurveyLA, the City's recently completed historic resource survey. This report confirms the Taix Restaurant appears to meet eligibility criteria for listing as an HCM, though the subject

[6] *Cultural Heritage Masterplan*, City of Los Angeles Cultural Affairs Department, adopted 2000: 44, *www.preservation.lacity.org.*

[7] *Cultural Heritage Masterplan*, City of Los Angeles Cultural Affairs Department, 45.

property does not appear to be a contributor to any HPOZ. Significant character-defining features are identified in this report.

V. PRESERVATION OF LEGACY BUSINESSES

The preservation of legacy businesses, also known as heritage businesses and/or cultural heritage assets, is an emerging area of study for preservation professionals in the United States. Current economic conditions and other factors have caused "alarming loss of heritage businesses, nonprofits, and other arts and culture institutions."[8] The National Trust for Historic Preservation recognizes that efforts to preserve legacy businesses present unique issues and represent a desire to preserve "intangible elements of culture and community that these businesses have created over time."[9]

The City of Los Angeles recognizes the importance of legacy businesses in SurveyLA, the recently completed citywide historic resource survey. The SurveyLA historic context statement for "Commercial Identity," which is included in this report, asserts the importance of such resources. The historic context statement also identifies properties that have already been designated as City of Los Angeles Historic-Cultural Monuments for related associations, as well as those that appear eligible under the same context.

While legacy businesses are important to the cultural identity of the communities in which they are located, maintaining a legacy restaurant business over time poses unique challenges. Businesses may move locations. Owners must respond to a changing marketplace, changing business models and many other related considerations, such as high rents and gentrification, and the passing down of a business to future generations. The City of Los Angeles does not currently have a program to incentivize preservation of legacy businesses. While the City has a Mills Act Historical Property Contract program, which may provide some relief from property taxes in exchange for maintaining an historic building, there are no financial incentives available for maintaining a business. Other cities, such as San Francisco and Seattle, have recently pioneered efforts in the arena of legacy business preservation.

San Francisco Heritage, the city's leading historic preservation membership organization, prepared a report in 2014 (hereinafter referred to as "San Francisco Heritage Report") describing the issues of preserving the, often intangible, qualities of legacy businesses:

> Traditionally focused on architecture and monuments, the field of historic preservation in the United States has in recent years begun to respond to calls from organized communities to develop new tools for identifying and protecting intangible social and cultural resources.[10]

The San Francisco Heritage Report also identifies the problem with many current historic preservation programs and their approach to retaining resources that are not always significant for architecture or design:

> Despite their effectiveness in conserving architectural resources, traditional historic preservation protections are often ill-suited to address the challenges facing cultural heritage assets.[11]

---

[8] San Francisco Heritage, *Sustaining San Francisco's Living History: Strategies for Conserving Cultural Heritage Assets,* September 2014: 4.

[9] "Seven Tips for Protecting Legacy Businesses," National Trust for Historic Preservation, November 17, 2015, *https://savingplaces.org/stories/seven-tips-for-protecting-legacy-businesses#.XSObm3JYZPY*, accessed July 17, 2019.

[10] San Francisco Heritage, 7.

[11] Ibid., 4.

The San Francisco Heritage Report includes a section focusing on preservation of legacy bars and restaurants, including those representing the city's non-architectural heritage.[12] San Francisco Heritage's *Legacy Bars and Restaurants* initiative has a process of "certifying" businesses that "must have achieved longevity of 40 years or more, possess distinctive architecture or interior design, and/or contribute to a sense of history in the surrounding neighborhood."[13] While bars and restaurants with notable architecture may be included in the program, having notable architecture is not a requirement for program inclusion.

In 2015, the City of San Francisco Board of Supervisors approved creation of the San Francisco Legacy Business Registry. The registry website states the following intention:

> The Legacy Business Registry works to save longstanding, community-serving businesses that so often serve as valuable cultural assets. The City intends that the Registry be a tool for providing educational and promotional assistance to Legacy Businesses to encourage their continued viability and success.[14]

The City defines a legacy business based on several factors, which do not necessarily require significant architecture for program inclusion:

> A "Legacy Business" is defined as a business that has been nominated by a member of the Board of Supervisors or the Mayor and that the Small Business Commission has determined meets the following criteria:
>
> - The business has operated in San Francisco for 30 or more years, with no break in San Francisco operations exceeding two years. The business may have operated in more than one location. If the business has operated in San Francisco for more than 20 years but less than 30 years it may still satisfy this subsection (b)(1) if the Small Business Commission finds that the business has significantly contributed to the history or identity of a particular neighborhood or community and, if not included in the Registry, the business would face a significant risk of displacement.
>
> - The business has contributed to the neighborhood's history and/or the identity of a particular neighborhood or community. Prior to the hearing, the Small Business Commission, or the Executive Director of the Office of Small Business on its behalf, shall request an advisory recommendation from the Historic Preservation Commission as to whether the business meets the requirement in this subsection (b)(2). If the Historic Preservation Commission does not provide an advisory recommendation within 30 days of receipt of the request, the Small Business Commission shall treat such nonresponse as an advisory recommendation that the business meets the requirement in this subsection (b)(2).
>
> - The business is committed to maintaining the physical features or traditions that define the business, including craft, culinary, or art forms.[15]

The City of Seattle is another major jurisdiction that has recently focused on the issue of preserving legacy businesses. In 2017, Seattle conducted a study of the issues and published a

[13] Ibid., 12

[14] City of San Francisco Legacy Business Registry, San Francisco Planning Department, *https://sfplanning.org/project/legacy-business-registry*, accessed July 15, 2019.

[15] Ibid.

report (hereinafter referred to as "Seattle Study").[16] In addition to the issues of aging infrastructure and need for capital investment, the Seattle Study focused on the changing business models in the food service industry, which have similarly affected the Taix Restaurant, noting the following:

> Legacy businesses in the food services industry also face increased competition from fast-casual chains and large groceries. This competition may require legacy businesses to shift to new business models. Businesses that provide community value (such as a local gathering place) may find it easier to compete with lower-cost online, chain, or big-box options.[17]

The Seattle Study also describes that there are generational factors that affect legacy businesses:

> Older businesses close for different reasons than younger businesses, sometimes because they have already successfully navigated many of the challenges which fell their younger counterparts. Compared with younger businesses, older businesses are more likely to close due to an owner/operator's sale of the business, retirement, illness, or death. Nationally, over 58% of businesses more than ten years old close for these reasons.[18]

One of the primary considerations for preservation of legacy businesses is how associated properties should be evaluated when considered for inclusion in historic registers. The San Francisco Heritage report suggests that the manner in which preservation professionals consider the "integrity requirement" needs to be broadened. Historic register listings generally require retention of original physical fabric in order for a property to retain sufficient integrity for listing. However, properties significant for non-architectural associations, such as association with certain legacy businesses, may no longer have physical features from an early period that are intact. Strict interpretation of the integrity requirement might not allow certain properties to be included in local registers even if they have important intangible cultural associations. The San Francisco Heritage Report describes how this can limit the breadth of property types found eligible for inclusion in historic registers:

> Rather than treating the loss of the physical fabric as a justification for intervention, the integrity standard can lead to the opposite result by disqualifying properties from eligibility for landmark protection. The impact of these shortcomings is acute: fewer than 8 percent of the 87,000 property listings in the National Register of Historic places are associated with the histories of communities of color, women, and LGBTQ communities.[19]

In the California Office of Historic Preservation's *Preservation Matters* newsletter in 2012, Milford Wayne Donaldson, a preservation architect and the current Chairman of the Advisory Council on Historic Preservation, writes about the issue of integrity and argues for broadening of property types considered for inclusion in the National Register. He writes:

> Bringing a more dynamic understanding of change over time into the National Register criteria is closely linked to the analysis of the seven aspects of integrity—location,

---

[16] City of Seattle, *Legacy Business Study*, September 2017, *http://www.seattle.gov/Documents/Departments/economicDevelopment/22820_Legacy_Report_2017-09-25.pdf*, accessed July 15, 2019.

[18] Ibid., *Legacy Business Study,* 14.

[19] San Francisco Heritage, *Sustaining San Francisco's Living History*, 8.

> design, setting, materials, workmanship, feeling, association. Although basic standards are necessary, a strict interpretation of architectural integrity can exclude properties that still possess considerable historical significance. Design and workmanship tend to be weighted most heavily when evaluating integrity. Instead, association, setting, and feeling should be more strongly considered when evaluating integrity to incorporate a large variety of resources.[20]

SurveyLA recognizes there may be a need for lower integrity thresholds for properties identified as significant under the Commercial Identity Historic Context Statement, the context under which the Taix Restaurant was identified. The Context Statement provides the following:

> Some alterations may be acceptable if they were made during the period of significance for a business and if significance is not also based on architectural quality.[21]

This inclusive approach may allow legacy businesses to meet eligibility criteria for listing as a City of Los Angeles Historic-Cultural Monument even when the buildings have sustained some alterations.

Relationship to this report: Taix Restaurant was originally located in downtown Los Angeles beginning in 1927, moved to its current location at the subject property in 1962, and remains in operation. It is considered a significant legacy business. Despite the change of scenery from the original to the current location, the restaurant has been praised for the continuity of its legacy. The *Los Angeles Times* reported in 1963 on the newly opened restaurant at the subject property as a 35-year-old "eating landmark."[22] Another article from the same year, titled, "Original Bargain Duplicated," described with great enthusiasm how the menu options remained unchanged, despite dramatic differences between the appearances of the original and new buildings.[23]

The Taix Family has concluded that continued operation of their restaurant in its current size and format (including underutilized banquet rooms and outdated kitchen, plumbing, electrical systems and supporting facilities) is no longer economically viable. In connection with the sale of their property, the Taix family and the new owner are collaborating on a plan that would enable the continuation of the restaurant in its current location in a financially viable format, size and with upgraded code-compliant restaurant infrastructure.

The City of Los Angeles does not have a program to financially incentivize the retention of legacy businesses. However, the manner in which SurveyLA addresses integrity thresholds for properties identified as significant under the Commercial Identity Historic Context Statement suggests eligibility of Taix Restaurant as an historical resource may be maintained even in the event the resource has had some degree of alteration. This may provide flexibility with regard to how alterations to the resource are considered in the context of a future development project.

VI. PROPERTY DESCRIPTION AND HISTORY

Physical Description

Site
(Attachment A, Current Maps and Aerials; Attachment C, Current Photographs.)

Fig 1: Current aerial, subject property outlined in red (Google Earth aerial)

The subject property consists of two parcels, with one restaurant building at 1911 W. Sunset Boulevard, and a surface parking lot at 1929 W Sunset Boulevard, in the Silver Lake-Echo Park-Elysian Park Community Plan Area (CPA). The complete range of addresses included is 1911-1929 W. Sunset Boulevard and 1910-2018 W. Reservoir Street. Bounded by W. Reservoir Street to the northeast, N. Alvarado Street to the northwest, and W. Sunset Boulevard to the south, the subject property is oriented southeast, but for purposes of this report is described as oriented south (Fig 1). The site slopes upward to the north. Surrounding development consists of a mix of uses, with buildings constructed in different decades. The adjacent property immediately to the east includes a restaurant, home to Baby Blues BBQ, 1901 W. Sunset Boulevard, constructed in 1950. To the west is a one-story office building, 1931 W. Sunset Boulevard, constructed in 1959, and the one-and-a-half-story Edendale Branch Library, 2011 W. Sunset Boulevard, constructed in 2004. Across Sunset Boulevard is Citibank office tower, 1900 W. Sunset Boulevard, constructed in 1964, and the one-story Brite Spot Café, 1918 W. Sunset Boulevard constructed in 1965.

Exterior

Figs 2 and 3: Subject property, current views northeast and north, respectively, from Sunset Boulevard

The restaurant building at the subject property is oriented south toward Sunset Boulevard, is generally one-story, has an irregular plan corresponding to the shape of the site, and features multiple rooflines, with roofs clad in a combination of contemporary material and slate tile (Figs 2 and 3). Decorative features, implemented with elements of French Revival style, are focused at the south façade, which has three bays corresponding to phases of construction and is asymmetrical in composition. Exterior walls are of textured stucco, with applied half-timbering serving a decorative function at the south façade and west elevation, while a brick wall incorporating a planter runs the length of the elevation.

At the south façade, the center bay has a false front gable flanked by slender, rectangular towers with flared metal roofs finishing in finials. The eave of the front gable is supported by simple wood brackets; a multi-light stained glass casement window with fixed wood shutters is positioned below the gable peak. The recessed entrance door is offset from the center, has a wood enframement, and consists of decorative wood double doors, with a decorative lava rock wall to the west. The west bay has a hipped roof that incorporates pop up dormer vents, and a large rectangular tower at the southeast corner, which has a flared metal roof finishing in a finial. Decorative half-timbering adorns the wall. The east bay is simpler by comparison to the center and west bays, with a hipped roof and deep eave. The wall is set back slightly from the sidewalk edge. The eave is supported by two simple round posts set at angles, extending from under the southernmost part of the eave to the bottom of the wall. The aforementioned brick wall incorporating a planter sits lower in east bay than in the center and west bays. Tall shrubs obscure views of east bay fenestration, which consist of a trio of fixed pane windows with etched glass flanked by plastic shutters fixed in the open position. There is no half-timbering or other decorative trim in the east bay.

The west elevation fronts the surface parking lot and has three bays. Half-timbering decoration and low brick walls from the façade wrap center and south bays. A porte cochere in the center bay extends west and is wide enough to accommodate the width of two cars. The porte cochere features a hipped roof supported on a pair of rectangular brick columns on concrete bases at its west end. Aligned with the porte cochere is the main entrance to the building, which includes a deeply recessed entry area, with a pair of wood double doors leading into the interior foyer, as well as a single wood door set at an angle to the north, leading into the wine room. The recessed entry area has half-timbering detailing and a low brick wall along its the south wall, while the ceiling incorporates simple, rectangular recessed light fixtures, and the flooring is of slate tile. South of the main entrance, the south bay includes a brick chimney covered in foliage and curved at the base, and a secondary entrance door. The north bay is simpler in terms of detailing, void of ornamentation and with a flat roof.

The north elevation is utilitarian and unadorned. It includes a wall segment angled northwest as well as a larger wall segment aligned with the sidewalk edge. The wall portion angled northwest opens onto a fenced service yard where there are secondary entrance doors and a canopy extends across the small yard. The wall portion aligned with the sidewalk edge can generally be described a blank wall with several secondary entrance doors. It also features a two-story wall in its east end, with a recessed entrance at the first-floor level and contemporary windows at the second-floor level. The wall is generally of stucco, and includes painted brick toward its center, where there is a pair of windows covered in metal security bars.

The east elevation is not visible as it directly abuts the adjacent property.

Signage includes: a small wall-mounted sign at the south façade reading "TAIX," located east of the entrance; a projecting neon blade sign at the south façade reading "COCKTAILS," extending

from the tower immediately west of the front gable; a larger, internally illuminated projecting blade sign reading "TAIX French," with metal coil detailing above and below, extending from the south elevation of the tower at the southeast corner of the building; and a sign mounted to the south elevation of the porte cochere roof with two lines of text reading, "TAIX" in neon at the top with smaller, internally illuminated sign reading, "Reserve now for the holidays!" at the bottom. There is also a closed panel roof sign supported on a superstructure, located in the northeast corner of the roof, reading "TAIX."

Interior

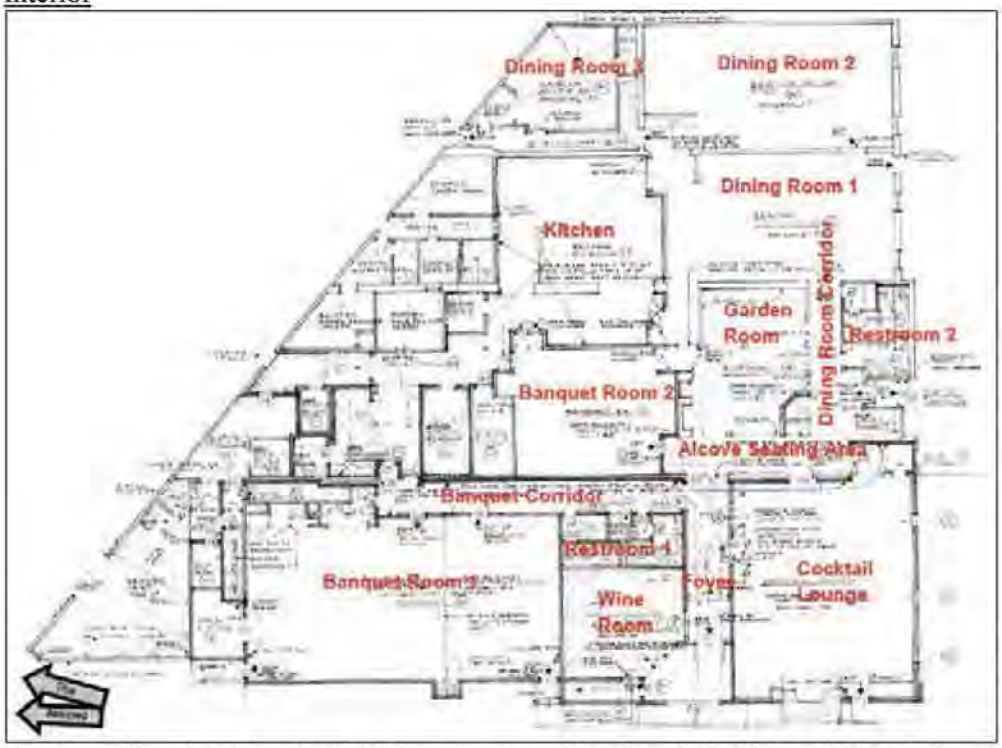

Fig 4: Ground floor plan with overlay identifying current nomenclature (base plan by Nielsen, Moffatt & Wolverton)

Interior spaces are organized around corridors (see Fig 4 above for corridor and room nomenclature). The main point of access is the west elevation entrance, which leads into the Foyer. The Foyer is oriented east-west, accessing the Wine Room to the north and Cocktail Lounge to the south, as well as passage to the Banquet Corridor, oriented north-south. The Banquet Corridor leads to Restroom 1 and Banquet Room 1, located in the west portion of the interior. The Foyer and Banquet Corridor converge at the centrally located Alcove Seating Area, which serves as a lobby. The Alcove Seating Area provides access to Banquet Room 2 along its north wall, the Garden Room along its east wall, and the Dining Room Corridor at its southeast corner. The Dining Room Corridor runs east-west, and accesses Restroom 2 along its south wall Dining Rooms 1-3 to the east, which occupy the east portion of the interior.

The Foyer has a raised landing inside the main entrance; three steps down lead into the space. The Foyer is framed overhead by a curved ceiling with painted finish. North and south walls feature brick bases with painted plaster walls with wood half-timbering decorative trim above. Wood molding supported on curved brackets runs the length of the walls creating a cove near the ceiling where linear florescent light fixtures are mounted. Wood trim and moldings throughout are stained dark with wavy edges. Doorways provide access into the Wine Room to the north Cocktail Lounge to the south. Foyer walls include stained-glass windows with nine divided lights,

located west of the doorway to the Wine Room and east of the doorway to the Cocktail Lounge. Doorways are bordered by wood moldings. Floors are of slate tile. Accent lighting consists of small lanterns mounted at door frames.

The Wine Room has is accessed from the north wall of the Foyer and from the building exterior along the west elevation. Situated level with the Foyer landing, the Wine Room is accessed by a short flight of steps with a low metal rail. The Wine Room is rectangular with clipped corners. The room is encircled by built-in shelving with contemporary wallpaper backing along west, north and east walls. Shelving is divided by fluted pilasters. Crown molding borders the room, while a coved ceiling with round medallion at the center serves as a visual anchor. Lighting consists of a contemporary chandelier hung from the medallion as well as contemporary recessed ceiling fixtures. Flooring is of slate tile.

Cocktail Lounge access is provided through doors off the Foyer and Alcove Seating Area. The entrance off the Foyer is defined by partial-height wood partitions incorporating multi-light stained glass. Rectangular in plan, the Cocktail Lounge centers on a bar stretching the length of the south wall, elaborated by a scalloped ceiling above. The ceiling's textured surface is painted white capped with wood. There is a second scalloped ceiling above the north wall seating area. The north and east walls have wood paneling. The west wall is of brick and includes a brick and flagstone fireplace, as well as a secondary exit door south of the fireplace. Built-in upholstered seating lines north and east walls, while freestanding tables and chairs provide additional seating at the center of the room. The bar consists of a wood frame and cherry wood bar top, though the front is upholstered with contemporary fabric. The bar back includes built-in shelving with cupboards lining the south wall. The floor is generally carpeted, though there is concrete flooring near the bar. The central area of the ceiling contains recessed light fixtures.

The Banquet Corridor provides access to Restroom 1 and Banquet Room 1 through doors in its west wall. The Corridor walls feature a contemporary brick base with smooth plaster walls above interspersed with vertically oriented contemporary wood trim, a simplified version of the more elaborate decorative half-timbering of the Foyer. Doorways are bordered in wood frames. Wood trim throughout is stained dark with wavy edges. Small, contemporary, projecting signs indicate entrances to rooms. Lighting consists of ceiling mounted fixtures. The floor is carpeted.

Restroom 1 consists of men's and women's restrooms. The women's restroom was accessed and includes two spaces: a powder room with contemporary vanity shelf and mirror, as well as a bathroom with two toilet stalls and two sinks. Finishes include contemporary wallpaper in the powder room, and pink tiles on the walls and floor in the bathroom.

Banquet Room 1 is accessed through two doors off the Banquet Corridor. The room is rectangular in plan, with a partition wall dividing the room in half, creating two banquet spaces. The south space is called the Alsace Room, while to the north is the Champagne Room. Each room is defined by a recessed ceiling where contemporary chandeliers are hung. Additional lighting is provided though recessed ceiling fixtures. Perimeter walls are bordered by a brick base, with painted plaster surface above, interspersed with regularly spaced stained wood trim.

Banquet Room 2 is about half the size of Banquet Room 1 and rectangular in plan. Walls are generally bordered by wood wainscot, with painted plaster surface above. Wall art includes an impressionistic painting on canvas. The artist was Biller; the painting was done in 1964.

The Alcove Seating Area is centrally located and rectangular in plan. Entrance doors from the south elevation lead into the space, where there is a reception desk of contemporary wood in the

southwest corner. There is a central partition/feature wall of brick with wood accents that divides the space and creates a seating nook oriented toward a large stone fireplace, positioned along the north wall. Wood trim throughout is stained dark and features wavy edges. The floor is carpeted.

The Garden Room is a small dining room. Access is provided through its west wall where the room is sectioned off by contemporary wood doors. Inside the room, the north, east, and west walls have a wood wainscot with painted plaster wall above, adorned with decorative half-timbering trim. Distinctive wood doorframes and wood features throughout are stained dark with wavy edges. Flat wall surfaces are adorned with a painted mural, where subject matter appears to be the French countryside. The artist was Sylvia Johnson; the painting was done in 1990.

The Dining Room Corridor, oriented east-west, is relatively simple and unadorned, with wood trim around doors, smooth painted finishes, and carpeted floor.

Restroom 2 consists of men's and women's restrooms. The women's restroom was accessed and includes one room with a sink and two toilet stalls. Finishes include contemporary wallpaper, and white and green tile on the walls and floor.

Dining Room 1 is rectangular in plan. Contemporary wood frames around doors feature fluting detail. East and west walls incorporate contemporary mirrored panels separated by simple, rectangular engaged columns. The ceiling is recessed and clad in contemporary metal panels. The floor is carpeted. U-shaped dining booths upholstered in contemporary fabric encircle the perimeter of the space, while a combination of U-shaped and rectangular booths, divided by a central, contemporary partition, are arranged in a column at the center. Lighting consists of ceiling mounted chandeliers and wall sconces. Fixtures and finishes are contemporary. South elevation windows appear to have been altered with addition of contemporary, etched glass.

Dining Room 2 is accessed through a doorway in the south end of its west wall. Similar to Dining Room 1, it is rectangular in plan with contemporary wood frames around the doors featuring fluting detail. Wall surfaces are clad in contemporary wallpaper. U-shaped dining booths upholstered in contemporary fabric encircle the perimeter of the space, while a combination of U-shaped and rectangular booths, divided by a central, contemporary partition, are arranged in a column at the center. Lighting consists of ceiling mounted chandeliers and wall sconces. Fixtures and finishes are contemporary. Steps up to a doorway in the north wall access Dining Room 3. South elevation windows have contemporary, etched glass.

Dining Room 3 is a small, private dining area, accessed by French doors in its south wall. It is irregularly shaped, accommodating space for two long dining tables. Fixtures and finishes are contemporary. A door in the west wall accesses a secondary hallway oriented north-south.

Kitchen and Back-of-House Spaces are located in the north and northeast portions of the interior and are generally utilitarian and unremarkable.

The Basement is accessed by two staircases and provides storage for wine and supplies. The stairs, walls, ceiling and floor are of concrete. The room is configured as one big open space with shelving inserted. It is generally utilitarian.

The Second Floor Office is accessed by a stair in the northeast portion of the building. The space is configured as one big open room with a bathroom. Fixtures and finishes are contemporary.

History

History of Construction and Alterations

(Attachment B, Historic Maps and Aerials; Attachment D, Historic Photographs; Attachment E: Historic Menus and Newspaper Images)

The following history of construction and alterations is based on information contained in available building permits, which are listed in Appendix A, available historic plans and historic aerials and photographs, visual inspection, and an interview with long-time and current property owner, Michael Taix.[24] In 1929, a permit was issued construct a new restaurant building at the subject property, oriented south toward Sunset Boulevard. The permit was issued to Ona W. Spaulding (biography below). The new building was planned as a Class "C" structure, 26'x66', one-story, and 15'-tall, with stone tile exterior walls, metal lath and plaster interior partitions, concrete floors, and a composition roof. The architect was Edgar E. Butler. No contractor was listed. Valuation of the permit was $3,500.00. The first tenant was Botwin's Café (tenant history below). The original building was relatively simple in plan with few decorative features (Figs 5-6). The building was remodeled in 1936, expanding it to the east and remodeling the south façade in the Streamline Moderne style (Fig 7). The new side addition was one-story, 24'x42', and of brick construction, intended for use as a cocktail lounge and toilet room. In later years, Botwin's expanded again, this time to the west (Fig 8), adding a new entrance corresponding to the "Sierra Room," remodeling the façade with brick and wood veneer, adding the existing low wall of clinker brick that runs along the south façade, and adding the existing lava rock flanking the new westerly entrance. The property was occupied by Botwin's Café until at least 1960,[25] when the tenant changed to Rafael's Restaurant, which only stayed about two years.[26]

Taix Restaurant, a French restaurant previously located in downtown Los Angeles, purchased and moved into the subject property in 1962, and has remained the owner-occupant since then (history of restaurant below). Taix Restaurant dramatically changed the exterior and interior appearance, removing the Streamline Moderne style façade, replacing it with a French Revival style façade, and reconfiguring and altering materials of the interior. Through two major phases of alteration, upon moving to the property in 1962, and again in 1968-1969 with a major remodel and expansion, Taix Restaurant removed the majority of prior historic material. Many changes were made to the interior with remodeling projects implemented in 1998 and in the 2000s. The following describes alterations implemented by Taix Restaurant.

Upon occupying the property in 1962, Taix Restaurant began alterations. While the restaurant maintained its orientation toward Sunset Boulevard, and there continued to be a small parking lot to the west, the façade was remodeled with the new design centered on a false front gable with stucco walls and applied wood half-timbering, which served as a decoration. Historic aerial photographs convey the dramatic nature of alterations (Fig 9), as the architecture took on a kitschy French Revival style in reference to the restaurant's French cuisine (Fig 10). There was no architect listed on building permits for remodeling work, though an engineer, George F. Sexton, and contractor, Harold Sampson, were listed (biographies below). Other work on the exterior included addition of an 8'x10' canopy extending from the west elevation (1962), addition of new signs (1963), addition of a 690-square-foot second story at the northeast corner of the restaurant (1963), and addition of a water tank on the roof near the northeast corner of the building (1966), though the tank was replaced in the 1980s.

The configuration of the interior in 1962 can be deduced from notes on later drawings (from the 1968 alterations), Sanborn maps, and building permits. In 1962, the interior was much smaller than it is currently, with the main entrance leading from Sunset Boulevard into a central lobby and bar area, which opened up directly into a central dining area, with a large fireplace along its north wall (extant), and a bar in the existing Garden Room. There were dining rooms to the east (corresponding to existing Dining Rooms 1 and 2), and there was one small banquet room (corresponding to existing Banquet Room 2). There was no Cocktail Lounge in 1962, nor was there a large Banquet Room.

Fig 9 (left): Subject property in 1964, showing façade remodel, view northeast (UCLA Air Photo Archive)
Fig 10 (right): Subject property circa 1964, showing building with side and rear additions, view northwest (UCLA Air Photo Archive)

In July of 1968, permits were issued for expansion of Taix Restaurant with a substantial new, one-story addition with a basement to the west. This work dramatically altered the existing building, incorporating new architectural features with a distinctive tower element at the southwest corner, and porte cochere extending from the west elevation, which reoriented the main entrance toward the west elevation and parking lot (Figs 11-13). New architectural features

referenced French Revival style architecture through the new tower element, with its sloped roof with finial detailing, as well as stucco exterior walls incorporating half-timbering decoration, and through interior design, discussed below. Alterations were designed by Nielsen, Moffatt & Wolverton (firm history below).

The interior was reconfigured as part of the 1969 expansion, encompassing a substantial amount of new space in the west portion of the building. The entrance in the west elevation lead into a new Foyer with a curved ceiling, half-timbering trim, and stained-glass windows on the walls. The Foyer provided access to a new Wine Room, Banquet Rooms, and basement to the north and new Cocktail Lounge to the south, expanding the restaurant's capability to host large groups of people. The Wine Room, which originally served as a wine shop, featured clipped corners encircled by built-in shelving, and had a separate entrance from the west elevation. (The Wine Room ceased to serve as a wine shop in 1979, when it was converted into a private dining room.) A new Banquet Corridor extended north of the Foyer, though it was simpler than the Foyer, without decorative features at the time. (The existing brick base and wood trim were added in the 1990s.) The Banquet Corridor provided access to new restrooms (Restroom 1) as well as a large banquet room that could be divided into two spaces (Banquet Room 1). The Cocktail Lounge, added south of the Foyer, was anchored by a fireplace in its west wall and incorporated a long bar with a cherry wood top with built-in shelving for wine behind along its south wall. This room was framed by a distinctive scalloped ceiling along the north and south walls, while the wall surfaces were clad in flocked wallpaper. The Sunset Boulevard entrance remained in its original location, leading into the newly configured Alcove Seating Area where there was a cashier stand adjacent to a central brick feature wall. The former bar was converted into the Garden Room, serving as a private dining space. Dining Rooms 1-3 were retained in their existing locations. A certificate of occupancy was issued in August of 1969.

Fig 11: Sanborn map of property in 1970, with blue indicating the 1969 addition and green indicating the 1962 configuration (EDR)

Fig 13 (right): Subject property, current view showing porte cochere at left (McGee, 2018)

Changes were made to the interior with several remodeling projects implemented in the late 1980s through the 2000s.[27] Especially notable are the following alterations implemented in the 1990s, the majority of which were part of a comprehensive remodel implemented in 1998, designed by Nadel Architects, Inc.:

- *Wine Room:* Existing perimeter shelving including engaged columns was added. The central ceiling medallion was also added.
- *Cocktail Lounge:* Existing fire door was added along the east wall, built-in seating was reupholstered, and service station partition walls were added along the east wall.
- *Banquet Corridor:* Existing brick veneer at wall bases and wood trim was all added.
- *Restroom 1:* Restrooms were remodeled with all fixtures and finishes replaced.
- *Banquet Room 1:* Early wallpaper was removed. Ceiling and wall finishes were replaced with existing.
- *Banquet Room 2:* An acoustical tile ceiling was removed and replaced with the existing finishes. The existing wall art, which appears to be acrylic on canvas, was painted by an artist named Biller in 1964 and moved within the room in the 1990s to the existing location. Biller's other work is unknown.[28]
- *Alcove Seating Area:* Reception desk was moved from its positioning adjacent to the central brick feature wall to its current location in the southwest corner. The existing wood frame bordering the entrance to seating area, extending north from the brick feature wall near the fireplace, was added.
- *Garden Room:* Existing wall mural was added in 1990, painted by Sylvia Johnson, whose other work is unknown.
- *Dining Room Corridor:* Existing wood door frames were added. Early wallpaper was removed and walls were painted.
- *Restroom 2:* New accessible restrooms were added.
- *Dining Rooms 1-2:* Existing north walls were added, enclosing the dining rooms from service spaces. Acoustical tile ceilings were removed and replaced with the existing ceilings. Contemporary metal paneling was added to ceilings and new wallpaper was added to walls. Several simple engaged columns or furred out walls were added along east and west walls to create visual balance and provide space for new electrical wiring. The existing fluted doorframes were added. Stained glass windows along the south wall were replaced with the existing fixed windows with etched glass. Dining booths were replaced with the existing booths upholstered in floral fabric. Configuration of U-shaped

[27] Information provided via email from current owner, Michael Taix, February 18, 2019.

[28] There is a local artist, Les Biller, who was active in the 1960s, though it is unclear if the art in Banquet Room 2 is his work or that of another local artist with a similar name.

booths around the perimeter remained generally intact, but central U-shaped booths were replaced with smaller, contemporary booths in a new configuration.
- *Dining Room 3:* The acoustical tile ceiling was removed and replaced with the existing ceiling. All other finishes were changed to existing.

Many other wall and ceiling finishes were changed throughout during the 1990s, including replacement of all original wallpaper and carpeting, where it existed, replacement of furniture, and replacement of light fixtures. One restaurant reviewer criticized the 1990s décor, noting, "While there is a hammered tin ceiling, the décor otherwise is straight from the 70s: mauve and gray booths, frosted glass, shiny brass fixtures. Unlike other Los Angeles landmarks—Phillippe's, the Pantry, Musso & Frank—the ghost of Raymond Chandler does not linger here."[29] Due to the negative feedback on the décor, subsequent changes were made to introduce faux historic elements into the interior an attempt to return the interior to its French roots, such as incorporating new wood paneling and trim.

Regarding signge, in the late 1990s, the "Les Freres" script was removed from the east facing Taix roof sign, as the restaurant was doing business as "Taix French Restaurant" and no longer using the name "Les Freres Taix." South façade signage other than the "cocktails" sign, was altered during 1990-2017 as well. The existing signage was added to the porte cochere after 2000.[30]

The following exterior and interior alterations were interior implemented since 2000:
- *Roof:* The flat portion of the roof was reroofed and the pitched portions of the roof were patched and repaired in specific locations due to damage caused by graffiti. Evidence of patching is visible.
- *West Elevation:* Entrance doors were replaced with existing.
- *Cocktail Lounge:* Existing wood paneling was added to the walls, new upholstery was added to the base of the bar, existing wood caps (beams) were added to the scalloped ceiling, original wine racks in the back bar were replaced with shadow boxes and cabinets, and existing built-in booths and freestanding furniture were added.
- *Garden Room:* Existing glazed wood doors were added to the west wall and the existing wood coatrack was added to the west wall, north of the doors.
- *Dining Rooms 1-2:* Existing mirrored wall surfaces were added.
- *Back of House:* Existing wood paneling on the hallway walls was added.
- *2nd Floor Office:* The second floor office space was remodeled with all new ceiling, wall and floor finishes.

Summary of Alterations

The building has been substantially altered since it was initially constructed in 1929, and no longer retains physical features from an early period. The exterior has been relatively unaltered from when Taix Restaurant altered the building in 1969, with exception of changes to the east bay of the south façade (replacement of windows, removal of original lanterns that hung under eaves, and alteration of curved walls surrounding secondary entrance door). Slate roofing material at the pitched portions of the roof is generally intact, though some areas have been patched with material that does not match existing. At the interior, the overall configuration of interior spaces is generally intact from 1969, though there have been alterations to materials, especially in dining rooms, implemented as part of remodeling done in 1998 and in the 2000s. While the decorative features of the Foyer, Alcove Seating Area, Cocktail Lounge and Garden Room are generally

[29] Michelle Huneven, "Old Enough to Know Better," *Los Angeles Times,* November 6, 1992: 112.
[30] Information provided via email from current owner, Michael Taix, February 18, 2019.

intact, remodeling work has changed many wall, ceiling, and floor finishes, and light fixtures throughout other interior spaces.

History of Architects, Engineers, and Contractors

George F. Sexton, Engineer

George F. Sexton was born about 1890 in Colorado. He worked as civil engineer in 1930,[31] and as a deputy building inspector for unincorporated Los Angeles County in the 1930s and 1940s.[32] In 1962-1963, he worked as the engineer on remodeling projects for Taix Restaurant at the subject property. He is also associated with design of Paradise Baptist Church in Los Angeles (constructed 1934, appears to be extant).[33] His brother, Joseph Sexton, was a structural engineer, and is listed on the permit for addition of the water tank in 1966. Lack of available information on the career of George and Joseph Sexton suggests neither made substantial contributions to the history of engineering, nor are they persons important in our past.

Harold Sampson, Contractor

Contractor Harold Sampson was born about 1896 in England.[34] In 1930, he worked as an engineer designing cabinet fixtures.[35] He also owned his own contracting company, which was active in 1938, when he had a classified advertisement in the *Los Angeles Times* stating he offered "any type specialty building and design."[36] He implemented remodeling work at the subject property in 1962. He passed away in 1977.[37] Lack of available information on the career of Harold Sampson suggests he did not make substantial contributions to the history of contracting, nor is he a person important in our past.

Nielsen, Moffatt & Wolverton, Architect

The architectural firm of Nielsen, Moffatt & Wolverton was comprised of partners Reiner C. Nielsen, Gene Edison Moffatt, and Donald Leland Wolverton. The firm was initially a partnership between Nielsen and Moffatt, who designed Garden Grove Hospital together in 1956.[38] By the 1960s, the firm added Wolverton as partner. In 1968, the firm had an office at 500 S. Lucas Avenue in Los Angeles.[39] In addition to their work at the subject property in 1968-1969, the firm's known work includes design of buildings in Santa Ynez Valley in the 1960s, including Solvang Lutheran Home, Santa Ynez Valley Hospital, and Solvang Municipal Center, which was designed in a Danish style.[40] The firm also designed the Taxidermy Wing of the Los Angeles County Museum in Exposition Park in 1964,[41] a comprehensive health center to replace John Wesley Hospital at 2826 S. Hope Street in Los Angeles in 1975,[42] and Martin Luther King, Jr. Medical Center Campus in the Willowbrook neighborhood of Los Angeles County in 1968-1972, as part of a team with two other firms.[43] Reiner C. Nielsen, was a member of the American

Institute of Architects (AIA) from 1954 until he passed away in 1990;[44] Gene Edison Moffatt, was a member of the AIA from 1954 until he passed away in 1986;[45] and Donald Leland Wolverton was a member of the AIA beginning in 1958, and served as president of the Los Angeles Chapter of the Construction Specifications Institute in 1975.[46] Nielsen, Moffatt & Wolverton's work at the subject property does not appear to be the best example of their work. The history of their work appears better represented by other examples, such as Solvang Municipal Center (Fig 14). It is notable that the firm's experience designing Danish style buildings in Solvang was similar to the design intent at Taix Restaurant, referencing historical architecture with use of half-timbering decoration and varied roof forms.

Fig 14: Nielsen, Moffatt & Wolverton's architectural rendering for Solvang Municipal Center, 1968.[47]

History of Owners and Tenants

Ona W. Spaulding

Ona Wood Spaulding developed the earliest portion of the existing building at the subject property in 1929 and owned the property until at least 1950, according to building permits (see Appendix A). Spaulding was born in Ohio in 1867.[48] She married Herbert George Spaulding, who worked as a contractor. Herbert passed away in the 1920s, and Ona was a widow when she developed the building.[49] She is listed in the 1930 and 1940 Census as having no occupation, indicating she owned the subject property as an investment.[50] She is mentioned in only two articles of the historic *Los Angeles Times*, in association with deaths of relatives. She died in 1967.[51] Given lack of available information on Spaulding's life and work, she does not appear to have made substantial contributions to history such that the subject property would be considered significant for its association with her.

Botwin's Café

Botwin's Café operated out of the subject property from 1929 until 1960. Owned and operated by Noah Botwin, the café was known for offering reasonably priced meals. An advertisement from

1954 noted that a full-course Thanksgiving dinner could be eaten for $2.15.[52] The restaurant also served as a meeting space for local organizations, hosting several meetings of the Republican Assembly in the 1950s,[53] and Association of Investment House Cashiers in 1957.[54] One 1952 *Los Angeles Times* article notes that its banquet space serviced a large family reunion.[55] Noah Botwin was a Municipal Health Commissioner for about two years in the 1950s, resigning after admitting to bribing city officials in order to obtain a liquor license.[56]

aix Restaurant

aix Restaurant was founded by Marius Taix . at 321 E. Commercial Street in Downtown os Angeles in 1927. Marius Taix Jr.'s father, larius Taix Sr., was a baker who immigrated Los Angeles from the Hautes-Alps in outheastern France in 1882. Settling on ommercial Street in the heart of the City's rly French quarter, where over 4,000 French ved together around the turn of the century,[57] e Taix family was one of Los Angeles' oneering French families.

arius Taix Sr. initially established a bakery in the French quarter selling French bread, and he lived above the bakery.[58] After the bakery was demolished in 1913, the Taix family constructed Champ d'Or Hotel, leasing a ground floor restaurant space to another restauranteur. Following a conflict regarding sale of alcohol on the property, the restauranteur vacated the premises. In 1927, Marius Taix Jr. established his own operation in its place: Taix French Restaurant.

Taix French Restaurant served 28,000 meals a month,[59] and was known for its reasonably priced French fare offered with family-style dining wherein patrons sat together at long tables, sharing serving dishes.[60] A nostalgic article written in the 1990s described the early restaurant as "a high-volume place with large tables where you might have had to double up with strangers and share tureens of soup and bottles of wine."[61] The Taix Restaurant on Commercial was vacated around October 1, 1964 and demolished to make way for a parking lot for a federal building.[62] Ten other buildings were demolished and the entire area including was reconfigured, with new streets, decimating the French quarter. The original Taix Restaurant location was later redeveloped with the existing federal prison, Metropolitan Detention Center.[63]

Marius Taix Jr. was born June 13, 1893 at 319 Commercial Street.[64] In addition to opening the Taix Restaurant at the Commercial Street location in 1927, he was a pharmacist, and served in the

United States Army.[65] In 1942, he worked at the French-Mexican Drug Company on Los Angeles Street.[66] Marius Taix Jr. retired in 1964 when the building was demolished.[67] He died in 1967 in Riverside County.

Fig 16: Taix family in front of location at subject property, ca. 1960s (Taix Restaurant)

Marius Taix Jr.'s sons, Raymond Taix and Pierre Taix, son-in-law, John Narp, and nother business partner, Louis Sangouard Marius' brother-in-law), purchased the ubject property in 1962 in order to provide a ew location for the Taix Restaurant. The staurant continued operating at the original ocation for two years, until 1964, while the ew restaurant started up operations. The new staurant was initially called Les Freres Taix, hich means "The Brothers Taix." Raymond ventually became the sole proprietor of the usiness and the restaurant's name was mplified to Taix.[68]

aymond Marcell Taix was born in 1925.[69] gan working there washing dishes at age twelve.[70] He attended Woodbury University and joined the U.S. Army in 1943, serving in Guam in World War II. As previously noted, Raymond opening the new Taix location at the subject property with his brother and other business partners in 1962, later becoming sole proprietor of the business. He worked at the restaurant until his death at age 85 in 2010 in Pasadena.[71]

Despite the Taix Restaurant's move to its current location in 1962, the emphasis on low cost meals endured, with "complete dinners for as little as $2."[72] Even at the time, the restaurant was seen as a significant establishment. In 1963, Taix Restaurant was described in the *Los Angeles Times* as a 35-year-old "eating landmark."[73] One 1964 advertisement provided: "...the décor is pure Parisian, the food is all that even a Frenchman could ask for and the wine cellar offers as complete a selection as you'll find anywhere. Prices are modest, well within the family range." At the time, dinner was served until ten o'clock at night, with the cocktail lounge open until midnight.[74] A 1965 advertisement showcased the restaurant's low prices, with lunch available for $1.00-$1.95 and dinner for $2.35-$3.35.[75] A 1963 restaurant critic write the following about the new location at the subject property:

> It is...somewhat, décor-wise, a far cry from the original Taix down on Commercial St. – tufted leather booths, carpeting, tablecloths, and attractive waitresses rather than 80-year-

> old waiters. Incidentally, the old Taix is still in business, hasn't yet been bulldozed as a lot of people seem to think. Anyway, at the so-called "new Taix," you get the same generous tureen of excellent vegetable soup, salad with the same garlicy dressing, huge serving of pot roast with large portions of tomato-infested zucchini, creamed au gratin potatoes, sherbet, and coffee—all for $2.25. It is not exactly a gourmet repast. But, you can't beat the price. What's more, they have a red mountain wine for 90 cents a half bottle (by Louis Martinez) that needs no apologies. And the cocktail lounge is exceptionally attractive. For an economical dine-out treat for the family or to take out a girlfriend on the night before payday, this is one of the town's better bargains.[76]

Taix Restaurant was often home to meetings of local organizations. In 1963, it was home to a meeting of the Retired Officers Association, Los Angeles Chapter.[77] In 1964, it was used by a reunion of veterans of World War I.[78]

In 1968-1969, the restaurant was expanded to the west, reorienting the entrance toward the parking lot and adding about thirty percent more space to the building, encompassing banqueting facilities. By this time, the restaurant could accommodate functions of many sizes, offering a small wine room, a large cocktail lounge, and several dining and banquet rooms for groups from 20 to 180 people.[79] The restaurant remained very busy in the 1960s through most of the 1970s, though there was a downturn in business in the late 1970s, which continued through ensuing decades.[80] Competition from new local establishments with expansive banqueting facilities, at such places as the Los Angeles Convention Center and nearby hotels, has made it difficult for larger restaurants to successfully continue to utilize their banquet rooms. Additionally, the Echo Park neighborhood declined, earning reputation for gang activity, which negatively impacted the restaurant's ability to continue to serve as a neighborhood gathering place. While it remained a destination restaurant, it suffered from the tarnished image of its location in a "bad area."[81]

Newspaper coverage of the restaurant's cuisine continued over time. In 1985, Taix Restaurant received attention for its wine selection. Michael Taix took over the wine program from his father, Raymond Taix and "turned it from something that was merely interesting to something that was exciting and dynamic," offering 450 selections of high-quality, low priced wines by the glass, bottle, and even by the case.[82] Efforts were also made made to adjust the menu to a more authentic Country French style cuisine in the mid-1980s.[83] In 1989, one critic praised Taix for its notable wine list, though emphasized the food was rather ordinary, stating, "Taix is the most curious thing in the L.A. food world: a restaurant for the wine lovers who are not foodies."[84] In 1992, another reviewer remarked on the lack of historical associations evident in the building, noting, "Taix may be one of L.A.'s older restaurants, but it did not preserve the more alluring aura of its own history. While there is a hammered tin ceiling, the décor otherwise is straight from the 70s: mauve and gray booths, frosted glass, shiny brass fixtures. Unlike other Los Angeles landmarks—Phillippe's, the Pantry, Musso & Frank—the ghost of Raymond Chandler does not linger here."[85] In 1998, the restaurant underwent a remodel which involved changing many wall and ceiling finishes, upholstery, furniture, and light fixtures throughout. In the 1990s and later,

many of the interior alterations were aimed at infusing the restaurant with a greater sense of history, adding more wood trim and other features meant to harken back to the past. In 2017, Taix Restaurant celebrated its 90th anniversary and the Los Angeles City Council issued a certificate honoring the business, stating, "…be it resolved that by the adoption of this resolution, the Los Angeles City Council does hereby commend and congratulate the Taix French Restaurant on the occasion of celebrating their 90th Anniversary and contribution to the culture of Los Angeles."[86]

French Cuisine in Los Angeles

French Cuisine has long been an important centerpiece of Los Angeles culinary history. The book *To Live and Dine in L.A.: Menus and the Making of the Modern City* incorporates reproductions of historic restaurant menus and provides a comprehensive history of the dining establishments that shaped aspects of early culinary and social history of the City. Author Josh Kun asserts the significance of Los Angeles as a long-time national center for restaurants, writing that, "By 1910, Los Angeles was being declared the number three "Top Restaurant City" in the country." Kun also underscores the importance of French restaurants for establishing the City's preeminence in the culinary arena, stating, "The city's nineteenth century French immigrant population was instrumental in the birth of the city's food and wine industry."[87]

French immigration to Los Angeles began with arrival of Jean Louis Vignes, who moved to Los Angeles from Bordeaux in 1832, brining grapevine cuttings and establishing the El Aliso vineyard south of Union Station, becoming the first commercial winemaker in California.[88] Other important French immigrant families, including Sainsevain, Viole, Penelon, Bouchet, Nadeau and Taix, followed, establishing themselves in downtown Los Angeles, "building homes and opening businesses in what quickly became a Gallic enclave,"[89] referred to as "the Frenchiest Place in town."[90]

A concentration of French restaurants in early downtown Los Angeles emerged. The City's first sit-down restaurant appears to have been French, opening in 1849, located at the Bella Union hotel in downtown.[91] In a chronology of early restaurants of downtown Los Angeles, Kun identifies several other early dining establishments that were French. In 1852, a stand-alone French restaurant, La Rue's, opened, known for its low-cost meals and no-frills atmosphere; in 1855, Restaurant Francais opened; in 1876, Victor Dol's restaurant, the Commercial opened; and, in 1878 Restaurant de Paris opened.[92] Other notable early examples were Portier's French Restaurant in East Los Angeles and Jeanne's French Café in Montebello.[93] Thus, Taix Restaurant, which opened in the 1920s, was part of a lineage of early French restaurants in the City, though its focus was, and has always been, on serving "family style" and reasonably priced cuisine.

Despite the early success of French dining in the City, overcrowding and redevelopment ultimately decimated the French quarter, and many of the early French restaurants were lost as

that population spread out around the Los Angeles area and throughout the country. In Los Angeles, restaurants such as the Taix Restaurant appear to have endured due to their appeal to the middle-class, offering low cost meals and comfort food for the masses.[94]

It should be noted, in the mid-Twentieth Century era, French food was seen as the pinnacle of fine-dining. This was initially popularized by several factors, such as success of the Le Pavillion French restaurant in New York, established during this period and noted as a big success for "restoring French cuisine to the preeminence it had enjoyed before Prohibition and redefining hate cuisine in America as something indisputably French."[95] The restaurant's culinary masterworks created new high standards for fine dining. Additionally, French at home cooking was made popular by the famed chef, Julia Child, who began a French cooking television show in the 1960s that was influential in popularizing French cuisine.[96] Child was "considered to have rescued, or at least attempted to rescue, America from its infatuation with bland convenience."[97] However, Le Pavillion's influential chef, Henri Soule, was infamous for his snobby attitude which has allegedly "damaged the reputation of French cuisine in America ever since."[98] Thus, while French food had long been synonymous with fine dining, attitudes toward the cuisine ultimately changed. As supported by advertisements and restaurant reviews in the *Los Angeles Times,* Taix Restaurant appears to have always served reasonably priced food in a comfortable setting, and has never been associated with high-end cuisine or fine-dining.

[94] A 2012 KCET article on the history of the French Basque culture in Los Angeles provides that the culture is represented today in the area through the following: Basque Village at the L.A. County Fair; Basque Club in Chino; the Annual Basque Festival & Picnic in Los Banos; La Villa Basque, restaurant established in Vernon in 1960; and Taix Restaurant in Echo Park

VII. HISTORIC CONTEXT

Relevant historic contexts include: SurveyLA's contexts for developmental history of the *Silver Lake-Echo Park-Elysian Park Community Plan Area* and for *Commercial Development from 1850-1980*, including the theme of *Commercial Identity, 1920-1980*, and the theme of *Neighborhood Commercial Development from 1880-1980* under the sub-theme *Restaurants, 1880-1980*, and relevant SurveyLA evaluation criteria, as well as Route 66 in Los Angeles.

Context: Silver Lake-Echo Park-Elysian Park Community Plan Area

The following overview of developmental history of the Silver Lake-Echo Park-Elysian Park CPA is taken from the relevant SurveyLA report for that CPA:[99]

> *Development History*
> The Survey Area's first inhabitants were native people referred to as the Tongva. The Spanish would later name these native people "Gabrieleno" in reference to Mission San Gabriel founded in 1771. Spanish explorers under Gaspar de Portola and Father Juan Crespi encountered the Tongva in 1769 during their expedition through the area. They had been sent north from Mexico to establish settlements in the territory known as "Alta California." Their expedition camped on the riverbank near the present-day entrance to Elysian Park. The campsite is designated California Historical Landmark #655.[100]
>
> In 1781, the Pueblo de Los Angeles was founded near this campsite. A large portion of the Survey Area belonged to the public lands surrounding the pueblo. The Spanish government encouraged settlement in territory by the establishment of large land grants called ranchos. The ranchos were originally concessions from the Spanish crown, permitting settlement and granting grazing rights on specific tracts of land, while the crown retained the title. In 1821, Mexico achieved its independence from Spain, and the Spanish territory of Alta California came under control of the Mexican government. The Mexican governors of Alta California eventually gained the power to make additional land grants, and many more grants were made under Mexican rule. Land in the northwestern portion of the Survey Area was originally part of Rancho Los Feliz, which was granted to Jose Vicente Feliz in 1796. The communities of Ivanhoe and Kenilworth, part of present-day Silver Lake, were eventually formed from a portion of this early rancho. No resources from this period remain in the Survey Area.
>
> A railroad rate war between the Union Pacific and Santa Fe in 1885 reduced the price of a ticket from St. Louis to Los Angeles to one dollar. Within a few years, more than 100,000 newcomers had arrived in Southern California, creating a real estate boom that drove land prices skyward. The bubble finally burst in 1887, leaving many paper millionaires suddenly penniless. But by that time, the land around downtown Los Angeles, including Echo Park, gave way to development.
>
> During the late 19th and early 20th centuries, streetcar service played a key role in laying the groundwork for the future growth of the area. Commercial and residential development generally extended into the area from downtown Los Angeles north and west along streetcar lines. Angelino Heights, located in the southeastern portion of the

[99] GPA Consulting, Inc., *Survey LA Historic Resources Survey Report, Silver Lake-Echo Park-Elysian Valley Community Plan Area*, prepared for City of Los Angeles, Department of City Planning, Office of Historic Resources, May 2014: 6-7.

[100] At the northwest corner of North Broadway and Park Row Drive is a bronze plaque that marks the beginning of the six-mile Portola Trail through Elysian Park.

CPA, is considered to be the first suburban development outside of downtown Los Angeles. It was developed as a direct result of a horse-drawn streetcar line on Temple Street. The line was later electrified and incorporated into the Los Angeles Railway Yellow Car system. Pacific Electric Red Car lines on Riverside Drive and Sunset Boulevard carried development further west into the neighborhoods of Echo Park and Elysian Valley.[101] The Olive Street Substation on Sunset Boulevard was constructed by the Pacific Electric Company in 1905 to service the line between downtown Los Angeles and Hollywood.

In other parts of the CPA development patterns clearly reflect automobile influences, as evidenced by the numerous tracts of single-family residences located in the hilly areas along Echo Park and Silver Lake Boulevards. By 1920, there were two automobiles for every three residents in Los Angeles. U.S. Highway 66, popularly known as "Route 66," was the nation's first all-weather highway linking Chicago to Los Angeles; a portion of this famous highway was Sunset Boulevard.

Context: Commercial Development from 1850-1980

Theme: Commercial Identity, 1920-1980

SurveyLA identified the Taix Restaurant as significant under the theme of Commercial Identity, 1850-1980; the following narrative statement of significance and eligibility criteria is excerpted from that context:[102]

Narrative Significance

Los Angeles has a wide range of long-term businesses that have served residents, visitors, and tourists for decades. Properties identified as significant within this theme relate to the particular goods and services provided by a business and the role a business played in local commerce. Examples in Los Angeles range from small mom and pop neighborhood businesses, to companies that became regional in importance, to national franchises. While many are well-known legacy businesses coveted by neighborhood locals, others are far-reaching in reputation, serving as popular tourist destinations and icons of Los Angeles culture. And still others reflect associations with corporate identities and prototypes.

Property types evaluated under this theme include food service, retails stores, and service related businesses. Identified examples include restaurants, bakeries, bars and taverns, mortuaries, nurseries, dry cleaners, hardware stores, and neighborhood markets. A large percentage of the businesses recorded under the Commercial Identity theme are food related. Examples designated as Los Angeles Historic-Cultural Monuments (HCM) include the nation's first See's Candy Shop and Kitchen (HCM No. 959), the original Der Weinerschnitzel (HCM No. 1046), and the Munch Box hamburger stand (HCM No. 750). Other recorded examples of long-term Los Angeles businesses include Pink's Hot Dogs, Musso and Frank Grill, Cole's Restaurant, Tom O'Shanter, Pann's Coffee Shop, The Bear Pit Bar-B-Q, and The Apple Pan.

Particularly noteworthy are long-term businesses owned and operated by individuals and families from a variety of ethnic/cultural backgrounds. Many of these are further

[101] "About the Silver Lake Community, Los Angeles, California," Welcome to Silver Lake, *http://www.silverlake.org/about_silverlake/aboutSL_frmset.htm*, accessed December 3, 2013.

[102] City of Los Angeles Office of Historic Resources, *SurveyLA, Los Angeles Citywide Historic Context Statement, Context: Commercial Development, 1850-1980, Theme: Commercial Identity, 1920-1980,* August 2016.

discussed in the ethnic/cultural themes developed for SurveyLA.[103] These businesses evidence the overall history and development of an area as well as patterns of settlement, movement, and changing demographics.

Although historic districts are not common under this theme, three districts have been recorded for SurveyLA – the New Chinatown Commercial Historic District and Greater Chinatown Commercial Historic District,[104] significant for their association with Chinese American-owned and operated businesses in Chinatown, and the Beverly Boulevard Commercial Historic District, significant for its association with businesses important to the Beverly-Fairfax Jewish community.

Many of the properties recorded under this theme are highly significant within a neighborhood context. Because determining eligibility of properties for the National and California registers typically includes in-depth comparative analysis with similar resources, most properties under this theme were evaluated under City Historic-Cultural Monument criteria only.[105]

Local criteria allow for discretion in considering the importance of neighborhood landmarks and generally provide greater leeway with regard to comparative analysis. However, further research and analysis may reveal that some properties meet significance thresholds for the National and California registers.

Evaluation Criteria
Theme: Commercial Identity: 1920-1980.
Summary Statement of Significance: A resource evaluated under this theme is significant in the area of commerce as the founding or long-term location of a business that made a significant contribution to the commercial history of Los Angeles. Resources may also be significant in the areas of ethnic heritage and social history for their association with ethnic-cultural groups as well as women's and LGBT history.

Period of Significance: 1920-1980

Period of Significance Justification: The 1920s is the time of the earliest recorded resource under this them; 1980 represents the end date for SurveyLA, which may be extended over time.

Geographic Location: Citywide

Area(s) of Significance: Commerce; Ethnic Heritage; Social History

Criteria: NR: A; CR: 1, Local: 1

Associated Property Type: Commercial/Commercial District

---

[103] Ethnic/cultural theme published to date can be found at *http://preservation.lacity.org/historic-context*. For information on themes in progress contact the Office of Historic Resources.

[104] The districts in Chinatown were determined eligible for the National Register of Historic Places through a Section 106 Review process determination in 1986 and are listed in the California Register of Historical Resources, However, since data for individual contributors in the district are not included in the State Historic Resources Inventory (HRI) the district was recorded and updated as part of SurveyLA using themes from the Citywide Historic Context Statement.

[105] See the "Comparing Related Properties" section of *National Register Bulletin 15: How to Apply the National Register Criteria for Evaluation*, 1990, rev. 1991: 9. The California Register is based closely on the National Register. California Register instructions refer preparers to Bulletin 15 for further information on applying and interpreting the California Register criteria.

Property Type Description: Although any commercial property type can be significant under this theme, those evaluated generally include food service, retails stores, and service related businesses. Designated and known resources include restaurants, bakeries, bars and taverns, mortuaries, nurseries, dry cleaners, and markets. Property type also include commercial historic districts, particularly those associated with ethnic cultural groups.

Property Type Significance: Property types represent important long-term businesses that have contributed to commercial growth and development in Los Angeles. Properties may also be significant in the areas of social history and ethnic heritage or their association with ethnic - cultural groups, women's history and LGBT history.

Eligibility Standards:

- Is associated with a business that made an important contribution to commercial growth in Los Angeles.
- Is the founding or the long-term location of a business significant in commercial history.

Character-Defining Features:

- Retains most of the essential physical features from the period of significance.
- May be associated with ethnic/cultural history, women's history, LGBT history.
- Contributes to the commercial, social, and cultural history of Los Angeles.
- May have particular significance for its association with a neighborhood or community in Los Angeles.
- May be associated with business/corporations that have gained national importance.
- May feature corporate designs, logos and signs.
- May have served as a prototype for other buildings and locations.
- For the National Register, properties must possess exceptional importance if less than 50 years of age.
- In most cases, the business is still in operation.

Integrity Considerations:

- Should retain integrity of Location, Design, Feeling, Materials, and Association.
- Setting may have changed (surrounding buildings and land uses).
- Some alterations may be acceptable if they were made during the period of significance for a business and if significance is not also based on architectural quality.

The SurveyLA report for the Silver Lake-Echo Park-Elysian Park Community Plan Area identifies several properties that appear significant under the above context, including not only the Taix Restaurant, but also Red Lion Tavern, 2362 N. Glendale Boulevard, constructed 1959; Millie's Coffee Shop, 3523 W. Sunset Boulevard, constructed 1926; and Tokio Florist, 2718 Hyperion Avenue, constructed 1965.[106]

[106] GPA Consulting, Inc., *Survey LA Historic Resources Survey Report, Silver Lake-Echo Park-Elysian Valley Community Plan Area*, prepared for City of Los Angeles, Department of City Planning, Office of Historic Resources, May 2014: 32.

Theme: Neighborhood Commercial Development, 1880-1980
Sub-Theme: Restaurants, 1880-1980

Restaurants are an integral part of Los Angeles history, reflecting important aspects of not only the City's culinary history, but also "broad currents of political and social trends."[107] During the mid-Twentieth Century period, Americans were dining out with increased frequency, a trend which extended through the 1960s, when Taix Restaurant moved to the subject property.[108] Excerpts from the City's SurveyLA historic context for restaurants provides the following regarding historical development of the restaurant property type and eligibility criteria for evaluation of such properties:[109]

> The restaurant sub-theme consists of neighborhood resources purpose built to house food service establishments. The neighborhood restaurant catered to locals, and was not dependent upon a patronage drawn from other neighborhoods. As such, it reflected the economic level and, oftentimes the ethnically-based tastes, of the neighborhood. Many of Los Angeles neighborhood restaurants are also evaluated under the Commercial Identify theme as the founding or long-term location of well-known, and often iconic, establishments. Restaurants are also important property types discussed in each of the ethnic-cultural themes separately developed as part of the citywide historic context statement.
>
> The neighborhood restaurant as a distinct business emerged in the decades after the Civil War. It began as an offshoot of a tavern, hotel, or grocery store…
>
> A more direct predecessor of the neighborhood restaurant was the luncheonette. It evolved from the soda fountains of the late 1800s. The luncheonette provided counter service, with perhaps a small kitchen in the rear, and served light meals. Some were parts of drugstores or variety stores, while others were independent businesses.[110]
> By the early 1900s the luncheonette had developed into the neighborhood café. The café was a form that could be found both on the main streets of small towns and in the neighborhood business districts which functioned very much like small towns.
>
> Between 1910 and 1940 the local café served as a social gathering place for the neighborhood. It fit into the standard storefront found in the streetcar-based neighborhood commercial district. It consisted of a long, narrow space, with a counter along one side, tables or booths along the other, and the kitchen in the rear.[111]
>
> … This was a facility that provided a special experience as well as food. Atmosphere and design were stressed. Menus were more elaborate and prices higher. Unlike the café and tearoom, alcohol was typically available, surreptitiously during Prohibition and openly afterward.[112]

[112] Ibid., 49

The destination restaurant was rare in a neighborhood setting. It was typically found Downtown, particularly as parts of hotels, along specialized business strips, such as Hollywood Boulevard and the Miracle Mile, or in resorts such as Venice. But certain residential neighborhoods could support one. An example from the 1920s is the La Fonda Restaurant (L.A. Historic-Cultural Monument No. 268). It is located at 2501-2511 Wilshire Boulevard in the Westlake district, and was designed by the architectural firm of Morgan, Walls and Clements.[113]

Dating from 1926, the La Fonda was opened when Westlake was evolving from a neighborhood of single-family homes into one of apartments and institutions, able to support an upscale destination restaurant. On the block to the west of the La Fonda were the Los Angeles Art Association and the Otis Art Institute. Diagonally across the intersection of Wilshire and Carondelet was the Park-Wilshire, an apartment building of 174 units completed in 1923.[114]

Neighborhood destination restaurants continued to be built up until the beginning of the Second World War. An example is the Los Feliz Brown Derby Restaurant (L.A. Historic-Cultural Monument No. 843). It is located at 4500 West Los Feliz Boulevard and dates from 1942. It is a branch of the more famous hat-shaped restaurant of the same name, but shares only the circular form. Its style is late Streamlined Moderne, reflecting its projected image of elegant dining. It is located on the southwest corner of Los Feliz and Hillhurst, at the point where the commercial district along Hillhurst to the south ends and the upper-class residential district of Los Feliz begins. Of significance is that, unlike the earlier La Fonda, it provided parking.[115]

After the Second World War, the storefront-based neighborhood café was replaced by the auto-oriented coffee shop. These were free-standing structures, with their own parking lots, which reflected the shift toward neighborhood commerce based on widespread ownership of the automobile. Like the café, the coffee shop combined counter service with table and booth service, and like the café, generally did not serve alcohol. Some identified themselves as family restaurants, with less space for the counter and with the table and booth service in a separate space.[116]

Evaluation Criteria
Theme: Commercial Development: 1920-1980.
Sub-Theme: Restaurants, 1880-1980

Summary Statement of Significance: Neighborhood commercial resources are those which contain purveyors of goods and services that satisfy the everyday needs of nearby residents. Convenience of location was more important than range or quality of the goods or services offered. Resources evaluated under this sub-theme are examples of neighborhood restaurants.

Neighborhood restaurants may be significant in the areas of Commerce, Social History, and/or Architecture. They illustrate the evolution of the neighborhood restaurant into a variety of building types, from the café and the luncheonette, often housed in rented storefront spaces, into the free-standing tea room, destination restaurant, coffee shop, and

[113] Herr, *Landmark L.A.,* 443.
[114] 1923 Sanborn Map.
[115] 1909 and 1950 Sanborn Map.
[116] Jakle and Sculle, *Fast Food,* 50-51

walk-up food stand. They also illustrate how the neighborhood restaurant often functioned as important and well-known places to gather and socialize, reinforcing a sense of neighborhood identity. These restaurants may be associated with local, regional, and/or national chains and reflect prototype/corporate designs which may be significant examples of architectural styles and designed by noted architects. Neighborhood restaurants are also often significant under the Commercial Identity theme.

Period of Significance: 1880-1980

Period of Significance Justification: The period of significance begins in 1880, when the extension of the streetcar system led to the creation of spatially separate neighborhoods, with individual commercial districts, and ends in 1980, the end date established for SurveyLA.

Geographic Location: Citywide, within the current boundaries of Los Angeles

Areas of Significance: Commerce, Social History, Architecture

Criteria: NR: A/C; CR: 1/3; Local: 1/3

Associated Property Types: Commercial-Food—Restaurant; Commercial-Food—Walk-up Food Stand.

Property Type Description: Restaurant: A provider of food in an indoor, sit-down setting Walk-Up Stand: A provider of food without provision for indoor sitting, and with service via a window.

Eligibility Standards:

- Was constructed during the period of significance
- Was historically designed and used as a restaurant
- Of a scale and architectural character typical of neighborhood eating establishments
- Contains architectural features that reflect trends in neighborhood commercial design

Character Defining / Associative Features:

- Retains most of the essential character defining features from the period of significance
- May also be significant under themes within the Architecture and Engineering context
- Features architectural and site-planning elements typical of neighborhood restaurants in both a pedestrian-oriented storefront form and an auto-oriented freestanding form
- May reflect prototype/corporate designs associated with particular restaurant chains
- May be associated with noted architect/designers
- May have prominent signage
- Associated with activities typical of neighborhood economic and social life

Integrity Considerations

- Should retain integrity of Design, Materials, Location, Association, and Feeling
- Should maintain if possible original relationship to the street and to neighboring structures
- Architectural integrity should be intact, retaining original massing, significant features, and identifying details
    - Some original materials may have been altered, removed, or replaced, particularly in earlier examples
- Use may have changed
- Setting may have changed (surrounding buildings and land uses)

Route 66

The subject property was considered for potential significance for association with the former U.S. Highway 66 (Route 66), a cross-country highway and major transportation corridor running from Chicago to Santa Monica.[117] Route 66 was first designated as a U.S. highway in 1926 and historically ran along Sunset Boulevard through the Echo Park neighborhood where the subject property is located, encouraging local development meant to appeal to passing motorists. However, Route 66 in Los Angeles was replaced by the I-10 Freeway prior to the Taix Restaurant's 1968-1969 expansion and alterations. Originally known as the Olympic Freeway, the route for the I-10 Freeway was adopted in 1956 and was planned to extend the approximately 16 miles from the East Los Angeles neighborhood of Boyle Heights to the Pacific Coast Highway (PCH) in Santa Monica.[118] Ground was broken on the first, easternmost, segment in 1957, which was completed and dedicated in 1961. By 1964, the freeway extended west toward La Cienega Boulevard; and by 1966, the final segment to PCH was completed. Thus, the segment of Sunset Boulevard where the subject property is located was no longer associated with Route 66 by the time the existing iteration of Taix Restaurant had been constructed in 1969. The subject property does not appear to be historically significant for association with Route 66.

[117] The history of Route 66 in California has recently been acknowledged with preparation of a National Register of Historic Places Multiple Property Documentation Form (MPDF) for historical resources associated with the history of the highway in the state.

Carol Roland, Heather Goodson, Chad Moffett, and Christina Slattery, Mead & Hunt, Inc., "U.S. Highway 66 in California," National Register of Historic Places Multiple Property Documentation Form, prepared September 28, 2011, approved January 3, 2012.

[118] Nathan Masters, "Creating the Santa Monica Freeway," KCET, September 9, 2012, https://www.kcet.org/shows/departures/creating-the-santa-monica-freeway, accessed December 28, 2018.

VIII. HISTORIC RESOURCE ASSESSMENT

Significance

Eligibility criteria for local City of Los Angeles individual designation align in large degree with that of the National and California Registers. The following evaluates potential eligibility of the subject properties under each eligibility criteria for the federal, state and local levels under a single heading. Significance thresholds for eligibility are considered to be the same at the local, state, and federal levels. Even if a property is primarily significant for local or statewide associations, it may still be considered eligible for the National Register, as listing in the National Register allows for distinction between local, statewide, and national levels of significance.

Criterion A/1/1: Is associated with events that have made a significant contribution to the broad patterns of our history and cultural heritage.

The Taix Restaurant is a legacy business evaluated in this report for potential significance for association with historic contexts including commercial identity and restaurants in Los Angeles. The subject property has been home to Taix Restaurant since 1962. The business was established in 1927 in downtown Los Angeles, when Marius Taix, Jr., the son of an French immigrant, founded Taix Restaurant at 321 E. Commercial Street in the City's French quarter. The downtown location was known for its low-cost French food and family style dining. After the Commercial Street building was demolished in the early 1960s, Marius Taix, Jr. retired, and his sons, Raymond and Pierre Taix, along with two other business partners, John Narp, and Louis Sangouard, started a new French restaurant at the subject property.

In 1962, the building at the subject property was redesigned with elements of French Revival-style architecture reflecting the French food served inside. The new restaurant was described at the time as a place to dine out with the family; meals were offered at a reasonable price. There was an ongoing rise in the number of people dining out in Los Angeles in general and restaurants were proliferating. When Taix Restaurant expanded in 1969, adding a tower at the southwest corner of the façade, and reconfiguring the interior to accommodate more interior space, including banquet rooms, the restaurant further established itself as an important local gathering place, able to hold events of various sizes. While French cuisine had risen in popularity during the 1960s, and was seen as the pinnacle of fine dining, Taix Restaurant was generally known for its reasonable prices and comfort food. Taix Restaurant remained a destination in its current location, but increasing competition from other venues offering expansive banqueting facilities, coupled with the negative reputation of the Echo Park neighborhood at the time, caused a decline in the restaurant's business, beginning in the late 1970s and continuing through ensuing decades.

Although many of the features of the restaurant have changed over time, the subject property appears eligible at the local level, under Criterion A/1/1, as it constitutes a long-term, legacy restaurant business associated with one of the City's pioneering French families. The restaurant has made a significant contribution to the commercial history of Los Angeles, through establishing commercial identity as a destination and neighborhood restaurant and gathering place with banqueting facilities. The period of significance for the subject property begins in 1962 when the Taix Restaurant first occupied the building and ends in 1980, the approximate date by which the business began to decline, which aligns with the cutoff date established by SurveyLA for properties eligible under the relevant historic contexts for commercial development.

Criterion B/2/2: Is associated with the lives of persons important in our past.

The Taix Restaurant was evaluated throughout this report for potential significance for association with the lives of persons important in our past, including known historical owners, tenants, architects, engineers, and contractors. While early members of the Taix family, especially Marius Taix, Sr., were early French immigrants in Los Angeles, and may have been persons important in local history, the Taix Restaurant is not directly associated with these individuals, as they did their important work at the original restaurant location on Commercial Street. While Raymond Taix, the long-time proprietor of the Taix Restaurant, inevitably played an important role in the operation of the restaurant, he does not appear to have made substantial contributions to the restaurant industry nor history of French cuisine such that the Taix Restaurant would be considered significant for this association. Therefore, the Taix Restaurant does not appear eligible under Criterion B/2/2.

Criterion C/3/3: Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual or possesses high artistic values.

The Taix Restaurant appears more appropriately evaluated as a legacy business or cultural heritage asset than for its architecture. Its French Revival-themed architectural elements, added to the building in the 1960s, are not related to the historic context of the period revival styles that proliferated in the earlier Twentieth Century. The architecture of the Taix Restaurant is more closely related to that of themed restaurants designed in the post-World War II era, often positioned along major commercial thoroughfares. While this era of design produced important architectural typologies, such as Googie-style restaurants, which were often oriented toward the passing motorist, the Taix Restaurant does not strongly express any architectural style that was especially important during that time. Its elements of French Revival style were added through two separate construction projects by different architectural designers in 1962 and 1969. Lacking cohesiveness of design intent, and given the relative simplicity of the execution, with features focused at the façade and portions of the interior, the Taix Restaurant cannot be said to be an especially strong, nor high-style example of French Revival-themed, roadside architecture from the 1960s. Therefore, the Taix Restaurant does not appear eligible under Criterion C/3/3.

Criterion D/4: Has yielded, or may be likely to yield, information important in prehistory or history.

The Taix Restaurant cannot be reasonably expected to yield information important in prehistory or history; therefore, it does not appear eligible under Criterion D/4.

Historic District Eligibility

The subject property was considered for potential eligibility as a contributor to a locally eligible historic district. However, there does not appear to be a cohesive grouping of buildings that includes the subject property and conveys a strong sense of time and place from any particular period in history. The location of the subject property on Sunset Boulevard includes a wide variety of building types from varying decades. There is no significant concentration, linkage, or continuity of sites, buildings, structures, or objects united historically or aesthetically by plan or physical development. Therefore, there does not appear to be any district present.

Integrity

As previously noted, once a resource has been determined to satisfy at least one of the above criteria, then it must be assessed for "integrity."[119] Integrity refers to the ability of a property to convey its significance. Evaluation of integrity is based on "an understanding of a property's physical features and how they relate to its significance." The National Register recognizes seven aspects or qualities of integrity: *location, design, setting, materials, workmanship, feeling, and association*. To retain integrity, a property must possess several, and usually most, of these aspects.

The subject property generally retains integrity from its period of significance, 1962-1980, as described below.

- *Location:* The building at the subject property has not been moved and therefore retains integrity of location.
- *Design:* The subject property has not been substantially altered outside of its period of significance. It generally retains its essential French Revival design features evident at the south façade and building interior, as well as its significant character-defining interior spaces that convey its history as a restaurant. There have been changes to the design at the east bay of the south façade, including alterations to windows and removal of original light fixtures. There have also been extensive changes to materials at the interior, especially at walls, ceilings, and floors in the dining rooms. Despite these alterations, the Taix Restaurant generally retains integrity of design.
- *Setting:* The subject property has always been located on Sunset Boulevard amongst a mix of land uses. Therefore, the subject property retains integrity of setting.
- *Materials:* The exterior and structural elements have not been substantially altered with regard to their materials. The primary south façade appears much as it did after alterations in the 1960s and the interior is in generally the same configuration as it was after alterations in the 1960s. There have been some changes to materials at the exterior, in the east bay of the south façade, as noted above. While some areas of the interior are relatively intact, there have also been extensive changes to materials at the interior, especially at walls, ceilings, and floors in the dining rooms. Despite these alterations, the Taix Restaurant generally retains integrity of materials.
- *Workmanship:* Retention of building materials from the 1960s in portions of the restaurant's interior and exterior allows the Taix Restaurant to convey design of its significant character-defining features through workmanship. Therefore, the subject property retains integrity of workmanship.
- *Feeling:* Retention of the above aspects of integrity noted above is such that the Taix Restaurant generally conveys its feeling as a restaurant from the 1960s, although many of the materials at the interior have been altered as part of comprehensive remodeling efforts in the 1990s. Therefore, the Taix Restaurant retains integrity of feeling.
- *Association:* Retention of materials and workmanship makes it such that the Taix Restaurant conveys its historical association with its restaurant use. Therefore, the subject property retains integrity of association.

While the Taix Restaurant appears to retain sufficient integrity for listing as a City of Los Angeles Historic-Cultural Monument and for the California Register, it does not appear to retain sufficient integrity for listing in the National Register, due to the above-noted alterations.

---

[119] *National Register Bulletin #15, How to Apply the National Register Criteria for Evaluation*, National Park Service, 1990, revised 2002.

Character-Defining Features

Character-defining features are the physical features that convey a property's significance. The National Park Service publication, *Preservation Brief 17, Architectural Character: Identifying the Visual Aspects of Historic Buildings as an Aid to Preserving Their Character* outlines a three-step process to identifying character-defining elements or features:[120]

1. *Identify the Overall Visual Aspects:* Define general aspects of the building, including its setting, shape, roof, projections, recesses/voids, openings, and materials without focusing on details.
2. *Identify the Visual Character at Close Range:* Focus analysis on quality of materials, color and texture of surfaces, etc.
3. *Identify the Visual Character of the Interior Spaces, Features, and Finishes*: Note how the building configuration creates a pathway through the space and determine which room volumes and passageways feel important. Features and finishes contributing to interior decoration—or an absence of decoration—should also be noted.

Character-defining features are extant physical features that reflect the history of the subject property during its period of significance, 1962-1980, and are discussed below as per the methodology outlined above, and are classified under primary, secondary, and tertiary levels of importance. Physical features that are considered to have primary importance and should be preserved tend to be those that are the most accessible to the public and/or those that are especially unique and are identified under the subheading *Significant*. Features that convey history, but are of secondary importance, potentially due to being more private spaces and/or having been altered, are classified as *Contributing*. Features that do not necessarily convey important aspects of the property's history are of tertiary importance, and potentially areas to focus future alterations, are classified as *Non-contributing*.

<u>Overall Visual Aspects</u>

Significant

- One story height of building.
- Positioning at sidewalk edge with south façade oriented toward Sunset Boulevard.
- Multiple rooflines, including central front gable flanked by slender towers, larger tower at southwest corner, and hipped roof.
- Porte cochere extending from west elevation.
- Side chimney at west elevation.

Contributing

- East bay of south façade, where some alterations have occurred.

Non-contributing

- Surface parking lot area.

<u>Visual Character at Close Range</u>

Significant

- French Revival architectural elements focused at south façade and west elevation, including:
    - Front gable with eaves supported on wood brackets.
    - Rectangular towers flanking front gable, with flared metal roofs and finials.
    - Larger rectangular tower at southeast corner with flared metal roof and finial.

[120] Lee H. Nelson, *Preservation Brief 17: Architectural Character: Identifying the Visual Aspects of Historic Buildings as an Aid to Preserving their Character,* National Park Service, United States Department of the Interior, 1-2.

- Stucco exterior walls with half-timbering decoration.
- Low clinker brick wall extending across façade and incorporating planters.
- South façade entrance offset from center of gable peak, with lava rock wall detail to west and distinctive wood double doors.

- West elevation porte cochere with hipped roof supported on brick columns.
- West elevation chimney made of brick.
- West elevation entry area, half-timbering decoration on south wall and slate tile floor.
- Signage including:
  - Neon "cocktails" sign at south façade.
  - Roof sign.

Non-contributing

- Windows in east bay of south façade, which were altered in the 1990s.
- South façade signage other than "cocktails" sign, all of which was altered from 1990-2017.
- Signage on porte cochere, which was added in the 2000s.

Interior Spaces, Features, and Finishes

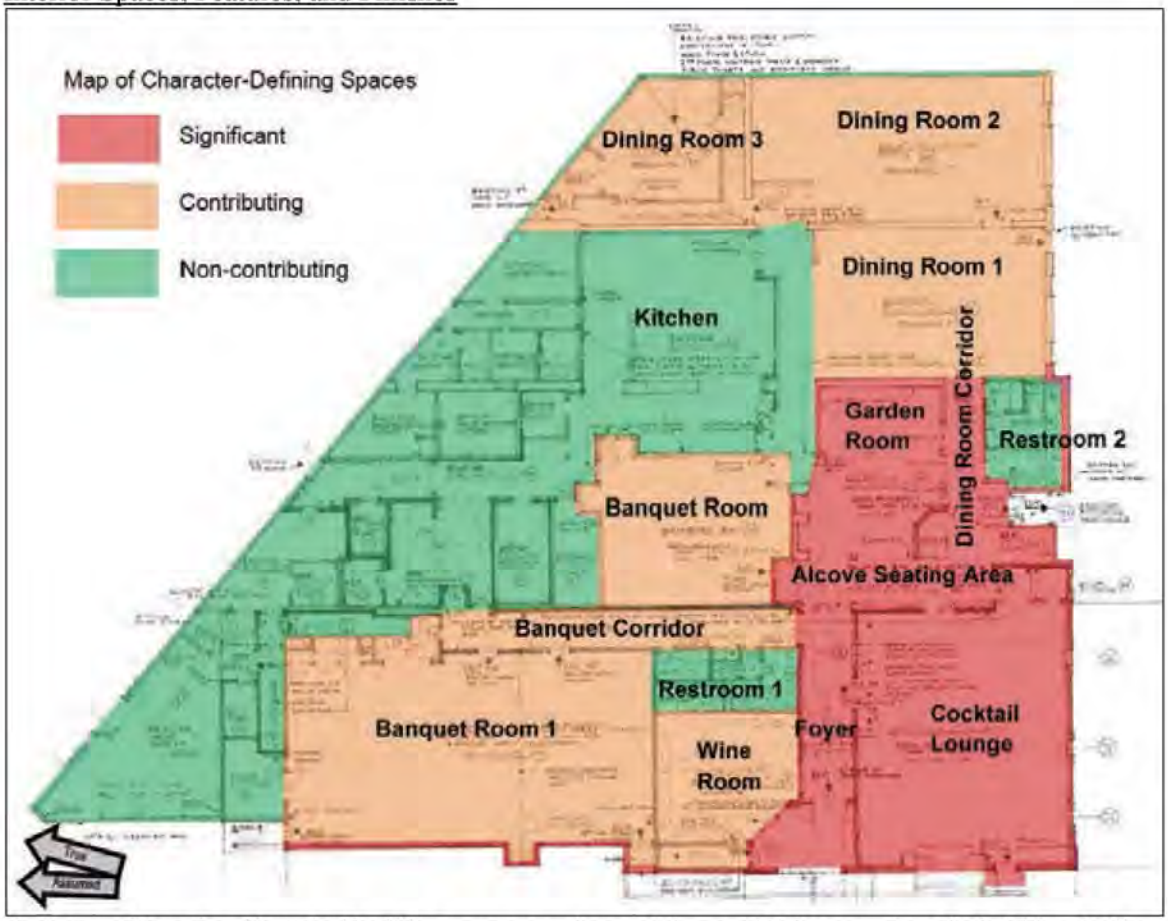

Fig 17: Ground floor plan with overlay identifying current nomenclature and character-defining spaces (base plan by Nielsen, Moffatt & Wolverton, 1968)

Significant

- Configuration of interior corridors including:
  - Foyer, oriented east-west, leading inside from the west elevation entrance
  - Banquet Corridor, oriented north-south, leading from the foyer to banquet rooms
  - Dining Corridor, oriented east-west, leading to dining rooms

- Configuration of interior spaces including:
  - Cocktail Lounge
  - Alcove Seating Area
  - Garden Room
- Materials of significant interior spaces including:
  - Slate tile flooring, where it exists in significant spaces.
  - Dark-stained wood trim with wavy edges, where it exists from the period of significance in significant spaces.
  - Brick wall veneer, where it exists from the period of significance in significant spaces.
  - Foyer: access from west elevation; raised landing; slate tile floor; curved ceiling with painted finish; brick wall base with painted plaster wall and half-timbering decorative trim above; wood door frames; wood molding with brackets along top of walls; windows with multi-light stained glass; light fixtures on wood door frames.
  - Cocktail Lounge: scalloped (vaulted) ceilings along north and south walls; wood partition walls with stained glass detail at entrance; bar positioned along the south wall with cherry wood countertop; wood shelving behind bar along south wall; brick wall incorporating brick and flagstone fireplace along west wall.
  - Alcove Seating Area: configuration as a central lobby space; wood doors at south elevation entrance; brick and wood central partition/feature wall creating secluded seating nook oriented toward fireplace; dark-stained wood trim with wavy edges and similar wood details from the period of significance; large stone fireplace at north wall.
  - Garden Room: north, east and west walls incorporating wood wainscot and painted plaster wall above; dark-stained wood trim with wavy edges, including half-timbering decorative trim on walls and door frames.

Contributing

- Configuration of interior spaces including:
  - Wine Room
  - Dining Rooms 1, 2, and 3.
  - Banquet Rooms 1 and 2.
- Materials of certain interior spaces including:
  - Wine Room: positioning of room above height of Foyer; rectangular plan with clipped corners; built in shelving dating from the period of significance; central ceiling medallion; slate tile floor.
  - Banquet Room 1: walls with brick veneer base, with painted plaster surface above, interspersed with regularly spaced stained wood trim with wavy edges.
  - Banquet Room 2: walls with wood wainscot, with painted plaster surface above.

Non-contributing

- Kitchen, back-of-house, service spaces, basement, and second floor office, all of which are not publicly accessible and do not have significant historical associations.
- Alterations implemented outside the period of significance, especially in the 1990s and later, to materials including: ceilings, flooring, wallpaper, and wall veneer and trim throughout.
- Banquet Corridor: Alterations including brick veneer base and wood trim above, which were added in the 1990s.
- Cocktail Lounge: Alterations including wood wall paneling, wood caps on scalloped ceiling, upholstery added to base of bar, wood partition walls for service area, and built-in furniture, which were added in the 1990s and later.

- Alcove Seating Area: Alterations including reception desk in southwest corner and wood frame surrounding entrance to seating area at north end of brick feature wall, which were added in the 1990s and later.
- Dining Room Corridor: Alterations including walls with smooth painted finish.
- Dining Rooms 1 and 2: Alterations including contemporary dining booths, south elevation windows, and all wall, ceiling, and floor finishes, which were added in the 1990s and later.
- Garden Room: Contemporary divider wall with sliding glazed doors (west wall of room), which was added in the 2000s.

IX. CONCLUSION

The subject property has been previously identified as a potentially eligible historical resource in SurveyLA as a "long-standing commercial presence in a community." The subject property is evaluated in detail in this report, including thorough documentation of existing conditions, history of construction and alterations, and history of owners and tenants. The subject property was evaluated against relevant historic contexts and found to be significant as a legacy business the Taix family has operated since 1927 that has made a significant contribution to a City's identity.

SurveyLA concluded that the Taix Restaurant appears to meet local criteria only and may not meet significance thresholds for National Register or California Register eligibility. This report concludes that the Taix Restaurant is a historical resource under CEQA that appears to meet eligibility criteria for listing locally as a City of Los Angeles HCM and may meet the criteria for listing in the California Register, but does not appear to retain sufficient integrity for listing in the National Register, due to alterations. This report also identifies the significant character-defining features of the subject property.

Appendix A: Table of Building Permits

Table of Building Permits

Date	*Permit No.*	*Work*	*Owner*	*Architect*	*Contractor*	*Valuation*
March 25, 1929	7853	Construct new Class "C" restaurant, 26'x66' 1-story, 15'-tall, stone tile exterior walls, metal lath-plaster interior partitions, concrete floors, composition roof.	Mrs. Ona Spaulding, 1382 Lucille Ave.	Edgar E. Butler	Not given	$3,500.00
April 23, 1929	11098	Place steel frame for illuminated sign on existing market building.	J.W. Botwin, 1911 Sunset Blvd.	N/A	Neosign Co.	$40.00
May 2, 1929	12016	Make an addition of 8'x17', stone tile.	Ona W. Spaulding, 1382 Lucille Ave.	Ed E. Butler	Owner	$225.00
November 5, 1934	15001	Erect sign on existing 40'x23' café building.	Noah Botwin, 1911 Sunset Blvd.	N/A	Mann Sign Co.	$280.00
June 10, 1935	9700	Erect toilet building, 11'4"x15'6", one-story, 11'9"-tall, brick exterior walls, concrete floors.	N. Botwin, 1911 Sunset Blvd.	George J. Fosdyke	None	$300.00
June 26, 1936	22987	Erect a one-story brick building as addition, 24'x42' to existing restaurant for use as cocktail lounge and toilet room.	Ona W. Spaulding, Beaux Arts Building	Charles F. Plummer, Architect; J.J. Rees, Engineer	None	$2,500.00
August 1938	24277	Erect a one-story brick addition, 26'x30' to existing building.	Batwick Café, 1911 Sunset Blvd.	Charles F. Plummer, Architect; J.J. Rees, Engineer	None	$1,000.00
1938 (month and day illegible)	33073	Tile bulkhead.	Spaulding	None	P.H. Millar, 1000 Echo Park Ave	Not given
October 18, 1938	34615	Move existing neon roof sign from end of roof to center of roof.	Noah Botwin, 1911 Sunset Blvd	None	Luminous Display Co	$200.00
November 8, 1940	45432	Replace fire damage to roof and dining room ceiling. No additions or changes. Replace as	W.B Taylor, 1921 Sunset Blvd.	None	W.H. Radford	$90.00

Date	*Permit No.*	*Work*	*Owner*	*Architect*	*Contractor*	*Valuation*
		before fire. (1921 W. Sunset Blvd.)				
April 10, 1946	19351	Wreck, demolish, and remove building. (1921 W. Sunset Blvd.)	Lucile O'Neill, 1382 Lucile Ave	None	None	$200.00
1946 (month and day illegible)	07838	Add 24'x30' addition to existing café, which has masonry exterior walls.	Ona W. Spaulding, 1382 Lucille Ave.	None	None	$1,500.00
March 29, 1946	09047	Add 28'x125' (illegible, could be 28'12'5") to existing building (foundation only)	Ona W. Spaulding, 1382 Lucille Ave.	None	None	$900.00
December 27, 1948	32419	Proposed addition required for proper sanitation and fire regulations, for increased kitchen area, feed storage, toilets and lockers.	Ona W. Spaulding, 1382 Lucille Ave.	McIntosh and McIntosh, Engineer	None Selected	$40,000.00
1947 (month and day illegible)	13488	Erect one 50'x10' advertising sign and attach to east wall of building.	Not given	Not given	Pacific Outdoor Advertising	$300.00
1947	26077	See plans for permit no. 16747 (1947). Change arrangement of non-bearing partitions; enlarge opening into existing building.	Ona W. Spaulding, 1382 Lucille Ave.	Palo and Lyerla, Engineer	Owner	$100.00
August 12, 1949	18812	Complete work authorized on permit 16747 (1947) and make corrections.	Ona W. Spaulding, 1382 Lucille Ave.	None	Owner	$500.00
October, 1949	25240	New canopy at front of building.	Botwin	J.M. Sexton, Engineer	Sexton	$300.00
November 10, 1949	27115	Enlarge small dining room, construct fireplace; cover walls of cocktail lounge and small dining room, with knotty pine.	Botwin's Restaurant	Owner	Owner	$1,000.00
December 1, 1949	29768	Erect sign on roof.	H. Botwin, 1915 Sunset Blvd.	Illegible	None	$200.00
1950 (month	02535	Construct steel canopy at side of building, 6'x8' and	Ona W. Spaulding,	J.M. Sexton, Engineer	H. Sampson	$300.00

Date	*Permit No.*	*Work*	*Owner*	*Architect*	*Contractor*	*Valuation*
and day illegible)		increase size of dining room as shown on plans.	1382 Lucille Ave.			
April 20, 1950	09050	Enlarge length of roof sign required under permit 02535 (1950) from 20' to 23'.	H. Botwin, 1915 Sunset Blvd.	J.M. Sexton, Engineer	Owner	$700.00
August 28, 1961	96294	Install projecting sign, 1'4"x7', reading "Coffee Shop."	Rafael's Restaurant	None	Brite Lite Neon	$600.00
June 19, 1962	13318	Add exterior canopy, 8'x10', on west elevation.	Mr. Taix, 1911 Sunset Blvd.	G. Sexton, Engineer	Mr. Sampson	$2,000.00
June 27, 1962	14014	Stucco and wood trim front only.	Taix Brothers, 1911 Sunset Blvd.	Sexton, Engineer	Harold Samson	$3,000.00
June 29, 1962	14263	Change size of existing vestibule to 8/6x12 on permit no. 13318.	Mr. Taix, 1911 Sunset Blvd.	G. Sexton, Engineer	Mr. Simpson	$200.00
July 6, 1962	14737	Revise permit no. 14014 (1962), exterior changes.	Taix Brothers, 1911 Sunset Blvd.	George Sexton	Mr. Sampson	$125.00
January 29, 1963	29582	Install metal and plastic neon signs.	La Casita, 1911 Sunset Blvd.	None	G.M. Neon Corp.	$500.00
December 2, 1963	55386	Add 690 square foot second story at northeast corner of existing restaurant.	Les Feres Restaurant, 1911 Sunset Blvd.	G.F. Sexton	Owner	$15,000.00
February 18, 1966	19282	Erect water tank on roof near northeast corner of building.	Les Feres Taix Restaurant, 1911 Sunset Blvd.	J.M. Sexton	Owner	$300.00
July 1, 1968	70274	Add one story and partial basement addition at 1911 and 1925 Sunset Blvd.	Les Freres Taix, 1911 Sunset Blvd.	Nielsen, Moffatt & Wolverton	Owner	$165,000.00
July 23, 1968	70929	Shoring for installation of new basement.	Les Freres Taix, 1911 Sunset Blvd.	Nielsen, Moffatt & Wolverton, Architect; George J. Fosdyke, Engineer	None	$500.00
March 17, 1969	84312	Install double-face projecting sign, 4'x8', along south	Taix Restaurant,	None	Three Star Sign Co.	$800.00

Date	*Permit No.*	*Work*	*Owner*	*Architect*	*Contractor*	*Valuation*
		elevation fronting Sunset Blvd.	1911 Sunset Blvd.			
May 29, 1970	09687	Install steel beam in intr. Kitchen non bearing masonry wall opening (previously cut).	Taix Restaurant, 1911 Sunset Blvd.	Wilson and Thompson, Engineer	Andre V. Pastor	$2,000.00
January 4, 1971	21171	Ceramic tile, walls and quarry; tile floor.	Taix Brothers, 1911 Sunset Blvd.	None	Andre Pastor	$6,000.00
November 4, 1975	16239	Alter existing office and dining room by relocation of stair in northeast corner of building.	Les Freres Taix Restaurant, 1911 Sunset Blvd.	Nielsen, Moffatt & Wolverton, Architect	McCormick Construction	$18,000.00
February 15, 1979	77720	Interior alterations to convert wine shop to banquet room in west portion of building.	P. Taix, 1911 Sunset Blvd.	R.C. Nielsen, Architect	Not selected	$3,000.00

Los Angeles City Council
c/o Office of the City Clerk
City Hall, Room 395
Los Angeles, CA 90012

Attention: PLUM Committee

Dear Honorable Members:

TAIX FRENCH RESTAURANT; 1911-1929 WEST SUNSET BOULEVARD; 1910-2018 WEST RESERVOIR STREET; CHC-2020-5524-HCM; ENV-2020-5525-CE; CD-13

At its meeting of **December 17, 2020**, the Cultural Heritage Commission took the actions below to include Taix French Restaurant in the list of Historic-Cultural Monuments, subject to adoption by the City Council:

1. **Determined** that the proposed designation is categorically exempt from the California Environmental Quality Act (CEQA), pursuant to Article 19, Section 15308, Class 8 and Article 19, Section 15331, Class 31 of the State CEQA Guidelines;
2. **Determined** that the property conforms with the definition of a Monument pursuant to Section 22.171.7 of the Los Angeles Administrative Code;
3. **Recommended** that the City Council consider Taix French Restaurant for inclusion in the list of Historic-Cultural Monuments; and
4. **Adopted** the attached amended Findings of the Commission.

The Commission vote was as follows:

Moved:	Kanner
Seconded:	Milofsky
Ayes:	Barron, Kennard
Absent:	Buelna

Vote: 4 – 0

James K. Williams, Commission Executive Assistant II
Cultural Heritage Commission

The Cultural Heritage Commission would appreciate your inclusion of the subject property to the list of Historic-Cultural Monuments.

Time for Council to Act: The Commission action is hereby transmitted to the City Council for consideration. Pursuant to Section 22.171.10(f) of the Los Angeles Administrative Code, the Council may approve or disapprove in whole or in part an application or initiation for a proposed designation of a Monument. The Council shall act in 90-days of the public hearing held before the Commission on the proposed designation. The City Council may unilaterally extend the 90-day time limit to act for a maximum of 15 days for good cause. With written consent of the owner, the time for the City Council to act may be extended by up to an additional 60 days. If the Council does not act on the application or initiation within this specified time limit, the application or initiation to designate a Monument shall be deemed to have been denied.

Enclosure: Amended Findings of the Cultural Heritage Commission, Staff Report, Mailing List

City Recognizes Taix Restaurant

Oct 23, 2012

photo by Gary Leonard

DOWNTOWN LOS ANGELES - A longtime Echo Park eatery that traces its roots to Downtown's former French quarter is being honored. On Oct. 16, the City Council approved naming the intersection of Sunset Boulevard and Park Avenue just northwest of Downtown as Taix Square, after French restaurant Taix French Country Cuisine.

The restaurant was opened in 1927 by Marius Taix Jr., who came from a family of sheepherders and bakers in France. The restaurant opened on Commercial Street before

moving in 1962 to its current spot at 1911 W. Sunset Blvd. The Taix family still runs the restaurant.

Re: Proposed Project (Taix), 1911 West Sunset Boulevard

Dear Mr. Bertoni:

On behalf of the Los Angeles Conservancy, we provide these comments regarding proposed development at the site of Taix Restaurant at 1911 West Sunset Boulevard. It is our understanding that the City is considering approving a large mixed-use development at this site based upon a sustainable communities project exemption (SCPE) for a transit priority project. A SCPE is only available for projects in limited circumstances when specific findings can be made because reliance on a SCPE means that no environmental review under the California Environmental Quality Act (CEQA) would be conducted for the project. (Pub. Resources Code § 21151.1.) Any project that demolishes the Taix Restaurant would have an adverse impact on an historic resource, preventing reliance on a SCPE. Thus, we urge the City require any project at this site to preserve this historic resource or require the applicant to conduct environmental review.

CEQA allows for an exemption from environmental review for transit priority projects only if the City makes a number of findings regarding the project site, its lack of impacts and the ability of the project to provide affordable housing. For purposes of this letter, we focus on one finding that the City must be able to make to rely on a SCPE, but

cannot here: "The transit priority project does not have a significant effect on historical resources pursuant to Section 21084.1." (Pub. Resources Code § 21155.1, subd. (a)(5).) All substantial evidence before the City demonstrates that Taix Restaurant is a historical resource pursuant to Public Resources Code section 21084.1. First, because Taix Restaurant was identified as eligible for local designation by Survey LA, it is a presumptive historic resource, meaning it must be considered a historic resource for CEQA purposes unless a preponderance of evidence demonstrates it is not historically or culturally significant. Additionally, all expert evidence in the City's records determined that the Taix Restaurant building is an historic resource. This includes:

- January 26, 2021 expert findings of the City's Cultural Heritage Commission;
- Historic Cultural Monument (HCM) nomination packet prepared by qualified experts Charles Fisher and Daniel Paul on behalf of the Silver Lake Heritage Trust;
- Historic Resources Group's January 16, 2019 expert report prepared on behalf of the Los Angeles Conservancy;
- October 2019 Historic Resource Assessment by Kathryn McGee on behalf of the site owner.[1]

There is no expert or other substantial evidence in the record that refutes these determinations of historic significance for Taix Restaurant. Thus, even under a discretionary standard, the City has no discretion to consider the Taix Restaurant building is not a historic resource pursuant to CEQA.

The City Council recently designated Taix Restaurant as a HCM as a legacy business. While the City Council designation for Taix Restaurant is limited to only two signs and a bar top, this determination was not based on a finding that the remainder of the site fails to meet the designation criteria. Instead, this determination was made on a solely economic basis upon a request by Councilmember O'Farrell that the Cultural Heritage Commission findings be revised because "The designation, however, should not be an impediment to Taix's ability to evolve…" (May 4, 2021 letter from Mitch O'Farrell to PLUM Committee.) The findings adopted by the City Council were similarly based on economic considerations, not historic resource expertise. Thus, for CEQA purposes, the

[1] This assessment did find that some rooms within the building were noncontributing features, but the building itself and large portions of the interior were found to be significant and contributing.

City Council's limitation on the HCM do not counter the significant amounts of expert and other substantial evidence identifying the Taix Restaurant building as an historic resource.

Because the replacement project being consider for this site would demolish Taix Restaurant, the project would have a significant impact on an historic resource, preventing reliance on a SCPE to avoid CEQA review. (See CEQA Guidelines §15064.5 ["[s]ubstantial adverse change in the significance of an historical resource means physical demolition"].) Moreover, even under the limited HCM designation, the project would have an adverse impact on an historic resource. Taix Restaurant was determined to be a historic legacy restaurant. The project may include a smaller space for the restaurant once it is completed, but there is no legal agreement in place to ensure Taix returns and no guarantee that the restaurant would be able to survive without space in the interim while the project is being constructed. Similar proposals to reincorporate a legacy business into new construction at the historic site after demolition have been unsuccessful.[2] Thus, impacts to this historic legacy business also prevent reliance on a SCPE.

For these reasons, we urge the City to make the correct determination that a SCPE is not applicable to the project. To determine otherwise would mean that the City Council's limitations to the HCM designation for economic reasons have improperly pre-committed the City to a specific project. CEQA requires that environmental review occur before momentum becomes unstoppable and alternatives to a project become foreclosed. (*Save Tara v. City of West Hollywood* (2008) 45 Cal.4th 116.) Whether a project is economically feasible should be determined through the environmental review process, after findings have been made that there are no feasible alternatives that would reduce or eliminate impacts to this historic resource.

Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer

[2] For example, a new project at the historic site of the Bob Baker Marionette Theater was unable to successful incorporate this legacy business into the new construction.

PLUM - 6/21/2022 re TAIX

19 messages

jen@silverlakeheritage.org <jen@silverlakeheritage.org> Tue, Jun 14, 2022 at 11:50 AM
To: Oliver Netburn <oliver.netburn@lacity.org>
Cc: "Carol Cetrone (cetrone@silverlakeheritage.org)" <cetrone@silverlakeheritage.org>

Good morning Mr. Netburn.

We received notice indicating the TAIX proposal is scheduled for PLUM on 6/21/2022.

It is our understanding the public hearing you held in March 2022 was to "gather information" in order to proceed with the public hearing process to follow. We aren't aware of any additional public hearings that were held or Letters of Determination that were sent out or otherwise posted decisions for public viewing (However, as you are aware SLHT are "interested parties" in this case and have requested to receive ALL notices and documents related to this project).

We are confused as to why this is suddenly on the PLUM agenda.

Finally, we've attached a copy of our First Amended Petition filed in April against Real Parties (applicants to the proposed project, 1911 Sunset Investors, LLC). We are aware up until the March hearing, the applicant's legal counsel failed to inform you they were named as Real Parties in a lawsuit directly related to this project.

We look forward to receiving clarification as to how we got to PLUM, while not holding public hearings at the planning level.

Thank you in advance.

~SLHT

The public hearing in March was for the CPC case. The SCPE case is a separate process for which notice was sent for the upcoming PLUM public hearing.

There has been no subsequent public hearing for the CPC case, however we are tentatively scheduled to go to CPC on July 14, for which a hearing notice will be going out shortly.

I hope that answers your question.

Thanks!

"The SCPE case is a separate process for which notice was sent for the upcoming PLUM public hearing."

Are you saying the March 2022 hearing you held WAS or WAS NOT the public hearing for the SCPE?

Are you saying the CPC will hold a hearing for this case, but that hearing is separate from the SCPE process? This is not clear.

Thank you.

I think you have it correct.

The SCPE is solely within the jurisdiction of the City Council. While I took testimony on the SCPE at the Hearing Officer hearing in March, I mentioned that the proper venue for comment on the SCPE would be at the PLUM hearing, now scheduled for 6/21.

Once the City Council acts on the SCPE, the CPC will hold a hearing on the CPC case. At that point, the City Council will have acted on the SCPE and that will not be before the CPC; only the CPC case.

I hope that helps.

Thank you for further explaining.

So, it is safe to say all of the evidence submitted at or around the time of the March public hearing went unconsidered and you approved the project anyway?

Once PLUM rubber stamps the project with approval, you are saying it goes to City Council for approval, yes? This is where the SCPE process is completed, and the time to file an appeal would be triggered?

THEN the parts of this project that are not related to SCPE, go to the CPC and then City Council?

What about CEQA?

Any comments or exhibits you would like the City Council to consideration for the SCPE needs to be submitted as part of the PLUM process. You can email any documents to clerk.plumcommittee@lacity.org and referencing Council File No. 22-0297.

With regard to the CPC case, nothing has been approved. The CPC will consider the project on 7/14.

Thank you. That still doesn't answer my questions.

Additionally, is the CPC hearing contingent on PLUM's approval?

Understood.

Just a reminder Mr. Netburn: The evidence in the record showing Taix is a historical resource is overwhelming. **That evidence alone requires compliance with CEQA**. Said evidence includes the applicant's hired historic consultant's findings.

We note the Department's refusal to apply the law as required.

We also note the Department's disregard to the litigation currently taking place, that involves the applicant's, the city and the entire process in which this matter has been handled to date, and your decision to move forward despite these circumstances.

Thank you for clarifying.

Mr. Netburn:

Can you please advise on the following?

1. Does the SCPE and other entitlements go to City Council *BEFORE* or *AFTER* the CPC scheduled for 7/14?

2. Is the City Council decision appealable?

3. Is the CPC decision appealable?

4. After either decision is deemed "final" please advise on the time frame by which permits would be issued.

5. Any additional hearings, meetings or processes by which the public is entitled to be made aware of.

Thank you.

> Good morning Mr. Netburn.

We received notice indicating the TAIX proposal is scheduled for PLUM on 6/21/2022.

It is our understanding the public hearing you held in March 2022 was to "gather information" in order to proceed with the public hearing process to follow. We aren't aware of any additional public hearings that were held or Letters of Determination that were sent out or otherwise posted decisions for public viewing (However, as you are aware SLHT are "interested parties" in this case and have requested to receive ALL notices and documents related to this project).

We are confused as to why this is suddenly on the PLUM agenda.

Finally, we've attached a copy of our First Amended Petition filed in April against Real Parties (applicants to the proposed project, 1911 Sunset Investors, LLC). We are aware up until the March hearing, the applicant's legal counsel failed to inform you they were named as Real Parties in a lawsuit directly related to this project.

We look forward to receiving clarification as to how we got to PLUM, while not holding public hearings at the planning level.

Thank you in advance.

~SLHT

Hello Jen,
The SCPE will be acted on by the City Council prior to the entitlements going to the City Planning Commission. The City Council's action on the SCPE is final and not appealable. The CPC's action is appealable to City Council.

If the City Council were to approve the SCPE, and the CPC's action was not appealed, the applicant could begin to pull building permits, but I couldn't tell you when they would be issued permits as that involves the review and approval from other government agencies. If the CPC action was appealed, the building permit process would have to wait until the City Council acted on the appeal.

As you know, PLUM recommended approval of the SCPE, so now the City Council needs to act on the SCPE. I don't know when the City Council will take up the SCPE, but they go on recess I believe toward the beginning of July, so I would imagine they will take it up next week. **The City Planning Commission hearing was pushed back to July 28th. (see attached hearing notice)**

Let me know if this answered your questions.

Hi Mr. Netburn.

Thanks for answering my questions.

You informed me the SCPE will go before the City Council *prior* to the CPC. This is not understood given the CPC's duties as defined in the Charter Code which indicates the CPC is to "*make recommendations*" to Council, DCP, etc.. How can the CPC make its "recommendation" to the Council, if the Council hears the

matter first?

Thanks.

"City Charter Code Sec. 551. City Planning Commission.
(a) give advice and make recommendations to the Mayor, Council, Director of Planning, municipal departments and agencies with respect to City planning and related activities and legislation; (b) make recommendations concerning amendment of the General Plan and proposed zoning ordinances in accordance with Sections 555 and 558; (c) make reports and recommendations to the Council and to other governmental officers or agencies as may be necessary to implement and **secure compliance with the General Plan**; and (d) perform other functions prescribed by the Charter or ordinance."

Hello Jen,
The CPC is only required to provide recommendations on those matters prescribed in the code or charter (e.g. General Plan Amendments, Zone Changes, land use ordinances, etc.). In this case, neither the code nor charter require a recommendation from the CPC to the City Council as it relates to the SCPE.

FYI. The City Council will be taking up the SCPE request tomorrow at their 10am meeting. Please see this link.

Hi Mr. Netburn.

Thanks for the 17 hour notice of tomorrow's City Council meeting.

I believe you misspoke regarding the Charter Code Mr. Netburn.
The CPC's agendas are riddled with cases well outside "General Plan Amendments" and "land use ordinances". It is not clear what the legal procedure is for SCPE's because SCPE's appear nowhere in the LAMC or the Charter Code and it is clear the DCP is making the road up as it goes along.

"City Charter Code Sec. 551. City Planning Commission.

> (a) **give advice and make recommendations** to the Mayor, **Council, Director of Planning, municipal departments and agencies with respect to City planning and related activities and legislation**; (b) **make recommendations concerning** amendment of the General Plan and proposed zoning ordinances in accordance with Sections 555 and 558; (c) **make reports and recommendations to the Council and to other governmental officers or agencies as may be necessary to implement and secure compliance with the General Plan**; and (d) **perform other functions prescribed by the Charter or ordinance."**

The SCPE is solely within the jurisdiction of the City Council. While I took testimony on the SCPE at the Hearing Officer hearing in March, I mentioned that the proper venue for comment on the SCPE would be at the PLUM hearing, now scheduled for 6/21.

Once the City Council acts on the SCPE, the CPC will hold a hearing on the CPC case. At that point, the City Council will have acted on the SCPE and that will not be before the CPC; only the CPC case.

I hope that helps.

California Public Resources Code Section 21155.1 provides that, "If the legislative body finds, after conducting a public hearing, that a transit priority project meets all of the requirements of subdivisions (a) and (b) and one of the requirements of subdivision (c), the transit priority project is declared to be a sustainable communities project and shall be exempt from this division."

This is the state statute governing SCPEs and it does not require a recommendation from the CPC. The authority is solely vested in the City Council

Hello again Mr. Netburn.

A couple of us were listening to yesterday's City Council meeting starting at 10am and we stayed on until the meeting was over just before around 12:00pm.
We did not hear agenda item #40 called for a vote. Can you please provide an update or what you believe took place yesterday?

We note the clerk stated: "*Items 35 through 53 are items which public hearings have NOT been held*".

Thank you.

Subject: Re: PLUM - 6/21/2022 re TAIX

Hi Mr. Netburn.

Thanks for answering my questions.

You informed me the SCPE will go before the City Council *prior* to the CPC. This is not understood given the CPC's duties as defined in the Charter Code which indicates the CPC is to "*make recommendations*" to Council, DCP, etc.. How can the CPC make its "recommendation" to the Council, if the Council hears the matter first?

Thanks.

"City Charter Code Sec. 551. City Planning Commission.
(a) give advice and make recommendations to the Mayor, Council, Director of Planning, municipal departments and agencies with respect to City planning and related activities and legislation; (b) make recommendations concerning amendment of the General Plan and proposed zoning ordinances in accordance with Sections 555 and 558; (c) make reports and recommendations to the Council and to other governmental officers or agencies as may be necessary to implement and **secure compliance with the General Plan**; and (d) perform other functions prescribed by the Charter or ordinance."

Thank you for further explaining.

So, it is safe to say all of the evidence submitted at or around the time of the March public hearing went unconsidered and you approved the project anyway?

Once PLUM rubber stamps the project with approval, you are saying it goes to City Council for approval, yes? This is where the SCPE process is completed, and the time to file an appeal would be triggered?

THEN the parts of this project that are not related to SCPE, go to the CPC and then City Council?

What about CEQA?

On 6/14/22 1:03 PM, "Oliver Netburn" <oliver.netburn@lacity.org <http://oliver.netburn@lacity.org> <http://oliver.netburn@lacity.org> <http://oliver.netburn@lacity.org> > wrote:

I think you have it correct.

The SCPE is solely within the jurisdiction of the City Council. While I took testimony on the SCPE at the Hearing Officer hearing in March, I mentioned that the proper venue for comment on the SCPE would be at the PLUM hearing, now scheduled for 6/21.

Once the City Council acts on the SCPE, the CPC will hold a hearing on the CPC case. At that point, the City Council will have acted on the SCPE and that will not be before the CPC; only the CPC case.

I hope that helps.

Re: Case File: CPC-2020-3140-CU-MCUP-DB-SPR-HCA / ENV-2020-3141-SCPE
Council File: **22-0297**

To the PLUM Committee:

CURRENT LITIGATION

The City and the applicants for this project are being sued over multiple violations that have taken place throughout the planning process directly related to this project, including the improper CEQA exemption granted by the Department of City Planning (DCP). This project is currently being litigated in the Los Angeles Superior Court, Case# 21STCP02612.

Oliver Netburn, the DCP planner assigned to this case, was informed of the litigation at the remote hearing held by the DCP on March 16, 2022. Any additional approvals related to this project are premature and further interpose deeper, costly and avoidable litigation.

FAILURE TO COMPLY:

The DCP's recommendation to City Council, in paragraph 2, states:

> "the proposed project.....qualifies as a transit priority project that is declared to be a Sustainable Communities Project and is therefore exempt from CEQA, in accordance with PRC Section 21155.1."

The recommendation to approve the proposed project as a SCPE at this site is erroneous and flawed. The overwhelming evidence in the record proves **Taix French Restaurant is indeed a historic resource**. This is widely accepted and confirmed by the City of Los Angeles' Survey LA, the LA Conservancy, the Cultural Heritage Commission, multiple private historic consultants, and the public at large. As such, on its face, this project is ineligible for SCPE and clearly mandates CEQA review.

REQUIREMENTS FOR A SUSTAINABLE COMMUNITY PROJECT (SCPE)
Public Resources Code Sec §21155.1(a)(5.) requires Implementation of the Sustainable Communities Strategy **cannot** have a significant effect on historical resources pursuant to Section 21084.1.

PRC §21084.1. specifies:

> "**A project that may cause a substantial adverse change in the significance of an historical resource is a project that may have a significant effect on the environment**. For purposes of this section, an historical resource is a resource listed in, **or determined to be eligible for listing in**, the California Register of Historical Resources. Historical resources included in a local register of historical resources, as defined in subdivision (k) of Section 5020.1, or deemed significant pursuant to criteria set forth in subdivision (g) of Section 5024.1, are presumed to be historically or culturally significant for purposes of this section, unless the preponderance of the evidence demonstrates that the resource is not historically or culturally significant. **The fact that a resource is not listed in, or determined to be eligible for listing in, the California Register of Historical Resources, not included in a local register of historical resources, or not deemed significant pursuant to criteria set forth in subdivision (g) of Section 5024.1 shall not preclude a lead agency from determining whether the resource may be an historical resource for purposes of this section."**

As cited in the Planning Department recommendation report on page 3, Public Resources Code (PRC) 21155.1 outlines the criteria for SCPE exemptions. In item 5, PRC specifically states that **SCPE requirements are met when a transit priority project "does not have a significant effect on historical resources pursuant to Section 21084.1."**

The DCP has again disregarded the preponderance of evidence as required under PRC 21082.2, which **requires substantial evidence to include facts, reasonable assumptions predicated upon facts, and expert opinion supported by facts.** All of which exist in the record, proving the historic and cultural significance exists. **CEQA prohibits the use of a Categorical Exemption for a project which may cause a substantial adverse change in the significance of a historical resource.**
As the lead agency, the DCP is required to make its determination as to whether a project may have a significant effect on the environment **based on substantial evidence in light of the whole record** pursuant to PRC 21082.2.(a).

PRC §21082.2. states:

> (a) The lead agency shall determine whether a project may have a significant effect on the environment based on substantial evidence in light of the whole record.

(d) If there is substantial evidence, in light of the whole record before the lead agency, that a project may have a significant effect on the environment, an environmental impact report shall be prepared.

PRC §21081.5. states:

"In making the findings required by paragraph (3) of subdivision (a) of Section 21081, the public agency **shall base its findings on substantial evidence in the record.**"

EVIDENCE IN THE RECORD INCLUDES:
The DCP is required to apply ALL of the evidence that exists in the record, concluding Taix French Restaurant **IS** a historic resource - NOT salvage items removed from the historic resource itself.

Current evidence in the record ignored by the DCP includes:

1. 2019 Historic Resource Assessment prepared by the applicant's historian Kathryn McGee:

    - "The Taix Restaurant was identified in Survey LA, the City of Los Angeles' recently completed citywide historic resource survey, as potentially "individually eligible for local listing or designation through survey evaluation" as a "long-standing commercial presence in a community." (page 1)

    - "Generally, a resource shall be considered by the lead agency to be "historically significant" if the resource meets the criteria for listing on the California Register (Pub Res Code SS5024.1, Title 14 CCR, Section 4852)." (page 6)

    - "*Relationship to this report:* Because the Taix Restaurant was identified in SurveyLA, a local historic resource survey meeting the requirements Section 5024.1(g) of the Public Resources Code (SurveyLA), and **for the reasons stated in this report, it is presumed to be historically or culturally significant. Therefore, the Taix Restaurant appears to qualify as an historical resource under CEQA."** (page 7)

    - "Even at the time, the restaurant was seen as a significant establishment. In 1963, Taix Restaurant was described in the Los Angeles Times as a 35-year-old "eating landmark."73 One 1964" (page 26)

It should also be noted for inclusion in the record, the 2019 Historic Resource Assessment prepared by Kathryn McGee dated October 2019 is a "revision" of the original "February 2019" Historic Assessment which the DCP claims they are not in possession of (May 9, 2022 email from Beatrice Pacheco, Chief Clerk Department of City Planning). We are inclined to believe McGee's *original* historic assessment contains <u>even</u> <u>more evidence</u> of

Taix's historic significance the applicant's do not want made available in the public record & are withholding said evidence.

2. Cultural Heritage Commission's Findings January 26, 2021:

    - "Determined that the property conforms with the definition of a Monument pursuant to Section 22.171.7 of the Los Angeles Administrative Code"

    - "Recommended that the City Council consider Taix French Restaurant for inclusion in the list of Historic-Cultural Monuments"

3. Catherine Gudis, Ph.D. Associate Professor of History / Director, Public History Program Teresa and Byron Pollitt Endowed Term Chair for Interdisciplinary Research and Learning in the Humanities and Social Sciences June 1, 2021 letter:

    - "There is no question that Taix is historic. The City's staff and CHC has claimed it; SurveyLA identified it as such; the developers Holland Partner Group even acknowledge Taix as a historic resource; and other autonomous surveys by the LA Conservancy claim it is so."

    - "...Historic Cultural Monument nomination, to limit landmarking to a few select scraps of Taix Restaurant. You moved to decimate the site despite the vote of our esteemed and well regarded Cultural Heritage Commission and City Office of Historic Preservation, which voted unanimously for Historic Cultural Monument status for the building and signs at large.

4. Chatten-Brown, Carstens & Minteer LLP July 12, 2021 letter:
    - Additionally, **all expert evidence** in the City's records determined that the Taix Restaurant building is an historic resource (page 2)

5. Historic Resources Group, January 16, 2019 Preliminary Assessment Report (Commissioned by the LA Conservancy):

    - "It is significant as a long-standing Echo Park restaurant that is an important commercial institution in the community, and the long-term home of the second generation of Taix Restaurant, originally established in Los Angeles in 1927 and at the current location since 1962." (page 18).

    - "Therefore, the building retains integrity of materials as it relates to **the building's ability to convey its significance** as the long-term home of the restaurant." (page 18)

6. August 24, 2020 Significance Statement by Historian Charlie Fisher:

    - "..city's most iconic and beloved local businesses, as well as one of the last vestiges of historic Frenchtown." (page 8)

7. January 18, 2021 statement from Daniel Paul, a Federally qualified Architectural Historian:
    - "As the CHC themselves have professed, this significance is conveyed through the total property itself. This including its interiors as articulated above, as acknowledged by the CHC after two hearings plus a site visit, and as I stated in **my own supplemental HCM analysis**." (page 6)

    - "...it meets, it's a continental-dining interior with European theming and expressive of French cuisine all of those together. (page 10)

8. December 17, 2020 CHC hearing, Director of Office of Historic Resources Ken Bernstein:

    - "Again the staff recommendation is we do feel it's fairly clear and has been **confirmed multiple times that it does meet criteria**." (page 46)

The record clearly includes **an abundance of evidence** demonstrating the property's historic significance. Therefore the DCP recommendation report fails to comply with Public Resources Code sections 21081.5, 21082.2, 21155.1.. The DCP recommendation report also violates the City's General Plan and Silver Lake / Echo Park / Elysian Valley Community Plan.

The Secretary of the Interior's Standards for Rehabilitation[1] REQUIRES THE FOLLOWING and does NOT allow alteration or demolition of a historic resource:

1. A property shall be used for its historic purpose or be placed in a new use that requires minimal change to the defining characteristics of the building and its site and environment.

2. The historic character of a property shall be retained and preserved. **The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.**

3. Each property shall be recognized as a physical record of its time, place, and use. **Changes that create a false sense of historical development, such as adding conjectural features or architectural elements from other buildings, shall not be undertaken.**

We request the PLUM Committee reject this SCPE determination and comply with Public Resources Code sections and other relevant State and local laws currently ignored by the DCP.

Sincerely,

The Silver Lake Heritage Trust

Mr. Netburn,

Please add me to the interested party list with the information
Provided below. If the City Clerk will be distributing any Hearing Notices,
Then I will be interested in those as well.

Thank you providing the public the opportunity to speak today.

I thought you did a fine job at moderating a respectful hearing.

Hello again Mr. Netburn.

A couple of us were listening to yesterday's City Council meeting starting at 10am and we stayed on until the meeting was over just before around 12:00pm.
We did not hear agenda item #40 called for a vote. Can you please provide an update or what you believe took place yesterday?

We note the clerk stated: "*Items 35 through 53 are items which public hearings have NOT been held*".

Thank you.

Hi Mr. Netburn.

Thanks for answering my questions.

You informed me the SCPE will go before the City Council *prior* to the CPC. This is not understood given the CPC's duties as defined in the Charter Code which indicates the CPC is to "*make recommendations*" to Council, DCP, etc.. How can the CPC make its "recommendation" to the Council, if the Council hears the matter first?

Thanks.

"City Charter Code Sec. 551. City Planning Commission.
(a) give advice and make recommendations to the Mayor, Council, Director of Planning, municipal departments and agencies with respect to City planning and related activities and legislation; (b) make recommendations concerning amendment of the General Plan and proposed zoning ordinances in accordance with Sections 555 and 558; (c) make reports and recommendations to the Council and to other governmental officers or agencies as may be necessary to implement and **secure compliance with the General Plan**; and (d) perform other functions prescribed by the Charter or ordinance."

>
> It is our understanding the public hearing you held in March 2022 was to "gather information" in order to proceed with the public hearing process to follow. We aren't aware of any additional public hearings that were held or Letters of Determination that were sent out or otherwise posted decisions for public viewing (However, as you are aware SLHT are "interested parties" in this case and have requested to receive ALL notices and documents related to this project).

We are confused as to why this is suddenly on the PLUM agenda.

Finally, we've attached a copy of our First Amended Petition filed in April against Real Parties (applicants to the proposed project, 1911 Sunset Investors, LLC). We are aware up until the March hearing, the applicant's legal counsel failed to inform you they were named as Real Parties in a lawsuit directly related to this project.

We look forward to receiving clarification as to how we got to PLUM, while not holding public hearings at the planning level.

Thank you in advance.

Hi Jen,
I don't know the exact time, but the City Council took public comment, after which they voted to approve the item, in conjunction with the other items that they took public comment on.

Mr. Netburn:

The clerk went on record stating: "***Items 35 through 53 are items which public hearings have NOT been held***". As you are aware, PLUM heard this matter on June 21, 2022.

Trying to railroad this project through with no procedural process in place is a problem Mr. Netburn. No notice requirements, no explanation for the public to understand public comments, if/where to send them prior to the City Council hearing the matter.

On 6/30/22 1:37 PM, "Oliver Netburn" <oliver.netburn@lacity.org> wrote:

California Public Resources Code Section 21155.1 provides that, "If the legislative body finds, after conducting a public hearing, that a transit priority project meets all of the requirements of subdivisions (a) and (b) and one of the requirements of subdivision (c), the transit priority project is declared to be a sustainable communities project and shall be exempt from this division."

This is the state statute governing SCPEs and it does not require a recommendation from the CPC. The authority is solely vested in the City Council

Hi Mr. Netburn.

Thanks for the 17 hour notice of tomorrow's City Council meeting.

I believe you misspoke regarding the Charter Code Mr. Netburn.
The CPC's agendas are riddled with cases well outside "General Plan Amendments" and "land use ordinances". It is not clear what the legal procedure is for SCPE's because SCPE's appear nowhere in the LAMC or the Charter Code and it is clear the DCP is making the road up as it goes along.

"City Charter Code Sec. 551. City Planning Commission.

(a) **give advice and make recommendations** to the Mayor, **Council, Director of Planning, municipal departments and agencies with respect to City planning and related activities and legislation**; (b) **make recommendations concerning** amendment of the General Plan and proposed zoning ordinances in accordance with Sections 555 and 558; (c) **make reports and recommendations to the Council and to other governmental officers or agencies as may be necessary to implement and secure compliance with the General Plan**; and (d) **perform other functions prescribed by the Charter or ordinance."**

On 6/27/22 4:40 PM, "Oliver Netburn" <oliver.netburn@lacity.org <http://oliver.netburn@lacity.org> <http://oliver.netburn@lacity.org> > wrote:

Hello Jen,
The CPC is only required to provide recommendations on those matters prescribed in the code or charter (e.g. General Plan Amendments, Zone Changes, land use ordinances, etc.). In this case, neither the code nor charter require a recommendation from the CPC to the City Council as it relates to the SCPE.

FYI. The City Council will be taking up the SCPE

request tomorrow at their 10am meeting. Please see this link <https://ens.lacity.org/clk/councilagendas/clkcouncilagendas3162931_06282022.htm> .

Where is your recommendation report regarding Taix? It appears as thought you pushed this project through, despite it proving to be a historical resource, despite it being in litigation (as well as the city), and without making any report for public review.

Looking forward to the additional lawsuit.

To: oliver.netburn@lacity.org

Hi Oliver,

Thank you for leading the meeting today and taking my question.

My family is from Echo Park. My mother grew up here in the late 50's and my uncle still lives in that family home now. My parent met and fell in love here, I have lived here on my own for the last 22 years. I met my husband and fell in love with him while living in Echo Park. I live on Liberty St. right behind Taix so this project will have a significant impact on the life of my family.

I agree that Echo Park has changed tremendously, and that seems natural. I would like to see developments that help support the existing community, and support of small businesses rather than focusing on bringing more people and expensive housing/commercial space to the already impacted urban space we currently have. I am surrounded by families that live 4 or more in a studio or one-bedroom apartment. They walk to a public school that is rated 1 out of a possible 10. They would not know how to even apply to live in that new building. Building a walkway in between the buildings can hardly be called "community-minded".
Why is there so much money put into buildings and businesses that much of the local community can't afford when the schools are underfunded and undersupported and the homeless occupy the sidewalks so that we have to walk in the street to get to the local library? I can't even park in front of my own place for more than two hours because of the street signs. Parking for residents and visitors will further crowd the area.

Is this the kind of project that belongs in Echo Park? A generic-looking highrise on an already crowded street? How does the community benefit from it?

Thank you for your time. Please add my email to the interested party list.
Best,
Cindi Kusuda

Mr. Netburn:

At the 3/16 hearing for the TAIX matter you had provided Council File# **20-0297.**
However upon doing a search for "20-0297" on the LA City Clerk Connect website, 20-0297 appears to be for a different project.

Can you please provide the correct council file number at your earliest convenience?

Thanks.

Oliver Netburn <oliver.netburn@lacity.org> Fri, Mar 18, 2022 at 12:19 PM
To: jen@silverlakeheritage.org
Cc: cetrone@silverlakeheritage.org

It should be 22-0297.

Richard Schave <schavester@gmail.com> Thu, Mar 17, 2022 at 6:42 PM
To: Oliver.Netburn@lacity.org

Oliver:

Thanks for all your good work yesterday with the Taix Hearing. I can don't find the URL for downloading the presentations given at the hearing. Can you please provide that or the presentation files themselves?

Thanks so much,

Richard Schave

INITIAL SUBMISSIONS

The following submissions by the public are in compliance with the Commission Rules and Operating Procedures (ROPs), Rule 4.3a. The Commission's ROPs can be accessed at **http://planning.lacity.org**, by selecting "Commissions, Boards & Hearings" and selecting the specific Commission.

The following submissions are not integrated or addressed in the Staff Report but have been distributed to the Commission.

Material which does not comply with the submission rules is not distributed to the Commission.

ENABLE BOOKMARKS ONLINE:

**If you are using Explorer, you will need to enable the Acrobat toolbar to see the bookmarks on the left side of the screen.

If you are using Chrome, the bookmarks are on the upper right-side of the screen. If you do not want to use the bookmarks, simply scroll through the file.

If you have any questions, please contact the Commission Office at (213) 978-1300.

Los Angeles, CA 90012

Re: CPC-2020-3140-CU-DB-MCUP-SPR; 1911 W. Sunset Boulevard (the "Property")

Honorable Members of the Planning Commission:

We are writing on behalf of our client, 1911 Sunset LLC, to respectfully request your approval of the above referenced entitlements to facilitate the development of Taix Square ("Taix Square" or the "Project"), a mixed-use project that will facilitate the continuation and rejuvenation of the Taix French Restaurant at the location where it has served the community since 1962, while adding 166 critically needed apartments (including 24 apartments reserved for Very Low Income Households) to the Property in a pedestrian-oriented development carefully designed to activate and tie-together Echo Park's central hub at Sunset Boulevard, Reservoir Street and Park Avenue.

In addition to enabling the continuation of Taix French Restaurant as a legacy business and living treasure of the City of Los Angeles, approval of Taix Square will also implement the historic preservation objectives of the City Council when it voted to designate Taix French Restaurant as a Historic Cultural Monument on January 28, 2022, finding that:

> "In order to continue over its nearly 100 years in business, Taix Restaurant has previously been required to adapt and repeatedly change. Yet despite the many changes, the Taix family has successfully maintained the continuity of the restaurant and its significance as a Los Angeles cultural institution. The Taix family has informed the City that the revenues of the restaurant can no longer support the overhead associated with its current property, over-sized building, and aged and outdated infrastructure. Accordingly, preservation of the Taix French Restaurant as a historic-cultural resource and legacy business requires that it be able to respond to economic and social challenges that compel changes in its current physical premises."

We appreciate the hard work of Planning Department staff on this matter, but have not yet received the Staff Report being prepared for the Commission's review. Accordingly, we may submit additional comments for the Commission's consideration once the Staff Report is released. In addition, to implement the intent of the City Council in approving Taix Square's Sustainable Communities Project Exemption from CEQA and in designating Taix French Restaurant as a Historic Cultural Monument of the City of Los Angeles, we respectfully request that the Commission adopt the additional proposed condition of approval attached as **Exhibit A** hereto.

A. General Background

As explained in Mike Taix's September 22, 2020 letter to the Cultural Heritage Commission (attached as **Exhibit 1**) and his more recent June 27, 2022 letter to the City Council (attached as **Exhibit 2**), the Taix family founded Taix French Restaurant in 1927, and through their cooking and hospitality, have made it something dear to the hearts of Angelinos for now close to one hundred years. The Taix family's entrepreneurship and perseverance has stewarded and preserved Taix through the Great Depression, through World War II, several recessions, the federal government's condemnation of their original downtown location, urban decline, numerous remodelings, and periodic changes in public taste.

In 2018, well before the COVD-19 pandemic, it became clear to the Taix family that the Taix French Restaurant could not continue in its aged, over-sized, inefficient and outmoded premises. In order to continue their family legacy business, the Taix family determined that its best course was to sell the property to a user that would plan its redevelopment to incorporate the continuation of Taix French Restaurant in a new 'right-sized' format (with new kitchen, storage and HVAC facilities infrastructure) designed to retain the restaurant's identity while responding to current public tastes and preferences.

The Taix family carefully examined over a dozen developers, and ultimately decided to move forward in collaboration with Holland Partner Group, which has a history of building quality and thoughtful developments throughout Los Angeles and Southern California.

The result of that four-year collaboration is the Taix Square Project, with special provision for the continuation of Taix Restaurant in the same location where it has served the community since 1962.

B. Taix Square's Design

1. The Project's Design Evolution

Through the process of stakeholder engagement and input, the design of Taix Square has evolved through several phases. Initially, at the recommendation of the Los Angeles Conservancy, the Applicant considered reinstalling the façade of the existing Taix French Restaurant along Sunset Boulevard. *See* **Exhibit B**. However, other stakeholders questioned the

architectural value of the façade and the value of its retention as a preservation gesture.[1] They persuasively argued that the community would be better served by bolder contemporary design with opportunities for more public open space connecting the Reservoir Street neighborhood to the north with Sunset Boulevard to the south.

In response, a new design was crafted with a ground floor paseo that bifurcated the building at the ground level with a public paseo that aligned with Liberty Street to the north and Park Ave to the south. *See* **Exhibit C**. The ground level was now proposed to be comprised of retail uses fronting Sunset Boulevard and the public paseo, the reimagined Taix restaurant, lobby, leasing and amenity spaces for the apartments. A second paseo was incorporated on the Project's west side to provide access from Sunset to the Echo Branch Library parking lot to the north; increasing the Project's porosity and linkages to surrounding uses. The exterior building expression played off vertical and horizontal sliding elements to provide a sense of movement and tension while the paseo's rich ochre color emphasized the internal and "cut away" nature of the paseo.

The second design was presented to various stakeholder groups including the Neighborhood Council and the Echo Park Improvement Association in May of 2020. Opinions about it varied. The through-paseos were complimented as welcome amenities for the community that would enhance pedestrian circulation, provide gathering space that would create a sense of place for this important part of Sunset Boulevard. But the consensus feedback was that the very contemporary nature of the architecture did not really reflect the character of Echo Park.

In response to this input, the present design was created. A survey of significant buildings in Echo Park was performed. The Project's building mass was broken up so that its component elements appear like buildings built separately over time, and various vernacular patterns and elements from the surveyed Echo Park buildings were incorporated into the design. Large murals were added to vertical planes of the building in the tradition of similar Echo Park signs and murals. The prominence of the new premises for Taix French Restaurant was increased by placing it at the corner of the paseo and Sunset Boulevard, and by incorporating a façade recalling that of the original Taix Restaurant in downtown Los Angeles. *See* **Exhibit D**. The dimensions of the central paseo were increased. Original Taix signage was incorporated into the building. The revised design was presented to various stakeholders and the Neighborhood Council and the Echo Park Improvement Association in September of 2020 and received strong support. *See* **Exhibit E**.

2. Taix French Restaurant's Design

New premises for Taix French Restaurant are the centerpiece of Taix Square, and will relieve the Taix family of the unsustainable outmoded and over-sized premises building that

[1] As discussed below, the Cultural Heritage Commission and the City Council have also agreed that restaurant building is not architecturally significant.

threaten to permanently close their legacy business. When it opens, the restaurant's patrons will find Taix French Restaurant refreshed and prominently standing in the same location where it has been found since 1962. Customers will be greeted with an adaptation of the storefront that graced Taix's original downtown premises flanked by the restaurant's existing "Taix" and "Cocktails" signs. *See* the Conceptual Plans for the Taix restaurant premises attached as Appendix E to the Historical Resource Technical Report by GPA Consulting dated January 2022 attached to Council File 22-0297 (attached hereto as **Exhibit F**).

At approximately 5,500 square feet, the business will be 'right-sized' so as to meet the efficiency requirements of a viable restaurant; with all new kitchen, storage, loading and HVAC facilities. The kitchen, back of house and associated storage will be positioned in the center of the restaurant with a backdoor that leads directly to an off-street loading zone and a secure and ventilated commercial trash room.

The restaurant will be finished in an aesthetic that will provide a familiar experience to Taix French Restaurant's longtime patrons; yet will also respond to current public preferences. An approximately 1,500 square foot patio adjacent to the restaurant's main dining room will accommodate the public's desire for a Southern California indoor/outdoor dining experience. The outdoor patio will front Taix Square's central pedestrian paseo so as to buffer diners from traffic on Sunset Boulevard, and will be directly integrated into the restaurant's interior via operable window-door assemblies that will allow natural light into Taix's interior, and while also allowing its interior space to seamlessly flow into the outdoor environment.

The restaurant's interior space will be broken down into multiple 'rooms' that retain Taix's existing feel and sense of place. The bar room walls will be lined with half a dozen booths, with the center of the bar room housing tables that can be moved and adjusted as the occasion demands. Taix's trademark patinaed mirrors will line the wall behind Taix's cherished Cherrywood bar. Much of the restaurant's ceiling will be covered with a faux-tin ceiling tile similar to the style found in Taix's existing dining rooms today.

Further back in the restaurant, there will be a darker and more intimate space for another dozen horseshoe, Pullman and circular booths like those in Taix's existing restaurant. This space is conceived to embrace the darker "speak-easy" experience many of Taix's current patrons enjoy. Patinaed mirror treatment along the walls and the faux tin tiles on the ceiling provide the depth of material to accent the plush booth benches that wrap the perimeter of this room. Beyond this space, a small private dining room can be accessed designed for more intimate parties of approximately a dozen guests, with the restrooms and operations office further down the corridor.

C. Requested Entitlements for Taix Square

The Property is eligible for Tier 3 development under the City's Transit Oriented Communities (TOC) Incentive Program. The Property's base density is 110 units. The Project will set aside 24 apartments for Very Low Income households, which is equivalent to 21% of its

base density and 14% of the total project density. As discussed below, but-for its mixed-use character, Taix Square would have been processed in accordance with the TOC Guidelines. However, as discussed below, because Taix Square requires an "off-menu" incentive (waiver of the three-story 1VL Height District limitation for mixed-use buildings) that would not be required of an all-residential project, the Applicant is required to process entitlements for Taix Square through the Conditional Use/Density Bonus process.

1. Taix Square's Density Bonus, Incentives, Concessions and Waivers are Generally Consistent with the TOC Guidelines

As discussed above, the Property is eligible for Tier 3 development, and the density bonus and seven "off-menu" waivers requested for Taix Square are generally equivalent to, or less than, those mandated under the TOC Guidelines. Specifically, taking into account the Project's 14% total Very Low Income set aside, Taix Square's:

- 51% density bonus is less than the ministerial 70% TOC density bonus that it would otherwise be mandated to receive (TOC Guidelines § VI.1.a.iii);
- 3.75:1 FAR is equivalent to the Tier 3 TOC Base Incentive that it would otherwise be mandated to receive (TOC Guidelines § VI.1.b.iii);
- .5 residential parking ratio is equivalent to the Tier 3 TOC Base that it otherwise would be mandated to receive (TOC Guidelines § VI.2.a.i.1);
- The 22-foot height increase is the equivalent of a Tier 3 TOC Additional Incentive that it otherwise would be mandated to receive (TOC Guidelines § VII.1.g.i.2);
- Reduced sideyard setbacks would be equivalent to the Tier 3 TOC Additional Incentive RAS3 yard requirements that it otherwise would be mandated to receive (TOC Guidelines § VII.1.a.i); and
- 25% reduced open space would be equivalent to the Tier 3 Additional Incentive that it otherwise would be mandated to receive (TOC Guidelines § VII.1.b.ii).
- The additional 20-feet above the maximum height of 67-feet for the building's elevator structure is consistent with LAMC Section 12.21.1.B.2 which, for buildings up to 75 feet in height, permits roof and stairway structures to exceed the building height by up to 20 feet.[2]

[2] While the proposed elevator structure would appear to be accommodated by LAMC Section 12.21.1.B.2, because elevator structures are limited to 10 feet for buildings limited to 45 feet, Planning staff has requested that in an abundance of caution, the Applicant include an off-menu waiver request to accommodate the Project's roof-top elevator structure to permit the 18-ft proposed elevator structure which serves the Project's required private open space.

Taix Square is proceeding by way of Conditional Use/Density Bonus, however, because the Property's Height District 1-VL designation imposes a three-story and 45-foot height limitation on commercial and mixed-use buildings – but not on all-residential buildings (which are only limited as to height, but not number of stories). Taix Square's 67-foot height is consistent with the TOC Guidelines § VII.1.g.i.2 height incentive of 22 additional feet, but TOC Guidelines § VII.1.g.i.2 only permits two additional stories to what would otherwise be allowed by underlying zoning. To accommodate its proposed number of units in a mixed-use project, Taix Square requires 6-stories rather than 5-stories.

While the Zoning Code's three-story limitation for mixed-use – but not all residential – buildings in the 1VL Height District is anachronistic in light of the City's current policy of encouraging mixed-use pedestrian-oriented TOC development, the City's TOC process does not provide for "off-menu" relief. For this reason, the TOC process is unavailable to the Project, and to achieve the very same incentives to which an all-residential Tier 3 project would be entitled Taix Square must proceed through a combined application pursuant to LAMC Section 12.24.U.26 and 12.22.A.25(g)(3) to achieve its 51% density bonus and the TOC-equivalent incentives outlined above.

While Taix Square cannot proceed by way of the TOC process, with the exception of the Applicant's request to waive the three-story limitation (and the clarification requested by Planning Staff pertaining to the building's elevator structure allowance), the Project's "off-menu" incentives, waivers, and modifications are exactly the same as currently authorized by the City of Los Angeles as necessary to provide for affordable housing costs and to avoid precluding the construction of a qualifying density bonus development. In addition, there is no substantial evidence that Taix Square would result in an adverse impact, as defined in paragraph (2) of subdivision(d) of Section 65589.5, upon public health and safety or on any real property that is listed in the California Register of Historical Resources or that any concession or incentive would be contrary to state or federal law. Thus, there is no substantial evidence to support denial of the incentives, waivers, and modifications requested for Taix Square.

2. Section 12.24.U.26 Findings for Taix Square

By setting aside 21% of its Base Density for Very Low-Income households Taix Square would be entitled to a 60% density bonus, or 176 units pursuant to LAMC Section 12.24.U.26(a)(2), although Taix Square is proposed at only 166 units. Section 12.24.U.26 requires the adoption of 12.24.E findings; specifically that:

- that the project will enhance the built environment in the surrounding neighborhood or will perform a function or provide a service that is essential or beneficial to the community, city, or region;

- that the project's location, size, height, operations and other significant features will be compatible with and will not adversely affect or further degrade adjacent

properties, the surrounding neighborhood, or the public health, welfare, and safety; and

- that the project substantially conforms with the purpose, intent and provisions of the General Plan, the applicable community plan, and any applicable specific plan.

Substantial evidence supports the adoption of all of these findings. Taix Square is substantially consistent with the City's General Plan, including the General Plan Framework, the Silver Lake-Echo Park-Elysian Valley Community Plan, the Mobility Plan 2035, and the objectives of the City's Transit Oriented Communities Program and Guidelines. Taix Square is also consistent with regional policies to reduce VMT, congestion and greenhouse gasses, such as SCAG's 2016 Regional Transportation Plan and Sustainable Communities Strategy. Taix Square will meet essential community needs by providing 166 new apartments, including 24 apartments reserved for Very Low Income households within a Tier 3 transit priority area and within 750 feet of the intersection of a Regular Bus line and a Rapid Bus line at Sunset Boulevard and Alvarado Street.

Density Bonus Law (Government Code Section 65915) and the Housing Accountability Act (Government Code Section 65589.5(j)(3) preclude the application of subjective "compatibility" determinations to density bonus housing projects. However, there is no evidence that Taix Square's location, size, height, operations and other significant features will not be compatible with the surrounding neighborhood, or that Taix Square will adversely affect or further degrade adjacent properties, the surrounding neighborhood, or the public health, welfare, and safety.

The neighborhood surrounding Taix Square has a varied land use pattern with multiple architectural styles. Buildings in the area are built to a variety of heights, setbacks, and massing. Taix Square has been designed in consultation with City's Thirteenth District Council Office (CD 13) and community stakeholders to integrate the Property with the surrounding street grid and adjacent uses by incorporating ground-floor commercial uses along Sunset Boulevard and by two providing pedestrian paseos lined with ground floor commercial uses connecting Sunset Boulevard and Reservoir Street. Existing surface parking would be removed. Taix French Restaurant's new space will occupy its existing footprint at Sunset Boulevard and Park Avenue, with an outdoor dining patio along the new pedestrian paseo connecting Sunset Boulevard to Reservoir Street. Another pedestrian paseo will link Taix Square, the Echo Park Branch Library, Sunset Boulevard and Reservoir Street.

3. Taix Square's Main Conditional Use Permit

Taix Square will provide approximately 13,000 square feet of ground-floor neighborhood-serving commercial and retail space. Taix Square is seeking a Main Conditional Use Permit for Taix Square in order to provide the ability to serve alcoholic beverages for on-site and off-site consumption. In addition to Taix French Restaurant, Taix Square may provide up to

three restaurants and/or retail establishments offering a full line of alcoholic beverages for on- and off-site consumption. Taix French Restaurant currently operates full-line on-site sales, and previously operated a wine shop as part of its business.

The requested Main CUP would serve the administrative convenience by avoiding multiple conditional use permit requests, and each of the future restaurants and retail businesses would be required to apply for a Plan Approval with the Los Angeles Department of City Planning. Appropriate findings/justifications, conditions and measures would be applied to the individual restaurants through the required Plan Approval process to further ensure that the character of development in the immediate neighborhood is not negatively impacted.

D. Taix Square is a Sustainable Communities Project that is Exempt from CEQA

On June 28, 2022, after conducting a public hearing, the Los Angeles City Council found that Taix Square qualifies as a transit priority project pursuant to Public Resources Code Section 21155, and that Taix Square meets all the requirements of Public Resources Code Sections 21155.1(a) and (b), and meets the requirement of Public Resources Section 21155(c)(1)(A). Taix Square has therefore been declared to be a sustainable communities project and is exempt from CEQA pursuant to Public Resources Code Section 21155.1. Accordingly, there are no CEQA issues before the Planning Commission.

E. Conclusion

For all of the foregoing reasons, we respectfully request your approval of the requested entitlements for Taix Square. We look forward to answering any questions you may have at the July 28th Commission hearing.

Sincerely,

Allan J. Abshez
Partner

Councilmember Mitch O'Farrell, 13th District

EXHIBIT A

Taix Signage, Interior and Exterior: (a) Existing Taix Restaurant signage (specifically, the red and white east-facing Taix billboard sign along Reservoir Street and the vertical red and white 'Cocktails' sign along Sunset Boulevard) shall be removed and reinstalled substantially in accordance with the Project plans dated October 1, 2020 attached to Council File 22-0297; (b) the interior and exterior of the Taix restaurant premises identified on Sheet A-1.1 of the Project plans dated October 1, 2020 attached to Council File 22-0297 shall be improved for restaurant use substantially in accord with the Conceptual Plans (including signage, fixtures, and treatments) attached as Appendix E to the Historical Resource Technical Report by GPA Consulting dated January 2022 attached Council File 22-0297; and (c) the existing Taix French Restaurant cherry wood bar top shall be removed and reinstalled substantially in accord with the Conceptual Plans for the Taix restaurant premises attached as Appendix E to the Historical Resource Technical Report by GPA Consulting dated January 2022 attached to Council File 22-0297.

TAIX

Exhibit B Summer 2019 - Initial Taix development designs envisioned removing and reinstalling the Sunset fronting elevation of the existing structure. Significant updates would be required to ensure code compliance, fire-life safety requirements and structural needs. The general response from community stakeholders favored removing the elevation to provide greater public space and more connectivity between the multiple street frontages of the site.

Exhibit C Spring 2020 – The submitted Taix development designs reimagined the use of the site by creating a publicly accessible pedestrian paseo connecting Sunset Blvd to Reservoir St. creating an off-street opportunity for Taix to include outdoor dining in the process. Community stakeholders generally supported the approach, but asked that the architecture be improved.

TAIX

Exhibit D 1920's-1950's – The original Taix in downtown Los Angeles served as architectural inspiration to create a more traditional aesthetic that would be fitting with the neighboring buildings so central to the Echo Park identity. The strong horizontal lines between commercial ground floor, middle floors, and the top are prevalent in this more traditional design. Storefronts with different glazing assemblies not reaching full floor to ceiling and covered by canopies become focal elements.

Exhibit D 1920's-1950's – The original Taix in downtown Los Angeles served as architectural inspiration to create a more traditional aesthetic that would be fitting with the neighboring buildings so central to the Echo Park identity. Fire escape balconies, more ornate windowsills and headers are prevalent in this more traditional design.

TAIX

Exhibit E Summer 2020 – The updated Taix design takes inspiration from the original Taix building from downtown, as well as the other Echo Park buildings from the same era of early 1900's architecture. The more traditional aesthetic has strong vertical lines with the white pilasters but also provides for horizontal breaks between top, middle, bottom portions of the building. The public paseo has been enlarged from the previous version creating greater connectivity through the site.

Exhibit E Summer 2020 – View from Park Ave and Sunset Blvd.

Cultural Heritage Commission
City of Los Angeles
200 North Spring Street
Los Angeles, CA 90012

Re: Historic-Cultural Monument Nomination - Taix French Restaurant; 1911 W. Sunset Blvd.

Honorable Members of the Cultural Heritage Commission:

My family and I are so gratified by the community's interest in helping us continue the legacy of the Taix Restaurant. I am writing to introduce the Cultural Heritage Commission to my family's plan to preserve the Taix Restaurant and to ask that you support it.

My family created the Taix French Restaurant, and through our cooking and hospitality, have made it something dear to the hearts of Angelinos for now close to one hundred years. Our entrepreneurship and perseverance has stewarded and preserved Taix through the Great Depression, through World II, several recessions, the federal government's condemnation of our original downtown location, urban decline, numerous remodelings, and periodic changes in public taste. Well before the current pandemic, it became clear to us that Taix cannot continue in its current format and premises, and so – to enable us to continue our business – we created the plan described below.

Preserving the legacy of the Taix Restaurant is not a matter of bricks and mortar. It is a matter of restaurant economics and changing public tastes to which we must respond. Though we acknowledge the well-meaning intentions of the Silver Lake Heritage Trust and the Los Angeles Conservancy, preserving Taix is not something that can be accomplished with the tools of architectural history or by designating it as a City Historic-Cultural Monument. Indeed, well-meaning intentions can have negative and unintended consequences which could put an end to the Taix Restaurant if the City does not act with careful consideration.

The City of Los Angeles has recognized Taix for its importance as a legacy business before (*see* Exhibit A), and we have no objection to our restaurants site being recognized as a Historic-Cultural Monument if it is done properly and in a manner that allows us to evolve so that we can preserve and continue our business. And so, we ask that in considering the application before it, the Commission support our plan, and – if the Commission does nothing else – it observe the primary dictate of the Hippocratic Oath: "Do No Harm."

Accordingly, for the reasons discussed in more detail below, on behalf of our family I respectfully request, that if the Commission chooses to recommend that Taix French Restaurant

be added to the City's list of Historic-Cultural Monuments, the Commission recommend that the designation pertain to the site of the restaurant (and not the existing building) and that the Commission find that:

1. The Taix French Restaurant exemplifies significant contributions to the broad cultural, economic or social history of the City and state of California;

2. The primary significance of Taix French Restaurant as a historic-cultural resource is as a commercial use and legacy business that has been dear to the hearts Angelinos for almost 100 years despite many changes in its location, premises, décor, format, and menu;

3. Preservation of the Taix French Restaurant as a historic-cultural resource requires that it be able to respond to economic and social challenges that compel changes in its current physical premises;

4. The Taix family preservation plan will enable the continuation of Taix French Restaurant at its present site, and includes character-defining interior and exterior features that will continue to convey the historical significance of the restaurant and justify the inclusion of its site on the City's list of Historic-Cultural Monuments.

A. Taix's Present Circumstances

a. Taix's Cultural Significance is not in Current Building

The cultural significance of the Taix Restaurant is most assuredly not the building in which it is located or our tenant improvements, and the application filed by Silver Lake Heritage does not contend that it is:

> *"Taix French Restaurant is significant as one of the oldest and most enduring businesses in Los Angeles. The dining establishment has remained in continuous operation between 1927 and the present in its two locations, and remains one of the city's most iconic and beloved local businesses, as well as one of the last vestiges of historic Frenchtown."*

The Historic Resource Group's accompanying report concedes considering how to address Taix as a legacy business resource is complex because *"evaluating properties that are **significant for their use** is difficult, and the guidelines and eligibility standards are relatively subjective in comparison to the established thresholds for evaluating other types of significance."* HRB goes on to recognize that long-lived businesses often have a social – "intangible" – importance rather than a physical or architectural significance:

"In Los Angeles and elsewhere, well-established and long-lived businesses take on important social qualities and often, over time, they organically mature into iconic and revered cultural institutions. Their endurance becomes ingrained into a community's collective memory and plays an integral role in defining a community's sense of cultural and commercial identity. Businesses such as these "have the power to bring people together, provide a sense of continuity with the past, and lend [cities] a rich and layered identity" that is rooted in aspects of their history. ***Though the reasons belying their significance are typically rooted in tradition, culture, and other intangible qualities, these businesses are important because they build a very tangible bridge linking the present with the past."***

b. Taix Cannot Continue In Its Present Building and Format

The truth is that Taix cannot continue in its present building and format. Indeed, while some may find that our premises evoke a certain nostalgia, Taix's over-sized and aged building and infrastructure – and the property taxes, operational, staffing, maintenance and insurance costs associated with them – as well as changing public tastes, would have led to Taix's closure had our family not adopted the preservation plan that we are asking your Commission to support. Put simply, Taix is no longer profitable and its premises are a white elephant.

Even before the COVD-19 public health emergency, our facilities (particularly our extensive banquet facilities) were significantly under-patronized due to increased competition and changing public habits. We no longer need, and cannot afford, a large parking lot, when more and more of our patrons are using Uber and Lyft. Organizations that used to meet in our banquet rooms weekly or monthly are now far and few between, and most no longer exist. We are now long-past the point where Taix's operating revenue is able to support this unnecessary overhead.

Maintaining and insuring our aged-infrastructure consumes a major portion of our reduced revenue. Even if we could snap our fingers and down-size the restaurant and our property, millions of dollars would be required to accomplish the build-out we require and provide capital to restart the business – millions of dollars which the non-existent profits of the restaurant cannot provide. Needless to say, the public's affection and civic recognition cannot provide those dollars either.

In 2018, we realized that in order to continue Taix, the best course for us would be to sell the property to a user that would help us continue at our current site, in a new 'right-sized' format, with new infrastructure. We carefully examined over a dozen developers, and we ultimately decided to move forward with Holland Partner Group, to whom we sold the property in the summer of 2019. HPG has a history of building quality and thoughtful developments throughout Los Angeles and Southern California. Their vision of what this corner of Echo Park could be, with placemaking and the additional energy housing provides, were aligned with the

ideas we had to renew and continue Taix. And together, we began planning the next "new Taix."

Moreover, the structure of our transaction with HPG saved us. Although the restaurant is no longer profitable, HPG has enabled us to stay open by relieving us of the burden of mortgage debt, property taxes and insurance, and by giving us free rent. The last few months of the COVID 19 public health emergency have further reinforced the long term need to adjust our business plans. Sales have significantly dropped, and even at zero rent, the cost of operating the restaurant is not nearly being covered. The easy thing to do for us is give up, but we are not doing that.

B. Taix Has Continually Changed Since Its Founding

Those who may believe it is necessary to 'freeze' Taix in time in order to preserve are not sufficiently acquainted with our actual history, and do not understand what our restaurant is as a cultural resource. As entrepreneurs, our family business has had to adapt over and over again in order to survive. Indeed, in 1962, aware that the federal government would soon 'condemn' our original downtown premises, my grandfather took the risky step of moving what was already a City institution to 'new' premises in Echo Park and – on top of that – he changed the restaurant's format from family-style dining to entrée menu service. But, notwithstanding the dramatic changes in locale, décor, menu and service that took place, the public recognized that grandad had preserved what was essential in "Taix." As the LA Times reported:

Original Bargain Duplicated[1]

The family and I finally got around to trying what some people call "The new Taix." It is at 1911 Sunset Boulevard, just east of Alvarado Street, and its true name is Les Freres Taix. It is the old Botwin's Café and is somewhat décor-dash wise, a far cry from the original Taix down on Commercial Street – tufted leather booths, carpeting, table cloths, and attractive waitresses rather than 80-year-old waiters. Incidentally, the original Taix is still in business, hasn't yet been bulldozed as a lot of people seem to think. Anyway, at the so-called "new Taix" you get the same generous tureen of excellent vegetable soup, salad with the same garlicy dressing, huge serving of pot roast with large portions of tomato-infested zucchini, creamed au gratin potatoes, sherbet, and coffee – all for $2.25. It is not exactly a gourmet repast. But, you can't beat the price. What's more, they have a red Mountain Wine for 90 cents a half bottle (by Louis Martini) that needs no apologies. And the cocktail lounge is exceptionally attractive. For an economical dine-out treat for the family, or to takeout the girl friend on the night before payday, this in one of the town's better bargains.

---

[1] Los Angeles Times, Sunday, November 3, 1963.

Moreover, the changes did not stop in 1962. We have never stood still; no service business can afford to do so. In 1969, we undertook a major renovation that included adding banquet rooms, a wine shop and cellar, the porte cochere, a parking lot, a new bar and the cocktail lounge. The 1970s brought a more continental menu and saw the onset of neighborhood blight. In the 1980s, continental cuisine began to fall out of public favor. We changed our menu, began a room-by-room remodeling to impart an older look to our restaurant, and closed our wine shop. That process continued into the 1990's and 2000's, when we added many older-looking features such as tin ceilings, patinaed mirrored walls, more brick wainscoting, antique-style light fixtures, changed booth layouts and covering, and wood paneling. Little today is left from the 1969 renovation – but our family's legacy business continues to be recognized by the public.

C. Our Preservation Plan

There are four key components of our family's preservation plan for Taix: (1) remain at our site; (2) off-load overhead that the restaurant can no longer support; (3) move into right-sized premises with new infrastructure; and (4) retain our identity while responding to current public tastes and preferences. Our sale to HPG has enabled us to accomplish the first two objectives. The other two components of our plan are discussed in more detail below.

a. Right-Sized Premises with New Infrastructure

As explained earlier, it is not economically feasible to continue to operate in our current premises. Therefore, every plan we have considered requires that Taix be reborn into a smaller, approximately 5,000 square foot footprint with new kitchen, storage, and HVAC facilities. Retaining our aged existing building, and its inefficient and outmoded layout, would be fundamentally incompatible with this objective.

Working with HPG, we developed a plan to renew Taix into a new right-sized restaurant facility. Because the conventional preservation approach often involves some recognition of a building's existing edifice, our initial plan proposed fronting the new building with our current faux-Normandy Sunset Boulevard elevation. *See* Exhibit B. But frankly, that plan pleased no one: not City Planners who wanted to see us activate our stagnant Sunset Boulevard and make it pedestrian friendly; not local stakeholders who told us that retaining what they considered a kitschy, rather tired 'screen set' would be an empty gesture that added nothing to the community; and not preservation voices who are uncomfortable with the idea of new construction. We were asked to think instead about the importance of our site in relation to surrounding properties and the street grid, and how redevelopment of our site could benefit the community over the decades to come. So together with HPG, we went back to the drawing board.

TAIX

b. Taix In its New Context

Together with HPG, over the next year we engaged with a "design council" of local stakeholders brought together by Councilmember O'Farrell. Through a series of design iterations (*see* Exhibit C) we were ultimately asked to create a pedestrian paseo through the Project from Reservoir and Liberty Streets to Sunset Boulevard that would provide a visual corridor through to Park Avenue and Echo Park to the south.

The resultant transit and pedestrian-friendly development provides 5,500 square feet of new restaurant space for Taix to continue in its current location and footprint, an additional 7,500 square feet of ground floor retail space that will activate the paseo and Sunset Boulevard, and 166 residential units (including 24 units reserved for very low income households).

A second pedestrian paseo will connect the main Project paseo to the Edendale Branch Library (whose parking and primary entrance is from Alvarado Street) transforming our property into the "hub" of the neighborhood – with Taix at its very center. Our shared property line with the library will include four "walk-up" units and a large scale mural.

Our schematic designs have been shared with the Echo Park Improvement Association and the Echo Park Neighborhood Council, who ultimately asked us to finish it with architecture that would be "of Echo Park, and for Echo Park."

With this direction, the design team explored the Echo Park neighborhood, looking to strong examples of early 20th century architecture nearby. The traditional architecture, with pronounced top, middle and bottom horizontal separations, unique storefront street frontages, fire escape balconies and selective uses of arched windows were common themes that the team embraced in the Taix design. Further, given the architectural period of inspiration, pictures of the original Taix building in downtown LA offered direction as well. *See* Exhibit D. With the black framed storefront and red canopies overhead, the new Taix design now provides a distinct nod to the original home of the restaurant. *See* Exhibit E.

c. The "New Taix"

At the center of all this will be the "New Taix" – right -sized , designed to respond to current public tastes, planned with efficiency in mind, and finished in an aesthetic that will provide a familiar experience to our long time patrons. Those patrons will be greeted with an adaptation of the storefront that graced our original downtown premises flanked by our existing "Cocktails" sign. The "New Taix" will remain on its existing site, along Sunset, with its footprint occupying approximately the same position as our bar lounge today.

Therefore, when we reopen, our patrons will find us just where we were...

TAIX

The new Taix will be comprised of approximately 5,500 square feet broken into multiple interior rooms, with an adjoining 1,500 square foot outdoor dining patio along the Project's new pedestrian paseo that will connect Sunset Boulevard to Reservoir Street. *See* Exhibit F. Our new indoor/outdoor format will respond to the public's desire to enjoy the popular California outdoor dining experience so much in demand while sheltering diners from the hubbub of traffic along Sunset. *See* Exhibit G. The outdoor patio will be directly integrated into the restaurant's interior via operable window-door assemblies that will allow light into Taix's interior, and allow our interior space to seamlessly flow into the outdoor environment.

Inside, we will retain Taix's feel and sense of place by reusing our beloved Cherrywood bar top, along with our trademark patinaed mirrors lining the wall behind the bar. *See* Exhibit H Much of the restaurant's ceiling will be covered with a faux-tin ceiling tile similar in style to that found in our dining rooms today. The bar room walls will be lined with half a dozen booths, with the center of the bar room housing tables that can be moved and adjusted as the occasion demands.

Further back in the restaurant, there will be a darker and more intimate space for another dozen horseshoe, Pullman and circular booths like we have today. This space is conceived to embrace the darker "speak-easy" experience many of our current patrons enjoy. Patinaed mirror treatment along the walls and the faux tin tiles on the ceiling provide the depth of material to accent the plush booth benches that wrap the perimeter of this room.

Beyond this space, a small private dining room can be accessed designed for more intimate parties of approximately a dozen guests, with the restrooms and operations office further down the corridor. The kitchen, back of house and associated storage will be positioned in the center of our space with a backdoor that leads directly to an off-street loading zone and a secure and ventilated commercial trash room.

D. Conclusion

As the City Council Resolution presented to us on the occasion of our 60th anniversary noted,

"WHEREAS CIRCUMSTANCES, TIME AND PLACES HAVE CHANGED DURING THE PAST SIX DECADES, BUT THE WARMTH, CAMARADERIE AND SIMPLY GOOD FOOD AND SERVICE REMAIN THE SAME. THE SPIRIT OF THE BROTHERS –LES FRERES –LIVES"

TAIX

In the spirit of the City Council's Resolution, and for all of the foregoing reasons, we ask that if your Commission chooses to recommend that Taix French Restaurant be added to the City's list of Historic-Cultural Monuments, the Commission recommend that the designation pertain to the site of the restaurant and that the Commission adopt the findings set forth on the first page of this letter.

Thank you for supporting our efforts to preserve the Taix French Restaurant,

Mike Taix

Re: Taix French Restaurant, 1911 W. Sunset Boulevard; Council File 22-0297; Sustainable Communities Project Exemption (SCPE) No. ENV-2020-3141-SCPE

To the City Council:

In their June 20, 2022 letters to the City Council, the LA Conservancy and Silver Lake Heritage Trust questioned my family's efforts to preserve and continue our family's legacy business, the Taix French Restaurant. We have reviewed these letters and would like to clarify for the record that the letters do not accurately reflect the actual history of Taix French Restaurant including the many changes that it has undergone over the years for reasons internal and external, and my family's continuing struggle to keep the business profitable and afloat.

As we have previously informed the City and testified, the overhead associated with our current over-sized building and its aged and outmoded infrastructure made our restaurant unprofitable some time ago. Were it not for the free rent being provided by Holland Partner Group, and their encouragement for us to remain open while the Taix Square Project is being processed by the City, we would have already closed.

The facts are these: One of the primary reasons we selected Holland Partner Group was their willingness to make provision for the continuation of Taix French Restaurant. I personally worked with Holland to design the new premises for the restaurant so that it meets our current and future needs. Those plans are part of Holland's application for the Taix Square Project. We have negotiated a letter of intent with Holland for the lease of those premises based on the current plans. A copy of the letter of intent is attached (its economic terms are proprietary, and so they are redacted). Obviously, we cannot enter into a long term lease for something the City does not approve to be built. Thus, we are anxiously awaiting the City's final entitlements for the new Taix Square Project so that its construction can get underway, and there will be premises for us to lease and to continue our legacy business.

As the COVID-19 pandemic tragically demonstrated, nothing in life is predictable or certain. We want to continue our legacy business, but we cannot hold out forever. If the Taix Square Project continues to be delayed, the restaurant may need to permanently close. The shell of our former building may or may not remain for some time but what would it commemorate without the Taix French

Restaurant? Please approve the entitlements for the Taix Square Project so that our legacy business may continue.

Respectfully,

Mike Taix
