**Comments for Public Posting:** Dear Councilmember de Leon, When you were in the state legislature, the Hillside Federation presented you with an environmental award. Today we are asking you to once again stand up for the environment and vote No on Metro's TCN digital billboard projects. It proposes installing huge flashing billboards near designated Scenic Corridors, parks, the LA River, and designated historic sites. These billboards will be a blight on the City for years to come. The city doesn't need this ill-gotten revenue; it is already getting revenue for bus shelters from the STAP program. The Hillside Federation urges you to vote No on TCN billboards.
