I strongly **OPPOSE** Item #7 on the Metro Board of Directors' agenda for the 10AM meeting this Thursday, January 26, 2023 for the following reasons:

- The final Environmental Impact Report (FEIR) is fatally flawed and therefore should NOT be approved.
- There has been no community outreach.
- It clearly undermines the City of Los Angeles's 2002 Sign Ordinance and the City's ban on new off-site billboards.
- Newly elected City and County officials have not had time to evaluate the program and its impact on their communities.
- The TCN Program is **NOT** a transit program; the TCN program is an advertising program.

I respectfully request the TCN be pulled from the consent calendar and sent to LA City for public hearings.

Sincerely,

Kevin Miller

To whom it may concern: Your constituents have opposed this for quite some time now and it is time we were listened to! Los Angeles does not need MORE distractions in driving- pedestrians being hit by cars has increased dramatically. This is a simply a way for the city to not do it's job- and putting Angelenos in a public safety situation where injuries and deaths will occur. Not to mention how un- environmental the plan is.

Dear Board of Directors,

I **oppose** the TCN Program to install 97 changing digital billboards over 16 commercial corridors and 8 different freeways across LA City, including the Ballona Wetlands Ecological Reserve and other sensitive location. I live in Los Angeles' first Wildlife District and am well aware of the damage that these huge billboards will cause to wildlife consequently, to their habitat. NFF-4 at the NW corner of Lankershim Blvd. and Universal Hollywood Drive will be adjacent to our new Wildlife District. This is entirely inappropriate.

The FEIR is fatally flawed and cannot be approved. I am asking that you pull the TCN from the consent calendar and send to LA City for public hearings. This misguided program undermines the Los Angeles Sign Ordinance of 2002 and the City's ban on. new off-site billboards.

This is yet another program with no public benefit. It is purely an economic venture , selling advertising, no matter what the cost to the public. Those costs include dangerous impacts to safety, visual blight, privacy, human health issues associated with sleep disturbance, and harm to our environment.

Give the public a voice!

Sincerely,
Suellen Wagner

Item #7 – 1-26-2023: OPPOSE

City Clerk: Council File 22-0392

Please Halt Metro Approval of Huge Digital Billboards Across Los Angeles!

Please delay this entire matter until the neighborhood councils and community organizations have been given full presentations and opportunities to weigh in on this proposal.

Please ask Metro to pull the item off its consent calendar and send it to the City of Los Angeles for public hearings and environmental approval for the following reasons:

The community has not been given the opportunity to speak before the Metro Board or to review the Environmental Impact Report.

Newly electeds at the City and County levels have not had ample time to review and evaluate the program and its impact on their communities.

The TCN Program is **NOT a transit program** and has a title that misleads the public. The TCN program is an advertising program designed to generate ad revenues. **Metro cannot be the lead agency.** LA City must be the lead.

ALSO Please remove from this proposal the billboards proposed to be placed surrounding the Ballona Wetlands Ecological Reserve, where Angelenos come to learn about and experience our unique wetlands ecology.

Thank you!
