Comments for Public Posting: Please authorize the use of goats ASAP to control invasive weeds in the Sepulveda Basin; use of goats to graze this weed is a well established practice and needs to be activated immediately, to save us another awful fire season in the Basin

Comments for Public Posting: This is a GREAT idea. The owners of the goats have a system in place and can quickly set-up if only they have approval and funding. The Lake Balboa NC voted to approve funding for goats in the basin last year but authorization from the city was not received.
