

**CITY OF LOS ANGELES**  
INTER-DEPARTMENTAL CORRESPONDENCE

DATE: August 29, 2025

TO: Los Angeles City Planning Staff  
Los Angeles Department of Building and Safety  
Interested Parties

FROM: Craig Weber   
Principal City Planner  
Los Angeles City Planning

**SUBJECT: SUMMARY OF CLARIFICATIONS WITH THE DOWNTOWN  
COMMUNITY PLAN UPDATE: ZONING ORDINANCE, AND DOWNTOWN CPIO  
BOUNDARY AND SUBAREA MAPS**

*This memo provides corrected table data in Attachment A and B, and supersedes the memo titled "Attachment to Communication dated 8-11-25 – Downtown Community Plan Update" found in the Council File 22-0617.*

The Downtown Community Plan Update incorporated the redesignation of two previously existing community plans, the Central City Community Plan and the Central City North Community Plan, into the new Downtown Community Plan, and rezoned every parcel in the plan area with zone designations in the City's New Zoning Code, found in Chapter 1A of the Los Angeles Municipal Code. On February 6, 2025, the City Council adopted a Zone Change Map and Matrix Ordinance to rezone every parcel (approximately 16,455 parcels) in the Downtown Community Plan area. In addition to the new zoning designations, approximately 61% of the total parcels were zoned to be included in the Downtown Community Plan Implementation Overlay (Downtown CPIO). Parcels in the Downtown CPIO included "-CPIO" in the zone string and were mapped in the City's Zone Information and Map Access System (ZIMAS). With any work effort of this size and scale, in the implementation of the Zone Change Ordinance and the CPIO Ordinance, the Planning Department has identified a small percentage of errors in the Zone Change ordinance and in the maps included in the Downtown CPIO Ordinance. These errors affect fewer than 2% of the total parcels in the plan area.

This memo is intended to provide City Planning's interpretation where an error is shown by either a clear conflict between language and/or map illustrations consequently creating an ambiguity requiring interpretation, or where the plain language or mapping shown in the Zone Change Ordinance or CPIO Ordinance is inconsistent with the zoning scheme created by the Zone Change Ordinance and CPIO Ordinance, and/or would have absurd results, and/or would directly undermine the City Council's manifest purpose of the Downtown Community Plan Update or CPIO demonstrated by the purpose statements in the ordinances and the legislative history. This memo, as well as the referenced Zoning File Memos (ZIs), are intended to interpret the ordinances for future implementation and provide the basis for City Planning's interpretation.

**Background:**

On February 6, 2025, Ordinance No. 188,474 (Zone Change Map and Matrices Ordinance) became effective and established the new zoning designations for properties

located within the Downtown Community Plan. Additionally, Ordinance No. 188,425 (Downtown Community Plan Implementation Overlay Ordinance) became effective through Ordinance No. 188,474 and established the boundaries and subareas of the Downtown CPIO. Within the Downtown CPIO, City Council established four Subareas: the Community Benefits Program Subarea (Subarea A), the Bunker Hill Subarea (Subarea B), the Civic Center Subarea (Subarea C), and the Historic Resources Subarea (Subarea D). The Community Benefits Program Subarea (Subarea A) is subdivided into four additional subareas: A.1, A.2, A.3 and A.4.

Within both Ordinances, No. 188,474 and No. 188,425, there were errors found that are not consistent with the clear purposes and intent of the Downtown Community Plan, and its Community Plan implementation, which sought to apply a Community Benefits Program to all properties where residential uses are permitted. For instance, some properties were given a CPIO suffix in their zone string, however those properties were never intended to be included within the CPIO, do not allow for residential uses, and cannot convey the residential incentives provided for under the CPIO. There were other instances in which the CPIO was correctly included in the zone string for some properties and the CPIO designation on the Zone Map is consistent with City Council's stated intent for the CPIO, however, those properties were mistakenly omitted from the CPIO's Subarea maps.

Additionally, approximately 90 properties were found to have juxtaposed Development Standards Districts and Density Districts, which resulted in certain properties being incorrectly assigned "Development Standards District FA," which does not exist within the Zoning Code, and "Density District 5," which also does not exist within the Zoning Code.

Below are brief summaries of official clarifications made regarding the boundaries of the Downtown Community Plan Implementation Overlay (Downtown CPIO), the boundary and subareas related to certain properties within the Downtown CPIO, as well as zoning designations related to the Density and Development Standards Districts for specific properties located within the Downtown Community Plan. These clarifications have been addressed and corrected in the City's Zone Information and Map Access System (ZIMAS) as well as within subarea maps found on the department's website. Properties that have been corrected have been flagged in ZIMAS by one or more of the following Zoning File memos (ZIs):

**1. ZI-2540: Clarification on Downtown CPIO Subarea Maps**

This memo addressed the boundary of the Downtown CPIO and clarified the boundary and subareas related to certain properties. Properties flagged by this ZI had CPIO in the zone string but were not included in the subarea maps to clarify eligibility within the Downtown CPIO. Additionally, some properties were given a CPIO suffix in their zone string; however, those properties were never intended to be included within the CPIO and the various subareas. The ZI provides the basis for the Department's interpretation of the inconsistency between the map and the zone string in the ordinances.

This clarification affects eligibility for specific incentives and is consistent with the purposes and intent of the Downtown Community Plan, and its Community Plan

implementation, which sought to apply a Community Benefits Program to all properties where residential uses are permitted in the Zoning Use District and base-and-bonus Floor Area Rights are permitted in the Zoning Form District; a requirement for two-bedroom dwelling units for certain residential development projects in the Chinatown community, an allowance of additional floor area for a minimum of 50 % of the total floor area when allocated to non-residential uses for certain properties in the Arts District; protection of historic resources; and an allowance for the Transfer of Development Rights for certain properties also within the Chinatown community; as well as allow the transfer of FAR between City-owned properties within and in proximity to the Civic Center Area.

Subject Properties Removed and/or Added to Subarea Maps of the Downtown CPIO:

The [Staff Recommendation Report and Technical Modification Transmittals to the City Planning Commission](#), dated September 2022, the [Downtown CPIO Ordinance](#), as well as the [Letter of Determination](#), issued September 27, 2022, make numerous references as to the intent of City Council and the application of the Downtown CPIO and the assigned subareas. Listed below are four distinct areas that are to be removed and/or added to the subarea maps of the Downtown CPIO. Below each listed area are specific records that demonstrate the clarification is fixing clear errors. Refer to **Attachments E, F, G, H, I and J** for the corrected subarea maps.

A. Six properties on Bernard Street, between North Broadway and Hill Street, zoned [LM2-G1-5][CX1-FA][CPIO] and with the land use designation of Village, were to be included in Subarea A, Subarea A.3, Subarea A.4, and Subarea D of the Downtown CPIO. The subject properties are correctly identified within the Downtown CPIO Ordinance Boundary Maps, the Downtown CPIO Boundary Map, as well as the Local Affordable Housing Incentive Map, in addition to the following references listed below.

i. Subarea A Map:

- Page A-14 of the [Staff Recommendation Report](#), dated September 2022, states “the Proposed Plan introduces a “Community Benefits Program” that incentivizes the development of Restricted Income Affordable Housing Units on-site, as part of new housing projects. Under this program, housing projects can achieve higher development rights by setting aside a certain number of their housing units as affordable. The system is designed to encourage housing for a range of incomes, from market-rate housing to housing for households earning less than 15% of Area Median Income (AMI).”
- Page A-28 of the [Staff Recommendation Report](#), states “the main incentive used to garner public benefits under the Proposed Project is through floor area rights (depicted as Floor Area Ratio, or FAR), and in some places building height (depicted as stories). Zoning Form Districts outline Base and Bonus FAR for each parcel. The Base FAR is available by-right and the project need not provide any onsite benefits to utilize this. The Bonus FAR is available for projects that participate in the Community Benefits Program.”

- Page A-30 of the [Staff Recommendation Report](#), states “the proposed system explicitly prioritizes the creation of much needed affordable housing, to make Downtown more affordable, especially for lower-income households, in proximity to existing and anticipated jobs, amenities, services and transit resources. The system also deliberately focuses on a set menu of benefits that are most needed in Downtown, so as not to dilute the impact of the Program. To better facilitate housing production, and investment Downtown, the Community Benefits Program is largely designed to be implemented through a ministerial process, and therefore, includes a predefined set of standards and requirements to qualify as community benefits.”
- Page A-44 of the [Staff Recommendation Report](#), in referencing Village land use designation, states that the “.. purpose of this designation is to ensure a range of housing types for all incomes and family sizes that are integrated with commercial uses such as restaurants, retail, services, and small professional offices to create complete neighborhoods and active streets and alleys and to retain a lively and safe pedestrian atmosphere for existing residents and new neighbors.”
- Page A-47 of the [Staff Recommendation Report](#), states that “a feature of the Proposed Project is an integrated zoning incentive system that links development capacity and public benefits. Under this system, proposed developments would be eligible for increased Floor Area or height in exchange for providing additional public benefits” and “the proposed menu of public benefits including affordable housing; publicly accessible open space; preservation of historic resources; and community amenities, are tailored to the needs of Downtown.”
- Page A-48 of the [Staff Recommendation Report](#), two maps are included, titled “Base Maximum Development Potential” and “Bonus Maximum Development Potential,” in which both maps include the subject properties on Bernard Street within Chinatown.
- Page A-49 of the [Staff Recommendation Report](#), states “the Community Benefits Program (CBP) Subarea A strives to introduce more mixed-income and 100% Affordable Housing, provide access to public open space and community facilities, and facilitate the preservation and rehabilitation of historic resources in the Downtown Plan Area.”
- Page F-4 of the [Letter of Determination](#), issued on September 27, 2022, states that “the Proposed Plan includes policies aimed at making streets more walkable, encouraging engaging and human-scaled ground floor uses and an enhanced public realm including ample sidewalks, street trees, and street furniture. The New Zoning Code, Zone Changes to apply the New Zoning Code to the Downtown Plan Area, and the proposed CPIO, implementing those policies, introduce land use designations and zoning districts that promote accessible and lively pedestrian environments, supporting the establishment of commercial and mixed-use districts. New zoning districts apply development standards regulating the design and orientation of buildings adjacent to sidewalks, alleys, and public spaces that promote activation of the ground floor in the mixed-use neighborhoods of the Transit Core,

Traditional Core, Community Center, Hybrid Industrial, Markets, and Village designations and in the multi-family neighborhoods of the Neighborhood Residential designation to encourage pedestrian activity.”

- Page F-15 of the [Letter of Determination](#) states that the “...proposed CPIO seek[s] to increase the supply of affordable housing through incentives that prioritize affordable housing and development standards that streamline the production of housing.”
- Page F-15, “...proposed CPIO include policies, implementation programs, and zoning tools that increase housing capacity, direct residential growth near jobs and transit, and incentivize the provision of affordable units.”
- Page F-15, “...proposed CPIO seek[s] to increase the supply of affordable housing through incentives that prioritize affordable housing and development standards that streamline the production of housing.”

The subject properties on Bernard Street are zoned with base and bonus development rights, and allow for residential uses, therefore their inclusion within Subarea A is the only manner in which bonus development rights may be effectuated.

ii. Subarea A.3 Map:

- Page 24 of the [Supplemental Recommendation Report](#) dated August 26, 2021, states that “at the June 17th, 2021, CPC meeting, commissioners requested information on the requirement for multi-bedroom units in projects participating in the Community Benefits Program within the Downtown CPIO Subarea A.3, which encompasses the Chinatown neighborhood.”

The subject properties on Bernard Street are within the Chinatown neighborhood and were intended to ensure larger units in new housing projects participating in the incentive program. Furthermore, there is no record of an intention to specifically remove the subject properties from the multi-bedroom requirement that is otherwise applied to all neighboring properties.

iii. Subarea A.4 Map:

- Page 23 of the [Supplemental Recommendation Report](#), within the section on Transfer of Development Rights in Chinatown, states that “parcels with a proposed Village and Community Center General Plan Land Use designation can serve as an appropriate boundary to buy and sell FAR under the Chinatown TDR program.”

The subject properties have the land use designation of Village and are located within the Chinatown neighborhood, which is under the Transfer of Development Rights Program.

## iv. Subarea D Map:

- Page A-21 of the [Staff Recommendation Report](#), states that “the Proposed Plan also notes the importance of Downtown’s many historic and architectural assets. In neighborhoods that have an abundance of eligible and designated historic resources, the Proposed Plan’s CPIO includes procedural requirements applied to select areas of the Historic Core, Arts District, Chinatown, and Little Tokyo communities, to ensure that work done to a building or site that is an Eligible Historic Resource is done in a manner that would not compromise its eligibility, or that appropriate steps are taken in compliance with CEQA where any work proposed would compromise its eligibility.”
- Page A-33 of the [Staff Recommendation Report](#), states that “the Proposed Plan seeks to concentrate the greatest amount of growth in high transit served areas, while thoughtfully allocating for incremental growth in historic communities such as Chinatown and Little Tokyo and as well as near civic and natural resources such as the Los Angeles River, Elysian Park, and Los Angeles State Historic Park.”
- Page A-50 of the [Staff Recommendation Report](#), states that “the purpose of this Subarea D, which includes neighborhoods that have an abundance of historically and architecturally significant buildings, is to guide the ongoing restoration and/or rehabilitation of these structures through an additional level of review.”

The subject properties are located within the Chinatown neighborhood and include properties identified as eligible historic resources. Additionally, the subject properties have the land use designation of Village, they are zoned within the LM2 Form District, which conveys base and bonus floor area rights, and they are zoned within the CX1 Use District which allows for residential uses. There is no alternative system by which bonus development rights may be conveyed other than those afforded through designation through inclusion in CPIO Subarea A. The omission from the CPIO Subareas Maps does not allow for the effective conveyance of development rights for these properties, as they were intended to be included in the Downtown CPIO to facilitate housing development. Furthermore, all properties within the Chinatown area were intended to be included within Subareas A.3, A.4, and D, as is shown by various records adopted by City Council.

- B. Six properties on Center Street, between Temple Street and Banning Street, zoned [LF1-WH1-6][1-N][CPIO] and with the land use designation of Production, were not to be included in Subarea A or Subarea C of the Downtown CPIO.

## i. Subarea A Map:

- Page A-46 of the [Staff Recommendation Report](#), states that “production areas are characterized by Very Low-Rise Full, Low-Rise Full, Mid-Rise Broad, and Mid-Rise Medium Form Districts with FAR’s generally limited to a maximum of 4.5:1. Regulations for these Form Districts guide development of large-format structures in flexible lot configurations to balance goods movement, loading, and distribution needs with

pedestrian-scaled design that supports a healthy environment for all users.”

- Page A-49 of the [Staff Recommendation Report](#), states “the Community Benefits Program (CBP) Subarea A strives to introduce more mixed-income and 100% Affordable Housing, provide access to public open space and community facilities, and facilitate the preservation and rehabilitation of historic resources in the Downtown Plan Area.”

The subject properties with the land use designation of Production were not intended to be applied with the Community Benefits Program. Rather the subject properties were intended to allow for a balance of goods movement, loading and distribution instead of the CBP’s intended focus, which was on the production of affordable housing and other community benefits through the conveyance of base and bonus development rights.

ii. Subarea C Map:

- Page A-49 of the [Staff Recommendation Report](#), “the purpose of Subarea C is to enable transfer of floor area rights across adjacent city-owned parcels within the Civic Center area. This provision maintains an overall limit on the development capacity within the district while allowing flexibility to accommodate future civic projects to meet City facility needs and achieve an active and world-class Civic Center environment.”

The subject properties are not City-owned.

C. Seven properties at the corner of 5th Street and Hewitt Street, zoned [VF-WH1-5][OS1-N][CPIO] and with the land use of Open Space, were not to be included in Subarea A, Subarea A.2, Subarea A.4, and Subarea D of the Downtown CPIO.

i. Subarea A Map:

- Page F-5 of the [Letter of Determination](#), issued on September 27, 2022, states that “the proposed CPIO implements the policies of the Proposed Plan and the Framework Element by introducing zoning districts that increase capacity for housing and employment near transit and promote the development of complete communities.”
- Page F-15 of the [Letter of Determination](#), states that the “...proposed CPIO include policies, implementation programs, and zoning tools that increase housing capacity, direct residential growth near jobs and transit, and incentivize the provision of affordable units.”

The subject properties have the land use designation of Open Space, which does not permit residential or commercial land uses, nor does it permit the construction of buildings, hence it was not intended to be included in the Downtown CPIO.

ii. Subarea A.2 Map:

- Properties within Subarea A.2 of the Downtown CPIO are intended to ensure employment uses within the Arts District. Page 14 of the

[Downtown CPIO Ordinance](#), states “Subarea A.2 encourages employment uses within the Arts District.”

The subject properties, which limit the capacity for housing and employment uses as it is designed as Open Space, was not intended to be in Downtown CPIO, nor Subarea A.2.

iii. Subarea A.4 Map:

- Properties within Subarea A.4 of the Downtown CPIO are intended to allow the transfer of development rights within the Arts District, Little Tokyo, and Chinatown to encourage the preservation of historic buildings. Page A-29 of the [Staff Recommendation Report](#), states “projects located in the Arts District generally to the east of Alameda Street may use the TDR program to buy or sell, and transfer unused floor area” and “under the TDR program, any site within the Arts District, designated as a Los Angeles Historic-Cultural Monument, sites listed in or formally determined eligible at the local, State or Federal level, or is identified as a contributor to a historic district or individual resource by SurveyLA, are eligible to donate unused Floor Area to a proposed project.”
- Page A-29 of the [Staff Recommendation Report](#), states that “... the Arts District is home to a high concentration of Turn-of-the-Century industrial and commercial buildings and railroad infrastructure. These tend to be larger, more adaptable structures that can easily benefit from rehabilitation. However, they tend also to be built at an FAR that is lower than the FAR that is being proposed for this area. Thus, the TDR program can play an important role in promoting reinvestment in existing buildings, while supporting growth within the surrounding area.”

The subject properties are not designated as historic resources or eligible historic resources. Additionally, the properties have the land use designation of Open Space, which would limit their capacity for housing.

iv. Subarea D Map:

- Page A-50 of the [Staff Recommendation Report](#), states that “the purpose of this Subarea D, which includes neighborhoods that have an abundance of historically and architecturally significant buildings, is to guide the ongoing restoration and/or rehabilitation of these structures through an additional level of review.”

The subject properties are not designated as historic resources or eligible historic resources, and were not intended to be included in the Downtown CPIO or subarea.

D. 80 properties zoned CCA-SN-O, within the Convention Center and Arena Specific Plan, were not to be included in Subarea A of the Downtown CPIO.

i. Subarea A Map:

- Per [Ordinance No. 188,077](#), effective February 5, 2024, the Convention Center and Arena Specific Plan (CCA), formerly known as the

Convention and Event Center (CEC), was amended with a Vesting Zone Change and Height District change from PF-4D-O and C2-4D-O to CCA-O-SN. This action to establish the CCA zoning designation was subsequent to the City Council's May 3, 2023 adoption of the Downtown Community Plan, and was intended to convey the appropriate zones for the Convention Center area properties. There was no intention to override the CCA zoning designation with the Downtown CPIO nor to change the zone string to include CPIO.

## 2. **ZI-2541: Clarification on Downtown CPIO Boundary**

This memo addressed the boundary of the Downtown CPIO as it related to certain properties.

Properties flagged by this ZI were identified as within the Downtown CPIO, per Ordinance 188,474 (Zone Change Map and Matrices Ordinance) and in the Downtown CPIO Ordinance Boundary Maps, per Ordinance 188,425 (Downtown CPIO); however, the Downtown Subarea Maps in Ordinance 188,725 did not identify which CPIO subareas were to be applied to the subject properties, as the properties were not intended to be eligible for the Community Benefit Program nor subject to the Downtown CPIO. Additionally, the Downtown CPIO Boundary Map, found in Ordinance 188,725 (Downtown CPIO) included the Convention Center and Arena Specific Plan, which was never intended to be part of the Downtown CPIO.

Furthermore, the Local Affordable Housing Incentive Program is applied to only Subarea A of the Downtown CPIO. The Local Affordable Housing Incentive Map had included the entire Downtown CPIO Boundary, which is not reflective of the program. The ZI provides the basis for the Department's interpretation of the correct boundary for the applicable properties and clarifies the ambiguity in the ordinances.

### Subject Properties Removed from Downtown CPIO Ordinance Boundary Maps and Downtown CPIO Boundary Map

- A. 189 properties throughout the Downtown Community Plan were not to be included in the Downtown CPIO Ordinance Boundary Maps, which includes a series of four maps. These properties were not included in the Downtown CPIO Boundary Map nor identified in any of the CPIO Subarea Maps. These properties are listed on **Attachment B** titled "Table of Confirmed Properties Outside of the Downtown CPIO." The corrected ordinance maps can be found on **Attachment C** titled "Updated Downtown CPIO Ordinance Boundary Maps."
- B. 80 properties zoned CCA-SN-O, within the Convention Center and Arena Specific Plan, were not to be included in the Downtown CPIO Boundary Map nor one parcel at the intersection of Cesar E Chavez Avenue and Vignes Street (530 E Cesar E Chavez Avenue) that is zoned in the P2 Use District and cannot convey CPIO Community Benefits and no CPIO subarea was indicated. The corrected map can be found on **Attachment D** titled "Updated Downtown CPIO Boundary Map."
- C. The Local Affordable Housing Incentive Program is only applied to Subarea A of the Downtown CPIO as outlined in the Downtown CPIO Ordinance. The Local

Affordable Housing Incentive Map had included the entire Downtown CPIO Boundary, which is not reflective of the program and its eligibility. The corrected map can be found on **Attachment K** titled “Updated Local Affordable Housing Incentive Program.”

**3. ZI-2542: Clarification on Density Districts and Development Standards within Zone for Individual Properties**

This memo corrected zone designations on properties wherein their Development Standards District and Density Districts had been juxtaposed. Zoning designations consist of a five-part “zone string” inclusive of the following: [Form District-Frontage District-Development Standards District] - [Use District-Density District].

Within Ordinance No. 188,474, the zone change matrix included a juxtaposition of Development Standards Districts and Density Districts for those properties flagged by this ZI. This error resulted in approximately 91 properties being incorrectly assigned “Development Standards District FA,” which does not exist within the Zoning Code, and “Density District 5,” which also does not exist within the Zoning Code. These properties and their correct zone designations can be found on **Attachment A** titled “Clarification Zoning Table.”
